ALL the *Mongols*, according to *Gerbillon*, are of the Religion of *Tibet*, that is, Worſhippers of the Idol *Fo* [e], called, in their Language, *Fu-ſheki*. They believe the Tranſmigration of Souls, pay their *Lamas*, or Prieſts, a blind Obedience, and preſent them with the beſt Things they have. Theſe Prieſts are commonly ignorant; being accounted very learned, if they can read the ſacred Books in the Language of *Tibet*. They are alſo great Libertines, and debauch Women with Impunity; yet the great Men are adviſed, and managed by them, and give them the upper-Hand on all public Occaſions [f]. Gerbillon, Regis.

THE *Lamas*, ſays *Regis*, who are the only Perſons capable of inſtructing their Countrymen, find more Advantage in going from Tent to Tent, and repeating certain Prayers, for which they have a Stipend; or in practiſing Phyſic, which they are Pretenders to: So that few of the *Mongols* can write, or read. Several of the *Lamas* themſelves ſcarce underſtand their Prayers [g], and much leſs the ancient Books of Religion, which are written in an obſolete Stile. Their Prayers, which have alſo ſome obſolete Terms, are ſung with a ſolemn, yet harmonious Air, and make almoſt the Whole of their religious Worſhip. They make no Sacrifice, or Offering, but the People often kneel, bare-headed, before the *Lamas*, to aſk Abſolution, and riſe not till they have received it by the Impoſition of Hands. It is generally believed, that they are able to call-down Hail and Rain. This was teſtified to the Miſſioners by ſeveral *Mandarins*, who were Eye-Witneſſes to theſe Facts; and confirmed what was told them at *Pe-king*, of the *Lamas* practiſing Sorcery. They do not hold the Tranſmigration of the Soul, at leaſt not into Brutes; and, therefore, eat Fleſh, but moſtly that of wild Beaſts taken in Hunting, though they keep large Flocks of tame ones [h]. *Their Lamas.*

THE *Mongols* are very devout, every one wearing a String of Beads about his Neck, to pray-by. There is ſcarce a *Mongol* Prince, but has a Temple, though no Houſe in his Territory. *Gerbillon* ſaw the Ruins of one more than two hundred and fifty Leagues from *Pe-king*: It was built by *Chineſe* Workmen, hired on Purpoſe; and the Tiles, which were varniſhed, or rather enamelled, with Yellow, were brought from *Pe-king*. A *Lama*, who called himſelf a living *Fo* [i], and was adored as ſuch, had it erected in the Territory of the King of the *Kakas*, his Brother [k]. The *Mongols* are ſo bigotted to their *Lamas*, though generally very ignorant, and debauched, that there is very little Hope of converting them to the *Romiſh* Faith. *Their Bigotry.*

[a] Hiſtory of the *Turks*, *Mongols*, &c. p. 256. [b] The ſame, *p.* 505. [c] *Du Halde*'s *China*, p. 254. [d] Hiſtory of the *Turks*, &c. as before, *p.* 505. [e] See the Religion of *Fo*, before, *p.* 206, *& ſeqq.* [f] *Du Halde*, as before, *p.* 256. [g] Poor Wretches! they are as ignorant as the *Romiſh* Prieſts were in the ninth, tenth, and eleventh Centuries, when they could not ſay ſo much as the Lord's Prayer in good *Latin*. [h] *Du Halde*, as before, *p.* 253. [i] This was a *Khûtûkta*, or Deputy of the *Dalay Lama* of *Tibet*. [k] *Du Halde*, as before, *p.* 257.

Mongols Country.

Foïsm, when introduced.

A *Mongol* Prince, well-verſed in the Hiſtory of his Anceſtors, told *Gerbillon* (who aſked him when the *Lamas* firſt introduced the Religion of *Fo* among them) that in the Reign of the Emperor *Kûblay*, whom he called *Hûblay*, there came *Lamas* into the Country of the *Mongols*, who planted their Religion; but that theſe *Lamas* differed much from the modern; that they were Men of Learning, blameleſs in their Lives, and wrought many Miracles. The Author thinks it probable, that theſe *Lamas* were Chriſtian Monaſtics, who came from *Syria* and *Armenia*, then ſubject to *Kûblay*, and preached Chriſtianity both to the *Mongols*, and *Chineſe*: But that the Communication of theſe Countries with *China*, and *Tartary*, being afterwards cut-off by the diſmembring of that great Empire, the *Bonzas* of *China* blended their Superſtitions with the Chriſtian Cuſtoms, and introduced, by Degrees, the Religion of *Fo* among the *Mongols*. This, he ſays, is the more credible, becauſe theſe *Lamas* have many Ceremonies, and Cuſtoms, like thoſe obſerved among Chriſtians [a]. They have Holy Water, ſinging Service, and pray for the Dead. Their Dreſs is like that in which the Apoſtles are painted, and they wear a Mitre and Cap, like Biſhops; not to mention their grand *Lama*, who, among them, is much the ſame as the ſovereign Pontiff among Chriſtians [b].

The Khûtûk-tû.

AT the Head of theſe *Mongol Lamas*, there is a Deputy under the *Dalay Lama* of *Tibet*: He is called the *Khûtûktû*, and reſides at *Hu-hu-hotun*, or *Khukhu-hotun*, before-mentioned, near the *Whang-ho*, and Country of *Ortûs*, where *Gerbillon* ſaw him, in the Year 1692.

Their Government.

As to Government, the *Mongols*, as hath been already remarked, are divided into forty-nine Standards, under ſo many Princes. *Regis* relates, that the *Manchews*, after their Conqueſt of *China*, conferred on the moſt powerful of them the Titles of *Vang*, *Pey-le*, *Pey-tſé*, *Kong*, &c. ſettled a Revenue on each [c] Chief of a Standard, fixed the Bounds of their Lands, and eſtabliſhed Laws, by which they are governed to this Day. There is a grand Tribunal at *Pe-king*, to which Appeals are brought from the Princes themſelves, who are obliged to appear, when cited. The *Kalkas*, ſince their Subjection, are under the ſame Regulation [d].

Mongul Princes,

THE ſeveral Countries, or Diſtricts of the *Mongols*, even thoſe which are the worſt, being dry, ſandy, and cold, ſuch as *Korchin*, *Ohan*, *Nayman*, and *Turbeda*, maintain a great Number of Princes. The Houſe of *Korchin* only, at the Time the Miſſioners paſſed-through the Country, had eight, or nine, diſtinguiſhed by their ſeveral Titles, like thoſe of Dukes, Marquiſes, Counts, &c. the Number of which is not fixed, becauſe they depend on the Will of the Emperor; who is, with reſpect to them, the great [e] *Hân* of the *Tartars*, and who either raiſes, or degrades them, according to their good, or bad Conduct. When they are without Title, or military Command, they are called *Tayghi*, or, as the *Chineſe* pronounce it, *Tay-ki*: Nevertheleſs, they are conſidered as Maſters of their Country by the *Tartars*, who are no better than Slaves to the Heads of their reſpective Families.

THESE Princes have a Politeneſs, which diſtinguiſhes them from their Subjects, who, though they ſtile themſelves Slaves, are not treated with Severity, but have ready Acceſs on the ſlighteſt Occaſions. This Familiarity takes-off nothing of their Reſpect, for they are taught, from their Infancy, that they are born to obey, and their Maſters to command [f]. But of the Government, as well as Religion, of the *Mongols*, more will be ſpoken in the next Section.

SECT. IV.

Of the Country *belonging to the* Kalka Mongols.

1. Name, Extent, *and* Rivers *of the* Kalkas.

Name, *Extent*, *Bounds*. *The* Kobi, *or* Sha-mo. Kalkas *Deſcent*. *River* Kalka. *The* Kerlon. *The* Tula. *River* Twi. *The* Selinga. *The* Orkhon, *and* Tola. *The* Siba, *or* Altay. *The* Dſan-muran. *The* Argun.

OF all the *Mongol* Nations, depending on the Emperor, the moſt numerous, and celebrated, are the *Kalkas*, who take their Name from the River *Kalka*. They poſſeſs above two hundred Leagues of the Country, from Eaſt to Weſt, and the Banks of the fineſt Rivers in this Part of *Tartary*. They dwell beyond the *Mongols*, and have the *Eluths* (or *Kalmûks*) on the Weſt. Their Country, according to *Gerbillon*, from Weſt to Eaſt, extends from *Mount Altay*, to the Province of *Solon*; and, from North to South, from the fiftieth and fifty-firſt Degrees of Latitude [g], to the Southern Extremity of the great Deſart *Sha-mo*, which is reckoned to belong to them; they encamping there, during

[a] Papiſts, he ſhould have ſaid. [b] *Du Halde*'s *China*, p. 263, compare with p. 220, before. [c] P. 264. We are told, that this annual Stipend is much leſs than what is allowed the *Manchew* Princes at *Pe-king*. [d] *Du Halde*, as before, *p.* 261, 264. [e] We write *Kân*, but all the *Tartars* pronounce *Hân*, or rather a middle Sound between the two Letters, *K* and *H*, as *Khân*. [f] *Du Halde*, as before, *p.* 250. [g] It is ſaid, *p.* 265, of *Du Halde*, vol. 2. that they extend, from Eaſt to Weſt, twenty-two Degrees; but from North to South, no more than five and a half.

Winter,

Winter, when they ſtand in leſs Need of Water, a which is rarely to be met-with, and generally bad.

THE Deſart above-mentioned, called by the *Chineſe*, *Sha-mo*, and the *Tartars*, *Kobi*, or *Gobi* [a], ends about *China*, and is larger, and more frightful, towards the Weſt. *Gerbillon* paſſed it four Times in different Quarters. From Eaſt, to the Mountains beyond the great Wall, it is about one hundred Leagues, not comprehending the Mountains to the North of the great Wall: For though they are in a Manner uninhabited, the b Soil is good, affording fine Paſtures, Woods, Springs, and Rivulets, in abundance. The Author does not here include the Country beyond the *Kerlon*, abounding with Water, and Paſturage, though thinly inhabited, eſpecially the Weſtern Part. The Deſart is much larger from North to South, and above one hnndred Leagues over. In ſome Parts it is quite bare, without Trees, Graſs, or Water, except certain Ponds and Marſhes, made by the Rains, and here and there c a Well of Water, bad enough.

THESE *Kalkas* are the Deſcendants of the *Mongols*, who about the Year 1368 were expelled *China* by *Hong-vû*, Founder of the *Ming* Family; and retreating Northward beyond the great Deſart, ſettled chiefly along the Rivers *Selinga*, *Orkhon*, or *Orhon*, *Tula*, and *Kerlon*, where there is Plenty of Paſturage. The ſtrangeſt Thing is, that, after being ſo long accuſtomed to the Delicacies of *China*, they could ſo eaſily re- d turn to the roving ſordid Life of their Anceſtors [b].

THE *Kalka-pira*, or River *Kalka*, as *Regis* obſerves, is not much frequented by the *Kalkas*, though they take their Name from thence: It flows from a famous Mountain, called *Suelki*, or *Sulki*, eighty-four Leagues from *Parin*, and forty-four from *Tſitſikar*: They pretend it gives Life to ſeveral other Rivers; but no Way conſiderable. After paſſing through a Lake called *Dalai*, it changes its Name to *Urſon*, and runs e directly North into a larger, named *Kûlon-nor*.

THE *Kerlon*, *Tula*, *Twi*, and *Selingha*, though ſo famous for their Origin among theſe People, are of more Account, for their clear and healthful Waters, abounding with Trout, and other Fiſh; and for the fruitful, large, and populous Plains they glide through. The *Kerlon*, or *Kerulon*, running from Weſt to Eaſt, falls alſo into the Lake *Kûlon-nor*, which diſcharges itſelf into the *Saghalian-ûla*, by the River *Ergona*, the f Boundary of the *Manthew* Empire on that Side: As to the Situation of this Lake, and Courſe of the Rivers, we cannot do better than refer to the Map.

THE *Kerlon*, which is not deep, being almoſt every-where fordable, of a ſandy Bottom, good Water, and about ſixty common Feet in Breadth, waſhes the richeſt Paſtures in all *Tartary*. Regis, Bentink.

THE River *Tula* runs from Eaſt to Weſt, and in moſt Places is larger, deeper, and more rapid, than the *Kerlon*: It has alſo more Woods, and finer Meadows; and on its North-Side are Mountains covered with large Firs, which afford an agreeable Proſpect: The *Mongols* of this Part of *Tartary* ſpeak-of it with Admiration. This River, having joined itſelf to the *Orgon*, *Orkhon*, or *Urhon*, which comes from the South-Weſt, runs towards the North; and, after being increaſed with ſeveral others, as the *Selingha-pira*, at length falls into the greateſt Lake in all *Tartary*, named *Pay-kal* [c]. This Lake belongs to the *Ruſſians*, who are alſo Maſters of the lower Part of the *Selingha*, and on the oppoſite Side, near the Limits of the two Empires, have built c a little Town, called *Selinghinſkoy*; and beyond that the City *Irkutſkoy* [d], which is much better peopled, and perhaps more traded-to, than any City in *Tartary*. *The* Tula.

IN travelling from hence to *Tobolſkoy*, the Capital of *Siberia*, and *Northern Tartary*, you meet frequent Villages, and in them commodious Lodgings: But going from *Selingha* Southwards, till you come almoſt to the great Wall, you are obliged to lodge, and diet after the *Tartarian* d Manner.

THE Waters of the *Twi-pira*, which are clear and healthful, like thoſe of the *Kerlon*, after a pretty long Courſe, through fertile Plains, loſes itſelf in the Ground near a little Lake, without appearing any more [e]. *River* Twi.

To the former Account of Rivers, from the Miſſioners, let us add ſome farther Remarks from *Bentink*. He informs us, that the River *Selinga* has ſeveral Springs, and that the *Werſh* e *Selinga*, which is the principal one, iſſues from a Lake, called by the *Mongols*, *Koſogol* [f]: That its Courſe is nearly in a right Line from South to North, through very fertile Plains; and that after being conſiderably inlarged by many Rivers on both Sides, it diſcharges itſelf into the Lake *Baykal*: That its Waters are very good, and light, but do not afford Plenty of Fiſh: That both Sides of this River, from its Springs, till within one Day's Journey of *Selinghinſkoy*, are in f the Hands of the *Mungals*; but that the neighbouring Country, from that City to the Lake, belongs to the *Ruſſians*. *The* Selinga.

THE *Orkhon*, formerly called *Kalaſſui*, runs North North-Weſt into the *Selinga*. The *Khân* *The* Orkhon, *and* Tola.

[a] *Kobi*, or *Gobi*, ſignifies a Deſart. [b] *Du Halde's China*, p. 259. [c] Called, in the Maps, *Baykal*. [d] Or *Irkutſki*, *Ergonſki*. [e] *Du Halde*, as before, *p.* 250, *&c ſeq.* [f] Or *Kuſo-koi*: *Kol*, or *Gol*, ſignifies a Lake.

of

Mongols Country.

of the *Kalka Mongols*, and their *Khûtûktû*, or a High Prieſt, uſually make their Abode there.

THE *Tola*, called heretofore *Kollanuaer*, comes from the Eaſt South-Eaſt, and throws itſelf into the River *Orkhon*. The Karawâns of *Siberia* having paſſed this River, enter immediately into the Territories depending on *China*.

The Siba, *or* Altay.

THE River *Altay*, at preſent called *Siba*, has its Spring towards the Frontiers of the *Kalmûks*, (or *Eluths*) in the Mountains, called by the *Tartars*, *Uſkun-luk-tugra*, about the forty-third Degree of Latitude to the South of the Springs of the *Jeniſea*; and running from thence Eaſt North-Eaſt, loſes itſelf North of the Deſart of *Gobi*, and South South-Eaſt of the Source of the *Orkhon*. A petty *Khân* of the *Mongols* uſually reſides about the *Siba*, who is at preſent under the Protection of *China*.

The Dſan-mûran.

THE *Dſan-mûran* [a] *(Tſan*, or *Jan-muran)* has its Source in the Mountains, which croſs the *Gobi*, about the forty-third Degree of Latitude. It runs South South-Eaſt, and falls into the *Whang-ho* (or *Yellow River)* on the Frontiers of *Tibet*. Two petty *Khâns* of the *Mongols*, both under the Protection of the Emperor, make their Abode about its Banks.

The Argun.

THE River *Argun* (or *Ergona)* riſes in the Country of the *Mongals*, from a Lake, called by them, *Argun-dalay*. Its Courſe is nearly Eaſt North-Eaſt; and having run above one hundred Leagues, it falls into the great River *Amur* [b].

2. Ruins *of* Cities, *particularly* Kara-koram.

Para-hotun *Ruins. Cities, when built. Inſcription in the Deſart. Enquiry concerning the famous* Kara-koram: *When built: Its Situation: That of* Shang-tû. Olugh-yurt, *if* Kara-koram. Mongol *Habitations.*

Para-hotun *Ruins.*

THERE were formerly ſeveral Cities in this Part of *Tartary*, though none exiſt at preſent. On the Northern-Banks of the *Kerlon*, or *Kerûlon*, the Miſſioners met-with the Ruins of a large City: It was of a ſquare Figure, and twenty *Chineſe Li* [c] in Circumference: The Foundations are ſtill to be ſeen, with ſome large Pieces of the Wall, and two Pyramids in Ruins: Its Name was *Para-hotun*, that is, *the City of the Tiger*; given it from the Cry of a Tiger, which they thought a good Omen.

THERE are to be ſeen the Ruins of ſeveral other Cities in the Countries of the *Mongols* and *Kalkas*, which yet are of no great Antiquity; being all built by the *Mongol* Succeſſors of the famous *Koblay*, or *Kobeli-han* (as the *Eaſtern Tartars* pronounce it) who conquered all *China*, and founded the *Ywen* Dynaſty. Although it is the Genius of this Nation to prefer Tents to the moſt convenient Houſes; yet when they took to the *Chineſe* Cuſtoms, and were civilized under the Government of *Koblay*, a Prince no leſs accompliſhed than a *Chineſe*, we may ſuppoſe, that being loth to appear inferior to the Nation they had conquered, they began to build Cities in *Tartary*, the Ruins of which are ſtill to be ſeen in above twenty different Places. The *Mongols* therefore, did then what the *Manchews* do now under the Government of the Emperor *Kang-hi*, who has built Cities in the remoteſt Parts, beſides very beautiful Pleaſure-Houſes in thoſe neighbouring on *China*; as at *Je-ho*, and *Kara-hotun*. But as theſe *Tartarian* Cities were all deſtroyed or abandoned, within an hundred Years, the *Chineſe* conquering, in their Turn; it is no Wonder, if in ſo ſhort a Time, they could raiſe no magnificent Monuments to eternize their Memory.

THE Miſſioners met but with one Inſcription, which was on the Road from *Chang-kya-kew*, to the *Kerlon*, and about a League from *Holûſtai*, where is a little Lake: It is on the higheſt Part of ſome Marble Blocks, in *Chineſe* Characters, and imports, that the Army, commanded by the Emperor *Yong-lo*, arrived there the fourteenth of *May*. Hence it appears, that he did not purſue the *Mongols* beyond the *Kerlon*, but contented himſelf with keeping them at a Diſtance from the great Wall.

NOT far from *Para-hotun*, above-mentioned, is a Place called *Kara-uſſon*, where is a little Lake and a fine Spring in a fertile Plain, which feeds abundance of Deer, Mules, *&c.* all wild. *Rubruquis* thinks it difficult to determine, whether this was *Kara-koram* [d], the Court of *Mango-hân* [e], or of

[a] In *Abu'lghâzi*'s Hiſtory, called *Jam-muran.* [b] Hiſtory of the *Turks, Moguls*, &c. vol. 2. p. 515, &c.
[c] Or two Leagues. [d] *Bentink* ſeems to queſtion if ever there was ſuch a City, as *Kara-koram*, becauſe, at preſent, no ſuch Place is to be found; and the Account of the Road *Rubragius* took thither, is, to his thinking, very confuſed, and not agreeable to the Notices we have at preſent of the Country through which he pretends to have paſſed. But his Miſtake ſeems to ariſe from his taking *Kara-kum*, and *Kara-koram*, to mean the ſame Thing: Whereas the firſt is the Name of the Country; the latter of the City built there: And *Abu'lghâzi Khân* plainly diſtinguiſhes the one from the other, though he does not name the Town. See the Hiſtory of the *Turks*, &c. vol. 2. p. 515. [e] Called alſo, by Writers and Travellers, *Mangu*, *Mongko*, and *Munkaka*. *Souciet. Obſ. Math.* &c. p. 186. They were very powerful, antecedent to the *Moguls*, under the famous or *Vang Khân*, vulgarly called *Preſter John*.

Prede

Predeceſſor *Kayû-ſû* [a], to whom the *Dominican*, a *Longumeau*, was ſent, with magnificent Preſents by *S. Louis*, in 1249. He ſays, it is not eaſy to conceive, how an Emperor of all *Tartary*, and the North Part of *China*, could reſide in the Countries to the North of the *Saghalian-ûla*, fit only for Savages to inhabit [b]; or that the Place could entertain ſuch Crouds of Officers, Ambaſſadors, and Merchants of all Nations, as is reported. He farther obſerves, that the Poſition of the Rivers, and Mountains, in this Part of *Tartary*, which are all below the fiftieth Degree of Latitude, in no Sort agrees with the Rout of the Travellers of thoſe Times; who having neither the Mathematics, nor Compaſs to direct them in ſo long a Journey Eaſtward, he imagines, inſenſibly declined towards the South, inſtead of advancing, as they judged, ſo far North as the ſixtieth Parallel. He adds, though according to their Account, the Firing in the Tent, or Apartment of the Emperor himſelf, was nothing but Thorns, Roots of Wormwood, and Cow-Dung, that yet *Tartary* is not without Wood for Fuel, either in the Northern, or Southern Parts, ſo low as where *Kara-hotun* is ſituated, excepting only in the Plains on this Side the fiftieth Degree [c].

As the Miſſioners who made the Map of this Country declare, they cannot preciſely determine where the Court and Village of *Kara-koram* was ſituate, the *Engliſh* Tranſlator of *Du Halde* has undertaken, in his Notes, to ſettle this Point, which is of great Importance to the middle Geography of *Tartary*. With regard to the Name, he obſerves, that according to *D'Herbelot* [d], it is given to it by the Inhabitants of *Turkeſtan*, their Neighbours on the Weſt. *Abu'lfaraj* [e] ſays, *Kara-koram* is the ſame with *Ordu-balik*; and *Gaubil* aſſures us, that in the *Chineſe* Hiſtory, it is called *Ho-lin* [f]. The Cordelier *Rubruquis* tells us, that *Kara-koram*, in his Time, had only a Mud-Wall; and that the Place itſelf, and the *Khân*'s Palace, compared with the *European*, poor Buildings; yet allows it to have been very populous, and to contain a great many Palaces, Temples [g], *&c.* As to the Foundation of this Capital of the *Mogul* Empire, *Abu'lfaraj*, and *D'Herbelot* affirm, that it was built by *Oktay*, the third Son, and Succeſſor of *Jenghîz Khân*, on his Return from the Conqueſt of the Empire of the *Kin*, or *Katay*; and with them agrees *Abu'lghâzi Khân*: But in the Extracts from the *Chineſe* Hiſtory, given us by *Gaubil*, it is ſpoken of as if it had exiſted before the Time of *Jenghîz Khân* [h]. We are told, that in the Year 1235, *Oktay* made of *Ho-lin*, a new City, with a magnificent Palace [i]; and *Abu'lfaraj* informs us, that he peopled it with Inhabitants from *Katay* and *Turkeſtan*, *Perſians* and *Muſtarabians* [k]. Regis.

BUT *Abu'lghâzi Khân* is ſomewhat more particular with regard to the Origin of this City. He tells us, that *Ugaday* (or *Oktay*) *Khân*, on his Return from the Reduction of *Katay*, in the Year of the *Hejrah* 634 (of Chriſt 1236) continued to reſide in the Country of *Kara-kum* [l] (or *Black Sand*) where he built a magnificent Palace, and ſent for the moſt able Painters of *Katay* to adorn it, enjoining the Princes of the Blood, and his great Officers, to build handſome Houſes about the ſame. He likewiſe ordered a fine Fountain to be made, with a Tiger in full Proportion, all of Silver, ſpouting Water [m]. The Tranſlator of *Du Halde* takes *Kara-koram* (*Ordu-balik*, or *Ho-lin*) to have been ſituate in the Country of *Kara-kum*, which ſignifies *black Sand*, and theſe Works to have been raiſed in that City; although *De la Croix* [n] ſays, that *Oktay* uſually reſided at *Olugh-yurt* [o], but a little Way diſtant from *Kara-koram*; whence ſome may conjecture, the Palace, *&c.* was built there, or, poſſibly, *Olugh-yurt* was only another Name given by the *Mongols* to *Ordu-balik*: For we find no Mention of two Cities by other Authors; but that all the *Khâns*, before *Koblay*, were crowned, and reſided at *Ho-lin*, or *Kara-koram*. *De la Croix* ſays, this was the Seat of *Ung* (or *Vang*) *Khân* of the *Kara-its* (commonly called *Preſter John*:) That it was a very inconſiderable Place, *When built.* *And where.*

[a] *Regis* thinks this *Kayu-ſu*, or *Kayuk*, being the *Chineſe Tay-tſu*, or Grandfather of the Emperor of the *Yuen*, (or *Ken*) ſhould be the Grandfather of *Koblay*, who is alſo called *She-tſu*, according to the *Chineſe* Cuſtom: But the *Engliſh* Tranſlator obſerves, that not *Kayuk Khân*, but *Jenghiz Khân*, was Grandfather of *Kobly*, conſequently was the *Tay-tſu*; and that *Kayuk* was the Son of *Oktay*, third Son of *Jenghiz Khân*, as *Koplay* was the Son of *Tuli* (*Tolay*, or *Taulay*) his fourth Son: Hence, he goes-on, another Miſtake of the Author may be corrected, who, *p.* 214, calls *Ho-pi-lye*, or *Koblay*, the fourth Son of *Tay-tſu*. [b] Why might not *Para-tunas*, and *Kara-uſſon*, have been built by the *Tartars*, who dwelt along the Rivers *Kerulon* and *Onon*? [c] *Du Halde's China*, p. 250, *&* *ſeq.* [d] Art. Ordu balig. [e] Hiſt. Dynaſt. p. 320. [f] See *Souciet. Obſ. Math.* T. p. 185. [g] For a farther Account, ſee his Travels hereafter. [h] *Souciet*, p. 186. [i] The ſame, p. 192. [k] *Abu'lfar.* Hiſt. Dynaſt. *p.* 310. [l] This is a general Name to ſignify all ſandy and dry Countries, or ſandy Deſarts. There are ſeveral on the Borders of *Karazm*, near the *Caſpian* Sea; one of which is mentioned by *Abu'lghâzi Khân*. See Hiſtory of the *Turks*, &c. vol. 1. p. 354, and vol. 2. p. 513. [m] *Abu'lghâzi Khân*, Hiſtory of the *Turks*, &c. vol. 1. p. 152, 153. alſo vol. 2. p. 513, *&* *ſeqq.* [n] Hiſt. *Genghîz Khân*, p. 386. [o] *Olugh-yurt*, ſignifies the great City.

Mongols Country.

when taken by *Jenghiz Khân*, who much improved it; and that *Oktay Khân* rebuilt it, and made it a famous City [a].

Its Situation.

THE Tranſlator, in another Note, obſerves, that *Gaubil* gives, from the *Chineſe* Hiſtory, the exact Situation of the City in Queſtion. He ſays, the Hord of the *Moguls* was contiguous to that of the *Naymans*, near the City of *Ho-lin*, or *Kara-koram* [b], North of the ſandy Deſart, whoſe Latitude was obſerved, by Order of *Koblay Khân*, to be forty-four Degrees eleven Minutes [c]; its Longitude being, by Computation, ten Degrees eleven Minutes Weſt of *Pe-king*. By this it appears, according to the Tranſlator, that *Kara-koram* ſtood at, or near the Lake *Kurahan-ulen*, and, conſequently, at a great Diſtance from either *Kara-hotun*, or *Para-hotun*; that is, four hundred and eighty Miles North-Weſt from the firſt, and four hundred and twenty South-Weſt from the latter. Whether the Miſſionaries, who made the Map of *Tartary*, were at the ſaid Lake (continues that Author) or have laid it down from the Accounts of the *Mongols*, we know not; but, however it was, it is ſurpriſing they ſhould hear nothing of *Kara-koram*, whoſe Ruins muſt ſtill be thereabouts. It was the Imperial Seat of the *Khâns*, till *Koblay*, to be nearer his Conqueſts, removed it to *Shang-tû*, a City which he built, as we were told by *Marco Polo*, and *Hayton*; the firſt of whom calls it *Ciandu*; the other, more corruptly, *Ions*.

Kurahan-ulen.

That of Shan-tû.

IT ſtood in the Country of *Karchin* (but is now deſtroyed) in the Latitude of forty-two Degrees twenty-two Minutes to the North-Eaſt of *Pe-king* [d]; and ſeems to be *Chau-nayman-ſuma*, which is one of the three Ruins, marked in the Map by the Miſſionaries, on the River *Shang-tû*; for they take no more Notice of this famous Capital, than of the former, *Eſtina*, *Kampion*, or other ancient Cities. *Koblay* ſpent the Spring and Summer here, and the reſt of the Year at *Khân-balik* [e], or *Pe-king*. This, he preſumes, was the *Tartarian* Court, ſo long as the *Mongols* were in Poſſeſſion of *China*: But after their Expulſion, about the Year 1368, it is probable *Kara-koram* became again the Seat of the *Khâns*; though according to *De la Croix*, they reſided, ever ſince the Time of *Oktay*, at *Olugh-yurt* [f], a City not far diſtant, if it be not the ſame Place, as before obſerved.

Olugh yurt *is* Kara-koram.

THE ſame Author alſo remarks, that from the Time of *Aday Khân*, the fifteenth in Succeſſion from *Koblay*, we hear no more at *Olugh-yurt* of the Princes deſcended from *Tuli Khân*, but only of thoſe who ſprung from *Koblay Khân*, and remained Emperors of *China* [g]. However, *Olugh-yurt* was in Being towards the Beginning of the fifteenth Century: For *Alchi-timur*, who reigned two Succeſſions before *Aday*, aſcended the Throne there in 1405 [h]. What became, after this, of *Olugh-yurt*, or *Kara-koram* (for it is probable whether the ſame City, or not, they had the ſame Fate) we ſhall ſcarce diſcover, till *Gaubil*, or ſome other curious Miſſionary, ſhall inform us. As for thoſe who made the Map (adds the Tranſlator) they ſeem to have been very little acquainted with either the Geography, or Hiſtory of *Tartary*, before their own Time; which is the Reaſon they ſo very rarely touch upon it, and, when they do, are ſo very wide of the Mark. From *Gaubil*'s Hiſtory of the *Moguls*, who reigned in *China*, it appears, that they never reſided at *Kara-koram*, from the Time of *Koblay*, till after their being expelled *China*; during which Space the Dominions of *Tartary* and *China* were united: So that *De la Croix*'s Succeſſion from *Koblay* muſt be falſe, or his Authors have made Emperors of Governors [i].

THE uſual Dwellings of the Princes of the *Kalkas*, called by the *Chineſe*, *Kalka-ta-tſe*, and *Kalka-mongû*, are as follow.

ALONG the *Kalka-pira*, Latitude leſs than forty-eight Degrees, Longitude one, two, three, four Degrees Eaſt. Near *Pwir-nor*, Latitude forty-eight Degrees, Longitude one Degree twenty-nine Minutes. Along the *Kerlon-pira*, Latitude between forty-ſeven and forty-eight Degrees, Longitude four, five, ſix Degrees Weſt. Along the *Túla-pira*, Latitude above forty-ſeven Degrees, Longitude nine and ten Degrees Weſt. Along the *Hara-pira*, Latitude forty-nine Degrees ten Minutes, Longitude ten Degrees fifteen Minutes Weſt. Along the *Selingha-pira*, Latitude forty-nine Degrees twenty-ſeven Minutes, Longitude twelve Degrees twenty-ſix Minutes Weſt. Along the *Iben-pira*, Latitude forty-nine Degrees twenty-three Minutes, Longitude fifteen Degrees thirty-two Minutes Weſt. Along the *Twi-pira* and *Kara-ûjir*, Latitude forty-ſix Degrees twenty-nine Minutes twenty Seconds, Longitude fifteen Degrees ſixteen Minutes Weſt. Along the *Irû-pira*, Latitude forty-ſix Degrees, Longitude fifteen Degrees thirty-five Minutes Weſt. Along the *Patarik-pira*, Latitude forty-ſix Degrees, Longitude ſixteen Degrees thirty-two Minutes Weſt. Along the *Tegûrik-pira*, Latitude forty-five Degrees twenty-three Minutes forty-five Seconds, Longitude nineteen Degrees

thirty Degrees West. Add to these the City of *Hami*, where are *Mohammedans*, who possess this little Country, and, with the *Kalka-ta-tse*, their Neighbours, are subject to the Emperor; Latitude forty-two Degrees fifty-three Minutes, Longitude twenty-two Degrees twenty-three Minutes [a].

3. Religion *of the* Kalkas.

The Khûtûktû, *adored as a God, by the* Kalkas. *A Kind of Oracle: Sets-up for himself: Supported by* China: *No fixed Dwelling: Manner of his Appearance to the People: Courts the Emperor, and* Russia. Lamas *of* Tartary.

THE Religion of the *Kalkas* is the same with that of the *Mongols*. They have also a *Khûtûktû* [b] at the Head of it, but not subject to the *Dalay Lama*, like him of *Khukhu-hotun*. He who possessed that Dignity in the Time of *Regis*, was Brother to the *Hân*, or *Khân* of the *Kalkas*; and before the War, which broke-out between him and the *Eluths*, had built, near the *Tula*, a magnificent Temple, with yellow, varnished Bricks, and Workmen from *Pe-king*. It was destroyed by *Kaldan*, *Khân* of the *Eluths*, in 1688, and the Ruins are still to be seen. The *Tartars*, who looked-on this as a sacrilegious Act, are persuaded, that he owed the entire Ruin of his Army and Family to it.

THIS *Lama* Prince, who was one of the chief Authors of the War, at present dwells in Tents, in the largest of which he sits on a Kind of Altar. He receives the Homages of many Nations, and returns the Salute to no Person whomsoever. Both great and small consider him as a God, and pay him the same Adoration they do to *Fo* himself. Being thus infatuated, even to Madness, they believe he knows every Thing, and can absolutely dispose of the Power and Favours of *Fo* [c]. He has been born already fourteen Times, and will be born again, when his present Time is out. The Missioners pretend, that in the Presence of several *Mongol* Princes, they reproached him for such foolish Idolatry; exposed his Ignorance in the Enquiries he made concerning *Europe*; and threatned him with the terrible Judgments of God, and eternal Torments. But, it seems, he heard all with great Coolness [d], and continued to receive the Adoration of the *Tartar* Lords.

THIS Prepossession of the *Mongols*, in his Favour, draws Crouds of People to *Iben-pira*, where he had resided about twenty Years. It might be called a large City made of Tents, the Hurry being much greater there, than any-where else in this Part of *Tartary*. The *Russians* of *Selinghinskoy* [e], which is not far distant, trade thither: There you meet also with *Bonzas* from *Hindostân*, *Pegû*, *Tibet*, and *China*; *Tartars* from the remotest Countries, with *Lamas* in great Numbers, and of all Ranks: For the *Lamas* are of different Degrees, though they all acknowledge, as their Chief, the great *Lama*, who inhabits to the West of *China*, on the River *Lasa* [f], which is also the *Chinese* Name for the Place where his Temple stands: But the neighbouring *Tartars* call it *Barantola*, giving to the Country in general the Name of *Tibet*. Regis, Bentink. By the Kalkas.

THIS great Pontiff of the *Pagan* Religion, in these Eastern Parts, confers several Degrees of Power and Dignity on his *Lamas*, of which the most eminent is that of being *Khûtûktû*, or living *Fo*: However, the Number of these is but small. The most celebrated, and honoured of them all, is this of the *Kalkas*, whose infallible Oracle he has been, ever since he revenged them on *Kaldan*, by engaging the Emperor of *China* to undertake their Defence. *A Kind of Oracle.*

THESE *Kalkas* are separated Southward, about the forty-fourth Degree of Latitude, only by certain Sand-Hills, from the Country of *U-chû-mû-chin*, before-mentioned, whose Inhabitants are no less infatuated with the *Khûtûktû Lama* at *Iben*, although they have particular *Lamas* of their own.

ACCORDING to *Bentink*, the *Khûtûktû* was formerly a Delegate of the *Dalay Lama* to the *Mongols* and *Kalmûks* of the North [g], sent to keep-up his Authority in those Parts, as being too remote from his usual Residence: But when this Deputy had once tasted the Sweets of spiritual Command, he made bold to set-up for himself; which he performed with so much Address, that there is scarce any Mention made at present of the *Dalay Lama* among the *Mungals*; and the Authority of the *Khûtûktû* is so well established, that whoever durst doubt of his Divinity, at least of his Immortality, would be held in Abhorrence by all that Nation. *Sets-up for himself,*

IT is true, that the Court of *China* had a great Hand in this new Apotheosis, in order to divide the *Mongols* from the *Kalmûks*: For reflecting, *Supported by China.*

[a] See Notes to *Du Halde*'s *China*, vol. 2. p. 265. Maps, we find *Kutugtu*; and sometimes, by Mistake, *Kutusta*, and *Kutusta*. *Strahlenburgh* writes it *Hatoget*, and *Katchgot*. [b] It may also be written *Hûtûktû*. In Travellers and [c] Is it not equal Madness, and Folly, to believe the Pope can dispose of the Favours of Heaven? [d] This is more than the Missioners would have done, on the like Occasion, in *Spain*, or *Italy*. [e] The *Chinese* name it *Chu-ku-pay-chang*. [f] The *Chinese* call the Country *Lasa*, *La-ma-ti-san*. The River is called *Kiritu* in the Map, and *Lasa* no-where that we know of. [g] That is, the *Eluths*.

Mongols Country.

that it would be difficult to bring such a Design about, so long as they both continued attached to the same Head of Religion, who, for his own Interest, would, at all Times, in case of Difference, endeavour to reconcile them, the Emperor embraced with Joy the Opportunity of supporting, under-hand, the *Khûtûktû* against the *Dalay Lama*, to the End that Schism should cut-off entirely all Communication between those two Nations; which, in Effect, has not succeeded ill.

No fixed Dwelling.

THE *Khûtûktû* has no fixed Dwelling, like the *Dalay Lama*; but encamps here and there: However, since this Separation, he enters no more on the Lands of the *Eluths*. He used to encamp, in Summer, about *Nerchinskoy*, and the River *Amûr*: But since the *Russians* have established themselves in those Quarters, he passes no more beyond *Selinghinskoy*, keeping, at present, about the Rivers *Orkhon* and *Selinga*: He also encamps often at the *Urga*, with *Tushidtu Khân*. He is always surrounded with a great Number of *Lamas*, and armed *Mongols*; who, when he removes his Camp, flock from all Parts, with their Families, to meet him on the Road, and receive his Benediction, paying the Fees. None but the Heads of Tribes, and other Persons of Distinction, dare approach near him: He gives them the Benediction, by applying his Hand shut upon the Forehead, holding a Pair of Beads, after the Manner of the *Lamas*.

Manner of his

THE Vulgar believe, that he grows old as the Moon declines, and young again with the new Moon; which shews that pious Frauds play their Game here, as well as elsewhere. On great Days of their sacred Ceremonies, he appears with the Sound of certain Instruments, resembling Trumpets and Cymbals, under a magnificent Canopy, covered with a fine Piece of *China* Velvet, and open in Front. He seats himself under this Pavilion, in a Place raised upon a great Velvet Cushion, cross-legged, after the *Tartar* Fashion, having on each Side of him a Figure representing the Divinity [a]; and the other *Lamas* of Distinction are seated on both Sides the Floor, on Cushions, from the Place where he sits, to the Entrance of the Pavilion, holding each a Book in his Hand, wherein they read to themselves.

Appearance to the People.

WHEN the *Khûtûktû* is seated, the Instruments cease, and all the People, who are assembled before the Pavilion, prostrate themselves on the Earth, making certain Exclamations to the Glory of the Divinity, and in Praise of the *Khûtûktû*: Afterwards some *Lamas* bring Censers, with odoriferous Herbs, and incense, first, the Representations of the Divinity, then the *Khûtûktû*, and, lastly, the People: Then laying the Censers at the *Khûtûktû*'s Feet, they fetch several China-Bowls, with Liquors and Sweetmeats, seven of which they set before each Representation of the Divinity, and seven others before the *Khûtûktû*; who having tasted a little, causes the rest to be distributed among such Heads of Tribes as are present, and then retires, under the Sound of the Instruments, into his Tents.

Court to Emp.

As on one Side the *Khûtûktû*, to preserve his Independency of the *Dalay Lama*, takes Care, by magnificent Presents of Skins, &c. to gain the Favourites of the Emperor, even to the Jesuits, who have at present much Credit at *Peking*; on the other Side, as that Court stands in Need of the *Khûtûktû*, and his *Lamas*, to keep the *Mongols* of the West in their Duty, it treats him, on all Occasions, with much Distinction. Some Years ago, he received a very particular Mark of it; for at the Anniversary Feast of the late Emperor *Kang-hi*, then entering into the sixtieth Year of his Age, the *Khûtûktû* having been summoned, among the rest of the Vassals of the Empire, in Consideration of his Dignity, was dispensed with only [b] prostrating himself once instead of thrice, before his Majesty, which was a Distinction without Example.

And

THE *Khûtûktû* tries also to cultivate Friendship with the *Russians*: Accordingly some Years ago, Mr. *Ismaïloff*, Envoy Extraordinary from the Emperor *Peter* I. to the Court of *China*, happening to pass by in his Neighbourhood, his Holiness sent him some of his *Lamas* to compliment, and offer him some small Presents. He likewise takes all Opportunities of favourring the Subjects of *Russia* in the little Quarrels they may have with the *Mongols* on the Frontiers [c].

Le

REGIS observes, that the *Lamas* do not live in Communities in *Tartary* (though in *China* some do) but in some Places they have a Kind of Prebends, being the Lands and Flocks of those whom they succeed, and of whom they are generally the Disciples, or Companions, notwithstanding they pray in common [d].

4. History *of the* Mongols, *and* Kalkas; *from* Gerbillon *and* Regis.

Western Tartars *annoy* China. *The* Si-tan, *or* Lyau, *subdued by the* Kin. *The* Kin *expelled by the* Mongols. *The* Kalka Mongols *submit to the Emperor: Division into Classes, and Ban-*

[a] That is, either *Fo* himself, or the living *Fo*, as they call the *Dalay Lama*. [b] This Submission was very inconsistent with the Divinity ascribed to the *Khûtûktû*. [c] History of the *Turks, Moguls*, &c. vol. 2. p. 503 *& seq.* [d] *Du Halde's China*, p. 252.

ners. Emperor's Flocks, and Studs. Mongul a *Government.* *The* Khân *powerful.*

GERBILLON informs us, that about the Beginning of the *Han* Dynasty, more than eighteen hundred Years ago, a *Tartar Khân*, or King, grew formidable to his *Chinese* Neighbours, invading their Territories, whenever they neglected the annual Presents of Money and Silk. These Princes have frequently demanded the Emperor's Daughter in Marriage, and haughtily b threatened to fetch her, Sword in Hand, if denied the Favour. It is related, that at the Death of the Founder of the said Dynasty, a *Tartar* King presumed to propose Marriage to the Empress Dowager, then Regent; and that the *Chinese*, although they looked-on the Offer as an Affront, had the Policy to dissemble it, and grant him a Princess of the Blood.

Tar. THE *Chinese* History calls these Kings *Chen-yu*, or *Tan-yu* (for both Terms are pronounced c alike) which is properly a Title, as Sovereign, or King, and not the Name of a Country; though given, by our Geographers, to that Part of *Tartary*, West, or North-West of *China*, where these Princes reigned. However, they were not long thus a Terror to the *Chinese*; for the Emperor *Vu-ti*, of the *Han* Family, about one hundred and twenty Years before Christ, defeated them so often, and repulsed them so far into their Deserts, that for more than twelve hundred Years they durst not appear in the Empire.

tan, AT the Beginning of the tenth Century, the *Tartars* on the North of *China*, called in the *Chinese* History *Si-tan* [a], having subdued *Lyau-tong*, again invaded the Northern Provinces, and erected the Monarchy, called in the same History *Tay-lyau*, from *Lyau-tong*, by which they entered the Empire. This Monarchy lasted two hundred Years, during which they subdued several other *Tartar* Hords, and good Part of Northern *China*, bringing the Emperors themselves under a considerable Tribute, in Money and Silks.

THIS Monarchy of the *Lyau* was at length destroyed by the *Eastern Tartars*, that is, those who lie East of the Meridian of *Pe-king*, and North-East of *China*. They were Subjects of the *Lyau*: But the Prince of an *Ayman* (or Tribe) named *Aghuta*, to revenge a barbarous Affront from the last of their Emperors, took-up Arms; and putting himself at the Head of the neighbouring *Aymans*, by Degrees subdued the whole Country, took the Emperor Prisoner, and founded the Monarchy of the *Kin* [b], about the Beginning of the twelfth Century. From this Time they possessed near half of *China*, till about the Year 1300, when *Jenghiz Khân*, the greatest Conqueror, perhaps, that ever was, having (by his *Mongols*) reduced the *Western Tartars*, and extended his Power beyond *Persia*, turned his Arms against the *Tartars* of *Kin*, and entirely expelled them: But he did not live to subdue the whole Empire of *China*; which Glory was reserved for his Grandson *Hubilay*, whom our Historians call *Kublay*, and the *Chinese Hu-pi-lyé*. Gerbillon, Regis.

THIS Prince first brought all the *Chinese* Nation under a foreign Yoak: But the *Mongol* Monarchy was too unwieldy to subsist long, and their Government, through Effeminacy or Indolence, scarce exceeded an hundred Years: For towards the Middle of the fourteenth Century, these Strangers were expelled *China* by the famous *Hong-vu*, Founder of the *Tay-ming*, the last *Chinese* Dynasty; and pushed by his fourth Son c *Yung-lo* beyond the Desart, above two hundred Leagues North of the great Wall, with a Design to extirpate them: But he was prevented by Death, in his Return from his third Expedition. His Successors neglecting to prosecute what he had begun, they began to take Heart, and spread. Hereupon the Princes of the Blood of *Jenghiz Khân*, each seizing a Territory, formed different Hords, which grew into little Sovereignties [c]. *The* Kin *expelled*

THE Title of Emperor of the *Mongols* re- *By the* Mon-
d mained to the chief of them, called *Chahar-hân*, gols.
descended from the Emperor *Kublay*, by the eldest Branch. To this Prince the other *Mongol* States, and the *Eluths* themselves, were Tributaries, till about the Beginning of the seventeenth Century, when his Cruelties and Debaucheries having made his Government insupportable, his Subjects called-in the Founder of the *Manchew* Monarchy. Thus the *Mongol* Prince become a Vassal of the *Manchew* Empire, e was obliged to quit the Title of *Hân* for that of *Vang*, given him by the Great Grandfather of the late Emperor *Kang-hi*, who subdued entirely the *Mongols* about the great Wall.

THE Nation of the *Kalkas*, says *Regis*, is, as Kalka Mon-
it were, cantoned under a great Number of Prin- gols
ces: Some of them are stiled *Hân*, or Emperor; though it is certain they never were Masters of all *Tartary*, or more than the Territories belonging to their respective Families, except some f of little Note lying near them.

BEFORE the War that broke-out in 1688, between the *Eluths* and *Kalkas*, these last had three Princes, who assumed that Title. The first, named *Shasaktu Hân*, whose Territories

[a] And *Ki-tan*; from whence, perhaps, comes *Kitay*, or *Katay*. [b] *Kin*, in *Chinese*, signifies Gold, which the *Monguls* call *Altun*: Whence it appears, that the *Altun Khân*, mentioned in some Authors, was the Emperor of the *Kin*. [c] *Du Halde's China*, vol. 2. p. 255.

Mongols Country. lay moſt Weſtward, was taken, and ſlain by the *Eluths*. The ſecond, called *Tuſiktu Hân*, fled, but was not followed by many of his People, moſt of whom retired into the Woods abovementioned, on the North Side of the *Tula*. *Chechin Hân*, the third, who uſually encamped near the *Kerlon*, retreated along the River as far as the *Kulon-nor*; holding himſelf ready to paſs the *Ergona*, in caſe he ſhould be obliged to enter into the Country of the *Manchews*, whoſe Aſſiſtance he had implored. But after the War and Death of *Kaldan*, King of the *Eluths*, who pretended that the *Kalkas*, and their *Hân*, always held of their Family, the Emperor became Maſter of the Remainder of theſe Princes, and their People, half of whom had been deſtroyed by that cruel Enemy.

Submit to the Emperor. IN 1691, *Chechin Hân*, with the *Kalka* Princes of his Family, fled to, and acknowledged the Emperor for their Sovereign: Hereupon the *Hân* was confirmed in his Dignity, though his Succeſſor was to be ſtiled only *Tſing-vang*, or Prime Regulo; which Title was then conferred on his Uncle by the Emperor, who held an Aſſembly of the States of the *Kalkas*. Five of thoſe Princes were created *Pey-le*, or Regulos of the third Rank: Another, *Kong*, almoſt the ſame as Count; and two were made *Shaſſaks*, or Chiefs of Standards, or Banners.

Diviſion into Claſſes. TO underſtand this, you muſt know, that whether it be at *Pe-king*, or elſewhere, the *Tartars*, both *Manchews* and *Mongols*, as alſo the *Chineſe* ſince the Conqueſt, are all divided into different Claſſes, and ranged under Banners. Thoſe at *Pe-king* are under eight, diſtinguiſhed by Colours. The *Mongols*, beyond the great Wall, were of late Years ranged under forty-nine Banners of equal *Nurû*, or Companies; though each *Nuru* ought to conſiſt of an hundred and fifty Families. By the Reſolution of the Aſſembly in 1692, the *Hân*, beſides his Dignity, was aſſigned as his Property, the Command of twenty-ſeven *Nurû*, under the firſt Banner of the *Kalkas*. The ſecond, conſiſting of twenty-one Companies, was given to a prime Regulo. The third had but twelve Companies; the reſt ſome more, and ſome leſs.

THE Reſidue of the Family, and Subjects of *Tuſiktû Hân* [a], having at length quitted their Woods, and ſubmitted to the Emperor, were *And Banners.* divided, by three Banners, under three Princes: One was made a *Pey-le*, or Regulo of the third Order; another, a *Kong*, or Count; and the third, a *Shaſſak*. Laſtly, the Son of *Shaſaktu Hân*, ſlain by *Kaldan*, came to caſt himſelf at the Emperor's Feet, attended only with three or four of his Father's Officers: For the reſt held Intelligence with the *Eluths*, and retired into their Country; but moſt of them were either maſſacred, or made Slaves. The Emperor received him very graciouſly, and aſſigned him certain Lands about *Khûtûktû-hotun* [b], a ſmall City without the great Wall; which lying near the Gates *Sha-hu-kew*, and *Chang-kya-kew*, has a pretty Trade. Moreover, thoroughly to make up his Loſſes, the Emperor gave him Part of his own Flocks, feeding in thoſe Parts; which the principal Shepherds aſſured the Miſſioners, amounted to an hundred and ninety thouſand Sheep, divided into two hundred and twenty-five Flocks; and almoſt as many horned Cattle, in Herds of an hundred each. His Majeſty's Studs of Horſes were ſtill greater; ſo that no Prince in the World is ſo powerful in Cavalry, as the Emperor. As to Infantry, the *Tartars* have none.

BUT, beſides the Lands here appointed for the Flocks, and Horſes of the Emperor, he has a much larger Tract along that Part of the great Wall neareſt *Pe-king*. Theſe Lands are farmed, ſome paying Rent in Kind, and ſome in Money, which is put into the public Treaſury, to defray the Salaries of the Officers of State: For the Emperor lives upon his own Domains. Theſe innumerable Flocks, Horſes, and Farms, contribute more to attach the *Mongol* Princes to the Emperor, than his Magnificence. His Majeſty has not thought proper to give theſe Princes, any more than his ancient Vaſſals, the Power of putting their Subjects to Death, or of confiſcating their Goods; theſe Caſes being referred to the Sovereign Tribunal at *Pe-king*, called *Mongol Shurgan*, or, *the Tribunal of the* Mongols [c].

BENTINK obſerves, that the *Monguls* of the Weſt (by whom, properly, ſhould be underſtood the *Kalka Mongols*) obey one *Khân*, who was formerly, as it were, the grand *Khân* of all the *Mongols*: But though, ſince the *Manchews* [d] have poſſeſſed *China*, he is much fallen from his former Grandeur, he is ſtill very powerful; being able, with Eaſe, to bring into the Field fifty or ſixty thouſand Horſe.

The Prince, who reigned over them in the Author's Time, and was called *Tuſhidtu Khân* [e], had his Abode upon the River *Orkhon*; and the Place where he uſually encamped was called *Urga* [f], twelve Days Journey to the South-Eaſt of *Selinghinſkoy*. Several petty *Khâns*, who dwell about the Springs of the River *Jeniſea*, and the Deſarts of *Goby*, are tributary to him. And though he has put himſelf under the Protec-

[a] In the *French*, *Tonſhu Hân*. [b] In the Original, *Hûhû-hetun*. In former Maps, *Koko-boton*, and *Kok-ton*. [c] *Du Halde's China*, p. 251, *&c ſeq.* [d] Our Author, for *Manchews*, puts *Mongals of the Eaſt*, which is a Miſtake. [e] The ſame, doubtleſs, who is by *Regis* called *Tuſiktu Khân*. [f] *Urga* ſignifies the Place where the *Khân*, at any Time, encamps. The Miſſioners call it *Harkas*.

tion of *China*, to be in a better Condition to make Head againſt the *Kalmûks* (or *Eluths*) that Submiſſion is at the Bottom, but a precarious and honorary one, obtained of his Father by the Intrigues of the *Lamas*: For inſtead of paying any Tribute, the Emperor ſends him, annually, magnificent Preſents; and the Court of *Pe-king*, which is accuſtomed to treat Tributaries very rudely, behaves, upon all Occaſions, with ſo much Complaiſance towards this Prince, as plainly ſhews it fears him more than any other of its Neighbours. This, adds the Author, is not without Reaſon; for if he ſhould ever come to an Agreement with the *Kalmûks*, the Family, which reigns at preſent in *China*, would have enough to do to keep themſelves firm on the Throne [a].

5. *The* Wars *between the* Kalkas *and* Eluths. *By* Gerbillon.

Mongol *Empire divided by Faction: Under three* Khâns: *Formerly powerful: The War occaſioned by the* Khûtûktû. *The Emperor applied to. Treaty ſet on-Foot by his Means; but comes to nothing. The* Kalkas *defeated by the* Eluths: *Seek Protection from the Emperor.* Kaldân *incenſed: Invades* China: *Fights the* Chineſe *without Succeſs: Comes to a Treaty: Renews Hoſtilities: Is totally routed.*

THE Princes of the *Kalkas* (who, like thoſe of the *Mongols*, are almoſt all deſcended from *Jenghiz Khân*, or his Brothers) had, at firſt, a Monarch under the Title of *Hân*, or King, though tributary, as the other *Kalkas* were to the *Mongol* Prince *Chahar-hân* [b], deſcended from the eldeſt Branch of the Emperor *Kûblay*, Grandſon of *Jenghiz Khân*: But the *Kalkas*, in Time, vaſtly increaſing, and the Deſcendants of *Kûblay*, who had only the Title of *Taykis*, growing numerous, the more powerful among them made themſelves, by Degrees, independent of one another, and of the King himſelf, to whom they paid only a ſlight Homage.

BEFORE their late Deſtruction, by the *Eluths*, the Author was aſſured, there were no leſs than ſix hundred thouſand Families of theſe *Kalkas*, divided into ſeven Standards, with each its Head, and under them ſeveral Hundreds of *Taykis*. Three of the ſeven obtained of the grand *Lama* the Title of *Hân*: But moſt of the *Taykïs* acted as Sovereigns in their reſpective Territories, and paid their *Hâns* no farther Deference than the firſt Place in Aſſemblies, which were held to determine Differences, and conſult about public Affairs: For they looked upon themſelves as Members of one Confederate Nation; and though Diviſions frequently aroſe, by the ſtronger Princes oppreſſing the weaker, they were eaſily reconciled by the *Lamas*, by whom they were entirely governed, and eſpecially by the grand *Lama* of *Tibet*, to whom they paid a blind Obedience. 1699. Gerbillon.

THE eldeſt of theſe three *Khâns*, *Shaſaktû*, poſſeſſed the Country immediately Eaſt of *Mount Altay*, and extending to the Rivers *Selinga*, *Orkhon*, and *Tûla*; being ſeparated from that of the *Eluths* by the foreſaid Mountain, looked-upon by the *Mongols* as the moſt conſiderable in all *Tartary*. *Under three* Khân.

THE ſecond, *Tûſhetû*, or *Tûſhektû Hân*, was the moſt powerful of the *Kalka* Princes. His Territory extended along the three laſt mentioned Rivers, to *Mount Kentey*, whence the *Tûla*, and *Kerlon*, derive their Sources.

THE third, *Che-ching Hân*, reſided towards the Source of the *Kerlon*, along which River his People extended themſelves, to its Fall into the Lake *Dalay*, or *Kûlon*; and alſo beyond, as far as the Province of *Solon*. Theſe two laſt Princes took the Title of *Hân* about forty or fifty Years ago; but the firſt long before.

THESE *Kalkas* were ſo powerful before the Wars, as to give Uneaſineſs to the Emperor of *China* himſelf. They were very rich in Flocks, and their Plains covered with Horſes, of which they ſold an hundred thouſand every Year at *Pe-king*. Theſe Horſes, one with another, went-off for ſeven or eight Crowns, and a picked Horſe yielded fifteen: But ſince the Ruin of theſe People, while the Emperor was at War with the *Eluths*, an indifferent Horſe, a little in Heart, was worth four hundred Livres [c], and more. *Formerly powerful.*

THE Occaſion of this War was as follows: A *Tayki*, or *Kalka* Prince, called *Lopzang-hum Tayki*, whom *Gerbillon* ſaw at the Aſſembly of the States of *Tartary*, attacked *Shaſaktû Hân*, took him Priſoner, and having put him to Death, ſeized his Eſtate, with Part of his Servants. The reſt, with his Children, fled to *Tûſhetû Hân*; who immediately diſpatched an Account of what had happened to all the Heads of Standards, and principal *Taykis*, inviting them to join againſt the Uſurper. They immediately aſſembled their Forces, attacked *Lopzang-hum*, took him, and ſent him to the grand *Lama*, to be puniſhed, whom they alſo deſired to inveſt the eldeſt Son of *Shaſaktû Hân*, with his Father's Dignity. Their Requeſt was granted, and the Son was eſtabliſhed in his Father's Eſtate; but neither his Flocks, nor Subjects, were reſtored: For *Tûſhetû* had *The War occaſioned*

ſeized

Mongols Country. By the Khûtûktû.

ſeized them for his own Uſe, by Advice of his Brother, who was one of thoſe living *Fo*, ſo numerous in *Tartary*.

THIS *Lama*, called *Tſing-chung-tumba* [a] *Khutuktu*, had been eight Years a Diſciple of the grand *Lama* of *Tibet*; where he had acquired the learned Language, and ſuch a Reputation in the School, that he reſolved to ſet-up for himſelf, pretending to be a living *Fo*, as well as his Maſter. He played his Part ſo well, that theſe *Kalkas* adored him as a Divinity; and his Brother went regularly, on ſet Days, to worſhip him, gave him the upper Hand on all Occaſions, and was entirely managed by him. This *Lama*, by his Pride and ill Conduct, occaſioned the Deſtruction of his Family, and the Empire of the *Kalkas*.

The Emperor applied to.

SHASAKTU Hân [b] being thus kept-out of his Effects, contrary to a Decree of the Aſſembly, ſent Ambaſſadors to the grand *Lama*, with a Complaint; praying him to interpoſe his Authority with *Tuſhetu Hân*, and his Brother the *Lama*, for a Reſtitution. The *Dalay Lama* accordingly diſpatched a *Lama* Envoy, who being corrupted with Preſents, contented himſelf with fair Promiſes. *Shaſaktu Hân*, deſpairing of Juſtice from that Quarter, ſent his ſecond Son, to beſeech the Emperor of *China* to eſpouſe his Intereſt. At this Time the *Kalka* Princes paid a Camel, and nine white Horſes, by Way of Tribute, to the Emperor, for a free Trade to *China*, though they were not very regular in the Payment. Thereupon his Majeſty diſpatched an Ambaſſador to the *Dalay Lama*, to engage him to ſend, by a Time appointed, a Perſon of Conſideration into the Country of the *Kalkas*, in order to meet a Grandee of his Court, to diſpoſe theſe Princes to an Accommodation, and to prevent a War.

Treaty ſet on Foot

MEAN Time *Shaſaktu Hân* dying, his eldeſt Son, who was in Alliance with *Kaldan (Hân* of the *Eluths)* his Neighbour, ſucceeded him, and was made *Hân*. The Envoys of *China*, and the *Dalay Lama*, being arrived at the Court of *Tuſhetu Hân*, they convened a ſecond Time the States of the *Kalka* Princes. The Imperial Envoy, named *Argui*, ſat as Preſident of the Tribunal; which is much of the ſame Dignity with the ſix chief Tribunals at *Pe-king*. From this Envoy, and the *Mandarins* who accompanied him, *Gerbillon* learned the Particulars of the Negotiation.

As the Envoy of the *Dalay Lama* repreſented his Maſter, every-one yielded him the firſt Place, except the Brother of *Tuſhetu Hân*; who being alſo a *Lama*, and profeſſing himſelf a living *Fo*, pretended to be equal to the High Prieſt himſelf, and would be treated with the ſame Diſtinction.

KALDAN, King of the *Eluths*, had alſo his Envoys at the Aſſembly, to ſupport the Intereſt of his Friend and Allie. Theſe, in vain, exclaimed againſt the Pretenſions of the *Kalka-Lama*, which they looked-upon as an Encroachment upon the Reſpect due to their common Pontiff; but he making no Conceſſion, the Envoys of the *Eluths* retired in great Diſcontent. In ſhort, to avoid a greater Difference than that which they came to determine, the Envoy of the *Dalay Lama* was obliged to conſent, that the King of the *Kalka*'s Brother ſhould ſit oppoſite to him. After this, Affairs being ſoon regulated in the Aſſembly, *Tuſhetu Hân*, and the *Lama* his Brother, ſolemnly promiſed, that they would faithfully execute what had been there decreed-upon. Hereupon the Eſtates ſeparated; but inſtead of keeping their Word, they continued their uſual Delays under divers Pretences.

MEAN Time the *Eluth* King, offended at the little Regard paid to his Envoys, and the Affront offered the *Dalay Lama*, in the Perſon of his Legate; as alſo preſſed by *Shaſaktu Hân*, to haſten the Reſtitution of his Effects, of which they ſtill detained the beſt Part, ſent an Ambaſſador to *Tuſhetu Hân*, and the *Lama* his Brother, to exhort them to perform their Promiſe, and eſpecially to complain of the *Kalka Lama*'s diſputing Precedence with the Legate of the *Dalay Lama*, who had been their common Maſter. The *Kalka-Lama* could not bridle his Rage, but loaded the Ambaſſador with Irons; and having ſent a threatning Letter to *Kaldan*, immediately put himſelf with his Brother, at the Head of a great Body of Troops, to ſurprize *Shaſaktu Hân*. That Prince, who expected nothing leſs, falling into the Hands of the *Lama*, was drowned, by his Order: He alſo put to Death one of the moſt conſiderable *Taykis*, and ſeized his Effects: After which invading the Territories of the *Eluth* King, he ſurprized a Brother of his, cut-off his Head, and fixing it on a Spear, expoſed it to public View; at the ſame Time ſending a Domeſtic of that unfortunate Prince, with a moſt abuſive and threatning Letter to the *Khân* of the *Eluths*.

THE *Khân* thoroughly enraged, yet ſtifled his Reſentment, till he was in a Condition to declare it. Mean-while he aſſembled his People, and next Spring, 1688, approached the Territories of *Tuſhetu Khân*. The *Lama*, who had expected no leſs, demanded Succours of all the

[a] His Name is written differently, in *Gerbillon*'s Tracts, almoſt as often as it occurs, *viz. Chetzuin-tamba*, *Champſin-tamban*, and *Champezun-tamba*. [b] By this the Son ſeems to have had the ſame Name of the Father, or *Shaſaktû Hân* was a Title that deſcended in the Family.

other *Kalka* Princes; alledging, that he had put a to Death *Shaſaktû Hân*, for having entered into a League with *Kaldan*, to make War on all the other *Kalkas*: Whereupon moſt of theſe Princes, with conſiderable Forces, came to the Rendezvous on the Frontiers. The King of the *Eluths* being advanced, and finding the Enemy's Army much ſuperior in Force, thought it beſt to encamp, hoping that Diviſions would ſoon ariſe in the Army of the *Kalkas*; in which he was not deceived. The Head of one of the moſt numerous Standards decamped firſt, by Night, with all his People: *Checking Hân* ſoon followed his Example; and all the reſt, one after another, marched-off, leaving *Tûſhetû Hân*, and the *Lama* his Brother, with none but the Troops of their own Standard. b

As ſoon as *Kaldan* underſtood this, he fell upon the Enemy, who making no Reſiſtance, were eaſily routed; the two Brother Chiefs, and their Families, having had much ado to eſcape, c with the Loſs of almoſt all their Baggage, beſides the greater Part of their Army, and Flocks. All the *Kalkas* of *Tûſhetû Hân*'s Family, wherever found, were put to the Sword: He himſelf was obliged to abandon his Camp, and the *Lama* his Reſidence, where every Thing was plundered, or burnt; and two fine Temples, which the latter had erected at his own Expence, were entirely demoliſhed [a]. *Kaldan*, after this, ſent Troops, with Orders to deſtroy the Country d with Fire and Sword; but eſpecially to kill all the *Kalkas*, who fled on every Side.

TUSHETU Hân, and the *Lama*, having retired to the Southern Extremities of the Deſart, near *China*, ſent to beſeech the Emperor to take them under his Protection, and to defend them from an Enemy, whoſe Ambition and Cruelty they highly exaggerated. His Majeſty diſpatched an Officer, to know of *Kaldan* his Reaſon for e carrying-on the War: The *Khân* anſwered with Reſpect, *That he had undertaken it to revenge the Death of his Brother, and reſolved to continue it: That he thought no Prince would give Refuge to ſo wicked a Man as the* Kalka-Lama; *who being the principal Author of ſo many Barbarities, he was determined to purſue him where-ever he retreated: That his Puniſhment equally concerned the Emperor, ſince he had ſo notoriouſly violated his Oath to his Majeſty's Ambaſſadors at* f *the Aſſembly of the States, and ſhown ſo little Regard to his Mediation.*

THE *Lama* knowing, that if the Emperor abandoned him, he muſt inevitably fall into the hands of his Enemy, the *Dalay Lama* being his Adverſary; in order to ſecure himſelf, offered to become his Majeſty's perpetual Vaſſal, with his Brother, Family, and Subjects, and to engage all the other *Kalka* Princes, ſeveral of whom, during this Negotiation, followed his Example. *Checking Hân* dying the ſame Year, his Widow alſo beſought the Emperor to receive her Son as his Vaſſal, and inveſt him with the Title of *Hân*, which was not to deſcend to his Family. 1699. Gerbillon.

THE Emperor at firſt contented himſelf with exhorting the *Khân* of the *Eluths* to abandon his Reſentment, and to be ſatisfied with the deplorable Condition to which he had reduced his Enemies. But *Kaldan* would liſten to no Accommodation; and again remonſtrated, that the Emperor was equally concerned to puniſh the Violation of a Treaty, guarantied by himſelf and the *Dalay Lama*: That however, if his Majeſty would deliver-up the *Kalka-Lama* to be judged by that Pontiff, he would deſiſt from Hoſtilities. But the Emperor thinking it unworthy his Dignity to abandon Princes applying to him for Refuge; and, beſides, having nothing to fear from the *Ruſſians*, ſince the late Peace of *Ni-po-chew*, took the *Kalka* Princes under his Protection, and granted them Part of his Lands in *Tartary*, to ſettle on; which gave Occaſion to the War between him, and the *Khân* of the *Eluths* [b]. *Kaldan incenſed.*

THIS Prince, towards the End of *July*, 1690, advanced at the Head of a ſmall, but well-diſciplined Army, to the Frontiers of the Empire. All the *Kalkas* encamped along the *Kerlon*, whoſe Courſe he had followed for the Convenience of Forage. He ſlew, or enſlaved, and purſued the Murderers of his Brother to the very Retreat the Emperor had aſſigned them. On the firſt Rumour of his March, his Majeſty drew together all the *Mongol* Forces that had been his Subjects from the Beginning of the Monarchy, and being encamped juſt without the great Wall, are, in ſome Sort, the Out-Guards of the Empire: Theſe, reinforced with ſome *Manchew* Troops, (who ſerved as Convoys to the Preſidents of the Militia) and the *Mongol* Officers, were ordered to the Frontiers, to obſerve the Motions of the *Eluths*. The two Preſidents formed a Deſign to ſurprize the *Khân* in his Camp; for which End they amuſed him with a Treaty of Peace, and when he was leaſt on his Guard, attacked him in the Night: But they were vigorouſly repulſed, and purſued within their own Territories, where they ſecured themſelves, by taking Poſt on the Mountains. *Invades China,*

ON Advice of this, the Emperor ſent a great Army from *Pe-king*, to fight the *Eluths*: He deſigned, at firſt, to command it in Perſon; but changed his Mind at the Remonſtrances of his *Fights the Chineſe*

[a] See before, *p.* 377. c. [b] *Du Halde's China*, p. 259, *& ſeq.*

Council;

Mongols Country.

Council, and made his next Brother Generaliſſimo, ordering his eldeſt Son to accompany him. The Army marched directly to the Enemy, who reſolutely expected them about eighty Leagues from *Pe-king*. *Kaldan* was poſted to Advantage, and though he wanted Artillery, and had but very few Troops, yet he accepted the Offer of Battle. At firſt his Van-Guard ſuffered very much by the Enemy's Cannon, which obliged him to change his Poſt, to be out of their Reach: But as he had a great Marſh before him, which prevented his being ſurrounded, he defended himſelf with great Bravery, till Night; when both Parties retired to their Camps. The General of the Ordnance, who was the Emperor's maternal Uncle, was killed towards the End of the Action by a Muſket-Shot, as he was drawing-off the Artillery.

Without Succeſs,

NEXT Day produced a Treaty, of which the Reſult was, That the *Khân* ſhould have Leave to retire with his Army, firſt taking an Oath before his *Fo*, never to return into the Territories of the Emperor, or his Allies. In his Retreat, Part of his Troops periſhed for Want; and his Nephew *Tſe-vang-raptan*, whom he had left Regent, withdrew into a remote Country, with all who were diſpoſed to follow him. This was ſuch a terrible Blow to *Kaldan*, that he was three or four Years recruiting his Army. The Imperial Generals, on their Return to *Pe-king*, were impeached, though they had the better in the Engagement: For it is a Law of the *Manchews*, that if a General gives Battle, and obtains not a compleat Victory, he is culpable, and ought to be puniſhed. Had the Emperor ſuffered the Commiſſioners to follow the Rigour of the Laws, his Brother had been deprived of the Dignity of *Vang* (or Regulo) and the other Grandees of his Council had at leaſt loſt their Places, beſides ſuffering Impriſonment: But the Emperor declaring,

Comes to a Treaty,

that a light Fault deſerved a light Chaſtiſement, the Regulo, with ſome other General Officers [a], were ſentenced to loſe three Years Revenue annexed to their Dignity, and the reſt degraded five Degrees. On the other Hand, his Majeſty beſtowed extraordinary Honours on the Memory of his Uncle, killed in the Action. His eldeſt Son ſucceeded to his Offices and Dignities, particularly to that of Head of a Standard. His Majeſty alſo recompenced the Kindred of the Slain and Wounded: In ſhort, all who had diſtinguiſhed themſelves, were rewarded according to their Merit. Next Year *Kang-hi* held an Aſſembly of the States of *Tartary*, wherein all the *Kalka* Princes, with one Conſent, paid him ſolemn Homage.

THE *Khân* of the *Eluths* continued in the Territories formerly belonging to *Shaſaktû Hân*, and *Tûſhetû Hân*, till 1694; when being recruited, he ſcoured the Banks of the *Kerlon*, maſſacring all the *Kalkas* he found: Thence advancing to the Frontiers of *Korchin*, he ſent Propoſals to the chief Prince, to join with him againſt the *Manchews*. *What greater Indignity,* (ſays he) *than from Maſters to become Slaves? We are* Mongols, *and under one Law: Let us unite our Forces, and regain an Empire, which is ours by Inheritance. I will ſhare the Glory and Fruits of my Conqueſts, with thoſe who will ſhare the Danger: But if there ſhould be any* Mongol *Princes (as I hope there are none) ſo baſe to chuſe Slavery to the* Manchews, *our common Enemy, let them expect to feel the firſt Efforts of my Arms.* The King of *Korchin*, as a Proof of the Fidelity he had ſworn to the Emperor, ſent him the Letter, which made his Majeſty a little uneaſy: For though he knew the *Eluths* were too weak to venture to attack him, he did not like a Confederacy of the *Mongol* Princes, ſupported by the *Dalay Lama*: He therefore reſolved either to extirpate the *Eluths*, or compel them to a ſolid and laſting Peace.

WITH this View, in 1696, he invaded *Tartary* with three Armies, in order to incloſe them on all Sides. One of theſe Armies gained a compleat Victory, while that under the Emperor ſtruck every Place with Terror. In ſhort, the Year, and the next, all theſe *Tartars* were deſtroyed, ſubdued, or diſperſed; and the Death of *Kaldan*, in 1697, while the Emperor was marching to ſeek him out in his Retreat, compleated their Ruin; the Remains of theſe unfortunate *Eluths* being obliged to implore his Majeſty's Clemency, or take Shelter with *Tſe-vang-raptan*, the only ſurviving Prince of that People. The War thus ended, *Kang-hi* became abſolute Maſter of all the Empire of the *Kalkas* and *Eluths*, and extended his Dominions in *Tartary* as far as the great Deſarts and Foreſts, which make the Frontiers of *Ruſſia* [b].

6. *A farther Account of the ſame* Wars, with the Hiſtory *continued. From* Bentink [c].

Boſto Khân's *Cruelty.* Zigan Araptan *flies to Court.* Zain Khân *invades him: Defeats*

[a] See before, *p.* 239. e. [b] The ſame, *p.* 261. [c] The following Account is taken from the Preface to the State of *Little Bukharia*, publiſhed in 12mo. at *Cologn*, 1723, making the fourth and laſt Chapter of that Treatiſe. It bears the Title of *The late Revolution, which happened in* Little Bukharia; and by the proper Names, the Relation appears to have come from *Ruſſia*. A Tranſlation of it is inſerted in the ſecond Volume of the general Hiſtory of the *Turks*, *Moguls*, and *Tartars*, compoſed out of the ſaid *Bentink*'s Notes to the Genealogical Hiſtory of the *Tartars*, publiſhed by him in *French*, 1726.

Van: Is totally routed. Bosto Khân's *Success: His Army destroyed: He hardly escapes: Poisons himself: His Nephew succeeds: Offends the* Chineses: *They seize* Khamil, *and other Provinces:* Mongols *settled there.*

BOSTO, or *Bosugto Khân* [a], Prince of the *Kalmuks* (or *Eluths*) who usually encamped on the Lake *Yamish*, and in the neighbouring Desarts, bred-up at his Court three of his Brother's Sons. Having taken an Aversion to the b eldest, and finding no Cause to put him to Death, he had Recourse to a Man of great Strength; who under Pretext of wrestling with the young Prince, handled him so roughly, that a few Days after he died. *Zigan Araptan*, the youngest, alarmed at such a Proceeding, which *Bosto Khân* would pass-off as an Accident, fled, with his Friends and Domestics: Nor could his other Brother, *Dankhinambu*, whom the *Khân* sent after him, prevail with him to return. c Though his eldest Brother might have been of a haughty and turbulent Spirit, as the other represented; yet he was resolved not to trust an Uncle, who was capable of doing so unnatural an Action.

SOME Time after, *Bosto Khân* falling-out with *Zain*, or *Zuzi Khân* [b], Prince of the *Mongols* [c], *Amulon Bogdo Khân* [d], Emperor of *China*, to prevent a War, sent his Ambassador *Averna Alkanaybu*, to propose a Congress on the Frontiers, d for ending their Differences, by the Mediation of the *Dalay Lama*, in Behalf of whom the *Deva* [e] met: But a Dispute for Precedence between the Ambassadors brought it to nothing. Upon this Rupture, the Emperor *Kang-hi* was in Doubt, for a Time, what Course to take, as no less fearing the intrepid and enterprizing Spirit of *Bosto Khân*, than the ill Consequences that must attend his defeating the *Mongols*. At length, in order to keep the War at a Distance from his e Frontiers, he persuaded *Zain Khân*, as the best Policy, to be before-hand with *Bosto Khân*, and penetrate deep into his Dominions; backing his Insinuations with many magnificent Presents, and Promises to assist him, under-hand, in Case of Need.

ZAIN Khân following this Advice, entered the Country of the *Kalmûks*, and, in the first Encounter, his Van-Guard entirely defeated that of *Bosto Khân*, whose Brother *Dorzizap* lost his f Life. The *Khân* was taking Tea, when the Express brought him News of the Loss, and that the Enemy was not far-off. He was at first concerned at it, and making haste to give some Order, the Cup slipt from between his Fingers, and scalded his Hand. *See*, says he, laughing, *what one gets by being too alert: If I had been less forward, I should not have scalded myself.* The Rigour of the Season, and Depth of the Snow, hindering him to act as he would, he drew his Army together, and kept upon his Guard; not doubting but the *Mongols*, grown venturesome after their Victory, and not knowing the Country as well as he, would soon give him an Advantage: The better to lead them into the Snare, he counterfeited Fear; and mounting his Horse in haste, gave-out, that he was gone quite-off, and should not be heard-of for some Time. Bentink.

THIS Report reaching the Camp of the *Mongols*, *Zain Khân* doubled his March, and detached two flying Parties, one of eight thousand, the other of three thousand Men, by different Roads, to overtake the pretended Fugitive. This was what *Bosto Khân* aimed-at, who turning suddenly upon those Detachments, surrounded, and cut them in Pieces. Then, without Delay, he marched against the main Body of the *Mongols*, who were so astonished, that they fled without striking a Stroke; and *Basto Khân* pursuing them, made a horrible Slaughter. This may be judged from the nine Camels-Loads of Ears, and Locks of Hair, which he sent to the Place of his Residence, as Tokens of his Victory. After that, putting himself at the Head of thirty thousand Men, he followed those who had escaped the Slaughter, driving them before him as far as the great Wall of *China*; within which, at length, *Zain Khân* retired. *Is totally routed.*

THE Emperor being informed of this ill Success, endeavoured, by Persuasions and Gifts, to prevail on *Bosto Khân* to withdraw: But that Conqueror, instead of hearkening to an Accommodation, sent *Kang-hi* Word, that if he did not deliver-up *Zain Khân*, and the rest who had taken Shelter in his Dominions, he would declare War against him. *Amulon Bogdo Khân*, taking this as a Challenge, caused several Bodies to march one after the other, which were defeated by *Bosto Khân* as fast as they arrived. The Troops of that Prince were so brave, or those of the Emperor so bad, that at one Time a thousand *Kalmûks* beat twenty thousand *Chineses*; and another Time ten thousand overthrew eighty thousand. At length his Majesty, to put an End, at once, to the Progress of his Enemy, *Bosto Khân's Success,*

[a] Or, *Bussuktu Khân. Bussuk* signifies *broken*, the Name given by *Oghûz Khân* to his three eldest Sons, according to *Alu'lghâzi Khân*. See the Reason in the History of the *Turks*, &c. vol. 1. p. 21. [b] This must be *Tsiperû Hân*, in *Gerbillon*'s Relation, *Tushi* being by some written *Zuzi*. [c] Or, *Kalka Mongols*. [d] So the *Russians* call the Emperor of *China*, sometimes, *Amulogdo Khân*. [e] *Deva*, or *Tipa*, is the Title of the King of *Tibet*. Hence, perhaps, the Name of *Tibet*, or *Tipet*.

Mongols Country.

resolved to oppose him with all his Forces, and a oppress him by Numbers.

His Army destroyed,

FOR this Purpose he assembled an Army of three hundred thousand Men, accompanied with a Train of three hundred Pieces of Cannon, which surrounded the *Kalmûks* Camp on every Side. The Emperor, though almost sure of Victory, yet ever preferring gentle Methods to violent, sent *Bosto Khân* Conditions, as advantageous as if he had been in the other's Circumstances: But the *Khân* puffed-up with his former b Success, rejected the Proposals with Disdain: Whereupon ensued a bloody Battle, which he lost, escaping with Difficulty to the neighbouring Mountains. This Misfortune, though very great, did not so much afflict him, as the Loss of his Wife *Guni*, or *Ani*, who was slain in the Rout. Her Body having been found among the Dead, the Emperor caused the Head to be cut-off, and carried it along with him to adorn his Triumph [a].

He hardly escapes.

PROVISIONS and Forage beginning to fail in the Mountains, whither *Bosto Khân* had retired, most of his few Followers, and of his Horses, died for Hunger: So that he returned almost alone into his own Dominions, where he spent two Years in great Affliction, exposed to the Reproaches of his Subjects. Perceiving he had nothing for it, but to negotiate the Affair, he sent his Son *Septenbaldius*, to the *Dalay Lama* at *Barantola*, to desire his Mediation, which he slighted d before: But *Abdalla Begh* [b], Governor of the Town of *Khamul* [c], though dependent on *Bosto Khân*, caused him, and his small Retinue, to be seized in passing through his Government, and sent them to *Amulon Bogdo Khân*, who cut-off their Heads, and confirmed the Traitor in his Post.

Poisons himself.

THE News of this Disaster threw *Bosto Khân* into Despair: He assembled all his Subjects, exhorted them to live in Peace and Unity; and e then giving them Liberty to retire every one where he pleased, took Poison, and died. This was the End of *Bosto Khân*, a Prince of great Genius and Valour, who, by a Series of Successes, had made himself terrible to all his Enemies, and acquired a great deal of Glory.

As soon as *Zigan Araptan* [d], who kept hid all this While, heard of his Uncle's Death, he presented himself to the *Kalmûks*, and demanded the Succession; which they could not deny him, f as being next Heir. The *Bukhars*, whom *Bosto Khân* had conquered some Time before, followed their Example; and the other Provinces, which refused to come-in of themselves, were obliged to it by Arms. When Things were thus settled, the *Bukhars* conducted him one Day to an agreeable Grove, consisting of not above an hundred Trees, very bushy, and of a particular Kind; where, for some Days, he feasted them splendidly: After which they solemnly invested the new Prince with the Title of *Kontaish* (or *Kontayki*) which signifies, a *Grand Monarch*; forbidding, under Pain of Death, to call him by his former Name.

THE *Kontaish* well deserved that Distinction, as being a Prince endowed with great Talents: He is remarkable for his Genius and Gentleness, Courage and Piety. His Moderation appears from hence, that one of his Domestics having, by Accident, when hunting, shot-out one of his Eyes, he not only pardoned, but gave him his Liberty, to make amends for the Danger he had run of losing his Life from the enraged *Kalmûks*. *Bentink* relates another Passage of him: A Man, c whom he had set-up thrice-running in a flourishing Condition, coming to beg his Assistance the fourth Time, *Kontaish* made answer in these Terms: *Remember, my Son, that I have assisted you three Times; and I would do it now also, if I did not judge, by the Obstinacy of your bad Fortune, that Heaven seems to have destined you to Poverty: I dare therefore no longer aid a Man whom God himself so visibly abandons* [e].

KONTAISH proved no less enterprizing than *Bosto Khân*. About the Year 1716 he conquered *Tibet* [f]: But, four Years after, the Provinces of *Khamil* and *Turfân*, belonging to *Little Bukharia*, were taken from him by the *Chinese*; which happened in the following Manner. *Kontaish* having been informed, that there was to the East of the *Gobi* [g], or Deserts, at the Foot of the Mountains which separate his Lands from those of *China*, a Gold Mine so rich, that it might be worked without much Trouble, he sent one of his *Mursas* [h] with ten thousand Men to take Possession of it. But the *Chinese* and *Mongols* falling-on them in great Numbers, routed and pursued them to the Desart. This the *Kalmûks* repassed, by Favour of certain very fertile Valleys, hidden by the high Mountains which cross the Desart on that Side from West to East; and were, till then, unknown to the *Chinese*.

THE late Emperor *Kang-hi*, to try if any Advantage could be made of this Discovery, sent f powerful Army that Way, with a good Train of Artillery, under his third Son, at present *Kh*

[a] History of the *Turks*, *Moguls*, &c. vol. 2. p. 549, & *seqq*. [b] In the Original, *Abay Dola Beck*. [c] *Khamil*, or *Hami* (as the *Chinese* pronounce it) at the very Extremity of *Little Bukharia*, and Edge of the great Desart. [d] By *Gerbillon* called *Tse-vang Raptan*. [h] A Corruption of the *Persian* Word *Mirza*, which signifies a Prince.

of *China* [a], accompanied, as it was ſaid, by a Jeſuit, very underſtanding in Fortifications and Fireworks, to aſſiſt him with his Advice in this Expedition. That Prince having paſſed the Deſarts by the ſame Road which the *Kalmûks* followed in their Retreat, entered the Provinces of *Khamil* and *Turfan*; and finding, that *Kontaiſh* advanced to meet him with a fine and numerous Cavalry, againſt whom he durſt not venture his Army in the vaſt Plains of thoſe Provinces, he bethought himſelf of building Forts at proper Diſtances; which he took Care to furniſh very well with Cannon and Infantry. By Favour of thoſe Forts he advanced continually forwards in the Lands of *Kontaiſh*, and made himſelf, at length, intire Maſter of the aforeſaid Provinces; the *Kalmûks* not being able all the while to bring him to a Battle.

HEREUPON *Kontaiſh*, who ſaw it was impoſſible for him to repel the *Chineſe* without Infantry and Guns, the Uſe of which had been till then unknown to the *Kalmûks*, in the Year 1720 ſent Ambaſſadors to *Peter* I. Emperor of *Ruſſia*, then at *St. Peterſburgh*, offering to become tributary to him, provided he would ſend ten thouſand regular Troops with Cannon to his Aſſiſtance; obliging himſelf, with that ſmall Aid, to drive the *Chineſe* out again. But the War with *Sweden*, which was then a-foot, joined to the Views which the Emperor *Peter* began to have upon *Perſia*, hindered him from accepting thoſe advantageous Propoſals.

MEAN-TIME the *Chineſes* ſeized all which belonged to *Kontaiſh*, lying to the Eaſt of the Deſarts, towards the Frontiers of *China*, and have there ſettled Colonies of *Mongols*; but did not meddle with the Territories of the *Dalay Lama*. However, ſays the Author, if they can keep Poſſeſſion of the Provinces of *Khamil* and *Turfân*, and come to extend themſelves, as they ſeem inclined, along the Mountains, reaching on that Side to the Dominions of the Great *Mogul*, the Country of *Tangut* (or *Kokonor*) muſt fall of courſe into their Hands [b].

SECT. V.

The Natural Hiſtory *of the* Country *of the* Mongols *and* Kalkas.

Surface and Soil. Full of Game. Yellow Goats. Wild Mules, and Boars. Horſe and Dromedary. Han-ta-han, *or* Elk. Chulon, *or* Linx. *The Tiger, its Fierceneſs. Deer, and Stag-Call.* Mongol *Horſes, ſtrong and hardy. Their Furs: Fiſhery. Plants and Simples: Rhubarb. Bird* Shun-gar, *or* Kratzſhet: *Storks.* Regis, Bentink.

THE Lands of the *Mongols*, including all as far as the *Caſpian* Sea, are, according to the Miſſioners, for the general, unfit for Tillage; and, by what they could obſerve, thoſe of *Korchin*, *Oban*, and *Nayman* (bordering on *Eaſtern Tartary*) through which they paſſed twice in their Return from *Petuna* and *Tſitſikar*, are the worſt [c]. *Bentink* ſays, the Countries belonging to the proper *Mongols* and *Kalkas* are better ſupplied with Water and Wood than thoſe of the *Kalmûks*, (or *Eluths*) as being more mountainous; yet takes Notice, that there are many Places which cannot be inhabited for want of thoſe Conveniencies [d]. *Surface, and Soil.*

TARTARY, according to *Regis*, abounds with all Sorts of Game, even of the Kinds common in *Europe*; as, Hares, Pheaſants, Deer. The yellow Goats, by the *Chineſe* called *Whang-yang*, are ſeldom ſeen in the Plains but in large Herds: They are of the Shape and Size of common Goats: Their Hair is yellow, and not ſo ſmooth. Their Safety conſiſts in their extraordinary Swiftneſs. *Full of Game.* *Yellow Goats.*

THE wild Mules [e] go in ſmall Herds, but are not like the tame ones [f], nor can be brought to carry Burdens: Their Fleſh alſo is different, being of an agreeable Taſte, and in the Opinion of the *Tartars*, who feed much on it, as nouriſhing and wholeſome as the wild Boar's. This laſt Animal frequents the Woods and Plains beyond the *Tûla*, and is traced by the Earth it turns-up, to come at the Roots on which it feeds. *Wild Mules, and Boars.*

THE wild Horſe, and Dromedary, are like the tame, but found more to the Weſt; though ſometimes in the Territory of the *Kalkas*, which borders on *Hami*. The former is ſo fleet, that the ſwifteſt Hunters can ſeldom reach him with their Arrows. The wild Horſes go in large Herds; and when they meet with tame ones, ſurround, and force them away. *Horſe, and Dromedary.*

THE *Han-ta-han* reſembles the Elk. The Emperor *Kang-hi* went ſometimes to hunt this Creature, which is a common Diverſion of the *Solons*. The Miſſioners ſaw ſome, when killed, bigger than the largeſt Ox. They are found only in particular Diſtricts of *Tartary*; namely, about *Mount Swelki*, in boggy Grounds, where they delight, and are moſt eaſily killed; their great Weight hindering their Flight. *Han-ta-han, or Elk.*

THE *Chulon*, or *Chelaſon*, is about the Size of a Wolf, and ſeemed to *Regis* a Sort of Linx. The Skin is much valued at *Pe-king*, where they *Chulon, or Linx.*

[a] In 1726. This was *Yong-ching*, ſince dead. [b] Hiſtory of the *Turks*, *Moguls*, &c. p. 546, & *ſeqq.* [c] *Du Halde's China*, p. 249. [d] Hiſtory of the *Turks*, &c. as before, *p.* 500. [e] *Yo-lo-tſe*, in *Chineſe*, is a Mule. [f] *Garbillon*, in his ſecond Journey into *Tartary*, met with a Sort of wild Mules, which propagate.

Natural History.

make of it the *Ta-hû*, or Surtout. It has long, soft, and thick greyish Hair. There are great Numbers of them in and near *Russia*, and the Fur fetches a Price at that Court.

The Tiger,

THE *Lau-hû*, or Tiger, infests *China* as much as *Tartary*, and is the most savage of all these Animals. Their Cry alone strikes Horror in those not used to it; and those Eastwards are also surprizingly large, and nimble. Their Skins are commonly of a fallow Red, striped with black Lists: But there are in the Royal Wardrobe some white ones, both with black and grey Lists. Out of the Court the great *Mandarins* of War use these Skins, including both Head and Tail, to cover their open Chairs, when they go in Procession; and in the Court, the Princes, during Winter, cover their Cushions with them. Although these Animals are so fierce, they seem to be in great Fear when they find themselves surrounded by the Royal Hunters, presenting their Spears: And whereas the Deer, driven along with them, fly from Side to Side, in order to escape between the Ranks; the Tiger squats on his Tail in the Spot, where he first sees his Enemies, and bears a long Time the Barking of Dogs, and Thumps of blunted Arrows. Provoked at length, he springs with such Rapidity, that he makes, as it were, but one Leap to the Hunters, on whom he fixes his Eyes: But those of the same File are ready with their Spears pointed, and plunge them into his Belly the Moment he offers to seize their Companion. The Emperor's Hunters are so quick, that an Accident very seldom happens.

Its Fierceness.

THE *Pau* [a] are a Kind of Leopards, their whitish Skins being spotted red and black: Though they have the Head and Eyes of a Tiger, they are not so big, and have a different Cry.

Deer, and Stag-Call.

THE Deer, which multiply exceedingly in the Deserts and Forests, differ in Colour, Bigness, and Shape of their Horns, according to the different Quarters of these vast Countries; and some of them are like those in *Europe*. The Stag-Chace, called *Chau-tû*, or the Stag-Call, is so very engaging, that the late Emperor *Kang-hi* [b] used to repair to it with a select Company before Sun-rise. It is thus: The Huntsmen, taking some Stags Heads, counterfeit the Cry of the Hind. Upon this the largest Stags advance pretty near the Place where they hear the Cry, then stop, and look on all Sides; till at length perceiving the Stags Heads, they tear-up the Ground with their Horns, and immediately run forward; but are shot by some, who lie in Ambush.

Mongol Horses,

THE Intrepidity of the *Tartarian* Horses, at encountering such fierce Beasts as Tigers, is surprizing; and yet it is only Use, for they are as fearful of them at first as other Horses. The *Mongols* are very expert in training them; and have a great Number of every Colour, distinguished by different Names. They are particularly dextrous at catching them running, with the slip-Knot of a Cord, and in speedily breaking them. They understand their Distempers, and commonly use such Remedies as would no more agree with our Horses, than their Food. They wisely prefer Strength and Hardiness, to Largeness and Beauty: Not that the *Tartar* Horses can be called little, they are rather of a middle Size; and, among such vast Numbers, you may always pick-out some as large and handsome as the *European*. Such are the Emperors, and those of the Princes and Grandees: For at *Pe-king* they are mighty proud of being well-mounted; and a good Horse, nay, a Mule, commonly sells for six or seven hundred Livres, often more.

THE *Kalkas* are not rich in Sable-Skins, but have Plenty of Squirrels, Foxes, and a Creature as small as an Ermine, called *Tael-pi*; of whose Skins, at *Pe-king*, they make your *Tew-pong*, or Mantles, to keep-out the Cold. These Animals are a Kind of Land-Rats, very common in some Territories of the *Kalkas*, and dig in the Earth a Range of as many little Holes as there are Males in the Company; one of whom always keeps Watch above, but flies under-Ground at any-one's Approach. Nevertheless, they escape not the Hunters, who, on discovering their Nest, surround it; and opening the Earth in two or three Places, throw-in flaming Straw, to frighten them out: Thus they take great Numbers; so that their Skins are cheap.

THE Fishery of the *Mongols* is not considerable; for their Rivers are not comparable to those of the *Manchews*, and the *Yu-pi Tartars*. If they sometimes, as they say, take Sturgeons in the *Tûla*, they are such as come-up from the great Lake *Pay-kal*, with which this River has Communication. And though the same Kind of Fish are found in the *Urson*, as in the more Eastern Rivers, particularly the *Cha-chi-i*, it is because they fall into the *Saghalian-ûla*. In the Part of the *Urson* is also found an amphibious Creature, called *Turbighé*, resembling the Otter, but the Flesh is tender, and almost as delicious as that of a Roebuck. I do not know, says the Author, that they are found any-where but about the Lakes *Pûir*, and *Kûlon*, which communicate with the *Urson*.

As to Plants: Agriculture is not only neglected, but even condemned as useless by all the Nations. When the Missioners asked them why they would not at least cultivate some little Ha

[a] *Pars* is the *Mongol* Word. before-mentioned.

[b] He likewise took great Delight in hunting the Tiger, and yellow G Gard

Gardens, they replied, *Herbs are for the Beaſts of the Field, and the Beaſts for Men.*

THEIR Geographical Labours would not permit them to ſearch after medicinal, and other curious Plants: Beſides, the *Lamas*, who are the principal Phyſicians, employ none but the moſt common Simples, and ſuch Drugs as are uſed in *China*. The only one which is rare, and in much Eſteem, is called, at *Pe-king*, *Kalka-ſetwen*; and, by the Miſſioners, the *Kalka* Root: It is of an aromatic Smell, and the Emperor's b Phyſicians give it with Succeſs, in Dyſenteries, and Diſorders of the Stomach [a].

BENTINK obſerves, that in the Parts about the *Orkhon*, and alſo the *Selinga* towards *Selinghinſkoy*, Rhubarb is found in great abundance; and that all which *Ruſſia* furniſhes foreign Countries with, comes from about this City; the Diſtrict whereof yields ſuch Plenty, that the Treaſury of *Siberia* ſells twenty-five thouſand Pounds of it at a Time. That Commerce might be very ad- c vantageous to *Ruſſia*, were it faithfully managed by the ſaid Commiſſioners: For, ſays the Author, I know not any Country that Rhubarb comes from at preſent, but *Ruſſia*; and if it came formerly from *China*, it was of that Sort carried thither from the Country of the *Mongols*, becauſe the Karawâns of *Siberia* heretofore drove ſome Trade with that Root at *Pe-king*: But ſince the *Europeans* have it directly from *Ruſſia*, there comes no more of it by the Way of d *China*.

THERE are bred vaſt Quantities of Birds of an extraordinary Beauty in the Plains of *Grand Tartary*. That mentioned by *Abu'lghâzi Khân* [b] ſeems to be a Kind of Heron, which is found in the Country of the *Mongols* towards the Frontiers of *China*: It is all-over white, except the Beak, Wings, and Tail [c], which are of a very fine Red. The Fleſh of this Bird is very deli- e cious, and has, in ſome Meaſure, the Taſte of our Wood-Hens. Nevertheleſs, as the Bird, which that Author ſpeaks-of, is very rare, it may be a Stork; for theſe are very ſcarce all-over *Ruſſia*, *Siberia*, and *Grand Tartary*: Yet ſome of them are found in the Country of the *Mongols* near *China*, which, for the moſt Part, are all white.

ABU'LGHAZI Khân ſays, the Bird is called *Shungar* in the *Turkiſh* Language, and *Kratzſhet* by the *Ruſſians*: Whence the *Engliſh* Tranſlator f conjectures, that it is the ſame called in the Hiſtory of *Timûr Bek* [d], *Shonkur*, and preſented to *Jenghîz Khân* by the Ambaſſadors of *Kapjak*. *De la Croix* remarks in the ſame Place, that the *Shonkur* is a Bird of Prey, preſented to Kings, adorned with ſeveral precious Stones, which is a Mark of Homage; and that the *Ruſſians*, as well as *Krîm Tartars*, are obliged, by their laſt Theaty with the *Ottomans*, to ſend one every Year, adorned with a certain Number of Diamonds, to the *Port* [e].

Table of Situations.

SECT. VI.

A Table *of* Situations *in* Weſtern Tartary.

THE Places in the following Table [f] ſeem to be ſet-down in the Order they occurred in the Progreſs which the Miſſioners made through this Part of *Tartary*. Their Latitudes were determined by aſtronomical Obſervations, and their Longitudes geometrically. But the roving Life of the *Mongols* and *Kalkas* did not permit our religious Geographers to mark their Habitations on the Map otherwiſe, than according to the Rivers, Lakes, and Mountains, near which they uſually encamp. *Hami*, or *Khamul*, and a few more Towns inſerted in the Table belong to *Little Bukharia*, which lies without the Bounds of *Weſtern Tartary*: But we thought fit not to d omit them, that we might not break the Thread of the Miſſioners Journey, which may be traced by Means of this Table.

SECT. VII.

The Countries *belonging to the* Eluths, *or* Kalmûks.

1. *Their* Extent, Bounds, Mountains, Rivers, Lakes.

Extent. Bounds, taken more at large. Mountains Tubra-tubuſluk. Uſkun-luk-tubra, *and their Branches.* Mount Altay. *Rivers* Tekîs, *and* Ili, *their Courſe. The* Chui, *and* Talas. *The* Irtiſh. *The* Obi.

THE Countries belonging to the *Eluths* take-up the larger Half of what *Europeans* call *Great Tartary*; extending from the *Caſpian Sea* [a], and River *Jaïk*, in ſeventy-two Degrees of Longitude, to *Mount Altay*, before-mentioned [b], in an hundred and ten Degrees; and from the fortieth to the fifty-ſecond Degree of Latitude. Hence it may be computed to be about one thouſand nine hundred and thirty Miles in Length, from Weſt to Eaſt; and its greateſt Breadth, from South to North, ſix hundred and fifty. *Eluths Country.*

IT is bounded on the North by Part of *Ruſſia*, and *Siberia*, from which it is ſeparated by a Chain of Mountains; on the Eaſt by *Mount Altay*, on the South by the Countries of *Karaſm*, with *Great* and *Little Bukharia*; from which alſo it is ſeparated partly by another Chain of Mountains, and ſome Rivers, particularly the *Sîr*; and on the Weſt by the River *Jaïk*. *Bounds.*

THE Bounds of this vaſt Region, which, according to *Bentink*, is the moſt conſiderable and fineſt Part of *Tartary*, is very diſtinctly traced by that diligent Enquirer. They begin at the Eaſt Bank of the River *Jaïk*, and ſtriking thence North-Eaſt, paſs the *Aral-tâg* [c], or *Mountains of the Eagles*, to meet the *Irtiſh*, over-againſt the Mouth of the *Om*; which laſt River they trace to its very Source: Afterwards they run Eaſtward to the *Obi*: Then paſſing-up that great River as far as the Lake *Altan* [d], where it riſes, they return to join the Mountains, called in that Part *Tugra-tubuſluk*; and thence winding Eaſtward, coaſt thoſe Hills, till within two Days Journey of the River *Selinga*, towards *Selinghinſkoy*. Here they take a Sweep towards the South, and having marched, for ſome Time, at the ſame Diſtance from that River, return to the Weſt: Then paſſing-on to the River *Jeniſea*, coaſt it from the forty-ninth Degree of Latitude as far as its Sources, following the Mountains which run-along it on the Weſt-Side. Afterwards they wind to the South-Eaſt, ranging the Frontiers of *China* Southward, from the thirty-ninth Degree of Latitude, to the Kingdom *Ava*: From thence wheeling-off to the Weſt, they extend along the Dominions of the Great *Mogul* as far as *Great Bukharia*. In fine, coaſting the Frontiers of this laſt Country, and *Turkeſtân* [e], they return by the North-Weſt to the Eaſtern Bank of the River *Jaïk*, where they began [f]. *Taken more at large.*

THERE are, in the Country of the *Eluths*, or *Kalmûks*, three conſiderable Chains of Mountains, *viz.* the *Tubra-tubuſluk*, above-mentioned, *Mountains* Tubra-tubuſluk.

[a] In this Space we include the Country called *Turkeſtân*, which being now poſſeſſed by the *Mohammedan Tartars*, lies between the *Eluths* and the *Caſpian Sea*. [b] *P.* 348. e. [c] *Tâg*, or *Dâgh*, in the *Mogul*, or *Turkiſh*, ſignifies a Mountain. Some write *Tau* for *Tâg*. [d] *P.* 380, This Author ſays, *Great Tartary* is ſeparated from *Siberia* by a great Chain of Mountains, which beginning at the River *Wolga*, about the fifty-ſecond Degree of Latitude, run from thence almoſt directly Eaſt as far as the Ocean. [e] Hence it appears, that the Author takes-in all *Tibet*, and *Little Bukharia*; which indeed belong, or did lately belong, to the *Eluths*; but are not, properly, a Part of *Great Tartary*, as he makes them to be, *p.* 383, even including *Great Bukharia*, and *Karazm*, as well as *Turkeſtân*; which laſt may be allowed to be a Part of it. [f] Hiſtory of the *Turks*, *Moguls*, &c. vol. 2. p. 522, *& ſeq.*

the

Geography. the *Uſkun-luk-tugra*, and the *Altay*. The firſt, a which makes the Northern Frontier, is ſo called, in the *Mongol* Language, by thoſe who dwell on the right, or Eaſt-Bank of the *Irtiſh*; but the Inhabitants of the left Side name it *Ulug-tâg* [a]. It begins at the Eaſtern-Bank of that River, to the North of the Lake *Sayſan* (through which the *Irtiſh* runs) and proceeds directly Eaſt as far as the *Selinga*: From thence turning to the North, it marches along that River till it enters the Lake *Baykal*: Afterwards returning to the b Eaſt, it paſſes-on to the Northern-Bank of the *Amûr* [b], about *Nerchinſkoy* [c], and follows this River continually as far as the Eaſtern Ocean.

Uſkun-luk-tubra, THE ſecond Branch, which is called by the *Eluths Uſkun-luk-tugra*, and to the North of the River *Sir*, bears the Name of *Kichik-tâg* [d], commences on the Confines of *Turkeſtân*, and *Great Bukharia*, to the South of the River *Sir*; and running Eaſt, makes the Bounds between *Great Bukharia*, and the Dominions of *Kontaiſh* [e]. It continues its Source afterwards near upon the ſame Line, till arriving to the South of the Springs of the *Jeniſea*, it ſtrikes-off to the South-Eaſt, and falls-in with the Frontiers of *China*, about the fortieth Degree of Latitude, upon the Confines of the *Eluths* [f], and *Mongols*. Thenceforwards it keeps Company with the great Wall of *China*, as far as the Province of *Lyautong*; where making an Elbow to the North-Eaſt, it ſeparates that Province, and *Korea*, from d the Country of the *Mongols*, and ends, at laſt, on the Shore of the Sea of *Japan*, about the forty-ſecond Degree of Latitude.

And their Branches. THE Country incloſed by theſe two Chains [g], which in ſeveral Places ſhoot-out others very conſiderable, is properly the ancient Patrimony of the *Tartars*, at preſent poſſeſſed by the *Eluths* and *Mongols*: For the other Dominions, which the *Mohammedan Tartars* and *Eluths* enjoy, do not originally belong to them, they poſſeſſing e them only by Right of Conqueſt.

Mount Altay. THE Mountain *Altay* [h], called in *Abu'lghâzi's* Hiſtory *Kut*, is a Branch of the *Uſkun-luk-tugra*, taking its Riſe to the Weſt of the Springs of the *Jeniſea*. It runs almoſt in a ſtrait Line from South to North, conſtantly marching along the Weſtern-Bank of that great River, at a Diſtance of one or two Days Journey, till it joins the *Tugra-tubuſluk*, in about fifty Degrees of Latitude.

THERE are but few Rivers to be met-with in this Part of *Tartary*, though ſome conſiderable ones have their Sources here. The moſt remarkable are the *Tekîs* and *Ili* [i], the *Chui* and *Talas*. *Bentink* ſays, the Courſe of the *Tekis* is almoſt from Eaſt South-Eaſt, to Weſt North-Weſt: That after it has run about forty Leagues from its Source, it mixes its Waters with thoſe of the River *Ila*, which comes from the North-Eaſt; and continuing from thence its Courſe to the Weſt, it loſes itſelf towards the Frontiers of *Turkeſtân*, among the Mountains which ſeparate that Country from the Dominions of *Kontaiſh*, grand *Khân* of the *Eluths*, who uſually reſides about theſe two Rivers [k].

ACCORDING to the Jeſuits Maps, the *Tekis* riſes in the Mountains [l] bounding *Little Bukharia* on the North; and having run about ſeventy c Miles North-Eaſt, falls, by ſeveral Mouths, into the *Ili*, which has its Source in the ſame Hills, and runs North-Weſt about an hundred and fifty Miles; then ſhaping its Courſe North an hundred and fifty Miles farther, falls into the Lake *Palkati*, in about forty-eight Degrees of Latitude. In *Strahlenberg's* Map of *Great Tartary*, and the *Ruſſian* Empire, this Lake is called *Choi*, and placed in forty-ſix Degrees. In other Reſpects it tallies with the Jeſuits Map, in this d Particular, excepting that the *Tekis* is made to run North-Weſt into the *Ili*, and this latter is not repreſented above half as long. They both agree in placing the chief Reſidence of the *Khân* of the *Eluths* on this River. It is called *Harkîs* by the Jeſuits, and by *Strahlenberg*, *Urga*; which laſt ſeems to be the true Name.

THE Rivers *Chui* and *Talas*, according to the Jeſuits Map, deſcend from the above-mentioned Mountains; and running North-Weſt about an hundred and eighty Miles each, fall-into different Lakes, the *Chui* into *Kalkol*, and the *Talas* into *Sikirlik-nor*. *Strahlenberg* mentions neither of theſe Rivers: Beſides which, we meet with none of any great Note, except the *Irtiſh*; nor does more than a Part of it run through this Country.

THIS River, which is the moſt conſiderable in the North of *Aſia*, hath its Riſe from two Lakes thirty Miles diſtant, about forty-five De-

[a] Or, *Ulug-dâg*, that is, the great Mountain. [b] Or, *Saghalian-ula*. [c] Or, *Ni-po-chew*. [d] That is, the little Mountain. [e] Or *Zigan Araptan*, who was *Khân* of the Eaſtern *Eluths*, called alſo *Dſongar*. [f] This Author always calls them *Callmaks*; which Name is given them by the *Ruſſians*, as well as the *Mohammedan Tartars*, or *Mongols*. [g] The Author calls them Branches of *Caucaſus*, as if they proceeded from the ſame Stock, which does not appear from his Account; nor has he any good Authority for placing *Caucaſus* theſe Quarters. [h] The Author calls it *Chaltay*: According to the *Engliſh* Idiom, *Haltay*, or *Khaltay*. [i] The Author makes them the *Iſſikul* and *Tallaſh*, mentioned by *Abu'lghâzi Khân*, Hiſtory of the *Tunks*, &c. vol. p. 33. But the Miſſioners Maps make the *Tallaſh* diſtinct from the other two. [k] Hiſtory of the *Turks*, as before, *p.* 524, 526, & *ſeq.* [l] Perhaps, the *Uſkum-luk-tugra*, before-mentioned.

grees fifteen Minutes of Latitude, and one hundred and thirteen of Longitude, on the West-Side of *Mount Altay*, and to the North of the Province of *Hami*, or *Khamil*, inclining to the East. The Rivers formed by them run Westward. The Northern-Stream is by *Strahlenberg* called *Khar Irtiſh*, and the Southern *Khor Irtiſh* [a]. About thirty Miles diſtant from their Sources they unite, and make the River, called *Irtiſh* [b]; which having run Weſt about fifty Leagues, forms the Lake *Sayſan*, that is, *of the Nobility*, forty Miles in Length, and twenty broad. Having croſſed this Lake, it turns Northwards as far as *Uſkamen*, the firſt *Ruſſian* Fort and Settlement on this River, and in the Borders of the *Eluths* Country on that Side. The reſt of the *Irtiſh* belongs to *Siberia*, where, after paſſing by the Capital *Tobolſkoy*, it joins the *Obi*, a little above *Samara*. The farther Deſcription we refer till we come to treat of that vaſt Province of the *Ruſſian* Empire.

STRAHLENBERG places the Sources of the *Obi*, or *Ubi*, alſo in the Country of the *Eluths*. It is formed, like the *Irtiſh*, by the Confluence of two Rivers, the *Khatun* and *Bu*; from which laſt it derives its Name. This *Bu*, or *Bi*, takes its Riſe in the Lake which that Author calls *Altan-nor*, *Altun-kurke*, *Altin*, and *Teleſkoe*; perhaps the ſame called in the Jeſuits Map *Kirkir*: But both Maps ſeem to have been made in this Part, from very uncertain Reports: Nor is *Kyrillow*'s more to be depended on, as having copied after thoſe Miſſioners.

2. Soil *and* Produce, Air *and* Animals.

The Land very high. Air exceeding cold. Sandy Deſarts, fertile in Paſture. No Foreſts. Animals, wild Goats.

ALL this vaſt Region, being ſituate under the fineſt Climate in the World, is everywhere of an extraordinary Goodneſs and Fertility: But it has this Misfortune, that though almoſt all the great Rivers of *Aſia* have their Springs in the Mountains of this Country, yet, as the Land is, perhaps, the higheſt to be found any-where on Earth, it is in ſeveral Parts deſtitute of Water: So that it is habitable only near the Rivers and Lakes. For an Inſtance of the great Elevation of this Country, *Verbieſt*, in his Journey into the Country of the *Mongols*, at a certain Place about eighty Leagues to the North of the great Wall, towards the Spring of the *Targa-muran*, found the Ground to be three thouſand geometrical Paces (or three Miles) higher than the Sea-Coaſt, neareſt the City of *Pe-king*. *Eluths Country.*

THIS great Riſing is the Cauſe that the Country of *Great Tartary* appears to be very cold, in Compariſon of others, which are under the ſame Latitude: And Perſons of Credit, who travelled in it, aſſured the Author, that even in the Heat of Summer the North-Wind is ſo piercing, that one muſt cover himſelf well in the Night, to avoid being incommoded by it; becauſe very often in *Auguſt*, one Night produces Ice the Thickneſs of a Crown-Piece, and ſometimes of two. *Verbieſt* would, in ſome Meaſure, attribute this to the Saltpetre, with which he affirms the Land of the *Mongols* Country is ſo impregnated, that dig where you will in Summer, four or five Foot deep, you ſhall find Clods of Earth quite congealed, and even intire Heaps of Ice. *Air exceeding cold.*

THIS ſame extraordinary Elevation is alſo the Reaſon why there are ſo many Deſarts within the Bounds of *Grand Tartary*: But theſe Deſarts, which the *Ruſſians* call *Step*, are not altogether ſo frightful as *Europeans* fancy them: For ſet-aſide the vaſt Deſart *Gobi* [c], heretofore called *Shamo* [d], and a few other ſmall ſandy Deſarts, all the reſt afford excellent Paſture, producing Graſs in abundance, as high as one's Middle; which would grow to the Height of a Man, if it was not for Want of Water; but through that Defect, moſt of it decays preſently at the Root, and becomes good for nothing. Seeing that withered Graſs quite choaks-up the young, the Inhabitants, at the Beginning of the Spring, ſet-Fire to the old Herbage, which extends as far as it can find Fuel, ſpreading ſometimes above an hundred Leagues round. *Sandy Deſarts,*

IMMEDIATELY after, the new Graſs ſhoots-up every-where with ſuch Force, that in leſs than fifteen Days it reaches the Height of a Span; which ſhews the great Fertility of the Soil, and makes it manifeſt, that they want only Water to render them the fineſt Plains in the World. Nevertheleſs, ſo much of this vaſt Country as is ſupplied with Springs and Rivers, is ſufficient for the Support of four Times the Number of the preſent Inhabitants, if it was but well-cultivated: But then none beſides the *Mohammedan Tartars* till their Lands; and they till no more than juſt what is neceſſary to ſupport them: For the *Kalmûks* (or *Eluths*) and greater Part of the *Mongols*, have not the Uſe of Agriculture, ſubſiſting intirely upon their Cattle: This is the Reaſon why they can have no fixed Habitation, being obliged to change their Quarters, according as *Fertile in Paſture.*

[a] In the Jeſuits Map, the firſt is called *Hara*, or *Kara Irtiſh*; the latter, *Ho Irtiſh*. [b] It is written alſo *Erchi*, and *Erchis*, as the *Eluths* pronounce it. [c] Or *Kobi*, ſo called by the *Mongols*. [d] It is ſtill called *Ho-mo*, by the *Chineſe*; and *Kan-hay*, that is, *the Sea of Sand*.

Natural History.

the Seasons change. As to every Order, or a Tribe, there belongs a particular Canton, in the Summer they inhabit the Northern Plains, and in the Winter those which lie to the South. Yet for all the Soil is so fruitful, *Grand Tartary* does not produce a single Wood of tall Trees, of any Kind whatsoever, except in some few Places towards the Frontiers. All the Wood that is found in the Heart of the Country consists in Shrubs, which never exceed the Height of a Pike, and those are very rare [a].

No Forests.

Animals, Wild Goats.

THE Country of the *Eluths* produces much the same Animals, as that of the *Mongols* and *Kalkas*. Wild Goats are very numerous in the Mountains, which separate *Siberia* from *Grand Tartary*; and exactly of the same Kind with those found in the Mountains of *Sweden*, and in the *Alps*: But it is hard to say whether these are to be understood by the *Arkhara*, which, according to *Abu'lghâzi Khân* [b], makes small narrow Paths on the Hills; or whether he means the *Gluton*, which abound in these Parts, and commonly form such Tracts upon the Mountains, and in the Forests.

The Gluton.

THE *Gluton* is a carnivorous Animal, not quite so tall as a Wolf, and peculiar to the Mountains of *Northern Asia*. The Hair, which is strong and long, is of a very fine dark Brown, all-over its Back. This Beast is exceeding mischievous, for it climbs the Trees, and watching the Game that passes underneath, when it sees a favourable Opportunity, leaps down on its Back, where it fastens with its Paws, and eats a great Hole. The poor Creature, after having in vain used all his Efforts to get rid of so cruel a Guest, at last with Anguish and Weakness falls on the Ground, and thus becomes a Prey to his Enemy. It requires three stout Dogs to attack this Kind of Beast, as small as it is, and very often they come-off strangely mauled. The *Russians* make great Account of the Skin, employing it usually for Mens Muffs, and Borders of Bonnets [c].

No Towns here.

IN all the Country of the *Eluths* and *Mongols*, one meets with no Towns (as in *Turkestân*, *Karazm*, the *Bukharias*, and *Tangut*, or *Tibet*) excepting four or five towards the Coast of the Eastern Ocean, and some few others towards *China*, which the *Manchews* [d] have built, since possessed of that Empire [e].

SECT. VIII.

The Manners *and* Customs *of the* Eluths, *or* Aluths.

1. *Their* Names, Shape, Dress, Diet, Marriages, *and* Funerals.

Their Names: Their Shape: Their Dress. Red-Colour esteemed. Their Cattle: Their Diet. Spirituous Liquor. Great Drinkers. Honest and brave. Polygamy in use. Inheritances. Fathers reverenced. Tartars *reputed Magicians by ignorant Writers.*

THE *Eluths*, the most numerous and considerable of the three Branches of the *Mongols*, are known in *Europe* by the Name of *Kalmûks*, or *Kalmâks*; which is no other than a Nickname given them, it seems, by the *Mohammedan Tartars*, in Hatred of their idolatrous Religion. The *Russians* took it from those *Tartars*, and from the *Russians* it came to us. But they take it as an Affront to be called *Kalmûks*, and pretend to have a much better Right to the Name of *Mongols* than their Neighbours, who at present enjoy it; these latter being sprung from that Part of the *Moguls*, and *Tartars*, who were expelled *China* by *Hong-vu* in 1368, as hath been before related [f]. When the Name *Kalmûk* first came in use, or on what Occasion, amongst the *Mohammedan Tartars*, does not appear. The first Time *Abu'lghâzi Khân* mentions them, is on Occasion of the Death of *Timûr Sheikh*, *Khân* of the *Uzbeks* [g]; which happened more than an Age after *Uzbek Khân*, who compleated the Introduction of the *Mohammedan* Worship among the Subjects of the Descendants of *Zuzi Khân* [h].

THE *Eluths* are of a middle Size, but exceeding robust, and well-set: They have big and broad Heads, flat Faces, and their Complexion is of a dark Olive-Colour, pretty near that of *American* Copper; very black and sparkling Eyes, but too far asunder, and opening but little, though they are very long. The Bridge of their Nose is quite flat, and almost level with the rest of the Face; so that there is nothing of a Nose to be seen, but the End, which is very flat also, with two great Holes, that form the Nostrils. Their Ears are very large, though without the Rims: Their Beards very thin, Hair black and strong, like Horse-Hair: They shave all off, excepting a Lock on the Crown.

[a] History of the *Turks*, *Mogols*, &c. p. 381, *& seqq.* [b] The same, vol. 1. p. 26. [c] The same, vol. 2. p. 528. [d] In our Author, the *Mongols* of *Nieuchou*, but erroneously. [e] History of the *Turks*, &c. before, *p.* 383. [f] *P.* 373. c. [g] The same, vol. 1. p. 210. [h] The same, vol. 2. p. 529, *& seq.*

the Head, which falls down their Backs, and a they let grow to its natural Length.

To make amends for all this Homelineſs, they have very pretty Mouths, and little enough, with ſmall Teeth as white as Ivory, and are perfectly well limbed.

THEIR Women have much the ſame Features, only not ſo large; but they are commonly of a very clever Size, and well-ſhaped.

THE Men wear Shirts of *Kitayka* [a]: Their Breeches are made of the ſame, and often of b Sheep-Skin; but they are extraordinary wide. In the Southern Provinces, they wear no Shirts in Summer, contenting themſelves with a Kind of Sheep-Skin Doublet without Sleeves, which they put-on next their Skin, with the woolly Side out, tucking the Skirts within their Breeches, ſo that all the Arm is left bare up to the Shoulders: But in the Northern Provinces they wear a Shirt underneath. In Winter they wear a Sheep-Skin over their Doublets, which reaches c down to the Calf of the Leg, and turn the woolly Side inwards, to keep them the warmer. Theſe upper Skins have Sleeves ſo long, that they are obliged to turn them up when they are going about any Work. They cover their Head with a little round Bonnet, commonly ſet-off with a Tuft of Silk, or Hair, of a bright Red, and edged with a Border of Fur. Their Boots are exceſſively big, and wide; ſo that they are very troubleſome to walk in. d

THEIR Women go habited much after the ſame Faſhion, the *Kitayka* Shift making all their Clothing in Summer, and a long Sheep-Skin Gown, with a Bonnet, the ſame with their Huſbands, ſufficing them in Winter [b].

RED is the Colour in greateſt Eſteem with the *Tartars*, and how ill-cloathed ſoever their Princes may be in other Reſpects, they never fail to have a Scarlet-Robe for State-Occaſions. The *Murſas* would rather be without a Shirt, e than a Scarlet-Coat; and the Women of Quality do not think themſelves well-dreſſed, if the Scarlet-Gown be wanting. The very meaneſt among the *Tartars* affect to wear red Cloaths, though the Cloth be ever ſo ordinary. This Humour has ſpread even among the People of *Siberia*, whoſe Chiefs think themſelves nobly equipped, when they can compaſs a red Suit: In ſhort, all-over the North of *Aſia*, a Man may do more with a Piece of red Cloth, than four f times its Value in Silver [c].

THOUGH the Countries which the *Eluths* Chiefs are ſituate in the fineſt Climate in the World, they never mind cultivating their Lands, 1726. but live purely upon their Cattle, which conſiſts Bentink. in Horſes, Camels, and Oxen, or Cows and Sheep. Their Horſes are very good and mettleſome, being almoſt of the Size of *Poliſh* Horſes. Their Oxen are larger yet than thoſe of *Ukraina*, and the talleſt that are any-where known in the World. Their Sheep are alſo very big, with very ſhort Tails, which are quite buried in a Caſe of Fat, weighing ſeveral Pounds, and hanging prepoſterouſly. The Wool of theſe Sheep is very long and coarſe: They have alſo a Bunch upon the Noſe, like the Camels, and hanging Ears like Hounds. Their Camels are large, and ſtrong enough; but they have all two Bunches [d] on their Backs [e].

THE *Eluths*, like all the other *Mongols*, or *Tartars*, commonly eat nothing but Horſe-Fleſh and Mutton; ſeldom that of Bullocks, or Cows, which they do not eſteem ſo good by a great deal; and as for Hog's-Fleſh and Poultry, they never eat any. Inſtead of Cows Milk, they uſe that of Mares; which the Author was informed is much better, and richer: They likewiſe draw a Sort of Brandy from it: Firſt they have a Way of making it ſour in two Nights Time, then pouring it into an Earthen-Pot, which they ſtop very cloſe, they put a Funnel to it, and ſet it on the Fire. This Spirit is as clear and as good as that which is diſtilled in *Europe* from Grain: But to make it ſo, it muſt be ſet twice over the Fire. They call it *Arak*, in Imitation of the *Indians* their Neighbours, who give all their ſtrong Liquors that Name. *Their Diet.* *Spirituous Liquor.*

IT is to be obſerved, that almoſt all-over *Grand Tartary* the Cows will not be milked: They ſuckle, indeed, their Calves; but as ſoon as they are taken from them, they ſuffer none to draw their Teats: They alſo immediately loſe their Milk upon the Separation; ſo that it is a Kind of Neceſſity which has introduced the Uſe of Mares Milk (which they call *Kumis.*)

THE *Tartars* [f], in general, are fond of ſtrong Liquors; for when they can get any, they never ceaſe drinking while they are able to ſtand. When they have a Mind to make merry, each bringing what Liquor he can procure, they ſet themſelves to drink Night and Day, without ſtirring, till every Drop is out: And this Love for Tippling prevails among them in Proportion as they dwell more Northerly. They are no leſs fond of Tobacco. *Great Drinkers.*

THE *Eluths*, as to their Character, are very honeſt, and do ill to nobody. Though extreamly brave, *Honeſt and brave.*

[a] A Sort of Calico, ſo called by the *Ruſſians*, as coming from *Kitay*, or *China*: It is of ſeveral Colours.
[b] Hiſtory of the *Turks*, &c. vol. 2. p. 533, & *ſeqq.*
[c] The ſame, *p.* 409.
[d] They are Dromedaries.
[e] Hiſtory of the *Turks*, &c. as before, vol. 2. p. 536.
[f] It may be obſerved once for all, that *Tartars* and *Mogols* are uſed ſynonymouſly, to denote the ſame People.

1726. Bentink. brave, yet they do not live by Robbery, like a their Neighbours, the *Mohammedan Tartars*, with whom they are continually at War [a].

Polygamy in use. THEY take as many Wives as they will, beſide Concubines, whom they chuſe out of their Slaves: And whereas the *Mohammedan Tartars* muſt not contract within certain Degrees, the *Pagan* may marry any of their Kindred, except their Natural Mothers. In this too the Author ſuppoſes they are reſtrained, rather by the Age of their Female Parents, than by any Law: Be- b cauſe it is not unuſual, among the *Eluths* and *Mongols*, for the Father to take his own Daughter to Wife; and they give-over lying with their Wives, when they draw near Forty, conſidering them thenceforth no more than Servants, to whom they give Victuals for taking Care of the Houſe, and tending the young Wives, who ſucceed in their Places.

Inheritances. THE Children born of Concubines are equally legitimate, and capable of inheriting; only if c the Father has been *Khân*, or Chief of ſome Tribe, the Iſſue of the Wives ſucceed before thoſe born of Concubines. The Offspring of common Proſtitutes are looked-on with a Sort of Contempt by every-body, and very rarely ſucceed their Fathers, eſpecially if People of Diſtinction; becauſe there is no knowing whether the Perſon ſuch a Creature lays the Child to, be the real Father.

POLYGAMY is not ſo inconvenient to them, d as it is to the reſt of the *Aſiatics*, their Wives being of great Aſſiſtance, and little Expence to them: For the old-ones manage the Houſewifry, take-Care of the Cattle, and, in a Word, provide intirely for the Subſiſtence of the Family; ſo that the Huſband has nothing to do but ſleep, and follow his Diverſions.

Fathers reverenced. NOTHING equals the Reſpect which the Children, of whatever Age or Condition they be, are accuſtomed to give their Fathers, who e are conſidered as Kings of their Families: But they make little Account of their Mothers, unleſs under ſome particular Obligations to them. They muſt lament a Father for many Days, denying themſelves of all Sorts of Pleaſure, during the whole Time. The Sons muſt even abſtain from the Company of their Wives, for ſeveral Months. Nothing muſt be ſpared to render his Funeral honourable; and, at leaſt once a-Year, they muſt pay their Devotions at his f Tomb, calling to Mind the infinite Obligations they owe to him: But the *Mohammedan Tartars* are not ſo exact, as to theſe Duties paid the Dead [b].

Tartars reputed Magicians THE *Tartars* have always been reckoned great Magicians, and the Eaſtern Hiſtorians accuſe them of Sorcery, as well as the *European*. Theſe laſt charge *Batu* with gaining more Victories in his Expedition into *Ruſſia*, *Poland*, and *Hungary*, by Witchcraft, than the Bravery of his Troops. They affirm it was entirely by Help of the black Art, that he penetrated into *Sileſia*, and defeated the Army of the Chriſtians in the Year 1241. But as the Writers of thoſe Times were very ignorant and ſuperſtitious, one muſt not depend much on their Account.

AT preſent neither the *Eluths*, nor the *Mongols*, any more than the *Mohammedan Tartars*, addict themſelves much to Sorcery, although they obſerve many ſuperſtitious Ceremonies, which differ but little from it: But the *Mongols of the Eaſt*, the *Tonguzes*, and generally all the *Pagan* People of *Siberia*, pretend to be very knowing in Magic; becauſe (like our Fortune-Tellers) they have many Fools to deal with [c].

2. *Their* Habitations, *and* Buildings.

Their Huts: Fixed Habitations: Their Architecture, Chariots, or Waggons. Pyramids erected in the Deſarts. A deſerted Town: Writings found there in unknown Characters: More Buildings, and Writings: They puzzle the Learned: Interpreted at laſt.

THE *Eluths* dwell either in Tents, or Huts. Generally all the *Tartars*, even the People of *Siberia*, obſerve nearly the ſame Form in their Buildings. The Huts of the *Eluths*, and *Mongols*, are made round, with great Poles of ſome light Wood, joined together with Leathern-Thongs, for the more eaſily fitting-up and removing them. They cover them on the Outſide with a thick Felt, for Defence againſt the Cold, and bad Weather. In the Middle of the Roof they leave an Opening, which ſerves both for a Window, and a Chimney; the Fire-place being directly underneath, and the ſleeping-Places round the Hut againſt the Wall. The *Murſas*, and other Perſons of Diſtinction, have Huts larger, and more convenient: They have alſo, in Summer, great Tents of *Kitayka*; and, in Winter, Sheds made of Boards, and covered with Felt, which they can ſet-up, and take-down, in leſs than an Hour's Time.

THE few fixed Habitations of the *Eluths*, excepting the Roof, which is in Form of a Dome, are built in all Reſpects like the Huts, without either Chambers, Windows, or Garrets; the Whole conſiſting of one ſingle Room, about twelve Foot high. Theſe Houſes are not ne-

[a] Hiſtory of the *Turks*, &c. vol. 2. p. 403, & *ſeq.* and *p.* 536. [b] The ſame, *p.* 406, & *ſeqq.* [c] The ſame, *p.* 414.

so large and convenient as those of the *Manchews*, who build them square. They allow about ten Foot for the Height of the Side-Walls. The Roofs are not much unlike those of the Peasants Houses in *Germany*. They contrive, in some Places, great Windows, using very thin Paper, after the *Chinese* Manner, instead of Glass: Also sleeping-Places, built two Foot high, and four broad; which run quite round the House, and serve at the same Time for a Chimney: For they have invented a new Way of making the Fire without, on one Side of the Door; and the Smoke circling by Means of this Canal round-about the House, has no Passage out, but at the other Side of the Door; which conveying a moderate Heat to the Dormitories, is of great Conveniency in Winter. All the Habitations, whether fixed, or moveable, have their Doors facing the South, to avoid the North-Winds, which are very piercing all-over *Grand Tartary*.

Eluth Habitations.

THEIR moveable Habitations are carried on Waggons. These Carriages have two Shafts, which are neither so thick, nor long as the *German*. They are made of a very pliable, light Wood, and fastened to the foremost Axle-Tree, by Means of one of their Ends, which is turned back: They put them between the Body of the Waggon and the Wheel, tying a Cord a Span's Distance from the foremost End of the Shafts: This Cord goes into the End of the Axle-Tree, which passes through the Nave of the Wheel; so that the Wheel, which is pretty small, plays on each Side of the Waggon, between the Shaft and its Cord. The Horse marches between these two Shafts, and over his Back there goes another Branch of an exceeding pliable Wood, in Form of a Semicircle, which is fastened, on both Sides, to the Harness, and the Shafts to its two Ends. They pretend, that in this Manner the Horse is much eased; and, indeed one, though their Cattle do not appear to be very strong, will draw a Chariot, well-loaded, above an hundred Leagues: But it must be observed also, that these Machines are not very large. When they have a Mind to put more Horses, they either place them before the first, or fasten them to the hindermost Axle-Tree. The *Russians* and *Kossaks* make-use of much the same Sorts of Carriages [a].

IN the Year 1721, a certain Physician, sent by the Emperor of *Russia*, *Peter* I. to discover the various Kinds of Vegetables produced in *Siberia*; being arrived, in Company with some Officers of the *Swedish* Prisoners, towards the River *Tzulim* (or *Chulim*) to the West of the Town of *Krasnoyar*; they found erected, about the Middle of the great *Step*, or Desart, which lies on that Side, a Kind of Needle, or Spire, cut-out of one white Stone, about sixteen Foot high, surrounded by some Hundreds of small ones four or five Foot high. There is an Inscription on one Side of the great Needle, and several Characters on the little ones, which Time has already defaced in many Places: To judge by what remains of the Inscription copied from the great Needle, they have no Manner of Connexion with the Characters at present used in the North of *Asia*. These Sorts of Works, moreover, agree so little with the Genius of the *Tartars*, that one can scarce believe them to have been executed, either by the present Generation, or their Ancestors; especially if it be considered, that for more than an hundred Leagues round-about, there are not any Quarries from whence those Stones could have been dug, and they could have been brought there no other Way than by the River *Jenisea*.

In the Desarts.

ACCORDING to the *English* Translator, it is not easy to guess, by whom, or upon what Occasion, these Pyramids were erected. However, as *Paul Lucas*, in his second Voyage [b] to the *Levant*, has given an Account of a surprizing Number of Pyramids, no less than twenty thousand, within two Days Journey of *Cæsarea*, in *Asia Minor*; he thinks it very probable, that both were the Works of the same People, and none so likely to erect them as the *Tartars* [c], either as Trophies of their Victories, or Marks of the Extent of their Conquests, or rather as Monuments erected over the Graves of their Dead slain in Battle: What the rather inclines him to this Imagination, is, that according to the Tradition of the Country, in the upper-Part of each Pyramid (for they are all hollow, with Rooms, Doors, Stairs, and Windows in them) there is buried a Corpse. Yet, he confesses, that he cannot be positive the Architecture of both these Sorts of Pyramids is exactly the same, both Authors being defective in their Accounts: For *Bentink* does not observe, whether the *Siberian* Needles are round, or square, solid, or hollow: Nor does *Lucas* tell the Dimensions of those he saw in *Natolia*, the Alarm of Robbers having diverted him from pursuing his Remarks, and examining an Inscription, which after much searching he found on one of them.

IN that Part of the Country betwixt the Rivers *Jaïk* and *Sir*, which is inhabited by the *Kalmúks*, and towards the Borders of the *Kasachia-orda*,

A deserted Town.

[a] History of the *Turks*, vol. 2. p. 409, & *seqq.* who invaded *Asia Minor* soon after *Jenghiz Khân*, and under *Timûr-beigh*, or *Tamerlan*.

[b] *Dans la Grece, & l'Asie Mineure*, tom. 1. p. 126.

who

1726. Bentink. who poſſeſs the other Part; the *Ruſſians*, about twelve Years ago [a], diſcovered a Town quite deſerted, in the Midſt of vaſt ſandy Grounds, eleven Days Journey to the South-Weſt [b] of *Yamiſha*, and eight to the Weſt of *Simpelat* [c]. *Bentink* was told, by an Officer who was at it, that it is about half a League in Compaſs, with Walls five Foot thick, and ſixteen high; the Foundation Freeſtone, and the reſt Brick, flanked with Towers in ſeveral Places. The Houſes were all built with Sun-burnt Bricks, and Side-Poſts of Wood, much after the common Faſhion in *Poland*: The better Sort had ſeveral Chambers. There were likewiſe great Brick-Buildings, with each a Tower; which in all Likelihood ſerved for Temples: Theſe Buildings were in pretty good Condition, without the leaſt Appearance of Violence being uſed to them.

Writings found there

IN moſt of the Houſes a great Quantity of Writings, in Rolls, was found: The Author ſaw two Sorts of theſe Writings. The firſt was in *China* Ink, on Silk-Paper, white and thick. The Leaves were about two Foot long, and nine Inches broad, written on both Sides, and the Lines ran from the Right to Left acroſs the ſame [d]. The Writing was bounded with two black Lines, which left a two Inch Margin. The Characters reſembled the *Turkiſh*. The ſecond Sort was written upon fine blue Silk-Paper, in Gold and Silver: Some Characters in one, ſome in the other. Some Pages had a Line round them, all in Gold Characters; others all in Silver. The Leaves were about twenty Inches long, and ten in Height; and the Lines written lengthways of the Paper, from Right to Left. The Writing was bounded with two Lines of Gold or Silver (leaving a Margin like the former) and on both Sides; that which was on one Side the Top of the Leaf, being the Bottom in the other. The Characters were very beautiful, and like the *Hebrew*. They had laid-on Varniſh within the Squares, or bounding-Lines, to preſerve the Writings.

In unknown Characters.

THESE Leaves having been ſent by the late Emperor of *Ruſſia*, *Peter* I. to the Learned throughout *Europe*, who were beſt-ſkilled in the Oriental Languages, it was at length found, that the firſt Sort were in the *Mongol* Language, and the latter in that of *Tangut*; and that they treated of Matters of Devotion. This ſhews, ſays our Author, that the People who inhabited the Town were *Kalmûks* (or *Eluths*) and of the Religion of the *Dalay Lama*, who probably abandoned it within theſe forty or fifty Years, on Account of their Wars with the *Mongols*; for that otherwiſe it may be preſumed they would not have left thoſe ſacred Writings ſo careleſly. Since then two other Towns have been diſcovered, which had been deſerted in the ſame Manner [e].

MUCH of the Kind was the Diſcovery made in 1721. It ſeems the Governor of *Siberia* uſed to ſend Ruſtics from *Tobolſkoy*, into that Part of *Tartary* which belonged to the Enemies of *Ruſſia*, in order to look for Ruins, and ancient Sepulchres privately, and by Night, for Fear of alarming the Inhabitants. Theſe Searchers diſcovered certain Images of Gold, Silver, and Braſs, in all the Tombs; and having advanced about an hundred and twenty *German* Miles towards the *Caſpian Sea*, met-with the Ruins of ſplendid Buildings; among which were certain Chambers under-Ground, whoſe Floors and Sides conſiſted of moſt ſhining Stone. They ſaw here and there black Ebony Cheſts, which, inſtead of Treaſure, contained Writings, or Books. Of theſe (which was all the Diſcovery they made) they carried-away only five Leaves, one whereof, which was preſerved beſt, was publiſhed [f]. It was twenty-ſeven Inches one-fourth long, and ſeven three-fourths broad. The Paper was glazed, and thick as Parchment; of an Aſh-Colour, and, when torn, appeared woolly, or ſilky. The broad Margins were of a browniſh Colour; the Middle, or written Part, inclining to black: The Letters of a ſplendid White, and neatly cut. Several other Sheets were of a Sky-blue Colour, only blackiſh where written-on, to ſhew the white Characters [g].

THE Learned of *Europe* were mightily puzzled to know the Import of theſe Writings. We are told [h], that none in all *Ruſſia*, or the North, could tell what to make of them. *Godfrey Ruhlman* very wiſely ſuppoſes them to be *magical Writings found in* Cyropolis, *&c.* [i] The famous *De la Croze* himſelf not more judiciouſly imagined they might contain ſome old Monuments of the Chriſtian Religion; for that before the Time of *Jenghiz Khân*, the *Preſter John*

[a] That muſt have been about 1714, reckoning back from 1726, when the *Hiſtoire Genealogiques des Tatars* was publiſhed. [b] It ſhould be South-Eaſt, according to *Strahlenbergh*'s Map, which places this Town in the Neighbourhood of *Sempalat*, and *Ablaket*, both on the *Irtiſh*. [c] *Sempalat*, or *Sedempalat*, a *Ruſſian* Settlement on the River *Irtiſh*. [d] That is, from Top to Bottom, ſuppoſing the Leaves to lie longways before the Reader from Left to Right. [e] Hiſtory of the *Turks*, *Moguls*, &c. p. 556, *& ſeqq.* [f] Both in the *Acta Eruditorum*, vol. 46. p. 375, in *July*, 1722; and in the Literary News of *Leipſic*, at the twenty-fifth of *June* the ſame Year, *p.* 414 [g] See *Act. Erudit.* as before. [h] *Hiſt. Acad. des Inſcript.* vol. 3. p. 7. [i] See *Act. Erudit.* as before, *p.* 376.

forsooth, reigned in those Countries [a]: Yet, by a Help of an Alphabet, which he has given [b], anyone, he says, might read the Specimen; as he did himself to Count *Galofkin*.

THERE is a full Account of these Writings in the *History of the Academy of Inscriptions at* Paris, *for the Year* 1725. We are told there, that the Leaves were composed of a Kind of Cotton, or Barks of Trees laid-over with a double Varnish, of two Colours. The Writing was white, upon a black Ground. The Inhabitants assured b the *Russians*, they were unacquainted with the Characters. In 1722, the Czar *Peter* inclosed one of the Leaves in a Letter to the *Abbe Bignon*; which, as soon as shewn to Messieurs *Fretet* and *Fourmont*, they knew to be the Language and Writing of *Tibet*. They found it to be a Piece of a Funeral Sermon, full of Repetitions: The chief Subject was a Moral on the other Life, well-handled; with several metaphysical Proofs about the Immortality of the Soul [c].

3. *The* Tombs, Traffic, Cycle, Language, *and* Religion *of the* Eluths.

Tombs of their Ancestors: Riches buried in them: Much reverenced. Exchange their Cattle. Trade not in Slaves, like their Neighbours. Use a Cycle of twelve Years. Language and Religion.

IN many Places of *Grand Tartary*, towards d the Frontiers of *Siberia*, there are to be seen little Hills, under which are found Skeletons of Men, accompanied with the Bones of Horses, and many Sorts of small Vessels, besides Jewels of Gold and Silver: Likewise the Skeletons of Women, with Gold Rings on their Fingers. Now as this does not agree, in any Respect, with the present Inhabitants, *Bentink* supposes these to be the Graves of the *Moguls*, who accompanied *Jenghiz Khân* in the great Irruption which he e made in the Southern Provinces of *Asia*, and of their first Descendants, who carried-off almost all the Riches of *Persia*, *Karazm*, *Great* and *Little Bukharia*, *Tangut*, one Part of the *Indies*, and the North of *China*, into their Desarts; where they interred Vessels of Gold and Silver, so long as they had any left [d], with their Dead; according to the Custom which still prevails among the greater Part of the *Pagan Tartars*, to bury with the Deceased, his best Horse, and Moveables, such as wooden Porringers, for his Use in the other World. 1726. Bentink.

THE *Swedish* Prisoners in *Siberia*, as well as the *Russians*, used to go, in great Troops, to search those Tombs, which lie far within the Lands of the *Eluths*: But these latter, having in Resentment of the Injury, slain a good Number of them, at different Times; those Expeditions are forbidden, under severe Penalties. This Behaviour of the *Eluths*, so peaceable in their own Nature, shews they considered them as the Tombs of their Ancestors, for which all the *Pagan Tartars* have an extraordinary Veneration [e]. *Much reverenced.*

THE *Eluths*, like the rest of the Inhabitants of *Tartary*, know nothing of Commerce, being content to exchange their Cattle with the *Russians*, *Bukhars*, and other Neighbours, for what they want. Nor is it possible Trade should ever flourish there, as it did, when under one Sovereign, in the Time of *Jenghiz Khân*, so long as c that vast Region remains divided among several Princes; some of whom will always oppose the Designs of others. The *Mohammedan Tartars*, (who valuing themselves on the Nobleness of their Extraction [f], have a Contempt for Traffic) glory in spoiling the Merchants, who fall into their Hands; or hold their Ransom at so high a Price, that they never have an Inclination to pass through their Lands, or near their Borders afterwards. This keeps-off the Merchants of the West. But on the Side of *Siberia*, *China*, and the *Indies*, they may arrive in full Liberty, since the *Eluths* and *Mongols* trade very peaceably with the neighbouring People, who are not in War with them. *Exchange their Cattle.*

As the Heathen *Tartars* lead a very harmless Life, they are not so earnest as the *Mohammedans* to procure Slaves for their Service. Besides, having no Need of more than their own Family to guard their Cattle, in which all their Subsistance consists, they do not care to burden themselves with useless Mouths. Hence it is, that none, except the *Khâns* and the *Taykis*, keep Slaves. When they take any of the Enemy, the rest of them are distributed among their Subjects, in order to augment their Number; which at the same Time increases their Revenue. On the contrary, the *Mohammedan Tartars* often make War with their Neighbours, on no other *Trade not in Slaves.*

[a] *Hist. Acad. des Inscript.* vol. 3. p. 415. *De la Croze*, on a very small Enquiry, might have found, that this *Presbyter John* (supposed to be *Ung*, *Khân* of the *Kara-it Tartars*) was either a Fiction of the ever-lying Missionaries, *Latin*, or *Syrian*, or else a Priest of the Religion of *Fo*. For neither the *Turkish*, *Persian*, nor *Chinese* Authors, mention any Thing of *Ung*, or *Wang*'s pretended Priesthood. [b] *P.* 417. [c] See *Hist. Acad. des Inscript.* vol. 3. p. 6, *& seqq.* [d] The Grant of *Persia* to *Hulaku*, and the Revolt of the *Indies* and *China* in less than two hundred Years after, stopped-up all the Passages through which Wealth used to flow from those Countries into *Tartary*. [e] History of the *Turks*, &c. vol. 2. p. 556, *& seqq.* [f] Yet the *Moguls*, from whom they are descended, traded in the Time of *Jenghiz Khân*, who encouraged Commerce throughout his Dominions.

Score,

Eluths Cuſtoms.

Score, but to get Slaves, ſelling thoſe they do not keep.

Like their Neighbours.

THIS rapacious Humour prevails ſo much among the *Chirkaſſians*, the *Dagheſtân*, and *Nogay Tartars*, that for Want of other Slaves, they ſteal Children to ſell; and if they cannot get other People's, they do not ſcruple to ſell their own (eſpecially their Daughters, if they prove beautiful) as they do their Wives on the ſlighteſt Diſguſt. In ſhort, the Trade of Slaves being all their Wealth, they ſpare neither Friends, nor Foes, when they meet with a fair Opportunity of carrying them off [a].

THE greater Part of the Inhabitants of *Tartary* ſupport themſelves by their Cattle, and by Hunting; in which Exerciſe the *Pagan* Tribes, inſtead of Dogs, make-uſe of Men, in the Manner that has been already deſcribed [b]. When the Hunt is over, they dry the Fleſh of the Game in the Sun, which they reckon makes it keep the longer [c].

Uſe a Cycle

As to the Computation of Time, the *Eluths*, and other *Mongols*, have a Cycle peculiar to them, conſiſting of twelve Lunar Years, each named in the following Order. 1. *Keſku*, or the *Mouſe*. 2. *Out*, the *Ox*. 3. *Pârs*, the *Leopard*. 4. *Tuſhkân*, the *Hare*. 5. *Luï*, the *Crocodile*. 6. *Yilân*, the *Serpent*. 7. *Yunad*, the *Horſe*. 8. *Kuï* [d], the *Sheep*. 9. *Pichân*, the *Ape*. 10. *Dakûk*, the *Hen*. 11. *Eyt*, the *Dog*. 12. *Tongûz*, the *Hog*.

IN this Order *Ulugh-beigh* [e] gives the Years of this Cycle, which the *Mongols* took from the *Igûrs*, *Oygûrs*, or *Vigûrs* [e], the only People in all *Tartary*, who had either Learning, or Letters, in the Time of *Jenghîz Khân*. With that Royal Author agrees *Hyde*'s Cycle of the Oriental *Turks* and *Tartars* [f]; as well as the *Jetta*, or twelve Signs of the *Japanneſe* [g], which were taken from the *Tartar* Cycle: So that *Abu'lghâzi Khân*, who places them in a different Order, muſt needs be wrong; as on Examination the *Engliſh* Tranſlator found [h].

Of twelve Years.

THE *Tartars* have Guards of the Night, who ſtrike from Time to Time upon Copper Baſons, to give Notice, that they are on the Watch. They alſo mark the Time every half Hour the ſame Way; which Cuſtom the *Ruſſians* ſeem to have taken from them [i].

THE *Eluths*, according to *Bentink*, are the only People of *Grand Tartary*, who preſerve the ancient *Mogul*, or *Turkiſh* Language, in all its Purity. The ſame Author will have it for certain, that the Subjects of *Jenghîz Khân* were Idolaters; although he confeſſes that Conqueror diſcovered, on ſeveral Occaſions, Sentiments far more elevated [k]. It is more probable, that till they were infected by the *Lamas*, ſoon after his Death, they were, like their Monarch, Deiſts, or Adherers to Natural Religion; and that is plainly the Cauſe of the Equality with which he treated all other Religions, if he did ſo, and not his having little or no Religion himſelf.

SECT. IX.

The Hiſtory *and* Government *of the* Eluths.

1. Branches *and* Hiſtory *of the* Eluths.

Eluths Dſongari. Eluths Koſhoti. Eluths Torgauti, *protected by* Ruſſia. *The late Wars.* Onchon *aſſaſſinated: The Murderer ſlain.* Kaldan *takes Revenge: Is created* Khân. Rabdan *his Succeſſor, his large Dominions. Bounds Weſtward.*

THE *Eluths*, or *Kalmûks*, are at preſent divided into three Branches, which, according to *Bentink*, are, 1. The *Kalmûki Dſongari* (or *Jongari.*) 2. The *Kalmaki Koſhoti*; and, 3. The *Kalmaki Torgaüti* [l]. Of theſe the firſt is the moſt conſiderable and powerful [m]: It is compoſed of an infinite Number of particular Tribes, and obeys a *Khân*, called *Kontaiſh* [n], who is properly the Grand *Khân* of all the *Kalmûks* (or *Eluths.*)

THE *Kalmaki Koſhoti* poſſeſs all the Kingdom of *Tangut*, and are ſubject to the *Dalay Lama*, who governs them by two *Khâns*; of whom one has the Government of *Tibet*, and the other that of *Tangut* [o]. The firſt of theſe, when the Author wrote, was called *Dalay Khân*; the latter *Jenghîz Khân.*

[a] Hiſtory of the *Turks*, *Moguls*, &c. vol. 2. p. 412, *& ſeqq.* and *p.* 536. [b] See before, *p.* 363. [c] History of the *Turks*, &c. as before, *p.* 401, *& ſeqq.* [d] Or, *Koy.* [e] See his *Epochæ Celebriores*, p. 6. publiſhed by *Greaves.* [f] *Hyde*'s Relig. Vet. Perſ. *p.* 225. Eluths Jongari.

He then married that Prince's chief Wife, the Daughter of *Ochirtû*; and his Forces increasing daily, he found himself able to dispute the Kingdom with his Father-in-law, to whom he owed his present Fortune.

Is created Khân.

A QUARREL between their People, was his Pretence for declaring War; and he marched his Army into the Country of *Ochirtû*, who received him at the Head of his Troops. The Fight was near the great Lake *Kizalpû*, where *Kaldan* got the Victory; and having taken his Father-in-law Prisoner, had his Throat cut, to secure the Conquest of his Dominions: Thus he became the Head of all the *Eluths*. The Grand *Lama*, to reward his Perfidiousness and Cruelty, gave him the Title of *Hân*, King, or Emperor [a]. From that Time *Kaldan* enjoyed his Conquests, and had no Wars but with the *Hassak-pûrûks* till 1688, when he invaded and subdued the *Kalkas*: But carrying his Resentment too far, he was ruined, in his Turn, by the Emperor of *China*; as hath been already related [b].

Rabdan, *his Successor,*

THE Author represents the Destruction of the *Eluths*, in this last War, to have been so great, that in all these vast Countries there remained no more than ten or twelve thousand Families of them. *Kaldan* was succeeded by his Nephew, eldest Son to *Senghe*, called *Tse-vang-raptan*; who at first lived quietly in his Territories, with all but the *Uzbeks*, and encouraged Agriculture, his Flocks not affording competent Subsistence to his People. He was, however, Lord of *Tûrfan* and *Yarkian*; the latter of which lately revolting, he reduced by Force, and severely punished [c]. In short, he became very enterprizing, like his Uncle: But since the Beginning of this Century his Power is mightily fallen, the *Chinese* and *Mongols* having on one Side taken from him the Provinces of *Khamil* and *Turfan* [d], and the *Russians* advanced on the other within a little Way of the Lake of *Sayssan*: Which Losses, joined to the Defection of his Cousin *Ayuka*, reduced him to a very low Condition [e].

His large Dominions.

GAUBIL, the Jesuit, giving an Account of the Dominions of *Tse-vang-raptan*, in 1726, says, that the *Tartars* of *Hami*, or *Khamil* and *Turfan*, as well as *Aksû*, *Kasgar*, *Irghen* (or *Yarkien*) and *Anghien* [f], were then under his Protection. If so, he must have recovered those two Provinces from the *Chinese*. The same curious Missioner says, *Harkas*, the Residence of that Prince, is a very agreeable Place on the River *Ili* (by some called *Kongkis*) and that the Latitude is forty-six Degrees and some Minutes over: The Longitude thirty-seven Degrees West of *Pe-king*; which he deduced by Help of several exact Journals of the Road from *Hami*, whose Situation had been determined by the Jesuits. Among the rest, there was one of a *Tartar* Lord [g], sent by *Kang-hi* to *Tse-vang-raptan*, who had the Road measured as exactly as possible, and marks the Bearings, as well as Distances, from Place to Place [h]. From these Journals the Jesuits made their Map of *Little Bukharia*, and settled the Position of *Harkas*, or *Urga*.

GAUBIL takes notice, that he was not acquainted with the Limits of that Prince's Dominions to the West of the Lake *Palkasi*, into which the *Ili* falls, about seventy Miles North of *Harkas*. All he knew was, that between that Lake and the *Caspian Sea*, there were several *Tartar* Princes, among the rest, the Prince of *Kara-kalpak*; whose Residence, the *Eluths* told him, was more than an hundred and ten Leagues to the West of *Harkas*; adding, that they had performed the Journey themselves, and that it was above ten [k] Days Travel farther to the *Caspian Sea* [l].

2. *The* Eluths Koshoti, *or* Tartars *of* Koko-nor.

Country of Koko-nor: *Extent and Bounds. Mountains to the South.* Eluths *of* Koko-nor *submit to* China: *Trade thither.*

LITTLE more than what has been said already, remains to be spoken of the *Eluths Ayuki* [m], who dwell peaceably within the Bounds before-mentioned, without attempting any Thing considerable against their Neighbours: But the *Eluths Kasheti* have distinguished themselves by some remarkable Actions.

THE Country inhabited by these *Eluths*, called *Koko-nor*, or *Koko-nol*, from a great Lake so called by themselves; and by the *Chinese* Geographers *Si-hay*, that is, *the Western Sea*. It is one of the largest in all *Tartary*, being about twenty great *French* Leagues in Length, and

[a] From this Word, says *Gerbillon*, the *Tartar* Princes are called *Khân*, by *Europeans*, who change the initial *H* into *K*, in this, and other Words; writing *Kami* for *Hami*, *Kalkas* for *Halkas*, &c. [b] See before, p. 384. [c] *Du Halde*'s *China*, vol. 2. p. 257. [d] See before, *p.* 387. [e] History of the *Turks*, &c. vol. 2. p. 539. [f] *D'Anville*, in his Map, places this Town on the *Sir*, or *Sihun*, about sixty Miles North-West from its Source. *Gaubil*, in *Souciet*, p. 179, says, it lies some Leagues to the South of the Source of that River. [g] Who gave it himself to *Gerbillon*. [h] *Souciet. Obs. Mathem.* p. 176, 177, and 180. [i] *P.* 1 the Distance is said to be but ten Leagues, doubtless by Mistake. [k] *P.* 146, it is put twelve Days: But Rate of Travelling is mentioned in neither Place. [l] *Souciet*, as above, *p.* 146, and 180. [m] Called *Eluths Torga-uti*, as being chiefly of the Tribe of *Torga-uts*.

N.° 148.

The Inhabitants of this Country, according to Xegis, are properly Eleuth. They are called by the Chinese, Xale-mer Ta-tse, and Xale-mer Mon-ga. But since the Expulsion of the Tzien-Lokomer Family out of China, they have dwelt in their Paris. Their principal Lords are seated about the Lake Xale-mer. They are tributs to several Princes, all of the same Family, who have been dignified by the Emperor with the Titles of Tfing-vang, Kun-vang, Kong, and Pey-le; that is, Regulo, or petty King, Prince, Duke, and Earl, in the same Manner as the Mandow Princes at Pe-king. Gemelli informs us, that the Eleuth Princes are known in China by the Title of Tzyn of Xale-ker, and are eight in Number, having each his Territory; but that they league together for their mutual Preservation.

They were all Vassals to Dalay Lin, who resided in Tybet, or rather to the Grand Lama, to whom his Grandfather, Xuxi Han, gave that Kingdom, after conquering it from the lawful Prince, about sixty Years ago. But after the Destruction of Xalaka's Family, the Emperor sent an Invitation to their eighth Tzyn, to become his Vassals; which the first in Rank among them accepting, he received the Title and Seals of Tfing-vang, or Prime-Regulo: Some of the others contented themselves with paying their Homage by Proxy; while the Emperor, unwilling to compel the rest by Force, chuses to win them by Kindness, often sending them Presents, which they call Rewards; as those which they send in Return are called Tribute. The Mandarins have set down, in the Map, the Mountains, Rivers, and principal Places inhabited by those who acknowledge the Emperor. The rest lie more to the West, drawing towards Lop.

As to their Manner of Trade with China, from Custom in the Capital itself; They are suffered for eight Days, that time allowed for traffick-ing; after which they must return their Wares. The Mahammedan Tartars, who rarely thither by Land through the Wilderness, are treated in the same Manner; with a View to engage them, by Degrees, to submit to the Emperor, through the Hopes of a rich Commerce, in order to his Protection. There is made by the Tartars, and the Xa-lan Sort of Woollen Stuff, named Pa-la, much like Frize, but not above

[illegible] Xalle-mer, or Hale-mer. [illegible] The Situation of Xalo-mer Tartars here, does not agree with that assigned them in the Map, where they are placed to the [illegible] and the North of the Ya-lan, or Si-ho, whole Country borders on Si-hanen. [illegible] Called by the Chinese, Xale and Xale-mer. [illegible] A City of Tse-men, a Province of China. [illegible] Called by the Chinese, vol. 1. p. 29, & 69, and vol. 2. p. 258. [illegible] Da Hale, as before vol. 1. p. 29, and vol. 2. p. 258. [illegible] That was about 1630. [illegible] Da Hale, as before, vol. 2. p. 258. [illegible] Their Neighbours to the South, or South-East.

more than ten in Breadth. It is ſituate between a the thirty-ſixth and thirty-ſeventh Degree of Latitude, and between the ſixteenth and ſeventeenth of Longitude, Weſt of *Pe-king* [a].

THE Country of *Koko-nor* [b] lies beyond *Siming*, without the Gates of the great Wall of *China*, being incloſed by the Provinces of *Shen-ſi*, *Se-chwen*, and *Tibet*. It is pretty large, extending from North to South above ſeven Degrees. It is ſeparated from *China* by Mountains, ſo high and ſteep, that they ſerve almoſt every-where b inſtead of the great Wall. However, there are ſome Pieces of it to be ſeen towards the Openings of the Mountains, eſpecially in thoſe Places which are frequented by the *Koko-nor*, and other Strangers; as *Tſong-fang-wey*, where there are ſome Battalions under the Conduct of a General.

To the South of this Country, which borders on *Se-chwen* [c], there are frightful and inacceſſible Mountains (inhabited by a ſavage People) c which ſeparate it from the Kingdoms of *Pegû* and *Ava* [d]. The moſt Northern of theſe Mountains bordering on the *Koko-nor Tartars*, is called *Nú-i*; and the moſt Southern, bounding *Ava*, in twenty-five Degrees thirty-three Minutes Latitude, is named *Li-ſe*, in that Part towards *Yunchang-fû* [e].

THE Entrances of theſe Mountains, which alſo make a good Part of the Weſtern Bounds (of the Empire of *China*) are not fortified, d the Barrier, which they form on that Side [f], being ſufficient for the Security of the State, and the Trade carried-on with *Ava*, by *Ten-ye-chew*, a middling City [g], which takes Care to guard the Paſs.

THERE was ſtill leſs Occaſion for fortifying the Avenues of the Mountains to the South of *Yun-nan* and *China*, along the Confines of the Kingdoms of *Laos* [h], and *Tong-king*: For the Country has a very unwholeſome Air, is full of e Rivers and Torrents, and, for moſt Part of the Year, uncultivated and wild. For theſe Reaſons, the *Chineſe* traffic very little with either of thoſe Dominions. However, the Journals of ſome Traders at *Yun-nan-fû*, who had travelled as far as the Borders of both, were ſerviceable to *Regis* in determining the Situations of ſome Places in the Southern Parts of *Yun-nan* [i].

THE Inhabitants of this Country, according to *Regis*, are properly *Eluths*. They are called by the *Chineſe*, *Koko-nor Ta-tſe*, and *Koko-nor Mon-gû*: But ſince the Expulſion of the *Ywen* Family [k] out of *China*, they have dwelt in theſe Parts. Their principal Lords are ſettled about the Lake *Koko-nor*. They are ſubject to ſeveral Princes, all of the ſame Family, who have been dignified by the Emperor with the Titles of *Tſing-vang*, *Kun-vang*, *Kong*, and *Pey-le*; that is, Regulo, or petty King, Prince, Duke, and Earl, in the ſame Manner as the *Manchew* Princes at *Pe-king* [l]. *Gerbillon* informs us, that the *Eluth* Princes are known in *China* by the Title of *Taykis* of *Koko-hor*, and are eight in Number, having each his Territory; but that they league together for their mutual Preſervation. Gerbillon, Regis, Eluths of Koko-nor

THEY were all Vaſſals to *Dalay Hân*, who *Submit to China.* reſided in *Tibet* [m]; or rather to the Grand *Lama*, to whom his Grandfather, *Kuſhi Hân*, gave that c Kingdom, after conquering it from the lawful Prince, about ſixty Years ago [n]. But after the Deſtruction of *Kaldan*'s *Eluths*, the Emperor ſent an Invitation to theſe eight *Tayki*, to become his Vaſſals; which the firſt in Rank among them accepting, he received the Title and Seals of *Tſing-vang*, or Prime-Regulo: Some of the others contented themſelves with paying their Homage by Proxy; while the Emperor, unwilling to compel the reſt by Force, chuſes to win d them by Kindneſs, often ſending them Preſents, which they call Rewards; as thoſe which they ſend in Return are called Tribute [o]. The Miſſioners have ſet-down, in the Map, the Mountains, Rivers, and principal Places inhabited by thoſe who acknowledge the Emperor. The reſt lie more to the Weſt, drawing towards *Laſa* [p].

ALL theſe *Eluths* may trade with *China*, free *Free Trade thither.* from Cuſtom in the Capital itſelf: They are ſubſiſted for eight Days, the Time allowed for traffick- e ing; after which they maintain themſelves. The *Mohammedan Tartars*, who reſort thither by Land through the Weſtern Provinces, are treated in the ſame Manner; with a View to engage them, by Degrees, to ſubmit to the Emperor, through the Hopes of a rich Commerce, under his Protection [q]. There is made by theſe *Tartars*, and the *Si-fan* [r], a Sort of Woollen-Stuff, named *Pû-lû*, much like Frize, but not above

[a] *Du Halde*'s *China*, vol. 1. p. 29, and vol. 2. p. 265. [b] *Khokho-nor*, or *Hoho-nor*. [c] The Situation given the *Koko-nor Tartars* here, does not agree with that aſſigned them in the Map, where they are placed to the Weſt of *Shen-ſi*, and the North of the *Tu-fan*, or *Si-fan*, whoſe Country borders on *Se-chwen*. [d] Called by the *Chineſe*, *Myen* and *Yawa*. [e] A City of *Yun-nan*, a Province of *China*. [f] By their great Breadth, as well as Length. [g] Of *Yun-nan* alſo. [h] Called by the *Chineſe*, *Lau-ſhwa*, and *Lau-ſe*. [i] *Du Halde*, as before, vol. 1. p. 29, & *ſeq.* and vol. 2. p. 258. [k] Or the Succeſſors of *Jenghiz Khân*, and their *Mongols*, in 1368. [l] *Du Halde*, as before, vol. 1. p. 29, and vol. 2. p. 265. [m] About the Year 1699. [n] That was about 1630. [o] *Du Halde*, as before, vol. 2. p. 258. [p] The ſame, *p.* 265. Eluths *Government.*

one fourth or fifth of the Breadth. They dye it of all Sorts of Colours, and often make long Habits of it; and at *Pe-king* they cover Saddles with it. It is the principal Merchandize of *Tſong fang-wey*, before-mentioned [a].

3. *The* Government *and* Power *of the* Eluths. *From* Bentink.

Tribes and Families. Taykis, *or Chiefs. The* Khân, *or King.* Khaân, *or Emperor.* Kontayki, *or Great Lord. Dignity elective. Funeral Sacrifices. Reſidence of* Kontayki: *His Camp curious: Power and Forces. Arms of the* Eluths, *how worn by them: Way of fighting: Enſigns, or Colours: Hazard all in War.* Khân's *Revenues.*

Tribes and Families.

THE *Eluths*, nicknamed *Kalmûks*, or *Kalmâks*, like all the other Nations of *Mongols*, or *Tartars*, are divided into *Ordas* (or, as we term them, Hords) a Word in uſe among them, to expreſs (an *Aymak*, or) Tribe which is aſſembled, whether to go fight their Enemies, or for other particular Reaſons. Each *Orda* is compoſed of a Number of Families, more, or leſs, who uſually encamp together, and do not ſeparate themſelves from the Body of the *Orda*, without acquainting their Chief, that he may know where to find them, when he has a Mind to recal them.

THE *Tartars* in general, of what Country or Religion ſoever, gentle or ſimple, rude or polite, have an exact Knowledge of the *Aymaks*, or [b] *Tribes*, from whence they are deſcended, and carefully preſerve the Remembrance of them, from Generation to Generation. Although alſo, in Proceſs of Time, ſome Tribe comes to divide itſelf into divers Branches, yet they always reckon thoſe Branches as belonging to ſuch a Tribe.

Taykis, or Chiefs.

EVERY Tribe, or Branch ſeparated from a Tribe, has its particular Chief, who is called *Tayki* [c], taken-out of the ſame Tribe; which Dignity deſcends regularly, from eldeſt Son to eldeſt Son, in the Poſterity of the firſt Founder of ſuch a Branch or Tribe, unleſs ſome violent Cauſe diſturb this Order of Succeſſion; which is ſo well-regulated, that ſuch Changes rarely happen. They have no other Lords but theſe; and Riches being pretty equally divided among them, there is no other Difference between one Head of a Tribe and another, but that of Merit, or the Number of Families, in his *Orda* [d].

THESE Chiefs of Tribes are ſubject to ſome *Khân*, or Sovereign; whoſe Vaſſals they are, as well as by Birth his Generals, and Counſellors. *Khân*, or *Hân*, ſignifies *Lord*, or *the reigning Prince*; a Title given by all the *Pagan*, as well as *Mohammedan Tartars*, to the Sovereign of any State [e], be it great, or ſmall. Thus ſeveral petty *Mongol* Princes, dwelling near the Springs of the *Jeniſea*, are ſtiled *Khâns*, though tributary to the *Khân* of the *Kalka Mongols*, who is under the Protection of the Emperor of *China*: And this laſt Monarch being of *Tartar* Extraction (or rather coming out of the Region, named by *Europeans Eaſtern Tartary*) is alſo called *Khân*, being conſidered as the great *Khân* of the *Manchews*, proper *Mongols* and *Kalkas*, who are ſubject to him, as the *Khân* of the *Eluths* is of all the *Eluth* Branches, and, indeed, of the *Mongol* Nations in general, in Right of Deſcent.

THE Oriental Authors unanimouſly agree, that the Grand *Khân* is ſtiled *Khaân*, with two *a's*; a Diſtinction which *Jenghiz Khân* himſelf made, when he named *Oktay*, or *Ugaday*, for his Succeſſor, declaring him by that Title, *Khân of Khâns*, and ordering it by his *Yaſa*, or Laws, to be continued in his Poſterity [f]. *Bentink* calls in Queſtion this Diſtinction, affirming, that the *Tartars* know not any other Title of Sovereignty, or Lordſhip, than that of *Khân* [g]. But, however this Cuſtom may be ceaſed at preſent, it does not follow, that it never was in uſe; and although the *Mohammedan Tartars* may have laid it aſide, yet it may ſtill be kept-up among the *Pagan*: Nor is this Conjecture altogether groundleſs, ſince *Gaubil* tells us, that *Kobân, or Kahân* [h], *is the* Mogul (*or* Mongol) *Word anſwering to that of* Hân [i] (*or* Khân.)

HOWEVER that be, excepting the reigning Prince, it is not permitted any of his Family to take the Title of *Khân* [k]; that which belongs to the Princes of the Blood being *Tayki* [l]. *Bentink* obſerves, that as the *Eluths* give the Name of *Tayki* [m] to their Chiefs of Tribes, ſo they call their *Khân*, *Kontayki*, or *Grand Seignior*. This was the Title conferred by them on *Zigan Arabtan*, the Succeſſor of *Kaldan*, often mentioned before. The ſame Author concludes this Prince muſt be deſcended from *Jenghiz Khân*, for that otherwiſe *Abu'lghâzi Khân* would not have given

[a] *Du Halde's China*, vol. 1. p. 30. [b] It would be better to ſay, *and* Tribes, if *Aymak*, as ſome ſay, ſignifies a Family. *Gerbillon* writes *Ayman*, but renders it *Tribe*. See before, *p.* 379. c. [c] So this Author ſays, p. 541.—The *Mohammedan Tartars* call their Heads of Tribes *Murſas*, from the *Perſian* Word *Mirſa*, a Prince. [d] Hiſtory of the *Turks*, &c. vol. 2. p. 397, *& ſeq.* [e] Or Number of Tribes. [f] *De la Croix* Hiſt. *Genghis Can*, p. 380. [g] Hiſtory of the *Turks*, &c. as before, vol. 2. p. 391, *& ſeq.* [h] Which is manifeſtly the *Khaganos* of the *Greeks*, and *Khakan* of the Orientals. [i] See *Souciet Obſ. Math.* p. 188. note [k] Hiſtory of the *Turks*, &c. p. 391. [l] *Souciet*, p. 160. note 3. [m] He writes *Tayſhe*, according to the *Ruſſian* Corruption.

the Title of *Khân* to the Sovereign of the *Kalmûks* [a]. He likewise judges him to ſpring from the Deſcendant of *Taulay Khân* (eldeſt Son of that Conqueror) who continued to reign over the *Moguls* after the Death of *Koplay Khân*; but confeſſes it is a difficult Point to determine [b].

WHEN the *Khân* dies, all the Princes of the reigning Family, and Heads of Tribes, which are under the Dominion of that Houſe, meet, at an appointed Time, at the uſual Reſidence of the deceaſed Monarch, where they proceed to the Election of a new one; examining only who may be the eldeſt among thoſe Princes, without Regard to the Seniority of the ſeveral Branches of the Family, or to the Children of the Deceaſed; and they never fail to elect him who appears to be oldeſt, unleſs ſome extraordinary perſonal Defect be found in him. It is true, Force and Uſurpation may ſometimes ſet this Order aſide: But this Caſe happens much ſeldomer among the *Pagan*, than *Mohammedan Tartars*.

OUR Author cenſures *Marco Polo* for relating, that in his Time the *Tartars* were accuſtomed, at the Funerals of their *Khâns*, to ſlay all thoſe they met in the Way, to the Place appointed for the Sepulchre of the Succeſſors of *Jenghîz Khân*; and that a little before his Arrival in *Grand Tartary*, there had been twenty thouſand Perſons maſſacred in that Manner, at the Interment of *Mangu Khân*, Grandſon of the Conqueror: Becauſe, ſays he, nothing like it is at preſent practiſed among any Branch of the *Tartars*; nor does any of the Eaſtern Authors, who have written of the *Tatars*, charge them with ſo abominable a Cuſtom: He adds, that in *Grand Tartary* the Inhabitants live ſo diſperſed in Huts, that one might travel ſeveral hundred Leagues without meeting a thouſand [c]. *Polo* has, doubtleſs, exaggerated as to the Number: But the Tranſlator of *Bentink*'s Notes obſerves, that ſuch Executions have been practiſed, though they are not, perhaps, commonly. He ſhews from *Couplet* [d], that *Shun-chi*, the late Emperor of *China*'s Father, had thirty Men put to Death, to appeaſe the Manes of a Favourite Miſtreſs [e]. Beſides, we have already cited Inſtances, from late Travellers, of this Practice being not quite out of uſe among the *Manchew Tartars* [f].

KONTAYKI, *Khân* of the *Eluths*, dwells continually under Tents, according to the Faſhion of his Anceſtors, though he poſſeſſes *Little Bukharia*, with its Dependencies, wherein there are a good many Towns; except that when his Affairs call him into this laſt Country, he reſides at *Yerkien*, or *Yarkan*. He has continued about the Rivers *Ila* [g], and the *Tekis*, for ſome Years paſt, that he might be near at Hand to watch the Motions of his Couſin *Ayuka Khân*, as well as the *Mohammedan Tartars* and *Mongols*, between whom the *Eluths* are ſituate: For although, properly, they are all the ſame Nation, yet there is ſo great an Antipathy among them, occaſioned, on one Side, by the Principles of Religion, as well as Rapine; and, on the other, by the Intrigues of the Court of *China*, that they are continually at War together. Bentink.

OUR Author was aſſured, that it is ſomething very curious to ſee his Camp: That it is diſtributed into ſeveral Quarters, Places, and Streets, juſt as if it had been a Town: That it was a good League in Compaſs, and able, at a Minute's Warning, to ſend into the Field fifteen thouſand Horſe. The Quarter where the *Khân* reſides, is in the Middle of the Camp. His Tents are made of *Kitayka*, a very ſtrong Sort of Calico; which being raiſed very high, and of all Sorts of lively Colours, exceedingly delight the Eye at a Diſtance. In Winter they cover the Tents with Felt, which makes them impenetrable by the Injuries of the Seaſon: And for the Wives of the *Khân*, they build little Houſes of Wood, which may be taken-down in an Inſtant, and ſet-upon Waggons when they are going to decamp. *His Camp curious.*

KONTAISH (or rather *Kontayki*) is a potent Prince, being able, according to *Bentink*, to bring into the Field above an hundred thouſand Men [h]. On this Occaſion it may be obſerved, that the *Taykis* are of Account to their *Khân* only in Proportion to the Number of their *Ordas*, or Tribes; and the *Khâns* formidable to their Neighbours only, as they have under their Subjection many Tribes, and as thoſe are compoſed of a great Number of Families, in which conſiſts all the Power, Riches, and Grandeur of a *Khân* of the *Tartars* [i]. *Power and Forces.*

THE Arms of the *Eluths* are chiefly great Bows, with ſizeable Arrows, which they draw very true, and with great Force: It having been obſerved, in the Difference which the *Ruſſians* had with them in the Year 1715, on Account of ſome Settlements on the River *Irtiſh*, that they pierced Men quite through the Body with their Arrows. They have alſo great Arquebuſſes, *Arms of the Eluths.*

[a] As he does; ſee Hiſtory of the *Turks*, &c. vol. 1. p. 355. [b] The ſame, p. 541, & *ſeq.* [c] The ſame, p. 393, 396, & *ſeq.* [d] *Tab. Chron. Sinen.* p. 100. [e] Hiſtory of the *Turks*, &c. p. 792. [f] See before, p. 92, 95, and 249. [g] Rather *Ili*. The Author makes a great Miſtake here, placing this River to the South-Eaſt of the Lake *Seyſan*: Whereas it is near fifteen Degrees to the Weſt. In the *Preſent State of Bukharia*, p. 28, his Reſidence is ſaid to be about the Lake *Yamiſh*. See before, p. 385. a. [h] Hiſtory of the *Turks*, &c. vol. 2. p. 543, & *ſeqq.* [i] The ſame, p. 398.

above

Eluths Government.

above six Foot long, the Barrel of which is an Inch thick, and yet the Ball they carry is hardly so much. With these Arquebusses, fixed on a Rest, they never miss at the Distance of three hundred Fathom, firing them off with a Match. When they march, they carry them across their Backs, fastened to a Strap, and the rest hangs on the right Side. As they never go to War, but on Horseback (having no Infantry) they all use Lances, and most of them Coats of Mail,

How worn by them.

and Caps made of Iron. Their Commanders, b but few else, wear Sabres, like the *Chinese*; the Handle behind, and the Point before, that they may draw backwards, which is the more convenient Way. These Commanders are usually the Heads of *Ordas*, so that a Troop is strong, according as the *Orda*, which composes it, is more or less numerous.

MOST of the *Tartars* hang their Bow at the left Side, in a Sort of Case, when they take Horse. The left-Hand is the Place of Honour c with most of the Oriental People, particularly the *Mohammedan Tartars*; but they carry their Quivers at their Backs. They shoot their Arrows with as much Skill flying, as advancing: For this Reason, they chuse rather to provoke their Enemies at a Distance, than come to close Fight with them, unless they have much the Advantage.,

Way of fighting.

THEY have not the Method of fighting in Lines, and Ranks; but upon going to Action, d divide themselves, without any Order, into as many Troops as there are *Ordas*, which compose the Army; and in this Manner each advances, led by its Chief, to charge the Enemy with Lance in Hand. The *Tartars* have been ever very expert in the Way of fighting flying, as *Quintus Curtius*, and other ancient Authors relate. In this the Swiftness of their Horses stands them in great Stead: For often when one concludes them entirely routed, they return, and e fall-upon their Enemy with as much Vigour as before; and when their Adversaries are eager to pursue them, without preserving the necessary Order on that Occasion, they run terrible Risks in the Encounter. The *Eluths* are brave beyond what can be imagined, and want nothing but *European* Discipline to make them formidable. They have not yet learned the Use of Cannon; and, indeed, as they consist only of Cavalry, it would not be of much Service to them [b].

Ensigns, or Colours.

EACH Tribe, or *Orda*, has its particular Ensign (or Banner) which is usually a Piece of *Kitaika*, or some other coloured Stuff an Ell square, set-upon the Top of a Lance twelve Foot long. The *Eluths* and *Mongols* exhibit the Figure of a Camel, Cow, or a Horse, or other Animal, and under it put the Name of the Tribe. And as all the Branches of the same Tribe still retain the Figure represented in the Ensign thereof, adding thereto only the particular Name of the Branch for whose Use it is designed, these Ensigns serve them, in some Measure, instead of a Genealogical Table. When an *Orda* is in March, the Ensign proceeds at the Head immediately after the Chief [c].

THE *Eluths* and *Mongols*, who have exactly preserved the Manner of living of the ancient *Moguls*, carry their whole Substance along with them where-ever they go. Hence it comes, that when they happen to lose a Battle, their Wives and Children commonly remain a Prey to the Vanquisher, with their Cattle, and generally all they have in the World. They are, in some Measure, necessitated to incumber themselves this Way; because they should otherwise c leave their Families and Effects a Prey to other *Tartars*, their Neighbours. Besides, there is no travelling over the vast sandy Plains of that Country, without carrying Cattle along with them, for Subsistence on the Road, where nothing at all is to be found for several hundred Leagues together, but Grass, and sometimes Water. For this Reason the Karawâns of *Siberia*, which trade with *Pe-king*, are obliged to follow the same Method, in their Way from *Selinghinskoy* to that City [d].

As there is but little Magnificence, at present, to be found in the Court of *Khâns*, and their Subjects are obliged to follow them to War on the Hopes of the Enemy's Spoil, which is their only Pay, they have no Occasion, or rather Pretence, for large Revenues, which consist wholly in Tithes. The *Tartars*, of all Denominations, pay two Tithes annually of all their Effects; first to their *Khâns*, and then to e the Heads of Tribes. The *Eluths* and *Mongols*, not cultivating their Lands, give the Tenth of their Cattle, and the Booty which they take from their Enemies in Time of War: Yet in this the Author thinks the *Tartars* much better off than the Country-People, through the greater Part of *Europe*; who besides the two Tithes to the Church, and the Parson, must pay Contributions, Imposts, and so many other Charges, amount to three or four more at least [e].

f IT is hard to say from whence the Nickname of *Kalmûk*, or *Kalmâk*, given to the *Eluths*, derived. The Author of the curious *Description of the Countries which border on the* Euxine and Caspian *Seas*, printed at the End of *Tavernier's* Travels in *English*, under the fictitious Name

[a] History of the *Turks*, &c. vol. 2. p. 535. [b] The same, *p.* 400, and 535. [c] The same, *p.* 4
[d] The same, *p.* 537. [e] The same, *p.* 395, and 398.

Astrakhan

Aſtrakhan, ſays [a], *they are ſo called by the other* Tartars, *becauſe they wear a Kind of Cap, or Hat, open before and behind, with broad Brims on each Side: Which Caps*, he adds, *are called by the* Muſcovites *Koulpaks*. From hence the Name of *Kara-kalpaks* [b] may be well enough derived: But *Koulpak*, or *Kalpak*, is very different from *Kalmûk*, or *Kalmâk*. We are told by *Mininſki* [c], that *Kalpak*, with the *Poles* and *Tartars*, ſignifies *a furred Cap*: But that copious Author ſays nothing tending to give Light into the other Name, only that there is ſuch a Word as *Kalmâk*; which implies both *to remain*, and *decay*. *Matthias a Micow* [d], and *Herberſtem* [e] ſay, they are called *Kalmûks*, becauſe they are the only *Tartar* Nation who let their Hair grow, which is yet no more than a Lock on the Crown of their Heads [f]. As to its being compounded of an *Arabic*, and a *Tartar* Word, both ſignifying the ſame Thing [g], intimating their being good Archers, according to the Explanation of a *Kalmâk* [h], it ſeems too forced and far-fetched to be genuine; and may be deviſed by the *Eluths*, to make the beſt of a Nickname, which they find is likely to ſtick to them [i].

SECT. X.

The Origin *and* Hiſtory *of the* Mongols *and* Tartars. *From* Abu'lghâzi Bahâdur Khân.

INTRODUCTION.

THE Author of the Work, often cited before, from whence the following Account of the *Tartars* is extracted, was no leſs a Perſonage than the *Khân*, or King of *Karazm*, or *Khowarazm*: A Country bounded on the Weſt by the *Caſpian Sea*, and known by that Name to the *Greeks* before the Time of *Herodotus*, who mentions it by the Name *Khoraſmia*. It was famous in the Time of the latter *Greek* Empire, its Inhabitants being mentioned by the *Byzantine* Hiſtorians, under the Name of the *Ephthalites* [k]: But made a greater Figure about five hundred and thirty Years ago, under a Dynaſty of Kings; the laſt of whom, called *Mohammed Karazm Shah*, was the moſt conſiderable Monarch of *Aſia*, when *Jenghiz Khân* invaded his Dominions. Ever ſince that Time this Country has been in the Hands of the *Tartars*, of ſeveral Denominations. Its preſent Poſſeſſors are called *Uzbeks*, of whom *Abu'lghâzi* was *Khân*, when he wrote his Hiſtory: He dying in 1663, before it was quite finiſhed, his Son and Succeſſor, *Anuſha Mahomet*, ſupplied what was left to be done in 65. This Hiſtory, he tells us, was extracted partly from the Books written on this Subject [l], and partly from particular Memoirs of divers *Mogul* Tribes. The Books he made-uſe of were in Number eighteen [m]; of which, as the chief, he only mentions *Khojah Raſhid*, cited by *De la Croix*, *D'Herbelot*, and others, under the Name of *Fadl Allah*. This Author is the firſt who wrote a Hiſtory of the *Moguls* and *Tartars*, at the Command of *Gazan Khân*, ſixth Succeſſor of *Hûlakû* (Grandſon of *Jenghiz Khân*) in *Perſia*, whoſe *Wazir*, or Viſier, *Fadl Allah* was. He compiled his Work in three Volumes [n], from ſeveral original Memoirs, which that Monarch had collected by Means of one *Pulâd*, or *Fulâd*, a Nobleman ſkilled in the *Mogul* Language; who was ſent into *Tartary* for that Purpoſe, and ordered to aſſiſt in the Compoſition, which was finiſhed in the Year of the *Hejrah* 702, or of Chriſt 1302 [o]. From this Account which *Abu'lghâzi Khân* gives of his Hiſtory [p], it does not appear, that there is any good Authority for what relates to the Times before *Jenghiz Khân*; ſince the *Mongols* wanting the Uſe of Writing, could preſerve the Tranſactions of their Anceſtors no otherwiſe than by oral Tradition, on which there can be but little Dependence: And this Remark will be ſufficiently verified by the Defects obvious in the Hiſtory itſelf.

1665. Abu'lghâzi Khân.

1. *The* Hiſtory *of the* Moguls *and* Tartars, *till the Death of* Oguz Khân.

Origin of the Turks. Mogul *and* Tartar *Empires. Birth of* Ogûz: *Reſtores the true Religion: Defeats* Tatar Khân: *Conquers* Turkeſtân, *and the* Perſian *Empire: His laſt Actions.*

The two firſt treat of the *Khâns*, and Tribes, deſcended from *Turk* to *Jenghiz Khân*: The third, of that Conqueror, and his Exploits: The five next, of his Sons and Succeſſors; and the ninth, *Khân* of *Karazm* to the Author's Death. It has been tranſlated into *Ruſſian*, *German*, *French*, and *Engliſh*. The *French* Edition is intitled, *The Genealogical Hiſtory of the* Tatars: The *Engliſh*, *A General Hiſtory of the* Turks, Moguls, *and* Tatars, &c. [q] So the *Mohammedans* call *Ararat*.

Tartar History.

the Rivers *Atil* [a] and *Jaïk*. Dying two hundred and fifty Years after, he left eight Sons, *viz.* *Turk*, *Khars*, *Saklab*, *Rus*, *Maninakh*, *Zwin*, *Kamari*, and *Tarik* [b]. *Turk* ſucceeding him, invented many Conveniencies of Life, particularly Tents, and reſided in a Place at preſent called *Iſakh-kol*. He had four Sons, *Taunak*, *Zakale*, *Bertazar*, and *Amlak*. *Taunak*, who was his Succeſſor, among other famous Inventions, diſcovered the Uſe of Salt, by the accidental Fall of a Piece of roaſt-Meat on the Ground, which happened to be impregnated with ſaline Particles. This Prince, who was Contemporary with *Kayumarrus*, King of *Irân* (or *Perſia* at large) lived two hundred and forty Years, and left the Throne to his Son *Yelza Khân*, whoſe third Succeſſor, and fifth from *Turk*, was *Alanza Khân*.

IN this *Khân*'s Reign, it ſeems, the People growing wanton in Affluence, forſook the true God, to adore Idols. He had two Twin-Sons, *Tatar* and *Mogul*, or more properly *Mungl*, between whom he divided his Dominions.

Mogul *and* Tartar *Empires.*

THIS was the Foundation of the Empires of the *Tatars* and *Moguls*, or *Mungls*, who took the Names of their *Khâns*. *Tatar Khân* had the Eaſtern Part of *Great Tartary* to his Share, fixing his Reſidence near *Jurjut* [c], a powerful City in the Neighbourhood of *Kitay* [d], and called *Zinu* in the *Indian* and *Perſian* Languages. *Mogul Khân*, who had the Weſtern Part, made his Abode in Summer about the Mountains *Ar-tag*, and *Kar-tag*, at preſent called *Uluk-tag*, and *Kichik-tag* [e]: And, in Winter, on the Banks of the *Sîr* [f], at the Foot of the Mountains to the North of that River.

THESE two Nations lived in Peace for ſome Time, till *Ogûz*, the Grandſon of *Mungl Khân*, invading *Tatar Khân*, vanquiſhed him. In the Reign of *Baydu Khân*, the ſixth in Succeſſion from *Tatar Khân*, a War broke-out again between the two Nations; which being continued by his Son *Siuntz Khân*, ended in the Ruin of the *Mogul* Empire [g].

MUNGL was a melancholy Man, as the Word ſignifies; which, by a general Corruption, has been changed into *Mogul* [h]. In his Time the whole World was involved in Idolatry: His Deſcendants reigned after him to the ninth Generation, ending in *Il Khân*. *Mogul Khân* had four Sons, *Kara Khân*, *Auwas Khân*, *Kavar Khân*, and *Kavar Khân*.

KARA Khân, who ſucceeded *Mungl*, had a Son called *Ogûz*, whoſe Countenance ſhone like the Sun [i]. The Boy would receive no Nouriſhment, and the Mother continually dreamed that he told her, ſo long as ſhe continued in her Idolatry, he would refrain her Breaſt, although he was to die by it. She, to ſave her Child's Life, made a ſecret Vow to reſume the Worſhip of the true God: Whereupon young *Ogûz* fell to ſucking. When he was a Year old, his Father, according to Cuſtom, intending to give him a Name, the Boy preventing him ſpoke, ſaying, *I call myſelf* Ogûz. As ſoon as he could prattle, he had the Word *Allah*, or God, continually in his Mouth. He refrained the Company of his two firſt Wives, becauſe they would not renounce their Idolatry; and took a third, who was more compliable.

SOME Years after, *Kara Khân* having made a Feaſt, and invited the Wives of *Ogûz*, who was from home a-hunting, he aſked the Cauſe of his Son's hating the two firſt; and being informed by them, he reſolved, by Advice of his Lords, to go after *Ogûz*, and put him to Death: But the third Wife ſending him Advice of their Deſign, he got together ſome Forces, with which his Father's, though vaſtly ſuperior, were routed, and himſelf killed by an Arrow. On this Occaſion his Brothers Sons having joined him, he gave them the Name of *Vigûr* [k], which ſignifies *coming to Aid*, or *Relief* [l].

OGUZ being advanced to the Throne, reeſtabliſhed the true Religion; and making War on the Recuſants, forced all to embrace it, except a few, who fled to the neighbouring Countries for Shelter. The *Khân* made War upon them, and obliged them to ſubmit, except a few who retired into the Dominions of *Tatar Khân*. *Oguz* laying-hold of this Occaſion, fell-upon *Tatar Khân*; and having vanquiſhed him, took vaſt Booty: Yet could not have carried it off but for the Invention of Waggons, which from their *ſkreeling* were named *Kunek*: The Author he named *Kankli*, from whom the Tribe of the *Kankli* take their Denomination.

OUR Hero, after a War which laſted ſeven two Years, obliged all his Enemies to ſubm

[a] *Edel*, or *Wolga*. [b] Moſt of theſe Names are faultily written by the firſt Tranſlator: *Khars*, perha for *Khozars*; *Zwin* for *Shin* (or the Father of the *Chineſes*) and *Kamari* for *Pomari*, or elſe *Komani*. the Tranſlation *Dſurdſut*. It is difficult to fix the Situation. [d] The Northern Provinces of *China*, and co guous Parts of *Tartary*. [e] See before, *p.* 392. [f] Or, *Sihûn*. [g] See Hiſtory of the *Turks*, *Moguls*, *Tartars*, *p.* 4, *&* *ſeqq.* [h] This Corruption ſeems to take Place only among the *Mohammedan Tartars*, the *ſians*, *Turks*, and *Europeans*: For the Inhabitants of *Great Tartary* ſtill retain the Name *Mongl*, or *Mo* [i] Something like this is related of *Mohammed*; and, indeed, the Deſign of the Hiſtorian ſeems to be to for Hero, who might, in ſome Meaſure, equal both *Mohammed* and *Jengbiz Khân*. [k] Or *Oygûr*, or *I* [l] So *Mohammed* gave the Name of *Anſars*, or *Helpers*, to the People of *Medina*, who came to his Aſſiſta

and return to the true Religion. Afterwards he conquered the Empire of *Kitay*, the City of *Jurjut*, and Kingdom of *Tangut*, with *Kara-kitay*. Thence proceeding beyond *Kitay*, on the Sea-Coaſt, he found a warlike People, by whoſe *Khân*, *Iſburak*, he was repulſed. In his Retreat, the Widow of one of his Officers killed in the Battle, falling in Labour, crept into a hollow Tree; and being there delivered of a Son, the *Khân* gave him the Name of *Kipjak*, which, in the ancient *Turkiſh*, ſignifies a *hollow Tree*. From him ſprung the *Kipjaks*, who having ſubdued the *Vruſes*, *Vlaks* (or *Walaks*) *Majars* (or *Hungarians*) and *Baſkirs*, poſſeſſed their Country along the River *Tin*, *Atol* [a], and *Jaik*, thenceforward called *Daſht Kipjak*, or the *Plain of Kipjak*.

SENENTEEN Years after, *Ogûz* attacked *Iſburak* a ſecond Time; and having defeated, put him to Death. Then turning-back, he conquered the Cities of *Talaſh*, *Sayram*, *Taſhkaut*, *Turkeſtân*, *Andijan*, *Samarkaut*, and *Balk*. From thence he proceeded to *Khor*, which he took. Here ſome of his People rejoining him, who had been kept-back all Winter by the Snow which fell, he called them *Karlik*, which ſignifies Snow; and from them the Tribe of *Karlik* deduce their Origin. From thence *Ogûz Khân* proceeded to *Kabul*, *Ghazna*, and *Kaſhûmîr*; which having ſubdued, he returned by *Badagſhân* and *Samarkaut* into his own Dominions.

SOME Time after, the *Khân* having reſolved to conquer the Country of *Irân*, ſet-forward with numerous Troops; and coming to *Talaſh*, was joined by thoſe who ſtaid behind in his March to the *Indies*. One of them being aſked the Reaſon, replied, that he was forced to ſtay, to procure Victuals for his Wife, to enable her to ſuckle her Child. Hereupon the *Khân* gave him Leave to return home, and conferred on him the Name of *Kal-ach*, that is, *left hungry* [b]. From this Man ſprang the Tribe of *Kal-ach*.

OGUZ *Khân* continued his March through *Great Bukharia*, and paſſing the River *Amû*, entered the Kingdom of *Irân*, whoſe *Khân*, *Kayumaras*, dying, before his Son *Huſhang* was of Age, the great Lords went to War among themſelves; which made the Reduction of his Dominions the more eaſy. In this Expedition, being in the City of *Sham*, which, as well as *Meſr* [c], belonged to *Irân*, he ordered a truſty Servant to bury a Golden-Bow ſecretly, on the Eaſt-Side of a neighbouring Foreſt, leaving only one End ſticking-out, and three Golden-Arrows on the Weſt-Side. A Year after, having ſent his three eldeſt Sons to hunt on the Eaſt-Side, and his three younger on the Weſt-Side, the former found the Bow, which was divided among them; and the latter the Arrows, each keeping one.

1665. Abu'lghâzi Khân.

AFTER ſome Years, returning into his own Dominions, he cauſed to be prepared a magnificent Tent, adorned with Gold-Apples ſet with precious Stones. Then having ordered nine hundred Horſes, and nine thouſand Sheep to be killed, likewiſe ninety-nine Leathern-Bottles with Liquor to be provided, nine of Brandy, and ninety of *Kumis*, or Mares Milk; he gave a grand Entertainment to his Sons, and all the great Lords and Officers of his Empire, whom he thanked for their Services, rewarding them with Gifts and Preferments. At the ſame Time, as he had his Views in what was done relating to the Golden-Bow and Arrows, he took Occaſion, from thence, to give his three eldeſt Sons the Name of *Buſſuk*, or *Broken*, in Alluſion to their dividing the Bow; and to his three youngeſt, that of *Uch-ok*, or *three Arrows*; adding, that it was not by Chance, but the Will of God, that they found thoſe Weapons; and that as his eldeſt Son *Kiun* had found the Bow, he, and his Poſterity, ſhould reign in Succeſſion, ſo long as any of the *Buſſuks* [d] remained, and that the *Uch-oks* ſhould be their Subjects for ever [e].

His laſt Actions.

2. *The* Mogul *Empire deſtroyed, and reſtored.*

The Mogul *Empire divided: Deſtroyed by the* Tartars. Moguls *Captivity, and Deliverance: Deſtroy the* Tartar *Empire. Story of* Alanku; *with Child by a Spirit, whoſe Son ſucceeds.* Mogul *Conqueſts. Name of* Kayat *revived. Birth of* Jenghîz Khân. *The Hiſtory ſuſpicious, proved from Facts; and the Chronology. Reigns of the* Khâns *greatly exaggerated: How far genuine.*

OGUZ *Khân* having reigned an hundred and ſixteen Years, died, and *Kiun Khân* aſcended the Throne. Some Time after, this Prince, by Advice of a *Vigûr*, one of his Counſellors, to prevent Jealouſy, divided his Dominions with his Brothers, and their Children, each of the ſix having had four. On this Occaſion he made a great Feaſt: He cauſed the magnificent Tent of his Father to be ſet-up, with ſix great white ones on each Side. Near the Tents were erected two Trees, forty Fathom high, with a Golden-Hen on the Top of one, and a Silver-Hen on the other. He ordered the *Buſſuks* to ſhoot at the

The Mogul Empire divided.

[a] The *Don*, or *Tanais* and the *Wolga*. [b] *Kal* ſignifies *left*, and *ach*, *hungry*. [c] *Sham* and *Meſr*, are *Damaſcus* and *Kayro*. [d] *Kaldan*, *Khân* of the *Eluths*, had the Title of *Buſſuktu Khân*. [e] Hiſtory of the *Turks*, &c. *p.* 9, & *ſeqq.*

Tartar History.

first, and the *Uch-oks* at the ſecond, running full Speed, appointing conſiderable Prizes for thoſe who hit the Mark. This Feaſt, which every Way reſembled that given by *Ogûz Khân*, continued ten Days and Nights.

Deſtroyed by the Tartars.

FROM the Time of *Kiun Khân*, we meet with nothing remarkable till the Reign of *Il Khân*, the ninth in Succeſſion from *Mogul Khân*. *Il Khân*, who was Contemporary with *Siuntz Khân*, the eighth of *Tatar Khân*'s Race, was always at War with that Prince, and ſtill came-off with Victory. This obliged the other to procure the Aid of the *Kerghis*, whoſe *Khân* was a potent Prince: But ſtill finding himſelf unable to get the better of *Il Khân* in the open Field, at length by feigning a Flight drew him into an Ambuſcade; where the greater Part of his Army being cut to Pieces, the reſt were made Priſoners of War: And thus the Empire of the *Moguls* was quite ſubverted. *Il Khân* himſelf, and all his Children, were ſlain in the Battle, except *Kayan*, his youngeſt Son, and his Nephew *Nagos*; who, after being ten Days kept Priſoners by one Man, fled, with their Wives, to their own Country: But not thinking themſelves ſecure there, they, with the Cattle which eſcaped from the Action, and the Cloaths they found on the Field of Battle, retired into the Mountains. At length they came to the Foot of a very high one, which they were obliged to aſcend by ſo narrow a Path made along the Edge of the Precipices, by Animals called *Arkhora*[a], that only one could paſs at a Time. They deſcended, by the ſame Path, into a delightful Country incloſed by Mountains, which they called *Irgana-kon*, in Alluſion to its Situation. *Irgana* ſignifying, in the old *Mogul* Language, *a Valley*, and *Kon*, *a ſteep Height*.

Moguls *Captivity*,

And Deliverance.

IN Proceſs of Time their Poſterity greatly increaſing, *Kayan* [b] called his Deſcendants, who were moſt numerous, *Kayat*; and *Nagos* named one Part of his *Nagoſler*, and the other *Durlagan*. At the Expiration of four hundred Years, finding the Place too narrow to hold them, they reſolved to return to the Country from whence their Anceſtors were driven: But being at a Loſs for Want of a Road, the Path beforementioned having been deſtroyed by Time, a Farrier, who had obſerved that the Mountain was not very thick in a certain Part, and conſiſted of Iron-Mines, propoſed to melt a Way through. This Counſel being approved-of, every one carried Wood and Coal, which they placed in Layers interchangeably round the Foot of the Mountain: Then ſetting Fire to the Fuel, they ſo effectually blew it up, with ſeventy Bellows, that the Ore at length diſſolving, left a Road large enough for a loaded-Camel to paſs; by which they all marched-out.

To perpetuate the Memory of this miraculous Sally, the *Moguls* ſtill celebrate the Anniverſary of it. They kindle a great Fire, putting-in a Piece of Iron, and, when it is red-hot, the *Khân* gives the firſt Stroak with a Hammer, then the Heads of Tribes, and Officers of Diſtinction, follow his Example, and after them the common People give each a Stroak in his Turn [c].

OF all the Branches into which the *Moguls* divided themſelves, while they dwelt in *Irgana-kon*, that of *Kurlas*, deſcended from *Kayan*, being moſt numerous, they agreed to chuſe their *Khâns* out of it. He who poſſeſſed that Dignity at the Time of their Departure (for the Names of the preceding *Khâns* are unknown) was named *Bertezena*. This Prince, immediately after their Sally, ſent Ambaſſadors to the neighbouring People, offering Protection to thoſe whoſe Anceſtors had been ſubject to the Deſcendants of *Mogul Khân*, and threatning Ruin to ſuch as refuſed to return to their Duty. Mean-time the Deſcendants of *Tatar Khân*, alarmed at ſo unexpected a Piece of News, aſſembled their Forces, and went in Queſt of *Bertezena Khân*: But he intirely defeated them, and put to the Sword all the *Tartars* capable of bearing Arms; giving Quarter to none but the young People, whom he divided among his *Moguls*. Hereupon the neighbouring *Aymaks*, or Tribes, put themſelves under his Protection. This happened fifty Years after the Sally out of *Irgana-kon* [d].

OUR Author gives nothing but the Names of *Bertezena*'s Succeſſors, till he comes to *Yuldûz Khân*, the eleventh in his Line. This *Yuldûz* had two Sons, who dying before him, one left a Son named *Deyun Bayan*, the other a Daughter, called *Alanku*, whom at a proper Age he married together. *Deyun Bayan* dying ſoon after his Grandfather, and before he attained the Age required by the Law to reign by himſelf, which was that of thirty, left two Sons very young named *Belgadey*, and *Begjadey*, by ſome called *Belgayut*, and *Bugnat*. Their Mother *Alanku* was ſought in Marriage by ſeveral of *Yuldûz Khân*'s Relations, but conſtantly rejected all Propoſals that Way; ſaying, ſhe was obliged during the Minority of her Children, to take Care of the Regency.

SHORTLY after, as ſhe awaked one Morning ſhe ſaw ſomething, as bright as the Sun, fall-in her Chamber, through the Opening at-Top, a

[a] See before, *p.* 394. b. [b] He had his Name from being very robuſt: *Kayan* ſignifying a rapid Torr falling-down a Rock. [c] Hiſtory of the *Turks*, &c. p. 22, *&* *ſeqq.* [d] The ſame, *p.* 29, 55, and 65.

approa

approach her in Form like a Man, of an Orange-Colour, with Eyes of a ſingular Beauty; which frightened her ſo, that ſhe had no Power either to riſe, or call her Servants. In this Condition, it ſeems, the Spirit lay with her ſeveral Times, and then diſappeared; continuing his Viſits frequently after, although ſhe proved with Child from the firſt [a]. When her Relations perceived her to be pregnant, they were importunate to know who was the Father; and ſhe unable longer to conceal the Affair, related the whole Adventure. As it had much the Air of a Fiction, ſhe juſtified herſelf by alledging, that in Caſe it had been the Effects of Frailty, ſhe would have married to cloak it: That poſſibly the Child might bear ſome Mark of its ſupernatural Extraction; and that, if after all, they doubted the Truth of what ſhe ſaid, they might catch the Spirit in the Fact. Hereupon they placed Guards over her, who found every Thing ſhe ſaid to be true, excepting that they could not ſee any Appearance of a Man [b].

At length *Alanku*, being come to her full Time, was delivered of three Sons, *Bokun Katagun*, *Boſkin Zalzi*, and *Budenſir* [c] *Mogak*, who came to reign over the *Moguls*. The Poſterity of theſe three Princes, from whom ſprung ſeveral Tribes, took the Name of *Niron*. The latter, from whom *Jenghîz Khân* deſcended, had two Sons, *Tumu*, and *Tokha*, which laſt ſucceeded him. His Son *Dutumin Khân* had nine Sons, who were all ſlain by the *Jalairs* [d], excepting *Kaydu*, the eldeſt, who ſucceeded him. *Kaydu Khân* had three Sons, *Baſſikar*, *Hurmalankum*, and *Zapzin*; from whom ſprung three Tribes. *Murank Dukozina*, Son of *Hurmalankum*, had a Son called *Kadun*, who, becauſe he ſang well, bore the Name of *Tayſhi*, which, in the Language of *Kitay*, ſignifies *a Man with a fine Voice*. *Aral*, *Kadun*'s Son, was Father of *Kariltuk*, ſuppoſed to be that *Burgani Kariltuk*, Chief of the *Bayzuts*, who made War on *Jenghîz Khân*.

After *Kaydu Khân*'s Death, *Hurmalankum* married his Widow, and had by her two Sons, called, in the *Mogul* Language, *Kandu-zena*, and *Olekzin-zena*; but in the *Turkiſh*, *Irgak-bura*, and *Urgazi-bura*; which Names ſignify, the firſt a He-Wolf, the ſecond a She-Wolf: Theſe were the Founders of Tribes. *Baſſikar*, who ſucceeded *Kaydu Khân*, was a Prince of great Conduct, and conquered many Provinces. His Son *Tumana Khân* grew ſo powerful, that he reduced the whole Tribe of the *Nirons* under his Obedience. He had nine Sons, who were all the Founders of Tribes. 1. *Zazſu*, who had three Sons, *Butakin*, *Uruth*, and *Mankat*. 2. *Yaninſhur Tumanzu*. 3. *Samkazun*. 4. *Batkilki*. 5. *Kabul Khân*, Great Grandfather of *Jenghîz Khân*. 6. *Kazuli*, Twin-Brother to *Kabub*: He had a Son called *Yedemzi Burlas*: *Burlas* ſignifies *a Commander of Troops*. 7. *Udur-bayan*. 8. *Balzar-oglan*. 9. *Olzin-gan*. By this laſt Name the *Moguls* call a Man, who has ſat a long Time by his own Fire-Side; whence it is given alluſively to the youngeſt Sons, who are uſually kept longer at home than the reſt, and for this Reaſon reckoned moſt robuſt, and fit for War. 1665. Abu'lghâzi Khân.

KABUL Khân, who ſucceeded *Tumana Khân*, had ſix Sons. 1. *Ukin Yargak*. 2. *Bortan Bahâdur*. 3. *Kutuktu Manga*. 4. *Kaſſan Bahâdur*. 5. *Koblakun*. 6. *Budan Kayat*: This Name *Kayat*, which came from *Kayan*, and had been, as it were loſt, for three thouſand Years, was revived in the Sons of *Kabul Khân*, as being very ſtrong Men, and great Warriors. *Bortan Khân*, who obtained the Sovereignty after his Father's Death, had four Sons. 1. *Mungaday*. 2. *Bugan Tayſhi*. 3. *Yeſſughi Bahâdur*. 4. *Daritlay Bulay*, whoſe Deſcendants preſerved the Name of *Kayat*. *Name of* Kayat *revived.*

YESSUGHI Bahâdur, who reigned over the *Moguls* after *Bortan Khân*, had five Sons. 1. *Temuzin* [e], afterwards named *Jenghîz Khân*. 2. *Zuzikar*, that is, *a Gueſt like a Wolf* [f]. 3. *Kazun*. 4. *Tamuka*. 5. *Belgatay*. Theſe Brothers were all of a fair Complexion, inclining to Yellow, with a red Circle between the Black and White of their Eyes: And becauſe the *Moguls* call this Kind of Eyes *Borzugun*, their Deſcendants were ſurnamed *Borzugun Kayat* [g]. *Birth of* Jenghîz Khân.

A Table *of the* Tatar *and* Mogul Emperors.

Race *of* Turk.

1. *Turk*, Son of *Japhet*.
2. *Taunak*.
3. *Yelza Khân*.
4. *Dibbakui Khân*.
5. *Kayuk Khân*.

The History suspicious,

ALL the *Khâns* (whose Names to avoid crouding the Text with them, we have thrown into the above Table) are represented as succeeding each other from Father to Son; except *Ay Khân*, fifth in the *Mogul* Succession, who was Brother to *Kiun Khân*, and *Yuldûz Khân* the sixth, only a Relation of his Predecessor. Likewise all the *Khâns*, from *Turk* to *Bertizena*, are reported to have reigned very long, excepting that same *Yaldûz Khân*. But this Succession and History of the *Tatars* and *Moguls* affords a Critic much Room for Objection. In the first Place, we have no authentic Evidence, that *Turk*, the common Ancestor of these People, was the eldest Son of *Japhet*; if there ever was such a Man. The History of *Ogûz Khân*, who raised the *Mogul* Empire to such a Pitch, is a mere Legend. If his Son divided the Empire among his forty-eight Relations, how came they to be united under *Il Khân?* The long Wars, which were carried-on after that, with various Success, between the *Moguls* and *Tatars*, seem to be contrived only to display the Power of those two Rival-Nations, and fill-up the vacant Ages. At last the *Tatars* prevail, in their Turn, and overthrow the Empire of the *Moguls*; the very Name of whom, for four hundred Years, is lost in the Mountain of *Irgana-kon*. That of the *Tatars* seems to be lost too; for we hear nothing of them neither, during that Time, nor of their *Khâns* after *Siuntz*. The Posterity of *Koyan* melting their Way out of the Mountain with seventy Pair of Bellows, is a ludicrous Invention. It is not very probable, that the Posterity of two Persons only, and their Wives, who went into *Irgana-kon*, should become so numerous in four hundred and fifty Years, as without the Knowledge of Arms to beat the *Tatars*, a People long-inured to War, at the first Onset; and totally overturning them, establish their Empire a second Time. In short, they cannot carry their History farther-back, than their famous pretended Sally out of *Irgana-kon*, should we allow it genuine so high-up: But it is to be suspected they had only some traditional and general Knowledge of their History before *Jenghiz Khân*, of which *Pulad*, or *Fulad*, gathered the scattered Fragments, as has been already observed.

THIS appears still plainer from the Chronology, whereof only two Periods are mentioned. The first from the Reign of *Ogûz Khân*, to that of *Jenghiz Khân*, which is said [a] to contain the Space of about four thousand Years: So that reckoning back from the Beginning of the Reign of this last Conqueror, in the thirteenth Year of his Age, the End of that of *Ogûz Khân* will fall in about the Year 2824 before Christ, which runs it up five hundred Years beyond the Flood, and makes him Contemporary with *Kainan*, or *Methuselah*, instead of *Kayumarras*, first King of *Persia*; who, according to the best Historians, was no Antediluvian.

[a] History of the *Turks*, &c. p. 47.

THE ſecond Period of Time is mentioned [a] on Occaſion of the Name *Kayat*, which coming from *Kayan*, who entered with *Nagos* into the Mountain of *Irgana-kon*; our Author ſays, was loſt for about three thouſand Years, till revived in the ſix Sons of *Kabul Khân*, *Jenghîz Khân*'s Great-Grandfather. By this Reckoning, there were not quite a thouſand Years between *Ogûz Khân*, and *Kayan*; and taking away four hundred and fifty for the Time of the *Moguls* Abode in *Irgana-kon*, till their ſallying-forth again, and overthrowing the *Tatars* under *Bertizena Khân*, there will remain an Interval of two thouſand five hundred and fifty Years, from this laſt *Khân* to *Kabul Khân*; which is too much by at leaſt two thouſand of the Number, conſidering the Hiſtory places but ſeven *Khâns* in Succeſſion between them; and allowing thirty Years to a Reign, one with another, which is more than we ought by chronological Rules, the Sum of them all will amount but to five hundred and ten Years; whereas our Author's Computation gives them two hundred and fifty Years apiece.

IT is true, the allowing about three thouſand Years for the Reigns of twenty *Khâns*, between *Bertizena* and *Jenghîz Khân*, is proportioned well-enough to the thouſand allotted thoſe between *Ogûz Khân* and *Kayan*, which are but ſix; but then where is the Probability, we might ſay Poſſibility, of ſuch long Reigns? Beſides, if we may depend on the Authority of *Ebn Abdallatif* (cited by *De la Croix* [b]) who affirms, that *Buzenjer* (by our Author called *Budenſir Mogak* [c]) lived in the Time of *Abû Moſlem*; and *D'Herbelot* [d] obſerves, they correſponded together; then the *Tatar* Chronology muſt be falſe; for *Abû Moſlem*, who was Governor of *Khoraſân*, flouriſhed about the Year of the *Hejrah* 132, or of Chriſt 749; at which Time he expelled the Family of *Ommiyah*, and raiſed that of *Abbâs* to the *Khalifat*: So that if *Budenſir Mogak* was his Contemporary, he muſt have reigned about four hundred and twenty-ſeven Years before *Jenghîz Khân* [e]: Whereas, according to the former Calculation, his Reign muſt have preceded that Conqueror's thirteen hundred and fifty Years; and falls-in with the Time of *Antiochus Epiphanes*, the eleventh *Syro-Macedonian* King, about one hundred and ſeventy-four Years before Chriſt. Let us add to this, that all the Particulars relating to the Hiſtory of their *Khâns*, are few, trifling, or fabulous [f]. 1665. Abu'lghâzi Khân.

IT cannot be denied, that the *Tatar* Hiſtory, before *Jenghîz Khân*, gives Room to be ſuſpected; and, perhaps, it is not to be traced with any tolerable Degree of Certainty higher than *Dutumin Khân*, that Conqueror's Anceſtor in the ſeventh Degree: For in reckoning the Genealogy of *Jenghîz Khân* backward, *Abu'lghâzi*, when he comes to *Dutumin Khân*, takes-Care to inform us, that it is the Cuſtom of the *Turks* and *Tajîks* [g], in reckoning-up Genealogies, not to aſcend beyond the ſeventh Generation [h]; and two Generations higher, we meet-with *Bedenſir Mogak*, whoſe Birth is merely fabulous. However, all, or moſt of the *Khâns*, as high as *Bertizena*, where we find another palpable Fiction, might poſſibly have reigned-over the *Moguls*, and their Names have been preſerved by Tradition, the Genealogies and Hiſtories of their Princes being the only Science amongſt them. If they have exaggerated in their Chronology, it was for Want, perhaps, of knowing the Length of their Reigns, joined to a Deſire of making their Empire ancient: But when there appears any Evidence of Truth, we are not to condemn the Whole, for the Faults of a Part; eſpecially ſince no Hiſtory, of any Nation, even our own, is free from Fable. *How far genuine.*

[e] Allowing, at this Rate, forty-ſeven Years and a half to his Reign, and that of the intermediate *Khâns*; which yet is too much by more than half. [f] See alſo the Hiſtory of the *Turks*, &c. Pref. p. 7, *& ſeqq.* [g] *Tajîks*, according to *De la Croix* Hiſt. *Timur-bec*, vol. 2. p. 13, are the Inhabitants of *Mawara'lnahr*, and *Irân*, who are neither *Turks*, *Moguls*, nor *Tartars*. Others ſay, they are the original Inhabitants, ſo called in Contempt, as being Merchants, and in a Kind of ſervile State. The *Perſians* are called *Tajîks* by the *Uzbek Tartars*, and *Ajem* by the *Arabs*; which Terms imply *Barbarians*. *Abu'lghâzi Khân*, p. 40, ſays, the *Tajîks* call ſmall Rivers, *Rudk*, which is the *Perſian* Word. [h] Hiſtory of the *Turks*, &c. p. 64.

THE

Tartar Tribes.

Diſtinction of Tribes.

THE Inhabitants of *Tartary*, though ſubject to but a few Sovereigns, are divided into many different Nations, or Tribes, called *Aymaks*; which may be diſtinguiſhed into two Sorts, thoſe deſcended from the *Moguls*, or *Mongls*; and thoſe not deſcended from them: Whence theſe latter are derived, does not appear from *Abu'lghâzi Khân*; but they muſt either be *Moguls*, or *Tartars*, who had loſt the Memory of their Origin, elſe Tribes ſprung from the *Khâns* preceding *Alanza*; for all the *Aymaks*, it ſeems, are derived from the *Khâns*.

WITH reſpect to the Tribes not deſcended from the *Moguls*, we have already mentioned the Original of ſome; as the *Kankli*, *Kipjâks*, *Karliks*, *Kalach*, and *Vigurs*: Of theſe five, which derive their Name from *Ogûz Khân*, as hath been already mentioned [a], the laſt only, we are told, ſprung from *Mogul Khân*.

The Kankli. 1. THE *Kankli*: Theſe dwelt, for ſome Time, jointly with the *Turkmâns*, in the ſandy Deſarts: But when theſe laſt began to live in Towns, the former went and dwelt about the Rivers *Iſſikul*, and *Talaſh* [b], where they have remained a long Time. *Jenghîz Khân* put to the Sword ten thouſand of them, whom he found there; the reſt, to the Number of fifty or ſixty thouſand, having become Subjects to *Sultân Mohammed Karazm Shâh*, whoſe Mother was of that Tribe.

The Kipjaks. 2. THE *Kipjâks* [c] have always inhabited the Banks of the *Don*, *Wolga*, and *Jaïk*; as hath been before related.

The Karliks. 3. THE *Karliks* have conſtantly dwelt in the Mountains of the *Moguls* Country, living on the Produce of their Lands and Herds. This Tribe elected their *Khân*, and might have amounted to twenty thouſand Families in the Time of *Jenghîz Khân*. This Conqueror, having ſent an Envoy to perſuade them to ſubmit, *Arſlân*, their *Khân*, carried him a very pretty Daughter, beſides very magnificent Preſents. The Receiver, in Return, gave him a Relation in Marriage: But when he was gone, ſaid, the Name *Arſlân Sirak* [d] ſuited him better, than that of *Arſlân Khân*. The *Moguls* uſe the Term *Sirak*, ſignifying *a poor-ſpirited Man*, when they ſpeak of the *Tajîks*, who are a very ſimple People [e].

The Kal-ach. 4. *KAL-ACH*, ſignifies *hungry*, for the Reaſon already mentioned [f]. There are, at preſent, ſeveral numerous Branches of them in the Country of *Mawara'lnahr*, as well as the *Perſian* Provinces of *Khoraſân*, and *Irâk* [g].

5. THE *Takrins*. *Bugay Zinantz*, *Khân* of this Tribe, being invited, by *Jenghîz Khân*, to ſubmit; he ſent, among other Preſents, a Daughter, who appeared ſo beautiful in the Eyes of *Ugaday*, or *Octay Khân*, that after his Father's Death he married her, and loved her above all his other Wives.

6. The Tribe of *Kerghis*, but thin at firſt, increaſed conſiderably in Time by the Acceſſion of *Moguls*, and other Families, for Sake of the agreeable Country they inhabited. *Urus Inal*, their Prince, unable to reſiſt *Jenghîz Khân*, who ſummoned him, by two Ambaſſadors, to ſubmit, ſent that grand Monarch magnificent Preſents, and, among the reſt, a Bird called *Shungar*, before [h] deſcribed. The *Ikar*, or *Ikran Muran*, (now called *Jeniſea*) glides along the Borders of the *Kerghis* [i], and falls into the *Azokh Jenghîz*, or *Bitter Sea*. Near its Mouth, we are told, there is a great Town, called *Alakhzin*, that is, *pied*; becauſe the Inhabitants of that, and the dependent Towns, have none but pied Horſes [k], which are very tall, a Colt of a Year old being as large as a Horſe of three, any-where elſe. There are likewiſe rich Silver-Mines in its Neighbourhood. The Story goes farther, that the Favourite-Widow of *Tauli Khân*, Son of *Jenghîz Khân*, to whoſe Share the *Kerghis* fell, ſent three Officers with a thouſand Men up the River by Water, to diſcover this Country. After a long Stay, they returned, with only three hundred, the reſt being loſt, as they pretended, by the Badneſs of the Air. They confirmed, as Truth, all that had been reported of the Place, and ſaid they had loaded their Veſſels with Silver; but were obliged, in their Return againſt the Stream, to throw it all overboard for Want of Hands.

7. THE Tribe of *Ur-mankats*, ſo called from their living in Places moſt remote, and full of Foreſts, are Neighbours to the *Kerghis*, on the *Ikar Mûran*, and ſubmitted, at the ſame Time, to *Jenghîz Khân*. There is another Tribe of the ſame Name, and Courſe of Life; but they are *Moguls*.

8. THE Tribe of *Tatars* (by the Weſtern Nations of *Europe*, called *Tartars*) is one of the moſt ancient and famous of the *Turkiſh* Nation, (being deſcended from *Tatar Khân*.) It was

[a] See before, *p.* 408, *&c. ſeqq.* [b] Now *Tekis*, and *Ila*, or *Ili*: But this laſt, at leaſt, ſeems to be a Miſtake.
[c] Called alſo *Kapjâks*, and *Kapchâks*. Theſe are ſuppoſed to be the ſame with the *Koſaks*, who inhabit the ſame Parts: And both may be the Remains of the *Khozars*, or *Khazari*, who had an Empire to the North of the *Caſpian Sea*, in the Time of the *Greek* Emperor *Juſtinian*. [d] This muſt ſignify the *ſneaking Lion*.
[e] Hiſtory of the *Turks*, &c. p. 31, *&c. ſeqq.* [f] See before, *p.* 409. e. [g] Hiſtory of the *Turks*, &c. p. 1
[h] See *p.* 389. [i] At preſent, by *Kyrillow*'s Map, they are placed near the Borders of *Ruſſia*, and the *Ural Tag*. [k] The *Ruſſians* have a Tradition like this, of a pied People, ſome-where in *Siberia*, called by them *Peſtraya Orda*, or *the pied Tribe*. See Hiſtory of the *Turks*, &c. p. 648

formerly above ſeventy thouſand Families ſtrong, and had only one *Khân*, who was very potent: But coming afterwards to be divided into ſeveral Branches, its Power declined by Degrees. The principal Branch ſettled in the Country of *Biurnaver*, near the Borders of *Kitay*, to which it was brought in Subjection: But, in ſome Time revolting, the Emperor of *Kitay* forced them, by Arms, to return to their Duty: And this happened often to be the Caſe with them. Another Branch went and inhabited the River *Ikar*, or *Ikran Mûran* [a], above-mentioned. *Gaubil* informs us, from the *Chineſe* Annals, that in the Time of *Jenghîz Khân*, they were ſettled along the Rivers *Kerulon* and *Onon*, or *Amûr* [b]. From this Tribe all the reſt, and the Country they inhabited, took their Name, with the Nations of the *Southern Aſia*, and *Europe*.

9. THE *Virats* [c]. This Tribe inhabit the Banks of eight Rivers, which fall-into the *Ikar*, or *Ikran Mûran*, on the Eaſt-Side. After maintaining the War a good while againſt *Jenghîz Khân*, they, with their *Khân Tokta-beghi*, and his two Sons *Inalzi*, and *Tauranzi*, were obliged to ſubmit. Several Tribes have ſprung from them. 1. The *Torga-uts*, ſo called, becauſe they dwelt beyond the Country of *Salika*, which lies beyond that of the *Moguls*. But, at preſent, they are under *Ayuki Khân*, and make the Whole, or Part of the ſecond Branch of the *Eluths*, called *Eluths Ayuki*, or *Torga-uti* [d]. 2. The *Kuris*. 3. The *Utilas*. 4. The *Tumats*, who dwell in the Country of *Barku-chin-tugum*: Their *Khân*, *Tatula Sukar Khân*, was obliged to ſubmit to *Jenghîz Khân*. 5. The *Boygazins*. 6. The *Hirmuzins*: Theſe two laſt Tribes dwell near the *Kerghis*, and are very peaceable. 7. The *Telanguts*. 8. The *Oraſ-uts*. 9. The *Kuſſutmaits*: Theſe three have been always famous for their Skill in Phyſic and Magic, as well as Hunting and Fiſhing; which carried them to dwell near Foreſts and Rivers.

10. THE *Naymans* is a very ancient Tribe, and very rich: They dwelt in a Country of the *Moguls*, called *Kara-kum*, or *Blank Sand*, but did not uſe Agriculture. Their *Khân*, in the Time of *Jenghîz Khân*, was called *Tayyan*, who, with his Son *Kuchluk*, was ſlain by that Conqueror. *Gaubil* informs us, that they were contiguous to the *Moguls*, near the City of *Helin* (or *Karakuran*) to the North of the great ſandy Deſart. At preſent they are ſettled near the *Sira Mûran*, to the North-Eaſt of *Peking* [e]. 1665. Abu'lghâzi Khân.

11. THE *Kara-its* [f], that is, *ſwarthy*, ſo called from the ſwarthy Complexion of ſeven Brothers, from whom they ſprung. *Korzakur Khân*, ſurnamed *Buſruk*, Son of *Margus-ili Khân*, was the Father of *Tayrel Khân*, to whom the Emperor of *Kitay* gave the Title of *Wang* [g]: He will be mentioned in the Account of *Jenghîz Khân* by the Name of *Wang Khân*. This is the famous *Ung Khân*, by *Marco Polo*, and other *European* Writers, denominated *Preſter John*, and repreſented as a Chriſtian King and Prieſt, without any Foundation that appears from any Hiſtory but their own. The *Kara-its* were Neighbours to the *Naymans*, and poſſeſſed a great Part of the Countries along the Rivers *Tula*, or *Tola* [h], and *Orghûn* [i]. The Kara-its.

12. THE *Ungutti* [k], that is, *Men well to paſs*: For, being ſituate near the *Chineſe* Wall, they had great Wages of the Emperors of *Kitay* to guard it, and its Gates. This Tribe, in the Time of *Jenghîz Khân*, conſiſted of about four thouſand Families, whoſe *Khân Alakus*, making an Alliance with that Monarch, contributed much to render the Conqueſt of *Kitay* eaſy, by going to meet him as he approached, and giving him a free Entrance by the Wall. The Ungutti.

13. THE *Turkaks*. This Word ſignifies *a Guard*, in the *Turkiſh*: For among the *Turks*, while one-half of the Night-Guard take their Repoſe, the other beat on ſomething, to ſhew they are on the Watch; and when they want to be relieved, call to thoſe at reſt, *Turkak*, that is, *get up, and beat*. *Tur* ſignifies *get up*, and *kak*, *beat*. This Tribe is very numerous [l]. The Turkaks.

WE come now to the *Mogul*, or *Mungl* Tribes, which are in all forty-five. The firſt of theſe are the *Vigurs* [m], who took their Riſe in the Time of *Ogûz Khân* [n], as hath been before related. They dwelt, at firſt, between the Mountains *Tugra Tubuſluk*, *Uſkun-luk-tugra*, and *Kut*, on the Weſt of the *Moguls* (from whom they ſeem to have been ſeparated by the Mountain *Kut*, or *Altay*.) As there are, in this Country, ten Rivers on one Side, and nine on the other, thoſe who ſettled about the former were called Vigûrs, or Oygûrs.

[a] Hiſtory of the *Turks*, &c. p. 36, & *ſeqq*. and 39. [b] *Souciet Obſ. Math.* &c. p. 186. [c] Perhaps the *Burats*, or *Brats*, ſtill inhabiting thereabouts. [d] See before, *p.* 401. a; and *Souciet*'s *Obſ. Math.* p. 148, 160, & *ſeqq*. [e] See *Souciet*, as before, *p.* 185. Alſo the Map of *Tartary* ſubject to *China*. [f] Written *Kerit*, and *Krit*, by *Europeans*. [g] In the Tranſlations, *Aunak*; and by *European* Writers, no leſs faultily *Ung*. [h] Then called *Kollanuar*, according to *Bentink*. Hiſtory of the *Turks*, &c. p. 76. [i] *Gaubil*'s Hiſtory of *Genghiz*, p. 4. note 6. [k] Perhaps the ſame as *Onhiot*, and *Ankût*. [l] Hiſtory of the *Turks*, &c. p. 38, & *ſeqq*. [m] *Wigûrs*, *Igûrs*, or *Oygûrs*. [n] If ſo, how could they be now exiſting, ſince we are told none of the *Moguls* eſcaped the Slaughter made in the Army of *Il Khân*, except *Kayan* and *Nagos*.

Un

Tartar Tribes.

Un Vigûrs, and ſuch as dwelt along the latter, *Tokos Vigûrs* [a]. Theſe two Tribes, conſiſting of more than an hundred and twenty Branches, poſſeſſed a great Number of Towns and Villages, yet had no *Khâns*; till at length falling-out, the firſt elected a Prince, called *Mangatati*, to whom they gave the Name of *Il-ittar*; and the ſecond choſe another, whom they called *Il-irghin*. Their Deſcendants had the ſame Title: But an hundred Years after, the two Tribes coming to unite, had but one Sovereign, ſtiled *Idikut*; which, in *Turkiſh* ſignifies, *ſent by the Spirit* [b], but, in the *Uzbek* Tongue, *a free, independent Perſon*.

Their Branches.

THEY lived, thus united, two thouſand Years, in the above-mentioned Mountains: When a new Difference ariſing, they ſeparated, for good and all; one Part of them going to dwell on the Banks of the River *Irtiſh*. Theſe laſt, dividing again into three Branches, one went and dwelt in *Biſh-balik* [c], and cultivated the Lands about it: The ſecond diſperſed themſelves in the Neighbourhood of that City, feeding on their Cattle: And the third Branch continued on the *Irtiſh*, living by fiſhing, and hunting of Sables, Caſtors, Martens, Squirrels, and other Beaſts. They fed on their Fleſh, and clad themſelves with their Skins, which had always been their Cloathing.

BANERZIK IDIKUT, their *Khân*, ſubmitted to *Jenghîz Khân*, to ſecure himſelf againſt *Kavar* [d], *Khân* of *Turkeſtân*, and every Year ſent him conſiderable Preſents. He joined the Conqueror alſo, when he went to attack *Mohammed Karazm Shâh*.

And Learning.

As many of the *Vigûrs* were ſkilled in the *Turkiſh* Language, and expert in Writing, *Jenghîz Khân* made-uſe of them, in all his Expeditions, as Secretaries to the Chancery: In which Quality alſo, his Deſcendants, who reigned in *Mawara'lnahr*, and *Perſia*, uſed them for a long Time [e]. On this Occaſion, it may be obſerved, that the *Vigurs*, or *Oygurs*, were the only People in *Great Tartary* who had the Uſe of Characters, which were the ſame with thoſe now uſed in *Tibet*, where they are called Characters of *Tangût* [f].

The Ur-mankats.

THE *Ur-mankats*. They lead much the ſame Courſe of Life with their Nameſakes beforementioned [g]. Theſe are deſcended from *Ogûz Khân*, which is all that is ſaid of them [h].

IT has been already remarked, that the Deſcendants of *Kayan* took the Surname of *Kayat*; and thoſe of *Nagos*, that of *Durlagan*, or *Nagoſſer*; which occaſioned them, in a little Time, to loſe their true Names. The Tribes mentioned as ſprung from them, are thirty-eight in Number: Thirty derive their Pedigree from *Kayan*, and five from *Nagos*.

THE Tribes deſcended from *Kayan* are the following. 1. From the three Sons of *Alanku* ſprung a numerous Tribe, ſurnamed *Nirkha*, that is, *a pure Family*, in the *Mogul* Language, in Memory that the Founders of it were begotten without any Commerce with Man, as hath been before related [i]: Elſewhere it is ſaid they took the Surname of *Niron* [k].

2. THE *Kunkurats*, or *Kankrats* [l], are ſprung from the Son of *Zurluk Mergan*. They dwelt along the River *Kalaſſui* [m], in the Time of *Jenghîz Khân*, to whom their *Khân Turk-ili*, who was his Relation, went over [n].

3. THE *Burkuts*; and 4. the *Kurla-uts*, formerly inhabited along with the *Kunkurats*, who are related to them.

5. The *Ankarah*; and 6. the *Alaknuts*, are deſcended from the two Sons of *Kabay Shiray*, Brother of *Zurluk Mergan*. *Ulun*, the Mother of *Jenghîz Khân*, was of the latter.

7. THE *Kara-nuts*, are ſprung from *Karanut*, eldeſt Son of *Buſuday*, third Brother of *Zurluk Mergan* [o].

8. THE *Kurlas*, one of the moſt eminent Tribes among the *Moguls*, are ſprung from *Kurlas*, Son of *Meyſir-ili*, Son of *Konaklat*, Son of *Buſyuday*, youngeſt Brother of *Zurluk Mergan*. It is divided into many Branches, who have the Surname of *Niron*. 1. The *Kataguns*, deſcended from *Boſkum Katagum*, the eldeſt of *Alanku*'s three Sons. 2. The *Zalzuts*, from *Boſkin Zalzi*, ſecond Son of *Alanku*. 3. The *Bayzuts*, from *Baſſikar* and *Hurmalankum*, Sons of *Kaydu Khân*. 4. The *Zipzuts*, from *Zapzin*, *Baydu Khân*'s third Son. 5. The *Irighents*, from *Zapzin* alſo. 6. The *Zenas*, ſurnamed *Nagos*, but different from the *Nagoſſer*. They ſprung from *Kauduzena* and *Olekinzena*, Sons of *Hurmalankum*. 7. The *Butakins*, from *Butakin*, eldeſt Son of *Tumana Khân*, Grandſon of *Kaydu Khân*. 8. The *Uruths*, from *Uruth*, ſecond Son of *Tumana Khân*. 9. The *Mankats*, from *Mankat*, *Tumana*'s third Son. Theſe are nicknamed *Kara Kalpaks*, by the *Ruſſians*, and poſſeſs, at preſent, the Weſtern Half of *Turkeſtân*, with the City of that Name [p]. But *Kyrillow*'s Map makes the

[a] *Un* ſignifies *ten*, and *Tokos*, *nine*, in *Turkiſh*. Perhaps the *Utrigores*, and *Kotrigores*, of the middle Greek Hiſtory. [b] *Idi*, *being ſent*; and *kut*, *Spirit*. [c] *Biſhbalig* was in *Little Bukharia*, near the City of *Turfa*. [d] Rather, perhaps, *Gur Khân*. [e] Hiſtory of the *Turks*, &c. p. 13, & *ſeq.* 31, & *ſeqq.* and 46. [f] *Gobil in Souciet. Obſ. Math.* p. 146. [g] See *p.* 414. [h] Hiſtory of the *Turks*, &c. p. 38. [i] See *p.* 41. [k] Hiſtory of the *Turks*, &c. p. 46, and 58. [l] And *Kongorats*. [m] Now *Orkhon*, according to *Bentinck*. [n] Hiſtory of the *Turks*, &c. p. 48, 52, and 75. [o] The ſame, *p.* 48, 52, & *ſeq.* [p] The ſame, *p.* 575.

Kara-kalpaks, and *Mangats*, distinct Tribes. 10. *Badurghins*, from *Samkazun*, third Son of *Tumana Khân*. 11. The *Budats*, from *Batkilti*, *Tumana*'s fourth Son. 12. The *Burlas*, or *Berlas*, from *Yedemzi-burlas*, Son of *Kazuli*, *Tumana*'s sixth Son. Of this Tribe was the great *Timûr-beigh*, or *Tamerlan*. 13. The *Kayums*, from *Udur Bayan*, seventh Son of *Tumana Khân*. 14. The *Vilots*, from *Balzar*, *Tumana*'s eighth Son, called *Oglan*, or the *Lame*, because he halted. 15. The *Bassuts*, or *Yessuts*, from *Olzingan*, ninth Son of *Tumana*. 16. The *Kayats*, from the six Sons of *Kabul Khân*, in whom, being strong Men, and great Warriors, the Name of *Kayat*, which had been in a Manner unknown for above three thousand Years, was revived. 17. The *Borzugan Kayats*, sprung from the five Sons of *Yessughi Bahâdur Khân*, of whom *Temughin*, afterwards *Jenghiz Khân*, was the eldest. They were all of a fair Complexion, inclining to Yellow, with a red Circle between the Black and White of their Eyes; which Kind of Eyes the *Moguls* call *Borzugan*, whence their Descendants took that Name [a].

9. The *Ilzigans*, from *Ilzigan*, Brother of *Kurlas*, Son of *Meysir-ili*.

10. The *Durmans*, that is, *four*, in the *Mogul* Language [b], are descended from the four eldest Sons of *Bizin Kayan Khân*; who in Resentment of the Election of *Kipzi Mergan Khân*, pursuant to the Will of their Father, left the Country: But their Descendants, in Process of time, came and dwelt in the Dominions of *Kipzi Mergan*. From these are descended two Tribes. 1. The *Barians*, from one of that Name. 2. The *Sukut*, from the Son of a *Durman*, by a She-Slave; who coming before her Time, through the Abuse received from the Wife, went and hid it among Shrubs, called in their Language, *Yulgun*; but by the *Moguls*, *Sukut* [c]; where the Father finding the Child next Morning, he gave it the Name from them.

The Tribes of the *Nagosler*, or *Durlagans*, descended from *Nagos*, are five.

1. The *Bayuts*, are divided into several Branches, the most considerable of which are the *Sadaghin Bayuts*, and *Makrim Bayuts*; so called from the Rivers *Sadaghin* and *Makrim*, on the Borders of which they inhabit, being Neighbours to the *Virats*.

2. The *Jalayrs* [d], are a very ancient Tribe: They were formerly scattered over a great Extent of Country, and had many Princes; till the *Kitayans*, having declared War against them, they were obliged to come closer together, to be in a Capacity to assist one-another. Their Families were so numerous, that they spread-over seventy different Provinces [e], which they called, in their Language, *Kuran*; and the greater Part of them dwelt in a Quarter of the *Moguls*, called *Uman*. But the Emperor of *Kitay* having defeated, and carried-away a great Number of them [f], the rest fled, and were reduced to live on Roots. 1665. Abu'lghâzi Khân.

This happened in the Reign of *Dutumin Khân* [g], Father of *Kaydu Khân*; who going to be married in another Country, left his second Brother, *Mutulun*, to take-care of the House, and his seven other Brothers. These going one Day to a very level Spot of Ground, near their Habitation, where they used to perform their Exercises and Tournaments, they found the *Jalayrs* digging for Roots; which rendered the Place unfit for their Diversions. Having informed *Mutulun* hereof, he repaired thither with a strong Force, and put the *Jalayrs* to Flight: But the latter returning to the Charge, after great Loss, at length overcame *Mutulun*, killed him, and his seven Brethren, ruined their Habitations, and put to the Sword all their Subjects who fell-into their Hands. *Their Distress.*

KAYDU Khân being informed of this Misfortune, returned home forthwith, and sent to demand of the *Jalayrs* their Reason for killing his Brothers. The *Jalayrs* terrified at the Message, sent five of the Ringleaders, with their Wives and Children, to the *Khân*, to dispose of them as he thought fit: But he was content to keep them as his Slaves, which proved of good Account to him: For they served him faithfully, and took the Surname of their Master, their Descendants continuing in the Service of his Posterity to the fourth Generation; some of them having had ten, twelve, and even twenty Families for their Portion. In the Reign of *Jenghiz Khân* the other *Jalayrs* took the Name of their Captive Brethren [h]. *The* Kaydu Jalayrs.

Besides the *Mogul* Tribes before-mentioned, there are nine others: But it is uncertain whether they are sprung from *Kayan*, or *Nagos*.

1. The *Markats*. *Tokta-beghi Khân*, of this Tribe, was always at Variance with *Jenghiz Khân*. One Time, in his Absence, he carried-away his Wives and Subjects, with all that fell- *The* Markats.

[a] History of the *Turks*, &c. p. 49, 59, 60, & *seq.* [b] But in the Language of the *Eluths*, or *Kalmûks*, it is *four*, according to *Strahlenbergh*'s Table of Dialects. [c] Hence it looks as if the *Durmans* had a Language of their own, different from the *Mogul*. [d] Or, *Chalayrs*: In the Translations *Jalaghirs*, doubtless by a wrong Reading. [e] Or, Districts. [f] Perhaps, into *Karchin*, to the North of *Pe-che-li*, where at present the *Chalayr* inhabit. [g] Grandfather of *Jenghiz Khân*, in the seventh Generation. [h] History of the *Turks*, &c. p. 49, 52, & *seqq.*

1163. Jenghîz Khân. into his Hands. Another Time lying in Ambuſh for *Jenghîz Khân*, he made him Priſoner, as he was taking a Walk: Whoſe Ranſom coſt his Subjects a large Sum of Money.

The Umma-uts, 2. THE *Umma-uts*, formerly called *Urma-uts*. From them are derived four Tribes. 1. The *Kunakhmars*, ſprung from a Perſon of that Name. *Menglik*, ſurnamed *Izka*, or *the Devout*, for his Piety and Virtue, was of this Tribe, and married the Widow *Ulun-iga* [a], Mother of *Temujin*, or *Jenghîz Khân*, who was then but thirteen Years of Age. Some Years after *Vang Khân* [b] of the *Kara-its*, ſent to propoſe killing *Temujin*, and dividing his Poſſeſſions between them. This was to be done at the Time of a Viſit *Vang Khân* was to make to *Menglik*. Soon after he gave *Temujin* an Invitation, under Pretence of treating about a Marriage between his Daughter, and the other's eldeſt Son. *Temujin*, who frequently viſited him, as having been an Intimate of his Father's, immediately ſet-forward with only two Domeſtics: But meeting on the Road with his Father-in-law, who informed him of *Vang Khân*'s Treachery, he returned, and ſo eſcaped that Snare. 2. The ſecond Branch of the *Umma-uts*, is the *Arlats*, ſprung from *Arlat*, ſecond Son of *Menglik Izka*, by his firſt Wife. 3. The *Kalkits*, from *Kalkit*, third Son of *Menglik*; ſo named, becauſe he could not ſpeak plain. From the *Kalkits* are derived, 4. the *Kiſhliks*, ſo called from *Kiſhlik*. This Man, who with his Brother *Baydu*, kept the Horſes of a great Lord belonging to *Vang Khân*'s Court, having overheard his Maſter bid his Wife get ready his Arms, for that the *Khân* intended to invade *Temujin* unawares; and being ſprung from the *Moguls*, reſolved to acquaint him with the Plot: For which Service *Jenghîz Khân* made them, and their Deſcendants for nine Generations, *Tarkun* [c]; which frees them from all Sorts of Taxes.

And Branches.

The Viſhuns. 3. THE *Viſhuns*. 4. The *Suldus*. And 5. The *Oklians*: Of whom nothing more is mentioned, than that they are Branches of the *Moguls* [d].

SECT. XI.

The Reign *of* Jenghîz Khân. *From* Abu'l-ghâzi Khân.

1. *His firſt* Actions, *and reducing the* Mogul Tribes.

The Tribes revolt: Reduced at length. Vang Khân's *Obligations: His Treachery defeated: Quite overthrown, and ſlain.* Jenghîz Khân *proclaimed: Attacked by the* Naymans: *Defeats them: Conquers* Tangût: *Kills* Bayruk Khân. Jamuka *put to Death. The* Vigurs *join him.*

JENGHIZ KHAN was born in the Country of *Blunyulduk* [e], in the Year of the *Hejra* 559 (of Chriſt 1163) called *Tongûz*, or *the Hog*, by the *Moguls*. He brought into the World a Piece of coagulated Blood in his Hand, which was looked-on as a Preſage of his conquering many Countries. He was named, at his Birth, *Tamuzin* [f]. When his Father *Yeſſughi Bahâdur Khân* died, between thirty and forty thouſand Families, all from the ſame Stock, were under his Obedience; beſides, ſeveral Tribes paid Tribute. But *Tamujin* being only thirteen Years old, the *Tayzuts* firſt, and then two Thirds of the reſt, deſerting him, went-over to *Burgu Kariltuk*; all the *Kataguns*, the *Zipzuts*, the *Joygherats*, and the *Nirons*, joined him to a Man: Hereupon the *Markats*, who never would ſubmit to *Yeſſughi Bahâdur*, ſubmitted to him. They who continued faithful to *Tamujin*, were the Deſcendants of his Great Grandfather, be the Tribe of the *Mankats*, and ſeveral Families of the other Tribes; there remaining, out of ſome, fifty Families, out of others one or two hundred, and out of ſome only five or ten. However, by Degrees, *Temujin* reduced the Revolters to their Obedience.

IT is true, he did all he could to remedy the Evil at the Beginning, and fought a bloody Battle with them, although ſo young: But as it was not deciſive, he was obliged to temporize till in the fortieth Year of his Age; when being informed, that the *Bayzeuts*, *Markats*, and *Tartars*, intended to ſurprize him, he encamped with his thirteen Tribes, conſiſting of three thouſand Men, placing the Baggage and Cattle in the Middle. In this Poſture he expected the Enemy: But, on their Approach, ranged his Forces in a Line, the better to cover the Baggage by ſo large a Front; and having, in this Manner, engaged them, gained a compleat Victory. Five or ſix thouſand were ſlain; and many Priſoners being taken, he ordered the principal Revolters to be thrown headlong into ſeven Cauldrons of boiling Water: Then marching to their Habitations, he ſacked them, and carried away the Men, Cattle, and every Thing found of uſe. He condemned the Children of the principal Men of the Tribes to Slavery, and recruited his Troops with the reſt, which augmented them.

[a] Otherwiſe called *Ulun-kuzin*. [b] Or, *Wang Khân*, the famous *Ung Khân*, of the *European* Writers. [c] Or, *Terkan*, as written by *De la Croix*. I. Wood Sculp.

Vol. IV Plate 27 p. 23.

SOON after; one *Jamuka zizen* [a], of the *Joy-* a *gherat* Tribe, came to inform *Sungun* [b], Son of *Vang Khân*, or *Tayrel Khân*, of the *Kara-its*, that *Tamujin* had invited *Tayyan Khân* of the *Naymans*, and *Bayrak Khân*, to make War on them. *Vang Khân* was ſenſible *Tayyan Khân* bore him an old Grudge: But conſidering the conſtant Proofs he had received of *Tamûjin*'s Friendſhip to that Time, he could not give Credit to the Informer; and as he lay under great Obligations to *Tamujin*'s Family, was reſolved not to b be the firſt Aggreſſor. On this Occaſion it muſt be obſerved, that the five Sons [c] of *Korzakur*, after his Death, quarrelling about the Succeſſion, the eldeſt and youngeſt joined againſt the other three, who were defeated. *Yakakara*, the Chief of the Party, by the Aſſiſtance of the *Naymans*, in his Turn drove-out *Tayrel*, who fled to *Yeſſughi Bahâdur Khân*; and by his Aid was again reinſtated: But refuſing to divide the Inheritance among his Brothers, their Uncle *Kavar Khân*, c Brother of *Korzakur*, to whom *Yakakara* had retreated, obliged him, a ſecond Time, to fly for Refuge to the Father of *Tamujin*; and *Yeſſughi* coming to his Succour a ſecond Time, ſlew *Yakakara*, who fell into his Honds, and put *Tayrel* once more in Poſſeſſion; to which Service he owed his future Power and Riches.

FOR all this *Vang Khân* fearing the active Spirit of *Tamujin*, reſolved, at length, to deſtroy him, and ſent to invite him to his Reſidence, under d Pretence of an Alliance by Marriage, deſigning there to put him to Death. This having been confirmed five or ſix Days after, by the Information of *Badu*, as hath been already related [d], *Tamujin* ſending the Women and Children, Cattle, and other Effects, to a Place called *Balzuna balak* [e], remained with about two thouſand five hundred Men, which were all he could get together in haſte. *Vang Khân* drawing nigh, at Sun-riſe, at the Head of twelve thouſand Men, *Tamujin*, by e Advice of *Koyuldar Zizen*, a *Mankat*, lay in Ambuſh with one half of his People; ſo that the Van of the Enemy being attacked both in Front and Rear, was preſently routed. *Vang Khân* advanced, with his Son, at the Head of a great Body of Troops to ſupport them; but was ſo roughly attacked himſelf, that *Sungun* having received a great Wound in the Face with a Pike, all the reſt fled [f].

TAMUJIN content with the Honour of the f Victory, thought fit to retreat before all the Enemies Forces came-down upon him. There being but little Water at *Balzuna balak*, he marched to the River *Kalaſſui* [g], where, at his Invitation, the *Kunkurats*, under *Turk-ili*, joined him. Thence removing to the *Kollanuaer* [h], he ſent an Envoy to *Vang Khân*, to put him in Mind of what he owed to his Father, and the Proofs of Friendſhip he himſelf had given on five or ſix different Occaſions. *Vang Khân* acknowledged the Obligations, but as the War had been commenced at the Inſtance of his Son, he referred the Envoy to *Sungun*; who, in Reſentment of his Wound, would hear of no Accommodation. After this, *Tamujin* tried many Ways to bring them to a Peace: But finding it in vain, he ſet-forward, with all his Troops, in Queſt of them; who coming to meet him with a numerous Army, after a bloody Battle, were obliged to abandon their Dominions and Subjects to the Victor. 1202. Jenghîz Khân.

VANG KHAN reſolved to fly for Refuge to *Tayyan*, *Khân* of the *Naymans*: But in the Way falling into the Hands of two Lords of that Tribe, who knew there had been always much Animoſity between their *Khân* and him, they killed him, with all his Attendants, and carried his Head, as a Preſent, for their *Khân*; who blamed the Action, ſaying, "That being a "great Prince, and venerable for his Age, they "had better ſerved for his Guard, than Execu- "tioners;" and to honour his Memory, had the Head enchaſed in Silver, and placed on his own Seat, with the Face towards the Door. *Sungun* hid himſelf, for ſome Time, among his own Subjects: But finding diligent Search was made after him, he retired to the Town of *Khateen* [i], then poſſeſſed by *Kalizohara*, a Lord of the *Kal-ach*; who, inſtead of protecting, put him to Death, and ſent his Head, Wife, Children, and the reſt of his Effects, to *Tamujin*. *And ſlain.*

AFTER this Event, all the leſſer neighbouring Tribes putting themſelves under his Power, he began to grow formidable. In the Year 599 (1202) being forty Years old, all the *Mogul* Tribes who had ſubmitted to him, acknowledged him for their *Khân*, in the Country of *Naumankura*, where he then reſided, and gave them a great Feaſt. At this Solemnity, one *Kokza* (Son of *Menglik Izka*) ſurnamed *the Image of God*, becauſe in Winter he went bare-footed, and very thin of Cloaths, pretended, that he was ſent from God, to tell him, that thenceforth he Jenghîz Khân *proclaimed*,

[a] That is, *Jamuka the Eloquent*, in the *Mogul* Tongue. By others, *Chamuka*. [b] By others, *Ilaka Sangun*. [c] They were *Tayrel*, afterward *Vang Khân*, *Yakakara*, *Baytimut*, *Numiſſay*, and *Zukanibu*. [d] See before, p. 418. d. [e] *Baljuna*, or *Paljuna Balak*. [f] Hiſtory of the *Turks*, &c. p. 63, 66, & *ſeqq*. [g] Now *Orthon*. [h] Now the River *Tola*. [i] *Khoton*, or *Hoton*, towards *Kaſhgar*.

1212. Jenghîz Khân.

should assume the Name of *Jenghîz* [a] *Khân*, and that all his Posterity should be *Khâns*, from Generation to Generation. He gave-out also, that a white Horse came to him from Time to Time, and carried him to Heaven [b], where he conversed with the Deity.

Attacked by the Naymans,

MEAN-TIME *Tayyan*, *Khân* of the *Naymans*, sent to invite *Alakus*, Chief of the *Unguts*, to join his Forces, and attack *Jenghîz Khân*: But *Alakus* not only refused, but discovered his Proposal to that Prince; who immediately consulting with the Heads of his Tribes, what was to be done, they were of Opinion, that nothing farther could be undertaken, till their Horses had recovered the Fatigue of their last Expedition. Hereupon *Daritlay Olingan* [c], offering to furnish the whole Army with Horses, the War against the *Naymans* was resolved-on, and the Troops assembled, without Delay, in the Year 600, (1209.) *Zena Noyan* being sent to get Intelligence, seized a *Nayman*, who informed him that *Tayyan Khân*, after joining the *Markats*, *Virats*, and *Joygherats*, had passed the River *Altay* [d], and made forced Marches, in order to surprize *Jenghîz Khân*.

Defeats them.

HEREUPON this Prince set-forward, and after many Days March, being informed that the Enemy were in Sight, gave the Command of the right Wing of his Army to his Brother *Zuzikar*, and that of the Left to his Son *Zuzi*, placing himself in the Center; in which Order he caused the Attack to be made. *Tayyan Khân* happening to be dangerously wounded at the Beginning of the Battle, retired out of the Fight; and after a great Slaughter had been made on both Sides, finding Fortune likely to declare for his Enemy, sent to desire his Chiefs to surrender at Discretion, to *Jenghîz Khân*: But they, to avoid ill Treatment, chose rather to fight to the last Man. The wounded *Khân* striving to escape by Flight, died by the Way: But his Son *Kuchluk* got safe to *Bayrak*, another *Khân* of the *Naymans*, who was his Father's eldest Brother.

Conquers Tangut,

IMMEDIATELY after the Battle, *Jenghîz Khân* returning, put his Troops into Winter-Quarters; and in Spring 1210, entered the Country of the *Markats*, whose *Khân*, *Toktabeghi*, had retired to *Bayrak Khân*. Having reduced that Tribe, and recruited his Army out of it, he marched towards the Capital of *Tangut*, whose *Khân*, a very aged Prince, shut himself up in the Capital of the same Name, refusing to surrender: But *Jenghîz Khân* having, after a Siege of several Weeks, taken it by Assault, caused the *Khân* to be put to Death, and the Walls of the City to be demolished. He subdued some other Towns thereabouts, and then returned to his own Dominions [e].

IN the Spring following, he set-out in Quest of *Bayrak Khân*. Being arrived at the Place of his Residence, he understood, that he was gone a-hunting some Days before. On this Advice, he followed him with all the Haste he could; and having taken him Prisoner, ordered his Head to be stricken-off. *Kuchluk*, and *Tokta-beghi*, *Khân* of the *Markats*, being informed of this, by one who escaped, they fled towards the *Irtish*, whither *Jenghîz Khân* went in Search of them in Spring 1212. In his Approach to that River, *Konaka beghi*, Chief of the *Joygorats*, and *Arslân*, *Khân* of the *Karliks*, who dwelt thereabouts, submitting, led him to the Retreat of those Princes, who getting News of his Approach, fled; but pursuing them close, *Toktabeghi* was taken, and put to Death. *Kuchluk* escaped into *Turkestân*, where he was received with great Distinction by *Kaver*, *Khân* of *Kara Kitay*, who gave him his Daughter in Marriage.

ON *Jenghîz Khân*'s Return, the *Kerghis*, with their *Khân*, *Urus-inal*, submitted. *Jamuka-zizn*, who after the Death of *Vang Khân*, had retired to *Tayyan*, *Khân* of the *Naymans*, some Time after *Tayyan*'s Death, returned to his Tribe, the *Joygherats*: But they considering, that *Jenghîz Khân* was not only then their Master, but of the same Blood with themselves, and that *Jamuka* had been the Cause of the Ruin of *Vang Khân*, and *Tayyan Khân*, their former Masters, they carried him, bound, to the Conqueror, who ordered him to be drawn Limb from Limb: In the Midst of his Torment, he declared, that if ever *Jenghîz Khân* had fallen into his Hands, he would have put him to the same Death.

THE *Vigûrs*, with their *Khân Idikut*, lived under the Protection of *Kavar*, *Khân* of *Turkestân*; who sending a Lord, called *Shuwakom*, in Quality of *Deroga* [f], or Intendant of the Policy, to take Cognizance of their Affairs, they looking upon it as an Incroachment, persuaded their *Khân* to have that Officer killed, and seek the Protection of *Jenghîz Khân*; who received him with great Marks of Affection, and gave him his Daughter in Marriage [g].

KAVAR KHAN, before called *Nusi Tayghirili*, having in 573 (1177) been driven-out of *Kara Kitay*, by the *Khân* of *Jurjut*, retired among the *Kerghis* (where many Revolters from that Country against the Emperor of *Kitay* had retired before) and thence to *Imil*, a City of *Kitay*. Two Years after, *Illik Khân*, who reside

[a] The Author observes, that the Word *Jin*, in the *Mogul* Tongue, signifies *Great*; and *ghîz*, the Superlative, makes *most great*. Hence, as *Bentink* remarks, the *Moguls* call the Sea, *Jenghîz*, to express its vast Extent. [b] This Story seems to be copied from the Fable of *Mohammed*'s *al Borak*. [c] Called also *Daritlay*. *bulay*. [d] Now *Siba*, according to *Bentink*. [e] History of the *Turks*, &c. p. 75, & *seqq*. [f] The *Deroga*, among the *Turks*, is like the Mayor of a City. [g] History of the *Turks*, &c. p. 84, & *seqq*.

at *Yalaſagun* [a] (called by the *Moguls*, *Kambalik*, a or *Good-Town*) reſigned to him the Sovereignty, for his Aid againſt the *Kanklis*. Then aſſuming the Title of *Kavar Khân*, or *great Lord*, he conquered the Cities of *Andijan*, *Taſhkant*, and *Turkeſtân*, made *Samarkant* tributary, and *Vighis* [b], *Khân* of *Urgenz*, to pay twenty thouſand Gold Dinars yearly; which his Son *Soltân Mohammed* refuſing, he brought him to Reaſon. The Fugitives from *Kara Kitay* left the *Kerghis* their Pillagers, and built a Town in *Atil* Country, increaſing, by Alliances, to forty thouſand Families [c].

2. *Conquers the Empires of* Kitay, *or* Katay, *and* Karazm.

Invades Kitay: *Ruins ſeveral Provinces: The Capital taken:* Kuchluk *taken, and put to Death.* Soltân Mohammed *concludes a Peace: Perfidiouſly breaks it:* Jenghîz Khân *invades him: Bravery of* Zuzi: *The* Soltân's *Remiſſneſs.* Bukharia *invaded.* Bokhara *taken.* Otrar *beſieged: The Gariſon ſlain. Slaughter at* Saganak. Timûr Malek's *Bravery.* Samarkant *taken: The Gariſon ſlain.*

Ki- THIS Prince having now reduced the whole Nation of the *Moguls* to his Obedience, reſolved to revenge on *Altun* [d], *Khân* of *Kitay* [e], all the Injuries both he, and his Anceſtors, had received from that Monarch. Having propoſed the Affair to the Heads of Tribes, they adviſed him to ſend *Zakhireja*, one of his Officers, as Ambaſſador, to ſummon *Altun Khân* to ſubmit; and, in Caſe of Refuſal, to threaten War. The *Kitayan*, at this Propoſal, fell-into a Paſſion, ſaying, *You think, perhaps, you have to do with one of your petty* Turkiſh *Tribes*; and promiſed to be ready for his Maſter. The Ambaſſador, in his Return, obſerved all the Rivers, Roads, and Avenues, to the Frontiers of *Kitay*; which *Jenghîz Khân* entring, he took ſeveral Towns in Sight of *Altun Khân*, burnt ſome, and put moſt of the Inhabitants to the Sword. A General being ſent to ſtop his Progreſs, and ſurprize him, was himſelf attacked by the *Moguls*, when he thought them far-enough off, and intirely defeated: After which the Victor falling unexpectedly on the great Army of *Altun Khân*, ſlew thirty thouſand Men, and obliged that Monarch to ſhut himſelf up in *Khân-balik* [f].

IN order to gain Time, *Altun Khân* was adviſed to make Peace with his Enemy, and offer him a Daughter in Marriage; which *Jenghîz Khân* accepting, retired. After which, the *Khân* of *Kitay* finding all the Northern-Provinces of his Empire were ruined, left his Son at *Khân-balik*, and went to reſide at *Namkin* [g]; which his Father had ſtrongly fortified with a triple Wall, forty Leagues in Compaſs: It was built by the Side of a great River, and took-up a b whole Day to paſs by Barge from one End to the other. *Altun Khân* having, before his Departure, cut-off the Heads of ſome Lords of *Kara-kitay*, the *Kara-kitayans* [h] were much diſguſted: Some of them deſerted, with their Effects, to *Jenghîz Khân*; as did one of their Lords, after ruining ſome Cities of *Kitay*; who having been well-received, many others followed his Example. 1216. Jenghîz Khân.

FIVE or ſix Months after *Altun Khân*'s De- *The Capital taken.* c parture to *Namkin*, his Son repaired thither, to acquaint him with the bad Condition of their Affairs on the Frontiers. Mean-time *Jenghîz Khân* being informed, that the Empire was rent by Factions, ſent *Jamuka Bahâdur*, and *Maſkun Bahâdur*, two of his Generals, to make a new Irruption, whoſe Army, on the Frontiers, was conſiderably reinforced by Deſerters from *Kara-kitay*. *Altun Khân*, to ſupply *Khân-balik*, ſent ſome thouſand Camels laden with Corn, under d Convoy of two Generals: But being met-with by the *Moguls*, they were defeated, and themſelves, as well as the Proviſions, taken: Which Diſaſter ſo affected the Emperor of *Kitay*, that he poiſoned himſelf. At the Approach of the Enemy, *Khân-balik* ſurrendered, without Oppoſition. The imperial Treaſure was carried to the Reſidence of *Jenghîz Khân*; who afterwards arriving in Perſon, took moſt of the other Cities, into which he put Gariſons; and having em- e ployed five Years in this Expedition, returned to his own Dominions.

IN his Way, he went and beſieged *Akaſhin*, a Kuchluk City in *Tangût*; which he ſubdued, with the *taken*, neighbouring Country. Afterwards he intended to go and finiſh the Conqueſt of *Kitay*; but was diverted by the Advice he received, that the Tribes, which till then had refuſed to acknowledge him, had ſubmitted to *Kuchluk*, as their *Khân*: Who afterwards, under Pretence of ſome ill-Uſage, and at the Inſtigation of *Mohammed*

By the firſt, meaning, perhaps, the Provinces of *China* within the great Wall; and, by the latter, the Country of *Tartary* without the Wall.

Shâh

1217. Jenghiz Khân.

Shâh of *Karazm*, seized the better Half of *Kavar* a *Khân*, his Father-in-law's Dominions, by Surprize. At the same Time *Kudath*, Brother of *Toktabeghi*, coming among the *Naymans*, began to make Disturbances. Hereupon *Jenghiz Khân* sent *Suida Bahâdur*, and *Kamu Tusbazar*, against *Kudath*; whom he defeated, which put an End to the Sovereignty of the *Markats* in 613 (1216.) The *Tumats*, who had committed some Hostilities in his Absence, were severely handled by *Burgu Noyan*. Against *Kuchluk*, who appeared a b more formidable Enemy, *Zena Noyan*, the most experienced of his Generals, with a numerous Army, which the *Khân* met with superior Forces: But they were all cut to Pieces, except a few, who fled with *Kuchluk*: *Zena* pursued so closely, that he came-up with him, at last, in the Country of *Sarakol*, before he could get to *Badagshân*, whither he posted, and there put him to Death [a].

And put to Death.

Soltân Mohammed

AFTER this, *Jenghiz Khân* sent *Makinut* c *Yalauzi* in Embassy to *Soltân Mohammed Karazm Shâh*, to tell him, that having conquered all the Dominions, from the East to his Frontiers, he desired, in order to perpetuate the good Understanding which subsisted between the two Empires, that he would acknowledge him for his Father, and he would consider the *Shâh* as his Son. The *Soltân* taking the Ambassador aside, and making him a Present of a magnificent Scarf, which he then wore, adorned with Jewels, asked d him, was it true, that his *Khân* had conquered *Kitay*? *Makinut* answered in the Affirmative, adding, that he would soon find it so, in case he came to have any Difference with him. At this Answer, the *Soltân* fell-into a great Passion, saying, "I know not what your *Khân* means by "sending me Word he had conquered so many "Provinces. Do you know of how great Ex-

Concludes a Peace,

"tent my Empire is, or on what Grounds your "Master pretends to be greater than I, expect- e "ing I should honour him as a Father, and be "content to be treated as his Son? Has he then "so many Armies?"

THE Ambassador, to pacify him, said, he knew the *Soltân* was more powerful than his Master: That there was as much Difference between them, as between a true Sun, and a mock one; but that the *Khân*'s Intentions were very good. *Mohammed* being mollified with this Flattery, consented to every Thing which the Am- f bassador proposed. Whereupon *Jenghiz Khân* resolved to live in Peace with him, although *Nasser*, *Khalifah* of *Baghdad*, wrote to induce him to declare War against the *Soltân*; and this Union continued, till dissolved in the following Manner.

JENGHIZ KHAN having, to encourage Trade, provided for the Safety of Merchants, great Numbers resorted to his Dominions from the neighbouring Countries. One Time those of *Mawara'lnahr* arriving, the *Khân* sent for some of their Goods: But they set such an exorbitant Price on them, that he returned them, and sent to other Merchants of the same Country; who being informed of what had passed, left the Price to the *Khân* himself. This so pleased him, that he not only paid them double the Value, but gave them Liberty to trade in his Camp, without making Presents to the chief Men. At their Departure, he sent four hundred and fifty of his Subjects to trade in *Soltân Mohammed*'s Dominions, accompanied by three Persons, in Quality of his Ambassadors. Being arrived at *Otrar* [b], they went to salute *Gaghir Khân* [c], the Governor, who was Cousin-German to the *Soltân*'s Mother. The Merchants also paid their Compliments, and offered him Presents. But one of them, who had been formerly an Intimate of the Governor's, happening, undesignedly, to call him by his former Name, *Inalzik* [d], he was so provoked, that causing both the Ambassadors and Merchants to be arrested, he sent Notice thereof to the *Soltân*; insinuating, that he had strong Reasons to believe they were not what they pretended to be, but were come on some ill Design. Hereupon *Soltân Mohammed*, without farther Enquiry, gave Orders, that they should be put to Death; which was accordingly executed, and their Effects were confiscated for his Use.

JENGHIZ KHAN being informed of this infamous Massacre, by one of the Merchants who escaped the Slaughter, fell-into an extream Rage, and sent to tell the *Soltân*, "That since, "by such an execrable Action, he had broken "all the Engagements which were between "them, he declared himself, from that Instant, "his mortal Enemy, and would make a most "rigorous War upon him." Accordingly having assembled his Troops forthwith, he detached his Son *Zuzi* with a good Body towards *Turkestân*, in order to dislodge the Friends of the late *Kuchluk Khân*. *Soltân Mohammed* having, on his Side likewise, assembled all his Forces, marched by *Samarkant* to *Khojend* [e], to meet *Jenghiz Khân*. Here being informed, that *Zuzi* was marching from *Turkestân*, he took the same Road; and being arrived on the Frontiers of that Country, turned-off towards the *Kabli*, in order to cut-off his Retreat; and coming between that River and the *Kamzi* [f], found several slain, whom *Zuzi* had killed. On this doubling his Speed, he came-up with him next Morning.

As the Prince was not strong enough to en-

[a] History of the *Turks*, &c. p. 88, *& seq.* [b] Otherwise called *Farab*. [c] *In D'Herbelot, Arekhani, Art. Mohammed Khowarezm Shâh.* [d] *In D'Herbelot, Anialhak.* [e] In the Translations, *Khodsan*, or *Khojan*. [f] According to *Bentink*, *Kabli* and *Kamzi* are two little Rivers that come from the North North-East, and fall into the *Sir*, or *Sirth*, at the Foot of the Mountains that separate *Turkestân* from the Country of the *Eluths*, or *Kalmûks*.

counter

counter ſo great an Army as the *Soltân*'s, his Generals adviſed him to retreat: But he was for halting. "What, ſaid he, will my Father and "Brothers ſay, if I ſhould fly in Sight of the "Enemy? It would, on all Accounts, be bet-"ter to ſtand our Ground, and fight bravely, "than be ſlain in running-away. You have "done your Duty, in admoniſhing me of the "Danger we are in: I am now going to do "mine, by trying to bring you out of it with "Honour." Hereupon he led his Troops chearfully to the Charge. In the Height of the Confuſion, he pierced two or three Times through the Enemy's Ranks, and encountering *Soltân Mohammed*, gave him ſeveral Stroaks with his Sword, which the other parried with his Buckler. The *Moguls*, animated by the Example of their Prince, did Wonders; ſo that the *Soltân*'s Army would have fled, if he had not called-out to them only to hold-out a few Minutes, ſeeing the Night, which advanced apace, would put an End to the Conflict [a].

ZUZI conceiving he had ſufficiently diſcharged his Duty, retired in the Night, ordering Fires to be lighted throughout the Camp, to conceal his Retreat. Next Day the Enemy thinking he ſtill waited for them, marched-out again, to renew the Fight: But finding he had decamped, they retired likewiſe; and the *Soltân* perceiving, by this Sample, that he had to do with rough Gameſters, diſtributed his Troops into the Gariſons, ſaying; if *Jenghîz Khân* has a Mind to make War with me, he may come, and look for me. After this, he returned to the Place of his Reſidence [b], and gave himſelf up to Debauchery. In his Cups, it ſeems, he killed a *Sheikh* (reputed very holy) on Suſpicion of having had an amorous Commerce with his Mother, *Turkân Khâtun*; for which the *Mohammedan* Doctors could never forgive him [c].

In 615 (or 1218) *Jenghîz Khân* took the Field, in order to penetrate into *Great Bukharia*. Being joined, in his Way, by *Arſlan*, *Khân* of the *Karliks*; *Idkikut*, *Khân* of the *Vigûrs*, who inhabited the Country of *Biſhbalik*; and *Saknak*, Lord of the Country of *Amalik* [d]; he marched firſt on the Side of *Otrar*: But underſtanding that there was no Army to oppoſe him in the Field, he detached his Sons, *Oktay* and *Jagatay*, to beſiege that City: *Zuzi* was ſent to *Najan*, *Alan-noyan* and *Suktu-buka*, two of his Generals, to *Parnakant* and *Kojend*; while himſelf, and *Taulay*, with the Groſs of his Army, continued his March to *Great Bukharia*. They encamped under the Walls of *Sarnuk*, the firſt Town he met in his Way, with ſo terrible an Outcry, that the Inhabitants, in a Fright, ſhut their Gates; but opened them to the Conqueror on a proper Summons; who gave it the Name of *Kutlukbalik*. Thoſe of *Nur* not ſurrendering at the firſt Summons, were plundered of all, but their Cattle and Corn. 1219. Jenghîz Khân.

THE firſt of *Rabial'akhir* [e], in 616 (1219) he arrived before *Bokhara*, the Capital of *Great Bukharia*; which was defended by twenty thouſand Men, under three Generals. Theſe having been repulſed with great Loſs, in a Sally they made in the Night, on his Approach, fled-out of the oppoſite Gate, hoping to eſcape by Favour of the Darkneſs: But a Detachment of *Moguls* overtaking them at the River *Amû* [f], cut them all to Pieces. The Citizens ſeeing themſelves deſerted, ſurrendered next Morning. *Jenghîz Khân* entring on Horſeback into the great Moſk, aſked, merrily, *if that was the* Soltân's *Palace?* Being told it was the Houſe of God, he alighted, and mounting the Gallery, where the *Mollahs*, or Prieſts ſit, threw the *Korân* under the Feet of his Horſes. As ſoon as he was ſeated, his Soldiers fell to eat and drink in the Middle of the Temple. He left the Inhabitants in Poſſeſſion of all Goods that were not concealed: But underſtanding afterwards, that many of the *Soltân*'s Soldiers remained in *Bokhara*, he ordered all that were found to be ſlain, and the Town to be fired: So that the Houſes being moſtly of Wood, all were conſumed, except a few, that were of Brick, and the *Soltân*'s Palace, built with Stone, which they called *Ark*. A little before his Death, he ordered the City to be rebuilt. Bokhara taken.

MEAN-TIME *Oktay*, and *Jagatay*, arrived before *Otrar*; where *Gaghîr Khân* had ſhut himſelf up with ſixty thouſand Men. After the Siege had continued five Months, *Karaza-hajib*, a General under him, propoſed capitulating. *Gaghîr*, after the Provocation given the *Moguls*, durſt not truſt himſelf in their Hands; and the other finding he had become liable to Suſpicion by ſuch a Step, in the Night cauſed the Gate *Darvaſi-ſoſi*, of which he had the Guard, to be opened, and retired, with the ten thouſand Men under his Command, to the Enemy's Camp: But the Princes reflecting, that ſuch a Traitor was not to be truſted, ordered him, with all his Troops, to be ſlain, and then entered the Town. Otrar beſieged,

GAGHIR KHAN, who retired into the Caſtle with twenty thouſand Men [g], incommoded the Beſiegers extreamly by continual Sallies: But The Gariſon ſlain.

[a] Hiſtory of the *Turks*, &c. p. 97, *& ſeqq.* [b] Which was *Urgenz*, or *Jorjaniyah*, called *Great Korkanj*, after the Time of *Jenghîz Khân*, by the *Perſians*; and *Orkang*, by the *Moguls*. [g] All the reſt of the Gariſon, being driven out of the Town, were put to the Sword.

the

Mogul Empire.

the Princes redoubling their Efforts, took it at a length with Sword in Hand, and cut the Throats of all the Garison. The Governor seeing all was lost, retired, with two Men, into his Apartment, and there defended himself desperately. The two Men being also killed, and wanting Arrows to shoot at those who strove to get-up to the Place where he was, he defended himself a long Time with Stones, which his Wife brought him. At length being taken, he was imprisoned, loaded with Chains, and pursuant to *Jenghiz Khân*'s Orders, the Princes then marching to join their Father, caused him to be put to Death at *Kuksaray*.

Slaughter at Saganak.

ZUZI KHAN leaving his Father's Army, advanced to *Signak* [a], whose Inhabitants killed the Envoy sent to summon them. This so enraged him, that he never gave-over assaulting the Town till he took it, and then caused the Throats of ten thousand Citizens to be cut. Leaving the Son of that Envoy for Governor, he marched towards *Usgan* [b]; whose People, made wise by the Sufferings of *Signak*, came-out with Presents to resign the Town, and had nothing touched. But *Astash* and *Najan*, for resisting, suffered severely; especially the latter, whose Inhabitants, were all driven-out, and those who offered Violence to his Envoy put to the Sword [c].

Siege of Khojand.

THE Generals *Alan Noyan*, and *Suktu-buka*, having arrived at *Farnakant* [d], took it, after a Siege of three Days, put the Garison to the Sword, and made Slaves of the Inhabitants. Thence they marched to *Khojan* [e], situate on a River, which makes an Isle before the Town, where there was a Castle of extraordinary Strength. Here the Governor, *Timûr Malek*, posted himself with a thousand choice Men, and from four covered Boats, with Port-Holes on the Sides, galled the *Moguls* continually with their Arrows. The Generals puzzled how to come-off with Honour, at last resolved, with Stones, to form a *Jettee*, or Bank in the River, which might be useful in attacking the Fort. This Work was performed by the Captive Inhabitants of *Farnakant*, in Spite of the Opposition given by *Timûr Malek*; who hereupon taking to the Boats with his Men, let himself drive-down the Stream.

Timûr Malek's Bravery.

THE *Mogul* Generals ordered him to be pursued by a large Detachment, who were content to observe his Motions; imagining he could not escape them, because a Chain was drawn across the River at *Farnakant*. But *Timûr Malek* arriving there, found Means to cut it, and pass safely. However, at length coming to a Place which was extreamly shallow, as well as narrow, he quitted his Boats, and endeavoured to escape by Land: But the *Moguls* quickly overtaking him with their Horses, killed all his Followers: With much-ado he singly got-off; and seeing himself hotly pursued by three of the Enemy, let-fly an Arrow (of which he had only three left) against the *Mogul* who pressed him most, which wounding him in the Eye, so scared them all, that they followed him no farther. Coming in this Manner alone to a neighbouring Town, belonging to *Soltân Mohammed*, he gathered, in haste, a small Body of Men, with which he surprized *Farnakant*; and having cut the Throats of the *Mogul* Garison, repaired to his Master, who amply rewarded his Fidelity.

MEAN-TIME *Jenghiz Khân* prepared to besiege *Samarkant*; of which the *Soltân* having had Advice, he sent thither an Army of an hundred and ten thousand Men, with a great Number of Elephants, under the Command of thirty Generals. These drew round the Town a broad Ditch, which they dug till they came to Water, and encamped behind it, as an Intrenchment. On the Conqueror's Approach, who had been joined in his March by his Sons, and Generals, the Enemy made a furious Sally; but having been repulsed, after a bloody Action, the *Khân* encamped next Day under the City-Walls, and gave a general Assault, which lasted from Morning till Evening, without gaining an Inch of Ground. But the Night following, the Head of the Law and *Kadhi* [f] of the City, falling-out with the *Soltân*'s Troops, submitted to *Jenghiz Khân*, and opened one of the Gates, by which the whole *Mogul* Army entring, put all the Garison to the Sword, except one thousand, who escaped. The *Khân* ordered the Town to be pillaged, and made his General a Present of thirty thousand of the Inhabitants, with their Wives and Children, whose Number was infinite. He pardoned the rest, paying him a yearly Tribute of three hundred thousand Gold Dinars.

Grand Hunting-Match: The Khân *returns:* a *His Death, and Burial: His Character, and Prudence: His Wives, and Children.*

AFTER the Conqueſt of *Great Bukharia*, *Jenghiz Khân* ſent his three Sons, *Zuzi*, *Oktay*, and *Jagatay*, with a numerous Army, to attack the Capital of *Karazm*; where *Khamar*, *Mogul*, *Hajib*, and *Feriduni Gheri*, four of the principal Lords of *Soltân Mohammed*'s Court, had ſhut themſelves up, with a good Body of b Troops. The Van-Guard of the *Moguls* arriving unexpectedly, took moſt of the Cattle belonging to the Town; whoſe Inhabitants thereupon made a Sally with ten thouſand: But the Van-Guard retiring leiſurely, drew them into an Ambuſh near a Garden; ſo that ſcarce an hundred eſcaped: After which marching as far as the Suburbs, they put to the Sword all they found in Arms, plundered, and ſet Fire to it. Next Day the whole Army ſat-down before the City, and c beſieged it in Form. At the End of ſeven Months, the *Moguls* detached three thouſand Men to turn the River *Jihûn* from the Town, in order to cut-off their Water: But the Inhabitants having had timely Notice of it, ſent-out a larger Body, who put them all to the Sword.

WHAT hindered the Taking of the City, was the Diſſenſion that happened among the three Princes, who croſſed one-another's Deſigns. *Jenghiz Khân*, on Advice thereof, gave the d chief Command to *Oktay*; who immediately ordering a general Aſſault to be given, took the City, and ſet it on Fire. More than an hundred thouſand Inhabitants were put to the Sword in the firſt Fury of the Victors, the reſt were commanded to quit the Place, and condemned to Slavery; whoſe Number was ſo great, that each Soldier had twenty-four to his Share.

JENGHIZ KHAN, at the Time he detached his Sons to *Karazm*, marched himſelf e from *Samarkant* to *Nakſhab*; which ſurrendring on Summons, he proceeded to *Termed* [a]. This City defended itſelf; but being taken by Aſſault, all the Inhabitants were put to the Sword, except an old Woman, who offered a large Pearl to ſave her Life. Being aſked where it was, and confeſſing ſhe had ſwallowed it, they ripped-open her Belly; where finding the Pearl, they ripped the Bellies of all the Slain, expecting to meet with Jewels in them.

FROM thence the Conqueror led his Army to *Balkh*, which was then ſo large, that it had in it twelve hundred great Moſks, beſides ſmall Chapels, and two hundred public Baths. On his Approach, the City offered to capitulate; but the *Khân* would not conſent to it, being of Opinion, that while *Soltân Mohammed* lived, he could not depend on the Inhabitants; whom, after taking the Town, which was none of the ſtrongeſt, by a general Aſſault, he put to the Sword, and demoliſhed the Walls. 1219. *Jenghiz Khân.*

AFTER this, he ſent his Son *Taulay* [b], with a numerous Army, to attack the City of *Khoraſân*; which having taken, with ſeveral others, he went and joined his Father before *Talkhân*. This putting the *Khân* in a Condition to make a general Aſſault, the Place was taken, at laſt, and all put to the Sword. *Anderâb* was ſubdued, and treated after the ſame Manner. From thence he marched to *Bamian*, which made an obſtinate Defence. Here a Son of *Jagatay*'s, whom *Jenghiz Khân* was very fond of, being killed, it threw him into ſuch a Rage, that he inſtantly ordered a general Aſſault to be given; and having thus taken the City, cauſed all the Inhabitants to be ſlain, without ſparing one Soul, and razed it to the Ground, ordering the Place where it ſtood to be called *Maubalik*, or *the unlucky Town*. *And other Cities.*

ZENA Noyan, *Suday Bahâdur*, and *Togazar Kantaret*, three of the *Khân*'s faithful Generals, having been detached from the Camp before *Samarkant*, with thirty thouſand Men, in Purſuit of *Soltân Mohammed*, who had paſſed the *Amu*, at length arrived at *Herat* [c]. *Soltân Khân Malek*, who commanded, ſent to tell them, he was a Servant of *Jenghiz Khân*. Whereupon they continued their March: But *Togazar* being of Opinion, that fair Words from an Enemy are not to be confided in, gave an Aſſault to the City, in which he was repulſed, and ſlain with an Arrow. About the ſame Time, our Hero had ſent thirty thouſand Men more, under five Generals, to cut-off the Communication between *Ghazna* [d], *Saghil*, *Kabûl*, and the other Dominions of *Soltân Mohammed*. *Kutuktu Noyan*, with a Party of theſe Troops, being advanced towards *Herat*, and underſtanding that *Soltân Khân Malek* was encamped not far from him, with Troops going to join *Soltân Jalal-addin* [e], reſolved to attack him next Morning: But *Malek* ſlipped-away in the Night [f]. *Khoraſân invaded.*

TABAZIK, and *Malkaw*, two other of the Generals, miſſing their Aim, within a Trifle, f of ſurprizing *Saghil*, beſieged it in Form: But the young *Soltân* being joined by *Malek*, fell-on them ſo unexpectedly, that he obliged them to fly, with the Loſs of a thouſand Men. He even purſued *Kutuktu Noyan*, whom the other two *The Moguls defeated.*

[a] In the Tranſlations, *Termis*. [b] Or, *Tuli*. [c] Or, *Heri*, the Capital, at preſent, of *Khoraſân* in *Perſia*. [d] In the Tranſlations, *Gaſmien*. [e] In the Tranſlations, *Dſalatudin*. He was Son of *Soltân Mohammed*. [f] Hiſtory of the *Turks*, &c. p. 114, *& ſeqq.*

Mogul Empire.

went to join; and forcing him to a Battle, which laſted from Morning till Evening, obliged him alſo to quit the Field, although he was near gaining it by a Stratagem: For having ordered all the Felt-Bonnets and Cloaks that were in the Camp to be ſtuffed with Straw, and ranged behind on the Baggage-Horſes and Camels, as a Kind of ſecond Line; the Enemy believing it to have been a Reinforcement, would have fled for Fear, if *Soltân Jalâl-addin* had not aſſured them it was only a Trick of *Kutuktu Noyan*'s; which having rouſed their Courage, they fell with ſuch Impetuoſity on the *Moguls*, that few eſcaped, beſides the three Generals.

Soltân Jalal-addin's Bravery.

SOON after, *Soltân Khân Malek*, and *Saif-addin Malek*, two of *Jalal-addin*'s Generals, quarrelling about a Horſe, the former returned to *Herat*, and the latter retired, with the *Kanklis*, into the Province of *Kirmân* [a]. As for the *Soltân*, being informed, that *Jenghiz Khân* was coming-upon him with his whole Forces, he marched to gain the River *Sîr Indi* [b]. The *Khân* arriving unexpectedly before *Ghazna*, the City, through Fear, ſubmitted. There learning, that *Jalâl-addin* had departed but fifteen Days before, by making double Marches, he came-up with him, before he croſſed the *Indi*, and in the Night placed himſelf between the River and the Prince, in order to cut-off his Paſſage. The *Soltân*, next Morning, perceiving himſelf ſurrounded by the *Moguls*, reſolved to fight, though he had only a Handful of Men. But finding, after the Battle had laſted from Sunriſe till Noon, that moſt of them were ſlain, he made a laſt Effort to break through the Enemy; and having gained the Bank of the River, ſpurred his Horſe, which being vigorous, carried him ſafe-over in View of the *Moguls*. *Jenghiz Khân*, who was extreamly pleaſed with this Action, ſaid, that *the Title of* HAPPY *might juſtly be given to the Father who had ſuch a Son*. However, he detached *Dubay Noyan*, and *Bala Noyan*, to purſue him: But having followed him in vain to the Frontiers of *India*, they returned.

Soltân Mohammed flies,

AFTER the Death of *Togazar Kantaret*, before *Herat*, his Troops went and joined *Zena Noyan*, and *Suday Bahâdur*, who turned that Way: But the Inhabitants declaring, they had no Hand in what had happened, the *Mogul* Generals marched to *Niſhabûr* [c], which they ſummoned to ſurrender. The four Lords, who commanded there, promiſing to deliver-up the City as ſoon as they had overcome *Soltân Mohammed*, who was fled from thence to *Kaſbin*, they went in Purſuit of him. In their Way, according to their Inſtructions, they treated, with much Kindneſs, all the Towns which opened their Gates; but ſhewed no Mercy to thoſe which conſtrained them to make-uſe of Force, like the City of *Mazanderan*, and *Rudbin*, whoſe Inhabitants had all their Throats cut for reſiſting them. *Ilan* [d], being ſtrongly ſituated, was left untouched for this Time. On the News of the Enemy's Approach, *Soltân Mohammed* retired to *Karendar*, having narrowly eſcaped a Party of *Moguls*, after his Horſe had been ſhot under him. From thence he fled to *Iſtadura* in *Ghilan* [e]; from whence he embarked on the *Kulſum* [f] for *Aboſkun* [g].

THE *Moguls* perceiving he had eſcaped them, returned, and beſieged the Town of *Karendar*; which being taken, after a vigorous Reſiſtance, the *Soltâna* of *Soltân Mohammed*, and his Son *Gayath-addin* [h], fell-into their Hands. Thence they went, and inveſted *Ilan*, ſituate in ſo rainy a Climate, that although there were neither Wells in the Town, nor Rivers in its Neighbourhood, yet it never wanted Water, till the *Moguls* ſat-down before it; from which Time it ceaſed raining: So that at the End of forty Days the Inhabitants were obliged to capitulate. This was no ſooner done, than it began to rain in ſuch Plenty, that the Streets were all overflowed. Here they found a vaſt Quantity of Jewels, and other Riches, beſides the Mother and Children of *Soltân Mohammed*, whom they ſent to *Jenghiz Khân*, who cauſed them all to be ſlain on the Spot. The *Soltân*, overcome with ſuch an afflicting Piece of News, dropped-down dead: And of all the immenſe Riches which he poſſeſſed before, there not being enough left to bury him honourably, they were obliged to inter him in the Cloaths he died in; which happened in the Year 617 (1220) after a twenty Years Reign.

AFTER the Reduction of *Ilan*, *Zena Noyan* and *Suday Bahâdur*, marched towards the Provinces of *Arrân* [i], and *Adherbijân* [k]; which having ſubdued, they marched to *Shamakiya* [l], where meeting with Reſiſtance, they treated the Inhabitants with Rigour. Proceeding thence for *Darbend*, their Guides led them by a Road

[a] The *Perſian Karamana*. [b] Or, *Indus*. [c] Called alſo *Iran Shahr*, and *Aber Shahr*, a City of *Khoraſân* in *Perſia*. [d] By the Order of mentioning theſe Places, it muſt have lain between the other two. [e] Or, *Kilan*: It is a maritime Province of *Perſia*, on the South-Side of the *Caſpian Sea*: But we meet with no Place there called *Iſtadura*. [f] Or, the *Caſpian Sea*. [g] A Peninſula near the City of *Aſtarabâd*, at the South-Eaſt Corner of the *Caſpian Sea*. [h] In the Tranſlations, *Kiaſudin*. [i] *Arân* contains great Part of the ancient *Armenia*. [k] The ancient *Atropatene*, or *Media Atropatia*. [l] The Capital of *Shirvân*, *Perſia*, on the Weſt-Side of the *Caſpian Sea*.

where the *Kipjâks* and *Allans* lay in Ambuſh to a
ſurprize them. The *Mogul* Generals, to avoid
this Danger, ſent rich Preſents to the *Kipjâks*,
exhorting them not to aſſiſt Foreigners to fight
againſt thoſe of their own Blood. This Meſſage
had ſuch an Effect, that they ſeparated from the
Allans, Part of whom were cut to Pieces, and
the reſt made Slaves.

THE *Kipjâks*, however, diſtruſting thoſe Re-
lations, retired towards the *Urûſes* [a], and being
joined by them, returned to meet the *Moguls*. b
Theſe pretending Fear, fled before them for ten
Days; till having drawn them into a very ad-
vantageous Place in the Country of the *Cher-
kes* [b], they faced-about, and charged them briſk-
ly. The Fight laſted ſeven Days, in which
Time the *Moguls* having killed the greater Part
of the Enemy, carried the reſt into Slavery; and
returned through the Country of the *Kipjâks*, to
meet *Jenghîz Khân* on the Frontiers of *Great
Bukharia* [c].

HAVING before barely mentioned *Taulay*'s
Expedition into the Province of *Khoraſan*, we
ſhall here relate ſome Particulars of it. The
City of that Name was then very fair, and its
Inhabitants ſo wealthy, that they preſerved them-
ſelves in a Sort of Independency. The City of
Maru [d], not far from it, was alſo very power-
ful: But on the Invaſion of the *Moguls*, *Soltân
Mohammed* wrote to *Baſhâh al Molk*, the Gover-
nor, not to oppoſe *Taulay*, but get the beſt d
Terms he could from him. The Governor, on
this, retired to *Waſir* [e]; which *Taulay* being in-
formed of, he ſent Troops to take Poſſeſſion of
the City. At their Approach, *Sheikh al Iſlam*,
Father of *Baſhâh al Molk*, came, and preſented
the Keys to the Generals; who, ſatisfied with
this Submiſſion, retired. Soon after, *Baſhâh Turk-
mân*, who had retreated with Part of the Gari-
ſon to the Mountains, returning, the Govern-
ment of *Marû* was conferred on him. About e
the ſame Time, *Maſar al Molk*, who had been
Governor before *Baſhâh al Molk*, hearing that
Soltân Mohammed was dead, made haſte to *Marû*,
where *Baſhâh Turkmân* denied him Admittance:
But a few Days after getting-in by Stealth,
Turkmân, for Peace-Sake, generouſly reſigned
him the Command.

SOON after, *Baſhâh al Molk*, leaving *Waſir*,
went into *Mazanderân*, and informed the *Mogul*
General of what had paſſed at *Marû*; under-
taking to reduce it, provided they would ſpare f
him ſome Troops. Accordingly, they let him 1221.
have ſeven hundred; but underſtanding, at ſome Jenghîz Khân.
Diſtance from *Marû*, that *Maſar* had augmented
his Forces to eighty thouſand Men, he durſt not
paſs any farther, but ſent two Officers with a
Letter of Summons. The Governor, inſtead
of ſurrendering, killed thoſe Officers; which ſo
enraged the other *Moguls*, that they ſlew their
Commander, and turned back.

WHILE *Maſar* was rejoicing at *Baſhâh*'s Death, *Taken, and*
the Governor of *Amuya* [f], who was a *Turkmân* *plundered.*
Chief, arrived with an Account, that the *Moguls*
were at Hand; and going back to prevent their
Paſſage of a River, was there killed. On New-
Year's-Day 618 (1221) *Taulay* ſat-down before
the City with his whole Army. The Siege ha-
ving laſted three Weeks, that Prince, who began
to be impatient, reſolved to give a general As-
ſault. He placed thoſe, who were armed with
Bucklers, in the Front; and having divided the
c reſt into two hundred Troops, led them to the
Attack. *Maſar al Molk*, ſeeing them ready to
give the Onſet, deſired to capitulate, and went,
with grand Preſents, to make his Submiſſion to
Taulay. This Prince having ſeized the Treaſure,
and what was of Value in the Place, cauſed all
the Inhabitants to go-out into the Plain [g]; where
all who were not Traders, being ſeparated from
the reſt, were put to the Sword, to the Number
of an hundred thouſand, as they were reckoned,
d by his Order. That was the fourth Plundering
Marû had undergone, loſing fifty or ſixty thou-
ſand Inhabitants each Time.

FROM *Marû*, *Taulay* marched to *Niſhabûr*;
and having taken it, put every Soul to the
Sword. From thence he turned toward *Herat*, Herat *taken,*
where *Malek Shams-addîn Mohammed* had armed *and ſpared.*
near one hundred thouſand Men for its Defence;
and on being ſummoned to ſurrender, killed the
Mogul Meſſenger. After this, he made a furious
e Sally, which he continued to repeat for ſeven
Days ſucceſſively, with ſo great Havock on both
Sides, that the Blood ſtreamed like Rivers, and
Taulay loſt ſeventeen hundred Officers: But the
eighth Day, after a long and obſtinate Fight,
Malek happening to be mortally wounded with
an Arrow, his Men diſpirited, retired with Con-
fuſion into the City, the *Moguls* entering with
them at the ſame Time. The Prince who headed
them, took-off his Helmet, and called-out to the
f Inhabitants to ſurrender, letting them know, that
he was the Son of *Jenghîz Khân*, and promiſed

[a] Or, *Ruſſians.* [b] Or, *Chirkaſſians.* In the Tranſlations, *Zerkas.* [c] Hiſtory of the *Turks*, &c. p. 44 & ſeqq. [d] This muſt have been *Marû Shahjan*, on the River *Morgab*. It is one of the four Capitals of *Khoraſân*, having been the Seat of ſeveral Monarchs, eſpecially of the *Seljûk* Family. There is another *Marû* to the South, called *Marû al Rudh*. [e] A Town of *Karazm*, on the Borders of *Khoraſan*. [f] Called alſo *Zam*, a City on the River *Amû*, or *Jihûn*. [g] They were ſo numerous, that they were four Days paſſing it.

Mogul *Empire.*

they ſhould be well-treated, and pay but half-Taxes. Hereupon the People, who accepted the Offer, ranged themſelves on one Side; and the Soldiers, who refuſed it, on the other. But *Taulay* cauſing theſe laſt to be diſarmed, put them all to the Sword, and punctually performed his Word to the Citizens. After which, he joined his Father before *Talkhân*.

Revolting, is deſtroyed.

THE People of *Herat*, at firſt, behaved very well: But imagining, on the Succeſs of *Soltân Jalal-addin* againſt the *Mogul* Generals, which happened ſoon after, that Fortune would turn againſt them, they ſlew the Governor and Intendant of the Cuſtoms, whom *Taulay* had left there, and elected another. At this News, *Jenghîz Khân* chid his Son for ſparing them, and ſent *Ilziktey Noyan* forthwith to take Vengeance. That General being arrived before the City, divided his Army into four Bodies, of twenty thouſand Men each, and never ceaſed aſſaulting it in four different Places, till he had taken it, after ſix Days Attack. Of all the Inhabitants, he left but fifteen alive, and razed the Walls to the Ground. This happened in 619 (1222.)

Irân *reduced.*

JENGHIZ KHAN having brought all *Irân* [a] under his Obedience, and being informed, that the *Kitayans* began to riſe, he, in Spring 620, (1223) ſent his Son *Jagatay* towards *Ghilân*, in Queſt of *Soltân Jalal-addin*, who, by Report, was returned into *Perſia*; and *Ugaday*, or *Oktay*, towards *Ghazna* [b], to puniſh them for favouring his Enemies underhand, while he marched himſelf with *Taulay* towards *Turân* [c], the better to obſerve what paſſed in the Eaſt. *Ugaday* having deſtroyed *Ghazna*, and all its Inhabitants, quickly followed him. *Jagatay* took *Mangara*, and the reſt of the Towns in *Ghilân*, where he made great Havock: But hearing nothing of *Soltân Jalal-addin* in thoſe Parts, he marched alſo towards *Great Bukharia*.

The Bukhars *caſed.*

JENGHIZ KHAN, during his Stay in that Country, ſending for ſome of the learned *Bukhars*, aſked them ſeveral Queſtions concerning their Religion, and its Founder *Mohammed*. He approved of their Belief in the Unity of God, of their praying five Times a Day, faſting one Month in the Year, and giving the fortieth Part of their Subſtance to the Poor; but did not at all reliſh their going to *Mekka* to pay their Devotions: For as he was perſuaded, that God is preſent every-where, he thought it ridiculous for any Man to ſay, that one Place ſhould be fitter than another to adore him in. On this Occaſion the *Bukhars* obtained an Order from him, in Writing, that they ſhould not be charged with any Impoſts, without an expreſs Command from the *Khân* himſelf [d].

THE Preference which was given to *Ugaday*, in commanding at the Siege of the Capital of *Karazm*, had affected *Zuzi* the eldeſt Brother ſo ſenſibly, that he retired into *Daſht Kipjâk*; whoſe Inhabitants, as ſoon as they became acquainted with his Merit, voluntarily ſubmitted to him. Here he made Hunting, which he paſſionately loved, his chief Exerciſe; and as *Jenghîz Khân* had been informed, that there was Plenty of Game in that Country, he ſent from *Samarkant*, to deſire him to order them to be chaſed towards the Frontiers of *Turkeſtân*; deſigning to cauſe the ſame to be done on his Side, that he might divert himſelf, for ſome Time, by hunting in thoſe Quarters. *Zuzi* did not fail to obey this Meſſage, and knowing that his Father's Cavalry was in a bad Condition, he ſent him to remount them an hundred thouſand Horſes of various Kinds, as white, black, dappled-greys, brown-bays, and ſpotted, twenty thouſand of each; beſides magnificent Preſents to his Brothers, following himſelf in Perſon.

JENGHIZ KHAN having taken the Diverſion of Hunting with his Children, ſet-forwards towards his own Dominions. He was ſcarce arrived thither, when being informed, that *Shidurkû* [e], Governor of *Tangut*, had revolted, he marched that Way, with a numerous Army, and defeated his Forces, which were almoſt equal to his own. Then having quite deſtroyed the Country with Fire and Sword, he returned. As ſoon as he was gone, *Shidurkû*, who had taken Shelter in the City of *Tangut*, ſent an Envoy after him, to ſignify, that his Maſter was ready to wait on him, provided *Jenghîz Khân* would pardon what was paſt. The *Khân* received the Envoy with much Civility, and diſmiſſed him with very good Words; but put himſelf under no poſitive Engagement with regard to *Shidurkû*.

THE Envoy was ſcarce departed, before *Jenghîz Khân* fell into a great Diſorder; and finding that his End was near, he ſent for his Sons, and the Children of *Zuzi*, who was then dead, in Preſence of all the prime Officers of the Court; and after he had exhorted them to preſerve Union, and lay-aſide Ambition, he preſented *Ugaday* to them, as his Succeſſor in the Empire. His Will, in this Caſe, he at the ſame Time delivered to them in Writing; enjoining them all to conceal his Death till ſuch Time as they had puniſhed *Shidurkû*, and deſtroyed the City

[a] Or, *Perſia* at large. [b] In the Tranſlations, *Gaſmien*, rather *Ghaſnien*, or *Ghaſnen*, as *Teixeira*, and others, write. [c] *Turan* is the ſame with *Maowara'lnahr*, or all the Country to the North of the River *Jihon*. [d] Hiſtory of the *Turks*, &c. p. 133, & *ſeqq*. [e] *De la Croix* writes, *Shidaſku*.

Tangut

Tangut. Pursuant to this Order, having assembled a great Army, they went and besieged that Place; which falling into their Hands, after a very obstinate Resistance, they slew *Shidurku*, with a good Number of his Soldiers, and carried the rest into Slavery.

AFTER this Expedition, they published the Death of their Father, and caused his Corpse to be interred under a Tree, exceeding tall and strait, which he had chosen for the Purpose. Afterwards there grew-up a thick Grove of Trees about the Tomb, from which Time they called the Place *Burkhan Kaldin*; and all the Descendants of *Jenghîz Khân*, who since then have died in those Provinces, have been interred there. That Monarch died in the Year 624 (1226) aged sixty-five, and his Sons went three Months in Mourning for him.

HE was a Prince of great Genius, which partly appears by the Discipline he established among his Troops. He divided them, first into several Bodies of ten thousand, with each its Commander, called, from the Number of Men which composed them, *Tuman Agasi*. These Bodies were sub-divided into Battalions of a thousand Men each, with their respective Chiefs, named *Mini Agasi*: The Battalions into Companies of an hundred Men, under a *Gus Agasi*; and both these into Platoons of ten Men, each having its Officer, called *Un Agasi* [a]. All these Divisions were subordinate one to the other, and received their Orders from the Commander in Chief of the whole Body. He never let a worthy Action go without its Reward, or Virtue without Commendation: But punished, as rigorously, Vices and Crimes.

HE was not content to chuse strong Men for the Wars: It was necessary also, that they should discover some Parts, and out of these he made his Officers. So many good Regulations gave him an easy Conquest over the neighbouring Countries, where there was not the like Disposition. He used also, once a Year, to assemble all his Officers, as well civil as military, and examine if they had the Capacity requisite for the well Discharge of their Employments, never failing to bestow large Praises where they were due. In short, he put every Thing in such good Order, that it is impossible to recount all the Measures he took for that Purpose [b].

JENGHIZ KHAN had above five hundred Wives and Concubines. All his Wives were the Daughters of *Khâns*, or Princes; among whom, five were his Favourites. 1. *Borta Kuzin*, by whom he had four Sons. 2. *Kizu*, Daughter of *Altan Khân* of *Kitay*. 3. *Kariza*, the Widow of *Tayyan*, *Khân* of the *Naymans*. 4. *Milu*: And 5. *Singan*. These two last were Sisters, of a *Tartar* Family, and he married the younger after the Death of the elder. 1226. Jenghîz Khân.

THE four Sons, which the *Khân* had by *Borta Kuzin*, were *Zuzi* [c], *Zagatay* [d], *Ugaday* [e], and *Tauli* [f]. *Zuzi* was Comptroller of his Father's Houshold, or Court. *Zagatay* administred Justice, and heard the Complaints of his Subjects. *Ugaday* had the Management of the Treasury, and received the Accounts of the provincial Governors: And *Taulay* had the Care of all that related to the Affair of War. *And Children.*

BESIDES these four Sons, he had five more by his other Wives; amongst whom, and his other neareſt Relations, he distributed the principal Governments of *Kitay*: But he divided the Sovereignty of his hereditary Provinces and Conquests among his four eldest Sons; yet giving to his Successor the supream Authority over the rest [g].

SECT. XII.

A farther Account *of the* Conquests *of* Jenghîz Khân; *from the* Chinese Annals.

By Antony Gaubil, *Jesuit.*

Now first extracted from the French.

Use of this History. Defects of Abu'lghâzi's *supplied by the* Chinese. *Account of this Abstract.*

INTRODUCTION.

THE History of *Jenghîz Khân* gives such considerable Light into the Geography of *Tartary*, that we should have been under a Necessity of inserting it, in Case it had not recommended itself by its surprizing Events. *Alexander*, in the Compass of a few Years, founded a great Empire; but *Jenghîz Khân*, from nothing at all, acquired a much greater, greater than what the *Romans*, from the same small Beginning, conquered in seven hundred Years. Although *De la Croix* has written the History of this grand Monarch, extracted from the Oriental Authors; yet we chose to give it from *Abu'lghâzi Khân*, as the Person, who being himself a *Mogul* by Descent, and living on the Borders of *Tartary*, was best able to select the genuine Facts. *Use of this History.*

[a] *Aga* signifies Commander, and *Tuman*, or *Toman*, ten thousand: *Mini*, a thousand; *Gus*, an hundred; and *Un*, ten. [b] History of the *Turks*, &c. p. 143, *& seq.* [c] *Juji*, or *Chuchi*, as some write. [d] Or, *Jagatay*, and *Chagatay*. [e] Or, *Oktay*. [f] Or, *Tuli*. [g] History of the *Turks*, &c. p. 95, *& seqq.*

Introduction.

Defects of Abu'lghazi's

BUT it is obſervable, that the Account of this Author, however particular and exact, with regard to the Tranſactions of his great Anceſtor in the Weſt of *Aſia*, and Countries neighbouring to *Karazm*, grows obſcure, and imperfect, in Proportion as the Scene advances Eaſtward: And he ſeems to be no leſs unacquainted with the Country of the *Moguls* themſelves, than with *Kitay*, *Kara Kitay*, *Tangut*, and other Parts; of which he ſays ſcarce any Thing in Detail, or that may be depended on. It is chiefly with a View to ſupply this Part of *Jenghiz Khân*'s Hiſtory, and clear-up the middle Geography of *Tartary*, that we have added the following Account, according to the *Chineſe* Hiſtorians; who, by the Way, we ſhall find are as much at a Leſs for Memoirs relating to the Tranſactions of the *Moguls* in the Weſt of *Aſia*, as the Weſtern Hiſtorians were to what paſſed in the Eaſt: Which ſhews, that to compoſe a perfect Hiſtory of any great Empire, the Writers inhabiting the ſeveral Parts of it ought to be conſulted.

Supplied by the Chineſe.

THE *Chineſe*, who are, perhaps, more exact than any other People, in recording the Affairs of their own Nation, and thoſe they have to deal with, have been very copious in relating the Actions of *Jenghiz Khân*, and his Succeſſors, who reigned in *Tartary*, and in *China*, till their Expulſion in 1368; and as the Country of that Conqueror was contiguous on the North to their own, it may be preſumed, they were much better acquainted with every Thing that paſſed therein, than thoſe could be, who lived at a greater Diſtance. However, it muſt be obſerved, that the *Chineſe* Account, ſo far as relates to the Birth, Deſcent, and firſt Actions of *Jenghiz Khân*, agrees [a], in the Main, with that of *Abu'lghâzi Khân*. Of this Monarch, and his Succeſſors in *China*, *Gaubil* (one of thoſe Jeſuits, who, on Account of the Sciences, have been ſuffered at *Pe-king*, ſince the Expulſion of the Miſſioners in 1723) has tranſmitted the Hiſtory [b], extracted from the *Chineſe* Annals, and improved it with very curious Notes, ſerving chiefly to clear-up the Hiſtory and Geography of *Tartary* during that Period; which we find handled in ſo imperfect and confuſed a Manner by the Oriental Writers, as well as Weſtern Travellers.

OF this Extract, ſo far as relates to *Jenghiz Khân*, we have here inſerted an Abridgement, deſigning, on another Occaſion, to publiſh the Whole (which very well deſerves the Attention of the Curious) with Maps adapted to it, and other Improvements. The ſame Author, ſome Years before, ſent from *China* a brief Account of the five firſt *Mogul* Emperors, illuſtrated alſo with Notes [c], of the ſame Nature with thoſe annexed to his larger Relation. It may be proper farther to obſerve, that to make the Account in the Text more compleat, we have ſometimes inſerted the Subſtance of the Notes diſtinguiſhing them by Commas: And whereas *Gaubil* generally gives the Names of Perſons and Places in the Text, according to the *Chineſe* Orthography, or Uſage, and puts the *Mogul*, or other Names, in the Notes; we have changed that Method, and inſerted the latter in the Text, as being perſuaded it will be more agreeable and ſatisfactory to our Readers. Where there is no Change, it will generally appear by the Diviſion of the *Chineſe* Words into Monoſyllables. Whatever elſe has been added by us, either in the Text, or Notes, is inſerted between Hooks, or Crotchets.

1. Ching-kîz Khan's *Actions, till he received that Name.*

His firſt Actions: Gains great Reputation: Aſſiſts Vang Khân: *Confederacy againſt him, raiſed by* Chamuka. Whang Khân's *Inconſtancy. Plots againſt* Temûjen: *Reproached by that Prince, who forms a Confederacy, and defeats him. The* White Tata. Tû-que, *or* Turks. Tayyang *ſlain. Empire of* Hya, *Account of it.* Ching-kîz Khân *proclaimed.*

ABOUT the Middle of the twelfth Century, Prince *Yeſuka* [d], who governed the principal Hord of the *Mongols* [e], having made War on *Temûjen*, Chief of a *Tatar* Hord, took him Priſoner, and cut his Troops in Pieces. After this Expedition, his Wife *Ulun* brought-forth a Son [f], with coagulated Blood in his Hand, who was na-

[a] *Gaubil* obſerves, that the *Chineſe* Hiſtory relates the Story of *Alankora* (or *Alanku*) and the Genealogy of *Jenghiz Khân*, from *Pûtanchar* (or *Buzenjer*) in the ſame Manner as *D'Herbelot*, only varying the Names a little. Alſo that the Misfortunes of the Princeſs *Monolun*, are told nearly with the ſame Circumſtances. *Abregé Chronol.* in *Souciet*'s *Obſ. Math.* &c. p. 185. [b] Under the Title of *Hiſtoire de Gentchiſcan et de toute la dinaſtie des Mongous tes ſucceſſeurs, conquérans de la Chine; tirée de l'Hiſtoire Chinoiſe. Paris* 1739, in quarto, pp. 317. [c] Under the Title of *Abrege Chronologique de l'Hiſtoire des cinq premiers Emp. Mogules*; publiſhed by *Souciet*, in his *Obſ. Math.* &c. p. 185. The Whole takes-up only nineteen Pages. [d] *Gaubil* begins the Hiſtory of the *Mongols* with *Yeſukay*; becauſe the Emperor *Kublay* ſet him at the Head of his Anceſtors, in the great Palace appointed for the Purpoſe. [e] *Mongû*, in the Text. This Hord of *Monguls* was contiguous to that of the *Naymans* near the City of *Holin*, or *Kara-koram*, to the North of the ſandy Deſart, *Souciet*, p. 185. [f] According to the *Chineſe*, *Temûjen* was born in 1162, at the Mountain *Tey-wey Lewen-pan-to*, where *Yeſukay* encamped after the Battle near the River *Onon*.

med *Kyow-wen*; but in Memory of that Victory, his Father called him *Temûjen* [a]. Him, *Yesukay*, who died in the Flower of his Age, leaving five Sons, and a Daughter, nominated to be Chief of the Hord: But being young, his Mother governed in his Stead, and brought-back several of his Vassals who had gone-over to *Taychot* [b] and *Chamuka* [c]. These two Princes, who were Enemies to his Family, having chosen Soldiers out of seven Hords, and formed an Army thirty thousand strong, came to attack *Temûjen*, assisted by his Mother *Ulun*, who led a Body of Troops, and *Porji*, a young Lord of the Hord *Orla*, but thirteen Years old. After a bloody Battle, in which these three did Wonders, *Taychot* was slain, and *Chamuka* put to Flight.

THIS Action made a Noise all-over *Tartary*, greatly to the Advantage of the young *Mongul* Prince; who discovered, on this Occasion, much Grandeur of Soul, in the Manner of rewarding his Officers and Soldiers, making them ride his own Horses, giving them Habits, and the like. Almost all *Taychot*'s Hord, which was very numerous, and possessed a large Country, submitted to the Victor; and *Potû*, who was Lord of the Country [d] about the River *Ergona* [e], became his fast Ally, marrying his Sister *Temûlun*; after whose Death, *Jenghiz Khân* gave him his Daughter to Wife. The Hord of the *Tatars* (who usually encamped along the *Onon* [f]) having revolted against the Emperor of the *Kin*, he ordered all his tributary Princes to assemble near that River, and march against them. *Toli* [g], Lord of the *Kara-its* [h], and *Temûjen*, having distinguished themselves on this Occasion, the first was made *Wang* [i], or Regulo (whence his Subjects thenceforward called him *Wang-han*) and *Temûjen* had a great Post given him in the Army.

TOLI had a Brother, called *Ifankûla* [k]; who, in Discontent, fled to the *Naymans* [l], and prevailed on their King to attack him; whereby he was obliged to retire into the Countries subject to the Princes of the *Whey-hû*, to the West of the *Whang-ho*, or *Yellow River*. "These Princes of the *Whey-hû*, at first called *Whey-ke*, possessed the Territories to the North, or North-West and West of *Turfan* [m], and, "perhaps, to the South. They were Descendants of the *Whey-hû*, who, during the Dynasty of the *Tang*, were so powerful, and afterwards became *Mohammedans*: For which Reason the *Chinese* sometimes call all *Mohammedans*, *Whey-hû*, although their usual Appellation for them is *Whey-whey*." In this Distress *Temûjen* lent his Troops to *Toli*, who marching to the River *Tula*, defeated the *Merkites*, Neighbours and Allies of the *Naymans*: After which, joining *Temûjen*, both together fell-upon, and routed the *Naymans*. Although *Toli* got much Booty in these Actions, he gave none to his Benefactor, who yet concealed his Resentment [n]. 1202. Jenghiz Khân.

PRINCE *Chamuka* envying the Reputation of *Temujen*, stirred-up several Princes: The principal were those of *Hatakin*, *Sachihû*, *Kilupan*, and *Tatar*; who resolved to seize on him and *Toli*. *Te-in* [o], Lord of the *Honkirats* [p], who had been forced into the League, retired to his own Lands, and sent Notice to *Temûjen*, who had married his Daughter. Hereupon *Temûjen* and *Toli* took the Field, when least expected, and defeated the Confederates in several Battles. The *Monguls* were considerably reinforced by the Accession of the *Ulutay*, *Mangu*, *Chalar*, *Honkirats*, and *I-ki-lye-tse*. These five Hords, which furnished excellent Officers, and sprung from the five Sons of *Laching Patûr*, sixth Ancestor of *Te-in*, dwelt along the *Onon*, *Kerlon*, *Ergona*, *Kalka*, and other neighbouring Rivers. At this Time, *Temûjen* and *Te-in* made a Treaty, famous in the History of the *Mongols*, by Virtue of which the Chief of each Family was to take his first Wife out of the other; which Treaty was strictly observed, so long at least as the Descendants of *Temûjin* reigned in *China*. *Confederacy against him.*

IN 1202, *Chamuka* having assembled the Confederate Princes near the River *Tûlu-pir* [q], they elected him their Chief, and took an Oath to obey him. The League was exceedingly strengthened by *Pu-lu-yu* [r], King of the *Naymans*. *Temûjen*, assisted by the Princes of his House, and by his Allies, had in his Army four Generals, called *Palipankuli*, or, *the four Intrepids*, named *Mûhûli*, *Porchi*, *Porokona*, and *Chilakona* [s]. The *Raised by Chamuka.*

[a] Or, *Temuchin*. [b] *Tay-che-hû*. [c] Or, *Jamuka*. In the Text, *Cha-mu-ha*. [d] Afterwards said to be Lord of *I-ki-lye-tse* Hord. [e] See before, *p.* 357. [f] Or, *Wa-nan*, the same with the *Saghalian-ula*, *Amûr*. [g] By *Abu'lghâzi* called *Tayrel*. [h] In the *Chinese*, *Ke-lye*. [i] Which, according to the *Chi*ese History, answers to the *Tartar* Title of *Ko-hân*, which others pronounce *Kahân*. [k] *Abu'lghâzi*'s *Yakara*. [l] The *Naymans* encamped towards the River *Selinga*, and extended as far as the *Jenisea*, *Obi*, *Irtish*, &c. [m] In *Little Bukharia*. [n] Hist. *de Gentch*. by *Gaubil*, p. 1, & *seqq*. [o] [The same, perhaps, with *Toyran*. *Abu'lghazi* names this Chief, *Turk-ili*.] [p] [*Kunkurats*, or *Kongorats*. In *Chinese*, *Hong-ki-la*.] in the same Hord which *M. Polo* calls *Aungrak*. These Commanders were called in the *Mongol* Language, *Quesye*; which is the *Quesitan* of *M. Polo*.

first

Mogul Empire.

first and last were of the Hord of *Chalar*, *Porchi* belonged to that of *Orla*, and *Porokona* to the Hord of *Hyu-hû-ſhin*. Beſides theſe, there was a Stranger, called *Say-i*, who was expert in the Art of War, and being a Fire-Worſhipper, was ſurnamed *Chapar* [a].

Vang Khân's Inconſtancy.

NEXT Year *Temûjen* joined *Toli*, near the Mountain *Kau* [b], where *Chamûka*, and his Allies, had aſſembled their Forces: But *Chamûka* fearing the Succeſs of a Battle, choſe rather to render the Prince of the *Kara-its* jealous of *Temûjen*. *Toli* hereupon ſecretly decamped in the Night, and retired firſt to the River *Ha-ſwi* [c], then to the *Tûla*. *Temûjen* retreated to *Sali*, between the *Tûla* and *Onon*. They had ſcarce ſeparated, when the *Khân* of the *Naymans* attacked ſeveral Parties of the *Kara-its*, and plundered the Habitations of that Hord. On this *Toli* diſpatched Couriers to *Temûjen*, deſiring the Aid of his four Intrepids; who beat the *Naymans*, and recovered the Booty. This ſeaſonable Aſſiſtance begat a firmer Union than ever, and a Marriage between the Families was mutually promiſed.

Plots againſt Temujen,

MEAN-TIME *Ilaho* [d], Son of *Toli*, who envied *Temûjen*'s Reputation, by the Inſtigation of *Chamûka* perſuaded his Father, always wavering and diſtruſtful, that the Prince of the *Mongols* had betrayed him. In this Belief, he reſolved to deſtroy *Temûjen* by Artifice; inviting him to his Camp, with his Son *Chuchi* [e], and the Princeſs his Daughter, in order to accompliſh the double Marriage before agreed upon. *Temûjen* ſet forward, but returning again [f], ſent an Officer to put-off the Ceremony till another Opportunity. Soon after, being informed of the whole Plot, he ſent to his Allies, and took proper Meaſures to prevent a Surprize.

TOLI perceiving his Deſign was diſcovered, openly attacked *Temûjen* on all Sides; who got the Advantage in four Battles. In the laſt he fought with *Toli* himſelf, whoſe Son *Ilaho* being wounded with an Arrow, retired out of the Engagement. *Temûjin* went and encamped at the Lake *Tong-ko*, from whence he ſent an Officer to reproach *Toli* in the following Manner. *When your Uncle* Kior *defeated you at* Ha-la-when [g], *you loſt your Poſſeſſions. My Father defeated* Kior *in* Ho-ſi [h], *and reſtored you. When your Brother armed the* Naymans *againſt you, and you were obliged to retire Weſtwards, I ſent my Troops, who beat the* Markats, *and hindered the* Naymans *from defeating you. When you were reduced to ſo great Miſery, I gave you Part of my Flocks, and every Thing elſe that I had: Yet you ſent me nothing of all the great Plunder which you got from the* Markats; *although it was by the Help of my Officers that you became ſo rich, and my four Generals brought you out of the Plunge you were in. You know what I have done to prevent the ill Deſigns which the Confederate Princes ſo often formed againſt you. Will you, after ſo many Obligations, attempt to deſtroy me in ſo baſe a Manner* [i]?

Reproached by that Prince,

THE Rupture between *Temûjen* and *Toli*, put moſt of the Princes of *Tartary* in Motion. The firſt was joined by his Brother *Haſar Wha-chen*, Prince of the *Hongkirats*, and *Pu-tû*, Prince of *I-ki-lye-tſe*, *Queli*, *Toli*'s Brother, *Chapar*, and ſeveral other Lords. After many Conſultations with his four Generals, the Army ſet forward; and being arrived at the River *Pan-chûni* [k], or *Long-ka*, whoſe Water was very muddy, *Haſar* cauſed a Horſe to be killed. *Temûjin* taking-up ſome of the Water, drank of it; then invoking Heaven, promiſed to ſhare with his Officers, during his Life, both the *ſweet and the bitter*; wiſhing, in caſe he ever ſhould be ſo unhappy as to violate his Oath, that he might *become as the Water which he drank*. All his Allies, and Officers, did the ſame after him. This Ceremony linked them exceedingly firm to him; and the Families of thoſe who drank the Water on that Occaſion, valued themſelves much on Account of their Fidelity: Nor were they held in leſs Eſteem by others.

THE two Armies met between the *Tula* and *Kerlon* [l], where, after a bloody Fight, that of *Temûjin* gained a compleat Victory. Moſt of the vanquiſhed Troops joined his. *Toli* had much-ado to get-off, and many of his own Officers would have killed him. He was purſued and taken, by one of the Parties ſent after him, but the ſame Day eſcaped, and retired into the Territories of the *Naymans*; where an Officer

that Country knowing him, caused the unfortunate Prince to be slain. His Son *Ilaho* retired first into the Kingdom of *Hya* [a]: From whence being driven, and flying to the Country of *Ku-tse*, between *Turfan* and *Kashgar* [b], he was there killed, by Order of the Prince thereof.

To the South South-East of the Mountain *Altay*, dwelt People called *White Tata*. "The "*Tata* are different from the *Tatars*; that Name "is sometimes given by the *Chinese* to the Peo- "ple in general inhabiting beyond the great b "Wall; and, at other Times, to certain parti- "cular Hords, whereof some were called *Tata* "*of the Water* [c], situate almost due North of "*Korea*; others *White Tata*", of whom we are speaking. Their Chief, called *A-la-u-tse*, was a Descendant of the ancient *Tû-que* [d] Princes, and had a very great Esteem for *Temûjen*. "These "*Tû-que*, or *Turks*, are those called by *D'Her-* "*belot*, Oriental *Turks*. The *Chinese* History "begins to speak of them in the Year 545. At c "that Time they were an inconsiderable Peo- "ple, who dwelt to the North-West of *Tur-* "*fân*, and not long before their Employment "was to work Iron near a Mountain called "*Kin* [e]. But in a few Years they grew very "powerful, subduing the whole Country be- "tween the *Caspian Sea*, and the River *Lyau* [f]. "They were divided into *Tû-que of the North*, "and *Tû-que of the West*. They had great "Wars, either among themselves, or with the d "*Chinese* [g], to whom they were very formida- "ble."

A-LA-U-TSE, Chief of the *White Tata*, having been invited by *Ta-yang* [h], King of the *Naymans*, to join with him and Prince *Chamuka*, in order to curb the Power of *Temûjen*, he detained the Messenger, and gave the *Mongol* Prince Notice of the Proposal. Hereupon his Brother pressing him to take speedy and vigorous Measures, he mounted his Horse, and followed e by his choicest Soldiers, marched to the Mountain *Hang-hay* [i], where *Ta-yang* was encamped, with his *Naymans*; who, though much more numerous, were defeated, and their *Khân* killed.

a On which many Hords declared for the Victor, who before dared not. This happened in 1204, and the next Year *Temûjen* began to make Incursions on the Territories of the King of *Hya*. 1206. Jenghiz Khân.

"*HYA* is the Name of a Kingdom, which *Empire of* "contained, in *Shen-si*, all to the North of *Hya*, "*Ping-lyang fû*, as far as *Kya-yu-quan* [k]; the "Country of *Ortus*, and *Etsina*; the Country "of *Koko-nor*, with that lying between *Kya-* "*yu-quan*, and *Sha-chew* [l]; besides several Pla- "ces to the North and West of *Kya-yu-quan* [m]." In another Place, this Author says, "*Temûjen* "began this Year to attack the Princes of *Hin*, "called *Si-hya* [n], or *Hya of the West*." [Whence this large Dominion seems to have had more Masters than one; and, indeed, within these Limits ought to be included the Princes of *Tangut*, mentioned, though confusedly, by *Abu'lghâzi*, and other Oriental Authors. These reigned over a People, called by the *Chinese*, *Tu-fan*, and *Si-* c *fan*. They were at that Time in a declining State, and partly subject to the King of *Hya*, which may be the Reason why they are not mentioned in this Part of the *Chinese* Annals, al- *Account of* though we meet with the History of them at *it.* large in another Part [o], and are informed there, that they were involved in the common Ruin by the *Mongols* in 1227.

THE Kingdom of *Hya* was founded about the Year 951, by *Li-ki-tsyen*, a *Tartar* of *Tu-pa* [p], which is still in Possession of the *Tu-fan*, to whose Assistance he owed his Success. Its Capital was *Hya-chew*, at present *Ning-hya* [q]; from which City the Kingdom took its Name. The Power of this new State increased so fast, that about fifty Years after its King assumed the Title of Emperor, and so continued till the Time of *Jenghiz Khân* [r].]

IN the twelfth Month of the Year 1206, Ching-kîz which is that of the *Tiger* [s], the Chiefs of Hords, Khân *pro-* and Generals of the Army, assembled at the Head *claimed.* of the River *Onon*. The Troops were divided into nine Bodies, each of which having set-up a Pavilion, and displayed a white Standard, they acknowledged *Temûjen* for their Sovereign, by

[a] An Account of it will be given presently. [b] *Gaubil* was not well-acquainted with its Extent. [c] [Or, *Su Tata*. *Rubrugius* mentions *Su Moguls*, or *Moguls of the Water*.] [d] [*Gaubil*, p. 2, whence this Account is taken, places them to the North of the Mountain *Altay*.] [e] This seems to be the same Mountain, which, [f], is called *Tû kin*, towards the forty-fifth or forty-sixth Degree of Latitude, and twelfth or thirteenth Degree of Longitude West of *Pe-king*. Here the King of the *Tu-que* (or *Turks*) in the sixth Century, usually encamped. [Perhaps we find here the Original of the *Moguls*, and the Fable of *Irgana-kon*, mentioned before, *p.* 410. d.] [f] In *Lyau-tong*. [g] The Founders of the *Tang*, and latter *Han* Races, were of these *Tu-que*. [h] [By *Abu'lghâzi* called *Tay-yan*, and] by *D'Herbelot*, *Tayanek*. [i] It is a great Chain of Mountains, the most Western of which is about Latitude fifty Degrees, Longitude seventeen Degrees West. [k] Or, *Kya-yu-quan*. [l] Latitude forty Degrees twenty Minutes, Longitude twenty Degrees forty Minutes. [m] As far as the Country of *Hami*. [n] [*Si-hya* signifies, properly, *the Guards of the West*. Perhaps those who founded the Monarchy were the Western Guards of the great Wall.] [o] An Account will be given of them hereafter. [p] Or, *To-pa*. See before, *p.* 55. b. [q] See the same. [r] See *Du Halde*, vol. 1. *p.* 27. [s] See the *Tartar* Cycle before, *p.* 400.

1209. Jenghîz. Khân. this general Cry, *Chingkiz Kohân* [a]. After a which he nominated *Mûhûli* and *Porchi*, his two chief Generals, and Prime-Miniſters. From this Event, the *Chineſe* Hiſtory commences the Empire of the *Mongol* Conqueror [b].

2. Chingkîz Khân *makes* War *againſt the* Emperor *of the* Kin.

Hya *tributary. The* Kitan. *The* Kin Tartars: *Their Empire founded.* Chingkîz Khân *provoked: Refuſes to pay Tribute: Invades the* Kin. *The* Kitans *revolt.* Chingkîz Khân *wounded: His Progreſs in* Kitay: *Its Emperor murdered: The Aſſaſſin ſlain. The* Kin *hard preſſed. Ravages of the* Mongols. *The Capital inveſted. Buy a Peace. The Court removes: Its bad Conſequences. State of* China. *Conqueſts in* Lyau-tong. Lyew-ko's *Fidelity.* Wan-yen's *Folly. The Capital taken.* Ho-nan *invaded. Many Places taken. A Rebellion quaſhed.* Ho-nan *evacuated.*

THE Year 1206 was farther memorable, for the intire Defeat of *Poloyu* [c], Brother of *Tay-yang*. His Son *Kuchluk*, and *Toto*, Lord of the *Markits*, retired to the River *Irtiſh*, where the former had ſtill a powerful Party: But in 1208, *Ching-kîz Khân* having attacked them both, ſlew *Toto* with his own Hand, and *Kuchluk* fled into the Kingdom of the *Kitan* [d]. This Victory put him in a Condition to ſubdue the reſt of the Hords which ſtill ſtood out.

Hya *tributary.* IN 1209 the *Khân* entered *China* [e], for the firſt Time, forcing ſeveral Poſts near the great Wall to the Weſt of *Ning-hya*, took the City of *Ling-chew*, and intended to attack *Ning-hya*, Capital of the Kingdom of *Hya*. But *Li-gan-tſven*, its King, becoming tributary, gave *Chingkîz Khân* a Princeſs to Wife: Hereupon the *Moguls* made a Peace with him, and withdrew. The ſame Year *Parchukorte Tikin*, Prince of *Igûr* [f], ſtiled *Idikut* [g], ſlew the *Kitan* Officers [h], who were in his City; and going in Perſon, put himſelf under *Chingkîz Khân*'s Protection, who gave him a Daughter in Marriage. "The Chineſe Geographers agree, that the Country of "*Igûr* was ſituate where *Turfan* [i] now ſtands; "but ſeem unacquainted with its Extent. The "City where *Idikut* reſided, was called *Ho-chew*; the Ruins of which ſtill remain, ſeven "or eight Leagues to the Eaſt of *Turfan*."

THE *Mongols*, at this Time, were tributary to the *Kin* [k], as they had been before to the *Kitan*. "The *Kitan* were *Tartars*, who dwelt "to the North and North-Eaſt of the Province "of *Pe-che-li*. In the tenth Century they ſub- "dued all the Countries between *Korea* and "*Kaſhgar*, beſides ſeveral Northern Provinces "of *China*. They called their Dynaſty that of "*Lyau*, and the Name of the Imperial Family "was *Yelu*. In 1209 they ſtill maintained a "Footing in the Countries to the North, North- "Eaſt, and North-Weſt of *Turfan* [l]." [This, doubtleſs, was the Country called by the Weſtern Hiſtorians, *Kara-kitay*. *Couplet*, and after him *Du Halde*, calls them *Sye-tan*, and *Si-tan*. According to thoſe Authors, their Empire began in *Lyau-tong*, where they had two royal Seats, *Tong-king*, and *Pe-king*, that is, the Eaſtern and Weſtern Courts: The firſt the ſame with *Lyau-yang*; the ſecond *Mugden* [m], the preſent Capital, called by the *Chineſe*, *Shin-yang*. Their Empire commenced in 917, and continued two hundred and nine Years under nine Emperors, having been deſtroyed by the *Kin* in 1126.]

"THE *Kin Tartars*, who ſucceeded them, "came from thoſe vaſt Countries lying to the "North of *Korea*, and were then Maſters of "*Korea*, and that Part of *Tartary* ſituate to the "North and North-Eaſt of *Lyau-tong*: Like- "wiſe of the Provinces of *Lyau-tong*, *Shan-* "*tong*, *Pe-che-li*, *Ho-nan*, and *Shan-ſi*: Of "the Country depending on *Fong-tſyang-fû* "and *Si-gan-fû* in *Shen-ſi*; as well as of the "Parts of *Tartary* bordering on *Lyau-tong*, and "the great Wall as far as to the North-Weſt of "*Tay-tong-fû* in *Shan-ſi*. Both *Tartaries* to the

[a] In the *French*, *Ching-ki-tſe*, which is the *Mongol* Word (or rather *Chingkîz*) expreſſing the Cry of a Bird to which they aſcribe extraordinary Qualities, and make its Appearance the Preſage of Good-luck. [This ſeems to be ſome fabulous Bird, like the *Chineſe Fong-whang*, rather than the *Shongur*. As to the Word *Kohân*, ſee before, *p.* 404.] [b] Hiſt. *de Gentch.* p. 9, *&c ſeqq.* [c] In the Text, *Pologu.* [d] Or, *Weſtern Kitan.* [e] Elſewhere, the Author ſays, he entered *Shen-ſi* (to which Province *Ning-hya* belongs) by Way of the Country of *Koko-nor.* [f] *Vigur*, or *Oygur.* In *Chineſe*, *Wey-û-eul.* [g] In *Chineſe*, *I-tû-hû.* [h] [Theſe muſt have been the Weſtern *Kitan*, or *Kara-kitayans* before mentioned: For the *Kitan*, or *Lyau*, had no Dominion in the Eaſt. *Abu'lghâzi* ſays, theſe were the Officers of *Kavar Khân*, of *Turkeſtân*; but *Kavar* had been *Khân* of *Kara-kitay*.] [i] In *Little Bukharia*, to the Weſt of *Hami*, or *Khamil*. [k] In the tenth Month of the Year 1147, the Emperor of the *Kin*, unable to ſubdue the *Mongols*, was obliged to make Peace with them. Their Chief was then *Aolopûkiliay*, and called himſelf Emperor. This ſhews, that ſince then the Power of the *Mongols* had been weakened: For the Hiſtory of *Chingkîz Khân* ſays poſitively, that they paid Tribute to the *Kin*. [There is no ſuch Prince as *Aolopûkiliay* among the Predeceſſors of *Chingkîz Khân*, as given by *Abu'lghâzi*, and the other Oriental Authors.] [l] Hiſt. *de Gentch.* p. 11, *&c ſeqq.* [m] See the ſame, *p.* 26.

" forty-ninth or fiftieth Degree of Latitude, " and nineteenth or twentieth Weſt of *Pe-king*, " which were then full of petty Princes, paid " Tribute to the Emperor of the *Kin*; who kept " his Court in a City, at preſent deſtroyed, " called *Yen-king*, a few Furlongs to the South-" Weſt of *Pe-king* [a]."

[THE Empire of the *Kin*, bounded on the Weſt by that of the *Hin*, or *Hya*, began from the Fall of the *Kitan*, or *Lyau*, in 1126, and continued an hundred and ſeventeen Years under nine Emperors, till ſubverted in 1243, by the Weſtern *Tartars*. But the *Manchews*, who are Deſcendants of the *Kin*, and bear the ſame Name, reſtored it again in the laſt Century, with a vaſt Acceſſion of Dominion and Power.

THIS great Dominion, poſſeſſed firſt by the *Lyau*, and afterwards by the *Kin*, is that called by *Abu'lghâzi Khân*, and other Authors, the Empire of *Kitay*, or *Katay*, which ſeems to take its Name from the *Kitan*: Upon the Deſtruction of whoſe Empire many fled Weſtward, and eſtabliſhed a new Dynaſty, called the *Weſtern Lyau*, in the Parts near *Turfan*, which muſt have been the Country called *Kara-kitay*, as before obſerved, ſo frequently mentioned by other Authors, who yet ſeem Strangers to its Situation.]

SOME Time before the *Mongols* and other Hords had acknowledged *Chingkiz Khân* for their Sovereign, *Tay-ho*, Emperor of the *Kin*, ſent *Yong-tſi*, a Prince of the Blood, to the City of *Tſing-chew*, (now called *Kuku-hotun* [b]) to receive from them the annual Tribute. On this Occaſion *Yong-tſi* made Slight of *Temûjen*, and adviſed finding-out ſome Pretence to put him to Death: But the Emperor rejected the Propoſal; which coming to *Temûjen*'s Ears, he reſolved to be revenged on the Author of it.

WANG-YEN-KING, Emperor of the *Kin*, dying in the tenth Month, *Yong-tſi*, who ſucceeded him, ſent the Year following (1210) an Officer to order *Chingkiz Khân* to pay the Tribute. That Prince demanded who he came from; and being told, from *Yong-tſi*, then Emperor, he abſolutely refuſed; ſaying, he was himſelf a Sovereign, and would never acknowledge *Yong-tſi* for his Maſter. *It is ſaid*, added the *Khân*, by Way of Sneer, *that the* Chineſe *ought to have the Son of Heaven for their Maſter; but, at preſent, they know not how to chuſe a Man.* Having ſpoken theſe Words, he mounted his Horſe, and rode Northwards. *Yong-tſi* was ſtrangely nettled at thoſe cutting Expreſſions. *Chingkiz Khân* had other Reaſons to be diſpleaſed with the *Kin*. Among the reſt, *Ching-pû-hay*, a Prince of his Houſe, had been ſlain by them in 1206; to revenge which, the *Mongols* waited for an Opportunity: Beſides, their *Khân* was told, *Yong-tſi* intended to have him ſeized. Theſe Things determined him to go and encamp along the *Kerulon*; where he aſſembled a formidable Army, compoſed of *Veteran* Troops. From thence he ordered *Chepe Noyan* [c], and *Yelû Kohay* [d], to march towards the Borders of *Shan-ſi*, and *Pe-che-li*; who having obſerved the Country, and made ſome Spoils, returned to the main Army.

THE *Kin* had great Forces in *Lyau-tong*, which was the Strength of their Empire. In the ſame Province and Countries depending on it, there ſtill remained alſo a conſiderable Number of *Kitan*, and many Princes of the Family of the *Lyau*, whom they had deprived of the Empire. But as *Yong-tſi* grew jealous of them ſince the Riſe of *Chingkiz Khân*, he commanded double the Number of *Nyu-che* [e] Families to be put in all Places where they were ſettled, in order to watch their Motions. After this Precaution, which gave a general Diſcontent to the *Kitan*, the Emperor cauſed Notice to be given everywhere, that the *Mongols* intended to attack him, raiſed powerful Armies, and poſted Troops in all the fortified Places on both Sides of the great Wall, from the *Whang-ho* to *Lyau-tong*.

IN the Spring, and firſt Month of the Year, 1211, *Aſilan* [f], Prince of *A-la-lû*, in the Weſt, came with a Body of Troops to offer his Service to *Chingkiz Khân*, and *Idikût*, Prince of *Igûr*, to conſult the Preſervation of his Country. The Army began its March, Southward, the Beginning of the ſecond Month; on which *Yong-tſi* ſent to make Propoſals of Peace, but they were rejected. *Chepe*, with the choiceſt of the Troops, forced the Poſts of the great Wall to the North-Weſt and North-Eaſt of *Tay-tong fû* [g], while others ſeized the Fortreſſes without that Barrier. *Mûhûli* took the Poſts about *Pau-gan*, and *Yen-king*, in *Pe-che-li*. *Chapar* ſurprized the Gariſon

1211. Jenghîz. Khân.

Invades the Kin.

[a] See Hiſt. *de Gentch.* p. 3, and 146; and *Souciet*, p. 186. [b] *Khukhu*, or *Huhu-hotun*, deſcribed before, *p.* 369. [c] He was one of the *Mongols* beſt Generals. The Title of *Noyan* (called by other Authors, *Nevian*) is given only to Princes of the reigning Family, Sons-in-law of *Khâns*, or great Lords, who are Chiefs of Hords. [d] *Yelu Ko-hay* [written alſo *Yelu Kolay*, perhaps by Miſtake] was a great *Mandarin* of the *Kin* Emperors, who being ſent to ſettle ſome Affairs with *Chingkiz Khân*, was ſo charmed with him, that he entered into his Service. He was a Prince of the Imperial Family of the *Lyau*, or *Kitan*, whoſe Name was *Yelu*. [e] So the *Kin* are called, as coming from a Part of *Eaſtern Tartary*, formerly called by the *Chineſe*, *Nyu-che*. [f] This ſeems to be *Arſlân*, *Khân* of the *Karliks*. See before, *p.* 420. b. [g] In *Shan-ſi*, Latitude forty Degrees fifteen Minutes, Longitude three Degrees fifteen Minutes Weſt.

1213. Jenghîz Khân. of *Ku-yong-quan* [a], an important Place; and a *Chingkîz Khân* defeated a conſiderable Body of the *Kin*, near *Swen-wha fû*; which he took, with the Fortreſſes about *Tay-tong fû* [b], then called *Si-king*, or *the Weſtern Court*. In ſhort, they made Incurſions as far as the Capital.

The Kitan *revolt.* *WA-CHIN*, Prince of the *Hongkirats*, the *Khan*'s Brother-in-law, who had been ſent to the Frontiers of *Lyau-tong*, to ſound the Pulſes of the *Kitan* Lords, and attack the *Kin* on that Side, found the Prince *Yelu Lyew-ko*, at the Head of an hundred thouſand Men, ready to declare for his Maſter; in Teſtimony of which he aſcended the Mountain *Kin* [c], ſacrificed a white Horſe and black Ox, broke an Arrow, and made an Oath to be faithful to *Ching-kîz Khân*. *Lyew-ko* was of the Royal Family of the *Lyau* [d], a good Officer, had many Vaſſals, and, provoked at the Indignities which the *Kitan* daily received from the *Kin*, took Arms as ſoon as he heard that the *Monguls* reſolved to make War upon them. The *Khân*, to prevent *Lyew-ko* from being drawn-off again, made him very advantageous Offers, and gave him the Title of King [e]; furniſhing *Waching* and *Chepe* with good Troops to aſſiſt him. *Lyew-ko* having cauſed himſelf to be proclaimed King every-where, took many Places; and marching againſt the *Kin* Army, gained a great Victory. On this many *Kitan* Lords ſhook-off their Yoke, and ſeveral Cities ſubmitted to him. After this he took *Tong-king* [f], or *Lyau-yang*, a City of *Lyau-tong*. This great Conqueſt got *Lyew-ko* great Reputation, and made the *Kin* raiſe great Forces to ſave that Province [g].

Chingkîz Khân wounded. IN 1212, the *Khân* ſubdued *Whan-chew* [h], and *Mûhûli* the Fortreſſes without the great Wall, near the *Whang-ho*. And when the *Moguls* had maſtered all the ſtrong Places between that City and River, they prepared to beſiege *Tay-tong fû*. To prevent them, *Yong-tſi* ſent *Hûjakû*, or *Kiſhe-lye* [i], and *Wan-yen*, at the Head of three hundred thouſand Men. *Mûhûli* having adviſed *Chingkîz Khân* to go meet this Army, which was encamped near the Mountain *Yehû* [k], the *Monguls* attacked, and, notwithſtanding the Superiority of their Numbers, defeated them. In Autumn the *Khân* inveſted *Tay-tong fû* [l], where he met with more Reſiſtance than he expected. Having, in a vigorous Attack, loſt many Men, and been dangerouſly wounded by an Arrow, he raiſed the Siege, and retired into *Tartary*; after which the *Kin* retook *Pau-gan*, *Swen-wha fû*, and even *Ku-yong-quan*.

CHINGKIZ KHAN, who in this Diſgrace was comforted by the News from *Lyau-tong*, being recovered of his Wound, re-entered *China* in 1213, recovered *Swen-wha fû* and *Pau-gan*, defeated an Army of the *Kin* near *Whey-lay* [m]; and one of his Generals took *Ku-pe-kew* [n]. After this Battle, the *Khân*, not able to enter by *Ku-yong-quan*, forced the Fortreſs of *Tſe-kin-quan*, and took *I-chew*, and *Cho-chew* [o]: But *Chepe* returning from *Lyau-tong*, paſſed on to *Nan-kew*, (a Place of Importance) and took *Ku-yong-quan*, which is not far diſtant. On the other Side, in the ſeventh Month, a great Battle was fought at the Mountain *U-whey-lin*, near *Quan-chang hyen* [p], wherein the *Kin* were cut to Pieces.

IN the eighth Month, *Hûjakû*, Generaliſſimo of the *Kin* Troops, who had been caſhiered in 1212 for bad Service, and reſtored, ſeized on the Perſon of *Yang-tſi*, and, ſoon after, cauſed him to be ſlain. The true Cauſe of the *Mongul* Succeſſes was that General's Hatred to thoſe who were the Occaſion of his Diſgrace (the Year before) which laſted two Months. After being replaced, he was ordered to encamp to the North of the Court: But, inſtead of endeavouring to ſtop the Enemy's Progreſs, he minded nothing but Hunting, nor regarded the Emperor's Orders. At length, he marched with his Army to the Imperial City, under Pretence of preventing a Conſpiracy which he had diſcovered. He ſent Horſemen to the Palace to cry aloud, that the *Monguls* were at the City Gates. He put to Death ſuch as he ſuſpected; and having diſpoſed his Troops in different Quarters, the Officers and *Mandarins* aſſiſted him, without the leaſt Suſpicion.

[a] A Fortreſs nine Leagues North North-Eaſt of *Pe-king*; and *Yen-king* is three or four North of *Ku-yong-quan*. [b] All in *Shan-ſi*. [c] According to the *Chineſe* Geographers, this Mountain muſt be forty-five or fifty Leagues North of *Mûgden*, Capital of *Lyau-tong*. [d] Of which *Yelu* was the Name. [e] [*Khân*, or *Whang*, we preſume, of *Lyau-tong*] [f] [That is, the Eaſtern Court, Latitude forty-one Degrees twenty Minutes, Longitude ſix Degrees fifty ſix Minutes Eaſt. In the Jeſuits Map, it is placed on the North-Side of the River *Takſa*, that falls into the *Lyau*, and is a diſtinct Town from *Lyau-yang*, which lies three Miles to the South, and was then a great City.] [g] Hiſt. *de Gentch.* p. 13, *& ſeqq.* [h] A City of *Tartary*, to North-East of *Pe-king*, between the forty-ſecond and forty third Degree of Latitude; now deſtroyed. [i] In *Tartarian*, *Hiſke-lye*; the ſame as *Hû-ſha-hû*, or rather in *Tartarian*, *Hûjakû*. [k] Seven or eight Leagues Weſt, or Weſt North-Weſt of *Swen-wha fû*. [l] *Ki-ſhe-lye*, or *Hûjakû*, the Governor, fled. The *Chineſe* Hiſtories differ in the Dates, and Order of Facts, about this Time. [m] Four or five Leagues Weſt of *Ku-yong-quan*. The Battle was very bloody, the Field being ſtrowed with the dead Bodies for four Leagues together. [n] A famous Fortreſs at one of the Gates, in the great Wall, Latitude forty Degrees, forty-three Minutes, fifteen Seconds; Longitude forty three Minutes Eaſt of *Pe-king*. [o] [Cities in the Weſt Borders of *Pe-che-li*. *Tſe-kin-quan* twenty-five Miles Weſt of *I-chew*.] [p] A City on the Borders of *Shan-ſi*, and *Pe-che-li*.

of his dethroning their Prince. As ſoon as he had ſecured the Gates of the City, he ſeized the Palace, and confined the Emperor; then depoſed him, and put him to Death. After which, finding he could not get himſelf declared Emperor, he enthroned *Sun*, a Prince of the Blood.

THESE Diſtractions determined *Chingkiz Khân* to beſiege the Imperial City. *Chepe*, after taking *Ku-yong-quan*, ſet forward with five thouſand choſen Horſe to join the Army. But his Van-Guard coming to the River *Tſau* [a], and endeavouring to paſs the Bridge, was intirely defeated by *Hûjakû*, who was carried in a Carr, being hurt in the Foot. Next Day, being hindered from marching himſelf, by his Wound opening, he ordered *Chu-hu Kau-ki* to advance with five thouſand Troops to oppoſe the Enemy; but that General coming too late, *Hûjakû* would have put him to Death; which the Emperor, knowing him to be a good Officer, would not ſuffer. Then *Hûjakû* ſaid to him, *If you beat the Enemy, I will ſpare you; if you are defeated, you ſhall die.* *Kau-ki* marched againſt the Enemy; but a North Wind ariſing, which blew the Sand into his Soldiers Eyes, he was forced to re-enter the City with Loſs. As he took it for granted *Hûjakû* would put him to Death, he ran with his Troops to that General's Palace; who being apprized of his Deſign, got on his Garden-Wall; but falling, broke his Leg. The Soldiers having there killed him, *Kau-ki* carried his Head to the Gate of the Palace, and ſurrendered himſelf up to the *Mandarins*, in order to be condemned to Death: But the Emperor having publiſhed an Edict, wherein he charged *Hûjakû* with ſeveral Crimes, praiſed *Kau-ki*, and, afterwards, made him Generaliſſimo in his Room.

LI-GAN-TSVEN, King of *Hya*, (which had been in Peace with the Empire for fourſcore Years) finding himſelf preſſed by the *Mongols*, demanded Aid of the *Kin* who; refuſed it, as having Occaſion themſelves for their Troops. Hereupon, the *Hya*, after they had made Peace with the *Mongols*, as before-mentioned, in 1210, declared War againſt the *Kin*, and attacked *Kya-chew* [b], in *Shen-ſi*. The ſame Year, *Li-gan-tſven* dying, *Li-tſun-hyu*, his Relation, ſucceeded him. This Prince, more ſucceſsful than his Predeceſſor, took *King-chew* [c] at the End of 1213.

SINCE the Time *Chingkiz Khân* had invaded *China*, many *Chineſe* Officers, who had been taken Priſoners, entered into his Service: Theſe he greatly eſteemed, and gave them Parties of their own Nation to command. Reſolving to attack the *Kin* on every Side, he mixed the *Chineſe* and *Tartarian* Troops together; forming out of them four Armies. One he ordered to encamp to the North of *Yen-king*, the Imperial City; another to ravage the Country to the North and Eaſt, as far as *Lyau-tong*; the third, under three of his Sons, to deſtroy all to the South and South-Weſt, as far as the *Whang-ho*; while himſelf, with *Toley*, his fourth Son, marched through *Pe-che-li* to *Tſi-nan fû*, Capital of *Shan-tong*. 1214. Jenghiz Khân.

THE *Kin*, for their Defence, ſent their beſt Troops to guard the difficult Paſſages of Rivers and Mountains; cauſing all People, fit to bear Arms, to enter into the Cities. The *Khân* being informed of this, ordered his Generals to take all the old Men, Women, and Children, out of the Villages, and unfortified Towns, and ſet them in the Front of the Army. The People from the Walls, on hearing the Voice of their Friends, refuſed to defend themſelves at their Deſtruction. The Deſolation was general throughout *Shan-ſi*, that Part of *Ho-nan*, North of the *Whang-ho*, *Pe-che-li*, and *Shan-tong*. The *Mongols* plundered and deſtroyed more than ninety Cities; burnt to Aſhes an infinite Number of Towns and Villages; took all the Gold, Silver, and Silks, they met with; maſſacred thouſands of uſeleſs People; carrying into Slavery an extraordinary Number of young Women and Children. The Spoil which they took in Cattle was ineſtimable; and in all thoſe vaſt Countries there were but ten Cities, which the *Mongols* could not ſubdue: Among which, in *Pe-che-li*, were *Yen-king*, the Imperial City, *Tong-chew*, *Ching-ting fû*, and *Tay-ming fû*. All this happened in the End of the Year 1213, and Beginning of the next [d]. *Ravages of the Mongols.*

IN 1214, *Chingkiz Khân* being returned from *Shan-tong*, aſſembled all his Troops in one Body, and inveſted *Yen-king*, in the fourth Month, encamping on the North Side. His Generals preſſed him, without Delay, to ſcale the Walls and ruin the City; but the *Khân* having had other Views, would not conſent. Inſtead of that, he ſent an Officer to tell the Emperor of the *Kin*, that his Maſter was willing to return into *Tartary*: But that, to appeaſe the Anger of the *Mongul* Troops, it was neceſſary to make them conſiderable Preſents; adding, that he ought to conſider, that *Yen-king* was almoſt the only Place which remained in his Poſſeſſion to the North of the *Whang-ho*. One of the *Kin* Miniſters pro- *The Capital inveſted.*

[a] It is a Canal, whoſe Water coming from *Chang-ping-chew*, paſſed by the Imperial City, from which the Bridge could not be far. *Pe-king* having been built ſince, and new Canals dug, great Alterations have enſued in the little Rivers between the *When-ho* and *Pey-ho*. [b] Latitude thirty-eight Degrees ſix Minutes, Longitude ſix Degrees four Minutes Weſt. [c] In *Shen ſi*: Alſo Latitude thirty-five Degrees twenty-two Minutes, Longitude nine Degrees five Minutes Weſt. [d] Hiſt. *de Gentch.* p. 17, *& ſeqq.*

voked

1214. Jenghiz Khân. voked at this Meſſage, propoſed to go-out and fight the Army of *Ta-che* [a]; ſaying, many of the Soldiers were ſick, and, that it was not in a Condition to make a vigorous Attack.

Buy a Peace. ANOTHER Miniſter ſaid, they had every Thing to fear if they loſt a Battle, and but little Good to expect from a Victory: That the Troops in the City had nothing in View but to leave it, moſt of them having Families; but that, when the *Mongols* were retired, they ſhould be better able to conſult what was proper to be done. The Emperor approving this Advice, ſent a Lord to the *Mongols* to deſire a Peace; wherein it was ſtipulated, that a Daughter of the late Emperor *Yong-tſi* ſhould be given to *Chingkiz Khân*, with five hundred young Boys, and as many Girls, three thouſand Horſes, Silk, and a great Sum of Money. The Condition being performed, the *Khân* raiſed the Siege; and, departing by the Way of *Ku-yong-quan*, cauſed all the young Children, whom he had taken in *Shan-tong*, *Ho-nan*, *Pe-che-li*, and *Shan-ſi*, to be ſlain.

The Court removes, AFTER the Retreat of the *Mongols*, the Emperor *Sun* declared to his Council, that he reſolved to remove his Court to *Pyen Lyang* [b], in *Ho-nan*. *Tû-ſhâ-ni*, a wiſe and faithful Miniſter, repreſented, that in ſuch Caſe, the Northern Provinces would be loſt. He obſerved, that *Lyau-tong* being very ſtrong by Situation, it was eaſy to maintain themſelves there; that there was no more to be done than to make new Levies, fortify the Court, fill the Gariſons, and recruit the Troops of that Province. Moſt of the Grandees were of his Opinion: But the Emperor ſaid, that as the Treaſures were exhauſted, the Troops weakened, and Cities round the Capital deſtroyed, *Yen-king* was no Place of Security for him. Accordingly he departed with his Family and ſome Troops, leaving the Prince, who was to be his Succeſſor, to encourage the Inhabitants.

Its bad Conſequences. THAT Monarch had ſoon Occaſion to repent this bad Step. Being arrived at *Lyang-hyang*, (a City five Leagues South-Weſt of *Pe-king*) he demanded back of his Troops their Horſes and Cuiraſſes. The major Part refuſing to obey, ſlew their General, and choſe three others. After which they returned and ſeized the Bridge of the River *Lû-kew* [c]. From thence, *Kanta*, one their Generals, ſent a Courier to *Chingkiz Khân*, then encamped at the City *Whan-chew*, in *Tartary*, to offer himſelf and his Troops at his Service. As ſoon as that Prince was apprized of the Emperor's Retreat, he was much incenſed; complaining, that he had been deceived by the *Kin*, and reſolved to re-enter *China*. To that Purpoſe he ſent his General, *Min-gan*, with a great Force, to join *Kanta*, and beſiege *Yen-king*. As ſoon as the Emperor heard this News, he ordered his Son to leave that City, and repair to *Pyen-lyang*. This alſo was againſt the Advice of his Miniſters, ſupported by the Example of *Ming-whang* [d]. The Departure of the Prince diſcouraged the Gariſons of *Yen-king*, and other Places.

THE Conqueſts of the *Mongols*, and Retreat of the *Kin* Emperor, gave great Uneaſineſs to the *Chineſe* Emperors of the *Song* Race. They were Maſters of the Southern Provinces of *China*; as, *Quan-tong*, and the Iſle of *Hay-nan*, *Quang-ſi*, *Yun-nan*, *Se-chwen*, *Quey-chew*, *Hû-quang*, *Kyang-ſi*, *Che-kyang*, *Fo-kyen*, and almoſt all *Kyang-nan*. In *Shen-ſi* they poſſeſſed the Country of *Hang-chong fû*, beſides ſome Places in the Diſtrict of *Kong-chang fû*, and on the Borders of *Se-chwen*. The great Wars which they had carried-on againſt the *Kin*, had forced them to make a ſhameful Peace; whereby they were to pay an annual Tribute [e] in Silk and Silver. It was reſolved, therefore, at this Juncture, to refuſe tendering the Tribute any longer. But the Propoſals made by the King of *Hya*, to join their Forces againſt the *Kin*, were rejected [f].

THE *Kin* had, in *Lyau-tong*, an Army of two hundred thouſand Men, who had retaken many Places, conquered the preceding Years by *Lyew-ko*; and, among the reſt, *Lyau-yang*: But in the ninth Month, *Mûhûli*, followed by the General *Wîr*, of the Hord of *Shan-tſu*, entered that Province, in order to ſuccour the Prince, and cut off the Communication with *Pe-che-li*; which was effected. The huge Army of the *Kin* being filled with Traitors, diſperſed; and the inferior Officers killed their General. King *Lyew-ko* recovered *Lyau-yang*, and *Pe-king*, now called

[a] This is one of the Names given by the *Chineſe* to that large Region, at preſent poſſeſſed by the *Mongols* and *Kalkas*. [b] Called alſo *Nan-king*, or *the Court of the South*, and ſtill *Pyen*. It ſtood nearly where *Kay-fong fû*, the Capital of *Ho-nan*, ſtands at preſent. [c] Now called the *When-ho*. The *Kyau*, or Bridge, is two Leagues Weſt South-Weſt of *Pe-king*, and a very fine one. [d] Or, *Hiun-Tſong*, the *Chineſe* Emperor of the *Tang* Race; who retiring from *Shen-ſi* to *Se-chwen*, left his Son behind him to defend the Province. In 756, *Gan-lo ſhan* rebelling, an hundred and fifty thouſand Men, from *Turkeſtân* and the *Mohammedan* Countries, came to aid the Empire. The Hiſtory of this great Revolution is one of the moſt curious Parts of the *Chineſe* Hiſtory; and gives great Light into the oriental Hiſtory, and Geography of the Countries between *Shen-ſi* and the *Caſpian* Sea. It appears, that, in thoſe Times, a great Number of *Arab* and *Perſian* Veſſels frequented the Port now called *Kanton*. [This confirms *Renaudot*'s *Anciennes Relations*, &c. p. 8, *& ſeqq.* Of the Rebellion above-mentioned, ſome Account is given by *Du Halde*, vol. 1. *p.* 23, and 199.] [e] [The Emperor *Kau-tſong*, in the Articles of Peace made in 1144, ſubſcribed himſelf a Subject, and tributary to the Emperor of the *Kin*. See *Couplet*, *Tabl. Chron. Sinic.* p. 73.] [f] *Hiſt. de Gentch.* p. 22, *& ſeq.*

Mug-

1216. Jenghiz. Khân.

Mugden, surrendered to *Mûhûli*; who put to the Sword a great Number of submitting Soldiers, under Pretence, that they came-in too late: But ſtopped the Slaughter, on being told, ſuch a Conduct would hinder many other Places from yielding. Towards the End of the Year, the City *Tong-chew* [a], an important Port to the Eaſt of *Yen-king*, ſurrendered to the *Mongols*. The Emperor of the *Kin* having been obliged to lay Taxes on the People, it furniſhed ſeveral Lords with a Pretence; ſome to ſubmit to the *Mongols*, and others to throw-off their Dependence.

In 1215, many of the *Kitan* adviſed *Lyew-ko* to be declared Emperor independent of the *Mongols*: But he rejected the Propoſal, as contrary to the Oath he had taken to be *Chingkiz Khân*'s Subject; to whom he ſent his Son *Sye-tû* with ninety Waggons loaded with rich Preſents [b], and a Liſt of the Families which had ſubmitted to him, amounting to ſix hundred thouſand. Towards the End of the Year he came himſelf to do Homage to the *Khân*. The Emperor being informed of the Diſtreſs *Yen-king* was in, ſent a great Quantity of Proviſions, with Forces, for its Relief: But the firſt Convoy, under the Conduct of an unexperienced General, arriving at *Pa-chew* [c], his Army was there defeated; on the News whereof the other Generals fled, and left all the Proviſions a Prey to the Enemy.

WAN-YEN CHANG-WHEY [d], and *Mo-nyen Chin-chong*, commanded in *Yen-king*. The former, out of all Hope of Succours, propoſed to the latter to die for their Country. *Mo-nyen*, on whom the Troops immediately depended, refuſing, *Wan-yen* retired in a Rage, and told a *Mandarin* his Reſolution. The firſt Day of the fifth Month he wrote a Petition to the Emperor, wherein he touched on Matters of Government, and mentioned the Crimes of a bad Miniſter, whom the Emperor made-uſe of, meaning *Kau-ki*, who ſlew *Hûjakû*. He finiſhed, by confeſſing himſelf guilty of Death, for not being able to ſave the Imperial City [e]. This done, with a compoſed Air, he called his Domeſtics, and divided all his Effects amongſt them. Then, cauſing a Cup of Poiſon to be filled, he wrote a few Words: After which, ordering the *Mnndarin*, who was with him, to leave the Room, he drank it off, and died before his Friend was gotten many Paces from the Houſe.

The ſame Evening, the Emperor's Wives, knowing that *Mon-yen* was preparing to leave the City, came to tell him, they would go-out along with him. He complied, but ſaid he would go before, to ſhew them the Way. The Ladies confiding in him, returned to the Palace: But *Mon-yen* not caring to be troubled with their Company, left them behind. Hereupon the *Mongol* Army entring the City, a great Number of the Inhabitants, and *Mandarins*, periſhed in the Diſorder. A Troop of Soldiers ſet-Fire to the Palace, which burnt for a Month. *Chingkiz Khân*, who was then at *Whan-chew* [f], ſent to compliment the General, *Min-gan*, on the Occaſion, ordering him to diſpatch into *Tartary* the Silks, Gold, and Silver, found in the Imperial Treaſury. *Mon-yen* coming to *Pan-ting fû*, in *Pe-che-li*, told thoſe, whom he had brought along with him, that they ſhould never have gotten there, had he undertaken to conduct the Ladies of the Palace. When he arrived at *Pyen-lyang*, the Emperor, though extreamly troubled for the Loſs of the Capital, did not mention a Word to him about it, and gave him a great Poſt: But ſhortly after he was put to Death, for having had, as it was ſaid, bad Deſigns. His Majeſty having read *Wan-yen*'s Petition, declared him *Wang*, or King [g].

The Capital taken.

MIN-GAN, who was ordered to ſearch for a *Mandarin* of the royal Race of the *Lyau* (or *Kitan*) called *Yelu Chû-tſay* [h], having found him, conducted him to *Chingkiz Khân*; who, at the firſt Interview, conceived a high Eſteem for this great Man, and ſet him at the Head of his Affairs. *San-ke-pa* being ſent, with ten thouſand Horſe, to attack *Tong-quan* [i], a famous Paſs in the Mountains between *Shen-ſi* and *Ho-nan*, marched through the Territories of the King of *Hya*, who ſtill continued the War againſt the *Kin*, and this Year wreſted from them the City of *Lin-tau fû* [k]. He took his Rout by *Si-gan fû*, (Capital of *Shen-ſi*;) but failing in his Attempt on *Tong-quan*, marched to *Yû-chew* in *Ho-nan*, through croſs-Roads full of deep Torrents, over which they made Bridges with their Pikes and Halberds. Arriving, after many Difficulties, in

Ho-nan *invaded.*

[a] [In *Pe-che-li*, on the River *Pe-ho*, about twelve Miles Eaſt of *Pe-king*. See before, *p.* 23. e.] [b] They were expoſed on Felts for ſeven Days, to give Heaven Notice. [c] Latitude thirty-nine Degrees three Minutes, Longitude nought. [d] He was a Prince of the Blood; the Family Name of the *Kin* being *Wan-yen*. [e] [His Want of Power to ſave the City could be no Crime: But he would not wait to ſee what might have happened. As ſuch a Death could be of no Service to the State, but rather Diſſervice, it had no Pretence to Merit.] [f] Almoſt North of *Pe-king*, or North North-Weſt. [But, elſewhere, it is put North North-Eaſt. See before, *p.* 436. Note h.] [g] Or, *Regulo*, as it is expreſſed in the Accounts of *China*. It is an ancient Cuſtom in the Empire, to reward and puniſh the Dead. [And this ſhews the *Kin* obſerved thoſe Cuſtoms then, as the preſent *Kin*, or *Man-chews*, do at preſent.] [h] *Yelu* was the Family Name of the *Kitan* Emperors. [i] Latitude thirty-four Degrees thirty-nine Minntes; Longitude ſix Degrees ſeventeen Minutes Weſt. [k] In *Shen-ſi*, Latitude thirty-five Degrees twenty Minutes; Longitude twelve Degrees twenty Minutes Weſt.

Sight

1217. Jenghîz Khân.

Sight of *Pyen-lyang* [a], Capital of that Province, the *Kin* Troops ſallied, and made him retire to *Shen-chew* [b], on the *Whang-ho*; which being frozen, *San-ke-pa* croſſed it, and eſcaped. The Emperor *Sun*, after this, ſent to demand Peace of *Chingkîz Khân*; who propoſed ſuch hard Conditions, that they were rejected. *Mûhûli* and *Wîr*, in *Lyau-tong*, diſperſed, with much Addreſs and Courage, ſeveral Parties which endeavoured to ſhake-off the *Mongol* Yoke [c].

Many Places taken.

IN 1216, the *Mongols* took their Meaſures ſo right, that *Tong-quan* was forced in the tenth Month; after which they poſted themſelves between the City of *Yû-chew*, and the Mountain *Song* [d]. The Court being alarmed at this, one of the Cenſors of the Empire repreſented to his Majeſty, that *Pyen-lyang* would be taken in the ſame Manner as *Yen-king* was, unleſs he took the Field, with the Gariſon, which was numerous, ſecured the Poſt of *Tong-quan*, fortified the Frontiers of *Shen-ſi*, and Paſſages of the *Whang-ho*; unleſs alſo he hindered the *Mongols* from gaining Footing in *Ho-nan*, and making Inroads thither, which ruined the Inhabitants. On the contrary, the Miniſter *Chû-hû Kau-ki* perſuaded the Emperor to think only of defending the Capital: Which Conduct, ſays the Hiſtory, ruined the Dominion of the *Kin*.

A Rebellion quaſhed.

MUHULI, after the Conqueſt of the Parts of *Lyau-tong*, towards *Lyau-yang* [e], ordered *Chang-ping*, one of the Generals there, to march into *China*, and join the other Troops: But being informed he was a Traitor, had him put to Death the End of the Year 1215. Hereupon his Brother *Chang-chi*, to revenge his Blood, revolted, and took *King-chew* [f], with moſt of the other Cities of the Province included between the great Wall of *China*, the River *Lyau* [g], the wooden Paliſado, and the Sea. After this, he cauſed himſelf to be proclaimed King; and in 1216 declared for the *Kin*, who gave him the Command of their Troops in *Lyau-tong*. *Mûhûli*, who had retaken *Quang-ning hyen* [h] the preceding Year, at the End of this beſieged *King-chew* [i]. *Chang-chi* had good Troops, and the Place being very ſtrong, *Mûhûli* ordered *Wîr* to go and attack an important Poſt on a neighbouring Mountain, while another General ſhould be ready to cut-off the Troops detached from the City to ſuccour it. *Wîr* having obeyed his Orders, *Chang-chi* ſallied-out with Part of the Gariſon. Hereupon *Monkû-pûwha*, placing himſelf between that Poſt, and the City, gave Notice to *Mûhûli*, who lay towards *Quang-ning*. The General marching all Night, by Day-break came-up, and attacked *Chang-chi* on one Side, while *Monku* did the ſame on the other; ſo that he was entirely defeated: Yet getting-back to the City, he defended it bravely for more than a Month; when an Officer of the Gariſon delivered him to the *Mongols*, who cut-off his Head, and took Poſſeſſion of the Place.

THE *Mongols* having abandoned *Ho-nan*, paſſed the *Whang-ho*, under the Conduct of *Se-mo-ho*, furnamed *Patûrû*, or *the Couragious*, and marched towards *Ping-yang fu*, in *Shan-ſi*: But *Su-ting*, who commanded the Troops there, having gathered thoſe from the dependent Places, met, and defeated them [k].

3. *His* Expedition *into the* Weſt, Return, *and* Conqueſt *of* Hya.

Kuchluk *vanquiſhed.* Mûhûli *highly honoured.* *The* Khân *marches Weſtward.* *Kingdom of the* Weſtern Lyau. Kuchluk *ſlain.* Mawara'lnahr *invaded: Conqueſts there, and in* Irân. *Death of* Karazm Shâh. Kin-cha *invaded.* *Conqueſts in* India. *The* Khân *returns.* *Affairs of* Lyau-tong, *and of* Kitay. *Cities recovered.* Chang-yau's *Exploits.* Korea *made tributary.* *Conqueſts in* Shan-tong, Shan-ſi, *and* Shen-ſi. Mûhûli's *Death, and Character.* Ching-kiz Khân's *Return: Invades* Hya: *Progreſs in* Ho-nan, *and in* Hya: *That Kingdom deſtroyed.* Chingkîz Khân's *Sickneſs, and Death: His Children, and Wives.* *Female Bravery.* *Ceremony of proclaiming* Oktay Khân. *Remarks upon the preceding Hiſtory.* Mongul *Emperors in* Tartary *and* China.

IN the Year 1216, *Chingkiz Khân*, after reſting for ſome Time in his Palace, which he had built near the River *Lûkû* [l], in *Tartary*, went and encamped near the *Tula*; from whence he ſent *Suputay* againſt the *Markats*, who had raiſed new Troops, and always ſupported the King of the *Naymans*. This Prince, after his Defeat, had gone-about to ſeveral Hords, of the *Kitans*, *Naymans*, and *Markats*, to ſtir them up againſt the *Mongols*. *Chepe* was detached, in the Year 1217, towards the River *Irtiſh*, where he

[a] Now, *Kay-fong fû*. [Before, it is ſaid to have been near that City. See *p.* 438. Note [b].] [b] A City of *Ho-nan*, fifteen Leagues Eaſt North-Eaſt of *Tong-quan*. [c] *Hiſt. de Gentch.* p. 26, *& ſeqq.* [d] A famous Mountain to the North-Eaſt of *Yû-chew*; [rather, to the North-Weſt, we conjecture.] [e] Latitude forty-one Degrees ſeventeen Minutes; Longitude ſix Degrees fifty-ſix Minutes Eaſt, then a great City. [f] Latitude forty-one Degrees eight Minutes; Longitude four Degrees forty-five Minutes Eaſt. [g] Called alſo *Sira mûren*. [h] Latitude forty-one Degrees thirty-nine Minutes; Longitude five Degrees twenty-ſix Minutes Eaſt. [i] Latitude forty-one Degrees ſix Minutes; Longitude four Degrees forty-four Minutes. [k] *Hiſt. de Gentch.* p. 35 *& ſeq.* [l] *Gaubil* takes it for the *Kerolen*, or *Kerlon*. [If ſo, perhaps, this might have been the Place where *Para-hoton*, or *the City of the Tiger*, was afterwards built.]

1218. Jenghîz Khân.

vanquiſhed *Kuchluk* (Son of the *Nayman* King) who had taken-up Arms afreſh. After his Victory, he marched Weſtward; but the *Chineſe* Hiſtory relates no Particulars of his Expedition. At the ſame Time *Chûchi*, the Emperor's eldeſt Son, took his Journey towards a Country very far from *China*, to the North-Weſt. The Hiſtory does not name this Country, but mentions ſome People, or Hords, whom he ſubdued; as the *U-ſe-han*, *Ha-na-ſa*, *Ku-lyang-û-ke-ſhe*, and *Taymihoinirkan* [a].

CHINGKIZ KHAN having now reſolved to carry his Arms Weſtwards, called *Mûhûli* before him, and after beſtowing Commendations publickly on his great Qualities, declared him Generaliſſimo of the Troops, and his Lieutenant-General in *China*. He conferred on him likewiſe the Title of King, and made it hereditary in his Family. On this Occaſion, he cauſed the *Chineſe* and *Tartar* Troops to be drawn-out, with their Standards diſplayed, and ordered them to obey *Mûhûli* as himſelf, delivering him, at the ſame Time, a royal Seal of Gold, to put to all his Orders. That General, the ſame Year, marched at the Head of his Troops for *China*; where, in a ſhort Time, he ſubdued many Cities in *Shan-ſi*, *Pe-che-li*, and *Shan-tong*. *Li-chew* [b] having held-out to the laſt Extremity, *Mûhûli* would have put all the Inhabitants to the Sword; but at the Inreaty of *Chau-tſin*, one of his beſt Officers, a Native of that Place, who offered to die himſelf to ſave his Mother, Brothers, and the reſt of the Citizens, they were ſpared.

AT the End of the Year 1217, or Beginning of the next, *Chingkîz Khân* put himſelf at the Head of a puiſſant Army, in order to march into the Weſt. Before he ſet-out, he declared the Prince *Tyemûko* [c], his fourth Brother, Regent of the Empire. Among the choſen Generals, who accompanied the *Khân*, there were ſeveral *Chineſe*; and he formed Companies of Soldiers, who had the Art of caſting huge Stones againſt beſieged Cities. His firſt Enterprize was againſt *Kuchluk* (Son of *Poluyu*, late King of the *Naymans*) who had put in Motion all the Countries to the Weſt and North of *Turfân*, as far as the Rivers *Sihun* and *Jihun* [d], on one Side; and, on the other, as far as the *Obi* and *Irtiſh*. He was leagued alſo with the *Markats*, and Princes of *Ki-cha* [e], a vaſt Country to the North and North-Eaſt of the *Caſpian Sea*; beſides thoſe of the *Kangli*, who inhabited the Country to the North-Eaſt of the Territories of *Samarkant* [f].

Kingdom of the Weſtern Lyau.

AN Army of three hundred thouſand Men having advanced with a Deſign to oppoſe the *Khân*'s Paſſage, he entirely defeated them. Theſe are ſaid to have been the Remains of the *Kitan*, of whom there were many Hords about *Turfân* [g]. "*Yelu Ta-che*, Prince of the *Lyau*, find-
" ing his Houſe deſtroyed by the *Kin*, leaving
" *Tay-tong fu*, a City of *Shan-ſi*, with a few
" Followers, retired to the *Pe Tata* [h], who en-
" camped to the South-Eaſt of *Mount Altay*.
" From thence he removed to the Neigbour-
" hood of the City *Ho-chew* (near *Turfân*) ſtill,
" ſays the *Chineſe* Geography, called *Pe-ting-*
" *tû-hû fû*: There, by Means of eighteen
" Hords, he was ſupplied with ten thouſand
" choice Men, and prepared all Sorts of Arms.
" *Pi-le-ko*, King of the *Whey-hû* [i], let him paſs
" through his Territories. *Ta-che* having van-
" quiſhed all who oppoſed him, arrived, with
" an ineſtimable Booty, at *Sun-ſe-kan* [k]. The
" *Whey-hû* Princes (who dwelt in thoſe Parts)
" advancing to give him Battle, were entirely
" defeated. He ſtaid at that City ninety Days;
" and marching Weſtward, went to *Kirman* [l],
" where his Generals proclaimed him Emperor.
" Then returning Eaſtward, after twenty Days
" March, he fixed his Seat at *Hu-ſe Wa-eul-*
" *tû* [m]. Thus was the Dominion of the Weſtern

[a] [Names not to be found in any of the Oriental, or Weſtern Hiſtorians, or Travellers: But with regard to the Affairs of the Weſt, very remote from *China*, we are to expect nothing, either particular, or exact, in the *Chineſe* Hiſtory; as we have obſerved in the Introduction to this Section.] [b] At preſent, *Li-hyen*, a City of *Pe-che-li*. [c] [By *Abu'lghâzi*, *Tamûka*. See before, *p.* 411. d.] [d] [Theſe are the *Arab* Names of the Rivers formerly called *Jaxartes*, and *Oxus*; now *Sîr*, and *Amû*; which, we preſume, are not in the *Chineſe* Hiſtory.] [e] [Elſewhere, written *Kin-cha*; but, we preſume, faultily. This muſt be *Kipchâk*, or *Kipjâk*.] [f] *Hiſt. de Gentch.* p. 32, *& ſeqq.* [g] [See before, *p.* 434. a.] [h] [Theſe muſt be the *White Tata*. See before, *p.* 433.] [i] [They dwelt about *Turfân*. See before, *p.* 431. e.] [k] *Gaubil* takes it to be the City *Kojend*, on the River *Sîr*, in *Great Bukharia*. [l] [Not *Kirmân*, in *Perſia*, we preſume. Perhaps *Karmina*, in *Great Bukharia*, near *Bokhara*, or ſome Place to the North of the *Sîr*, now deſtroyed.] [m] Elſewhere, *p.* 56. of the *French*, *U-ſe Wa-eul-tû*. *Wa-eul-tû* is the *Mongol* Word *Ortû*, which ſignifies the *King's Palace*, or Reſidence. [This Seat of the *Kitan* Kings muſt have been in the Weſtern Parts of *Little Bukharia*, ſince it was but twenty Days March from *Sunkeſan*, or *Kojend*; and *Hulaku* found the Country, where they formerly inhabited, to the Weſt of *Almaleg*, fifteen thouſand *Li* (or fifteen hundred Leagues) to the Weſt of *Ho-lin*, or *Kara koram*; although this Diſtance ſeems much too great. *Gaubil* judges this *Ortû* ſhould lie to the Weſt of *Kaſhgar*. But ſuppoſing this to be the Country of *Kara-kitay*, it does not agree with the Situation given it by *Abu'lghâzi*, who makes it a Part of *Kitay*: But, in all Likelihood, may be miſtaken, as he is in many other Matters relating to the Eaſtern Part of *Tartary*.]

Mogul Empire.

"*Lyau* (or *Kitan*) founded, in the Year 1124, by *Ye-lu Ta-che*, the Reigns of whose Succeſſors [a] are inſerted in the *Chineſe* Hiſtory, till it was deſtroyed by *Kuchluk*, in the Year 1212 [b]; as hath been before related [c]."

Kuchluk *plain.*

KO-PAU-YU, one of the *Chineſe* Generals in *Chingkiz Khân*'s Army, having been deſperately wounded in the Battle with the *Kitan*, that Prince honoured him with a Viſit in his Tent. When recovered, he was ſent to beſiege *Biſhbaleg* [d]; which was taken, with the other Cities in that Country. At the ſame Time *Ganchor*, a Lord of the Hord of *Yongku* [e], ſubdued the City and Country of *Almaleg* [f]. *Koſmeli*, one of the great Officers of the laſt *Kohân* of the Weſtern *Lyau*, underſtanding that *Chingkiz Khân* came to make War on *Kuchluk*, perſuaded the Chief of the City of *Aſan* [g], and thoſe of other Hords, to ſubmit to *Chepe*. *Chingkiz Khân* being informed of this, ſent for *Koſmeli*, and gave him the Command of a Body of the Van-Guard. *Kuchluk* was defeated [h], and his Head ſtricken-off, by the *Khân*'s Order: After this, it was expoſed to View in all the Towns and Villages of the *Naymans*, and *Kitan*, through which they paſſed. Hereupon thoſe Hords, with the *Kankli*, acknowledged *Chingkiz Khân* for their Sovereign.

Mawara'l-nahr *invaded*,

THE People of the *Si-yu* [i], having maſſacred certain Perſons ſent by the Emperor, he was ſo enraged at it, that after ſubduing the Countries in the Neighbourhood of *Kaſhgar*, he went and beſieged *Otrar* [k]: Which being taken in 1219, the Governor, called *Achir* [l], who had committed that Crime, was put to Death. In the third Month of the Year 1220, he took *Pu-whа*; in the fifth *Sun-ſe-kan*; and, in the ſeventh, *Kan-to-lo-eul*. At *Sun-ke-ſan* [m] he met with Reſiſtance from the *Whey-hû* [n], whoſe King, called *Jalâl-addîn* [o], quitted the City, on the *Khân*'s Approach. *Pi-tû*, Son of King *Yelu Lyew-ko*, though dangerouſly wounded, ſeeing *Chuchi*, the *Khân*'s eldeſt Son, an intrepid Prince, engaged almoſt ſingly againſt a Troop of the Enemy, ran to his Aſſiſtance, and, though quite ſurrounded, they broke through, and eſcaped. Prince *Yelu-kohay*, his Relation (for there were many *Kitan*, both Officers and Soldiers, in the Army) was left Governor of the Place.

THE *Whey-hû* had lined the Banks of the River *Gan-mû* [p] with their beſt Troops, covered by no fewer than ten Intrenchments: They likewiſe crouded the River with Barks. But the General *Ko-pau-yu* cauſing fiery Arrows to be made, and ſhot at the Barks, ſet them in a Flame. The Blaze and Smoak putting the *Whey-hû* in Diſorder, the *Mongols* attacked their Intrenchments on every Side, and forced them [q].

IN 1221, the *Mongul* Year of the Serpent, *Chingkiz Khân* ſubdued the Cities of *Bokhara* [r], and *Sye-mi-tſe-kan*. *Chûchi* took *Yang-ki-kan*, and *Pa-eul-ching*. During the Summer-Heats, the *Khân* reſided at the *Iron Gate* [s], a Fortreſs to the Weſt of *Samarkant* [t]. There he received two celebrated Embaſſies from the Emperors of the *Song*, and *Kin*, who made Propoſitions of

[a] [The *Perſian* Hiſtorians mention two of the Kings of *Kara-kitay*, under the Title of *Kûr Khân*, or *Gûr Khân*. To the firſt the *Khân* of *Balaſgun* reſigned his State: After which he conquered *Kaſhgar*, *Khoten*, *Biſhbalig*, and *Turkeſtân*, in 1141. His Succeſſor, *Kujang*, was Contemporary with *Jenghiz Khân*, and is made to live eighty-one Years. Theſe *Kara-kitayans* came from *Kitay*, and founded their Dominion in the Parts about *Imil*, mixed with *Turks*. See *Hornius Arca Noæ*, p. 287, & *ſeq.* This Account of the Seat of the *Kara-kitayans*, agrees with that aſſigned the *Kitan* in the Text: But differs from *Abu'lghâzi*'s, who ſays their *Khân* ſettled there, after being driven out of *Kara-kitay* in 1177. He ſhould, perhaps, have ſaid, out of *Kitay*, where he might have been ſome Chief of a Hord: He alſo makes this *Khân* the ſame who was invited to *Balaſagan*, and afterward routed by *Kuchluk*.] [b] Hiſt. *de Gentch.* p. 34, and 127. [c] See before, *p.* 420, a, and 421. a. [d] Or, *Biſhbalik*. In the *Chineſe*, *Pye-che-pa-li*: It lies to the North of *Turfán*. [e] In the Weſtern Parts of *Tartary*. [f] [Or, *Almalig*, ſo called by *Abulfeda*, and other Oriental Writers. In the *Chineſe*, *O-li-ma-li*.] [g] This Town, or Hord, ſeems not to have been far from *Kaſhgar*. [h] [The Defeat and Death of *Kuchluk*, is related ſomewhat differently by *Abu'lghâzi Khân*. See before, *p.* 422. a.] [i] By *Si-yu*, muſt be underſtood the People of *Mawara'lnahr*, or the *Karazmians*, who then held the Empire in the Weſt of *Aſia*: Or, it may be the Title given to the *Karazmian* Monarch by the *Chineſes*, as they did that of *Tan-yu*, to a *Khân* of *Tartary*. *Si-yu*, ſignifies, *the Weſtern Yu*.] [k] In the *Chineſe*, *Wo-ta-la*. D'Herbelot writes *Gair* [and *Abu'lghâzi*, or rather his Tranſlators, *Gaghir*. In theſe Matters, the Hiſtorians of the Weſt of *Aſia* are to be preferred.] [l] There is no determining, with any Certainty, what Places theſe were; only *Sun-ke-ſan* is ſuppoſed to be *Kojend*, and the rather, becauſe a Catalogue of the Hiſtory of the *Lyau* calls it *Ho-chong*, or *Ko-chong*. [m] Account is given of the *Whey-hû* before, *p.* 431. e. They may be written alſo *Whey-he*, or *Whey-ke*. [n] In *Chineſe*, *Cha-la-ting*. He is called alſo *So-tan*, or *Sû-on-tan*, and *Ko-ſey-cha-çuc-ſû-on-tan*, that is, *Soltân of the Kingdom of* Ko-ſey-cha. Thus the Father, *Mohammed Karazm Shâh*, is often confounded with his Son. [*Ko-ſey-cha* ſounds like *Kaſchak*, or *Kipjak*, although by the Situation, this latter ſhould rather be *Ki-cha*, before-mentioned.] [p] This ſeems to be the *Jihûn*, or *Amû*, [by the Sound: But ſhould rather be the *Sihûn*, or *Sîr*, on which *Kojend* is ſituate.] [q] [There is no Account of this in *Abu'lghâzi*'s Relation of the Siege; or of *Timûr Malek*'s brave Defence, in the *Chineſe* Hiſtory.] [r] In *Chineſe*, *Po-ha-eul*, that is, *Bogar*. [s] [Or, *Kolluga*.] [t] In *Chineſe*, *Sa-ma-eul-han*.

Peace

Peace; but being reſolved to deſtroy thoſe Powers, they were not accepted. In Autumn *Balk* [a] was taken. *Chingkiz Khân* having ordered his General, *Porchi*, to inſtruct *Chagatay*, his ſecond Son, in the Art of War, named that Prince Governor of great Part of his Weſtern Conqueſts. *Chuchi*, *Chagatay*, and *Oktay*, in the Year 1221, took *Yu-long*, and *Kye-ſhe*. *Toley*, formed under the *Khân* himſelf, took *Ma-lu*, *Sha-ki-ko*, *Ma-lu-ſi-la-tſe* [b], and other Places. This Year the *Khân* declared *Ho-lin* [c] the Metropolis of his Dominions in *Tartary*; that is, the Place where the Princes and Chiefs of Hords were thenceforward to hold their general Aſſemblies [d].

In 1222, the Emperor reſolving to beſiege *Talkan* [e], gave a great Body of Troops to *Toley*; whom *Idikut*, King of the *Igûrs*, deſired to accompany, at the Head of ten thouſand of his Subjects. *Toley*, who liked the *Igûrs*, was charmed to have their Prince in his Army, both becauſe he had excellent Officers, and was a great Commander, having given many Proofs of his Valour in Conjunction with *Chepe*, againſt the *Whey-hû*. *Idikut* [f] was of an ancient Family, of the Chiefs of the Hord of above five hundred Years ſtanding. They firſt poſſeſſed the Country where the River *Selinga* riſes: In Proceſs of Time they became Maſters of the Country of *Kau-chang*, *Igûr*, or *Kyau-chew*, being the ſame with that of *Turfân*. The *Chineſe* Geography ſays, that the People of *Igûr* underſtood the *Chineſe* Characters, and had the Books of *Confuſius*; that they honoured the Spirit of Heaven, had many *Bonzas* among them [g], and followed the *Chineſe* Kalendar [h].

Toley and *Idikut* firſt took *Thûs* [i], *Niſhabur* [k], and other Places. Afterwards they acquired a great deal of Plunder in the Kingdom called *Mû-lay* [l]; then paſſing the River *Shû-ſhû-lan*, and taking the Road of *Ye-li*, arrived at *Talkhân*; which, by their Aſſiſtance, was taken and deſtroyed. *Chingkiz Khân* being informed, that *Jalâl-addin* [m], King of the Weſt, had joined *Mye-li*, marched at the Head of his Troops, and defeated the Army of the two Princes; *Mye-li* was taken, but the other eſcaped. Touching this Event, the *Chineſe* Authors differ. Some ſay, *Cha-la-ting*, or *Jalâl-addin*, fled firſt to *Herat* [n], and then to *Han-yen*; that being beaten at both Cities, he retired into the Sea. Others more rightly, make *Mye-li* [o] the King of the *Mohammedans*, and affirm, that being hotly purſued by the *Mongols*, he entered the Sea, and died. All agree, that he abandoned his Money and Jewels, which fell into their Hands. 1224. Jenghîz Khân.

The King of *Kin-cha* [p] having not only ſpoken diſreſpectfully of the Emperor, but often given Shelter to his Enemies, the General *Suputay* aſked Leave, in 1223, to make Incurſions into his Country. To him were joined *Chepe* and *Koſmeli*. They marched firſt along the *Tenkiz Nor* [q], and made Roads over Mountains which ſeemed inacceſſible. They ruined the Cities of *Ku-eul*, *Te-ſhe*, *Wan-ſha*, *He-lin*, and others. Then paſſing the *Wolga* [r], in ſeveral Battles, defeated the People of *Kûr-ſhe*, *A-ſû* [s], and the *Ruſſians* [t]; whoſe Chief was called *Mi-chi-ſe-la*. This Lord was taken, and, at length, beheaded; the Country of *Kin-cha* ravaged; and *Ho-han Ho-to-ſe*, Prince of the *Kang-li*, defeated, near the City *Po-tſe-pa-li*. At the Return from this Expedition, *Chepe* [u] died in great Reputation. Kin-cha invaded.

While *Chingkiz Khân* paſſed the hot Seaſon at *Pa-lu-van*, whither his Sons and Generals repaired to him, they agreed on a Form of Government for the Weſtern Conqueſts. And here it is obſervable, that the Emperor, beſides the Officers of War, firſt appointed *Tagûrſi* [w], or *Mandarins*; who had Seals, and determined civil Matters.

In 1224, the *Khân* marched to a great King- *Conqueſts in India.*

[a] *Pan-le-ki*, in *Chineſe*; which, with *Tye-li-mi*, or *Termi*, that is, *Termed*, were taken by the *Khân* in Perſon. [b] [As neither the Order of the Conqueſts, their Dates, nor Names of the Places, in the *Chineſe* Hiſtory, are the ſame as in that of *Abu'lghâzi*, and other Weſtern Writers, it is very difficult to reconcile them together. However, *Ma-lû* ſeems to be *Marû*; of which Name there are two Places.] [c] The ſame with *Kara-koram*. [d] [Theſe are called *Kuriltay*, by the *Mongols*.] [e] *Ta-li-han*. [f] *Abu'lfaraj* writes, *Idikût*, that is, *Lord of the Empire*, p. 283. [g] *Gaubil*, from hence, ſeems to ſuppoſe they were Chriſtians: Rather the contrary reſults. [h] Hiſt. *de Gentch.* p. 34, & *ſeqq.* [i] [Called alſo *Maſh-had*, that is, *the Place of Martyrdom*, meaning, of *Imâm Riza*.] [k] *Nye-cha-u-eul*. [l] *Mûlay* is the Country where *Hulagu*, *Jenghiz Khân*'s Grandſon, made ſo fierce a War againſt the Inhabitants, who were a bad Sort of People, but warlike, and intrenched in the Mountains: It is a Part of *Jebâl*. [Theſe are the *Melahedah* (whence *Mulay* is a Corruption) called alſo *Aſſaſſins*, and their Prince, *the old Man of the Mountain*. They poſſeſſed Part of *Jebâl*, or *Kuhiſtân*, that is, *the Mountain Country*; in *Perſian*, *Irâk*.] [m] [In this Place, and elſewhere, *Chalanting*.] [n] In *Chineſe*, *Ha-la-he*, or *A-la-he*. [o] [By *Mye-li*, muſt be underſtood *Mohammed Karazm Shâh*, the Father of *Jalâl-addin*.] [p] [Before called *Ki-cha*. This muſt be *Kipchak*, for it fell to *Chuchi*'s Share.] [q] So the *Mongols* call the *Caſpian Sea*. *Nor*, ſignifies *Sea*, or *great Lake*. The *Chineſe* write, *Tyen-ki-tſe*. [The *Turks* call the Sea, *Denghiz*; as *Kara Denghiz*, or, *the Black Sea*.] [r] *O-li-ki*. [s] This Country, which furniſhed the *Mongols* with good Officers, was not far from the *Caſpian Sea*. [t] *Wo-lo-tſe*. [u] Called by *D'Herbelot*, *Jebe Noyan*. [w] *Ta-lu-cha*.

Mogul *Empire.*

dom in the Eaſt, called *Hin-tû*, *In-tu*, or *Sin-tû* [a]. Here coming to a narrow Paſs, called *the Iron-Gate*, fortified both by Nature and Art, it is ſaid, ſeveral *Monguls* ſaw a Monſter, reſembling a Stag, with green Hair, a Horn in his Forehead, and the Tail of a Horſe, who told them, *their Maſter muſt turn back*. *Chingkiz Khân*, ſurprized at this Relation, aſked *Yelu-chu-tſay*, his Prime Miniſter, about it; who informed him, the Animal was named *Kyo-twan*, that he underſtood four Languages, and, poſſibly, did not love Slaughter. Hence he took Occaſion to exhort him to return, and deſtroy no more People.

The Khân *returns.*

AFTER this, the Emperor cauſed ſeveral *Indian* Cities to be plundered; but finding his great Officers weary of a War ſo far from home [b], reſolved to take the Road of *Tartary*. Several Officers out of the Weſt went, with their Families, to ſettle in *China*. *Jagatay* was left to govern the conquered Countries, and follow, in all Things, the Advice of *Porchi*, his Generaliſſimo. *Chuchi* was ſent into *Kin-cha*, where he ſoon after died; leaving his Son *Batu* [c], a young Prince of great Hopes, for his Succeſſor [d].

Affairs of Lyau-tong.

CHINGKIZ KHAN ſet forward, accompanied by his other two Sons, King *Idikût*, the Princes *Pi-tâ*, *Wa-chen*, *Po-yau-ho*, Son of the Prince *A-la-u-tſe*, with the Generals *Su-pu-tay*, *Cha-han*, *Koſmeli*, *Ko-pau-yu*, and others, reſolving to make War on the King of *Hya*. He had left the Government of his Dominions to his Brother *Wa-che*, who managed with great Prudence. In 1220, the Princeſs *Tyau-li* repaired to this Prince's Court, to notify the Death of her Spouſe *Lyew-ko*, King of *Lyau-tong*. *Wa-che* received her with Magnificence, and ſent her back with Troops to govern *Lyau-tong* till the Return of the *Khân*; which Truſt ſhe diſcharged with great Applauſe.

And of Ki-tay.

ON the other Hand, *Mûhûli*, his Lieutenant-General in *China*, acquired much Reputation in the War, which he maintained againſt both the Emperor of the *Kin* and King of *Hya*. In 1218, *Chang-yau* [e], a General of the *Kin* Army, gathered a large Body of Troops to revenge the Death of another General, his Friend, who had been murdered by an Officer, who was his Enemy. Coming to *Tſe-kin-quan* [f], he was attacked by *Mingan*, and fought bravely; but his Horſe falling, he was taken: And being brought bound before the Victor, refuſed to kneel to him; ſaying, as he was a General himſelf, he would rather die firſt. *Min-gan* admiring his Greatneſs of Soul, diſmiſſed him with Honour; and treated the other Priſoner Officers well: Yet, at the ſame Time, ordered *Chang-yau*'s Father and Mother to be put to Death. The Son hearing this, after debating the Matter with himſelf, to ſave their Lives, offered to enter in the *Mogul* Troops; and few Officers were his Equals, or did the *Khân* more Service.

THREE Months after, *Mûhûli*, accompanied with his Son *Pûlu*, or *Polû*, recovered the Places in *Shan-ſi*, which the *Kin* had taken back and fortified. *Tay-ywen fû*, the Capital, ſuſtained three Aſſaults: But the Officers perceiving they could neither defend the City, nor make a Sally, and cut their Way through the *Mongols*, killed themſelves. The Officers of other Places followed their Example, rather than fall into the Hands of *Mûhûli*'s Troops. The Emperor of the *Song* [g], who had already declared War againſt the *Tartars* of *Nyu-che* [h], refuſed to make Peace with them; and, by Edict, exhorted his Subjects to drive them out of *China*. Hereupon, the Emperor of the *Kin* ſent his Son and Heir againſt the *Song*; which War was carried-on with various Succeſs.

THE Beginning of the Year 1219, *Kau-ki* [i], Miniſter of the *Kin*, built a little City within the Incloſure of *Kay-fong fû* in *Ho-nan*, and fortified it very ſtrongly. In the fourth Month, *Chang-yau* having been nominated to the Command of a Body of Troops by *Mûhûli*, took ſeveral Cities in the Diſtrict of *Pau-ting fû*; and then went to attack *Kya-gu*, the Murderer of his Friend, who was intrenched on a Mountain: But not being able to force his Works, he cut-off his Water; ſo that the other was obliged to ſurrender. *Chang-yau* tore-out his Heart, and ſacrificed it to the Manes of his Friend. Afterwards, retiring with his People to *Manching*, a little unfortified City, to the North-Weſt of *Pau-ting fû*, *U-tſyen*, General of the *Kin*, came to beſiege him. *Chang-yau* cauſing all the uſeleſs Men to mount the Walls, ſallied with the braveſt of his Soldiers, and cut his Way, with great Slaughter, through his Enemies. Having eſcaped this Danger, he found himſelf ſurrounded by a Body of Reſerve. At the firſt Onſet, to of his Teeth happened to be knocked-out with an Arrow: But becoming rather more furious, although he had loſt almoſt all his Men, he broke through them; and, with the few Soldiers left him, aſſaulted and plundered four little Cities that were in his Road: After which, receiving ſome Reinforcements, he acquired Fame

[a] [That is, *India*, called by the Orientals, *Hend*, and *Send*.] of *Mongols* was ſent to *Arabia*, and took *Metena* (or *Medina*.) [b] Several *Chineſe* Books ſay, that an Army [c] *Pa-tû*. [d] Hiſt. *de Gentch.* p. 38, &c. *Seqq.* [e] He was a Native of *I-chew*, in *Pe-cheli*. [f] A famous Fortreſs in the Mountains of *Pe-che-li*, Latitude thirty-nine Degrees twenty-ſix Minutes, Longitude one Degree nine Minutes Weſt. [g] Or, of *China*, who had the Southern Provinces. [h] Or, *Nyu-chin*, that is, the *Kin*. [i] Or, *Chu-yu-kau-ki*.

by the Conqueſts he made in the Diſtricts of *Ching-ting fû* and *Pau-ting fû*, in *Pe-che-li*.

THIS ſame Year, the *Mongols*, by their Arms, made *Korea* [a] tributary; and, at the End of it, the *Kin* Emperor put-to Death his Prime Miniſter *Kau-ki*, who was accuſed of being, by his bad Advice, the Cauſe of all the Evils which the Empire ſuffered. In 1220, in the eighth Month, *Mûhûli* arriving at *Man-ching*, near *Pau-ting fû*, above-mentioned, ſent a Party to the Paſs of *Tau-ma-quan*, a Fortreſs in the Mountains [b]; who having beaten a Detachment of the *Kin*, the Governor of *Ching-ting fu* ſubmitted, and delivered that important Place to *Mûhûli*; who ordered his Army to ſet at Liberty all the Priſoners they had made, forbidding Slaughter and Plunder under the ſevereſt Penalties.

THE *Kin*, after the Death of *Kau-ki*, took proper Meaſures for defending their Dominions. He was ſucceeded by *Su-ting*, who had both Experience and Skill in the Art of War. This Miniſter had found Means to ſet on-foot an Army of two hundred thouſand Men in *Shan-tong*; with which he fruſtrated the Deſigns both of the Emperor of *China*, and King of *Hya* in *Shen-ſi*, who were forced to raiſe the Siege of *Kong-chang fû* [c]. The Army which the *Kin* had in *Shan-tong* being encamped at *Whang-ling-kang*, the General ſent twenty thouſand Foot to attack *Mûhûli*, who lay near *Tſi-nan fu*, the Capital of that Province which he had taken. The *Mongul* General having had Notice hereof, went to meet [d] this Detachment, fought and defeated it. Afterwards he attacked the Enemy's Army, drawn-up on the River-Side, making his Cavalry diſmount, and, after a furious Battle at cloſe Fight, routed them; an infinite Number being drowned in the Flight [e].

MUHULI, after this Victory, made ſeveral Conqueſts, and ſat-down before *Tong-chang fû* [f]; but perceiving it would hold-out too long, raiſed the Siege and left Troops to block it up. In the fifth Moon of the Year 1221, the Gariſon falling in Want of Proviſions, attempted to withdraw: But the Officer, who commanded the Blockade, entirely defeated them, killing ſeven thouſand, and then took Poſſeſſion of the City. *Mûhûli*, from *Tong-chang fû*, marched to *Tay-tong fû* in *Shan-ſi*; then paſſing the *Whang-ho*, forty Leagues Weſt of that City, entered the Country of *Ortûs*, and ſpread Terror through the Kingdom of *Hya*. The beſt Courſe its King had to take, was to do whatever the *Mongol* General would have him. He committed no Hoſtility this Year againſt *Hya*, but attacked the *Kin*. He blocked-up *Yan-gan*, a City of *Shen-ſi*; but found it too-well fortified, and provided, to be quickly taken. He ſlew more than ſeven thouſand of the Enemy, ſubdued *Kya-chew*, which he fortified, and ſome other Places. His Deſign was to ſeize the Poſts which might facilitate the taking of *Tong-quan*, in order to go and beſiege *Kay-fong fû*. 1225. Jenghîz Khân.

IN 1222, *Mûhûli* made many Conqueſts in the Diſtrict of *Ping-yang fû*; and the Year following, attacked *Fong-tſyang fû* in *Shen-ſi*. The *Mogul* General repaſſed the *Whang-ho*; and having driven the *Kin* out of ſeveral Poſts in *Shan-ſi*, and recovered *Pû-chew* [g], which they retook the Year before, he ſet-out upon another Expedition, but fell ſick at *When-hi hyen*; and perceiving himſelf near his End, ſent for his Brother *Tay-ſun*, and earneſtly recommended to him the taking of *Pyen-king* [h], as a Matter of great Importance, being grieved that he had not done it himſelf. After theſe Words he expired, aged fifty-four Years; forty of which he had ſerved in the Army with Succeſs. Mûhûli's Death,

MUHULI was conſidered by all the *Moguls* as the firſt Captain of their Empire. *Chingkîz Khân* had an entire Confidence in him. The great Dignity to which he was advanced, did not leſſen his military Ardour; and in all the grand Enterprizes, he underwent as much Fatigue as the meaneſt Soldier. The *Khân*, before he was declared Emperor, retreating, after a Defeat, by Night, to his Camp, and not able to find it for the Snow that had fallen, being much fatigued, lay down upon ſome Straw to ſleep. Hereupon *Porchi* and *Mûhûli* took a Covering and held it over him all Night in the open Air. This generous Action gained them much Reputation, and rendered their Families in great Eſteem among the *Mongol* Princes. *Mûhûli*'s Death was very afflicting to *Chingkîz Khân*; who appointed his Son *Pûlû* to ſucceed to his Titles and Dignities. And Character.

IN the Year 1224, and ninth Month, the Emperor of the *Kin* died: He was ſucceeded by his Son *Shew*, who, next Month, made Peace with the *Hya*.

IN the Beginning of the Year 1225, the Emperor *Chingkîz Khân* arrived at the River *Tûla* Chingkîz Khân's Return,

[a] Called by the *Tartars*, *Solgho*; and, by the *Chineſes*, *Kau-li*, and *Chau-tſyen*. *Gaubil* ſent a Map of it to *France*. [b] Latitude thirty-nine Degrees ſix Minutes; Longitude one Degree forty-five Minutes. [c] Latitude thirty-four Degrees fifty-ſeven Minutes forty-nine Seconds; Longitude eleven Degrees forty-five Minutes Weſt. [d] The Number of his Troops is not mentioned. in

Mogul *Empire.*

in *Tartary*, after near ſeven Years Abſence in the Weſt: And it is eaſy to judge what Impreſſion his Return made in the Minds of the neighbouring Powers, whether Friends or Enemies. *Tyau-li*, Queen of *Lyau-tong*, came to meet that Monarch with the Princes, her Nephews: That Lady, who had much Spirit, fell on her Knees to acknowledge *Chingkiz Khân*, and made him Compliments on his great Conqueſts. The Emperor, in his Turn, condoled her on the Death of the King, her Spouſe; praiſed the Manner in which ſhe governed her Kingdom; and promiſed his Protection to her whole Family. *Tyau-li*, after returning Thanks, prayed him to nominate *Pi-tû* King of *Lyau-tong*. The *Khân* could not help admiring the Juſtice and Prudence of this Lady: For *Pi-tû* was Son of *Lyew-ko*, but his Mother was dead; and *Tyau-li* had ſeveral Children by the ſame King. As *Shenko*, the eldeſt, had all the Qualifications proper for governing, the Emperor was for having them reign in Conjunction: But the Queen perſiſting in her Requeſt for *Pi-tû*, that Monarch nominated him; and had the Goodneſs to relate to her the many brave Actions he had done in the Weſt. The Emperor kept *Shenko* at his Court; and ordered a great Lord to conduct the Queen and the new King into *Lyau-tong*.

Invades Hya.

LI-TE, King of *Hya*, had given Shelter to *Sun-quan-ki* and *Che-lu-ho*, two great Enemies of the *Monguls*: Of this the *Khân* loudly complained; but *Li-te*, far from making Satisfaction, took thoſe very Perſons into his Service. To this imprudent Action, and his refuſing to give his Son in Hoſtage, as he had promiſed, the *Chineſe* Hiſtory imputes the Ruin of the Kingdom of *Hya*. The *Khân*, provoked, marched in Perſon, and, in the ſecond Month of the Year 1226, took *Yetſina* [a]. After this the *Monguls* forced all the Fortreſſes, which were very numerous, between that City, *Ning-hya*, *Kya-yu-quan* [b], and *Kan-chew* [c]. *Sû-chew* [d], *Kan-chew*, and *Si-lyang fû* [e], were alſo taken. The King of *Hya* died in the ſeventh Month of Grief, to ſee his Dominions become a Prey to the *Mongols*. In the eleventh Month, the *Khân* took *Ling-chew*, to the South of *Ning-hya*, and then encamped thirty or forty Leagues to the North of the former.

OKTAY, his third Son, accompanied by General *Chahan*, went into *Ho-nan*, and laid Siege to *Kay-fong fû*, Capital of that Province, and then the Reſidence of the *Kin* Emperor; but they were obliged to raiſe it. However, in 1227, marching into *Shen-ſi*, they took moſt of the Fortreſſes that were in the Diſtricts of the Metropolis *Si-gan fu*; then advanced towards the Places and Forts which the *Kin* poſſeſſed in the Departments of *Fong-tſyang fû* and *Han-chong fû*. *Oktay* having gone into *Tartary*, and left the Command to *Chahan*, the *Kin*, who concluded his Deſign was to re-enter *Ho-nan*, offered new Propoſals of Peace to *Chingkiz Khân*; which being rejected, they made a laſt Effort. They reſolved to think of nothing, but defend themſelves the beſt they could in *Ho-nan*: They fortified the Paſſages of the *Whang-ho* and principal Cities: They furniſhed *Tong-whan* with a great Number of Troops; and ſet on-Foot an Army of two hundred thouſand choſen Men, commanded by the beſt Officers they had [f].

CHINGKIZ KHAN having in the Spring left an Army to beſiege *Ning-hya*, Capital of the Kingdom of *Hya*, ſent a great Body of Troops, who ſeized the Countries of *Koko Nor* [g], *Qua-chew*, and *Sha-chew* [h]. The *Khân*, at the Head of another Body, made himſelf Maſter of *Ho-chew* [i] and *Si-ning* [k]. Then, after cutting in Pieces an Army of thirty thouſand Men, he went and beſieged *Lin-tau fû*, which belonged to the *Kin*: This he took, with ſeveral others; and then, proud of ſo much Succeſs, went to paſs the Summer-Heats on the Mountain *Lû pan* [l], in *Shen-ſi*.

LI-HYEN, King of *Hya*, who ſucceeded *Li-te*, being reduced to the laſt Extremity in *Ning-hya*, ſurrendered, at Diſcretion, in the ſixth Month, and ſet-out for *Lû-pan* [m], to humble himſelf before the Emperor. That Prince had

[a] *Yetſina*, *Etſina*, *Eychina*, or *Echina*, was a conſiderable City of the Kingdom of *Hya*; the ſame *M. Polo* calls *Ezina*. The *Chineſe* Geography places it to the North of *Kan-chew*, and North-Eaſt of *Su-chew*, an hundred and twenty Leagues from the former; but that Diſtance muſt be too great. It is at preſent deſtroyed. [It ſtood upon a River of the ſame Name, called alſo *Echina*. It runs by *Sû-chew*, and a Branch of it by *Kan-chew*.] [b] It is a Fort, at the Weſt-End and Gate of the great Wall. [c] *Kan-chew* is the *Kampition* of *M. Polo*. [d] *Su-chew* is *Su-chure* of *M. Polo*. [e] *Si-lyang fû* was then a very great City. It is now a Fortreſs, called *Yong-chang-wey*: Latitude thirty-eight Degrees twenty Minutes; Longitude fourteen Degrees ten Minutes Weſt. [f] Hiſt. *de Gentch.* p. 46, *&* *ſeqq.* [g] The true Pronunciation is *Hû-hû-nor*, or the Lake *Hû-hû*, at preſent poſſeſſed by the *Eluths*. See before, *p.* 402. [h] *Sha-chew*, Latitude forty Degrees twenty Minutes; Longitude twenty Degrees forty Minutes Weſt. It is near *Qua-chew*, to the Weſt of it. [i] *Ho-chew*, in *Shen-ſi*, fourteen or fifteen Leagues to the North-Weſt of *Lin-tau fû*. [k] *Si-ning*, in *Shen-ſi*, near *Ko-ko-nor*. [l] About Latitude thirty-five Degrees; Longitude ten Degrees forty-five Minutes Weſt. [m] One Hiſtory ſays the Khân was at *Tſing-chû-i*, a City in *Shen-ſi*, depending on *Kong-chang fû*, when *Ning-hya* was taken.

no sooner left the City than he was slain [a]. Both the Palace and City were plundered. A cruel Slaughter was made of the Inhabitants; the Plains being covered with dead Bodies: Those who escaped the Sword, flying to the Mountains, Woods, and Caves. It is remarked in the History, that the *Monguls*, since they issued-out of their sandy Desart, did nothing but plunder, kill, burn, and destroy all before them wherever they came.

CHINGKIZ KHAN having thus put an End to the Kingdom of *Hya*, after it had continued near two hundred Years under its own Princes, who were *Tartars* of the Tribe of *Topa* [b], intended also to complete the Conquest of the Empire of the *Kin*. But, the Beginning of the Year 1227, he fell sick on the Mountain before-mentioned; and finding Death approach, on the eighteenth of *August* [c], sent for the Generals of the Army, and before them declared Prince *Toley*, his fourth Son, Regent of the Empire, till the Arrival of his Brother *Oktay*, whom he nominated for his Successor and Heir. Then recommending Union and Peace among them, he told them, with regard to the War against the *Kin*, that as the best of their Troops guarded *Tong-quan*, and they were Masters of the Mountains to the South, where they had fortified themselves, besides having a great River to the North for their Frontier, it was therefore difficult to attack and vanquish them, without the Assistance of the *Song* (or *Chinese*;) who being their mortal Enemies, he advised them to demand a Passage through their Territories, in order to attack them: That entering by the Cities *Tang* and *Teng* [d], they should march directly and besiege *Ta lyang fû* [e]: That this would oblige the *Kin* to call their Troops from *Tong-quan*; and, that as they would be fatigued by the Length of the Journey, they might be attacked with Advantage. Having spoken these Words, he died, aged sixty-six, after a Reign of twenty-two Years.

The Emperor of the *Mongols* had a great Number of Children. But the History mentions only six Sons, and three Daughter. *Chuchi*, the eldest Son, was a great Captain, active, violent, and delighting in War. *Chagatay* was universally beloved for his Wisdom and Affability. *Ogotay*, or *Oktay*, was endowed with much Prudence and Greatness of Soul; was courageous, and loved Justice [f]. *Toley* was beloved by his Father, and generally esteemed by the *Tartars*. Of *Uluche* and *Kolyekyen*, the two last, nothing remarkable occurs. The three Princesses were married to *Idikût*, *Poyaho*, and *Po-tu*, as hath been already observed: And the Heirs of these three Sons-in-law of the *Khân* usually marry the Daughters of the *Mongul* Emperors. 1228. Jenghîz Khân.

CHINGKIZ KHAN had a great Number of Wives, many of whom bore the Title of Empress. All these Wives were distinguished by their Palaces; and these Palaces, called *Ordû*, or *Ortû* [g], were to the Number of four. The first and most considerable of the Empresses was *Hyuchen*, Daughter of *Te-in*, Lord of the *Hongkirat* Hord: *Oktay* and *Toley*, being her Children, were, for that Reason, preferred to the rest. The *Khân* excluded the Princes of the Family, born of *Chinese* Women, from inheriting the Crown. *And Wives.*

TOLEY, upon his Father's Death, sent Officers to notify it to the Princes of his House, and Generals of the Army. Mean-while, the War against the *Kin* was carried-on with more Vigour than ever. *Ho-chew* [h], in *Shen-si*, had held-out a long Time, animated by the Bravery of *Chin-in*, the Governor; who, at length, finding the City ready to be forced by the Enemy, advised his Wife to provide for her Safety. That Lady answered resolutely, that as she had shared with him the Honours and Pleasures of Life, she would die with him, and immediately took Poison. His two Sons, and Daughter-in-law, followed her Example. *Chin-in*, after causing them to be interred, slew himself, and the City was taken. The *Kin*, commanded by a Prince of the Blood, defeated the *Mongols*, and killed eight thousand of them in the Beginning of the Year 1228. *Female Bravery.*

TOLEY having caused the *Khân* to be interred *Ceremony of proclaiming*

[a] This must be the *Shidurkû* of *Abu'lghâzi Khân*; and, if so, the Kingdom of *Hya* must be his *Tangût*, and the City of *Ning-hya*, the City of *Tangût*; although *Tangût* was a different Dominion, inhabited by the *Si-fan*, or *Tu-fan*: But these being then subject to the King of *Hya*, and *Tangût*, which once made a great Figure, only known to the Western Historians, this seems to be the Reason why the latter make no Mention of *Hya*, or the *Chinese* of *Tangût*. [b] From the same Hord sprang the Emperors of the *Wey*, formerly so powerful both in *Tartary*, and the Northern Provinces of *China*. These *Tartars* came originally from the Countries to the North-East of *Pe-king*, between the forty-fifth and forty-third Degree of Latitude. They settled first near *Tay-tong fû* in *Shan-si*. Their Monarchy began in 386, and ended in 572. There is a History in *Chinese* of this Dynasty. [c] One History puts his Death seven Days later, at a Place called *Sali-chowen*; the *Chinese* Word *Chowen*, denoting the *Sali* to have been a Place full of Fountains, Lakes, and Hills. [d] *Teng-chew*, and *Tang-kyen*, Cities of *Ho-nan*, depending on *Nan-yang fû*, and bordering on the Province of *Hû-quang*, by which, and *Shen-si*, he counselled them to enter *Ho-nan*. [e] At present *Kay-fong fû*, Capital of *Ho-nan*. [f] See Hist. *de Gentch.* p. 99. [g] *Wa-cul-tû*. See before, *p.* 441. e. [h] This City was called *Si-Ho-chew*, or *Ho-chew of the West*, to distinguish it from the other Cities of that Name. At present it is called *Man-chew*, being a considerable Fortress, twenty Leagues South of *Lin-tau fû*.

in

Mogul Empire.

in the Cave of *Ki-nyen*, in a Mountain to the North of the ſandy Deſart [a], went to meet his Brother *Oktay*: But the Grandees and Generals not knowing but *Toley* deſigned to make himſelf Emperor, dared not give that Title to *Oktay*. After waiting near the River *Kerlon* till *Chagatay* [b] arrived, the Princes of the Imperial Houſe unanimouſly agreed to adhere to *Chingkiz Khân*'s Will; and, by Advice of *Yelu Chû-tſay*, a general Aſſembly of the Princes and great Lords was appointed to meet at *Ho-lin* [c], in the Year 1229, on the twenty-ſecond of the eighth Month. That Day being come, *Chagatay* and *Toley*, attended by the Princes of their Houſe, the Chiefs of Hords, and Generals of the Army, went, and kneeling before *Oktay*'s Tent, with a loud Voice wiſhed a long and happy Reign to Prince *Oktay*; a Ceremony never before uſed on the Occaſion by the *Mongols*. The new Emperor made *Yelu Chû-tſay* his Prime-Miniſter, and imparted every Thing to his Brother *Toley*, thoſe two Princes having had an intire Affection for each other [d].

Oktay Khân.

Remarks upon

THE foregoing Hiſtory of *Chingkiz Khân*, or *Jengkiz Khân*, is given from the *French*, containing fifty-five Quarto Pages, very little ſhortened, except in the Stile, and by the Method of diſpoſing the Matters. From thence the Reader may perceive, that the Hiſtory of this Conqueror's Wars in *China*, and the Eaſtern Parts of *Tartary*, is delivered very imperfectly, as well as erroneouſly, by the *Perſian*, and other Weſtern Authors: That the Eaſtern Part of *Aſia* was then divided between three great Powers, *viz.* the Emperors of *China*, of *Kitay*, and of *Hya*: That all *Tartary*, to the North and Weſt of *China*, was ſubject, or tributary, to the two laſt: That by *Tangût* in *Abu'lghâzi*, and other Authors, is to be underſtood the Kingdom of *Hya* [e]; and by *Shidurku*, *Li-hyen*, its laſt Monarch: That the Country of *Kara-kitay* was not near *Kitay*, much leſs contiguous to it, as *Abu'lghâzi Khân* repreſents it; but at a great Diſtance towards *Kaſhgar*.

HE will find here likewiſe, among other Things, the Original of the *Turkiſh* Dominion in *Tartary*, in the ſixth Century, agreeable to what is related in the *Byzantine* Hiſtorians; and that *Wang Khân*, ſuppoſing him to be the ſame with *Preſter John*, as ſome Authors affirm, was (to uſe *Gaubil*'s Words) much leſs powerful than they have repreſented him; nor does the *Chineſe* Hiſtory mention any Thing about his Religion [f]. If to this we add the exact Information we receive concerning the Parts of *Tartary*, where the *Tatars*, *Monguls*, *Naymans*, *Karo-its*, and other Tribes [g] inhabited, as well as the Situations of *Kara-koram*, *Etzina*, *Kampition*, *Biſhbalig*, and ſeveral other remarkable Cities, which had puzzled the Learned of *Europe* hitherto to aſcertain, it muſt be acknowledged, that Geography, as well as Hiſtory, is greatly beholding to this *Chineſe* Account of *Jenghîz Khân*; nor is that of his Succeſſors leſs intereſting to thoſe Sciences. It is Pity our Plan will not permit us to inſert the Whole here; but becauſe the very Names, at leaſt the *Tartarian* [h], of thoſe who reigned in *China*, are unknown to the Weſtern Writers, we have ſubjoined a Table of them, with the Dates of their Reigns.

Mongul *Emperors reigning over* Tartary, *and* *Part of* China.

		Reign begun.	Reign ended.
1.	*Genghîz Khân*, or *Tay-tſû*	1205	1227

Introduction.

CHAP. IV.

A DESCRIPTION *of* TIBET, *or* TIBBET.

INTRODUCTION.

ALTHOUGH *Tibet* is a Country of very large Extent, yet it scarce appeared in our Maps, before those published by *De l'Isle*. It was there represented as a narrow Kind of Desart, lying between *India* and *China*, without either Towns, Rivers, or Mountains, although no Part of *Asia* abounds more with the two latter. *Europeans* had, indeed, received some confused Accounts of it from the Missioners sent into the *Indies*; but none particular enough to form any right Judgment of its Qualities, Form, or Dimensions. The Jesuits *Grueber*, and *Dorville*, were the first who (having travelled through great Part of it, in their Way home from *China* in 1661) gave us any tolerable Ideas of its large Extent, or the Customs of its Inhabitants.

THE Letters relating to their Travels are published in *Thevenot*'s *French* Collection. *Kircher* also, in his *China Illustrata*, has given an Account of their Journey through that Country, with Cuts of the most remarkable Things that occurred, as delivered to him by themselves [a]. But, as they travelled only one Road, they have gone but a little Way towards further-ing-out the Geography of those unfrequented Regions. In short, the Map-Makers had almost nothing to work-upon for *Tibet*, but the scanty Materials of those Friars (for *Desideri* [b] says but little of the Country, or Road he took) before the late Missioners in *China* procured a Map of which, though far from being compleat, or exact, in every Particular, affords, on the Whole, a very satisfactory View of the Country.

WITH respect to the Inhabitants, Animals, and other Productions, we are not, perhaps, so well-provided; there being very few Materials for the History to be met-with, but what come from the above-mentioned Missioners. As those who transmitted the Map were not in *Tibet* themselves, they have communicated only a few scattered Remarks, which they had from the *Lama* Mathematicians, who surveyed the Country [c]. Of this Kind are those to be found in *Avril*'s Travels, and *Gerbillon*'s Historical Observations on *Tartary*, who had his Informations from a *Chinese* Envoy. Others, as *Tavernier*, and *Thevenot*, have occasionally spoken, from Report, concerning *Butan*, or *Tibet*. The most compleat and express Piece yet extant upon the Subject, seems to be, *A Description of the Kingdom of* Butan, written by an anonymous Author [d]: But as it does not appear from what Authority he has taken his Memoirs, they are to be made-use of with Caution.

Very defective.

SECT. I.

The Name, Extent, Mountains, *and* Rivers *of* Tibet.

The Name, Situation, Extent, Bounds. Tibet *surveyed: Account of the Map: Its Imperfections. Mountain* Kantes *terrible to pass. Ele-*

[a] A Translation is inserted in *Ogilby*'s *China*. *Thevenot* has omitted the Cuts. [b] *Desideri*, the Jesuit, travelled, in 1714, from *Kashmîr* in *India*, to *Lapas*; but gives little or no Account of the Road, or the Country. These are published by *Du Halde*, in the fourth Volume of his Description of *China*, under the Title of *Geographical and Historical Observations on the Map of* Tibet, *containing the Dominions of the Grand* Lama, *and adjacent Countries subject to him, reaching to the Source of the* Ganges, *extracted from the Memoirs of* Pere [illegible]. [c] An Account of this is given in the *Nieuv. Mercur. Paris*, for *July* 1718.

Country of Tibet.

vation of Tibet. *River* Yarû, *or* Tſan-pu. Ny-kyang, Lan-tſan. Kin-cha Ky-ang. *Source of the* Whang-ho. *River of* Gold. *Lake of Stars. Lakes of* Tibet.

The Name,

THE Country, which *Europeans* call *Tibet*, or *Thibet*, is named, by the Orientals, *Tibt*, or *Tobt*. It is alſo pronounced, by ſome Nations, *Tobet*, or *Tupet*. The *Tartars* call it *Barantola*, under which Name they comprehend all that vaſt Tract lying between the great River *Ya-long*, and the Source of the *Ganges*, extending above twenty Degrees from Eaſt to Weſt, and more than eight from North to South. The People of *Kaſhmîr*, and other on this Side the *Ganges*, call it *Bûton*, or *Bûtan*; and the *Chineſe*, *Tſan*, or *Tſan-li*, from the great River *Tſan-pû*, which runs through it. But *Laſſa*, or *Laſa*, being the richeſt and pleaſanteſt Province, and dignified with the Reſidence of the Grand *Lama*, thoſe Borderers frequently give that Name to the whole Country [a].

WE are likewiſe told, that among the *Tartars*, the Name of *Tanguth*, or *Tangût*, is common to all the Countries, from *Koko-Nor*, to the South of the *Ganges* [b]. But others aſſure us, that it is unknown to the Inhabitants, who call themſelves *Vojid* [c]. The like may be ſaid of *Tufan*, which *Gaubil* ſays is the Name of *Tibet*, or rather one of its Names [d]: That is, ſuch as may be given to it by the *Tu-fan*, or *Si-fan* themſelves, who were formerly Maſters of it, or ſome particular bordering People; for it is certain, neither of thoſe two Names belongs to *Tibet*, at preſent.

Situation, Extent, Bounds.

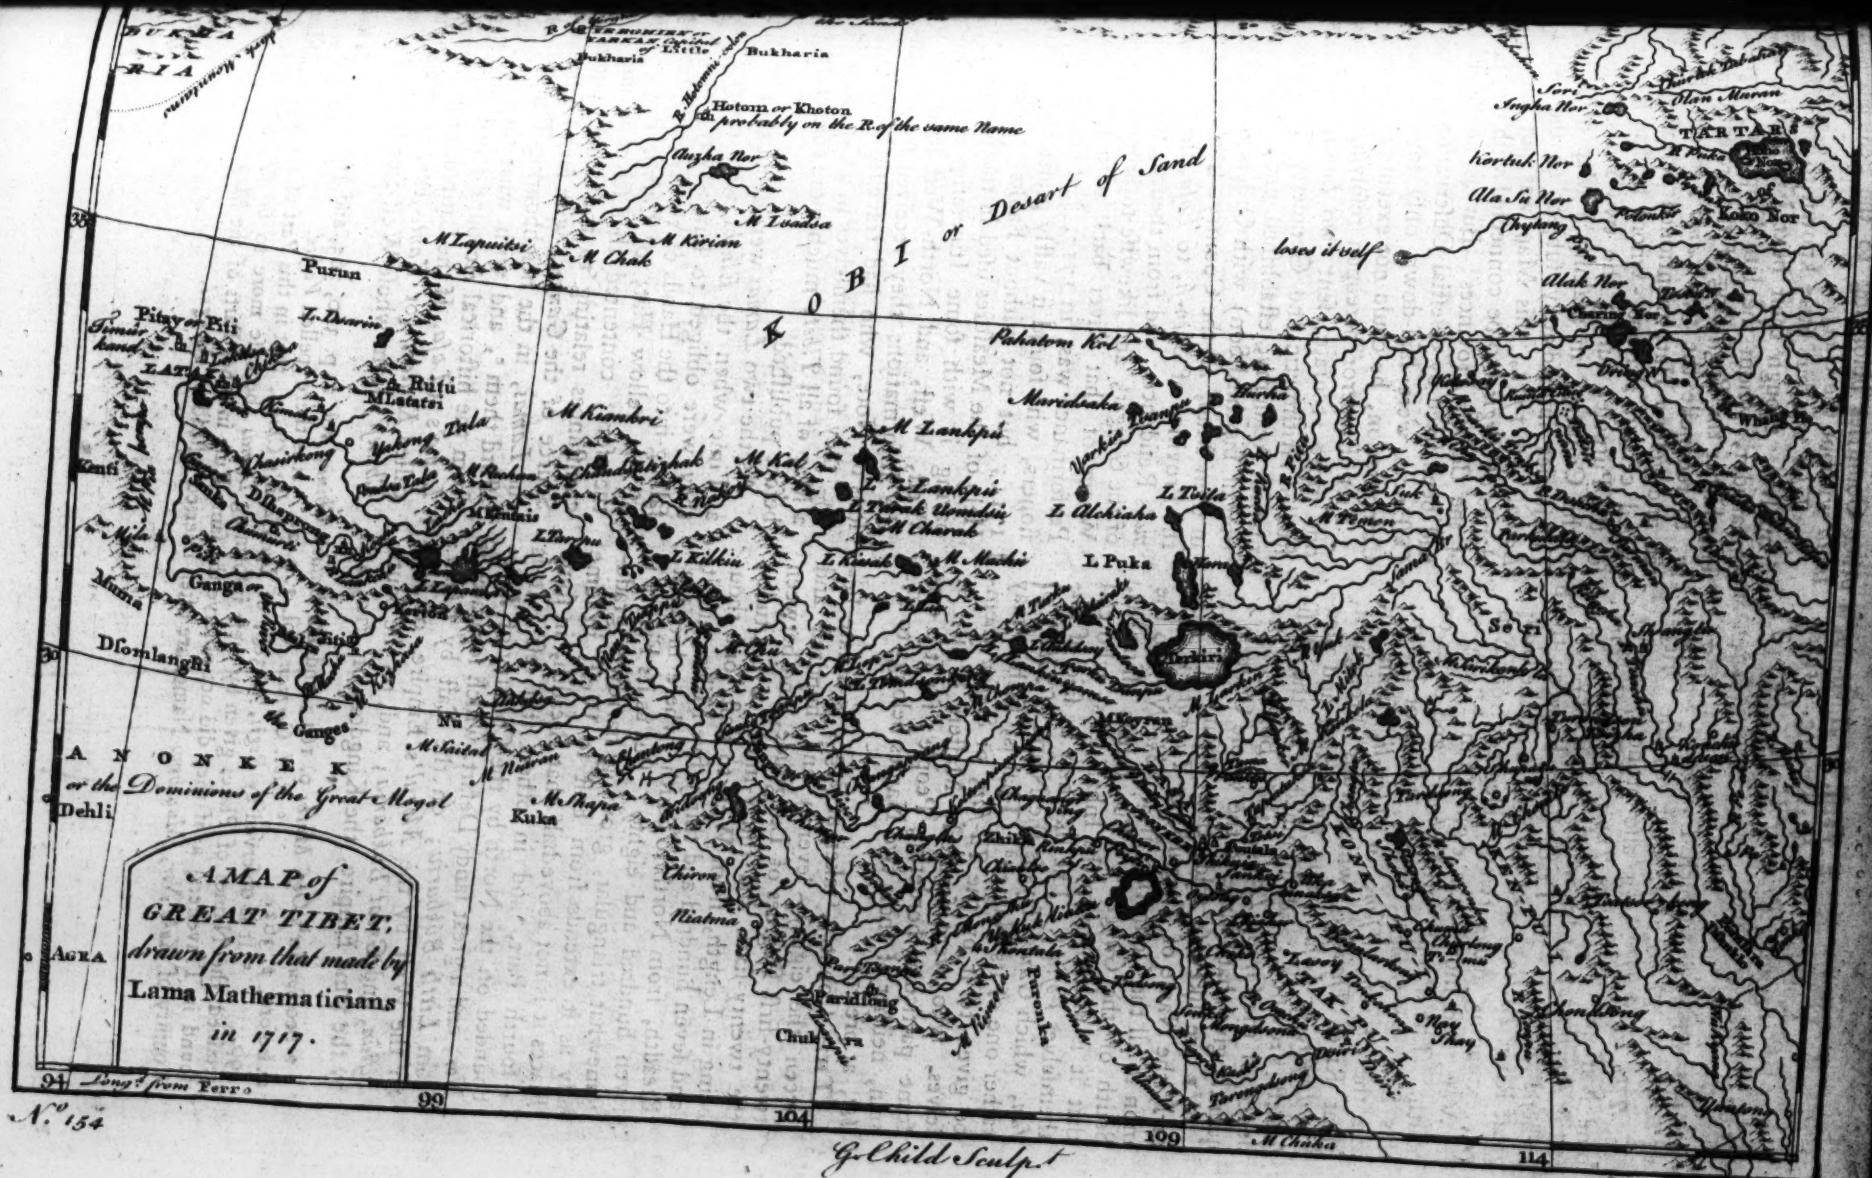
THIS Country, taken at large, is ſituate between the eighty-ſeventh and hundred and twenty-firſt Degrees of Longitude, and between the twenty-ſixth and thirty-ninth of Latitude; being in Length, from Weſt to Eaſt, one thouſand ſeven hundred and thirty-five Miles; and its Breadth, from North to South, where broadeſt, ſeven hundred and eighty: But as its Figure is ſomewhat triangular, growing narrower gradually as it extends from Eaſt to Weſt, in ſome Places it is not above half that Breadth, in ſome a fourth Part, and in others ſtill leſs. It is bounded on the North by the Country of *Koko-Nor*, and a great ſandy Deſart, which ſeparates it from *Little Bûkharia*; on the Eaſt by *China*; on the Weſt by the *Mogul*'s Empire, or *Hindûſtân*, and *Great Bukharia*; and, on the South, by the ſame Empire, the Kingdom of *Ava*, and other Countries belonging to the Peninſula of *India* without the *Ganges*.

As *Tibet* was but little known to the *Chineſe* themſelves, though their next Neighbours, an Ambaſſador, whom the late Emperor *Kang-hi* ſent thither the Beginning of the preſent Century, to reconcile the two *Lama* Factions of the red and yellow Hat, mentioned hereafter, employed certain Perſons, whom he had brought for the Purpoſe, during the two Years he ſtaid in the Country, in making a Map of all the Territories immediately ſubject to the Grand *Lama*. In 1711, this Map was put into the Hands of *Regis*, to be connected with the Maps of the *Chineſe* Provinces: But as no Situation had been fixed by celeſtial Obſervation, and the Diſtances were laid-down only from common Computation, he could not execute his Orders.

THE Emperor hereupon reſolving to procure one more accurate, ſent two *Lamas*, who had ſtudied Arithmetic and Geometry (in a mathematical Academy, eſtabliſhed under the Protection of his third Son) with Orders to compriſe, in their Map, all the Country, from *Si-ning* in the Province of *Shen-ſi*, to *Laſa*, the Grand *Lama*'s Reſidence, and from thence, to the Source of the *Ganges*; and likewiſe to bring ſome of the Water of that River back with them. This Performance was, in 1717, laid before the Miſſioners, who found it vaſtly preferable to that of 1711; but not without Faults. However, by Help of the Meaſures uſed in this Map, by comparing it with ſome Itineraries in the South-Weſt, Weſt, and North-Weſt Roads, and by the Informations they received from ſome Perſons of Note, who had travelled in that Country, they found themſelves in a Capacity to draw a Map of all *Tibet*, much more correct than any before publiſhed.

As the two *Lamas* were about their Work at a Time when the *Eluths* were ravaging *Tibet*, they were obliged to hurry-away, for Fear of falling into the Hands of the Enemy, they being of the yellow Hat, or *Chineſe* Party. They therefore, contented themſelves in many Circumſtances relating to the Countries round the Source of the *Ganges*, with ſuch Information as the *Lamas*, in the neighbouring Temples, could afford them [e], and with what they could learn from the hiſtorical Account found at the Grand *Lama*'s at *Laſa*. If the Latitude of the Mountain called *Kentais* (or *Kante-ſhan*, according to the *Chineſe*) from whoſe Weſt-Side the *Ganges* iſſues

[a] See *Souciet*'s *Obſ. Math.* p. 161; and *Du Halde*'s *China*, vol. 2. p. 360, 363, and 384. [b] *Du Halde*, as before, *p.* 363. [c] *Bibl. German.* vol. 3. p. 25. It is there ſpelled *Vodjid*. [d] Hiſt. *de Gentch.* 190. [e] It is obſerved by *Regis*, p. 388, of *Du Halde*'s *China*, that in this Part of the Map the Miſſioners retained the Names of Places given by theſe informing *Lamas* (becauſe more to be depended-on than thoſe found in Travellers) as if they did not obſerve the ſame Rule in other Parts of the Map: And, indeed, in the Country of *Koko Nor*, *Manchew* Names are often inſerted inſtead of *Mongul*.



N.o 154

G. Child Sculp.t

Plate LXVII. Vol. IV. p. 450

had been taken by Obſervation, the Courſe of a that River might have been more eaſily determined: For although the *Lama* Geographers traced the Courſe of the *Tſan-pu*, which flows from the Eaſt of the ſame Mountain, yet their Meaſures alone cannot be ſufficient for accurately fixing the Latitude of *Kentais* [a].

WEST of this Mountain, is another called *Kantel*, in the Map, *Kenti*; which, according to *Deſideri*, is frightful to look-at, and always covered with Snow: It divides *Kaſhmîr*, in *Hindûſtân*, from *Great Tibet*, which begins from the Top of it. From the Entrance on that Side, as far as *Leh*, or *Ladak*, the Road lies between the Mountains, which are a true Image of Sadneſs, Horror, and Death itſelf. They are heaped upon one-another, and ſo contiguous, that they are ſcarcely ſeparated by the Torrents, which fall impetuouſly down, and daſh with ſuch a Noiſe againſt the Rocks, as ſtuns and terrifies the moſt intrepid Travellers. The Top and Bottom of theſe Mountains are equally impracticable.

THE Road over them is ordinarily ſo narrow, that there is ſcarce Room to ſet one's Feet; and the leaſt falſe Step tumbles you down the Precipices, in great Danger of loſing your Life, or breaking your Limbs, as happened to ſome of the Karawân, which the Author went with. Shrubs, or Buſhes, would be of great Uſe on this Occaſion; but there is not a Plant, or ſo much as a Blade of Graſs, to be found on them. In paſſing the impetuous Torrents that ſeparated one Mountain from another, they found no other Bridge, than ſome narrow, tottering Plank, or ſome Ropes ſtretched acroſs, and twiſted with green Boughs: They were often obliged to put off their Shoes, in order to tread ſure: For the Author's Part, he ſtill trembled at the very Thoughts of thoſe dreadful Paſſages [b].

THE Land of *Tibet*, in general, is very high. *Gerbillon* obſerves, that a *Mandarin*, who had been there as Envoy, informed him, that in paſſing from *China* to *Tibet*, he found a ſenſible Aſcent; and that in general the Mountains, which are very numerous, are much more elevated on the Eaſt-Side towards *China*, than on the Weſt-Side facing *Tibet* [c]. Certainly, continues that Author, thoſe little Hills, whence the ſmall River *Altan-kol* [d] (or *Golden River*) takes its Riſe, muſt be vaſtly higher than the Sea; ſince this River, which is rapid enough, diſcharges itſelf into the Lakes of *Tſing-ſû-hay*, and the *Whang-ho* has a very ſwift Current from thoſe Lakes, for about two hundred Leagues, to its Fall into the Eaſtern Ocean. This Elevation of the Land makes the Country, on this Side, very cold for the Latitude; but when you deſcend the Mountains, and enter *Tibet*, the Air is much more temperate [e]. In the Weſtern Part, where *Deſideri* travelled, the Climate was very ſevere; the Winter being, he ſays, almoſt the only Seaſon which rules the Year round, and the Tops of Mountains continually covered with Snow [f]. *Geographical Remarks.*

THE Miſſioners have tranſmitted very little concerning the Geography of *Tibet*, except the Map [g], which affords many Materials for making a Deſcription of the Country. The great River, which runs quite through *Tibet*, from Weſt to Eaſt, according to *Regis*, is called *Yarû-tſan-pu*, or *Dſan-pu*, that is, *the River* Yarû; or, ſimply, *Tſan-pû* [h], *the River*, by Way of Eminence, in the ſame Manner as *Kyang* in *China* is almoſt become a particular Name of the *Yang-tſe-kyang*, which divides that extenſive Empire. It is yet hard to determine where the *Tſan-pû* diſcharges itſelf: But as it runs from *Tibet* South-Weſt towards the Sea, it probably falls into the Bay of *Bengal*, about *Arakan*, or near the Mouth of the *Ganges*, in the *Mogul*'s Empire; called by the *Tibetians*, *Anonkek*, or *Anonjen*. The Rivers to the Weſt of the *Tſan-pû* run into Countries very little known. It is no leſs uncertain, where many others empty themſelves. *River* Yarû, *or* Tſan-pû.

THE *Nu-kyang* enters *Yun-nan*, and after a Courſe of ſome hundred *Li*, changes its Name to *Lû-kyang*, and paſſes into the Kingdom of *Ava*. The *Lan-tſan-kyang* likewiſe enters *Yun-nan*, and after receiving ſeveral ſmall Rivers, becomes the great *Kyu-long-kyang*, that is, *the River of the nine Dragons*, and flows into the Kingdom of *Tong-king*. On the North of the ſame Province of *Yun-nan*, runs the *Kin-cha-kyang*, or *River with Golden Sand*; which, after a long winding Courſe, falls into the *Yang-tſe-kyang*. The *Chineſe* Maps, which the Miſſioners found in the Tribunals of the Province of *Yun-nan*, as well as the Inhabitants of the Country, give the Name of *Nu-i* to the People beyond the River *Nu-kyang*; and to their Neighbours on the North of the Kingdom of *Ava*, that of *Ti-tſe*: But, probably, theſe are not the Names of thoſe half-ſavage Nations, inhabiting the Mountains, through whoſe Country, it is likely, ſome of the Rivers of *Tibet* muſt run [i]. Ny-kyang. Lan-tſan. Kin-cha-kyang.

WITH Regard to the *Whang-ho*, the *Chineſe* *Source of the Whang-ho.*

[a] *Du Halde*'s *China*, p. 384, & *ſeqq.* [b] *Lettres Edifiantes*, p. 190, & *ſeqq.* [c] The ſame is obſerved on the Side of *Tartary*, to the North of the great Wall; ſo that *China* lies in a Sort of Hollow, incloſed by the Mountains of *Tibet* and *Tartary*. [d] Near the Country of *Ko-ko Nor*. [e] *Du Halde*, as before, *p.* 258. [f] *Lettr. Edif.* vol. 15. p. 200. [g] It is inſerted in *Du Halde*'s *China*, divided into nine Sheets. [h] So it is named in the Map. [i] *Du Halde*, as before, *p.* 388.

Country of Tibet. Envoy told *Gerbillon*, that it has its Source [a] in a the North-East Part of *Tibet* [b], from a Lake, or rather three Lakes, called *Tſing-ſû-hay*, ſo near to each other, that they ſeem but one. From thence it haſtens towards the South, between Mountains; and being enlarged with all the ſmall Rivers of *Koko Nor*, it enters *China* near to *Ho-chew* (a City of *Shen-ſi*, on the Borders of *Se-chewen*, ten Days Journey in a ſtrait Line from the Source) by a very narrow Paſſage, between two vaſt ſteep Rocks, cut for the Purpoſe, as the *Chineſe* tell us, by their famous Emperor *Yu*.

River of Gold. THE Envoy farther informed him, that he had croſſed a River of *Koko Nor*, called, in the *Mongol* Tongue, *Altân Kol*, or *Golden River*: That it is about three Foot deep, and runs into the Lakes of *Tſing-ſû-hay*; has Abundance of Gold mixed with its Sands, which employs the Inhabitants, all the Summer, in gathering it, and makes a principal Revenue of the Princes of *Koko-Nor*: That a Perſon they employ will take ſix, eight, or ten Ounces, ſometimes more: They take the Sand from the Bottom of the River, then waſh it a little, and retaining what looks like Gold, melt it in Crucibles. This Gold, which ſeems to come from the neighbouring Mountains, is eſteemed very good, and ſold for ſix Times its Weight of Silver. There is alſo Gold in other Rivers belonging to the Grand *Lama*, and much of it is carried to *China* [c]. *Regis* agrees with *Gerbillon* in this, and particularly inſtances the *Kin-cha-kyang* [d], before-mentioned: But ſays, the Miſſioners are ignorant what River has ſupplied *China* with that Gold, which is preferred to all others.

Lake of Stars. *GAUBIL* is more particular, and exact, than *Gerbillon*. He ſays, that in the Place where the *Whang-ho* riſes, there are more than an hundred Springs, which ſparkle like Stars; whence it is called *Hotun Nor* [e], that is, *the Sea of Stars*, in the Country. The *Chineſe*, *Sing* [f] *ſû* [g] *Hay*, ſignifies, *the Sea of Stars and Conſtellation*. Theſe Sources form two great Lakes, called *Hala Nor*, or *Kara Nor*, that is, the *Black Sea*, or *Black Lake*, about two Miles from *Hotun Nor*. Afterwards there appear three or four little Rivers, which joined, form the *Whang-ho*, which has eight or nine Branches. In 1704, the Emperor *Kang-hi* cauſed the Source of this River to be ſearched after. In the Memoirs preſented to that Monarch, the Sources of the *Whang-ho* are named *Oton-tala* [h], conſiſting of many little Lakes; the Waters of which are received by two great Lakes to the Eaſtward; and all together produce the *Whang-ho* [i].

Lakes of Tibet. BESIDES the Lake of *Koko Nor*, which (according to *Grueber*) ſignifies *the Great Sea*, and is called by the *Chineſes*, *Si-hay*, or, *the Weſtern-Sea*, there are ſeveral other large ones in *Tibet*; as, the *Charing Nor*, and *Oring Nor*, not far from the *Hotun Nor*, or *Oton-tala*; the *Tenkiri*, above ſeventy Miles long, and forty broad, in Latitude thirty two Degrees, and Longitude Weſt of *Peking* twenty-four; the *Lankeri*, and *Map-ama*, where the *Ganges* begins. This is all that can be gathered from Authors, with regard to the Natural Geography of *Tibet*: As to the Natural Hiſtory, they afford very few Remarks.

SECT. II.

Of the Kingdoms *into which* Tibet *is divided, particularly* Great *and* Little Tibet.

Divided by Tibet Authors. THE Country, generally comprized under the Name of *Tibet*, is variouſly divided by Authors. *Bernier* [k], within its Limits, places three Kingdoms, *Little Tibet*, *Great Tibet*, and *Laſſa*. *Deſideri* does the ſame, calling the firſt *Baltiſtan*, and the ſecond *Butan*. Under which laſt Name, *Tavernier* [l], and others, ſeem to include both *Great Tibet*, and *Laſſa*. However that be, theſe three Diviſions, or Provinces of *Tibet*, are ſubject to ſo many diſtinct Sovereigns; excluſive of the Countries of *Koko Nor*, and the *Tu-fan*, or *Si-fan*, which properly fall within the Limits of *Tibet*, and have Sovereigns alſo of their own. Of theſe we ſhall give, ſeparately, what Account Authors furniſh us with.

1. Little Tibet, *or* Beläd̂iſtân.

Little Tibet *Bounds, Extent, and Produce:* Eſkerdû *the Capital.*

LITTLE TIBET, according to *Deſideri*, is called alſo *Baltiſtan* [m], and lies to the North-Weſt of *Kaſhmîr*, the Northern-Province of *Hin-*

[a] The Courſe of this River has been deſcribed before, *p.* 73. [b] In the Borders of the Country of *Ko-ko Nor*, deſcribed before, *p.* 402. [c] *Du Halde*'s *China*, p. 258. [d] This River, whoſe Name has the ſame Signification with that of the *Altûn Kol*, runs not far from the ſaid Lakes, which ſhews the Country abounds with Gold. [e] *Nor*, or *Naor*, is *great Lake*, or *Sea*. [f] *Sing*, not *Tſing*, ſignifies *Stars*. [g] Or, *Lyew*, ſignifies *Conſtellations*. [h] This is the *Mancheu* Word, and, indeed, moſt of the Names of Places in *Ko-ko Nor*, and the Borders of *China*, are given in that Language, inſtead of the *Mongul*, which is ſpoken by the Inhabitants. [i] *Gaubil*, Hiſt. *de Gentch.* p. 190, & *ſeq.* [k] Memoirs of the *Mogul* Empire, tom. 4, p. 122, & *ſeq.* [l] Travels in *India*, p. 182, & *ſeqq.* [m] Rather, we preſume, *Beläd̂iſtân*, that is, *the Mountain-Country.*

diſtan,

dûſtan, but a few Stages diſtant. This Author informs us little farther, than that the Country is fertile, its Inhabitants are *Mohammedans*, and the Princes who govern them, ſubject to the *Great Mogol* [a].

IN the Year 1664, they were tributary to that Monarch. *Bernier* acquaints us, that a Diſſenſion having ariſen a few Years before in the King's Family, about the Succeſſion, one of the Pretenders to the Crown applied, ſecretly, for Aſſiſtance to the Governor of *Kaſhmîr*; who, by *Shâh-Jehân*'s Order, gave him powerful Succours: And having put to Death, or Flight, all his Competitors, left him in Poſſeſſion of the Country, on Condition of paying Tribute yearly in Cryſtal, Muſk and Wool.

THIS petty King came to ſee *Aureng-Zeb*, when he was in *Kaſhmîr*, bringing with him a Preſent of the ſame Kind: But he had ſo pitiful a Train, that *Bernier* ſhould never have taken him for what he was. The Lord, in whoſe Service the Author was, having entertained him at Dinner, the better to get Information concerning thoſe Mountains [b], *Bernier* heard him ſay, that his Country, which borders on *Kaſhmîr* to the South, was bounded on the Eaſt by *Great Tibet*: That it was about thirty or forty Leagues broad [c]: That it afforded a little Cryſtal, Muſk, and Wool; but for the reſt, was very poor: That there were no Gold Mines, as was reported: That in ſome Places there was very good Fruit, eſpecially Melons: That they had very hard and troubleſome Winters, becauſe of the deep Snows which fell; and that the Inhabitants, who formerly had been *Pagans*, were almoſt all become *Mohammedans*, of the *Shiyah* Sect, which is that of the *Perſians*, as himſelf was [d].

THE ſame curious Author gives an Account of the Road to *Kaſhgar*, from whence we learn, that *Eſkerdû*, the Capital of *Little Tibet*, lies eight Days Journey from *Gûrche*, a Town on the Borders of the Kingdom of *Kaſhmîr*, which is four Stages from the City of that Name: That two Stages beyond *Eſkerdû* lies *Sheker*, another Town, ſituate upon a very famous medicinal River; and fifteen farther a Foreſt, on the Frontiers of the Kingdom; from whence, in fifteen Days more, you reach the City of *Kaſhgar*, which lies Eaſt of *Little Tibet*, inclining ſomewhat to the North [e].

2. Great Tibet, *or* Bûtân.

The Name: Extent: Chief Cities: Air and Soil: The Inhabitants: Its Commerce, Commodities, Religion: Lamas, *or Prieſts: Government.* Bûtân *invaded by the* Great Mogul. *The King's Artifice.*

THE Names of *Great Tibet* and *Bûtan*, which by ſome Authors are extended over the whole Country, from the Frontiers of *Hindûſtân*, to the Borders of *China*, are, by others, reſtrained to the Weſtern-Part of that Region: But what its Dimenſions are, none have undertaken to define: Even the *Lamas*, who made the Map of *Tibet*, have not divided it into Provinces, or Diſtricts; contenting themſelves with ſetting-down the Names of ſuch Parts as occurred to their Knowledge. *The Name.*

GREAT TIBET, according to *Deſideri* the Jeſuit, lies to the North-Eaſt of *Kaſhmîr*, and ſomewhat farther from it than *Little Tibet*. The Road thither, though extreamly difficult, is pretty much frequented. This Kingdom begins at the Top of a frightful Mountain, covered with Snow, named *Kantel*, which *Deſideri* arrived-at with the Karawân, thirteen Days after he had left *Kaſhmîr*. In ſeventeen more, travelling all the Way on Foot, through frightful Mountains, they arrived at *Leh*, or *Ladak* [f], a Fortreſs ſituate amongſt them, where the King reſides. They found no great Towns in thoſe mountainous Provinces [g]. *Ladak*, or *Latak*, is placed in the Map about ſeven Miles North of the River *Lachû*, which ninety Miles lower falls into the *Ganga*, or *Ganges*. Fifty Miles to the North North-Weſt of it, in the Mountain bordering on *Hindûſtân*, ſtands another Fortreſs, called *Timûr-keng* [h]. An hundred and ninety Miles Eaſt of *Latak*, and on the ſame River, lies *Chaſir-tong*, another City, or Fortreſs; and eighty Miles South-Eaſt of this, *Dſaprong*, or *Chaprong* [i]. But that Map does not give the Name of *Great Tibet*, or *Bûtân*, or, indeed, any general Name, to the Part where theſe Places are ſituate. *Extent.* *Chief Cities.*

DESIDERI obſerves, that the Weather, in *Great Tibet*, is very ſevere, and that Winter reigns almoſt all the Year round [k]. Agreeably to this, a Merchant of *Laſſa* told *Bernier*, that the whole Kingdom of *Great Tibet* was, in Com- *Air and Soil.*

[a] See *Lettr. Ediff.* tom. 15. p. 188. [b] Meaning his Country, which by this appears to have been very mountainous. [c] *De l'Iſle* makes it about two hundred and eighty Miles long, and an hundred and ſixty broad. [d] *Bernier*, as before, *p.* 122, & *ſeqq.* [e] The ſame, *p.* 128. [f] *Latak*, in the Map. [g] *Lettr. Ediff.* tom. 15. p. 189, & *ſeqq.* [h] Signifying, perhaps, the *Iron Caſtle*. *D'Anville* calls it *Timurkand*. [i] Probably, the *Chaparanga*, which *Antony Andrada* repreſents as a very great City. [k] *Lettr. Ed.* p. 200.

Country of Tibet. pariſon to his, a miſerable Country, full of Snow, for more than five Months of the Year [a]. According to *Deſideri*, the Earth produces nothing but Corn and Barley; ſcarce any Trees, Fruit, or Roots, are to be ſeen.

The Inhabitants. THE ſame Author writes, that the Inhabitants of *Bûtân* are, naturally, gentle and teachable; but unpolite, and ignorant, having neither Sciences, nor Arts (though they do not want Genius) nor any Communication with foreign Nations: That they wear nothing but Woollen: That their Houſes are ſmall, narrow, made of Stones piled rudely one upon another: That Traffic is ordinarily carried-on among them, by exchanging Proviſions: That the Merchants repair thither to look-for Wool: And that they have no Money of their own, but make-uſe of the *Mogul*'s Coin, each Piece being worth five *Roman Julias* [b].

Its Commerce, *GREAT TIBET* carries-on a Trade with the neighbouring Kingdoms, and formerly the Karawâns of *India*, as *Bernier* informs us, paſſed through it from *Kaſhmîr* to *China*; till the *Great Mogul*, *Shâh Jehân*, having made an Attempt upon that Country, the King ſuffered none to enter his Dominions, on that Side, for a conſiderable Time. In the Interim, they went by Way of *Patna* in *Bengâl*; but, at preſent, the old Road ſeems to be open again, *Deſideri*, the Jeſuit, having gone thither with a Karawân from *Kaſhmîr*.

Commodities, THE Commodities of *Tibet*, which the Merchants brought back, in their Return from *China*, according to *Bernier*, were Muſk, Cryſtal, and Jaſhen: But chiefly very fine Wool, of two Sorts, one of Sheep, the other called *Tour*, which is rather a Kind of Hair, like the Caſtor's, than Wool. The Jaſhen is found here: It is a bluiſh Stone, with white Veins, ſo hard, that it muſt be cut with Diamond Duſt. It is highly eſteemed in the Court of the *Mogul*. They make Cups of it, and other Veſſels, of which the Author had ſome very rich ones, curiouſly inlaid with Threads of Gold [c].

Religion. As to the Religion of *Great Tibet*, *Deſideri* takes Notice, that the firſt Plantations one meets with in *Bûtân*, are *Mohammedans*; but that the reſt are inhabited by *Gentiles*, who are leſs ſuperſtitious than thoſe in other idolatrous Countries. They call God, *Konchok* [d], and ſeem to have a Notion of the Trinity. They adore another Deity alſo, named *Urghien* [e], who, they ſay, was both God and Man, without Father, or Mother, but born of a Flower, about ſeven hundred Years ago [f]. Yet they have the Statue of a Woman, with a Flower in her Hand [g], who, they ſay, is *Urghien*'s Mother.

THEY adore Saints likewiſe, and uſe a Kind of Beads. No Sort of Meats is forbidden them. They reject the Tranſmigration of Souls, and Polygamy; in which three Points they differ from the *Indians*.

THEIR religious Perſons, called *Lamas*, wear a Habit different from ſecular Folks. They do not braid their Hair, nor wear Bobs in their Ears, like others; but have the Tonſure, like *Romiſh* Monks, and are obliged to perpetual Celibacy. Their Employment is to ſtudy the Books of the Law, written in a Language and Character different from the Vulgar. They recite certain Prayers, chanting them in the ſame Manner as is done in Popiſh Churches. They are the Perſons who perform the Ceremonies, preſent the Offerings in the Temples, and keep the Lamps lighted. They offer to God Corn, Barley, Dough, and Water, in very neat little Veſſels; which Offerings are eaten as a holy Thing by them. They are held in great Veneration, and live ordinarily in Communities, ſeparate from all profane Converſation. They have local Superiors, and over them a Superior General, whom the King himſelf treats with great Reſpect. One of that Prince's Relations, and the Son of the *Lompo*, or Prime-Miniſter, were *Lamas*. The King, and ſeveral of his Courtiers, conſidered *Deſideri*, and his Companion, as *Lamas* of the Law of *Jeſus Chriſt* come from *Europe*. They ſaid, their Book was like that of the Miſſioner; which, however, he would not believe. He adds, that many of them know how to read their myſterious Books, but none underſtand them [h].

THERE is only one *Ghiampo*, or abſolute Prince in *Bûtân*. He who reigned in 1715, was named *Nima-Nanjal* [i], and had under him a tributary King. After viſiting the *Lompo*, or Prime-Miniſter before-mentioned, called *the King's right Arm*, the Miſſioners had an Audience of his Majeſty himſelf, who received them ſitting on his Throne. Next Day they had a ſecond, and four Days after a third, wherein they were treated more familiarly than at firſt [k].

THIS Country has been ſo lately diſcovered, and little frequented, that ſcarce any Thing is to

[a] *Bernier*'s Memoirs of *India*, tom. 4. p. 128. [b] *Lettr. Ediff.* p. 194, *& ſeqq.* [c] *Bernier*, as before, p. 125, and 129. [d] In the *Italian*, *Konciok*. *Grueber* writes *Konjû*. [e] This, probably, is the ſame worſhipped in *Laſſa*, under the Name of *La*, and called in *China*, *Fo*. [f] That is, about the Year 1005: It ſhould rather be 2746 Years ago, if *Fo*, or *La*, be meant. [g] The *Mohammedans* of *Little Bukharia* believe, that the Mother of *Iſa*, or *Jeſus*, conceived by ſmelling a Flower. [h] How ſhould he know that? [i] In the Original *Nangial*. [k] *Lettr. Ediff.* p. 194, *& ſeqq.*

be met-with relating to its History, excepting a Particular or two mentioned by *Bernier*. This Author informs us, that seventeen or eighteen Years before he was in *Kashmîr* [a], *Shâh Jehân*, the *Great Mogul*, had attempted to conquer *Great Tibet*, as formerly the Kings of *Kashmîr* had endeavoured. His Army, after sixteen Days difficult March among Mountains, besieged a Castle; which, having taken, there remained no more to do, than to pass a River, which is famous, and very rapid [b], and so march directly to the capital Town, which might have been easily carried, the whole Kingdom being struck with a Panic; but the Season being far spent, the Governor of *Kashmîr*, who was the General, apprehending he should be surprized by the Snow, returned. After he was gone, the Garison left in the Castle, either for Fear of the Enemy, or Want of Provision, soon abandoned it; which frustrated his Design of returning thither the next Spring.

In 1664, the King of *Great Tibet* knowing, that *Aureng-Zebe* was at *Kashmîr*, and threatened him with War, sent an Ambassador with Presents of Musk, Crystal, and those precious white Cow-Tails, which, by Way of Ornament, are fastened to the Ears of Elephants; also a Jashen of great Price, on Account of its extraordinary Bigness.

This Ambassador's Train consisted of fifteen or sixteen Persons, all tall Men. Excepting three or four of the better Sort, all the rest were dry, meagre Fellows, with only three or four Hairs on each Side for a Beard, like the *Chinese*, and plain, red Bonnets on their Heads, like Seamen; the rest of their Garments suitable. Four or five of them had Swords, but the rest marched behind the Ambassador without any Thing in their Hands. He promised the *Great Mogul*, in his Master's Name, to suffer a Mosk to be built in the capital City; that his Coin, thenceforward, should, on one Side, bear the Impress of *Aureng-Zebe*, and himself become tributary. But it was thought, when the *Mogul*'s Back was turned, he would laugh at that Treaty, as he did at one he made formerly with *Shâh Jehân* [c]. However that be, all we know farther of the Affairs of *Great Tibet*, since that Time, is, that it hath at present a King of its own, as hath been before related.

SECT. III.

A Description *of the* Kingdom *of* Lassa, *or* Barantola.

1. *Its* Name, Extent, Cities, *and* Inhabitants.

Its different Names, to what owing: Its Bounds, and Extent: Cities and Towns. Tonker, *or* Lassa. *Mountain* Putala. *Inhabitants, their Shape: Their Dress: A slovenly People. Female Polygamy: Language and Characters: Soil and Produce: Rhubarb, Worm-Seed, Martens. Road of the Karawâns. Course of Trade. Commodities. Women Artizans. Silver Coin.*

Its different Names,

THE third Part, or Dominion, into which *Tibet* is divided, according to *Bernier*, and *Desideri*, is called *Lassa*, apparently from the Territory of *Lassa*, wherein the capital City is situate, whose Names are inserted in the Map. This Kingdom, *Grueber* tells us, is called by the *Tartars* [d], *Barantola*; and *Tavernier* describes it under the Name of *Bûtân*: For this last being the general Appellation used by the bordering Nations towards *India*, that Author might have taken the Name from the *Indian* Merchants at *Patna*, and not from the *Lassa* Merchants, who came there to sell their Musk [e]. It might be owing to the same Cause, that *Desideri* could never hear at *Kashmîr* of more than two *Tibets*, the *Great*, or *Bûtân*, and the *Little*: But at *Ladak* [f], the Capital of the first, he was told of a third, called *Lassa* [g]; the Name *Bûtân*, if used in the Country, being probably peculiar there to *Great Tibet*.

To what owing.

On the contrary, *Bernier* became apprized of three *Tibets* at *Kashmîr*, because he had his Information immediately from a Merchant of *Lassa*; and this might be the Reason why he does not give any of them the Name of *Bûtân*, which, perhaps, is not used in *Lassa*. However that be, this may account how one Author comes to apply the Appellation of *Bûtân* to *Tibet* in general; while another restrains it to *Great Tibet* only. *Grueber* calls this whole Country *Tangut*, and says, it is divided into several Parts, of which *Lassa*, or *Barantola*, is the chief [h]: Yet others assert, that the Name of *Tangut* is at present unknown to the People of *Tibet* [i]. This may be true, and yet it may be used by the *Tu-*

[a] He was there in 1664. [b] This must have been the *Ganges*, if the Capital was *Latak* in *Great Tibet*; and the *Tsan-pû*, if it was *Tonker* in *Lassa*. [c] *Bernier*'s Memoirs of *India*, p. 123, & *seqq*. [d] Meaning, we presume, the *Eluth Mongols*. [e] See *Tavernier*, part 2. p. 182. [f] In all Probability, this Part of *Tibet*, which *Desideri* calls *Bûtân*, after the *Indians*, goes only by the Name of *Ladak*, in the Country itself. [g] See *Lettr. Ediff.* tom. 15. p. 188. [h] On which depends *Retink*, a very populous Province on the East-Side. See his Letters, *p.* 1, in *Thevenot*'s Collection, tom. 4. [i] See before, *p.* 450, c.

tan,

Tibet.

Jan, or by the *Tartars* of *Koko Nor* (called by him *Kalmak*) through whose Territories that Missioner travelled, in his Way from *China*.

Its Bounds, THE Kingdom of *Lassa*, or *Barantola*, is bounded on the South by vast Chains of Mountains, covered with Snow, and no less difficult to pass than those, which secure *Great Tibet* on the West; the Torrents that separate them being to be passed on Planks, laid on Ropes stretched across them. On the West lies *Great Tibet*; on the North a great sandy Desart, which separates it from *Kashgar* and *Little Bukharia*; and, on the East, the Countries of *Koko Nor*, and the *Tu-fan*, bordering on *China*. According to the Report made to *Tavernier*, to the Northward nothing was to be found but vast Forests, and Snow; to the East and West, nothing but bitter Water [a].

And Extent, THERE is no determining, by the Map, how far this Country extends Westward, or by what Bounds it is separated from *Great Tibet*. *Desideri* says, this third *Tibet* is six or seven Months Journey from *Ladak*, through desart, and uninhabited Places [b]: If so-much, *Lassa* must be small, in Comparison of *Great Tibet*; but, properly, that is the Time the Author spent on the Road between the two Capitals of those Countries; nor does he mention when he passed out-of one Dominion into the other.

Cities and Towns. ACCORDING to the Map, the Country of *Lassa*, or *Lasa*, is fuller of Towns than *Great Tibet*, especially the Territory of *Lassa*, where stands the Capital of the Kingdom. The chief of these Towns are *Tonker*, *Changaprang*, *Shamnamrin*, *Chusor*, *Sankri*, *Dsanlarken*, all to the North of the *Yarú*, or *Tsanpú*, and on, or near that River; *Sûrman*, and the Ruins of *Tsitsirhana*, near *Koko Nor*. To the South of the *Tsanpú*, Cities are more numerous; the principal are, *Aridsong*, *Changlas*, *Jikséa*, *Rinkpû*, *Oytong*, *Lasoy*, *Tonk-chong*, near the River: *Chiron*, *Niamala*, *Paridsong*, *Tudsong*, *Tareng-dsong*, &c. near the South-Borders of the Country: But the Missioners have transmitted no Account of any of these Places, except the Capital. They only observe in general, that the Towns in *Tibet* are, for the most Part, but small [c], and none of them in a State of Defence: Nor is there, according to *Regis*, much Occasion for Fortifications; because the *Tartars* (whom they only have to fear) in their Wars, seldom undertake Sieges, chusing to fight in the open Field [d].

THE Capital is in the Map called *Tonker*, and situate at the Foot of the Mountain *Putala*, near the Confluence of a small River, with the *Kaltyû*, which falls into the *Tsanpû*, about thirty Miles to the South South-West. The Missioners, who call this Place *Lassa*, or *Lasa*, say scarce any Thing of it, only *Regis* observes, that it is rather a spacious Temple, than a City.

ACCORDING to *Grueber*, the Mountain *Putala* (or *Butala* [e], as he writes it) is very high, and stands at the End of the City, and on it the Castle [f], where the great *Lama*, and *Teva* King of *Tangut*, resided [g]. *Gerbillon* reports, from the Information of a *Chinese* Ambassador, that the *Kaltyû-mûren* [h], a pretty large River, runs at the Bottom of *Putala*, in the Middle of which stands the Grand *Lama*'s Palace, or Temple, seven Stories high, in the uppermost of which he lodges; and that by the Side are the Ruins of King *Tsanpa*'s royal City, destroyed by *Kushi Hân*, King of the *Eluths*, towards the Middle of the last Century. The Author was assured, by the same Person, that it was but four hundred Leagues from *Si-ning* in *Shen-si*, to *Putala*, which he had travelled in forty-six Days in Winter [i], and that the Country was pretty well inhabited [k]. *Desideri* observes, that at *Lassa* they reckoned it but four Months Journey to *Pe-king* [l]. *Grueber* says, the King resides at *Pûtala*, a Castle built on the Mountain like the Houses of *Europe*, consisting of four Stories, and very good Architecture [m].

THE Inhabitants [n], according to *Tavernier*, are strong, and well-proportioned; but their Noses and Faces somewhat flat. Their Women are said to be bigger, and more vigorous, than the Men [o]; but much more troubled with Swellings in the Throat, few escaping that Disease.

BOTH Sexes are clad, in Summer, with a large Piece of Fustian, or Hempen Cloth: In the Winter, with a thick Cloth, almost like Felt, and wear, on their Heads, a Kind of Bonnet, much like our drinking Cans, which they adorn with Boars Teeth and Pieces of Tortoise-Shells, round, or square. The richer Sort intermix Coral, and Amber-Beads, of which their Wo-

[a] *Tavernier*, p. 185. [b] *Lettr. Ediff.* tom. 15. p. 205. [c] *Gerbillon* says, the People dwell in small Towns, and Villages, living by Agriculture. [d] *Du Halde*'s *China*, vol. 2. p. 388. [e] Not *Bietala*, as in *Kircher*'s Account of his Voyage, translated by *Ogilby*. [f] See the Cut of it. [g] *Grueber*'s Voy. *p.* 1, and 20, in *Thevenot*'s Collection, part 4. [h] This must be the *Mogul* Name, as *Mûren*, in their Language, signifies a River. [i] By the Way of *Tsing-su-hay*, where the *Whang-ho* rises, twenty Days from *Si-ning*. [k] *Du Halde*, as before, *p.* 258. [l] *Lettr. Ediff.* p. 208. [m] *Grueber*, as before, *p.* 1. [n] *Horace*, a late *Capuchin* Missioner to *Tibet*, pretends, that Country contains no fewer than thirty-three Millions of People: Though *Desideri*, but a few Years before, in his Journey from *Great Tibet* to *Lassa*, found nothing but wild uninhabited Places. The King's Letter to *Horace*, in 1742, is dated at *Lassa*, from his Palace, *Khaden Khagar San* (misprinted, elsewhere, *Khadeno Khagser*) and the Grand *Lama*'s, from his *great Palace of* Putala. [o] That may be the Reason why they are allowed so many Husbands.

men make Necklaces. All wear Bracelets upon their left Arms only, from the Wriſt to the Elbow. The Women wear them tight, the Men looſe. About their Necks they wear a ſilken Twiſt, at the End whereof hangs a Bead of yellow Amber or Coral, or a Boar's Tooth, which dangles upon their Breaſts. On their left Sides, their Girdles are buttoned with Beads of the ſame [a].

GRUEBER obſerves, that the Courtiers were exceeding expenſive in their Dreſs; which conſiſted of Cloth of Gold, and Brocade. Some of them wore a Habit reſembling, in all Reſpects, that of Women [b], excepting that they made-uſe of a red Coat, after the Manner of the *Lama*. For the reſt, this Author ſays, the People of *Barantola* are very ſlovenly, for that neither Men, nor Women, wear Shirts, or lie in Beds, but ſleep on the Ground: That they eat their Meat raw, and never waſh their Hands or Faces: But that as to their Manners, they are very affable, and friendly to Strangers. Women are ſeen in their Streets, as among the other *Tartars*, contrary to the Cuſtom of the *Chineſe* [c].

WITH Regard to their Diet, *Tavernier* reports, that they feed-on all Sorts of Fleſh, except that of Cows, which they adore as the common Nurſes of Mankind; and that they are great Lovers of ſpirituous Liquors [d].

ALTHOUGH the Men, according to Friar *Horace*, are reſtrained to one Wife, and cannot marry within certain Degrees, without the Biſhop's Diſpenſation [e]; yet *Regis* obſerves, that a Woman there is allowed ſeveral Huſbands, who are generally related, and even ſometimes Brothers. The firſt Child belongs to the eldeſt Huſband, and thoſe born afterwards to the others, according to their Seniority. When the *Lamas* are reproached with this Cuſtom, they apologize for it by the Scarcity of Women, which prevails both in *Tibet* and *Tartary*, where the Males are more numerous: But this Excuſe, ſays the Miſſioner, is trifling; for the *Tartars* admit of no ſuch Irregularity [f].

THE ſame Author informs us, that the Language of *Tibet* differs intirely from the *Mongol* and *Manchew*, but nearly agrees with that ſpoken by the *Tû-fan*, or *Si-fan*; and that the *Tartars* call the Characters in uſe with the People of *Tibet*, the Characters of *Tangut* [g]. *La Croze* has publiſhed the Alphabet, which was given to *Bayer* by a *Mogul* Interpreter. He ſays, they are the ſame with the *Wigûr*, *Oygûr*, or *Jugur* Characters [h], as they uſed formerly to be called; which are in uſe through all the Eaſt, from the *Caſpian Sea*, to the Gulf of *Bengal*. Beſides the *Mogul* Letters, which are derived from them, and but little varying, our Author obſerves, that the Manner of Writing of all the *Indians* is very like it, and almoſt ſuſpects it to be derived from thence. He adds, that the Specimen of the *Bûtân* Characters, given by *Hide* [i], is the running-Hand Letters; thoſe of his Alphabet the Capitals: And that the anonymous Author of the Deſcription of *Bûtân* [k], ſpeaks in brief, but fully of both Kinds [l]. Laſſa Inhabitants.

THE above-mentioned Alphabet conſiſts of four Vowels, the *y* being wanting, and very rightly, for it is properly a Conſonant; twenty ſimple Letters, ten double Letters, and ninety-ſix compound Characters, or ſuch as are animated with their Vowels.

REGIS tells us, that the Miſſioners could procure no Account of the Plants produced in this Country, nor of the Nature of its Trade; only that it is chiefly carried-on by the Way of *Bengal* [m]: But *Tavernier* gives us ſome Account of both. According to him, the Soil is good, abounding in Rice, Corn, Pulſe, and Wine. The chief Commodities, in which the Inhabitants trade with other Nations, are Muſk, Rhubarb, Worm-Seed, and Furs. The moſt excellent Rhubarb comes from hence: It is a Root which they cut in Pieces, and ſtringing them ten or twelve together, hang them up to dry: As the Wet ſpoils it, the Merchants run great Hazards in bringing it; both Roads, eſpecially the Northern, being ſubject to Rain. Soil and Product. Rhubarb.

WORMSEED grows in the Fields, and muſt die before it can be gathered: But the Miſchief is, that before the Seed is ripe, the Wind ſcatters the greater Part, which makes it ſo ſcarce. When they gather it, they take two little Hampers, and, as they go-along, move them from the Right to the Left, and back again, as if they were mowing the Herb, which they bow at the Top; and thus all the Seed falls into the Baſkets. Wormseed. Martens.

HAD the Natives as much Art in killing the Marten, as the *Ruſſians*, they might vend great Store of thoſe rich Furs, conſidering the Animals are very numerous there.

THE ſame Author informs us, that there are two Roads to *Bûtân* (as he calls this Country, Road of the Karawâns.

[a] *Tavernier*'s Travels, part 2. p. 184, *& ſeq.* [b] See the Figure. [c] *Grueber*'s Voyages, *p.* 1, and 21. *Tavernier*, as before, *p.* 184. [e] *Nouv. Bibl.* tom. 14. p. 57. [f] *Du Halde*'s *China*, p. 385. [g] They are called, by the *Chineſes*, *Si fan Wha*, the *Language of the* Si-fan; and *Si-fan He*, *Writing of the* Si-fan: By the *Tartars*, *Tangut Jerjen*, that is, *the Characters of* Tangût; which laſt Term is common among them. See *Du Halde*, *Paris* Edit. vol. 4. p. 463; and the *Engliſh*, vol. 2. *p.* 388. [h] Something has been already ſpoken concerning the *Oygûr* Characters, and thoſe of *Tibet*. Country of Tibet.

for the Reaſon before-mentioned;) the Northern by *Kabul* [a], the other, Southern, through *Patna* in *Bengal*, and the Territories of the *Raja* of *Nupal* [b]; being a Journey of three Months over the Mountains of *Naugrokot*, which are nineteen Stages of the Karawân from *Patna*, moſtly through Foreſts full of Elephants. They travel in *Palekis*, but generally on Oxen, Camels, and Horſes of the Country, which are exceeding ſmall, but very hardy. They are eight Days croſſing the Mountains. They can make-uſe of no other Carriage for their Goods, but thoſe ſmall Horſes, the Road is ſo narrow and rugged: But the Merchants are commonly carried-on the Shoulders of Women, who attend for the Purpoſe. From the Mountains they make-uſe of the ſame Kinds of Voiture, as at ſetting-out.

Courſe of Trade.

WHEN the Merchants, trading to *Bûtan* for Muſk and Rhubarb, get to *Gorroſhepûr*, the laſt Town belonging to the *Mogul*, and eight Stages from *Patna*, they apply to the Cuſtom-Houſe Officer to reduce the twenty-five *per Cent.* Duty on thoſe Commodities, to ſeven or eight; and if he refuſes, go the Northern-Road round-about, through *Kabul*. When they come there, the Karawâns part, ſome for *Tartary*, others for *Balk*. Here the Merchants, coming from *Bûtân*, barter their Goods with the *Tartars*, for Horſes, Mules, and Camels, Money being ſcarce in that Country. Thoſe Goods are afterwards tranſported, by the Purchaſers, into *Perſia*, as far as *Ardevil* and *Tauris*; whence ſome *Europeans* have imagined, that Rhubarb and Wormſeed came-out of *Tartary*, as, indeed, ſome of the former does; but not ſo good as the other Sort, being liable to corrupt ſooner. Some of the Merchants go to *Kandahâr*, and thence to *Iſpahân*, whither they carry Coral, yellow Amber, and Lapis Lazuli, all in Beads, if they can meet-with them.

Commodities.

THOSE who paſs through *Gorroſhepûr*, carry from *Pratna* and *Daka*, Coral, yellow Amber, Bracelets of Shells, particularly Tortoiſe, with great, thick Pieces of the laſt, ſome round, others ſquare. As the People of *Bûtân* burn Amber at the End of their Feaſts, like the *Chineſe* (ſome of whoſe Ceremonies they obſerve) it is in great Requeſt among them. The Merchants of this Country will give, at *Patna* above-mentioned, for a *Serre* (or nine Ounces [c]) of large Pieces of yellow Amber, as big as a Nut, bright and clean, thirty-five or forty *Rûpîs*; which will yield, in *Bûtân*, from two hundred and fifty to three hundred, according to its Colour and Beauty. Coral, wrought into Beads, is profitable enough; but they chuſe to have it rough, to ſhape it as they pleaſe themſelves.

THE Women and Maids are generally the Artiſts among them, as to thoſe Toys. They alſo make Beads of Cryſtal and Agat. As for the Men, they make Bracelets of Tortoiſe, and other Shells: They alſo poliſh thoſe little Pieces of Shells, which the Northern People wear in their Ears; and adorn their Hair with. In *Patna*, and *Daka*, there are above two thouſand Perſons thus employed, to furniſh the Kingdoms of *Bûtân*, *Aſem*, *Siam*, and other Northern and Eaſtern Parts of the *Mogul*'s Dominions.

THE King of *Bûtân* coins much Silver, in Pieces of the Value of a *Rûpi*. Whence the Author concludes, there muſt be ſome Silver-Mine in the Country: However, the Merchants could not tell where it lay. As for the Gold they have, which is but little, it is brought them by the Merchants of the more Eaſtern Regions [d].

2. *The* Religion *of* Tibet, *and its ſurprizing Conformity with the* Romiſh.

Religion of Tibet, *like the* Romiſh. *Jeſuitical Apology. The Parallel drawn by other Miſſioners. Chriſtianity in* Tibet. *A* Neſtorian *Forgery. Late groſs Impoſture of* Romiſh *Miſſioners. Report concerning* Chriſtian Tartars *accounted for.*

THE Religion of *Tibet* is the ſame with that profeſſed in *China* by the Sect of *Fo*, whereof already ſome Account [e] has been given: Nor have we much to add here, the Miſſioners, who have been in the Country, ſuch as *Grueber* the Jeſuit, *Deſideri*, and *Horace de la Penna*, Prefect of the *Capuchin* Miſſion lately eſtabliſhed there [f], having done little more than pointed-out the Reſemblance that they found between the Religion of *Tibet*, and their own.

SEVERAL Miſſionaries have imagined, that in the ancient Books of the *Lamas*, ſome Traces remain of the Chriſtian Religion; which, as they think, was preached there in the Time of the Apoſtles. Their Conjectures are founded upon, The Dreſs of the *Lamas*, which is not unlike that of the Apoſtles in ancient Paintings. 2. The

[a] Or rather, *Kaſhmîr*, before-mentioned. [b] This ſeems to be the *Nekpal* of *Grueber*, who went the Southern Road. Bibliotb. ou Hiſtoire Litteraire*, tom. 14. from p. 46. to p. 82; with a Critique of fifteen Page the End, by the Journaliſt.

Subo

Subordination, which has some Affinity to the Ecclesiastical Hierarchy. 3. A Resemblance between some of their Ceremonies, and the *Romish*. 4. Their Notion of an Incarnation; and, 5. Their Maxims of Morality. But no Certainty can be had in this Matter, without being well-acquainted with their ancient Books; which, according to the *Lamas* of greatest Learning, relate only to the Transmigration of the Soul.

NOTHING can be inferred from the Resemblance of some of their Ceremonies to ours, says the same Jesuit; but that, like all other Nations, they have some Notion of Religion. The Apostles dressed according to the Fashions of the Countries wherein they resided, or to which they belonged; and a Subordination is found amongst Priests of other Religions, *Mohammedan*, as well as idolatrous [a]. From hence one would be apt to think, the Resemblance between the Religion of *Tibet*, and *Rome*, is very trifling: But, if any Credit is to be given to other Missioners, it is very glaring, and runs through almost all the Doctrines of the *Romish* Church, as well as the Ceremonies. *Gerbillon* mentions some of these Ceremonies. 1. Holy-Water. 2. Singing-Service. 3. Praying for the Dead. 4. Their Dress is like that in which the Apostles are painted, and they wear the Mitre and Cap, like the Bishops. 5. Their great *Lama*, nearly the same among them, as the Sovereign-Pontiff among *Romanists* [b].

GRUEBER goes much farther: He affirms, that although no *European*, or Christian, was ever there before, yet their Religion agrees with the *Romish*, in all essential Points. Thus they celebrate the Sacrifice of the Mass with Bread and Wine, give extream Unction, bless married Folks, say Prayers over the Sick, make Processions, honour the Reliques of Idols (he should have said Saints) have Monasteries and Nunneries, sing in the Service of the Choir, like the *Romish* Monks, observe divers Fasts during the Year, undergo most severe Penances, and, among the rest, Whippings; consecrate Bishops, and send-out Missioners, who live in extream Poverty, and travel bare-foot through the Desarts, as far as *China*. These Things, adds *Grueber*, I was an Eye-Witness of [c].

FRIAR *Horace* says, that in the main the Religion of *Tibet* is the Counterpart [d] of the *Romish*. They believe in one God, and a Trinity, but full of Errors; a Paradise, Hell, and Purgatory, but full of Errors also. They make Suffrages, Alms, Prayers, and Sacrifices for the Dead; have a vast Number of Convents filled with Monks and Friars [e], amounting to thirty thousand; who, besides the three Vows of Poverty, Obedience, and Charity, make several others. They have their Confessors [f], who are chosen by their Superiors, and receive their Licences from their *Lama*, as a Bishop, without which they cannot hear Confessions, or impose Penances. They have the same Form of Hierarchy, as in the *Romish* Church; for they have their inferior *Lamas* chosen by the Grand *Lama*, who acts as Bishops in their respective Dioceses, having under them simple *Lamas*, who are the Religious [g]. To these may be added the Use of Holy-Water, Crosses, Beads, and other Matters. *Lassa Religion.*

SOME, as we have observed, like *Regis*, would conceal this Resemblance, wisely considering, that it would be no Credit to their Religion to be so nearly related to one confessed to be grosly idolatrous, but would help to confirm the Protestant Charge of Idolatry upon it. Others would pretend, that the People of *Tibet* were once Christians, but now degenerated into *Pagans* [h]; and *Andrada* says, they have still an Idea of the Christian Mysteries, though confused and corrupted. *Grueber* having suggested, that he was the first Christian who had been in *Barantola*, or *Tibet*, *Thevenot*, his Collector, takes Care to acquaint the Reader, that the Jesuit was mistaken; for that he finds Christianity had spread farther through the East, than the Ecclesiastical Writers were aware-of; and that there had been Princes, and even whole Nations, Christians on the Frontiers of *China*. He adds, that he could even point-out the Time when Christianity was carried thither by the *Nestorian* Missioners, and how it came to be lost: But that it was necessary to wait till the Proofs could be printed in the Languages in which they were written, and some other Pieces added; which would contribute much, he says, to clear-up the Geography and History of those Countries. *Christianity in Tibet.*

WE are sorry those Tracts never were printed, but fear his Christian Princes and Nations were only such as the famous *Prester John*, and his People; who, as Christians, doubtless, had no other Existence, than in the Writings of the *Nestorian* Missioners [i], a Set of Men, it may be presumed, no less addicted to deceiving, than the *Romish* or *Grecian*. *Hayton*, not content with having *Ung*, or *Vang Khân*, and his Tribe Christians, affirms, that both *Kublay* the Conqueror of *China*, and his Brother *Hûlakû*, who reigned under him in *Persia*, were Converts to the Faith. *A Nestorian Forgery.*

Country of Tibet. But we find nothing like this in Hiſtory, unleſs a the *Bonzas* were Chriſtians, to whom the *Chineſe* Hiſtorians ſay the former was too much addicted.

Late groſs Impoſture To omit others, we have a flagrant Inſtance of this impoſing Spirit in the Miſſioners, juſt come to Hand from *Tibet* itſelf. Friar *Horace de la Penna*, before-mentioned, who is at the Head of that Miſſion, pretends, that he, and his Brother *Capuchins*, not only converted the City of *Laſſa*, but almoſt brought-over the King and the b great *Lama* himſelf; who gave them Leave to build a Church, and Licence to preach; recommended theirs as the true Law, and allowed their Subjects to embrace it [a]. Thus theſe Men did, with the greateſt Eaſe imaginable, what the Miſſioners in *China* deemed impoſſible to be effected. *Gerbillon* and *Regis* ſay, the People are ſo infatuated with their *Lamas*, that there is no Hope *Of Romiſh Miſſioners.* of converting them [b]. Much leſs can it be ſuppoſed the great *Lama*, who aſſumes the Title of a De- c ity, would turn Proſelyte to the *Capuchins*, and acknowledge a Man for his Superior. This would be to own himſelf an Impoſtor, to renounce his Infallibility (which one may as well ſuppoſe the Pope would do) ſubject himſelf to the Laws of a Mortal, and, in ſhort, ungod himſelf at once. Yet this groſs Forgery of Friar *Horace* is ſupported by the Pope, and the Congregation *de propaganda fide*, by whoſe Orders the Memoir was cooked-up, and publiſhed. It d is obſervable, that *Horace* does not once mention the Pretenſions of the Grand *Lama* to the Godhead; either through Ignorance, or knowing that a Circumſtance of that Nature would confute his falſe Aſſertions.

Report of Chriſtian Tartars HENCE it plainly appears, how little Regard ought to be had to the Teſtimony of the Miſſioners, *Romiſh* or *Neſtorian*, in Caſes of this Nature. *Gaubil* cannot conceive how ſuch a Notion ſhould prevail, of there being Chriſtian e Nations in the Eaſt, unleſs the Thing was Fact: But he himſelf, at the ſame Time, helps us to account for it in a very natural Way. He ſays, the *Chineſe* call the *Lamas* of *Tibet*, the *Bonzas* of the Weſt; and have often conſidered the Chriſtians among them as Weſtern *Bonzas*, or *Lamas*, and as *Mohammedans* [c]. Might not then the Notion have ariſen, and been propagated from the Report of other Nations, who miſtook the *Lamas*, and thoſe of their Perſuaſion, for f Chriſtians, on Account of the great Reſemblance which they found between the Religion of the Lamas, and that of the *Greek*, or *Roman* Miſſionaries? Of this the following Authorities amount almoſt to a Demonſtration.

KIRCHER tells us, that *Andrada*, the Jeſuit, undertook the Voyage into *Tibet*, on hearing that the Inhabitants were profeſſed Chriſtians [d]. In the Relation of the Journey of the *Ruſſian* Ambaſſador's, who went to *China* about the Year 1623, ſpeaking of the *Mongul Lamas*, or Friars, as they are called, there is this Expreſſion: *They ſay, that their Religion is the ſame with ours, only the* Ruſſian *Monks are black, and theirs white* [e]. The *Lamas* (ſays *Deſideri*) told us, *that their Book of the Law*, or Religion, *was like ours; the King alſo, and ſeveral of his Courtiers, conſidered us as* Lamas *of the Law of Jeſus Chriſt* [f]. Hence it may well be preſumed, that *Marco Polo*, and the Friars who went into *Tartary* in the thirteenth Century, miſtook the Follower of the *Lamas* for Chriſtians, if they have not deſignedly repreſented them as ſuch.

3. *Of the* Dalay Lama, *adored as* God *incarnated.*

His Origin and Name. Frequent Incarnations. Image Worſhip. A licenſed Man-ſlayer: The Impoſtor's Titles, and divine Attributes: Cheat, how kept up, and propagated: The Idol, how adored: Attended by Prieſts: Their Number at Putala. *Great* Lamas *State, in giving Audience: His Excrements worn, as precious Relics. The Donation of* Tibet.

THE chief Object of Worſhip in this Country, is the ſame which in *China* is called *Fo* [g], but by the *Lamas* in *Tibet*, *La* [h]. This Prince, who was born one thouſand and twenty-ſix Years before Chriſt [i], and reigned in a Part of *India*, called *Chang-tyen-cho* [k], or, as others ſay, *Si-tyen* [l], gave himſelf out to be God, aſſuming human Fleſh; and when he died, it was pretended, that he only withdrew for a While, and would appear again in a determinate Time; as he actually did, if the Teſtimony of his devout Diſciples, the Writings of the primitive Fathers amongſt them, and, in ſhort, the Tradition and Authority of the whole Church, from Age to Age, down to the preſent, are at all to be regarded in Proof. And this Impoſture has been practiſed ſince, as often as there has been

Occaſion

N. Parr Sculp

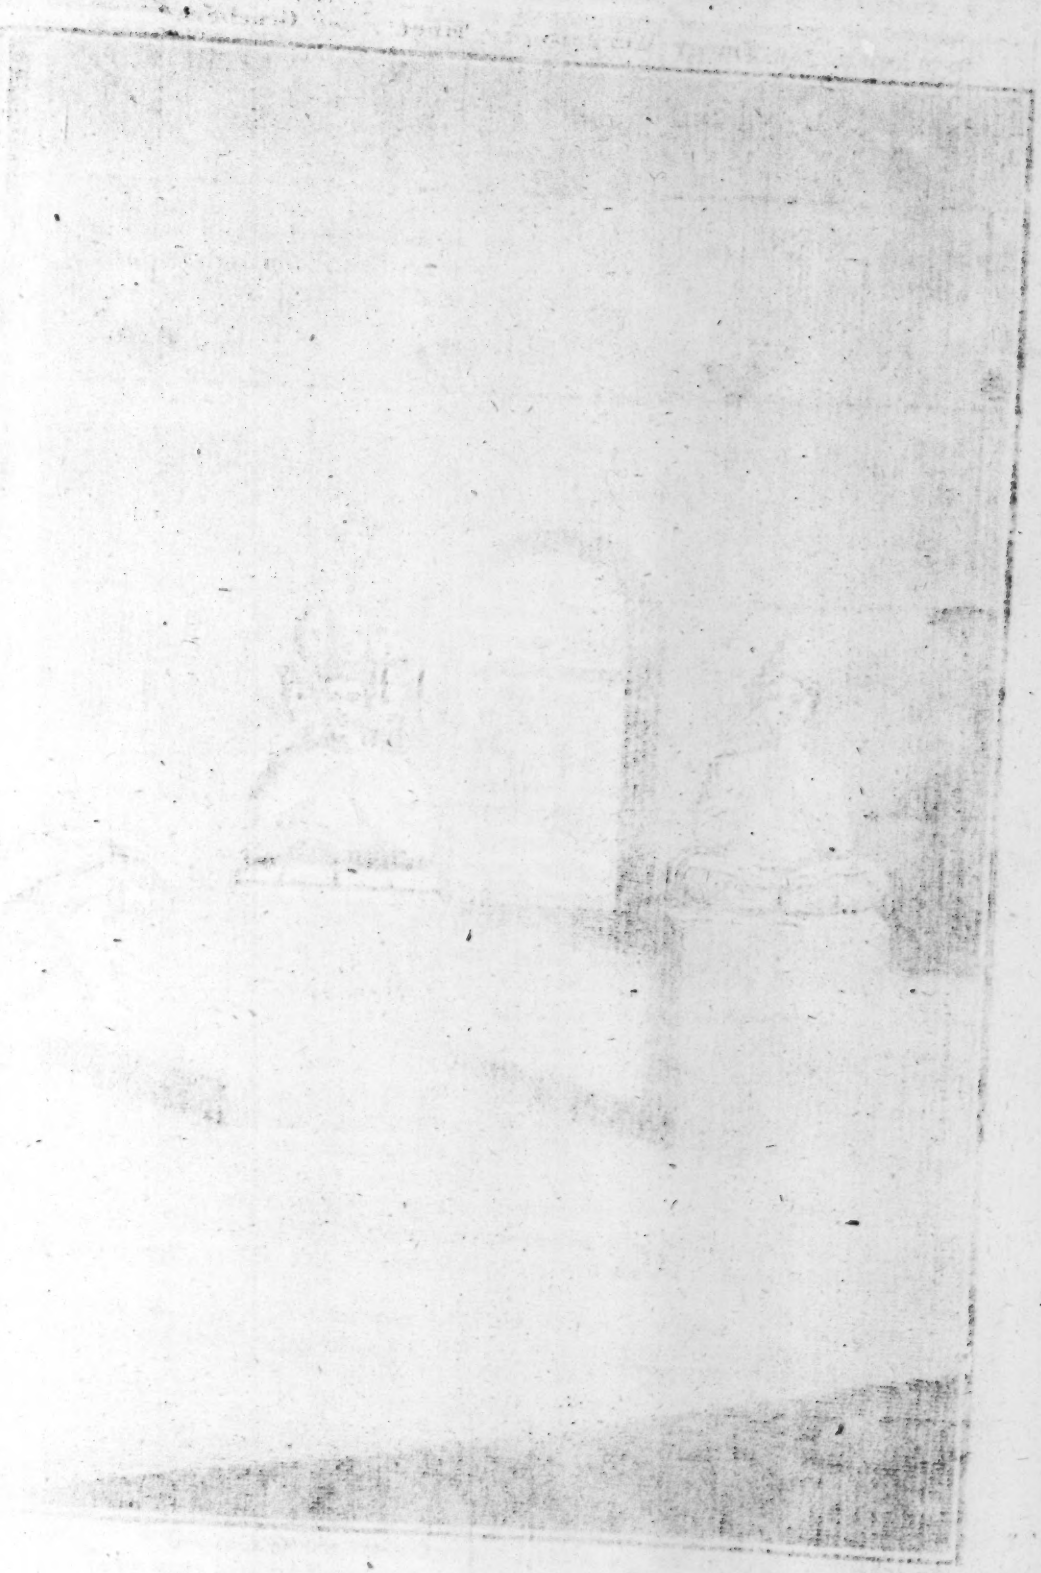

Image-Worſhip *in* Tibet. *from* Grueber.

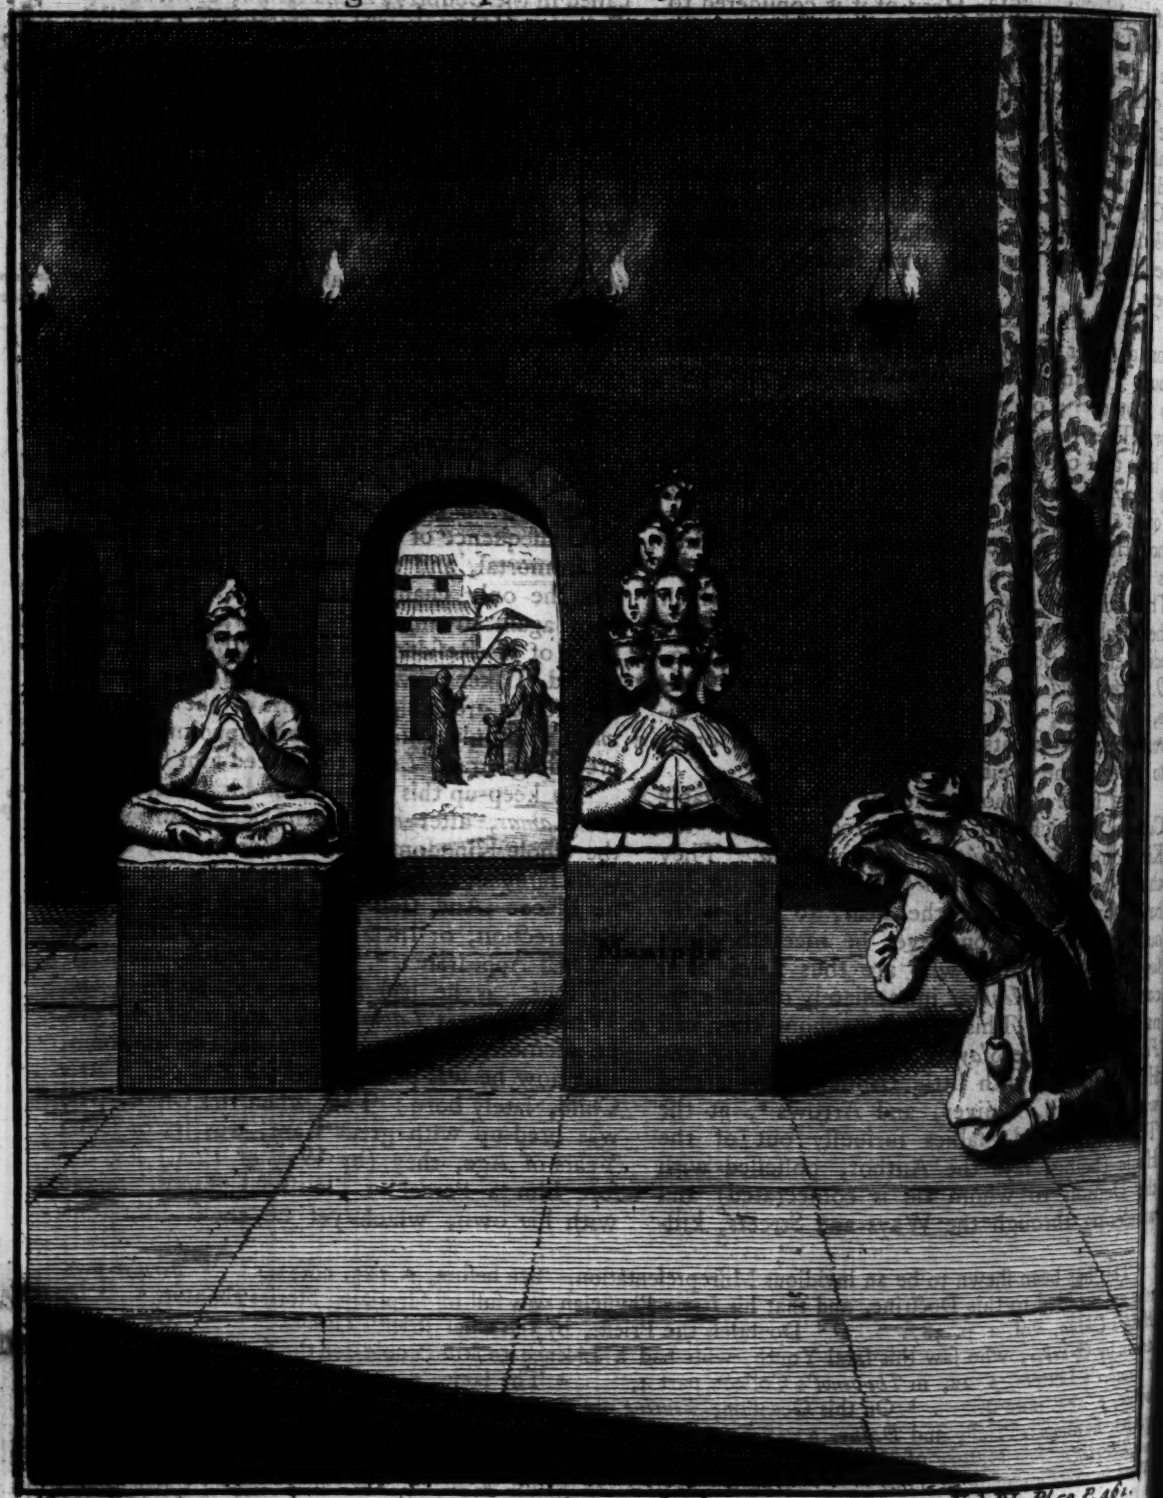

*N.*150. *N. Parr Sculp.* Vol. IV. *Pl.*69. *P.*461.

Occaſion for it: So that the God *La* ſtill lives, and is corporally preſent in the Perſon of the *Dalay Lama*. In which Reſpect, the Church of *Tibet* has infinitely the Advantage of the *Romiſh*, inaſmuch as the viſible Head of it is conſidered to be God himſelf, not his Vicar, or Deputy; and the incarnate Deity, who is the Object of divine Worſhip, appears alive in human Shape, to receive the Peoples Adorations: Not in the Form of a ſenſeleſs Bit of Bread, or playing at Bo-peep in a diminutive Wafer, which would be too groſs a Cheat to impoſe on the Underſtandings of the *Tibetians*, however ignorant [a] and ſuperſtitious the Miſſioners, to their own Shame, repreſent them.

THE Prieſts account for the ſeveral Incarnations of their Deity, from the Doctrine of the Soul's Tranſmigration, or paſſing from one Body to another [b]; of which *La* was the firſt Inventor. They ſolve, after the ſame Manner, every Thing that concerns their principal Images; ſuch as *Menippe*, which has ſeveral Heads of different Forms [c]. *Grueber* (who calls it *Manipe*) ſays, thoſe Heads are nine in Number, and ſo placed, as to terminate in a Cone of monſtrous Height. This is the chief of all the Images, before which the People perform their ſacred Rites, with many odd Geſticulations and Dances, often repeating, *O Manipe Mi-hum, O Manipe Mi-hum!* that is, *O Manipe, ſave us!* They frequently ſet divers Sorts of Meats before this Image, in order to appeaſe the Deity.

THE ſame Author mentions a moſt deteſtable Cuſtom, which has been introduced into the Kingdoms of *Tangût*, and *Barantola*. They chuſe [d] a luſty Youth, to whom they grant Liberty, on ſet-Days of the Year, to kill, without Diſtinction, whomſoever he meeteth-with; ſuppoſing, that they who are thus ſlain, as if conſecrated by *Menipe*, immediately obtain eternal Happineſs. This Youth, whom they call *Fit*, that is, the *Slayer*, dreſſed in a very gay Habit, decked with little Banners, and armed with a Sword, Quiver, and Arrows [e], at the Times appointed, ſallies furiouſly out of the Houſe (being, ſays the Author, poſſeſſed with the Demon to whom he is conſecrated) and wandering through the Ways and Streets, killeth People at his Pleaſure, none making any Reſiſtance [f].

Laſſa Religion.

THE great *Lama*, who, as we ſaid before, is *La*, or *Fo* incarnate, is, according to *Grueber*, called in the Country, *Lama Konjû*, or *the Eternal Father* [g]. He is alſo ſtiled *Dalay Lama* [h]. The ſame Author ſays, in another Letter, that *Great Lama* ſignifies the *Great High Prieſt*, and *Lama of Lamas*; as he is alſo ſtiled, *the High Prieſt of High Prieſts* [i]. Theſe laſt Titles regard only his Office, or Degree, in his eccleſiaſtical or religious Capacity; but with reſpect to his divine Nature, or Quality, which intitles him to be adored as God, they term him likewiſe *the heavenly Father* [k], aſcribing to him all the Attributes of the true Deity; as, that he is omniſcient, and that all Things are open to his View, even the Secrets of the Heart. If at any Time he aſks Queſtions, it is not, ſay they, for Sake of Information, but to remove the Scruples of the Incredulous and Diſaffected. They believe, that *Fo* (or *La*) lives in him; hence thoſe of his Religion in *China* call him *Ho-fo*, or the *living Fo*. In Conſequence of this Perſuaſion, he is held to be immortal, and that when in Appearance, he dies, he only changes his Abode: That he is born again in an entire Body, and the happy Place of his Reſidence is revealed by certain pretended Tokens, which the *Tartarian* Princes themſelves are obliged to learn of the other *Lamas*; who only know the Child appointed by the preceding Grand *Lama* to ſucceed him [l].

The Impoſtor's Titles.

And divine Attributes.

TO keep-up this Opinion of his Immortality, the *Lamas*, after his Death, ſeek, throughout the whole Kingdom, for another Perſon, as like unto him, in all Reſpects, as may be, to ſupply his Place: And thus he has undergone a new Reſurrection, or Incarnation, ſeven Times ſince his firſt Appearance [m]. *Bernier* relates the Matter thus, as he had it from a *Lama* Phyſician. When the great *Lama* is old, and ready to die, he aſſembles his Council, and declares to them, that now he was paſſing into the Body of a little Child, lately born: That when this Child, who was bred-up with great Care, was ſix or ſeven Years of Age, they (by Way of Trial) laid before him a Parcel of Houſhold-Goods, mixed with his own, which yet he could diſtinguiſh

Cheat, how kept up.

[a] This has been ſhewn to be an invidious Miſrepreſentation. See before, *p.* 123. note a. [b] *Bernier* ſays, they are wedded to this Doctrine, and that his *Lama* Phyſician was full of ſurprizing Stories about it. [c] *Du Halde's China*, vol. 2. p. 387. [d] Doubtleſs the Prieſts, by the chief Prieſt's Orders. [e] See the Cut drawn by *Grueber*, who ſaw this fatal Youth, who had a Licence to kill People for the Good of their Souls. [f] *Grueber's* Letters, *p.* 22, in *Thevenot's* Collect. part 4. [g] The ſame, *p.* 1. *Deſideri* writes, *Konchok*. See before, *p.* 454. note d. [h] On this Occaſion, *Bentink* obſerves, that as the Word *Lama*, in the *Mogul* Languages, ſignifies a Prieſt, and *Dalay*, a vaſt Extent, or the Ocean, *Dalay Lama* is as much as to ſay, *the univerſal Prieſt*. See Hiſtory of the *Turks*, *Moguls*, &c. p. 486. By this Author's Leave, *Lama* ſeems to be a Word in the Language of *Tibet*. [i] *Grueber's* Letters, as before, *p.* 22; and *Ogilb.* p. 36. [k] The ſame. [l] *Du Halde*, as before, *p.* 385. [m] *Grueber's* Letters, as before, *p.* 1; but *p.* 23, and in *Ogilb.* p. 361, it is ſaid, by ſome Miſtake, ſeven Times in an hundred Years.

from

Country of Tibet. from the reſt; and this, he ſaid, was a manifeſt a Proof of the Tranſmigration [a].

And propagated. *GRUEBER* ſays, that this Belief is propagated by the Policy of their Kings, and thoſe who are in the Secret of this Cheat, in Conjunction with the *Lama Konjû* [b]. The Miſſioners rail heavily at this Impoſture, calling it wicked and diabolical, as if beſides Tranſubſtantiation, which is worſe, they had not other Impoſtures in their own Religion [c]. But it is done, doubtleſs, out of Envy; becauſe they have none which redounds ſo much to the Honour and Wealth of themſelves.

The Idol, how adored. *GRUEBER* ſays, the great *Lama* ſitteth in a remote Apartment of his Palace, adorned with Gold and Silver, and illuminated with Lamps, in a lofty Place like a Couch, covered with coſtly Tapeſtry. In approaching him, his Votaries fall proſtrate with their Heads to the Ground, and kiſs him with incredible Veneration. Thus, adds the Jeſuit, hath the Devil, through his innate Malignity, transferred to the Worſhip of this People that Veneration which is due only to the Pope of *Rome*, Chriſt's Vicar, in the ſame Manner as he hath done all the other Myſteries of the Chriſtian Religion [d].

THE ſame Author farther obſerves, that he always appears with his Face covered; letting none ſee it, but thoſe who are in the Secret: That he acts his Part extreamly well, while the *Attended by Prieſts.* *Lamas*, or Prieſts, who are perpetually about him, attend him with great Aſſiduity, and expound the Oracles that are taken from his Mouth [e]. Here it muſt be noted, that *Grueber* learned all he writes concerning the great *Lama*, from the Citizens of *Barantola*; for the Miſſioners could not ſee him, no Chriſtian being admitted into his Preſence [f], nor, indeed, anybody of a different Religion, without adoring the pretended Deity: However, they took an exact Copy of his Picture, as it was expoſed to View in the Entrance of the Palace; to which they payed the ſame Veneration, as to himſelf in Perſon [g].

BENTINK tells us, that at the Foot of the high Mountain near *Putala*, whereon the *Dalay Lama* reſides, above twenty thouſand *Lamas* dwell, in ſeveral Circles round it, according as the Rank and Dignities, which they poſſeſs, render them more worthy to approach the Perſon of their Sovereign Pontiff [h].

ACCORDING to the Account tranſmitted by *Regis*, the Grand *Lama* ſits croſs-legged on a Kind of Altar, with a large and magnificent Cuſhion under him; where he receives the Compliments, or rather Adorations, not only of his own Subjects, but of prodigious Multitudes of Strangers; who make long Journies to offer him their Homage [i], and obtain his Bleſſing. Some even travel there from *India*, who never fail to enlarge before him upon their own Merit, and magnify the Sufferings they have undergone in their painful Pilgrimage. But next to the People of *Tibet*, the *Tartars* are moſt devoted to the Grand *Lama*, ſome of whom reſort to *Laſa* from the moſt diſtant Corners. When the *Eluths-Dſongari* invaded *Tibet*, the Siſter of *Ayuki*, *Khân* of the *Eluths-Torgauti* [k], with her Son, was at *Laſſa*, upon the like Errand.

PRINCES are no more excuſed from this ſervile Adoration, than the meaneſt of their Subjects; nor do they meet with more Reſpect from the Grand *Lama*, who never moves from his Cuſhion, nor any other Way returns the Salute. He only lays his Hand upon the Head of the Worſhippers, who then think all their Sins pardoned. The *Lamas*, who drew the Map, obſerved, that in receiving the Emperor's Ambaſſador, he did not kneel like the *Tartar* Princes; but when he enquired after *Kang-hi*'s Health, reſting upon one Hand, he only made a ſmall Motion, as if he intended to riſe from his Seat [l]. He was at that ſame Time dreſſed in a red Habit of Woollen-Frize, ſuch as the common *Lamas* wear, with a yellow Hat gilt [m].

GRUEBER aſſures us, that the Grandees of the Kingdom are very eager to procure the Excrements of this Divinity, which they uſually

[a] *Bentink* obſerves, that although the *Lamas* are great Sticklers for the Metempſychoſis; yet thoſe among them, who pretend to know more than the reſt, do not believe, that the Soul paſſes really out of one Body to enter into another; but only its Faculties. See Hiſtory of the *Turks*, *Moguls*, &c. p. 487. [b] *Grueber*'s Letters, *p.* 2. [c] *Neret*, the Jeſuit, in his Voyage to the *Holy Land*, publiſhed in the *New Memoirs of Miſſions into the* Levant, tom. 5. calls the *Greek* and *Armenian* Patriarchs, ravenous Wolves, and the worſt of Names for deceiving the People with the pretended Deſcent of the miraculous Fire into the Holy Sepulchre on *Eaſter Day*, although he himſelf would impoſe the more palpable Fable of the Houſe of the Lady of *Loretta* travelling from *Nazareth* to *Italy*, upon the Belief of his Readers: And *Vertot*, in his Hiſtory of the Knights of *Malta*, would perſuade us, that the *Romiſh* Church, when in Poſſeſſion of the ſaid Sepulchre, was actually veſted with the Power of bringing-down the Fire from Heaven: And were the *Latins* reſtored, no Doubt, they would go-on with the Impoſture no leſs boldly, than thoſe who at preſent have the Management of it. [d] *Grueber*'s Letters, *p.* 22; and *Ogilb.* p. 360. [e] The ſame, *p.* 2, and 23; and *Ogilb.* p. 361. [f] Yet Friar *Horatius*, it ſeems, was admitted without any Difficulty. [g] *Ogilby*'s *China*, p. 361. [h] Hiſtory of the *Turks*, p. 486. [i] *Grueber* ſays, they offer a Multitude of Preſents and Oblations. *Letters*, p. 22; *Ogilb.* p. 3[illegible]. [k] See before, *p.* 401. They arrived there in 1703, and returned in 1712. [l] *Du Halde*'s *China*, p. 3[illegible]. [m] The ſame, *p.* 387.

wear about their Necks as Reliques. In another Place, he ſays, that the *Lamas* make a great Advantage by the large Preſents they receive for helping the Grandees to ſome of his Excrements, or Urine; for by wearing the firſt about their Necks, and mixing the latter with their Victuals [a], they imagine themſelves to be ſecure againſt all bodily Infirmities [b]. In Confirmation of this, *Gerbillon* informs us, that the *Mongols* wear his Excrements pulverized in little Bags about their Necks, as precious Reliques, capable of preſerving them from all Misfortunes, and curing them of all Sorts of Diſtempers. When this Jeſuit was on his ſecond Journey into *Weſtern Tartary*, a Deputy from one of the principal *Lamas*, offered the Emperor's Uncle a certain Powder, contained in a little Packet of very white Paper, neatly wrapped-up in a Scarf of very white Taffety: But that Prince told him, that as it was not the Cuſtom of the *Manchews* to make-uſe of ſuch Things, he durſt not receive it. The Author took this Powder to be either ſome of the Great *Lama*'s Excrements, or the Aſhes of ſomething that had been uſed by him [c].

TROPHIES are erected on the Tops of the Mountains [d] in Honour of the Great *Lama*, for the Preſervation of Men and Cattle [e]. All the Kings, who profeſs the Religion of the Great *Lama*, before they are inaugurated, ſend Ambaſſadors, with very rich Preſents, to crave his Benediction, as a Means to render their Reigns happy [f].

TILL of late, the *Dalay Lama* was a mere ſpiritual Prince; but he is now become a temporal one alſo, with a large Patrimony; the *Khân* of the *Eluths*, who conquered it in the laſt Century, having made him a Preſent of it [g], which is a much larger Patrimony than that called *St. Peter*'s, uſurped by the Popes. Yet for all this, *Bentink* informs us, that he does not meddle, in any Sort, with the Temporality of his Dominions, or ſuffer any of his *Lamas* to meddle with it; but puts all ſecular Matters under the Government of two *Khâns* of the *Kalmûks*, who are to furniſh him with all Things neceſſary for the Maintenance of his Family. When he has any political Affairs to tranſact, it is the *Deva* (or *Tipa*, a Sort of Plenipotentiary) who acts under his Orders [h]. Laſſa *Religion.*

4. *Of the* Hûtûktûs, *or* Apoſtolical Vicars, *and the* inferior Lamas.

The Religion far extended. Apoſtolic Vicars. Lama *Hierarchy: Their Habit accounted honourable: Numbers and Rules: Their Character, miſrepreſented: Their Religion unknown to the* European *Miſſioners.* Lamas *conceal their Religion. Reaſons aſſigned, and refuted.* Mongſan Lamas. Lamas *in* China *encouraged, and why. The red and yellow Hats.*

THE Religion of the Great *Lama* ſeems to be more extended, than any other in the World: For beſides *Tibet*, which is its Native-Seat, it has ſpread itſelf over all the *Indies*, *China*, and *Weſtern Tartary*, from one End to the other. It is true, the Provinces of the *Indies*, and *China*, have many Ages ago thrown-off his Juriſdiction, and ſet-up chief Prieſts of their own, who have modelled the Religion of their reſpective Countries, according to their different Fancies, or Intereſt. But *Tibet*, and the greater Part of *Tartary*, are ſtill ſubject to him, in Spirituals. The better to govern this vaſt Dominion, he conſtitutes Deputies, or Vicars, to officiate in his Stead. Theſe are called *Hútûktûs*, or *Khûtûktûs*; which, according to *Regis*, are choſen from among the Diſciples of the Great *Lama*. It is eſteemed a real Happineſs to be admitted into the Number of theſe laſt, which never exceeds two hundred; and they, on whom the Honour of *Hûtûktû* is conferred, are conſidered as ſo many leſſer *Fo's* [i]: They are neither confined to the Pagods, nor limited to *Tibet*, but ſettle where they pleaſe; and ſoon acquire great Riches, by the Offerings of their numerous Worſhippers [k]. One of them, who reſided among the *Kalka Mongols*, about the Beginning of this Century ſet-up for himſelf [l], in Oppoſition to his Maſter, aſſuming all the Privileges and Powers which the Grand *Lama* pretends to; and, in all Likelihood, others, from Time to Time, will follow his Example. *The Religion far extended.* *Apoſtolic Vicars.*

[a] The *Butân* Merchants told *Tavernier*, that they ſtrew his Ordure, powdered, over their Victuals, *Trav.* vol. 2. p. 185. [b] *Grueber*'s Letters, *p.* 2, and 23. *Ogilby*'s *China*, p. 361. [c] *Du Halde*'s *China*, p. 318. [d] See the Cut. [e] *Ogilby*, as before, *p.* 358. [f] The ſame, *p.* 362. [g] *Du Halde*, as before, *p.* 258. [h] Hiſtory of the *Turks*, &c. p. 486; and *L'Eſtat de la Boucharia*. [i] Or, living *Fo's*. See before, *p.* 371, and 377; and ſo *Regis* ſeems to tranſlate the Word, in one Place, when ſpeaking of the *Hûtûktû*, he adds, or living *Fo*, *Du Halde*, vol. 2. p. 252. It may be the *Tibetian*, or rather *Mongol* Word, anſwering to the *Chineſe Ho-fo*, ſignifying the ſame Thing. However that be, we find here, in the Perſons of the *Hûtûktûs*, the Appearance of the Deity in ſeveral different Bodies: But they have more Senſe, or Modeſty, than to aſſert that the ſame Body is multiplied, or exiſting in ſeveral different Places at once, as the *Romiſh* Prieſts do, in Conſequence of their abſurd and blaſphemous Doctrine of Tranſubſtantiation. [k] *Du Halde*, as before, *p.* 385. [l] See before, *p.* 377.

FOR

Country of Tibet.

FOR keeping-up Diſcipline and Order in Eccleſiaſtical Matters, there is a Kind of Hierarchy in *Tibet*, conſiſting of Church-Officers, anſwering to Archbiſhops, Biſhops and Prieſts. They have alſo their Priors, Abbots, and Abbeſſes, Superiors, Provincials, or ſuch-like Degrees, for ordering what concerns the regular Clergy. The *Lamas*, or Prieſts, who preſide over the Temples throughout the Country [a], are ſent from the College of the *Lama*'s Diſciples before-mentioned. The other *Lamas* officiate as Aſſiſtants at Divine-Service, in the Churches and Monaſteries; or go abroad on the Miſſion into foreign Countries.

Lama Hierarchy,

Their Habit

REGIS ſays, the *Lamas* generally wear a Woollen-Frize like ours, but narrower, and not ſo cloſe; yet is laſting, and retains its Colour. They uſe, beſides the Hat, different Kinds of Bonnets, according to their ſeveral Dignities; one of which is ſomewhat remarkable, as it reſembles our Biſhops Mitres; but they wear the Slit before [b].

THE Great *Lama*'s Colour is red; but as the Emperor of *China* has of late gained ſome Footing in *Tibet*, thoſe of his Party, as well as all the *Mongol* and *Kalka Lamas*, wear Yellow. *Bentink* ſpeaking of theſe latter, obſerves, that they go habited in long, yellow Robes, with great Sleeves, which they bind-about their Waiſt with a Girdle of the ſame Colour, two Fingers broad. They have the Head and Beard ſhaved very cloſe, and wear yellow Hats. They always carry a great Pair of Beads of Coral, or yellow Amber, in their Hands, which they turn inceſſantly between their Fingers, ſaying Prayers to themſelves after their Manner. The Nuns wear very nearly the ſame Dreſs, excepting that they wear Bonnets, edged with Fur, inſtead of Hats, which the *Lamas* wear [c].

Accounted Honourable.

THERE are ſeveral Princes in *Tibet*, who aſſume the *Lama* Habit, and under the Titles of the Grand *Lama*'s principal Officers, act almoſt independently of him. The Dignity of *Lama* is not limited to the Natives of *Tibet* alone. The *Tartars* and *Chineſe*, who are equally ambitious of this Honour, go to *Laſa* to obtain it [d].

Number and Rules.

THE Multitude of *Lamas* in *Tibet* is incredible, hardly a Family being without one, either out of their Devotion, or Expectations of Preferment in the Grand *Lama*'s Service. The Rules of the *Lamas* are too many and burdenſome, to be all obſerved by one *Lama*; wherefore they divide the Load among them, one confining himſelf to this particular Duty, and another to that; but they are all obliged to conform to Celibacy [e], as well as to renounce worldly Grandeur and Employments [f].

As to their Character, if you will take it from their great Adverſaries, the Miſſioners, moſt of them are debauched; yet they govern Princes [g], who give them the chief Place in Aſſemblies, and are blindly followed by their Votaries, who give them the beſt of what they have. Some of them are tolerably ſkilled in Medicine; others have ſome Notion of Aſtronomy, and can calculate Eclipſes [h]. *Bernier* met-with one of theſe *Lama* Phyſicians at *Kaſhmîr*, who came in the Train of an Ambaſſador from *Great Tibet* [i]. He had with him a Book of Recipes, which he would by no Means part with [k].

REGIS repreſents them as very ignorant [l], affirming, that few of them can read or underſtand their ancient Books, or even ſay their Prayers, which are in an ancient Tongue, and Character, no longer ſpoken, or known [m]. But this Charge muſt be unjuſt, if other Writers may be credited [n]. Beſides, Friar *Horace* declares, that there are in *Tibet* Univerſities and Colleges for teaching the Things relating to their Law [o], or Religion.

BENTINK gives a different Account of the *Lamas* in *Tartary*. He ſays, they both teach and practiſe the three great fundamental Duties of honouring God, offending no-body, and giving to every-one what belongs to him: That the Lives, which both they and the *Kalmûks*, or *Eluths* lead, inconteſtably prove the two laſt Points; and that he was informed, by ſome Travellers of Credit, that they ſtrenuouſly proteſt againſt adoring more than one God: That the *Dalay Lama*, and *Khûtûktûs*, are his Servants, with whom he commuicates for the Inſtruction and Good of Men: That the Images, which they honour, are no more than Repreſentations of the Deity, or ſome holy Men; and that they expoſe them to the View of People, only to put them in Mind of their Duty.

THIS, excepting what relates to their external Diſcipline, is all the Author could pick-up after all his Pains, not having been able to find Perſons capable of thoroughly informing him: For as all the ſacred Books of their Religion are written in the Language of *Tangût* [p], which both *Mongols* and *Eluths* are entirely ignorant of, they depend, like the Papiſts, wholly upon what

[a] Theſe are marked in the Map of *Tibet*. [b] *Du Halde*'s *China*, p. 387, & *ſeq*. [c] Hiſtory of the *Turks*, &c. p. 487. [d] *Du Halde*, as before, *p*. 385. [e] *Bentink* ſays, both the Monks and Nuns take the Vows. [f] *Du Halde*, as before, *p*. 388, and 395. [g] Is this more than what they do on this Side of the Globe? [h] *Du Halde*, as before, *p*. 253, 256, 263, 387. [i] See before, *p*. 455. c. [k] *Bernier*'s Memoirs of *India*, p. 126, & *ſeq*. [l] See before, *p*. 371. [m] See *Du Halde*, p. 253. [n] See before, *p*. 123 note a. [o] *Nouv. Bibl.* tom. 14. p. 57. [p] Or, *Tibet*.

of their Prieſts are willing to tell them; and theſe a make ſo many Myſteries of what regards their Worſhip [a], that one has much-ado to get any Thing out of them. For all this, it ſeems ſtrange to *Bentink*, that *Europeans* ſhould be ſo little acquainted with a Religion which is ſpread over all the middle Part of *Aſia*, and might be ſo eaſily known to the *Ruſſians*, who border on the Countries where it is profeſſed: But then he obſerves, that the *Ruſſians*, like other Nations, ſearch after nothing but what concerns their Pro- b fit [b].

IF the *Ruſſians* in *Siberia*, moſtly Merchants and Soldiers by Profeſſion, are to blame in this Article, the *Romiſh* Miſſioners muſt be much more culpable: Becauſe they were obliged, in Point of Duty, to be thoroughly acquainted with the Religion of the People whom they were ſent to convert; and by their Reſidence for above an hundred and fifty Years in *China*, had the fulleſt Opportunity of conſulting both their c Prieſts and Books: Yet how little have they done that Way? Nay, the latter Miſſioners, even thoſe who were in *Tibet* itſelf, appear more ignorant of the Religion of that Country, than the early ones. Friar *Horace* the *Capuchin*, who, if you will believe him, had ſuch eaſy Acceſs to the Grand *Lama*, and was ſo highly careſſed by him, was yet, as hath been before obſerved, a Stranger to his divine Character [c]. On the other Hand, *Deſideri* the Jeſuit, though he ſays he was d at *Laſſa*, never once mentions the *Dalay Lama*, as if no ſuch Perſon had reſided there; he only ſpeaks of ſome Great *Lama*, who had Audience of, or made a Viſit to, the King.

FOR having thus failed ſo egregiouſly in this Particular, various Excuſes are made by them: Some alledge the Ignorance of their Prieſts, as not able to give an Account of the Doctrines of their Religion: Others, their Reſervedneſs in communicating either what they know them- e ſelves, or their ſacred Books: Others pretend, theſe Volumes are written in an obſolete Language and Character, not underſtood by the Prieſts themſelves; and ſome ſhuffle it off, by ſaying, if they were to ſearch their Books, they do not believe they ſhould meet-with any Thing worth knowing, more than what they are already acquainted with. Laſtly, they give-up the Converſion of the *Tibetians*, declaring, that ſo long as the Great *Lama* continues Maſter of *Tibet*, f Chriſtianity can make little or no Progreſs there [e].

As to this laſt Apology (not to mention its being expreſly contradicted by the Teſtimony of honeſt Friar *Horace*, as before-mentioned) it ſeems ſtrange, that the *Neſtorian* Miſſioners ſhould find it ſo eaſy, and the *Romiſh* ſo difficult, to convert this Nation; or that the Inhabitants of *Tibet* ſhould be more obſtinate now, than they were nine hundred Years ago; and more averſe to embracing Chriſtianity at preſent, that their Religion bears ſo great a Likeneſs to it, than before, when it had ſcarce any Reſemblance of it at all; unleſs it was on Account of that Conformity. Laſſa *Religion. And refuted.*

BUT not to ſtay to examine the Weight, or Conſiſtency of ſuch Arguments any further, we may juſtly impute the Omiſſion either to their own Negligence, Ignorance, or Unwillingneſs fully to lay open the Agreement of the Religion of *Tibet* with that of *Rome*, as hath been already ſuggeſted [f].

THE moſt powerful among the *Lamas*, are Mong-fan Lamas. thoſe called by the *Chineſe*, *Mong-fan*, who poſſeſs a wide Territory in *Tibet*, North of *Li-kyang-tû fû* in *Yun-nan*, between the Rivers *Kin-cha-kyang*, and *Vu-lyang-ho*. This Country was ceded to them by *U-ſan-ghey* (whom the *Manchews* made King of *Yun-nan*) to engage them in his Intereſt [g].

ALTHOUGH the Religion of the Great *Lama* is ſpread through *China*, yet he ſeems to have no Juriſdiction there; at leaſt the Miſſioners are ſilent as to this Article of his Supremacy, reckoned ſo important in their own Church. The *Lamas*, however, have from Time to Time attempted to get Footing in the Empire, perhaps with a View to eſtabliſh their Maſter's Authority there; but have never been able to compaſs their Deſign, owing, in great Meaſure, doubtleſs, to the Oppoſition of the *Ho-ſhang*, or *Bonzas*, who, probably, aſſert the Freedom, or Independence of their Church, as the *Gallican* formerly did in *France*.

GAUBIL tells us, that the *Chineſe* Hiſtory Lamas in China firſt ſpeaks of *Lamas* being employed by the *Mongols*, and erecting Monaſteries among them, in the Reign of *Keyuk Khân*, Grandſon of *Jenghîz Khân* [g]. But as they came in great Numbers, and were very chargeable to the People, going among them from Houſe to Houſe, *Tayting* [h], ſixth Emperor of the *Yuwen*, forbad them to enter *China* [i]. However, their Authority continued there while that Family poſſeſſed the Throne, whoſe Ruin is attributed to the Encouragement given them by *Shun-ti*, the laſt of it:

[a] Rather Articles of their Faith. [b] Hiſtory of the *Turks*, &c. p. 488, & *ſeqq*. [c] A whimſical Thing indeed, that he ſhould make a Convert of a God without knowing it. [d] *Du Halde*'s *China*, vol. 2. p. 388. See alſo before, *p.* 371. f. [e] See before, *p.* 212. note f, and 220. [f] *Du Halde*, as before, vol. p. 385. [g] *Gaubil*, *Hiſt. de Gentch.* p. 142. note 13. [h] His *Mongol* Name was *Yeſuntimur*. See the Table, p. 449. [i] *Du Halde*, as before, vol. 1. p. 501.

Country of Tibet. But *Hong-vû* having reſtored the Dominion of a the *Chineſe*, expelled the *Lamas* along with the *Mongols*.

Encouraged, and why. THEY recovered their Credit in *China*, when the *Manchews* got Poſſeſſion: For although they were formerly no Friends to the *Lamas*, yet when they began to invade their Neighbours, they politically favoured them; And when *Shunchi* became Maſter of the Empire, the Grand *Lama* omitted no Meaſure that might ſecure his Intereſt in that Prince, not diſdaining even to b leave *Laſa*, and travel to *Pe-king*, to congratulate the Emperor, and bleſs his Family. After this, the Empreſs erected a magnificent Temple for the *Lamas*, whoſe Example was imitated by the Princes, Princeſſes, and others; which Encouragement ſoon multiplied their Number in *China*. They are very wealthy, and dreſs in fine yellow, or red Satin, and the choiceſt Furs: They appear well-mounted, and attended with Retinues, more or leſs numerous, according to c their Degree of *Mandarinſhip*; which Honour the Emperor frequently confers upon them [a]. Thus, on his Side, he endeavours politically to ingratiate himſelf with the Grand *Lama*, whoſe Power, he knows, is very great among the *Tartars*, carrying-on his Intrigues even in *Tibet* itſelf.

The red and yellow Hats. HENCE it came to paſs, that in the Beginning of this Century, a Diviſion happened in *Tibet* itſelf, amongſt the *Lamas*. One Party adhered to d the red Hat, the Colour uſed by the Grand *Lama*; the other aſſumed the yellow Hat, to denote their Attachment to the preſent Imperial Family of *China* [b], whoſe Intereſt has increaſed, ſince the *Tſe-vang-raptans* Troops, which had ravaged the Country, were defeated there in 1720, by the *Chineſe* Army [c].

5. *The* Government *of* Tibet.

Tibet *conquered: Its Donation to the* Lama. *Another Revolution in the Kingdom: Governed by a* Tipa: *Awed by* China. *Emperor impoſed on by the* Lamas. *Envoys, how treated. The King's State, and large Cannon: How reverenced.*

TOWARDS the Beginning of the laſt Century, *Tibet* was governed by a King of its own, called *Tſanpa Han* [d], in the *Chineſe* Hiſtory, *Tſan-pû*; and the Dominions of the Grand *Lama* were confined to a ſmall Province [e]. But about the Year 1630, the Grand *Lama* being exaſperated to find *Tſanpa* deficient in the Reſpect which he uſed to pay him, called to his Aſſiſtance the *Eluths* of *Koko Nor* [f], a Nation moſt blindly devoted to him. They, under the Conduct of *Kuſhi Han*, aided by *Paturu-bum Tayki* [g], invaded *Tibet* with a powerful Army; and, having obtained a compleat Victory, took the King Priſoner, and put him to Death. After which, he gave his Kingdom to the Grand *Lama*, being ſatisfied with becoming his Vaſſal; and having the Title of *Han* conferred upon him, ſettled, with all his People, in the Neighbourhood of *Laſſa*, to ſecure the Grand *Lama* in the Poſſeſſion of his new Dominion: But the auxiliary Princes returned home to the Country of *Koko Nor* [h].

ANDRADA, the Jeſuit, who in 1624 travelled from *Agra* in the *Mogul*'s Empire, to the Source of the *Ganges*, pretends, that the Grand *Lama*'s Reſentment to the King aroſe from his beginning to have ſome Thoughts of embracing Chriſtianity, upon the preaching of that Miſſioner; and that while he was in *India*, whither he had returned to procure Aſſiſtance in his Miniſtry, the Revolution above happened. *Regis* has adopted this Fiction of that lying Jeſuit [i], who, in all Probability, never was in *Tibet*, as ſhall be ſhewn hereafter [k].

THE Poſterity of *Kûſhi Han* continued to protect the Grand *Lama*, in the Manner above related: Yet, according to *Bentink*, the *Khân* of the *Eluths-Dſongari*, who poſſeſs *Great Tartary*, kept a Kind of Superiority over the Country, and took-care, that the two *Khâns* [l], who had the Adminiſtration in Temporals within the Grand *Lama*'s Dominions, did not abuſe that Power; and whenever they endeavoured to be-

[a] *Du Halde*'s *China*, p. 387. [b] The ſame, *p.* 384. [c] See *Lettr. Ediff.* tom. 15. pref. p. 22. [d] *Gerbillon*, on this Occaſion, ſays, that this Prince was formerly very powerful, and is ſuppoſed to be the famous *Preſter John*; but with as little Reaſon as others affirm him to be the Chriſtian King of the *Abiſſins* in *Africa*. For *M. Polo*, and the Monks who firſt brought the Account of him declare, that *Ung Khân*, Chief of a Horde of *Tartars*, was the *Preſter John*; and then this latter muſt have concerned himſelf with temporal, as well as ſpiritual Affairs, which the *Dalay Lama* never did. Thus are Writers led aſtray by this *Ignis fatuus*, and beſotted with a Regard for Authority, or Tradition, though ever ſo much exploded, or abſurd in itſelf. [e] Perhaps, that of *Laſſa*, where the Capital is ſituate. [f] Or, *Eluths-Koſhoti*. See *p.* 402. [g] See before, *p.* 401. e. [h] *Du Halde*, as before, vol. 2. p. 258, and 386. [i] See the ſame, *p.* 385. [k] See alſo Hiſt. of the *Turks*, &c. p. 490. [l] Meaning him at *Laſſa*, and the other of *Koko Nor*.

of come independent, which happened pretty often, they were always sure to find him in their Road [a], who knew how to bring them to their Duty [b]. About the Year 1710, this Prince, called *Tse-vang-raptan* [c], being then in War with the Emperor of *China*, arrived at the Lake of *Lop*, and crossing the Sands with only fourteen Persons, came to the River *Hotomni* [d] in *Kashgar*. There being joined by some Troops, he sent a Detachment to *Lassa*, commanded by an experienced General, with six thousand Men, to b conquer *Tibet*; under Pretence that the Grand *Lama* was an Impostor, and that he was resolved to reduce the *Lamas* to their ancient Dependence on the Sovereigns of the Country.

TALAY Hân [e], the Grandson of *Kûshi*, who then reigned in *Tibet*, marched against them with an Army of twenty thousand Men; but notwithstanding the Superiority of his Troops, was defeated, and slain. After this, the Country of *Lassa* was ravaged, the Towns taken as soon as c besieged, and the Temples entirely plundered, even that of the Grand *Lama* not excepted, where the Booty was immensely rich, and all the *Lamas* that could be found were transported into *Tartary* [f]. This happened at the Time when the *Lâma* Geographers were making the Map of *Tibet*. But *Raptan*, it seems, did not long keep Possession of this Country; for *Kang-hi* sending an Army against him, his Troops were defeated in several Battles, and himself obliged d to retire to his own Country [g] in 1720, all *Tibet* remaining in Possession of the *Chinese* Forces [h]. However, it may be presumed, they did not keep it as a Conquest, but restored it to its former Masters: For in 1742, Friar *Horace* found a King at *Lassa*, whom he names *Mivagu* [i], as well as the *Dalay Lama*.

As the Great *Lama* renounces all Concern with temporal Affairs, ever since the Donation that was made to him of *Tibet*, he chuses a Vice- e Roy, who governs in his Name, and by his Authority, under the Title of *Tipa* (or *Deva*, as some write it.) For though the *Hâns*, who succeeded *Kushi*, reside at *Lassa*, in the Heart of the Country, they meddle not with the Government [k], but are content with reigning over the wandering Hords of *Eluths*. The *Tipa*, though married, wears the *Lama* Habit, but without subjecting himself to the Rules of that Order. The late Emperor *Kang-hi*, during the War with *Kaldan*, Predecessor to *Raptan*, created the Vice-Roy of *Tibet*, *Vang*, or Regulo, to attach him to his Interest. He knew, that both the *Tipa*, and Grand *Lama*, secretly favoured *Kaldan*, and were capable of crossing his Designs: Besides, had they joined the *Mongols*, and interested Religion in the War, it would have been difficult to withstand so many Enemies. Wherefore, after the Defeat of that daring Prince in 1697, the Emperor observed no Measures either with the *Tipa*, or Grand *Lama* himself, but spoke like their Master [l].

Government. *Or* Deva.

Awed by China.

ON this Occasion, our Author *Gerbillon*, in his seventh Journey into *Tartary*, with the Emperor of *China*, relates a curious Passage concerning the *Dalay Lama*'s Regeneration. The Emperor had for a long Time suspected the Death of the *Talay Lama*, because his Ambassadors could never obtain an Audience, under Pretence that the Divinity was in his Retirement; but being resolved to discover the Truth, he sent an Envoy in 1696 to the *Tipa* (or *Deva*) with positive Orders either to see him, or know if he was dead; at the same Time commanding that d Officer to deliver-up to him the Daughter of *Kaldan* (married to a *Tayki* of *Koko Nor*, subject to the *Talay Lama*;) and two *Hûtûktûs*, who had espoused the Interest of that Prince, threatning to make War upon him if he refused to comply.

Emperor imposed on

THE *Tipa* terrified at this Message, immediately dispatched *Nimata Hûtûktû*, one of the principal *Lamas* of *Pûtala*, with a respectful Letter to the Emperor, offering to send the Parties demanded, if his Majesty insisted on it, only interceding in their Favour. *Kang-hi* received this Envoy with extraordinary Honours, and accepted his Presents of Pastils, Coral, Beads, &c. Having been asked concerning the *Talay Lama*,

[a] *Desideri* observes, that this third *Tibet*, or *Lassa*, is more exposed to the Incursions of the *Tartars*, than the other two, *Lettr. Ediff.* tom. 15. p. 204. A *Lassa* Merchant told *Bernier*, that his King was often at War with the *Tartars*; but could never explain what *Tartars* they were, *Bernier*'s Memoirs of *India*, tom. 4. p. 122. *Tavernier*, on the other Hand, says, vol. 2. p. 185, that the Inhabitants of *Bûtân* know not what War is, having no Enemy to fear, but the *Great Mogul*. This Circumstance agrees better with *Great Tibet*, than *Lassa*. [b] History of the *Turks*, &c. p. 485. [c] Pronounced by the *Chinese*, *Lapûtan*. [d] In the great Desart, to the South-West of *Hami*. [e] Or, *Dalay Khân*. [f] *Du Halde*'s *China*, p. 385; and *Souciet*'s *Observ. Math.* p. 179. [g] *Du Halde*, as before, *p.* 388. [h] *Lettr. Ediff.* tom. 15. pref. p. 22. [i] So his Letter is signed, but without the Title of *Hân* at the End, which looks suspicious. [k] *Grueber* says, there are two Kings in *Barantola*, one called the *Deva*, who governs in Temporals, the other the Grand *Lama*. See his Letters, *p.* 22, in *Thevenot*'s fourth tom. and *Ogilby*, vol. 1. p. 360. But if Matters be as *Gerbillon* represents them (for *Regis* is not so particular) *Grueber* must have mistaken the Vice-Roy for the *Hân*, or King. He likewise, *p.* 28, makes the Latitude of *Lassa*, by Observation, twenty-nine Degrees six Minutes: The Jesuits Map, twenty nine Degrees thirty-six Minutes. [l] *Du Halde*, as before, *p.* 258, 259, and 385.

Country of Tibet.

he told the Emperor, that he had been dead six-teen Years: That before his Death he assured them he would rise again at a Place appointed; which accordingly happened: That he desired them to educate him till he was fifteen Years of Age, and, in the mean Time, to keep his Death secret: Lastly, that he left a Letter, with an Image of *Fo*, directing it to be sent to the Emperor, the tenth Moon of the sixteenth Year after his Decease; till which Time the *Lama* begged his Majesty would conceal it.

By the Lamas.

THE Emperor promised to do so, and sent two inferior *Mandarins* along with him, to obtain immediate Satisfaction to his other Demands. Two Days after their Departure, an Envoy, whom his Majesty had sent to the Nephew of *Kaldan*, returned, and informed him, that in the second Moon of the same Year, the *Talay Lama*'s Ambassador told him of his Death, and pretended Regeneration, and that in the sixth Moon the young *Talay Lama* came-out of his Retirement. The Emperor hereupon thinking himself abused by the *Lamas*, sent an Express to call-back *Nimata Hûtûktû*, and the two Envoys. The *Lama* said he knew nothing of what had been published in another Place, but that he had executed his Orders. Upon this, his Majesty thought it no Breach of Promise to open the above-mentioned Letter before all the *Mogul* Princes of his Retinue, on the twenty-second of *March* 1697; and thus the Death of the *Talay Lama*, which happened so long before, was published [a].

Envoys how treated.

ON this Occasion it may be observed, that the Emperor's Envoy to *Lassa* is supplied with Horses for himself and Attendants, by the Country People, where-ever he comes; besides Camels to carry his Baggage, and all Necessaries, being allowed six Sheep and an Ox for five Days. In like Manner the Emperor maintains the Envoys of the Grand *Lama*, and the Princes of *Koko Nor*, when they come to *Pe-king* [b].

The King's State.

WE find little more in Travellers, concerning *Lassa*, excepting what *Tavernier* mentions from the Report of Merchants, relating to the King of *Bûtân*; by which, for the Reasons already given, is to be understood *Barantola*, or *Lassa*. This Prince, according to that Author, hath constantly seven or eight thousand Men for his Guard, armed with Bows and Arrows: But some carry Battle-Axes and Bucklers. There are always fifty Elephants kept about the Palace, and twenty-five Camels, with each a Piece of Artillery on his Back, that carries half a Pound Ball, and a Gunner, who sits behind to manage it.

THE Merchants assured *Tavernier*, that some of their Cannons had Letters and Figures upon them, of above five hundred Years standing: That no Person dare stir-out of the Kingdom without the Governor's Leave, or carry a Musket along with him, unless his Kindred will be bound that he shall bring it back. One of them had a Piece, which, by the Characters on the Barrel, appeared to have been made above an hundred and eighty Years. It was very thick, and polished within as bright as a Looking-Glass. Two Thirds of the Barrel were garnished with embossed Wires; certain Flowers of Gold and Silver being inlaid between. The Mouth was shaped like a Tulip; and it carried a Bullet that weighed an Ounce. But the Author could neither prevail with the Merchant to sell it, nor give him any of his Powder, which was long, but of an extraordinary Force.

THERE is no King in the World more feared and respected by his Subjects, than the King of *Bûtân*; being in a Manner adored by them. When he sits to do Justice, or give Audience, all that appear in his Presence hold their Hands close together above their Foreheads; and at a Distance from the Throne prostrate themselves upon the Ground, not daring to lift-up their Heads. In this humble Posture they make their Petitions to him; and when they retire go backwards, till they are out of his Sight. The Merchants assured *Tavernier*, that those about the King preserve his Ordure, dry it, and reduce it to Powder, like Snuff [c]: That then putting it into Boxes, they go every Market-Day, and present it to the chief Traders, and Farmers; who recompencing them for their Kindness, carry it home as a great Rarity; and when they feast their Friends, strew it upon their Meat. The Author adds, that two of them shewed him their Boxes, with the Powder in them [d].

SECT. IV.

An Account *of the* Si-fan, *or* Tû-fan; *and the* Country *inhabited by them.*

1. *Of the* Si-fan's Country, *and* Manners *of that* People.

The Si-fan's *Country: Different Accounts of: Its true Situation. The Remains of a large Dominion. The* black Si-fan: *The* yellow Si-fan:

[a] *Du Halde*'s *China*, p. 366. [b] The same, *p.* 258, *& seq.* [c] As from hence it appears, that, by the King, the *Dalay Lama*, who was then Sovereign, is to be understood; so by *Bûtân* must be understood *Lassa*. As for the small Mistake, in saying he sits to do Justice, whereas the Great *Lama* meddles not with Temporals, it is very excusable in the Author, who might well imagine that was a Part of his regal Office. [d] *Tavernier*'s Travels, vol. 2. p. 184, *& seq.*

This

Their Government, Language, and Customs: Almost independent. The Rhubarb Country.

THE Country of the *Si-fan* (who are a People quite unknown, at least in Name, to the Western Historians, whether *Asiatic*, or *European*) is differently represented as to its Situation, and Dimensions, in the Accounts sent from *China* by the Missionary Geographers. According to *Regis*, it borders on the Provinces of *Shen-si*, *Se-chwen*, and *Yun-nan*, reaching from b the thirtieth to the thirty-fifth Degree of North Latitude; and Westward to the River, called by the *Chinese*, *Ya-long-kyang* [a].

By another Account, it extends but a little Way along the Western-Borders of *Shen-si*. For better understanding the Situation of it, the Author observes, that the little Town of *Chwang-lan* [b] (or *Chwang-lang-ing*) stands, as it were, at the Meeting of two Valleys; whereof one goes towards the North, as far as the Gate of c the great Wall, called *Hya-yu-quan* [c], the Space of above an hundred Leagues, and contains three great Cities, *Lan-chew*, *Kan-chew*, and *Su-chew*, with several Forts belonging to them. The other Valley extends Westward above twenty Leagues to *Si-ning*, and is full also of little Forts, which are subject to that City, and render the *Chinese* absolute Masters of the plain Country: But they are not so of the Mountains, which are inhabited by a Nation different from d the *Chinese*, who lie to the South of them, as well as from the *Tartars*, who lie to the North [d].

THIS vague Account only helps to puzzle the Reader; for the *Chinese* lie to the East and North, rather than to the South of these People; and the *Tartars* more to the West, than to the North, where the *Chinese* Territories interpose. In short, supposing them to be situated as before described, according to the Map, their Territories must be a narrow Tract of Mountains lying between the e North-West Part of the Province of *Shen-si*, and the Country of *Koko Nor*, including the latter on the North and East in Form of a Bow. But in the Map there is no Mention of the *Si-fan* in those Quarters, whence, probably, *Du Halde*, or his Correspondent [e], has mistaken the Country of the *Si-fan*, for that of *Koko Nor*.

IN the third Place, the Maps of the Jesuits differ from both the foregoing Accounts. In the fifth Sheet of *Tibet*, the Country of the *Si-fan* is distinctly marked-out. It is bounded on the East by the *Chinese* Province of *Se-chwen*; on the North by the Country of *Koko Nor*; and, on the West, by a River called *Tsacho Tsitsirhâna*, which rising to the South of the Lakes whence the *Whang-ho* issues, runs-through *Se-chwen*, where it takes the Name of *Ya-long-kyang*, and afterwards that of *Kin-cha-kyang* [f]. According to this Situation, which seems to be the right, the Country of the *Si-fan* lies between twenty-nine Degrees fifty-four Minutes, and thirty-three Degrees forty Minutes of Latitude, and between twelve Degrees thirty Minutes, and eighteen Degrees twenty Minutes of Longitude West of *Peking*. Its Figure is triangular, the Base, which lies to the North, being about thirty Miles long; and the other two Sides, which make an Angle to the South, about two hundred and forty-five each. *Si-fan Country.*

THIS is all which at present remains to the *Si-fan*, of a very large Dominion they were formerly possessed of, comprizing all *Tibet*, and even some neighbouring Territories of *China*. Hence it may be presumed it is (as well as on Account of the Affinity between the Languages of the *Si-fan*, and *Tibet*) that the *Chinese*, we are told, extend the Name of *Si-fan* over all that Country, and sometimes to all the Nations lying West of their own Empire. In all Probability, it is that great Empire of the *Si-fan*, including the whole Country between *China* and *Hindûstan*, with all those wide Plains and Deserts on the North and West of it, inhabited by *Eluth-Tartars*, and bounded, in the Map, by a Chain of Mountains, which were formerly called *Tangût*, *Tanguth*, or *Tankut* [g]; and the rather, because at present the Language and Characters of *Tibet*, still used by the *Si-fan*, are called the Characters and Language of *Tangut*, as hath been already observed [h]. However that be [i], the Condition of the *Si-fan*, or *Tu-fan*, is very different from what it was formerly. They have not now one Town in their Possession, and are pent-up between the Rivers *Ya-long* on the West, *Whang-ho* on the North, and *Yang-tse-kyang* on the East [k]; whereas anciently their Kingdom had fortified Towns, was well-peopled, and very powerful [l]. *The Remains of A large Dominion.*

[a] *Du Halde's China*, vol. 2. p. 305. [b] It lies in about twenty-six Degrees forty-eight Minutes, by the Map of *Shen-si*. [c] Or, *Khya-yu-quan*, and *Kya-yu-quan*. [d] *Du Halde*, as before, vol. 1. p. 22. [e] Who seems to be *Regis*, for he is quoted afterwards. [f] See the Map. [g] *Du Halde*, as before, vol. 2. p. 385. [h] See before, *p.* 457. note f. [i] How easily might the Missioners have solved all Difficulties concerning the Situation and Extent of *Tangut*, when they were on the Spot? But they do not so much as tell us what Name the *Si-fan* go by, either among themselves, or any of their Neighbours, except the *Chinese*. Thus, for Want of making proper Enquiries, either through Negligence, or Ignorance, they have Recourse to Conjectures themselves, differ from one another in their Accounts of Things, and generally leave material Points of History and Geography in the Dark, just as they found them. [k] Its Springs are in this Country. The most famous of them, called *He-shwi* by the *Chinese*, but *Chûnak* by the *Tu-fan*, rises in the Mountains named *Chûrkûla*. [l] *Du Halde*, as before, vol. 1. p. 22, and 29.

THE

Si-fan Country.

THE *Chineſe* diſtinguiſh the *Si-fan*, or *Tû-fan*, into two Sorts of People; the *He Si-fan*, or *black Si-fan*; and the *Whang Si-fan*, or *yellow Si-fan*; from the Colour of their Tents, not their Complexions, which are in general a little ſwarthy. The *black Si-fan* have alſo ſome pitiful Houſes, but are very uncivilized. They are governed by petty Chiefs, who depend on a greater. Thoſe whom *Regis* ſaw were dreſſed like the Inhabitants of *Hami* [a]. The Women wore their Hair parted into Treſſes hanging down on their Shoulders, full of little Braſs Mirrors.

The Black Si-fan.

The Yellow Si-fan.

THE *yellow Si-fan* are ſubject to certain Families, whereof the eldeſt is made a *Lama*, and wears a yellow Habit, which may alſo contribute to their Name. Theſe *Lamas*, who are all of the ſame Family, and govern in their reſpective Diſtricts, have the Power of deciding Cauſes, and puniſhing Criminals. They inhabit the ſame Canton, but in ſeparate Bodies, and without forming large Families of the ſame Kindred, which appear like *Syaw-in*, or little Camps, as the *Chineſe* Geographers call them. The greater Number of them dwell in Tents; but ſome have their Houſes built with Earth, and a few of Bricks. They want nothing of the Neceſſaries of Life. They have numerous Flocks of Sheep. Their Horſes, indeed, are but ſmall, but well-ſhaped, mettleſome, and ſtrong.

Their Government.

THE *Lamas*, who govern thoſe People, do not make them uneaſy, provided they render them certain Honours, and punctually pay the Dues of *Fo*, which are very trifling [b]. The *Armenians* who were at *To-pa* [c], ſeemed very well pleaſed with the *Lama*, who is Lord of the Place, and was not then above twenty-five, or twenty-ſix Years of Age. Far from vexing his Subjects, he only took from each Family a very ſmall Tribute, in Proportion to the Quantity of Land it poſſeſſed.

Language, and Cuſtoms.

THERE is ſaid to be ſome Difference in the Language of theſe two Sorts of *Si-fan*; but as they underſtand one another well-enough to trade together, it is probable that they differ only as Dialects of the ſame Tongue. The Books and Characters uſed by their Chiefs, are thoſe of *Tibet*. They have Cuſtoms and Ceremonies very different from the *Chineſe*, though bordering on them: For Inſtance, it is uſual for them to preſent a large white Handkerchief of Cotton, or Taffety, when they go to wait upon Perſons whom they mean to honour. They have alſo ſome Cuſtoms like thoſe found among the *Kalka Tartars*, and others which reſemble the Uſages of the *Tartars* of *Koko Nor*.

NEITHER Nation is more than half ſubject to the neighbouring *Chineſe Mandarins*, before whom they rarely appear when ſummoned, little regarding their Citations: Nor dare thoſe Officers treat them with Rigour, or offer to force them to Obedience, the frightful Mountains they inhabit, whoſe Tops are covered with Snow even in *July*, ſheltering them againſt all Purſuits. Beſides, as the Rhubarb grows in Abundance on their Lands, they are courted by the *Chineſe* for that precious Commodity [d].

2. *The* Hiſtory *of the* Si-fan, *or* Tû-fan.

Formerly very famous: Invade the Empire: Conclude a Peace: Aſſiſt the Chineſe. *The* Whyhe Tartars *break the Peace: Invade the Empire: Burn the Capital: Are made to retreat by* Chineſe *Stratagems: Invade* China *afreſh: Are defeated again: Sue for Peace: Break it, but routed: Another Defeat: Their Capital taken: Recovered again: The* Tû-fan *retreat: A Peace concluded: Their flouriſhing State.*

IT appears from the *Chineſe* Geographers of the middle Age, from the Hiſtory of the Provinces of *Shen-ſi* and *Se-chwen*, and by the great Annals *Nyen-i-ſhe*, that the *Si-fan*, or *Tû-fan*, had formerly a very large Dominion, and Princes of great Reputation, who made themſelves formidable to their Neighbours, and even to the Emperors of *China*. On the Eaſt-Side they not only poſſeſſed divers Territories, which at preſent belong to the Provinces of *Se-chwen* and *Shen-ſi*, but alſo puſhed their Conqueſts ſo far into thoſe Provinces, as to ſubdue ſeveral Cities of the ſecond Rank, whereof they formed four great Governments. Weſtward they were Maſters of all the Countries, from the River *Yolong* to the Borders of *Kaſhmîr*, in the *Great Mogul*'s Empire.

IN the ſeventh Century, *Ki-tſon*, King of the *Tû-fan*, poſſeſſed this vaſt Dominion, and had ſeveral Kings his Tributaries, to whom he ſent Patents and Seals of Gold. This Prince, in 630, coveting an Alliance with *Tay-tſong*, the renowned Emperor of the *Tang* Dynaſty, ſent a famous Embaſſy to that Prince; which having been received with great Marks of Diſtinction, he, by a ſecond, demanded a Princeſs of the Imperial Blood, for his Son *Long-tſong*. The Emperor's Council looking on this as a very bold

[a] Or, *Khamil*, in *Little Bukharia*. [b] Theſe Dues ſeem to be a Kind of Tithes, as being exacted on a religious Account. That of *Fo* was always the Religion of the *Tû-fan*, who always choſe their *Lamas* to be Miniſters of State, and, ſometimes, to command their Armies. *Du Halde*, p. 29. [c] Near *Si-ning*, at one End of the great Wall in *Shen-ſi*. [d] *Du Halde*'s *China*, vol. 1. p. 22, & *ſeq.* Some of their Rivers yield Gold, of which they make handſome Veſſels and Images.

Propoſal

Si-fan Hiſtory.

Propoſal, rejected it, without deigning to deliberate on it. Hereupon *Long-tſong* ſucceeding to the Throne, on the Death of his Father, came at the Head of two hundred thouſand Men to demand the Princeſs; and having defeated certain Princes tributary to *China*, who oppoſed his Paſſage, penetrated to the Borders of *Shen-ſi*, where the Emperor then kept his Court. From thence he ſent one of his Officers with a haughty Letter to his Majeſty, demanding that the Princeſs ſhould be immediately delivered-up to him, with a certain Quantity of Gold, Silver, and Silks, by Way of Portion.

THE Emperor offended at ſuch a Demand, amuſed the Envoy with Hopes, till his Troops were aſſembled on the Frontiers, and then diſmiſſed him diſgracefully, and without returning any Anſwer to his Maſter's Letter. At the ſame Time his Army attacked that of the *Si-fan*, and routed it. However, as the Loſs was not conſiderable, *Long-tſong* rallied his Troops, and being in a Condition to give the Emperor Uneaſineſs, in 640 [a], the Princeſs, by Advice of his Council, was ſent, with a great deal of Pomp, to the *Si-fan* King; who, after the Ceremonies of Marriage were over, retired, and became very ſerviceable to the Empire on divers Occaſions: Particularly, when the General *Alena* uſurped a tributary Kingdom of *China*, he joined the Imperial Army with all his Forces, which he commanded in Perſon, and had a good Share of the Victory in killing the Rebel [b].

KI-LI-SO, who ſucceeded *Long-tſong*, improved the Peace he was in with all his Neighbours, by the Treaties which he made with different Nations of *Tartars*, eſpecially the *Wheyhe* [c]. This Prince dying without any Iſſue, *Su-ſi*, his next Heir and Succeſſor, was called-in, with his *Tartarian* Confederates, to aſſiſt the Emperor *When-tſong* [d], obliged at that Time to quit his Court at *Chang-gan fû* (at preſent called *Si-ngan fû*) and abandon it to the Rebel *Gan-lo-ſhan*. This *Gan-lo-ſhan* was a foreign Prince, whom the Emperor, againſt the Advice of his Miniſters, had advanced to the higheſt Employments, and even intruſted with the Command of his Army. This Traitor, finding himſelf Maſter of great Part of the North, aſſumed the Title of Emperor, and marched to attack *Chang-gan*; which having entered, he plundered the Imperial Palace, and carried the Treaſure to *Lo-yang* [e]; but by the Aſſiſtance of *Su-ſi*, he was defeated, and ſoon after killed in Bed by his own Son.

THE *Tû-fan*, or *Si-fan*, in Reward of their Service, beſides the rich Plunder of *Lo-yang*, and other rebellious Cities, were preſented with great Quantities of Silks, and the choiceſt Things that *China* afforded: But whether through Covetouſneſs, or Pride, as ſoon as they heard of the Emperor's Death [f], they ſet-forward with a formidable Army; and arriving on the Frontiers of the Empire, before there was the leaſt Surmiſe of their Irruption, the Governors of *Ta-chin-quan*, *Lan-chew*, and all the Country of *Ho-ſi-û* [g], were forced to ſurrender. The Prime-Miniſter, who at firſt could not believe this, ſent *Ko-tſey*, the moſt experienced General then at Court, with three thouſand Horſe, to learn the Truth.

Invade the Empire.

KO-TSEY [h] being informed at *Hyen-yang*, a City not far from the Capital, that the Enemy's Army, conſiſting of three hundred thouſand [i] Men, would be there that very Day, diſpatched a Courier to the Miniſter, to apprize him of the Danger, and preſs for Succours: But the good Patriot did not ſtir a Step faſter. Mean-time the Generals of the Enemy, who knew the Country, being arrived at *Hyen-yang*, detached a conſiderable Body of Troops to poſſeſs themſelves of a Bridge on the River. The Emperor, from whom the honeſt Miniſtry had, till then, concealed the Danger he was in, confounded with the News, abandoned his Palace. The great Men of his Court, the Officers and People, all followed his Example. Thus the victorious Army entered the Palace without Reſiſtance, and having carried-off the immenſe Riches, ſet the City on-Fire [k].

Burn the Capital.

KO-TSEY, who had retired, that he might join the Troops, which, on the firſt Alarm, left *Chang-gan*, ſeeing himſelf now at the Head of forty-thouſand Men, to ſupply by Policy what he wanted in Strength, ordered a Detachment of Horſe to encamp on the neighbouring Hills; and there ranging themſelves in one Line, to make a dreadful Noiſe with their Drums, and light-up great Fires every Night in different

Are made to retreat

[a] The Dates, which in *Du Halde* are ſet in the Margin, we have thrown into the Text. [b] *Du Halde*'s *China*, vol. 1. p. 23. [c] *Whey-he*, or *Whey-hû*. They inhabited in the Neighbourhood of *Turfan*. See before, p. 431. e. [d] Or, *Hiyn-tſong*. This Emperor began his Reign in 713, and died in 762. He founded the College of the *Han-lin-yuen*, firſt gave the Title of Regulos to his diſtinguiſhed Generals, and divided his Dominions into fifteen Provinces. [e] This was about 762, in the fourth Year of the Reign of *So-tſong*, *Hiyn-tſong*'s Succeſſor. But this Hiſtory, in *Du Halde*, is very inaccurate, neither obſerving the Dates, nor Reigns, when the Facts, which are related, happened. [f] This was ten Years after *Hiyn-tſong*'s Death, in 772, the eighth of *Tay-tſong*, *So-tſong*'s Succeſſor. [g] That is, to the Weſt of the *Whang-ho*. [h] Elſewhere, *Ko-ſi-i*. In *Couplet*, *Ko-tſiui*. [i] Two hundred thouſand, according to *Couplet*, p. 61. [k] *Du Halde*, as before, p. 23, & *ſeq.* and 199.

Si-fan *History.*

Places. This Artifice ſucceeded: For the *Tû-fan* fearing to be ſurrounded by the united Forces of the Empire, conducted by a General of known Bravery and Experience, marched Weſtward, and blocked-up the City of *Fong-tſyang*.

By Chineſe *Stratagems.*

MA-LIN, who commanded in that Diſtrict, came to the Relief of the Place; and forcing his Way through a Body of the Enemy's Troops, whereof he killed above a thouſand, threw himſelf into the Town. As ſoon as he was entered, he cauſed all the Gates to be opened, to let the Enemy ſee he did not fear them. This extraordinary Conduct confirming them in their firſt Suſpicions, and their fatigued Troops being unable to withſtand freſh Forces, they reſolved to retire with the Spoil they had already gained. After their Retreat, the *Chineſe* repaired *Chang-gan*, whither the Emperor returned ſome Months after his ſhameful Flight.

Invade China *afreſh,*

THESE Troubles were no ſooner over, than the *Chineſe* were obliged to take the Field againſt a new Rebel, called *Pû-kû*, who entered into Confederacy with the *Tû-fan*, and the *Whey-he Tartars*, before-mentioned: But he being very opportunely taken-off by a ſudden Death, they had the Addreſs to diſunite the two Nations, by fomenting a Jealouſy about the chief Command. *Yo-ko-lo*, General of the *Whey-he*, would needs command the whole Army. This the *Tû-fan* oppoſed, as contrary to their Orders, and diſhonourable to their Kingdom, which was much ſuperior to the little State poſſeſſed by the *Whey-he*. The *Chineſe* Generals, who were encamped in their View, ſecretly ſupported the Pretenſions of *Yo-ko-lo*, and at length joined him. Hereupon the *Tû-fan* were attacked as they were marching-off, and loſt ten thouſand Men in their Retreat.

Are defeated again.

THE King of the *Tû-fan* meditated how to retrieve his Loſſes, and being informed, that the *Whey-he* were retired much diſſatisfied with the *Chineſe*, he ſent his Army to beſiege *Ling-chew*. The Governor of this City, and its Diſtrict, who had but few Troops, carefully ſhunned an Engagement. The Courſe he took was, at the Head of five thouſand Horſe to attack the Magazines of the Beſiegers; which he not only burnt, but carried-off all the Spoil they had taken, with Part of their Baggage. This Loſs obliged the *Tû-fan* to return home in haſte, where they remained quiet for five Years, and then brought a formidable Army into the Field, which dividing into two Bodies, fell almoſt at the ſame Time on the Diſtricts of *King-chew* and *Ping-chew*. Theſe numerous Troops eaſily defeated ſeveral Bodies of the Imperial Forces: But at laſt the General *Ko-tſey* routed them intirely, in 779, by Means of an Ambuſcade.

THIS Defeat diſpoſing the King of *Tû-fan* to Peace, he ſent an Ambaſſador, with no fewer than five hundred Men in his Retinue, to the Emperor; who, to mortify him, detained him a long Time at Court, without an Audience. His Maſter greatly incenſed at ſuch Contempt, was preparing to take Revenge, when *Tay-tſong* happened to die. His Son *Te-tſong*, who ſucceeded (in 781) taking a different Meaſure, feaſted the Ambaſſador, and his Retinue, gave them rich Habits, and loading them with Preſents, ſent them back, under the Conduct of *Wey-ling*, one of his Officers; who had Orders to lay the Blame of the ſmall Regard which had been paid his Ambaſſadors, to their bad Conduct, and having too numerous a Retinue [b].

WEY-LING, contrary to his Expectation, was received, and diſmiſſed with Honour, as well as a Magnificence that ſurprized the Emperor himſelf, and gave him an Eſteem for this Court [c], which promiſed an inviolable Regard to Peace. But this King dying in 786, *Tſang-pe*, his Succeſſor, ordered his Army forthwith to enter *Shen-ſi*; which they did, without being diſcovered, and defeated all the Imperial Troops they met-with, till they arrived at *Kyen-ching*, called at preſent *Kyen-yang*: But the *Chineſe* General, *Li-ching*, with the Troops of the Province, coming-up, as the Enemy were on the Point of beſieging the City, obtained ſo compleat a Victory, as forced them to ſue for Peace, which was ratified by Oath. Yet ſome of their Officers, who deſired the Continuation of the War, endeavoured to ſeize the Emperor's Envoy, and carry him to their Camp. The General, however, diſowned having any Hand in the Matter; and without committing any farther Hoſtilities, returned home with his Army.

THIS firſt Expedition not having the deſired Succeſs, the King of the *Tû-fan* prepared for a ſecond; and in 791 ſent an Army ſtrong enough to oppoſe both the *Chineſe*, and their new Allies the *Whey-he Tartars*. At firſt they took ſome conſiderable Forts, which lay in their Roads; and having poſſeſſed themſelves of *Gan-ſi*, advanced to *Pe-ting*, which lies to the South of *Ning-hya*. Here they were ſurprized, and defeated by the *Whey-he*: Yet far from retiring, they continued their March towards the Court with incredible Reſolution: But ſoon after, the General *Wey-kau* falling on them unexpectedly

[a] His Death fell out in 780, and *Ko-tſey*, the famous General, died in 784, the firſt of the forty-ninth ſexagenary Cycle of the *Chineſe*. [b] *Du Halde*'s *China*, p. 24. [c] Yet neither the Name, nor Situation of this Court, is mentioned; nor does it appear from the Hiſtory, in what Part of their Dominions the Capital of the *Tû-fan* ſtood.

cut ſeveral Bodies of them in Pieces, and purſued them as far as the Frontiers; where afterwards, to hinder the Incurſions of the Enemy, the Fortreſſes of *Tong-ka*, *Ho-tau*, *Mu-pu*, and *Ma-ling*, were built, in the Diſtrict of *Ning-yang fû*, belonging to *Shen-ſi*.

YET this Precaution proved uſeleſs; for ſcarce were thoſe Towns finiſhed, when the *Tû-fan* returned in 801, and at length took *Lin-chew*, which they had before attempted ſeveral Times in vain. But on the Appearance of *Wey-kau* with his Army, they abandoned the City, and marched towards *Wey-chew* in *Se-chwen*, which was one of the beſt Places they had. *Wey-kau* purſued them, and finding they fled continually before him, laid Siege to that Town. The King of the *Tû-fan*, ſtartled at this News, immediately ſent *Lun-mang*, his Prime-Miniſter, with conſiderable Succours; but being met by *Wen-kau*, he was defeated, and taken Priſoner. Immediately after this Victory, he had Admiſſion into *Wey-chew*, which he made a Place of Arms, and went to beſiege the Fortreſs of *Quen-min-ching*; but was baffled there, through the Bravery of the Governor.

WEY-CHEW was one of the royal Cities; and the Kings of *Tû-fan*, ſince the Time of *Ki-lo-ſo*, reſided there one Part of the Year: So that King *Itay*, who ſucceeded his Brother, reſolving by all poſſible Means to recover it, levied an Army of an hundred and fifty thouſand Men next Year, and ſent to beſiege it. On the Report of their March, the *Chineſe* General threw himſelf into the City: But the expected Succours not arriving, he was conſtrained to ſurrender, after a Siege of twenty-five Days, held-out againſt the continual Aſſaults of the Enemy.

THE *Tû-fan*, puffed-up with their Conqueſt, advanced towards *Ching-tu fû*, the Capital of *Se-chwen*. The Emperor's General, unable to oppoſe their March, ſpread a Report, that he was gone to poſſeſs himſelf of the Defiles of the Mountains through which they had paſſed, and cauſed his little Army to make all the neceſſary Motions to induce them to believe it: Which had ſo good an Effect, that for Fear of having their Retreat cut-off, they retired to *Wey-chew*.

As ſoon as they were returned, *I-tay*, who was a mild Prince, being content with having retaken the Place, ſent to acquaint the Imperial Generals on the Frontiers, that he was willing to live in Peace; and as a Proof of his Sincerity, enjoined his Officers to act only on the defenſive. The *Chineſe*, on their Side, behaved with great Generoſity, on ſeveral Occaſions. *Si-ta-mew*, a *Tû-fan*, Governor of *Wey-chew*, having offered to deliver-up that Place to the *Chineſe* General, almoſt all the other Officers were for accepting the Propoſal, but *Ni-û-fan*; who declared, that a great Empire ought to prize ſincere Dealing more than the Poſſeſſion of a Town, and that their Breach of the Peace would authorize all the Perfidies which the *Tû-fan* had committed, or ſhould commit for the future. Hereupon the Offer was rejected. Si-fan *Hiſtory.*

I-TAY took the Opportunity of the Peace, to govern his Subjects by new Laws, and advanced none to Employments, but Men of the greateſt Merit. If he was informed of any Perſon remarkable for his Knowledge, and Application to Study, he preferred him to thoſe who were equally experienced in the Management of Affairs. Thus he ſent for *Shang-pi-pi*, one among the *Literati*, of great Reputation [a], from the farthеſt Part of the Kingdom; and after he had examined him, made him Governor of the City and Diſtrict of *Chen-chew*, at preſent *Si-ning* [b]. *Their flouriſhing State.*

3. Hiſtory *of the* Tû-fan *continued, to the* Deſtruction *of their* Empire.

Diſorders in Government cauſe a Rebellion: The Rebel defeated in all his Deſigns. Tû-fan *Power broken. King of* Hya *defeated by the* Tû-fan: *Their Power ruined by dividing the Kingdom among three Brothers: Two of them ſubmit to the Emperor on good Terms. The final Deſtruction of the Empire of the* Tû-fan, *or* Si-fan.

I-TAY dying without Iſſue, was ſucceeded by *Ya-mo*, his neareſt of Kin, who gave himſelf up wholly to his Pleaſures: He lived in Peace with his Neighbours, but by his Oppreſſions and Cruelties, became ſo odious to his Subjects, that they left their Country in Crouds. In ſhort, he was the firſt Cauſe of this Kingdom's falling to Decay. The Diſtractions increaſed much more after his Death; for as he neither left any Children, nor had nominated a Succeſſor, one of the Miniſtry, gained by the Widow Queen, cauſed the Son of *Pay-va*, her Favourite, a Child of three Years old, to be proclaimed King in 842. *Diſorders in Government*

ON the firſt Report of this Election, *Kye-tû-na*, firſt Miniſter of State, haſtened to the Palace, and oppoſed it, in Behalf of the Royal Family. But his Zeal coſt him his Life; for they killed him as he was returning home. This *Cauſe a Rebellion.*

[a] Hence it appears, that the *Tû-fan* had introduced the *Chineſe* Form of Government; perhaps, after having made ſome Conqueſts in *China*, as the *Lyau* and *Kin* did afterwards. [b] *Du Halde's China*, vol. 1. p. 25, *&c ſeq.*

Country of Tibet.

Conduct of the Court loſt them the Hearts of all the People. *Lû-kong-je*, the great General, who was then with the Army, near the Frontiers, refuſed to obey the Orders that were ſent him by the new Government; and even conceived Thoughts of making himſelf King. He was a Man of boundleſs Ambition, and proud, full of his own Merit, extreamly paſſionate, and often cruel: But, on the other Hand, was brave, ſkilful, and capable of the greateſt Undertakings. He firſt cauſed a Report to be ſpread, that he was preparing to extirpate the Uſurpers of the Crown; and then marched directly againſt the Army of the new King, which he defeated. He alſo took and plundered *Wey-chew*. By this Time his Army, by the Acceſſion of Malecontents, was an hundred thouſand ſtrong. But the firſt Thing he attempted, was, to bring the Governors of the Provinces into his Meaſures.

The Rebel defeated

SHANG-PI-PI being one of the principal, and his Troops, by the Care he took to exerciſe them, the beſt in the Kingdom, *Lu-kong-je* was willing to ſound him firſt; and, after writing him a deceitful Letter, advanced towards the City. *Shang-pi-pi*, who ſaw through the General's Deſign, to deceive him in his Turn, wrote him an Anſwer, which flattered his Hopes. At the ſame Time, ſetting forward with all his Troops, he came upon the Rebels ſo unexpectedly, that, without any Difficulty, he defeated their Army, although much ſtronger than his own. *Lu-kong-je* retired much enraged in his Heart; and, in 846, having recruited his Forces, imagined, the Way both to regain his Authority, and win the Affections of his Nation, was, to enter the Territories of *China*, and give them up to be plundered. He had ſome Succeſs at the Beginning; but was quickly beaten by the *Chineſe* Generals, who, afterwards, took from the *Tû-fan* the City of *Yen-chew*, and ſeveral Fortreſſes.

In all his Deſigns.

THE Rebel, who conſidered theſe as Loſſes which might eaſily be retrieved, if once he was ſole Maſter of the Kingdom, having augmented his Army by *Tartars*, to whom he promiſed the plundering of the Frontiers of *China*, bent all his Thoughts on reducing *Shang-pi-pi*. Thus he began his March; and arriving near *Chen-chew*, forced *Shang-pi-pi* to abandon his Camp, which he had fortified on the firſt News of his Approach. Hereupon that Officer paſſed the River, broke-down the Bridge, and followed the Enemy Step by Step on the other Side, without ever coming to an Engagement, although *Lu-kong-je*, to draw him to a Battle, made great Ravages in his March. Mean-time the natural Brutiſhneſs of the Rebel-General, and his bad Temper, which increaſed by the ſmall Succeſs of his Enterprizes, rendered him ſo inſupportable to his Soldiers, that they deſerted in Troops to *Shang-pi-pi*, while the *Tartars*, for the ſame Reaſon, returned home.

LU-KONG-JE hereupon deſpairing of compaſſing his Deſign, ſubmitted to the Emperor on certain Conditions, and repaired to *Ko-chew*, a *Chineſe* City, where he lived at Eaſe the Remainder of his Life. This happened about the Year 849. While this ambitious General was Maſter of almoſt the whole Forces of the State, the Princes of the Blood retired into different Parts of the Kingdom, where they had ſmall Patrimonies, and ſome took Shelter in certain Forts that belonged to them, towards *Se-chwen*, reſolving rather to ſubmit to the Emperor of *China* than to an Uſurper. Others fortified themſelves in their Mountains; while ſome of the moſt conſiderable remained in the Territories they poſſeſſed, bordering on the Government of *Shang-pi-pi*. Hence aroſe an infinite Number of Diſtractions in the State, which laſted many Years, and proved the Ruin of this Monarchy at laſt.

WHEN the *Tû-fan*, divided into different Parties, were weary of fighting, many Officers and Soldiers joined themſelves to *Pan-lo-chi*, Prince of *Lû-kû*, a Place in the Borders of the Diſtrict of *Chen-chew*, which the Children of *Shang-pi-pi* had preſerved for their Nation. As ſoon as they beheld a Chief of the Royal Blood, they quickly formed an Army, and reſolved to attack the King of *Hya*, who had ill requited their Services. This new King was a *Tartar* originally of *Tupa*, (near *Si-ning*,) who, by Aſſiſtance of the *Tû-fan*, had, about the Year 951, founded a new Dominion, near the *Whang-ho*, under *Li-ki-tſyen*[a], in Spite of the *Chineſe*, the Capital whereof was *Hya-chew*, at preſent *Ning-hya*; from whence the new Kingdom took its Name. This King had, in the Year 1003[b], renewed the War with the Empire, at that Time governed by the *Song*[c], entering ſuddenly with a numerous Army into the Weſtern Part of *Shen-ſi*, which bordered on the ſmall Dominion that the *Tû-fan* were ſtill poſſeſſed of.

PAN-LO-CHI offered to join the *Chineſe* Commander with his Forces, to deſtroy this growing Power, provided the Emperor would honour him with a Title that might give him more Authority among thoſe of his own Nation. The Propoſal being liked, his Majeſty ſent him Patents, as Governor-General of the *Tû-fan*. The King of *Hya*, who knew nothing of theſe

[a] See an Account of the Origin, Extent, and End of this Monarchy, *p.* 433, and 446.

[b] This is the Year marked in the Margin; but if ſo, *Li-ki-tſyen* muſt then have reigned fifty-two Years.

[c] This Family, which is the nineteenth, began their Reign in 961.

private Contracts, after making ſome Ravages, a beſieged the Town of *Si-lyang*, and, taking it, put the Governor to Death. He thought to puſh his Conqueſt farther, believing, that *Pan-lo-chi* was coming to join him with his Troops: But that Prince arriving at the Head of ſixty thouſand Men, attacked him with ſo much Valour, that he entirely defeated his great Army. However, being wounded in the Battle, he died ſoon after the Victory.

SO-TSO-LO, his Succeſſor, in 1015, bent his b Thoughts on recovering the ancient Monarchy of his Anceſtors. His little Dominion conſiſted only of ſeven or eight Towns, particularly *Tſong-ko-ching*, *Li-tſing-ching*, *Ho-chew*, *I-chwen*, *Tſing-tang*, *Hya-chen*, and *Kan-ku*, with ſome neighbouring Countries; but was in Hopes, that the reſt of the *Tû-fan* would join him, when they ſhould ſee him powerful enough to defend them. He fixed his Court at *Tſong-ko-ching*, where he eſtabliſhed Officers, the ſame, both as c to Number and Titles, which the Kings, his Predeceſſors, had. Afterwards, levying new Forces throughout his Dominions, he entered the Territories of the Empire ſeveral Times, but was always beaten; and, at length, concluded a Peace.

As the growing Power of the King of *Hya*, who had aſſumed the Title of Emperor, gave *So-tſo-lo* ſome Uneaſineſs, the *Chineſe* Monarch, to engage that Prince more firmly in his Intereſt, d made him Governor-General of *Pau-ſhun*, which ſtood very conveniently for him: But *So-tſo-lo* dying ſoon after, the Diviſion, which enſued among his Children, haſtened the entire Ruin of the *Tû-fan* State. That Prince had by his firſt Wife two Children; one named *Hya-chen*, the other *Mo-chen-tſu*. He had, afterwards, the Prince *Ton-ſhen*, by a ſecond Venter, who prevailed on him, in her Son's Favour, to impriſon his Children by the firſt, and oblige their Mother e to turn Nun. But they finding Means to eſcape, and deliver their Mother out of the Convent, the People who had aſſiſted them, declared in their Favour.

SO-TSO-LO, who had recovered from his Infatuation, approving of this Change, gave *Tſong-ko-ching* to *Mo-chen-tſu* for his Maintenance; for he had removed his Court to *Chen-chew*. To *Hya-chen* he aſſigned *Kan-ku*, for the Place of his Abode; and to *Ton-ſhen*, whom he judged f moſt capable of keeping-up his Family, he ſurrendered all his Authority, with the Government of *Pau-ſhun*, and the reſt of his Dominions. *Ton-ſhen* reſided at *Li-tſing-chin*; where he was beloved of his People, and feared by his Neighbours; inſomuch, that all the *Tû-fan*, who dwelt to the North of the *Whang-ho*, were under his Subjection. Si-fan *Hiſtory.*

THIS great Power, wherewith the younger Brother was inveſted, gave the two Elder, and their Families, Apprehenſions of being one Time or other oppreſſed. *Mû-thing*, Son of *Hya-chen*, more uneaſy than his Father, delivered-up *Kan-ku*, *Ho-chew*, and all the Lands which were in his Poſſeſſion, to the Emperor; who granted to him, and his Poſterity, whatever he demanded, in order to live with Honour in the Empire. *Two of them ſubmit*

KYAU-KI-TING, the Heir of *Mo-chen-tſu*, the eldeſt Brother, was much beloved in his little State; but did not long ſurvive his Father. His Son *Hya-cheng*, who ſucceeded, ſo incenſed his Subjects, by his Violences and Cruelty, that they formed a Deſign to depoſe him, and ſet-up his Uncle *Su-nan* in his Stead. But the Plot being diſcovered, *Sû-nan*, and almoſt all his Accomplices, were put-to Death.

ONE of the principal Officers, named *Tſyen-lo-ki*, finding Means to eſcape, carried with him *Cho-ſa*, one of the Family; and ſeizing the City of *Ki-kû-ching*, cauſed him to be proclaimed Prince of that petty State. But *Hya-ching* haſtening thither with his Forces, took the Place, and put *Cho-ſa* to Death. *Tſyen-lo-ki* having found Means to get to *Ho-chew*, perſuaded *Van-chau*, the Governor, to conquer the Country of *Tſing-tang*, and repreſenting the Thing as very eaſy, that General attacked the little City of *Mo-chwen*, which he took without Difficulty. Hereupon, Prince *Hya-ching* ſeeing himſelf hated by his People, and vigorouſly attacked by the *Chineſe*, in 1099, repaired himſelf to *Van-chau*, and offering him all the Territories that belonged to him, obtained his Demands of the Emperor. *To the Emperor* *On good Terms.*

THE like happened to *Long-ſu*, a Son of *Mû-ching*, whom one of the Chiefs of the *Tû-fan* had put in Poſſeſſion of the City of *Hi-pa-wen*. After ſeveral Battles fought, with various Succeſs, againſt *Van-chau*, wherein he diſtinguiſhed himſelf by his ſurprizing Valour, that Prince ſubmitted alſo upon advantageous Terms.

IN the Midſt of the Troubles, which aroſe in the twelfth Century, between the *Chineſe* Emperors of the Dynaſty of the *Song*, and the Eaſtern *Tartars*, called *Nu-che*, who took the Name of *Kin*, the Family of *Ton-ſhen*, which continued longeſt in Splendor, made an Alliance with the Kings of *Hya*; and, under their Protection, enjoyed their Territories pretty peaceably; till, at length, it was involved in the common Ruin by the victorious Arms of *Jenghiz Khân*[a]. The Year 1227, according to the *Chineſe* Hiſtory, *End of their Empire.*

[a] The Miſſioner paſſes ſlightly over this Part relating to the Deſtruction of the Power of the *Si-fan*, and *Si-hya*; which yet is the moſt curious and intereſting to us of all their Hiſtory, as being connected with that of *Jenghiz Khân*.

Karazm *Kingdom.* is the Æra of the intire Ruin of the *Tú-* a in their ancient Country without either Name, *fan* [a]: From which Time they have remained or Power [b].

CHAP. V.

A DESCRIPTION *of the* Kingdom *of* KARAZM.

Introduction. BETWEEN *Great Tartary* on the North, and *Tibet*, *India*, and *Perſia* on the South, there runs a long Tract of Land, extending from the *Great Kobi*, or Deſart on the North-Weſt Part of *China*, Weſtward, as far as the *Caſpian Sea*. This Country is ſituated in a ſandy Deſart, with which it is ſurrounded; or rather is itſelf a vaſt ſandy Deſart, interſperſed with Mountains and fruitful Plains, well-inhabited and watered with Rivers.

NATURE ſeems to have divided this Region into three large Parts, ſeparated from one another by the Intruſion of the Deſart, and known at preſent in theſe Weſtern Parts, by the Names of the Countries of *Karazm*, *Great Bukhâria*, and *Little Bukhâria*. The original Inhabitants, who are very different from the *Tartars*, were always great Traders; and Karawâns frequently paſs-through their Lands from *India* and *Perſia* to *China*: But as they have been but little viſited by *Europeans*, we had ſcarce any Account of them, but what is met-with in the Tranſlations and Extracts from the Oriental Writers, till Mr. *Bentink*, often quoted before, obliged the Public with his Notes on *Abu'lghâzi Khân*'s Genealogical Hiſtory of the *Tatars*. To theſe Funds we are beholden for all our Materials, except what little may be picked out of the Travels of our *Anthony Jenkinſon* to *Bokhara*; *Benedict Goës* from *India* to *China*; and the Author of the Deſcription of the Countries about the *Caſpian Sea*, added to *Tavernier*'s Travels.

SECT. I.

The Situation, Soil, Rivers, *and* Lakes *of* Karazm.

Name and Bounds: Soil and Produce: Excellent Melons: Rivers. The Amû *changes its Courſe. The* Kheſil: *Its Courſe turned. Expeditions of* Beckowitz *to the* Kheſil. *The* Khân's *Artifice to enſnare him: He is cut-off. Lake of* Aral *affords much Salt. Situation and Extent.*

KARAZM, or *Kârezm*, as this Country is called by *Abu'lghâzi Khân*, and the *Perſian* Writers, is pronounced by the *Arabs*, *Khowârazm*: Which Name is as ancient as the Time of *Herodotus*, who calls it *Khoraſmia*, and after him, *Ptolemy*.

THIS Kingdom, at preſent, is bounded on the North by the Country of *Turkeſtân*, and the Dominions of the Grand *Khân* of the *Eluths*, or *Kalmûks*; on the Eaſt by *Great Bukhâria*, from which it is ſeparated partly by the Mountains of *Irder* [c], and partly by the Deſarts of *Karak* and *Gaznah*; on the South by the Provinces of *Aſtarabâd* and *Khoraſan* [d], in *Perſia*, from which it is ſeparated by the River *Amû*, and ſandy Deſarts of a vaſt Extent; and on the Weſt by the *Caſpian Sea*.

IT may be about four hundred and forty Miles in Length from North to South, and three hundred and forty from Weſt to Eaſt; being ſituate between the thirty-ninth and forty-ſixth Degree of Latitude, and the ſeventy-firſt and ſeventy-eighth Degrees of Longitude. The Country, according to a late Geographical Author, conſiſts moſtly of very wide, extended, ſandy Plains, like thoſe of *Great Tartary*, Part of them barren Deſarts, and others affording excellent Paſture, with but few Mountains, or Rivers. There is good Land in ſeveral Provinces, where Vines grow, of which Wine is made; and the Water-Melons of *Karazm* are famous [e]. *Bentink* ſays, the Country is extreamly fertile, where watered [f].

THE Melons of this Country, called by *Abu'lghâzi*, *Arbûs* [g], are the true Water-Melons, of the Size of ordinary Gourds, or Pompions, commonly round, and green on the Outſide, but within of a much deeper Colour than the common Melons; though ſome are perfectly white, but they are not the beſt: Their Seed is quite

[a] Yet in the preceding Hiſtory we find no Mention of them, poſſibly, for the Reaſon given, *p.* 447. note a.

black, ſhaped like that of the Pompion, but a rounder, tranſparent, and diſperſed all through the Fruit; the Whole of which is eaten, excepting the Rind and the Seed. The Subſtance is much finer, and better reliſhed, than that of ordinary Melons: It is exceeding cooling, and one may eat as much as he will without the leaſt Danger. This Fruit will keep a long Time; on which Occaſion our Author obſerves, that they carry them from *Aſtrakhân* (where they are near as good as in *Karazm*) to *St. Peterſburg*, for the Court of *Ruſſia*; and that they are as good in the Middle of Winter, as in their Seaſon; but he adds, that they gather them green, and that they ripen afterwards [a].

KARAZM owes all its Fertility, in a Manner, to three Rivers, and a great Lake: The Rivers are called *Amû*, *Kheſel*, and *Sir*. The *Amû*, as it is called by the *Uzbeks* and *Perſians*, is the *Jihûn* [b] of the *Arabs*, and *Oxus* of the Ancients; has its Source to the North North-Eaſt of the Kingdom of *Kaſhmîr*, toward the Borders of *Little Bukhâria*, in thoſe high Mountains which ſeparate it from the Dominions of the *Great Mogul*. It croſſes the Southern-Part of *Great Bukhâria* from Eaſt to Weſt, then winding North-Eaſtward along the Borders of that Country, enters *Karazm*, and croſſing it obliquely, forty Leagues from its Mouth, it divides into two Branches; that on the Left turning Weſtward, diſcharges itſelf in the *Caſpian Sea* [c], towards the Borders of the Province of *Aſtarabâd* in *Perſia*: But the right-hand Branch, which paſſed heretofore by the City of *Urjenz*, and met the Sea [d] twelve Leagues to the North of the former, about eighty Years ago quitted its ancient Channel, ſix Leagues from the Place where it ſeparated from the other Arm; and changing its Courſe more to the North, threw itſelf into the River *Kheſel*, on the other Side of the little Town of *Tûk*: So that its old Channel, before the City of *Urjenz*, is at preſent quite dry, which has greatly hurt that City.

THE *Amû* abounds with all Sorts of excellent Fiſh, and its Sides are the moſt charming in the World. On its Banks grow thoſe excellent Melons, and other delicious Fruits, ſo much eſteemed in *Perſia*, the *Indies*, and *Ruſſia*, whither they are carried.

THE River *Kheſel*, *Kheſil*, or *Keſil*, as the *Uzbeks* name it, riſes in the Mountains, to the North-Eaſt of the Province of *Sogd*, or *Samarkant*; and running North-Weſt between the *Amû* and the *Sîr*, falls into the Lake of *Aral*, fifty or ſixty Miles after it has been joined by the *Amû*. There is no Appearance of this River in *Kyrillow*'s Map of the *Ruſſian* Empire. The Sides of the *Kheſel* are exceeding fertile where-ever they are cultivated; but the greater Part of them are neglected by the Inhabitants; nor do they make-uſe of the excellent Paſtures which border this River, though they are much better than thoſe which they find along the *Amû*. *The Geography.*

AT preſent there is not one conſiderable Town to be ſeen upon the *Kheſel*: Nay, the few ſmall ones that occur are half deſart, becauſe the *Uzbek Tartars*, both of *Great Bukhâria* and of *Karazm*, chuſe rather to be near the Frontiers of the *Perſians*, than of the *Eluths* and *Kara Kalpaks*; becauſe there is more to be gotten by their Inroads on one Side, than the other. *Its Courſe turned.*

THE Waters of this River are extreamly increaſed by the Junction of the *Amû*, beforementioned: But of late Years the *Tartars* of *Karazm* have alſo turned the Courſe of the *Kheſel* from the *Caſpian Sea* [e] into the Lake *Aral*, on the following Occaſion.

PETER the Firſt, Emperor of *Ruſſia*, being informed, that much Gold-Oar was found [f] on the Coaſt of the *Caſpian Sea*, at the Mouth of the River *Sîr*, called alſo *Daria*; and judging that a new Courſe of Trade between *Siberia* and the Southern-Parts of *Aſia*, might be carried-on by Means of that River, ordered certain Perſons, ſkilled in maritime Affairs, to accompany the *Koſſaks* of *Jaïk* in ſeveral of their Expeditions along the Coaſts of that Sea, in order to find-out the Mouth of the *Daria*. Theſe People finding, that no conſiderable River diſcharged itſelf into the *Caſpian Sea*, between the *Yem*, or *Yemba*, and *Amû*, except the *Kheſel* [g], concluded this muſt be the River they looked for; eſpecially as the *Koſſaks* aſſured them it was called *Daria*, not knowing that *Daria* is no more than an Appellative, ſignifying a River in general, among the *Uzbeks* [h]. *The* Daria,

HOWEVER that be, having ſounded the Entrance of the *Kheſel*, and obſerved ſeveral Marks whereby to know it again, they returned, and made their Report: Thereupon the Emperor, in 1719, ſent one Brigadier *Beckowitz* [i], by the Way of *Aſtrakân*, with two thouſand five hun- *Expeditions of* Beckowitz

[a] Hiſtory of the *Turks*, &c. p. 433, *& ſeq.* [b] So *Abu'lghâzi Khân* calls it alſo, *p.* 119, of his Hiſtory. [c] Perhaps at a Place called *Mankiſhlak*. [d] It fell into the Gulf of *Balkan*. [e] According to *D'Anville*'s Map, it fell into *Peter*'s *Bay*, in the North-Part of the Eaſtern Coaſt of the *Caſpian Sea*. [f] This was, probable, a Story only invented to farther the Deſign of carrying-on Trade by this new Canal. [g] For the *Sîr* fell into the Lake *Aral*, hereafter deſcribed. [h] Alſo among the *Perſians*. [i] *Webber* ſays, he was a *Circaſſian* Prince, Captain of the Czar's Guards: That he was immenſely rich, and had married the moſt beautiful Lady in all *Ruſſia*; and that he had been ſent before in 1715.

dred

Karazm Kingdom.

dred Men, to poſſeſs himſelf of the Mouth of a that River. He pitched upon that Officer, becauſe he was a *Chirkaſſian*, and underſtood thoroughly the *Tatar* Language. The *Tatars* growing jealous to ſee him come ſeveral Times on that Errand, turned the *Kheſel* by three Channels, the Lands being low, Northward into the Lake of *Aral*, and then ſtopped the Entrance of it: So that *Beckowitz* arriving ſome Time after with his Veſſels to the Mouth of the River, found it quite dry.

To the Kheſel.

NEVERTHELESS, in Obedience to his Orders, he landed his Troops, and began to build Forts thereabouts, as well as the Ground, which he found exceeding ſandy, would permit. They were ſcarce in a Condition of making Reſiſtance, when the *Tatars* of *Khiva* (ſo the *Ruſſians* call the *Uzbeks* of *Karazm* [a]) came down upon him with great Numbers of Troops: But *Beckowitz* defended himſelf with ſuch Reſolution, that the *Khân*, who commanded them, deſpairing to conquer c him by Force, had him privately informed, that in his Heart he was ſincerely affected to the *Ruſſians*, and that he deſired nothing more than to ſee them ſettled in his Neighbourhood; but that he was obliged to oppoſe them, to humour the Princes, his Relations and Neighbours: That it was reſolved to make a laſt Effort next Day, and, in caſe they had no better Succeſs than before, he would try to bring-about an Accommodation.

The Khân's *Artifice*

BECKOWITZ gave the eaſier Credit to the *Khân*, as he had cauſed Proteſtations of the ſame Kind to be made at the Court of *Ruſſia*, by an Envoy ſent for that Purpoſe. Mean-time the *Tatars* did not fail next Morning to renew the Attack, with ſuch Vigour, that great Numbers, contrary to Cuſtom, lighted-off their Horſes: But having been repulſed at length with Loſs, the *Khân* ſent two of his *Murſas*, to know on what Account he had landed an Army in his e Dominions, and what he wanted? Hereupon *Beckowitz* demanded that the Sluices made in the River ſhould be ſtopped-up, and the Mouth of it opened again, that the Current might reſume its former Courſe.

To enſnare him.

THE *Tatars* remonſtrating, that it was not in their Power to dam-up the Channels, the Water ran into them with ſuch Rapidity; *Beckowitz* propoſed, that they ſhould give him a certain Number of Hoſtages, and he would go and do f it with his own Troops. As that was what the *Tatars* juſt wanted, they readily agreed to his Demands. The *Ruſſian* Commander having left ſome Men to guard the Forts, ſet-forward with the reſt: But the Hoſtages, who ſerved for Guides, led him through Places quite deſart, where there were only ſome Holes of ſtanding Water, not ſufficient for his Troops: So that after five Days March, they found themſelves quite deſtitute of Water.

IN this Diſtreſs, their Guides propoſed to divide into ſeveral Bodies, and march by different Roads, that they might the more eaſily find a Supply. *Beckowitz* was obliged to conſent to b this Propoſal, though he ſaw the Danger of it. In ſhort, the *Ruſſians* having thus ſeparated into Parties, the *Tatars* ſurrounded them one after another; and ſlaying their Leader [b], with moſt of his Men, carried the reſt into Slavery. After this, thoſe who were left to guard the Forts, reimbarked, and returned to *Aſtrakân*.

THE Lake *Aral*, that is, *of Eagles*, before-mentioned, ſeparates the Province of *Aral*, to which it gives Name, from the Eaſtern Provinces of *Karazm*. It is one of the largeſt in the Northern *Aſia*, being above thirty *German* Leagues from South to North, about half as much from Eaſt to Weſt, and above eighty in Compaſs. Its Waters are exceeding ſalt, yet breed great Quantities of the ſame Sort of Fiſh which are found in the *Caſpian Sea*, with which it does not ſeem to have any Communication; nor does it overflow its Banks, although it receives the Waters of the *Sir*, the *Kheſil*, and ſeveral other ſmaller Rivers.

THE *Kara Kalpaks*, who poſſeſs the Northern Coaſt of it, towards the Mouth of the *Sir*, and the *Turkmâns*, of the Country of *Aral*, in Summer, convey the Waters of this Lake, by Means of ſmall Canals, into the neighbouring ſandy Plains; whoſe Surface, when the Moiſture is exhaled by the Sun's Heat, is covered with a fine Cruſt of cryſtalline Salt, with which the Inhabitants of *Karazm*, and all *Turkeſtân*, are plentifully ſupplied [c].

ACCORDING to *Kyrillow*'s Map of the *Ruſſian* Empire, this Lake is ſhaped much like the *Caſpian Sea*, and more than half as long; being three hundred and forty Miles from South to North, and an hundred and ſixty broad in the South Part; though not half that Breadth at the North End. But, poſſibly, theſe Dimenſions are too great, as its Diſtance from the *Caſpian Sea*, *viz.* two hundred Miles, muſt needs be too much. However, we may preſume, its Figure is more exact than what we find it in other Maps, eſpecially the North Part of it; becauſe ſeveral Roads thither are traced-down by the Author. Into this great Lake the *Kheſil* diſcharges itſelf on the South by three Channels, and the *Sir* on the

[a] From the *Khân*'s Camp, called *Khiva*. [b] *Webber* ſays, that refuſing to kneel on the red Cloth, in order to be beheaded, they ham-ſtrung, and mangled him barbarouſly. [c] Hiſtory of the *Turks*, &c. p. 444. *& ſeqq.*

North

North by two: Of which River, the Reader will find an Account hereafter in the Deſcription of *Turkeſtân*.

SECT. II.

The Provinces *and* Towns *of* Karazm.

KARAZM is divided into many Provinces, as appears from *Abu'lghâzi Khân*'s Hiſtory, who mentions ſeveral of them; which *Bentink* has ſuccinctly deſcribed, as follows.

1. PROVINCES.

Ogurza *Province*. Piſhga. Karakizit. Gilkupruk. Gordiſh. Kumkant. Yanghi-ſhahr. Burma. Bayalkiri. Keſilrabat. Gardankhaſt. Yanghi-arik. Bakirgan. Kuigan. Ikzi-Kumani. Khika. Tarthan. Bamaburinak. Koghertlik. Aral.

OGURZA is a large Province, ſituate towards the Coaſt of the *Caſpian Sea*. It was very fertile before the Northern Branch of the *Amû*, which ran through it, took another Courſe; ſince when, it is become a Deſart for Want of Water. It takes its Name from the abundance of Cucumbers which it then produced; and are called *Ogurza*, both in the *Tartar* and *Ruſſian* Language.

PISHGA is a little Province, ſituate to the Eaſt of the City *Urjenz*. It has been but thinly inhabited ever ſince the above-mentioned Branch of the *Amû* ceaſed to paſs through it.

KARAKIZIT is a ſmall Province, between thoſe of *Piſhga* and *Ogurza*, which is grown very thin of People ſince the River *Amu* paſſes no longer by *Urjenz*, to the Weſt of which it lies.

GILKUPRUK is a ſmall Province, ſituate to the South of the Southern Branch of the River *Amû*, bordering on the Provinces of *Khoraſân*, and *Aſtarabâd*, in *Perſia*.

GORDISH, a little Province between thoſe of *Piſhga* and *Kumkant*. It is one of the moſt fruitful and beſt cultivated in all *Korazm*, as being watered by the *Amû*; which here quitted its old Channel to join the *Kheſil*, as before-mentioned.

THE ſmall Province of *Kumkant* lies Eaſt of *Gordiſh*, towards the Northern Bank of the *Amu*; which, in the Borders of theſe Provinces, divides into two Branches.

YANGHI-SHAHR [a] is a little Province, near the right Bank of the Southern Branch of the River, which is of no great Conſequence at preſent. *The Geography.*

BURMA is one of the largeſt Provinces Eaſt of the Town of *Wazîr*, towards the Borders of *Great Bukhâria*. It is very populous and fertile; producing the moſt delicious Melons in all *Karazm*. Burma.

BAYALKIRI is a little Province to the North of the City *Urjenz*; but very ſandy and deſart, becauſe it wants Water. Bayalkiri.

KESILRABAT lies towards the Banks of the *Kheſel*, or *Keſil*, and North-Weſt of the Town of *Tuk*. This little Province is very populous, and produces Plenty of all Sorts of delicious Fruits. Kesilrabat.

GARDANKHAST, which is a large Province, ſituate between the Towns of *Khayuk* and *Hazaraſb* [b], has pretty good Paſturage; and is almoſt wholly peopled by the *Sarts*, who are the ancient Inhabitants of the Country. Gardankhaſt.

YANGHI-ARIK [c] is a ſmall Province North of the *Amû*, and bordering on *Great Bukhâria*, at the Foot of the Mountains which ſeparate it from *Karazm*. Yanghi-arik.

BAKIRGAN, a large Province on the North Side of the River *Kheſel*, and North-Eaſt of the Town of *Tuk*. Bakirgan.

KUIGAN, another large Province, North of *Bakirgan* and the *Kheſel*, extends as far as the Frontiers of the *Kara Kalpaks*, and *Kalmûks*, (or *Eluths*). It conſiſts, moſtly, of vaſt Plains, producing excellent Paſture, like all the other ſandy Grounds of *Grand Tartary*. Kuigan.

IKZI-KUMANI [d] is a little Province towards the Southern Bank of the *Kheſel*, and Weſt of the Territory of *Khayuk*. Ikzi-Kumani.

KHIKA, another ſmall Province on the South Side of the *Kheſel*, lies Eaſt of the Territory of *Tuk*, and Weſt of *Ikzi-Kumani*. Khika.

TARKHAN is a little Province ſituate North of the *Kheſel*, and Weſt of *Bakirgan*. It abounds in excellent Paſtures; but lies uncultivated. Tarkhan.

BAMABURINAK is a little Province to the North of the *Kheſel*, towards the Southern Coaſt of the Lake *Aral*, and Weſt of *Tarkhan* Province. Bamaburinak.

KOGHERTLIK is a large Province ſituate on the Frontiers of *Great Bukhâria*, and North of the Province of *Yanghi-arik*. Koghertlik.

THE Province of *Aral*, towards the Shore of the *Caſpian Sea*, is very large, extending from the Mountains of *Abulkhân*, North of the old Mouth of the Northern Branch of the *Amû*, Aral.

[a] In the *French*, *Jangiſhar*. [b] In the *French*, *Haſſaraſſap*. [c] In the *French*, *Jangiarick*. [d] This ſeems to be a Remains of the *Komani*, or *Kumani*, a warlike Nation, who for a long Time poſſeſſed the Country along the North-Side of the *Caſpian Sea*, as far as the River *Don*, till conquered by *Jenghiz Khân*, and his Succeſſors in *Kipjak*.

which

Karazm *Kingdom.*

which is now dry, as far as the Country of the *Kara Kalpaks*. This Part of *Karazm* is, at present, almoſt ſolely inhabited by *Turkmâns*, who find there, in many Places, excellent Paſture for their Flocks: But, generally, *Aral*, which takes its Name from the Lake before deſcribed, is mountainous, ſandy, and barren [a]. Beſides the Provinces above deſcribed, *Abu'lghâzi Khân* mentions others in his Hiſtory; particularly thoſe of *Abulkhân* and *Dehiſtân* [b].

2. *The* Towns *of* Karazm.

Urjenz, *the Capital: Its ruinous State: Trade inconſiderable: Its Names: Not always the Capital: Once great and populous: Deſtroyed by* Timur: *Preſent State miſerable: Its Latitude obſerved.* Manguſlave. Sellizure. *Fruits and Grain.* Tuk. Waſir. Kumkala. Kaht. Hazarazb. Mankiſhlak. *Excellent Port. Other Towns.*

Urjenz, *the Capital.*

URJENZ, the Capital of the Country, is ſituate in a great Plain to the North of the River *Amû*, twenty-five *German* Leagues from the Eaſtern Shores of the *Caſpian Sea*. This City was very conſiderable in the Ages paſt; but ſince the *Tatars* became Poſſeſſors of it, the Northern Branch of the *Amû*, which formerly ran by its Walls, has taken another Courſe. It has fallen ſo much to Decay, that, at preſent, it makes but a pitiful Figure, being no more than a great ſcambling Town, about a League in Compaſs. Its Walls are of Sun-burnt Bricks, with a Kind of Ditch, very narrow, and full of Rubbiſh in ſeveral Places. The Houſes are no better than paultry Cabins of Earth. It is true, there is a Caſtle built with Brick; but ſo ruinous, that ſcarce a fourth Part of it is inhabitable. The Brick Moſks likewiſe are in almoſt as bad a Condition: For the *Tatars*, in general, are very ready to deſtroy Buildings, but neither to raiſe or preſerve. The only Thing which they take any Care of at preſent, is a great broad Street towards the Middle of the Town, which, as the common Market-Place, is covered from one End to the other, to preſerve the Goods ſold there from the Weather. The Deſertion of the River has cauſed many of the Inhabitants to forſake *Urjenz*, and rendered very barren the neighbouring Country, which was formerly fruitful.

Its ruinous State.

Trade inconſiderable.

ALTHOUGH it is very conveniently ſituate for Commerce, being the Rendezvous of all the Buſineſs carried-on between the *Bukhars* and the Countries on the Weſt-Side of the *Caſpian Sea*, yet, at preſent, the Trade is very inconſiderable; becauſe foreign Merchants, finding no Security among the *Mohammedan Tartars*, few will venture thither. The ordinary Duties paid at *Urjenz* are only three *per Cent.* but the extraordinary amount very often beyond the whole Merchandizes.

b THE *Khâns* of *Karazm* commonly winter in this Town; but in Summer they encamp on the Banks of the *Amû*, or in ſome other agreeable Place of the Country, as beſt ſuits their Conveniency [c].

To the foregoing Remarks of *Bentinck* on *Urjenz*, the *Engliſh* Tranſlator adds thoſe which follow:

URJENZ ſeems to be the ſame City which was formerly called *Karazm*; and which, *De la Croix* [d] obſerves, was, after the Time of *Jenghiz Khân*, called *Korkanj* by the *Perſians*, and *Orkanj* by the *Moguls*. In the Tables of *Abu'lfeda*, *Naſſir addin*, and *Ulugh Begh* [e], we find two *Korkanjs*; *Great-Korkanj*, or *Nu-Korkanj*, and *Korkanj the Leſs*, or *Jorjaniyah* [f] of *Khowarazm*, to diſtinguiſh it, likely, from *Jorjaniyah* of *Perſia*. The firſt was Capital of the Country; and both were ſituate on the Weſt-Side of the *Jihûn*, (or *Amû*) ten Miles aſunder [g]. *Jenkinſon* calls it *Urjence* [h]; and *Johnſon*, his Fellow-Traveller, after a Merchant of [i] *Boghar*, (or *Bokhara*) *Urjenſh*, and *Urjenſe* [k], which come near the Name given by *Abu'lghâzi Khân*.

URJENZ has not always been the Capital of *Karazm*. *Abu'lfeda* tells us, that *Kath* was formerly the Metropolis [l]: How long it continued ſo, is uncertain. When the Governor of *Jorjan*, in *Perſia*, ſurprized Him of *Karazm*, in the Reign of *Nuh-ibn-Manſûr*, of the *Sammân* Family, he found him in *Kat* [m]: But it does not follow from thence, that it was the Capital; nor, if it did, could we affirm, it continued ſo under the firſt Dynaſty of the *Karazmian* Kings, contemporary with *Mahmûd Gazni*. Neither can we be poſitive, upon what Occaſion the royal Seat was removed; though, probably, on Account of the Inundation which once ruined it. This we are ſure of, that the ſecond Dynaſty fixed their Seat at *Urjenz*; and it has continued the Capital ever ſince, except now and then that the *Khâns* thought fit to reſide for a-while at *Wazir*, *Khayuk*, or ſome other Place.

THE

THOUGH at preſent ſo much reduced, it was a once like all the other Cities of this Country, rich and populous. In the Year 1186 [a], when *Soltân Shâh* beſieged it [b], the Inhabitants, who had ſubmitted to his Brother *Takaſh*, were ſo numerous, that, to ſhew how much they deſpiſed his Power, they kept their Gates open in his View; and thirty-ſix Years after, when *Jenghîz Khân* [c] took it in 1221, the *Moguls* put one hundred thouſand, ſome ſay two hundred thouſand, to the Sword. *Urjenz* [d] began to flouriſh again b under the Family of the *Soſis*, and was a great City when *Timûr Bek* (or *Tamerlan*) having in 1379 taken it from *Yuſof Soſi*, and conquered the Kingdom [e], cauſed it to be razed in 1388, and the Ground ſowed with Barley. It is likely it was repaired three Years after, when, by *Timûr*'s Order, the Country was re-peopled, and reſtored to its ancient Splendor: But from that Time, it may be preſumed, *Urjenz* never was able to recover itſelf; and the Government of c the *Uzbeks*, which it has ſince fallen-under, ſo hurtful to Trade, joined to the Inconveniences attending the River *Amû*'s being turned-off from the Town, has compleated its Ruin [f].

IT ſeems to have been in no better a State when Mr. *Jenkinſon* was there in 1558. His Account of it is as follows. The City, or Town of *Urjenz* [g], ſtands on level Ground. Its Walls, as well as Houſes, are of Earth, and, by Eſtimation, four Miles in Compaſs. The Buildings d within it are ruined, and out of good Order: It hath one long Street that is covered above, which is the Place of their Market. It hath been won and loſt four Times within ſeven Years, by Civil Wars. Hence it comes, that there are but few Merchants in it, and they ſo very poor, that he could not ſell above four Kerſeys. The chief Commodities ſold there come from *Boghar* (or *Bokhara*) and *Perſia*, but in ſmall Quantities, not worth mentioning. All the Country, from e the *Caſpian Sea* to this City, is called the *Land of Turkmân*, and is ſubject to the *Khân* [h].

THE Latitude of this City, as given by *Jenkinſon* [i], is forty-two Degrees eighteen Minutes; which ſeems the more exact, as it nearly agrees with that aſſigned by *Albiruni* the Aſtronomer, a Native of *Karazm*, and adopted by *Ulug-beigh*, viz. forty-two Degrees ſeventeen Minutes [k].

THE ſame *Engliſh* Traveller, who travelled through *Karazm* in his Way to *Boghar*, or *Bokhara*, mentions two or three other Places in the Country, as *Manguſlave*, *Sellizure*, and *Kait*. *The Geography.*

MANGUSLAVE [l], is a very good Port in forty-five Degrees of Latitude, twelve Leagues within a Bay. Both Governor and People proved very bad, doubling the Price of Carriages and Proviſions. Manguſlave

SELLIZURE [m], twenty-four Days Journey of the Karawân from *Manguſlave*, and two from *Urjenz*, was a Caſtle, where then reſided the King, called *Azim Khân* [n], with three of his Brothers. It is ſeated on a high Hill. The Palace was built of Earth, not ſtrong, and made a poor Figure. Sellizure.

To the South of the Caſtle the Land is low, but very fertile, producing many good Fruits, particularly one called a *Dinie*: It is very large, and full of Moiſture, the People eating it after Meat inſtead of Drink. There is another, called *Karbus* [o], the Size of a great Cucumber, yellow, and ſweet as Sugar. Here is alſo a certain Corn, called *Jegur*, whoſe Stalk is much like a Sugar-Cane, and as high, but the Grain like Rice, growing at the Top like a Cluſter of Grapes. The Water that ſerveth all this Country is drawn by Canals out of the *Oxus* [p]: So that it falleth not into the *Caſpian Sea*, as formerly; and in a ſhort Time all that Land is likely to become a Wilderneſs for Want of Water [q]; which Prediction of the Author has come to paſs. *Fruits and Grain.*

TUK is a little Town, ſix Leagues to the North-Eaſt of *Urjenz*, at a ſmall Diſtance from the Southern-Bank of the *Kheſel*. Tuk.

KHAYUK lies towards the Borders of *Great Bukharia*, half a Day's Journey from the River *Kheſel*. It is the beſt Town in all *Karazm*, next to *Urjenz*; yet the Houſes are no better than miſerable Cabins, being as inconvenient within as without. Khayuk.

THE neighbouring Country is fertile enough, but very ill-cultivated. However, one ſees there ſome Vines, which the *Sarts*, who dwell in this Town, take-care of. They make alſo a Sort of red Wine, which is pretty good.

WAZIR is ſituate towards the Northern-Bank of the River *Amû*; but, like the reſt of the Towns, is at preſent very inconſiderable. Wazir.

[a] Of the *Hejrah*, 582. [b] See *D'Herbelot*, in *Tacaſh*. [c] *De la Croix*'s Hiſt. *Gentch.* p. 256. *Korkanj Minor* was then the regal Seat, according to *De la Croix*'s Notes. [d] Hiſt. *Timur-bec*, p. 306. Hiſtory of the *Turks*, &c. p. 440, *& ſeqq.* [g] He writes, *Urgence* [h] *Purchas Pilgr.* vol. 3. p. 236, *& ſeq.* [i] In a Table at the End of his Voyage, in *Hakluyt*, vol. 1. p. 335, but omitted by *Purchas*. See the Tables of *Abu'lfeda*, before-mentioned. [l] This ſeems to lie near the Mouth of the Northern Branch of the *Amû*. There is another Port more to the South, not unlike it in Name. [m] Perhaps, *Saliorey*, a Pleaſure-Houſe. [n] In the Tranſlation of *Abu'lghâzi*'s Hiſtory, written *Hadſim*, or *Hajim*. But we are told, he reſided at *Wazir*, and was that Year made *Khân*. [o] Or, *Arbus*, before deſcribed. [p] Or, *Jeſi*. [q] *Purchas*, as before, *p.* 236.

Karazm *Kingdom.*

Kumkala.

KUMKALA is a ſmall Town in the Middle of *Karazm*, to the North of *Wazir*; but not worth taking Notice of.

Kâht.

THE Town of *Kâht* (*Kâth*, or *Kât* [a]) is ſituate on the North-Side of the *Kheſel*, towards *Great Bukharia*, and is of no Conſideration, but on Account of its Paſſage over that River, though once the capital City. There were two of the Name.

Hazaraſb.

HAZARASB, ſituate upon the North-Side of the *Kheſel*, is alſo become inconſiderable ſince it fell into the Hands of the *Uzbeks*.

Mankiſhlak.

MANKISHLAK is a ſmall Town upon the Shore of the *Caſpian Sea*, on the North-Side of the Mouth of the Southern Branch of the River *Amû*. The Town itſelf is inconſiderable, conſiſting of about ſeven hundred Houſes, or rather pitiful Cabins, built of Earth; but its Port is magnificent, and the only one to be found in all that Sea. As it is large, ſecure, and deep, it would, in any other Hands but thoſe of the *Tartars*, ſoon become a Place of conſiderable Trade; but, at preſent, ſeldom any Ships arrive there. The Town is inhabited only by *Turkmâns*, who can bear the Neighbourhood of the Sea better than the *Uzbeks* [b].

Excellent Port.

Other Towns.

THERE are ſeveral other Towns in *Korazm* mentioned by *Abu'lghâzi Khân* [c]: Beſides, the *Uzbeks* of this Country have ſome others in *Khoraſan*, which, by Degrees, they conquered from the *Perſians*; as, *Duruhn*, *Naſay*, *Iburd*, *Mahana*, *Bagabâd*, *Yaurſurdi*, and *Maru*. But, in all probability, *Nadhir-ſhâh*, the preſent King of *Perſia*, recovered them all ſome Years ago.

SECT. III.

The Inhabitants *of* Karazm, *their* Manners *and* Cuſtoms.

KARAZM is inhabited at preſent by three Sorts of People; the *Sarts*, the *Turkmâns*, and the *Uzbek Tartars*. With regard to the firſt of theſe, our Author, *Bentink*, ſays only, that they are the ancient Inhabitants of the Country [d], and ſupport themſelves, like the *Turkmâns*, by their Cattle and Huſbandry. But he is more particular in treating of the other two Nations.

1. *Of the* Turkmâns.

Turkmâns, *Original: Two Branches. Oriental* Turkmâns, *once powerful: Their Perſons: Way of living: Character and Number: Divided into Tribes.*

THE *Turkmâns*, or *Turkomâns*, as our Hiſtorians call them, came originally from *Turkeſtân*. They ſeparated from the *Kanklis*, with whom they dwelt in that Country, towards the eleventh Century, with an Intent to ſeek their Fortune ſomewhere elſe; and ſettled in *Karazm* long before the *Tartars*, as *Abu'lghâzi Khân* relates.

THEY divided into two Parties; of which one went round the North-Side of the *Caſpian Sea*, and ſettled in the Weſtern Parts of *Armenia*; from thence called *the Country of the* Turkomâns [e]. *Bentink* will have it, that the *Othmân Turks*, if they be *Turks*, (for, he ſays, they are a Mixture of ſeveral Nations) muſt derive themſelves from this Weſtern Branch: But in this he ſeems to be miſtaken, it being generally agreed, that they came into *Perſia* with the Family of *Seljûk*, and ſettled at *Makhan*, or *Mahan*, near *Maru Shâhi-jehân* in *Khoraſân*: From whence, upon the Irruption of the *Moguls*, under *Jenghîz Khân*, about the Year 1219, they removed towards *Natolia*, where their Kingdom firſt began under *Ortogrûl*, or rather *Othmân*, in the Year 1288 [f].

THE ſecond Party turned South, and ſettled about the Banks of the River *Amû*, and the Shore of the *Caſpian Sea* [g]; where they ſtill poſſeſs a great Number of Towns and Villages in the Country of *Aſtrakân* and *Karazm*. This Branch of the *Turkmâns* has been hitherto unknown to the *European* Hiſtorians and Geographers, although they are much more numerous at preſent than that of the Weſtern *Turkmâns*. On this Occaſion the *Engliſh* Tranſlator obſerves, that thoſe who have given Extracts from the Eaſtern Writers, take little Notice of them; and, that others relate no more of them than what occurs in the *Byzantine*, and ſuch Weſtern Hiſtorians, who lived at too great a Diſtance to be acquainted with their Affairs.

HE adds, that there ſprung from this Branch of the *Turks*, or *Turkmâns*, (for the *Turkmâns* and *Turks*, ſays the Tranſlator, ſeem to differ only as the wandering *Arabs*, called *Bedwins*, do from thoſe who dwell in Cities) three great Dynaſties of Princes, who had under their Dominions all the Countries from the *Archipelago* as far as the *Indies*; namely, the three Branches of the Family

[a] *Abu'lfeda* calls it *Kâth*; *Jenkinſon*, *Kait*; and only ſays it is a Caſtle, where *Soltân Sara-met* reſide *Purch. Pilgr.* vol. 3. p. 237. [b] Hiſtory of the *Turks*, &c. p. 442, *& ſeqq.* [c] The ſame, *p.* 235, elſewhere. [d] Theſe fall under the Denomination of *Tajiks*, implying Traders, or a ſimple Sort of Peop a Nickname given by the *Uzbeks* even to the *Perſians*. [e] Or, *Turkomania*. [f] Hiſtory of the *Turks*, before, *p.* 423, *& ſeqq.* [g] *Jenkinſon* found them poſſeſſed of all the Coaſt, from *Manguſlave*, where landed, till he left the Shore, four Days before he reached *Sellizure*.

Vol. W. Pl. 2. Page 485.

F. Kirkhall Sculp.

No. 69.

Seljûk, who reigned at the ſame Time in *Iran*, or *Perſia* at large, *Kermân* and *Rûm*, or *Natolia*; to the laſt of which the *Othmân Soltâns* owe their Greatneſs.

THE *Turkmâns* of this latter Branch, according to *Bentink*, are ſhaped much like the former; that is, are tall and robuſt, with ſquare, flat, Faces, only they are much ſwarthier, and have a greater Reſemblance of the *Tartars*. In Summer they wear long Gowns of Calico, or thick Cloth; and in Winter the like Gowns of Sheepſkin.

CATTLE and Huſbandry afford them Subſiſtence, according to the different Parts they poſſeſs. In Winter they dwell in Towns and Villages about the River *Amû*, and towards the Shores of the *Caſpian Sea*; and in Summer they encamp where they can find the beſt Paſtures and good Water. They are all *Mohammedans*. Such of them as are ſettled in the Country of *Aſtrabâd* generally followed the *Perſian* Sect; but thoſe who dwell in *Karazm*, conform with the *Uzbek Tartars* in Sentiments of Religion: Though neither one nor the other give themſelves much Trouble about it.

THEY are exceedingly turbulent, ſubmitting with great Difficulty to the *Tartar* Yoke. They are very brave, and, at leaſt, as good Horſemen, but not ſo great Robbers, as the *Uzbeks*: By whom being treated as conquered Subjects, they are obliged to pay them Tribute, and ſuffer ſeveral other Impoſitions from thoſe rigid Maſters; to which, chiefly, is to be imputed that great Animoſity which they bear them: But the *Turkmâns*, who dwell under the Dominion of the *Perſians*, are much better treated. Both together may amount to about an hundred thouſand Families.

THESE People are ſtill divided into Tribes, like all the other Branches of the *Turkiſh* Nation; and their Chiefs enjoy the ſame Prerogatives [a].

ABU'LGHAZI KHAN, who was a great Enemy to the *Turkmâns*, and deſtroyed great Numbers of them, from Time to Time, mentions them on ſeveral Occaſions, ſometimes, according to the Countries they inhabited; as, the *Turkmâns* of *Mankiſhlak*, *Abu'lkhân*, and *Dehiſtan* [b], which laſt Territory belongs to *Perſia*: But oftener by the Names of their Tribes; of which the chief are; 1. *Adakli Khiſſer-ili*; theſe dwell on both Sides of the *Amû*, from the Province of *Pijhga* to that of *Karakizet* [c]. 2. *Ali-*, inhabiting from the Province of *Karakizet* to the Mountain of *Abu'lkhân*. 3. *Ti-u-azi*, who poſſeſs the reſt of the Banks of the *Amû*, from *Abu'lkhân* to the Sea: Theſe three Tribes are ſurnamed *Utzil* [d]. Beſides them we meet with the following, *viz. Taka*; *Sarik*, *Yamut*, *Irſari*, *Khoraſân-Saluri* [e], (theſe five, formerly, were but one Tribe) *Itzki Saluri*, *Haſan Ikdur*, *Dſaudur*, *Arabaz*, *Koklan*, *Adakli* [f], *Karamit* [g], and ſome others leſs conſiderable [h]. *Inhabitants, Uzbeks.*

JENKINSON remarks, that all the Country, from the *Caſpian Sea* to *Urjenz*, is called *the Land of* Turkman; and, that the Inhabitants between that Sea and the Caſtle of *Sellizure*, and of all the Countries about the *Caſpian*, live without Town or Houſe, in the open Fields; removing from Place to Place in great Companies, with their Cattle [i].

2. *Of the* Uzbek Tartars.

Name and Origin. Uzbek Tribes: Way of living: Encamp for Conveniency of making Inroads: Their Money: Their Cattle, and Diet. Arms and Paſtime.

THE Name of *Uzbeks*, which the *Tartars* of *Karazm* and *Great Bukharia* bear at preſent, is derived from *Uzbek Khân* of *Kipjâk*, as related by *Abu'lghâzi Khân* [k]. And this Cuſtom of aſſuming the Name of the Prince, to denote the univerſal Affection of his Subjects, has always been in Uſe with the Inhabitants of *Tartary*. Witneſs the Name of the *Moguls*, or *Mongols*, that of *Tatars*, and many others. *Name and Origin.*

WHEN *Ilbars Soltân* was invited by the Inhabitants of *Urjenz* to come and take Poſſeſſion of *Karazm* [l], the *Uzbeks* poſſeſſed all the Country of *Kipjâk* Eaſtward to the River *Irtiſh*, and Southwards as far as the River *Sîr*; beſides *Great Bukharia*, which they had newly ſubdued under the Conduct of *Shâhbakht Soltân*: This Prince had alſo taken *Urjenz*, the Capital of *Karazm*. However, only a ſmall Number of *Uzbeks* had ſettled in the Country, till *Ilbars* brought the reſt of them out of *Kipjâk*.

THE Body of *Uzbek Tartars*, in *Karazm* and *Great Bukharia*, is compoſed out of the four Tribes of the *Vigûrs*, *Naymans*, *Durmans*, and *Kunkurats*. On this Occaſion the *Engliſh* Tranſlator obſerves, that the two firſt were of the four, given to *Sheybani Khân*, Son of *Juji Khân*, as related by *Abu'lghâzi Khân* [m]; and, that if all the Inhabitants of *Kipjâk* took the Name of *Uzbeks* from *Uzbek Khân*, it is ſtrange none but thoſe four Tribes ſhould retain it. Nor is *Uzbek Tribes.*

[a] Hiſtory of the *Turks*, &c. p. 426, & *ſeqq.* and 397. [b] *P.* 235, of his Hiſtory. [c] *P.* 236. [d] *P.* 6, and 239. [e] *P.* 238. [f] *P.* 238. [g] *P.* 256. [h] *P.* 238. [i] *Purchas, Pilgr.* vol. 3. p. 237. Hiſtory of the *Turks*, as before, *p.* 197. [l] See *Abu'lghâzi Khân*'s Hiſtory of the *Turks*, &c. p. 226. P. 227.

Karazm Kingdom.

there any accounting why the *Tartars* of *Krim* are not called *Uzbeks*, but by ſuppoſing either that the Name extended only to thoſe four Tribes, or, that the reſt of the *Tartars* changed it, according to their Cuſtom before-mentioned.

Way of living.

THE *Sarts* and *Turkmâns* live by their Cattle and Huſbandry: But the *Uzbeks*, for the moſt Part, by Rapine; reſembling, in all Reſpects, thoſe of *Great Bukharia*, excepting, that they are far leſs polite, and more reſtleſs. They dwell in Winter in the Towns and Villages which are towards the Middle of *Karazm*; and in Summer, the greater Part of them incamp about the River *Amû*, and in other Places where they can find good Paſtures for their Cattle; waiting ſome favourable Opportunity to rob and deſtroy. They are perpetually making Incurſions upon the neighbouring Territories of *Perſia*, or *Great Bukharia*; and neither Peace nor Truce can reſtrain them, in regard the Slaves and Plunder, which they carry-off on thoſe Occaſions, are all their Riches.

Encamp for Conveniency

THOUGH one finds excellent Paſture in divers Parts of the Country, towards the Banks of the *Kheſel*; yet the *Uzbeks* rarely move thither with their Cattle in Summer, becauſe there is nothing to plunder on that Side: The *Kara Kalpâks*, who are their Northern Neighbours, being as dextrous in the Buſineſs as themſelves; and that what they can ſteal from one another, is not worth the Trouble of going for: Beſides, the *Mohammedan Tartars* do not invade one another, unleſs at open War together. As for the *Kalmûks* (or *Eluths*) who border on *Karazm*, to the North-Eaſt, they uſually remove towards the Beginning of Summer from the Borders of the *Mohammedan Tatars*, that they may not be expoſed to their Incurſions; and do not return till Winter, when the Rains and Snow have rendered the Roads impaſſable on that Side.

Of making Inroads.

WHEREFORE, none but the *Sarts* and *Turkmâns* reap the Benefit of the Paſtures. The former ſeek thoſe which lie Eaſtward, towards *Great Bukharia*; and the *Turkmâns* go in Queſt of them which lie towards the Mouth of the *Amû*, and the Shore of the *Caſpian Sea*: But the *Uzbeks* often incamp about the Sides of that River; where they are at hand to throw themſelves into the *Perſian* Provinces on the firſt Occaſion which offers, and carry-off wherewithal to make good Cheer in Winter. Although the *Uzbeks* have fixed Habitations, yet, in travelling from one Place to another, they carry with them all their Effects of Value, like the *Eluths* and *Mongols*, according to the Way of living of their Anceſtors, before they had ſettled Dwellings.

THERE is a Piece of Money called *Tanga*[a], current both in *Karazm* and *Great Bukharia*. It is large, and, the Author believes, the only Silver Money coined by the *Khâns* of theſe Provinces. This Coin, which is pretty fine, and worth near the fourth Part of a Crown, is round; having on one Side the Name of the *Khân*, and on the other that of the Country, with the Year of the *Hejrah*. The reſt of the Money made in this Country conſiſts in ſmall Pieces of Copper of different Sorts, which anſwer to our Pence, Halfpence, and Farthings. The Money of *Perſia* paſſes alſo in theſe Provinces, eſpecially towards the Borders of *Karazm*[b]. *Jenkinſon* ſays, theſe People have not the Uſe of Gold, Silver, or any other Coin; but barter their Cattle for Neceſſaries: Perhaps, he ſpeaks of the *Turkmâns* only.

THE ſame Author obſerves, that the Inhabitants living between the *Caſpian Sea* and *Urjenz* (including, without Doubt, the *Uzbeks* as well as *Turkmâns*) have abundance of Camels, Horſes, and Sheep, both tame and wild. Their Sheep are very large, with great Tails, weighing ſixty or eighty Pound. There are many wild Horſes, which the *Tartars* frequently kill with their Hawks. Theſe Birds are lured to ſeize upon the Head or Neck of the Beaſt; which being tired at length, with endeavouring to get-rid of this cruel Enemy, the Hunter, who follows his Game, then comes-up and kills him. In all this Land there groweth no Graſs, but a certain Bruſh, or Heath, which yet is very fattening.

THEY have no Bread; They neither till nor ſow. They are great Devourers of Fleſh; which they cut in ſmall Pieces, and eat it greedily by Handfuls; eſpecially Horſe-Fleſh. Their chief Drink is ſour Mares-Milk, like that of the *Nagays*; with which they will be drunk. They have no Rivers nor Places of Water in this Country, from *Manguſlave*, where the Author landed, to the Bay, where he arrived, twenty Stages diſtant, except ſome Wells of brackiſh Water, more than two Days Journey aſunder. They eat their Meat upon the Ground, ſitting with their Legs double under them; which is their Poſture alſo when they pray.

THE *Tartars* never ride without their Bow, Arrows, and Sword; although it be in Hawking or at any other Pleaſure. They have no Arts or Sciences among them, but live an idle Life; ſitting round in great Companies in the Fields, and paſſing their Time in idle Diſcourſe[c].

[a] *Abu'lghâzi* mentions it, *p.* 234.

SEC

SECT. IV.

The Government *and* Revolutions *of* Karazm.

The Khân's *Authority: Power of the Princes: Factions in the State: Its Forces: Antiquity of* Karazm: *Conquered by the* Arabs, *and* Seljûk Turks. Karazmian *Empire: Conqueſt by* Jenghîz Khân: *By the* Uzbeks.

THIS Country is uſually divided among divers Princes of the ſame Houſe, of whom, notwithſtanding, only one bears the Title of *Khân*, with a Kind of Superiority over the others, juſt as he has Skill to improve it. His Reſidence is in the City of *Urjenz*, though during the Summer he commonly encamps on the Banks of the River *Amû*; and as his Camp is called *Khiva*, his Subjects are commonly termed the *Tatars* of *Khiva* [a]. This *Khân* is Sovereign in his own Dominions, and does not, in any wiſe, depend upon him of *Great Bukhâria*, or any other Power [b].

JENKINSON obſerves, that when he was in this Country [c], in 1558, it was in the Hands of ſix Brothers, one of whom, called *Azim* [d], had the Title of *Khân*; but adds, that he was little obeyed, except in his own Territory, and where he dwelt [e]: For that each would be King of his own Portion, and one Brother ſought continually to deſtroy another, having no natural Love among them, as being born of different Women, and commonly the Children of Slaves. Every *Khân* and *Soltân* hath at leaſt four or five Wives, beſides Concubines. When theſe Brethren are at War together (as they are ſeldom otherwiſe) the Vanquiſhed, in caſe he be not ſlain, flies to the Deſart with his Followers, and there lives by robbing the Karawâns, and all they meet with, till he is ſtrong enough to invade ſome of his Brothers again [f].

NOR is it very difficult to bring this about; for *Bentink* takes Notice, that as the *Turkmâns*, who were the firſt Occupants, are always in Oppoſition to the *Uzbeks*, the Princes of the reigning Houſe know how to make-uſe of this Jealouſy, and draw to their Side the Faction which thinks itſelf neglected by the *Khân*; and it is to this extream Facility of making a Party, that thoſe Troubles, which continually diſtract *Karazm*, are chiefly owing. *Government, Revolutions.*

THIS State can, with Eaſe, ſet on-foot forty or fifty thouſand good Horſe. What *Abu'lghâzi Khân* reports of his Infantry, and Muſketeers [g], ſhews, that he had profited by his Impriſonment in *Perſia*; for before his Time, that Way of Fighting was quite unknown to the *Uzbeks*: Nor do they ſeem to have retained that Uſage, ſince at preſent they go to War only on Horſeback, like the other *Tatars*, and it is very rare to ſee Fire-Arms with them [h]. *Its Forces.*

WE meet-with no connected Account of the Kings of *Karazm*, before the Time of the *Uzbeks*, whoſe Hiſtory is given at large by *Abu'lghâzi Khân*. But the *Engliſh* Tranſlator has, in ſome Meaſure, ſupplied the Defect, by the following general Sketch. In the Days of *Herodotus* (according to our Author) it was ſubject to *Perſia*, being one of the Provinces over which *Darius* placed *Satrapas*; but nothing material concerning it occurs, till it was poſſeſſed by the *Arabs* in the Year 680 [i], and for a long Time after, farther than that it had a Governor, like the reſt of the Countries conquered by them: Yet it is likely upon the Declenſion of the Power of the *Khalîfas*, when the Governors ſeized the Provinces under their Care, that *Karazm* acted like the reſt, and was as early as any of them in ſetting-up for itſelf: Though in the Hiſtories hitherto come to our Knowledge, we meet-with no King of that Country before *Mamûn-ibn Mohammed*, who reigned ſome Time after the Year 995 [k]: For a little While before that, we find [l] *Abu Abdalla* Governor of it; but it does not appear for whom. At length it fell under the Dominion of *Soltân Mahmûd Gazni*, King of *Khoraſân*, who, after the Death of *Mamûn-ibn mamûn*, in 1016 [m], took that Kingdom from the Uſurper, and made it a Province of his Empire [n]. *Antiquity of* Karazm. *Conquered by the* Arabs.

KARAZM continued in this State under the Families of *Gazni* and *Seljûk*, ſucceſſively, till upon the Death of *Malek Shâh*, otherwiſe called *Jalal'addîn*, third *Soltân* of the *Seljûk Turks*, in 1092 [o], *Kothb addîn* [p], then Governor, taking Advantage of the Broils which enſued upon the Death of that great Monarch, aſſumed the Title of King [q]: But that Title was better eſtabliſhed by his Son and Succeſſor *Mohammed*, ſurnamed *And* Seljûk Turks.

[a] That is, by the *Ruſſians*, as before obſerved, *p.* 478. b. [b] Hiſtory of the *Turks*, &c. p. 423, & *ſeq.* [c] He no-where names it. [d] In *Abu'lghâzi*'s Hiſtory, *Hadſim*, or *Hajim*. [e] He dwelt then at *Sellizure*, two or three Stages Weſt of *Urjenz*, of which laſt *Ali Soltân* was King, as he calls him. [f] *Purch. Pilgr.* p. 237. [g] *P.* 357, of his Hiſtory. [h] Hiſtory of the *Turks*, as before, *p.* 431. [i] Of the *Hejrah*, 61. [k] Of the *Hejrah*, 385. [l] *Textira*, p. 260. [m] *Hejrah* 407. [n] *Abu'lfaraj* Hiſt. Dynaſt. *p.* 220; and *D'Herbelot*, p. 534. [o] *Hejrah* 489. [p] Who had ſucceeded his Father *Buſtekin*, formerly Slave to *Balkatekin*, his Predeceſſor; but advanced, by *Malek Shâh*, in the Government of *Karazm*. [q] *De la Croix*'s *Hiſt. Jenghiz Khân*, p. 129. *D'Herbelot*. p. 276.

Karazm *Kingdom.*

Atſiz [a]; though not without great Oppoſition from *Soltân Sanjar*, Son of *Malek Shâh*, who often reduced him to a Dependency. But it was *Takaſh*, the ſixth *Soltân* of this Dynaſty, who firmly eſtabliſhed the Empire of the *Karazmians*, by the Fall of that of the *Turks*; which he put an End to in *Perſia*, by the Death of *Togrûl Arſlân*, in 1193, or 1196 [b]; and added the Dominions of that unfortunate Prince to his own. His Son, *Kothb addin Mohammed*, extended the Empire yet farther, by the Conqueſt of all *Perſia* and *Mawara'lnahr*; and was the greateſt Prince in *Aſia* at the Time that *Jenghiz Khân* invaded him in 1218 [c], and deprived him of his Dominions.

Karazmian *Empire.*

Conqueſt by Jenghiz Khân.

As *Jagatay Khân* had but Part of *Karazm* in his Share of his Father's Dominions [d], it looks as if the whole Country had not been ſubdued, or at leaſt, that Part of it revolted, and became independent. Be that as it will, it is very probable, that on the Declenſion of the Power of the *Khâns* of *Jagatay* [e], upon the Death of *Ghazan Khân*, in 1348 [f], if not before, *Karazm* either ſet-up a King of its own, or fell a Prey to ſome other Power [g]: For, in the Time of *Timûr-begh*, we find it poſſeſſed by *Huſſayn Soſi*, Son of *Yanghaday*, of the Hord of *Kongorat* [h], one of the four *Uzbek* Tribes which poſſeſs *Karazm* and *Great Bukhâria*. What is ſtill more remarkable, it is called a great Empire [i], and continued in that Family till conquered by *Timûr*, in 1379, and 1388 [k]; when he razed the Capital to the Ground, and ſowed it with Barley, as before related: But, three Years after, he reſtored both the City and Kingdom to the Condition it had been in before.

By the Uzbeks.

KARAZM continued afterwards under the Deſcendants of *Timûr-begh*, in *Mawara'lnahr* and *Khoraſân*, on which it was then dependent, till the famous *Shâhbakht Soltân* ſubduing thoſe two Provinces, with his *Uzbeks*, about the Year 1498 [l], it fell of Courſe into the Hands of that Conqueror. Soon after, *Shâhbakht* being defeated and ſlain by *Shâh Iſmael Soſi*, in 1510 [m], *Karazm* came once more under the Dominion of *Perſia*. But, about two Years after, the Inhabitants revolting againſt the Governors, ſent for *Ilbars Soltân*, who, coming with his *Uzbeks* (out of *Turkeſtân*) was proclaimed *Khân*, in 1512 [n], at *Wazir* [o]; and his Deſcendants have continued ever ſince in Poſſeſſion of the Country [p].

SECT. V.

The Hiſtory *of the* Uzbek Khâns *of* Karazm.

Abu'lghâzi Khân's *Hiſtory: Its Defects, and Advantages: Uſe to Geography.*

INTRODUCTION.

THE following Account of the *Uzbek Khâns of Karazm* is extracted from the Hiſtory of *Abu'lghâzi Khân*, of the ſame Country. It makes the ninth Part of his Hiſtory [q], which is nearly equal to all the reſt of his Work; and as it is the moſt copious, ſo it is the moſt compleat Part of the Whole. One would be apt to think, ſays the *Engliſh* Tranſlator, that no Part of the *Tartar* Hiſtory ſhould be unknown to a *Tartar* Prince, who profeſſes to write the Hiſtory of them: And yet it is plain, he was but little acquainted with the *Khâns*, the immediate Succeſſors of *Jenghiz Khân*, in the Empire of the *Moguls*, who reigned in *Great Tartary*, breaking-off with *Koplai Khân*, the fourth Emperor: He breaks-off as abruptly with *Amîr Timûr*, (or *Tamerlan*) without informing us who were his Succeſſors in *Ma-wara'lnahr*, till it was conquered by *Shâhbakht Soltân*, above fourſcore Years after.

Abu'l Khân's Hiſtory.

OF all the *Khâns* who had reigned in *Kaſhgar* of the Race of *Jenghiz Khân*, he mentions none but *Togalak Timûr Khân*, and his Son *Kezra Khoja Khân*, who ſucceeded *Amîr Timûr*: But as for thoſe who came after *Kezra Khoja Khân*, he only obſerves, that they were of his Poſterity: Nay, he confeſſes himſelf ignorant of the Succeſſors of *Haji Gheray*, *Khân* of *Kipjak* (who died about 1475) farther than that the *Khâns* of *Krîm* are ſprung from one of his Sons; although the *Khâns* of *Karazm*, and *Great Bukhâria*, are collateral Branches of the ſame Family, being all deſcended from *Juji Khân*, Son of *Jenghiz Khân*. One might have expected this Author would have carried back the Hiſtory of his Country into its flouriſhing Times, and given an Account of the Empire of the *Karazmians*, which continued for about one hundred and thirty-eight Years, under ſeven, ſome ſay nine Monarchs, and was not inferior to that of the *Moguls* for Extent, when *Jenghiz Khân* invaded *Soltân Mohammed*.

In D

THERE is alſo, in this Hiſtory, an Omiſſion of ſeveral other Succeſſions, particularly thoſe of

[a] *D'Herb.* art. *Atſiz.* [b] *Hejrah* 590, or 593. [c] *Hejrah* 615. [d] Hiſtory of *Timûr-begh*, p. 307. Hiſtory of the *Turks*, &c. *p.* 165. [e] So the Countries ſubject to *Jagatay* were called after him. [f] *Hejrah* 749. [g] Hiſtory of *Timûr-begh*, p. 147. [h] Or, *Kunkurat*; in the Original, *Gonkegrat*. Turkiſtân,

Turkiſtân, the *Kalmûks* (or *Eluths*) and the *Mungols*; beſides, the Dates of Reigns are very rarely mentioned: But theſe Defects are recompenced by a Recital of a great many Particulars, which are to be met-with no-where elſe; for, beſides a circumſtantial Hiſtory of the *Uzbeks*, his Anceſtors, who have reigned-over *Karazm* ſince *Shah Bakht Soltân* conquered it, we have intermixed with it, in a good Meaſure, that of *Ma-wara-'lnahr* alſo, on Occaſion of the almoſt continual Wars between theſe two neighbouring States: By Means of which we are able to rectify ſeveral Miſtakes in the Hiſtory of the *Uzbek Khâns*, who have reigned in that Country, taken from the *Perſian* Hiſtorians [a], and to bring them down to the Time of our Author. To this may be added ſeveral Particulars, occaſionally mentioned, relating to the Form of Government, Manner of Fighting, and other Cuſtoms among the *Tartars*.

WITH Regard to the Geography of *Karazm*, to which before we were almoſt entirely Strangers, there is not a Town, or ſcarce any Place of Note in that Country, but what is mentioned upon Occaſion of ſome warlike Action or other, or of the frequent Partitions that have been made of them. We knew not, before this Author diſcovered it to us, that the River *Amû* divides itſelf into two Branches in the Country of *Karazm*; and that one of them having quitted its ancient Courſe to the *Caſpian Sea*, turns Northward, and throws itſelf into the Lake of *Aral*. As in the ſecond Part there is a large Account of the *Turkiſh* Hords, ſo the ninth contains many Notitia relating to the *Turkmân* Tribes [b]. The Reader will find, by this Critique on our Author, that when we have laid before him the following Summary of the *Uzbek Khâns* of *Karazm*, we ſhall have given him an Abſtract of the moſt valuable Parts of his Genealogical Hiſtory of the *Turks*, or (as it is called by his Tranſlators) of the *Tatars*.

1. *The* Khâns *of* Kipjak, *and* Origin *of the* Uzbeks.

Zuzi Khân: Batu Khân: Burga Khân: Mengu Timûr Khân: Tuda Mengû Khân: Uzbek Khân: Janibek Khân: Birdibek Khân: Urûs Khân: Toktamiſh Khân: Kaverchik Khân: Haji Garay Khân.

Khâns of Kipjâk.

TO deduce the Hiſtory of the *Uzbek Khâns* of *Karazm* with greater Diſtinctneſs, it will be neceſſary to aſcend as high as *Zuzi*, or *Juji* [c] *Khân*, eldeſt Son of *Jenghiz Khân*, who, as it hath been already obſerved, ſettled in *Kipjâk*, and died before his Father [d]. On the News of this Accident, *Jenghiz Khân* ſent his own Brother to create *Batu*, *Khân* of that Country, in his Father *Zuzi*'s Stead. Soon after, the Conqueror himſelf dying, *Batu* (or *Batu Saghin Khân*, as our Author names him) having left *Togay Timûr*, his youngeſt Brother, Regent, went with the other five to *Karakoram* [e], to aſſiſt in the Election of *Ugaday*, or *Oktay Khân*, whom they afterwards followed in his Expedition againſt *Kitay*. *Ugaday*, pleaſed with the Bravery of *Batu*, at his Return gave him a numerous Army to ſubdue the *Urus's*, *Cherkas*, and *Bulgars* [f]; which having done, and filled the Weſt with the Fame of his great Exploits, he returned to *Kok-orda*, the Capital of *Daſht Kipjâk* [g], where he died ſome Time after.

Zuzi Khân, Batu Khân.

HIS Brother *Burga*, who ſucceeded by the Choice of his Subjects (and reigned with much Glory, dreaded by his Neighbours) going ſome Time after to viſit *Koplay Khân*, whoſe Conſent he had obtained [h], he was ſo touched with the Diſcourſe of ſome *Bukharian* Merchants whom he met on the Road, that at his Return he ordered his Subjects to embrace *Mohammediſm*, having brought-over his Brother *Togay Timûr* on the Way: But he died before he could accompliſh his Deſign, after a Reign of twenty-five Years.

Burga Khân.

HE was ſucceeded by his Brother *Mengu Timûr*, a Prince of much Courage and Conduct. This *Khân* gave a Branch of the Tribe of *Akorda* to *Bahâdur Khân*, Son of his Brother *Sheybani Khân*; and to *Orân Khân*, Son of *Togay Timûr*, the Cities of *Kaffa* and *Krîm*. After this, marching againſt the *Bulgars*, in two Years he made conſiderable Conqueſts on that Side. Then turning towards *Irân* [i], *Abka* [k] *Khân*, who reigned there, came to an amicable Agreement with him, which continued during his Life. After his Death *Ahmed*, Son of *Hulakû Khân*, who had embraced *Mohammediſm*, having obtained the Crown of *Irân*, *Argûn*, Son of *Abka*, ſlew him, and aſcended the Throne. At this News *Mengu Timûr Khân* ſent an Army of eighty thouſand Men towards the Frontiers of that Country; but

Mengu Timûr Khân.

[a] By *Teixeira*, *De la Croix*, *D'Herbelot*, and ſome others. [b] Hiſtory of the *Turks*, &c. pref. p. 12, & *ſeqq.* [c] Written alſo *Chuchi*, and *Tuſhi*. [d] See before, *p.* 428. a; and 444. b. [e] In the Original, *Karakum*. [f] *Ruſſians*, *Chirkaſſians*, and *Bulgarians*, which laſt dwelt on the Eaſt-Side of the *Wolga*, about *Samara*. [g] Or, the Plain of *Kipjâk*, this being a level Country, like one extended large Plain. It is called alſo *Kipchâk*, or *Kapchâk*. [h] *Koplay* reigned at *Karakoram*, and though the Empire of *Jenghiz Khân* was divided into three or four Parts, their *Khâns* depended on him as the grand *Khân*, or *Khaân*, as ſome ſtile him. [i] Or, *Perſia* at large. [k] Or, *Abaka*, as others ſpell the Name.

Karazm Kingdom.

being met by *Argûn* with all his Forces, it was a defeated at *Karabagh*; which ſo afflicted *Mengu Timûr*, that ſoon after he died [a].

Tuda Mengu Khân.

HIS Succeſſor was *Tuda Mengu*, Son of *Batu Saghin Khân*. As this Prince overloaded his Subjects with Taxes, *Toktagû*, Son of *Mengu Timûr Khân*, thought it his Duty to repreſent to him the Injuſtice of ſuch Conduct: But *Tuda Mengu* took it ſo ill, that the other was obliged to leave the Country. However, returning not long after with a powerful Army, *Tuda Mengu* loſt both the b Battle and his Life. Hereupon *Toktagu* got himſelf acknowledged *Khân* of the *Kipjâks*. He reigned ſix Years with great Applauſe, and conquered many neighbouring Cities: But dying in the Midſt of his Victories, he was buried at *Sharifarayzik*, purſuant to his laſt Directions.

Uzbek Khân.

HE was ſucceeded by his Son *Uzbek Khân*; who, though but thirteen Years old, reigned with great Prudence. He introduced the *Mohammedan* Worſhip throughout his Dominions: c And this it was gave Riſe to the Name of *Uzbeks*, which his Subjects took from him. He tried his Fortune twice againſt *Abuſayd Khân* of *Irân* to no Purpoſe, and died at his Return from the ſecond Expedition.

Janibek Khân.

HIS Son *Janibek* [b], who was a good Prince, fixed his Court at *Sharifarayzik*. *Malek Aſhrâf*, Son of *Timûr Taſh*, who had uſurped the Throne of *Adhirbijân*, in *Perſia*, reigning tyrannically, a Prieſt, who had fled with others into *Kipjâk*, d wrought ſo upon *Janibek*, by a minatory Sermon, that the *Khân*, inſtantly aſſembling all his Forces, marched againſt *Aſhrâf*; who being overthrown and killed, his Treaſure, amounting, in Gold and Jewels only, to four hundred Camel-loads, were divided among the *Uzbeks*. He died ſoon after his Return, in 1356 [c], having reigned ſeven Years.

Birdibek Khân.

BIRDIBEK, his Son, who had been left to govern the *Perſian* Provinces, repairing to *Kipjâk*, two Years after, was received as *Khân*, purſuant to his Father's Deſire. This Prince giving himſelf up to Tyranny and a brutiſh Life, put to Death all his Relations, for Fear any of them ſhould attempt to dethrone him: So that dying in 1360 [d], the Effect of his Debaucheries, there was none left of *Mengu Timûr*'s Poſterity to ſucceed him.

Urûs Khân.

HEREUPON, *Urûs Khân*, the fourth in Deſcent from *Togay Timûr* before-mentioned, ſeized f the Throne, and reigned peaceably for ſome Years; till, at length, *Toktamiſh* [e], another Deſcendant of *Toga*, in the ſame Degree, attempted to diſpoſſeſs him; but being beaten, fled to *Amûr Timûr*, who reigned at *Samarkant* in *Mawara'lnahr*. *Urûs Khân* followed him at a great Rate; of which *Jaighi Mangap* [f] giving *Timûr* Notice, he ſent *Toktamiſh* with a numerous Army; who gaining the Battle, in which the *Khân* had loſt his Life, he found no Difficulty of obtaining his Ends in 1375 [g]. Yet, after this, taking the Op- Tokt portunity when *Amûr Timûr* was with all his Khân Forces invading *Irân*, he entered *Mawara'lnahr*, and, having reduced *Samarkant*, cauſed many of the Inhabitants to be ſlain. On the News of *Timûr*'s Approach he retreated; but was ſo hotly purſued by the other, that he was overtaken on the Banks of the *Atel* (or *Wolga*) and his Army defeated in Spite of his Reſolution [h] and Conduct.

TOKTAMISH left eight Sons; but *Kaver-* Kave *chik*, Son of *Urûs Khân*, ſeized the Throne. Khâ His Son *Barak* ſucceeded him. After whom, *Makhmat*, deſcended from *Togoy Timûr*, by his Son *Awaz Timûr*, got Poſſeſſion; but he dying, *Abuſayd*, ſurnamed *Janibek Khân*, Son of *Barak Khân*, enjoyed the Scepter. He left nine Sons; from the fifth of whom, named *Janiſh Soltân*, the *Uzbeks* ſay, the *Khâns* of *Turkeſtân* are deſcended. His Succeſſor was *Ghiath-addîn* [i], Son of *Timûrtaſh*, Son of *Makhmat Khân*; and after him reigned his Son *Haji Garay*, who had eight Haj Sons, viz. *Dawlatyar*, *Nûr Dawlat Khân*, *Hay-* Khâ *der Khân*, *Kutluk Samman*, *Kildiſh*, *Mengli Garay Khân*, *Yamgurzi*, and *Awaz Timûr*. Theſe, at their Father's Death, divided his Dominions; but did not enjoy them long; for the *Ruſſians* ſeized all the Country of *Kipjak* in 1553 [k]: From which Time we hear no more of the Deſcendants of *Haji Garay*, farther than that the *Khâns* of *Krim* are ſprung from him [l].

2. Hiſtory *of the* Uzbeks, *till their* Settlement *in* Karazm.

Batu Saghin Khân: *His Conqueſts in* Europe. Sheybani Khân. Abu'lgayir Khân. Arabſhâh. Yadigar Khân.

ZUZI KHAN [m] (eldeſt Son of *Jenghiz Khân*, who ſettled in *Kipjak* during his Father's Life [n]) had formed the Deſign of making War upon the *Cherkas* [o], *Baſhirs* [p], *Urus's* [q], and other bordering Nations; and for that End had cauſed

[h] This *Khân* beat the *Ruſſians* ſeveral Times, and took from the Czar *Demetrius Ivanowitz*, the Towns of *Moſkow*, and *Wolodimer*, in 1382. [i] In the Tranſlations, *Giaſudin*. [k] *Hejrah* 961. [l] Hiſtory of the *Turks*, as before, *p.* 197, & *ſeqq*. [m] Called alſo *Jaji*, and *Chuchi*. [n] See before, *p.* 428. a; and 444. b. [o] *Chirkaſſians*. [p] *Baſhkirs*, a Tribe of *Turks*, or *Tartars*, called *Paſkatir*, by *Rubruquis*, dwelling in the North-Part of the Kingdom of *Aſtrakân*. [q] *Ruſſians*.

Karazm Kingdom.

a prodigious Quantity of Provisions to be gotten ready: But Death preventing him, *Jenghîz Khân* resolved, that *Batu*, Son of *Zuzi*, called by our Author *Batu Saghin Khân*, should prosecute the Affair; and the Conqueror's Death having also obstructed it, *Ugaday* (or *Oktay*) after his Return from his Expedition into *Kitay*, sent *Batu* [a] into those Parts with a numerous Army; who having taking many Cities from the *Urûs's*, at length, sat-down before *Moskow*; near which the *Urûs*, with their Allies, the *Nemetzs* [b], had intrenched themselves.

Wars in Europe.

BATU having tried in vain, for three Months, to force them, his Brother, *Sheybani*, procured of him a Reinforcement of six thousand Men; then causing all his Troops to alight, at Day-break attacked the Enemy behind, while *Batu* charged them in Front with such Bravery, that they fled, after losing seventy thousand of their best Soldiers. This great Victory rendered the Conquest of several other Cities and Provinces easy. After his Return, loaded with Riches and Glory, *Orda*, surnamed *Itzen*, eldest Son of *Zuzi*, to reward *Sheybani*'s good Services, made him a Present of fifteen thousand Families: *Batu* did the like, and gave him all the Places conquered from the *Russians* and their Allies; with as many People out of the Tribes of the *Kuris*, *Naymans*, *Karliks*, and *Vigûrs*, as were necessary for the Guard of those Towns, and Support of his Court: But on Condition, that, settling in the Country, between his Dominions and the Lands of *Orda-Itzen*, he should pass the Summer about the Mountains of *Aral* [c], and River *Jaïk*; and the Winter more to the South, about *Karakum* [d], *Arakum*, and the Rivers *Sîr* and *Sara Sû*. Accordingly he sent one of his Sons to take Possession of the *Russian* and *Nemetzian* Cities, where he and his Descendants dwelt; but, because of the Distance, the Author could not tell where they were situated.

SHEYBANI, who left twelve Sons, was succeeded by *Bahâdur*, his second; and *Bahâdur Khân* by *Badakul*, the eldest of his four. After *Badakul Khân*, his only Son, *Mengu Timûr* (for his Wit and Courage called *Kutluk Mengu Timûr*) ascended the Throne. He had six Sons; from the last of whom, *Bekkondi*, was descended *Kujum Khân* [e], who, after forty Years Reign in the Country of *Turan* [f], becoming blind of Age, was driven-out by the *Russians*, in 1594 [g], and retired to the *Mankats* [h]. *Mengu Timûr* dying, *Fulad*, his third Son, succeeded. After whose Death, his Sons, *Dawlat Sheikh Oglân*, and *Arabshâh*, divided the Dominions; dwelling in Summer towards the River *Jaïk*, and in Winter about the *Sir*.

Khâns of Kipjâk.

DAWLAT SHEYKH had a Son named *Abu'lgayir*, who made himself formidable to all his Neighbours. He had eleven Sons. *Shabadakh Soltân*, the eldest, had two: The elder, called *Mahamet* [i], surnamed *Shâh-bakht*; the other *Mahamet Soltân*; whose Son, *Obeyd Khân*, reigned in *Great Bukhâria*. The second Son of *Abu'lgayir* was *Khoja Mahamet*; but being exceeding foolish, the *Uzbeks* called him *Khoja Amtintak*. His Son *Janibek* was as foolish as his Father; and *Iskander Khân*, *Janibek*'s Son, was no less silly than his Father, and Grandfather; but he was very devout, and loved Hunting and Hawking. His Son was *Abdalla Khân*, whose Son *Abdalmumîn Khân* was the last of that Branch of *Sheybani Khân*; of which two Princes, who were Men of Parts, Mention will be made hereafter.

Abu'lgayir Khân.

ARAB SHAH, Son of *Fulad*, was succeeded by his Son *Haji Taulay*, and had his Son *Timûr Sheykh* for his Successor. *Timûr Sheykh Khân* was a Prince of great Hopes, but reigned not long, having been killed in a Rencounter with two thousand *Kalmuks* [k]. Dying young, and without Issue, all his Subjects retired to other Princes, except the *Vigûrs*; who at length coming also to take their Leave of the *Khân*'s Widow, she informed them, that she was three Months gone with Child. Hereupon they resolved to stay till her Delivery; when being brought to Bed of a Son, called *Yadigar*, they sent Word to the *Naymâns*, who returned to their Obedience, having hovered about in the Interim to wait the Event; and ever since the *Vigûrs* have complimented them with the Left-hand, which is the most honourable Post [l].

Arab Shâh.

YADIGAR KHAN had four Sons. The first named *Burga Soltân*, was a Prince of much Courage. His Breast was formed of one single Bone. He lived in the Time of *Abu'lgayir Khân*, above-mentioned, who yet was much older. *Abusayd Mirza*, descended from *Amir Timûr*, who then reigned in *Mawara 'lnahr*, after slaying *Abdalatîf Mirza*, over-ran the whole Country, and forced his Son *Mirza Mahamet Zuki* to fly for Refuge to *Abu'lgayir* [m], whose

Yadigar Khân.

[a] *Batû*, *Khân* of *Kipjak*, had accompanied *Oktay* in that Expedition, with five of his Brothers. [b] By *Nemetzs*, are to be understood the *Germans*. The *Arabs* call *Germans*, *Nemsiah*. [c] See before, *p.* 391. [d] Or, *Black Land*; some Desart toward *Kipjak*. [e] In the Translation, *Kutzium Khân*. [f] Rather, *Tura* in *Siberia*. [g] *Hejrah* 1003. [h] Or, *Kara-kalpaks*. [i] The same as *Mohammed*, but much used in that Form in *Persia*. [k] It is this Nickname which the *Uzbeks* have given the *Eluths*, who in Return call them *Hassak-pûrûk*. See before, *p.* 394. [l] History of the *Turks*, &c. p. 205, *& seqq.* [m] This happened about 1449.

Karazm Kingdom.

Wife was *Zuki*'s Aunt. Some Time after, News being brought, that *Abuſayd* had marched, with all his Forces, towards *Khoraſân*, and from thence to *Mazanderân*; *Abu'lgayir* ſent thirty thouſand Men, under *Burga Soltân*, with *Mirza Mahomet Zuki*, towards *Taſhkant* (or *al Shâſh*;) which ſurrendered without Oppoſition. Proceeding to *Shâh Rûkhiya* (or *Fenakant*) it was ſoon taken. They then paſſed the *Sir*, and turned towards *Samarkant*, whoſe Governor *Amir Maſiet*, advancing to meet them, was intirely defeated. After this they took all the Towns of the Countries of *Kuzin*, *Karmina* [a], and *Mawara 'lnahr* [b].

Routs Khojaſh Mirza.

ABUSAYD MIRZA, who on the firſt News turned back, being arrived at *Balkh*, *Burga Soltân* was for preventing his Paſſage of the *Amû*: But *Zuki*, contrary to his Advice, re-paſſed the *Sir*, and got into *Shâh Rûkhiya*, which, after four Months Siege, ſurrendered to *Abuſayd* in 1455 [c]. Some Time after, *Muſabi*, who lived in the Dominions of *Yadigar Khân*, having been defeated by *Khojaſh Mirza*, another Lord, fled to *Burga Soltân* for Succour. *Burga* having firſt gotten his Father to be proclaimed *Khân*, took the Field with his Troops; and though they ſuffered greatly, it being the Depth of Winter, he would not turn back till he had met with his Friend's Enemy, whom he defeated, and killed.

Injures Shâh-bakht Soltân,

MEAN-WHILE *Abu'lgayir Khân* was become ſo formidable to all the neighbouring Princes, that uniting their Forces, they declared War againſt him; and having defeated his Troops, put him to Death, with ſuch of his Children, as fell into their Hands. On this Occaſion, *Burga Soltân*, deſirous to fiſh in troubled Water, appropriated to himſelf ſome Lands and Subjects belonging to *Abu'lgayir Khân*, notwithſtanding the great Friendſhip which had always ſubſiſted between them; and that Action coſt him his Life: For ſome Years after *Shâh Bakht Soltân*, returning to the Dominions of his Grandfather *Abu'lgayir*, all the ancient Subjects of that Prince came and ſubmitted to him. He, for a long Time, diſſembled his Reſentment, waiting for an Opportunity of Revenge.

Who ſurprizes

AT length, in 1481 [d], *Burga Soltân* having fixed his Winter-Quarters near his own, on the River *Sîr*, *Shâh Bakht* ordered a Number of his People to attend him, under Pretence of a Hunting-Match next Day: But ſetting-forward at Midnight, he of a ſudden turned towards *Burga Soltân*'s Camp, telling his Soldiers, that he was going to attack that Prince, and forbidding them to plunder, till they had ſecured his Perſon. Arriving thither at Day-break, he preſſed directly forward to his Tents: But *Burga*, on hearing the Noiſe, jumped out of Bed, and wrapping himſelf in a Robe of Sable, paſſed-out of one Side of the Tent, as the Soldiers entered the other. In this Condition he fled to a Pond at ſome Diſtance, and hid himſelf in the Reeds, but had wounded his Foot in the Way. His Purſuers having met-with a *Vigûr* of Diſtinction, called *Munga*, he told them, that he was the Perſon they looked-for; and being aſked by *Shâh Bakht*, who eaſily perceived the Deceit, his Reaſons for ſo acting, replied, *He had ſo many Obligations to* Burga Soltân, *that he thought it his Duty to riſk any Thing to deliver him out of Danger; and judged that his perſonating him would create a Delay that might ſecure his Eſcape.*

Khân Kipjâk.

THIS Anſwer exceedingly pleaſed *Shâh Bakht*, and gave him a high Idea of that Man's Virtue: However, he ſent again to ſearch-after *Burga Soltân*; and, as it had ſnowed that Night, the Soldiers happened to diſcover the Prints of bare Feet, and following the Tract, found at length Drops of Blood, which brought them to the Place where he lay concealed. *Shâh Bakht* cauſed him to be put to Death immediately, and ſeized all his Subjects [e].

Ard Khân.

SECT. VI.

The Uzbek Khâns *of* Karazm, *with the ſeveral* Revolutions *in that* State.

1. *The* Khâns *from* Ilbars *to* Avanaſh Khân.

Shâhbakht's *Conqueſts.* *Revolution in* Karazm. Ilbars *elected* Khân. *The Country ſubdued.* Soltân Haji Khân. Haſſan Kuli Khân. *Diviſion of* Karazm. *The* Turkmâns *ſubmit.* Buzzuga Khân's *Alliance with* Shâh Tahmaſb. Avanaſh Khân. Din Mahamet Soltân *kills* Mahamet Ghâzi. Ali Soltân *ſlain.* Burga Soltân's *Poſterity forced out of* Karazm: *Reſtored by* Obeyd Khân. Din Mahamet Soltân *takes* Kayûk: *Attacks and defeats* Obeyd Khân's *Army.* *An* Uzbek *Champion: Their Princes reſtored.*

BURGA SOLTAN left two Sons, *Ilbars* and *Bilbars*, ſurnamed *Bilikatz*, becauſe he became lame in his Feet by a Fit of Sickneſs when young. Theſe two Brothers were very brave, and lived on Lands belonging to their Father's Dominions as private Men. Meantime *Shâhbakht* [f] *Soltân*, having grown powerful by a long Train of Victories over all the neigh-

[a] Places in *Great Bukhâria*, towards *Karazm*. [b] It is *Arabic*, and ſignifies *Tranſoxana*, or, literally, *the Country beyond the River*, meaning the *Jihûn*, now *Amû*, and is reſtrained commonly to *Great Bukhâria*. [c] *Hejrah* 860. [d] *Hejrah* 886. [e] Hiſtory of the *Turks*, &c. p. 212, *& ſeqq.* [f] Called *Shay-bek*, and *Shay-beg*, by ſome Authors.

bouring

bouring Princes, ſubdued *Mawara'lnahr*, driving out the Deſcendants of *Amîr Timûr* [a]. Some Years after, *Soltân Huſſeyn Mirza*, another of his Poſterity, who reigned in *Khoraſân*, dying, *Shâhbakht* entered his Dominions [b] with a powerful Army; and having conquered the greater Part of it, put all his numerous Family to Death, excepting two or three. Then he marched into *Karazm*, which depended on *Khoraſân*; and taking *Urjenz*, fixed a Governor there.

FIVE or ſix Years after this ſecond Revolution [c], *Shâh Iſmaël* of *Perſia* having entered thoſe Provinces with a numerous Army, *Shâhbakht Soltân* met him near the City of *Marû*; but loſt the Battle, with his Life [d]. Hereupon the Governor of *Urjenz* flying, the *Shâh* ſent a Governor to *Khayuk* and *Hazaraſb*, and two others to *Urjenz* and *Wazîr*. The Governor of this laſt City, on his Arrival, gave the principal Inhabitants a ſumptuous Feaſt, and made them Preſents. *Omâr* the *Kadi* [e], who abſented himſelf, pretending to be indiſpoſed, ſent for ſome of them next Day, and repreſented, that their Religion was in Danger from this Governor, *Shâh Iſmaël* having changed the Faith [f] thirteen Years before. The Citizens, alarmed at the Thoughts of Innovations, went, two Years after, to a Perſon noted for Piety, in the Province of *Bakirgan*, propoſing to make him *Khân*, aud cut the Throats of the *Perſian* Gariſon. But he rejected the Offer, and adviſed them to elect *Ilbars*, Son of *Burga Soltân*, whom he recommended for his good Qualities; having often ſeen him in his annual Journeys into the Country of the *Uzbeks* [g], where he went to beg.

THE Burghers taking the holy Man's Advice, diſpatched two of their Number to *Ilbars* with a Letter, inviting him to repair to *Wazîr*. *Ilbars* ſet-out immediately with the Deputies, and ſtopped near that City; while the Conſpirators, who were the principal Lords, cauſing the Inhabitants to take-up Arms, cut the Throats of the Governor and all his Men. Next Day they ſet-out to meet *Ilbars*, who being joyfully received both by the *Sarts* and *Uzbeks*, was proclaimed *Khân* in the Year 1505 [h], which is that called *Koy* [i], or *the Sheep*. *Wazîr* had then depending on it, of all its Towns, only *Tarſak* and *Yanghi-ſhahr*; which laſt was given to *Bilbars Soltân* [k]. Uzbek Khâns.

THREE Months after, *Ilbars Khân* advancing to *Urjenz*, defeated the Governor's Army; and entering the City, put all the *Perſians*, with the principal Inhabitants, who had aſſiſted them, to the Sword: But finding he had not Men enough to ſecure his Conqueſts, moſt of the *Uzbeks* being ſubject to his Uncles, he invited the Sons of *Abulak*, and *Amunak* [l], to ſhare in his Succeſs; giving up to them *Urjenz*, and its Dependences, and returning to reſide at *Wazîr*. The new-come Princes, by their Incurſions, ſo incommoded the Governors of *Khayuk* and *Hazaraſb*, that they abandoned thoſe Towns. After this, they invaded *Khoraſân*, on the Death of *Shâh Iſmaël*, and took all the Towns between *Duruhn* [m] and the Mountains, Weſt of the City *Khoraſân* [n]. But they were vigorouſly oppoſed, as well by the *Turkmâns*, who poſſeſſed the Towns on the Borders of the Provinces of *Aſtrabâd* and *Khoraſân*, as thoſe who dwelt towards *Abulkhân* and *Mankiſhlak*. *Bilbars Soltân* was in moſt of theſe Actions; and though lame, led-on his Troops bravely, being carried in a light Chariot, accompanied only with five or ſix choſen Men. *The Country ſubdued.*

THE two Brothers died within a little while of each other, and left ſeveral Sons. *Ilbars Khân* was ſucceeded by *Soltân Haji*, Son of *Bilbars*, who was eldeſt of all the Family [o], and proclaimed at *Wazîr*. But as he had only a few Subjects, the Power fell into the Hands of *Soltân Ghâzi*, eldeſt Son of *Ilbars Khân*, a Prince of great Genius. Soltân Haji Khân.

AFTER the Death of *Haji Khân*, *Haſſan-kûli*, Son of *Abulak*, who reigned in *Urjenz*, was declared *Khân*, as being the eldeſt Prince of the Houſe of *Yadigar Khân*. But though they all obeyed one *Khân*, each had his own Dominion: And as *Haſſan-kûli*'s Revenue greatly exceeded theirs, they, at length, grew uneaſy at it, and, joining their Forces, laid Siege to *Urjenz*. Famine having cauſed a great Deſertion of his Men, at four Months End, the Enemy gave a general Aſſault; and taking the City, after a brave Re- Huſſan-kûli Khân.

[a] *Mirza Babor*, after being forced-out by him, ſettled in *India*, where he founded the Monarchy of the *Mogols*. [b] In 1507. *Hejrah* 913. [c] In 1510. *Hejrah* 916; according to *D'Herbelot*, at the Inſtigation of *Beki-ozbamon*, *Huſſeyn*'s Son. [d] This Prince, whom *D'Herbelot*, p. 771, calls *Shay-bek Khân*, laid the Foundation of the *Uzbek* Power in *Great Bukhâria* and *Karazm*. He entered thoſe Provinces with a powerful Army in 1494, and in four Years intirely ſubdued them. He reigned there twelve Years, *viz.* from 1498, to 1510. [e] Or, Judge. [f] Making *Ali* the true Succeſſor of *Mohammed*, inſtead of *Abubekr*, *Omar*, and *Othmân*, whom he reckoned Uſurpers: A Point of vaſt Importance among *Mohammedans*. [n] *De l'Iſle* places this City, or the Remains of it, near *Abiwerd*, or *Bawerd*, in Latitude thirty-nine Degrees. [o] The eldeſt of the reigning Family is always choſen *Khân*, except in extraordinary Caſes.

Karazm Kingdom.

ſiſtance, made a great Slaughter. They likewiſe put-to Death the *Khân* and his eldeſt Son, baniſhing the reſt into *Great Bukhâria*.

Diviſion of Karazm.

THEY likewiſe agreed on a new Diviſion of the Cities of *Karazm*. To the Deſcendants of *Burga Soltân* fell thoſe of *Wazîr*, *Yanghi-ſhahr*, *Tarſak*, and *Duruhn*, with the *Turkmâns* of *Mankiſhlak*. The Poſterity of *Amunak* had all the other Towns, *viz. Urjenz*, *Khayuk*, *Hazaraſb*, *Kât*, *Buldumſas*, *Nikitzkata*, *Boyunda*, *Bagabad*, *Naſay* [a], *Iburdu* [b], *Zabarda*, and *Mahana*, with the *Turkmâns* of the Countries of *Abulkhân* and *Dehiſtân*.

Safian Soltân.

HEREUPON *Safian Soltân*, eldeſt Son of *Amunak*, who ſucceeded *Haſſan-kûli Khân*, ſent to tell thoſe of *Abulkhân*, that unleſs they agreed to pay a yearly Tribute, he would deſtroy their Habitations. The *Turkmâns* voluntarily aſſeſſing themſelves, ſent him the Sum as a free Gift: But the *Khân* not content with ſuch precarious Contribution, ſent next Year forty Men to levy it both in *Abulkhân* and *Dehiſtân*. Theſe Tax-gatherers having diſperſed themſelves through the Countries, the *Turkmâns* cut all their Throats at the ſame Inſtant. Upon this News *Safian Khân* marched againſt them with an Army, and arriving at the firſt Habitations of them along the *Amû*, to the Weſt of *Urjenz* [c], met, at firſt, with much Reſiſtance; but, at length, the *Turkmâns* fled to the Mountain *Dſu* (or *Ju*) three Stages North of *Abulkhân*; where being diſtreſſed, they ſubmitted to pay forty thouſand Sheep yearly, *viz.* the Tribes of *Taka*, *Sarik*, and *Yamut*, eight thouſand; *Irſari*, and *Khoraſân Saluri*, ſixteen thouſand each.

The Turkmâns *ſubmit.*

THE other Tribes agreed alſo to pay in the following Proportions: *Jtzki Saluri*, ten thouſand; *Haſan*, ſixteen thouſand; *Ikdar* and *Dſaudar*, twelve thouſand; *Arabaz*, four thouſand; *Koklan*, twelve thouſand; *Adakli*, twelve thouſand; beſides a tenth more each, for the *Khân*'s Kitchen. As for the Tribes called *Utzil*, or three Branches, who dwelt on the *Amû*, it was ſtipulated, that *Adaklikhiſſer-illi* ſhould furniſh yearly a certain Number of Soldiers for the *Khân*'s Service, while thoſe of *Ali-illi*, and *Tiuazi*, ſhould pay their Contribution in Merchandizes [d].

Buzzuga Khân *Alliance*

SAFIAN KHAN dying, left five Sons; but his Brother *Buzzuga Soltân* ſucceeded him. *Obeyd Khân* [e], who then reigned in *Great Bukhâria*, took, about that Time, ſome Towns of *Khoraſân*, which his *Uzbeks* continually ravaged. On the other Side, thoſe of *Iburdu*, *Naſay*, and *Duruhn*, belonging to *Karazm*, no leſs annoyed the Inhabitants of *Khojan* and *Eſferain* [f], towards the Borders of *Ghilkupruk* Province, *Naſay* being but one Day's Journey diſtant. *Shâh Tahmaſp* [g], unable to remedy theſe Diſorders, becauſe he was in War with the *Soltân* of *Rûm* [h], reſolved to make an Alliance with the *Uzbeks*: b Accordingly he diſpatched an Envoy to *Urjenz*, to demand a Princeſs in Marriage; ſaying, his Maſter thought it a great Honour to wed a Lady of the Blood of *Jenghiz Khân*, after the Example of *Amîr Timûr*; who, on that Occaſion, got the Name of *Kuragan* [i].

BUZZUGA accepting the Propoſal in Favour of his Niece *Ayſha-bika*, Daughter of *Safian Khân*, becauſe he had none of his own, ſent *Akiſh Soltân*, one of his Brothers, and nine Vaſſal Lords, to the *Perſian* Court, to finiſh this c Alliance. The *Shâh* received that Prince with great Diſtinction, and made him a Preſent of the Town of *Khojan*. He ſent to *Buzzuga Khân* ten Wedges of Gold, and as many of Silver, each as large as a Tile; with ten fine Horſes, whoſe Saddles and Harneſs were trimmed with Gold. To his Spouſe he ſent nine Pieces of Cloth of Gold, a thouſand Pieces of Silks, and abundance of magnificent Habits. After which, d ſhe was conducted to the *Shâh*'s Court.

BUZZUGA KHAN dying, after a twenty-ſeven Years Reign, *Avanaſh Khân*, his Brother, was proclaimed. His eldeſt Son, *Din Mahamet*, who had an early Genius for War, when he was nineteen Years old, reſolved to make an Incurſion with forty Men towards *Aſtarabâd*. Paſſing the South Branch of the *Amû*, at *Sidalik Taka*, he met a Man belonging to a Lord of *Mahamet Ghazi Soltân*, who reſided at *Duruhn*, driving nine Camels e and thirty Sheep. Obſerving a yellow Goat among them, he begged it for his Peoples Subſiſtance: But the Fellow refuſing him, he ordered them to beat him, and take all his Drove. *Din Mahamet* purſued his Journey, and had Succeſs: But on his Return was met on the Road by a Party ſent out by *Mahamet Ghazi*, who took all his Booty of Cattle, and himſelf Priſoner, letting his Followers go their Way. Being brought before the *Soltân*, he, for a Time, confined him; and then f having puniſhed him, ſent him, under a Guard

[a] Or, *Neſa*. [b] *Abiwerd*, or *Baswerd*. [c] See before, *p.* 483. e. [d] Hiſtory of the *Turks*, &c. p. 229. *& ſeqq.* [e] He was the Son of *Mohammed Soltân*, Brother of *Shah-bakht Soltân*, who conquered *Great Bukhâria*, as before related. [f] This laſt Place lies near the Borders of *Jorjan* in *Perſia*. [g] Or, *Tahmeſb*: In the Tranſlations, *Tamaſip*. This was *Shâh Thamas* I. of *Perſia*. [h] So the *Aſiaticks* ſtile the *Othmân* Emperor, becauſe poſſeſſed of what they call the *Roman* Empire. [i] Others write *Kurkhân*, and *Gurkhân*; which ſignifies the Son-in-law, and Relation of the *Khân*.

of ſix Men, to his Father *Avanaſh Khân*, with Orders to tell him, that he had ſent him his *Tugma* [a], after puniſhing him for invading the *Perſian* Territories, without his Permiſſion, and ſtripping ſome of his People.

DIN MAHAMET, impatient to be at Liberty, from Time to Time made great Outcries, that if any of his Men had ſtopped on the Road, they might come to his Aſſiſtance. On the other Hand, every Time he made a Noiſe, the Lord, who conducted him, bawled-out *Riſha*. This *Din Mahamet* taking as done to inſult him, one Day, when his Guards were aſleep in the Country of *Gordiſh*, ſome of his Men, who knew his Voice, and had followed him, coming-up, they cut all their Throats, and buried their Corpſes out of the Way. His Father, who did not love him, on his Return, having aſked him how he got-out of the Scrape, he anſwered, that *Mahamet Ghazi*, who had been angry with him, being ſoon reconciled, had ſent him back with a Preſent of ſome Horſes, and Habits; which his Father believed to be Truth.

AFTER this, *Din Mahamet* getting two Seals engraved, one with his Father's Cypher, the other with that of his Mother-in-law, who was Siſter of *Mahamet Ghazi*; he wrote Letters to the *Soltân*, in both their Names, to let him know, that ſhe was ſick, and deſired earneſtly to ſee him. Her Brother inſtantly ſet-forward, and arriving in an Evening when the *Khân* was out a-hawking, went directly to his Siſter's Apartment. Perceiving her to be very well, and ſhe telling him ſhe had ſent no Letter, he began to ſuſpect ſome Treachery, and left her that Inſtant, with Deſign to take Horſe again: But hearing much Noiſe in the great Street, which faced the Caſtle, he made to the *Khân*'s Stables, thinking to eſcape by a back-Door that opened into a by-Lane; which being full of People, he hid himſelf in a Heap of Dung that lay in a Corner of the Stable [b].

DIN MAHAMET, who had ſeen the *Soltân* go-up to his Siſter's Apartment, followed with ſome of his forty Men; and not finding him there, was told by the Women Slaves, that he was gone toward the Stables; where, after much Search, one of them perceiving a Bit of his Scarlet Robe ſticking out of the Dung, went and told *Din Mahamet*; who came, and ſlew him on the Spot. Upon this News, one of *Mahamet Ghazi*'s Men ran to *Wazîr*, to inform his Brother *Soltân Ghazi*; who, in Revenge, ſlew *Ali Soltân* (Son of *Safian Khân*) his Wife's Brother, juſt then come to viſit her. *Avanaſh Khân* being informed, at his Return from the Sport, of what had happened, and that *Din Mahamet* was fled, aſſembled his Council: But they had ſcarce come to a Reſolution what was proper to be done on the Occaſion, when a Courier arrived with the News of the Murder of *Ali Soltân*, which threw them into farther Confuſion. Uzbek Khâns.

MEAN-TIME the *Khân*'s Nephews, being informed of what had happened at *Urjenz* and *Wazir*, and foreſeeing that a Civil War was likely to enſue, repaired to *Urjenz*; from whence, on the other hand, *Mahamet Ghâzi*'s People retired to *Wazir*. *Avanaſh*, for his Part, had no Inclination for a War; but his Nephews, in ſome Meaſure, forced him to raiſe an Army, and march towards that City. On this News, *Soltân Ghâzi* ſent to the Deſcendants of *Bilbars Soltân*, at *Yanghi Shahr*: But without ſtaying for them, with what Troops he had, advanced to meet the *Khân* as far as the Province of *Kumkant*, to the Weſt of *Wazîr*, where coming to an Engagement, he loſt the Battle, and was there killed, with fifteen Princes deſcended from *Ilbars Khân*. His Sons *Omar Ghâzi Soltân*, and *Shîr Ghâzi Soltân*, with two Daughters, falling into the Hands of *Akattay Soltân*, Brother of the *Khân*, he ſent them into *Great Bukhâria*. Burga Soltan's Poſterity. *Forced out of* Karazm.

THE other Princes, who made haſte to join *Soltân Ghâzi*, hearing of his Diſaſter, fled alſo into *Great Bukhâria*, not daring to return to *Yanghi Shahr*. After which, the Deſcendants of *Amunak* put to Death all the Poſterity of *Burga Soltân*, who fell into their Hands, excepting the Women, whom they kept as Captives. Thus was the Race of *Ilbars*, once ſo numerous, almoſt extinguiſhed, at leaſt none of them were to be found in *Karazm*. After ſo great a Revolution, the Country was divided among the Deſcendants of *Amunak*; and *Din Mahamet Soltân* had for his Share the City of *Duruhn*.

MEAN-TIME *Omar Ghâzi Soltân*, Son of *Soltân Ghâzi*, arriving in *Great Bukhâria*, put himſelf into the Service of *Obeyd Khân* [c]; and though but fifteen Years old, ſignalized himſelf on ſeveral Occaſions. He beſtirred himſelf ſo effectually in his own Behalf, that at laſt the *Khân*, in Conjunction with *Juanmart*, *Khân* of *Samarkant*, *Barak*, *Khân* of *Taſhkant*, and the Prince of *Hiſſar*, entered *Karazm* with their united Forces. On the News of their Approach, the Princes poſſeſſed of *Khayuk*, *Hazaraſb*, and other neighbouring Towns, repaired, with their Troops, to join *Avanaſh Khân*; but he not daring to wait the Enemies Coming, retired into the Deſarts. The Confederates arriving at *Ur-* *Reſtored by* Obeyd Khân.

[a] *Tugma* ſignifies a Child born of a bought Slave, as *Din Mahamet* had been. [b] Hiſtory of the *Turks*, &c. p. 239, & *ſeqq*. [c] He was Nephew to *Shâh-bakht Soltân*, and Son of a Grandſon of *Abu'lgayir Khân*; which laſt is the common Anceſtor of the *Uzbek* Princes ſettled in *Great Bukhâria*.

jenz,

Karazm Kingdom.

jenz, detached ſome Troops after the Fugitive Princes; who being taken, *Obeyd Khân* made a Diviſion of them; and as *Avanaſh Khân* fell to *Omar Ghâzi*'s Share, he inſtantly put him to Death. The *Khân* gave *Urjenz* to his Son *Abdalaziz Soltân*, and one of the four *Uzbek* Tribes, who dwelt in *Karazm*, to each of the four invading Powers; who having appointed their Intendants over them, returned to their own Dominions.

Din Mahamet Soltân

WHEN *Avanaſh Khân* was made Priſoner, his two Sons, *Mahmûd* and *Ali*, took Refuge with *Din Mahamet Soltân* their eldeſt Brother, at *Duruhn*; whither alſo fled *Yuſſof* and *Yunus*, two Sons of *Safian Khân*, with other Princes, and young Men of Quality: But *Kahl Soltân*, and *Akattay Soltân*, Brothers of *Avanaſh*, were carried into *Great Bukhâria*, with all the Children of the latter, except *Hajim Soltân*, who being then eighteen Years of Age, put-on mean Cloaths, and retired to an old Domeſtic of his Father's, whoſe Horſes he kept, as if one of his Slaves; till the Affair taking Wind, his Protector conveyed him to *Duruhn*.

SOON after this, *Din Mahamet*, accompanied by all the Refugee Princes, ſet-out for *Urjenz* with two thouſand Men, whom he reinforced in the Way by a thouſand *Turkmâns*: But when they came to the Country of *Piſhga*, it appearing that their Forces were too ſmall to attack the City, and beſide wanting Boats to paſs the *Amû*, they reſolved to march to *Khayuk*: Becauſe on that Side there was no Need of Boats, and they might hope to get thither undiſcovered, as but few People dwelt on that Road.

Takes Kayûk.

AT their Arrival, they took the City without much Difficulty, and put to Death the Commander, with ſome of his Gariſon. With this News the Governor of *Hazaraſh* repaired to *Urjenz*; and *Abdal Aziz Soltân* fearing to fall into *Din Mahamet*'s Hands, retired into *Great Bukhâria*. *Obeyd Khân*, on his Son's Return, immediately raiſed a numerous Army, and marched toward *Urjenz*; but arriving at the *Karamit Turkmâns*, ſtopped there with Part of his Forces, and ſent the reſt, amounting to forty thouſand, under two Generals, to that City.

Attacks and defeats

ON the firſt Advice of the Enemy's March, *Din Mahamet* left *Khayûk*, to go-meet them: But as his Forces did not exceed ten thouſand, the Princes and Lords who accompanied him, adviſed him to return to *Duruhn*; alledging, that as ſoon as *Obeyd Khân*, who came only to ſecure *Urjenz*, perceived their Retreat, he would retire alſo, and that then they might come-back without Noiſe, and take the City. But the *Soltân* perſiſting in his Reſolution, to give them Battle, two hundred and twenty of his principal Followers alighted, and falling proſtrate at his Feet, intreated him to return. Having renewed their Supplications in this Manner three Times, he at laſt falling into a Paſſion, flung himſelf off his Horſe alſo, and taking-up a Handful of Duſt, ſcattered it on his Head, crying out, "I devote my Soul to "God, and my Body to the Earth." Then turning to the Lords who ſurrounded him, ſaid, "I conſider myſelf as a dead Man, and if you "eſteem your Lives more precious than mine, "I ſhall not hinder you to return; but if you "will ſhare with me the Glory which attends "us, let us march." Hereupon remounting his Horſe, he continued his March, and all his Army followed, ſhedding Tears [a].

MEAN-TIME *Din Mahamet* hearing of the Enemies Approach, halted at a Pond, ſince called *Shikaſt-kuli*, in the Province of *Gardankhoſt*. He ranged his Troops on the Weſt-Side of the Pond, which was then dried-up; and having had Notice, before Day, by his Scouts, of the Enemies Approach, divided them into two Bodies, one commanded by himſelf, and the other by *Juſſof Soltân*, which he poſted on both Sides of the Road, and waited with profound Silence. The *Bukhârian* Army ſoon appeared, having at their Head moſt of their Commanders, with forty Torches, which the *Soltân* let paſs, and then fell all at once on the Troops that followed; charging them ſo briſkly, that they were ſoon broken, and obliged to fly, notwithſtanding their great Superiority.

TOGAY BAHADUR, one of the Chiefs of the *Kunkurats*, and the *Soltân*'s Vaſſal, killed ſixty Men in the Battle with his own Hand. *Din Mahamet* had advanced ſo far amongſt the thickeſt of the Enemy, that the Bow fell from his Side, unknown to him; which *Hajim Soltân*, who accompanied him, having recovered, "My Brother, ſaid *Din Mahamet*, that which "you have done to-day for me, ſhall be the "Knot of an everlaſting Friendſhip between "us." He was then twenty-eight Years old, and *Hajim Soltân* [b] eighteen. This Victory was compleat: For beſides the Soldiers ſlain and taken, moſt of the principal Officers of the Enemy fell-into the Conqueror's Hands; which enabled him to recover the Captive Princes of the Family by an Exchange of Priſoners. To this End the Perſons of Diſtinction were ſuffered to go, on their Parole, into *Great Bukhâria*, accompanied by *Hajim Soltân*; who executed his Commiſſion ſo well, that he brought-back his Father *Akattay Soltân*, *Kahl Soltân*, and the reſt in [c] 1542 [d].

[a] Hiſtory of the *Turks*, &c. p. 249, *&* *ſeqq.* [b] Or, *Hazim Soltân*: *Jenkinſon* writes *Azim.* [c] *Hijra* 949. [d] Hiſtory of the *Turks*, as before, *p.* 258, *&* *ſeqq.*

2. T

Uzbek Khâns.

2. *The* Khâns *from* Kahl Khân *to* Din Mahamet Khân.

Kahl Khân. Akattay Khân. Yunus *ſeizes* Urjenz: *The* Khân *taken, and cruelly murdered: Another Revolution: New Diviſion of the Cities.* Din Mahamet Khân: *His great Reſolution: Outwits* Obeyd Khân's *General: His Character, and Death. Story of* Abu'l Soltân. Nûr Mahamet Soltân *diſpoſſeſſed of all.* Sari Mahmûd Soltân. Ali Soltân: *Makes Inroads into* Khoraſân: *Defeats the* Perſians: *Death and Character: His great Modeſty.*

THE Deſcendants of *Amunak* having recovered their Poſſeſſions in *Karazm*, by the Valour of *Din Mahamet Soltân*, they conferred the Dignity of *Khân* on *Kahl Soltân*, who fixed his Seat at *Urjenz: Akattay Soltân* had *Wazîr*; *Hajim Soltân*, his Son, *Baghabâd*; the Deſcendants of *Safian Khân* [a] had *Khayûk*; the Sons of *Buzzuga Khân*, *Hazaraſb*; and *Din Mahamet Soltân*, and his Brother, the Towns of *Duruhn*, *Yaur-ſurdi*, and *Naſay*.

AKATTAY KHAN, who ſucceeded his Brother, gave *Kât* to *Sheykh Mahamet* and *Shâh Naſſer*, two Sons of *Kahl Khân* [b]; *Urjenz*, with its Dependents, to *Ali Soltân*, *Avanaſh Khân*'s youngeſt Son, continuing himſelf to reſide at *Wazîr*. But he did not long enjoy the Sovereignty.

YUNUS SOLTAN, a Prince of much Ambition and Courage, who had married the Daughter of a *Biyawl* [c] of the *Mankats*, departed one Day from *Khayuk*, with forty choſen Men, under Pretence of going to pay a Viſit to his Father-in-law, who dwelt near *Urjenz*. Having paſſed *Kât*, and arrived at *Tuk*, which he knew then to be empty, all the Inhabitants, both of the Town and Country, being gone towards *Urjenz* and *Wazîr*, he got upon a Tower, from whence he could ſee *Urjenz*; and expreſſing a Deſire to be there, as being his native Place, his Men told him, they were ready to follow him wherever he pleaſed.

BEING arrived at the City about Midnight, they entered the Ditch on-foot, and lay hid till the Guards, with their Torches, paſſed by: Then, by Help of a long Pole reared againſt the Wall, they all mounted; and going directly to the Houſe of *Mahmûd Soltân* (left Governor by his Brother *Ali*, who went to live at *Naſay*) ſeized and ſent him to *Wazîr*, to the Cuſtody of *Akattay Khân*, whoſe Daughter he had married.

a *Mahmûd*, who was a very wicked Man, never ceaſed importuning the *Khân* to go take *Urjenz*, till he conſented; eſpecially, conſidering that *Yunus* had but forty Men, and it was not likely the *Uzbeks* would aſſiſt him againſt their Sovereign. But being advanced near the City, he there found *Yunus*, with a good Body of Troops, expecting him; and coming to a Battle, was put to Flight.

The Khân *taken,*

KASSEM, Son of *Yunus*, by the Daughter of b the *Khân*, took upon him to purſue him; crying out, "Grandfather, where would you go in this "hot Weather? You had better reſt yourſelf "under ſome Tree, and early To-morrow-"Morning continue your Journey." But *Akattay Khân*'s Anſwer was, "Your Father "has a Heart as black as a Pot; wherefore, if "your Intentions towards me be good, leave "me to continue in my Road, and do me no "Harm." *Kaſſem* finding fair Means would not c do, forced him to go with him to *Urjenz*.

And cruelly murdered.

UPON this News, all the *Uzbeks* about *Urjenz* having aſſembled tumultuouſly, acknowledged *Yunus* for their *Khân*, without conſulting the other Princes. Some Days after, *Yunus Khân* ſent to tell the four Sons [d] of *Akattay Khân*, who lived at *Wazîr*, that though they had no Deſire to take him, yet they were obliged to convey him home with them, finding him quite ſpent with the Colic, which ſtill violently afflicted him. d Preſently after, he ſent four Men to the Houſe, which ſerved for his Priſon, with Orders to bind his Hands and Feet, and impale him alive, taking Care that no Marks of a violent Death ſhould be found on his Body; which he ſent to *Wazîr*, with many Compliments of Condolence to his Sons; who, he ſuppoſed, would conclude, their Father died of the Colic.

Another Revolution.

As ſoon as they heard of his Death, they ſent to their two Brothers [e], who reſided at *Bagh-* e *abâd*, which depended on *Khoraſân*, to join with them in revenging the Murder. They all ſet forward; but when *Yunus* found that they had paſſed the *Amû*, not daring to wait for them at *Urjenz*, he fled into *Great Bukhâria* with his Brother, and the Sons of *Kahl Khân*. On the Road moſt of his Men abandoned him, and his Son *Kaſſem* loſt his Way, accompanied only with one Man; who, under Pretence of going for Proviſions, went to *Urjenz*, and betrayed him to f *Hajim Soltân*. This Prince immediately ſent Men to fetch him from the Pond [f] where he lay hid, and cauſed him to be put-to Death: Which Revolution happened in 1549 [g].

[a] Theſe were *Yunus* and *Paluankuli*, two Sons of *Safian*. [b] The *h* in *Kahl*, ſeems to ſtand for the *Ara-* *Alif*; ſo in *Kabt* and *Duruhn*. [c] A military Charge among the *Kara-kalpaks* and *Kaſachia Orda*, much that of Colonel in *Europe*. [d] Theſe were *Fulat*, *Timûr*, *Alla-kuli*, and *Suleymân*. [e] *Hajim* and *Mahmûd*. [f] Since then called *Khân Zungali*. [g] *Hejrah* 956.

Karazm *Kingdom.*

New Diviſion of the Cities.

THE Deſcendants of *Safian*, and *Kahl Khân*, having been thus ſtripped of all they enjoyed in *Karazm*, the Children of *Avanaſh Khân* continued in Poſſeſſion of *Duruhn* and *Yaurſurdi*, which depended on *Khoraſân*. The Sons of *Akattay Khân* held *Urjenz* and *Wazîr*; and the three Sons of *Buzzuga Khân*, *Iſh*, *Doſt*, and *Burum*, became Maſters of *Khayuk*, *Hazaraſb*, and *Kât*. After which, they conferred the Dignity of *Khân* on *Din Mahamet Soltân* [a].

Din Mahamet Khân.

THIS Prince, who could not ſit idle, began to invade *Khoraſân*; which obliged *Shâh Tahmaſb* to ſend an Army thither, who took from him *Yaurſurdi*. As ſoon as the *Perſian* Troops were retired, the *Khân* poſted to *Kaſwin*, where the *Shâh* reſided, and prayed him to reſtore that City: But *Tahmaſb* being deaf to his Intreaties, he got his Seal counterfeited, and then wrote a Letter, in the *Shâh*'s Name, to the Governor of *Yaurſurdi*, ordering him to deliver it up to *Din Mahamet Khân*, and come himſelf to Court. A few Days after, while *Shâh Tahmaſb* was hunting, he ſlipt from the Company, and, haſting with his Followers to *Yaurſurdi*, delivered the Letter; which the Governor obeying, forthwith gave him up the Town, and departed.

His great Reſolution.

As ſoon as his Back was turned, *Din Mahamet Khân* ordered the Gates to be ſhut, and all the *Perſians* put to the Sword. At this News *Shâh Tahmaſb* ſet-out, with a conſiderable Army, to take Revenge: But when he came to the little River *Kara Su*, near *Maſhhad* [b], he was informed, that the *Khân* was arrived in the Camp with a Retinue of fifty thouſand Horſe. This News appeared ſo ridiculous to him, that he would not believe it, till they brought him Word that Prince was at his Tent Door. *Din Mahamet Khân* entering at the ſame Time, fell on his Knees before the *Shâh*; who was ſo ſurprized at his extraordinary Boldneſs, that, not content with putting his right-Hand on the *Khân*'s left Shoulder, he thruſt the Left into his Boſom, to try if his Heart did not beat; but perceiving no Motion there more than what is uſual, he could not avoid admiring the Intrepidity of that Prince. On which Account, he pardoned him all that was paſt, and, having feaſted him magnificently, ſent him home, next Day, loaden with rich Preſents; conducting him in Perſon ſome Diſtance from the Camp.

Outwits Obeyd Khan's General.

SOME Time after, *Obeyd Khân*, of *Great Bukhâria*, took *Marû*, and gave the Command of it to *Yulumbi*, a Chief of the *Naymans*: But the *Khân* growing jealous of him, through the Suggeſtions of thoſe who envied his good Fortune, ſent for him to Court. As *Yulumbi* was not over-haſty to obey thoſe Orders, *Obeyd Khân*, believing that he deſigned to revolt, ſent an Army of thirty thouſand Men to reduce him. *Yulumbi*, now put to his laſt Shifts, had Recourſe for Succour to *Din Mahamet Khân*, who ſet forward immediately: But having only a few Troops, he ordered each of his Men to cut-down three ſmall Trees, and fixing one on each Side of the Horſe, tie the third to his Tail: Thus they marched at a good Diſtance from one another. The *Bukhârian* Generals being informed, that the *Khân* was coming to *Yulumbi*'s Aſſiſtance, ſent-out their Spies; who, obſerving the Marks of their March on the Road, brought Word, that he advanced with a very numerous Army: Hereupon the Generals retreated as faſt as they could, without ſeeing the Enemy; and *Din Mahamet* having taken Poſſeſſion of the City, fixed his Reſidence there for Life.

DIN MAHAMET KHAN, beſides the other heroic Virtues, which he poſſeſſed in a high Degree, was extreamly generous, gracious, and eloquent: He had withal, a peculiar Brightneſs of Wit. He died at *Marû*, in the Year 1552 [c], called *Sighir*, or *the Cow*, aged forty. He left behind him two Sons; the eldeſt called *Sogand Mahamet*: But, becauſe he was not in his right Senſes, his Brother, *Abu'l Soltân*, ſucceeded in all his Father's Dominions, and reigned with Wiſdom for ſeveral Years. At length, he made an Irruption with great Forces into *Khoraſân*; and arriving at *Maſhhad*, detached his only Son, with moſt of the Army, to penetrate deeper into the Country. But having advanced as far as the River *Kara Su*, to the Weſt of that City, he was met by a great Army of *Perſians*, and loſt the Battle, with his Life; ten thouſand Men being ſlain. This News ſo afflicted his Father, that he fell dangerouſly ill, beyond the Help of a Phyſician.

ON this Occaſion, a Woman, at *Marû*, produced a Boy, four Years old, which, ſhe ſaid, ſhe had by the *Soltân*; who having ſent for her one Night to play on the Harp, took a Fancy to lie with her. Hereupon, one of his Phyſicians, eſteemed the moſt ſkilful in the Country, ordered both the *Soltân* and the Child to be undreſſed; then laying the Boy on the Belly of the dying Prince, had a Coverlet thrown over them, and began to cry-out with all his Force, *Soltân, behold a Son of yours!* As he continued to do three Times a-day, the *Soltân*, by Degrees, recovered his former Health: After which, he owned the Child for his Son, and called him *Mahamet*.

ABUL SOLTAN dying, *Nûr Mahamet* ſucceeded him in all his Dominions. But, a few Years after, the Princes of the Houſe of *Khân* united againſt him, under Pretence, that they would not have the Son of a Strumpet

[a] Hiſtory of the *Turks*, &c. p. 261, & *ſeqq.*

[b] Or, *Tûs*. See before, *p.* 443. d.

[c] *Hejrah* 96

their Brother. *Nûr Mahamet* finding himſelf unable to reſiſt them, ſued for Protection to *Obeyd Khân*, and delivered-up his four Cities of *Marû*, *Naſay*, *Yaurſurdi*, and *Duruhn*, imagining that the *Khân* would leave him in Poſſeſſion, and be content with receiving Tribute: But finding himſelf deceived in his Expectation, he quitted *Great Bukhâria* in Diſcontent, and went to *Urjenz*, where he was well-received by his late Enemies, and lived with them five Years.

AT length *Obeyd Khân* dying, *Nûr Mahamet* ſet-out to recover the four Towns; in which having ſucceeded, he put to the Sword all the *Uzbeks* whom he found in them, ſettling the *Sarts* and *Turkmâns* in their Room. But *Shâh Abbâs Maſi* [a] of *Perſia*, willing alſo to profit by the Death of *Obeyd Khân*, came in Perſon to beſiege *Marû*, with a powerful Army, and took it in forty Days, with *Nûr Mahamet*, who had been ſo imprudent as to ſhut himſelf up there. After this he took the other three Cities without Difficulty, and ſent *Nûr Mahamet* to *Shirâz*; where, with him, ended the Poſterity of *Din Mahamet Khân*, eldeſt Son of *Avanaſh Khân*.

THE ſecond Son of *Avanaſh* was *Mahmûd*, who being of a yellowiſh Complexion (for all the other Deſcendants of *Amunak* were of a fine Brown) was called *Sari Mahamet*, or *yellow Mahamet*. This Prince was addicted to all Sorts of Vices: He loved Liquor ſo well, that being one Day at a Houſe drinking *Braga*, and ſomebody coming to tell him the Enemy's Troops were near; while the reſt ran to their Horſes, he, with a great deal of Unconcern, took a Knife, and marked all the Pots which had *Braga* in them, bidding the Hoſt take-care of them till his Return.

ALI SOLTAN, the youngeſt of *Avanaſh Khân*'s Sons, poſſeſſed at divers Times the Cities of *Naſay*, *Yaurſurdi*, *Urjenz*, *Hazaraſb*, and *Kât*. He uſed, every Spring, to croſs the *Amû*, and go-encamp towards the Borders of *Khoraſan*; from whence he ſent Parties to pillage the *Perſians*, and in Autumn returned to *Urjenz*. He muſtered the *Uzbeks*, in his Service, every Year, and gave each, for his Pay, ſixteen Sheep, out of the Contribution-Sheep which he received from the *Turkmâns*; and when they fell ſhort, he ſupplied the Defect by the Booty-Sheep taken from the *Perſians* [b].

SHAH TAHMASB, on Complaints made of theſe Ravages, at length ſent *Bader Khân*, one of his Generals, with twelve thouſand Men, to ſeek-out and fight *Ali Soltân*. This Prince, according to Cuſtom, had entered the Country of *Aſtarabâd* with three thouſand Men, to oblige the *Turkmân* Tribe of *Okli-koklan* to pay him Contribution: Which *Bader Khân* being informed of at *Baſtam*, he turned that Way. *Ali Soltân* was a little ſurprized at this News at firſt; but conſidering it was dangerous to retreat in the Face of the Enemy, went and poſſeſſed himſelf of the *Kurgan*. This River is very difficult to paſs, being rapid as well as deep, and the Banks extreamly high, except in a few Places where it is fordable. Our Author, who often paſſed it, found the Height of them, in many Parts, above two Cubits. He cauſed the Horſes and Cattle to be tied behind, and employed the Chariots, or Waggons, to cover the Front of his Troops. Uzbek Khâns.

IN this Poſture the *Perſians* coming-up, attacked him ſeveral Times; but as they had only Cavalry, they could get no Advantage. Hereupon *Ali-beg*, a *Turkmân* Chief, impatient to ſee no End of the Fight, ſallied-out with three hundred Men of the Tribe of *Okli*, in order to charge the Enemy behind, while *Ali Soltân* attacked them in Front. When he was gone, ſome of the chief *Uzbek* Commanders ſaid, it was wrong to let him go, for Fear of his joining the Enemy: But *Ali-beg*, while they were ſpeaking ſo much to his Diſadvantage, had already began the Fight; ſo that having been attacked three Times vigorouſly by the *Perſians*, he muſt have been oppreſſed by their Numbers, if *Ali Soltân* had not in Time ſallied-out of his Intrenchment, and charged them in Front; which having put the Enemy into Diſorder, they betook themſelves to Flight, after the greater Part of them had been ſlain. The *Soltân* purſued them till far in the Night, ſo that *Bader Khân* had much-ado to eſcape, with a few of his Men. So great a Number of Horſes were taken, that *Ali Soltân* having made his Eſquire a Preſent of every ninth, they amounted to ſeven hundred, not reckoning what fell in Diviſion to the Officers and Soldiers. *Defeats the* Perſians,

FIFTEEN Years after, the *Soltân* having, in one of his Expeditions, advanced as far as the *Zenghel*, or *Deſart*, to the South of *Khojan*, fell ill of a contagious Ulcer, which broke-out between his Shoulders. As he would let nobody ſee it, through Baſhfulneſs, the Chiefs were obliged to uſe Force, and cut the Cloaths over the Part affected, to come-at it. Yet for all their Care, he died of that Diſtemper in the Year 1571 [c], at the Age of Forty. *Ali Soltân* was a Prince of ſo much Merit, that his Couſin *Hajim Khân* often ſaid of him, that he had not his Equal among the Deſcendants of *Yadigur Khân* in Bravery and Liberality, Sincerity, Modeſty, and, above all, *Death and Character*,

[a] This was *Abbâs* the Firſt. [b] Hiſtory of the *Turks*, &c. p. 271, *& ſeqq.* [c] Called *Sighir*, or *the Cent. Hejrah* 979.

Karazm *Kingdom.*

His great Modeſty.

the Art of Reigning. As in all his Life he had a never ſuffered any Perſon either to ſee, or touch his naked Body; ſo he would not ſuffer a Domeſtic to feel whether his Legs began to grow cold when he was a-dying. He did ſpeedy Juſtice to thoſe who demanded it. In one of his Expeditions, he hanged a Man for taking two *Arbuſes* (or Melons) out of a Field. He left two Sons, *Iſkander*, who died the ſame Year; and *Sanjer*, who being diſturbed in his Senſes, reigned ten Years at *Naſay*, under the Conduct of a *Nayman* Lord [a].

3. *The* Khâns *from* Doſt Khân *to* Abdallah Khân.

Doſt Khân. Iſh Soltân *takes* Urjenz: *Revolution thereon.* Hajîm Khân. *Story of* Timûr Soltân. Abdallah Khân's *Invaſion:* Turkiſh *Ambaſſador and Merchants plundered. A new Invaſion by* Abdallah Khân. *The Princes enſnared by a treacherous Peace: Are all put to Death.* Hajim Khân *retires to* Perſia: *Returns with his Sons, and recovers* Karazm. Khayuk *retaken by* Abdallah's *Troops. Bravery of a Prince.* Hajîm Khân *flies again: On* Abdallah's *Death returns to* Urjenz: *Reſigns the Crown.*

Doſt Khân.

AFTER the Death of *Din Mahamet Khân*, the *Uzbek* Princes choſe *Doſt Soltân*, ſecond Son of *Buzzuga Khân*, for his Succeſſor at *Khayuk*, rather than *Iſh Soltân*, the eldeſt Brother, becauſe, though couragious and generous, he was neither ſo wiſe nor moderate. He was ſuſpected alſo as to his Orthodoxy in Religion. *Iſh*, who took this very ill, applied to his Brothers for Aſſiſtance, to take *Urjenz:* But arriving with his Forces in the Territory of *Zilpuk*, which belongs to the Country of *Kumkant*, he found *Hajîm Soltân* ready to fight him, with a much ſuperior Army. Hereupon ſecuring his Men behind with a ſmall River, and with his Chariots in Front, *Hajim*, after an Attack of eight Days, was obliged to come to an Accommodation.

Iſh Soltân *takes* Urjenz,

SOME Years after, *Iſh Soltân* having formed a new Deſign againſt *Urjenz*, *Hajim* met him between that City and *Tûk*. *Iſh* covered himſelf, as before, with his Chariots; and having fought for ſeven Days againſt ſuperior Forces, paſſed-out of his Intrenchments ſilently in the Night, and ſeized *Urjenz*, to the great Surprize of *Hajim*. As ſoon as he found himſelf Maſter of the Place, he ordered all the *Vigûrs* and *Naymans* to retire to *Wazîr*, without any of their Effects; but let thoſe of other Tribes, ſettled there, remain.

AFTER this, each Party having endeavoured to ſecure *Ali Soltân*, who reſided at *Naſay*, in his Intereſt; that Prince declared in Favour of *Hajim Soltân*, whom he joined (accompanied with *Abul Soltân*, Son of *Din Mahamet Khân*) and beſieged *Urjenz*. *Iſh Soltân* defended himſelf well at firſt: But the Beſiegers at length giving a general Aſſault, while he was riding about from Poſt to Poſt, where his Preſence was neceſſary, a *Durman*, whoſe Siſter he had raviſhed, wounded his Horſe in the Flank with an Arrow. The Beaſt hereupon capered, and threw the *Soltân* ſo violently, that he broke one of his Legs; and the Enemy, who had ſcaled the Walls in the Interim, coming-up, ſlew him before he could be remounted.

Uzbek Khâns.

Revolutions.

AFTER this the Confederates took *Khayuk*, and put to Death *Doſt Khân*, Brother of *Iſh Soltân*, whoſe two Sons were ſent into *Great Bukhâria*; where dying without Iſſue, the Race of *Buzzuga Khân* became quite extinct. The aforementioned Revolution happened in the Year 1557 [b], called *Ghilki*, or *the Horſe*.

Hajim Khân.

THE ſame Year *Hajîm Soltân*, at the Age of thirty-five [c], was declared *Khân*, and went to reſide at *Wazîr*. As of all the Poſterity of *Amunak*, there were left only the Children of *Avanaſh Khân*, and *Akattay Khân*, they gave the Cities of *Urjenz*, *Hazaraſp*, and *Kât*, to *Ali Soltân*, youngeſt Son of the former [d]. Of the four remaining Sons of *Akattay*, *Mahmûd Soltân* lived with his Brother *Hajim Khân*; *Pulâd* and *Timûr* had *Khayuk* between them, with two *Turkmân* Tribes, for their Share [e].

Story of Timûr.

THESE two Brothers were both weak of Underſtanding. The ſecond, when he was Fifteen, taking a Ride, was invited-in by a Countryman, who killed a fat Sheep to treat him, and at his going away preſented him with a *Gigot* of it. At his Return, he went to offer it to his Father: But *Akattay Khân*, offended at the Occaſion, reproved him, ſaying, "That he was fifty Years "old, and had never put any-one to ſuch an "Expence: That if the Peaſants were obliged "to kill Sheep to treat him when he was young, "they muſt kill Horſes and Cows for him when "older; and that, as his Vaſſals would follow his "Example, the poor Subjects would ſoon be "reduced to Beggery." Hereupon ordering him to be ſtripped, he gave him thirty Laſhes with a Rod, laying-on ſo hard, that young *Timûr Soltân*'s Shirt was all bloody. His Brother *Hajîm* [f] meeting him as he came-out, approved of what his Father had done, but adviſed him to appear next Day in that bloody Condition be-

[a] Hiſtory of the *Turks*, &c. p. 280, *& ſeqq.* [b] *Hejrah* 965. [c] He was born in 1523. *Hejrah* 930.
[d] An Account has been given of him in the former Article. [e] Hiſtory of the *Turks*, as before, *p.* 267, *& ſeqq.* [f] *Hazîm*, or *Azîm Khân*, as *Jenkinſon* calls him.

fore

fore *Akattay Khân*; who repenting of his Severity, after exhorting him not to do the like again, made him a Preſent of the *Turkmân* Tribe of *Ti-u-azi*, conſiſting of ſix thouſand Families. Hereupon *Timûr* made an Oath never to go to eat with any-body, nor would he ſuffer any of his People to do ſo.

ON the Death of *Ali Soltân*, *Hajim Khân* went to reſide at *Urjenz*; his Brother *Mahmûd Soltân* continued at *Wazîr*; *Pulâd* had *Khayuk*; and *Timur*, *Hazaraſb* and *Kât*. Some Years after, while *Hajim Khân* was invading *Khoraſân*, *Abdallah*, *Khân* of *Great Bukhâria*, came with an Army to beſiege the Capital: But after loſing many Men, was obliged to retire into the Country of *Yanghiarik*, where he waited, ſecuring the Places he poſſeſſed on that Side, till more Forces arrived. But hearing *Hajim Khân* was returned with a great Army to fight him, he thought fit to make a Peace with *Pulâd* and *Timûr*, who were at *Khayuk*, and retired to his own Dominions.

SOME Time after, the *Soltân Khalifah* of *Rûm* [a], ſent an Ambaſſador to *Abdallah Khân*, to engage him to attack the Empire of *Sheykh Ogli* [b], with all his Forces, while he attacked him vigorouſly on the other Side. *Pialaſha*, who had ſpent three Years in the Voyage, going by Way of the *Indies*, was deſirous to return through *Karazm*, and croſs the Sea of *Mazanderân* [c] to *Shirwân*, then ſubject to the *Soltân* of *Rûm*, that ſo he might get to *Iſtambul* in four Months. But when he came to *Urjenz*, *Mahamet* and *Ibrahim*, Sons of *Hajim Khân*, ſtripped him of all, and then ſent him to *Mankiſhlak*, where ſome *Shîrwân* Merchants happening to be on their Return, they carried him over to that Province in their Barks.

To this firſt Cauſe of Complaint there was joined another. Thoſe of *Great Bukhâria*, who performed the Journey to *Mekka*, in Times of Peace always paſſed through *Karazm*, and the Dominions of the *Shâh* of the *Perſians*; but in War-time were obliged to go far-about, by the *Indies*. It happened, that ſome Merchants relying on the Peace, took their Rout through *Karazm*: But arriving at *Khayuk*, were ſtripped to their very Shirts by *Baba Soltân*, Son of *Pulâd*, and ſent home again on-foot. Theſe People, at their Return, going to complain to *Abdallah Khân*, he told them, he could do nothing in it; for that *Baba Soltân* was as much Sovereign at *Khayuk*, as himſelf could be in *Great Bukhâria*.

Uzbek Khâns.

Hereupon *Haji Kûtas*, Head of the Karawân, made Anſwer, "That he would be his Accuſer "before the Throne of God, in caſe he let go "unpuniſhed an Outrage done to the Deity "himſelf, in the Perſons of thoſe who went to "offer-up their Prayers to him at his Holy "Houſe."

A new Invaſion

THIS bold Remonſtrance, joined to a Deſire of Revenge for the Loſs of the four Towns taken from *Nûr Mahamet*, determined *Abdallah Khân* to make War againſt *Hajim Khân*. The News of his Preparations divided the *Uzbeks* of *Karazm*. One Party was for making a vigorous Reſiſtance, the other was for ſubmitting as ſoon as the Enemy approached *Urjenz*; on a Perſuaſion, that they would be employed by him, and well-treated, even though he ſhould carry them into *Great Bukhâria*. *Hajim Khân* finding by this, that he ought not to depend on his Subjects, left his Sons, *Mahamet* and *Ibrahim*, at *Urjenz*, and retired to *Duruhn* with his eldeſt Son *Siuntz Mahamet Soltân*.

By Abdallah Khân.

MEAN-TIME *Abdallah Khân* advancing with his Army, *Mahamet*, Son of *Timûr Soltân*, marched, with his *Uzbeks*, from *Hazaraſb* to *Khayuk*; deſigning to make it the Rendezvous of their Troops, as his Father had done in the former War, ſo as to baffle the Deſigns of *Abdallah*: But on his Arrival found *Pulâd Soltân* reſolved to quit the Town, and go to *Wazîr*. Hereupon they all ſet-out together, with a large Train of Men and Chariots (or Waggons) at Day-break. But at Noon, juſt as the laſt Troops paſſed-out of the City, thoſe of *Khojam-kuli*, one of *Abdallah Khân*'s Generals, entered at the oppoſite Gate; and next Day following the Confederate Princes, with thirty thouſand Horſe, on a great Trot, overtook them at the Borough of *Almatiſh Khân*, for they had not continued their March till the ſame Morning. At his Approach, they covered themſelves with their Chariots; but *Khojam-kuli* having forced that Barricade, after a vigorous Reſiſtance, put them to the Rout. As he loſt many Men in the Action, he did not purſue the Princes who retired to *Wazîr* [d].

The Princes enſnared

AT their Arrival, they reſolved to make Propoſals of Peace to *Abdallah Khân*, and drove from the City *Baba Soltân*, who had been the Occaſion of the War. Hereupon *Pulâd Soltân*, with his two other Sons, retired to *Hajim Khân* at *Duruhn*; while *Mahamet* and *Ibrahim*, *Hajim*'s Sons, repaired to *Wazîr*, to join the Con-

[a] That is, the Grand Signor, or Emperor of the *Turks*, who ſince the Suppreſſion of the *Khalifah* of *Egypt*, whom *Soltân Selim*, in 1516, carried to *Conſtantinople*, is qualified by the *Mohammedan* Princes of his Sect, with the Title of *Khalifah*, and aſſumes it himſelf. [b] That is, of the Sons of the *Sheykh*; meaning *Sheykh Sefi*, or *Iſmael*, King of *Perſia*, by Way of Contempt. [c] So they call the *Caſpian Sea*. Karazm *Kingdom.*

federates. Mean-time *Abdallah Khân*, appearing before that City, beſieged it in Form: But finding, after two Months Leaguer, that it would be difficult to come-off with Honour, he had Recourſe to Craft. He ſent to tell the Confederates, that ſince they had thruſt-out *Baba Soltân*, whom he had chief Cauſe to complain of, they might depend on being received by him as his Allies and Relations. The Princes deluded with theſe fair Promiſes, entered into a Capitulation with their Enemy; who, at their Requeſt, ſent five of his principal Lords, attended by forty Horſe, to ſwear, in his Name, not to meddle either with their Perſons, or Effects, and that he had no evil Intention againſt them.

By a treacherous Peace

AFTER taking the Oath, the common People (who were againſt the Princes truſting to ſuch weak Security) deſired that the five Lords might be arreſted, till ſuch Time as *Abdallah Khân* ſhould raiſe the Siege, and begin his March. But *Ali Soltân*, who had the chief Command in the City, and though little and crooked, was a great Wit, ſtrenuouſly oppoſed this Motion; alledging, that being the Monarch's near Relations, they had nothing to fear from him: That in caſe he ſhould carry them into *Great Bukhâria*, he would ſettle them more advantageouſly than they were in *Karazm*; but that far from ſuch a Deſign, he was perſuaded, *Abdallah*, on the firſt Application, would leave them in Poſſeſſion of *Urjenz* and *Wazîr*. Theſe Reaſons being approved-of by all the Men of Diſtinction, the People were obliged to be ſilent; and the Princes, accompanied with the *Bukhârian* Lords, left the City, to go to *Abdallah Khân*; who having put a Guard over them, and divided their Soldiers into Troops, of ten or twelve Men, one of whom was to be reſponſible for the reſt, he ſent them all Priſoners into *Great Bukhâria*, whither he followed with his Army, after having put Governors in all the Towns of *Karazm*; which thus fell into his Hands.

Are all put to Death.

A MONTH after this Event, *Hajîm Khân*, and the ten Princes of his Houſe who were at *Duruhn*, reſolved to retire towards *Shâh Abbas Maſi*; only *Pulâd Soltân*, third Son of *Akattay Khân*, thinking it would be very unbecoming of him, who was near ſeventy Years old, to go-look-for a Sanctuary among People of a different Religion, choſe rather to repair to *Abdallah Khân*, on a Preſumption, that he would pity his Condition, and give him a Subſiſtence. But he was deceived: For that Prince, on his Return to *Bukhâria*, cauſed him, and all the other Deſcendants of *Amunak*, being twelve, who had fallen into his Hands, to be put to Death, the ſame Day, in the Town of *Sagratz*, beſides ſome who were very young. After this he laid a yearly Tax of thirty *Tanga* a-head on all the other Priſoners above the Age of Ten; which conſtrained many to ſell their Children, in order to raiſe the Tribute.

Uzbek Kingdom.

Hajim retires to Perſia.

MEAN-WHILE *Hajim Khân* ſet-out for *Duruhn*, with the Princes, accompanied by three thouſand Horſe: But they deſerted ſo faſt on the Road, that he arrived, with a Train of no more than one hundred and fifty, at the Court of *Shâh Abbâs*, who came in Perſon to receive him, and gave him the beſt Treatment imaginable: But *Siuntz Mahamet Soltân*, and his Son, went-on to the *Soltân Khalifah* of *Rûm* [a]. This happened in the Year *Yilan*, or of *the Serpent*. Two Years after, in the Year *Koy*, or *the Sheep*, the ſame in which a Comet appeared, *Abdallah Khân* ſent before him his Son, *Abdal momin Soltân*, with Part of his Army, to beſiege *Eſfarayn* in *Khoraſân*. On this News, the *Shâh* left *Kazwin* with an Army, accompanied by *Hajim Khân*, and the other *Uzbek* Princes; who having learned, when they came to *Baſtâm*, that there were but ſixty of the Enemy at *Khayuk*, and forty at *Urjenz*, judged they might profit by ſuch Negligence. But as for Secrecy, this was to be done without the *Shâh*'s Knowledge, *Hajim Khân*, and ſome others declined it, for Fear of giving Offence to that Monarch; ſo that none but *Arab Mahamet*, and *Mahamet Kuli*, two of *Hajîm*'s Sons, and the three Sons of *Pulâd Soltân*, engaged in the Enterprize.

THEY took Horſe late one Evening, and riding all Night, arrived at the *Turkmân* Tribe of *Amîr*; and from thence, by Noon, at *Aſtarabâd* [b]. Next Morning *Hajim Khân*, having informed the *Shâh* of their Deſign, that Prince, who knew the Activity of *Abdallah Khân*, and the Improbability of recovering their Poſſeſſions, during his Life, adviſed him to ride after them immediately, and bring them back. *Hajim* overtook them at *Aſtarabâd*; but inſtead of bringing them back, they prevailed on him to continue with them, till he ſaw what Succeſs they ſhould have, the *Turkmâns* having promiſed a powerful Aſſiſtance. Departing from *Aſtarabâd*, they went towards the Mountain of *Kuran*, where the Tribes of *Taka* and *Yamut* lent them five hundred Men. Then croſſing the Territory of *Mankiſhlak*, whoſe Inhabitants had all removed to the Country of *Orda Kutuk* [c], they came to the

[a] Or, *Turky*, for the Reaſon already given, *p.* 492. note h. [b] In the Tranſlation, every-where *Iſtarabat*.
[c] Becauſe of the Quarrels they had with the *Mankats* (or *Kara-kalpaks*) on one Side, and with the Tribe of *Irſazi* on the other.

Tribe of *Irſari*, which granted them five or ſix hundred Men, and thence proceeded towards *Piſhga*.

SEPARATING in this Province, *Hajîm Khân*, with his two Sons, took the Road of *Urjenz*; and *Baba Soltân*, with his two Brothers, went to *Khayuk*. On the News of *Hajîm Khân*'s Approach, *Sari Oglân*, Governor of *Urjenz*, retired into the Caſtle. But the *Khân* having entered, by a Paſſage carried under the Wall in the Night, he put the Governor to Death, with his forty Men. The *Turkmâns*, after this, returned home laden with Plunder, leaving *Hajîm Khân*, and his Sons, almoſt alone at *Urjenz*. *Baba Soltân* had no leſs Succeſs, on the other Side; for as ſoon as he appeared before *Khayuk*, the *Sarts*, who dwelt in the City, opened the Gates to him: Whereupon he, in like Manner, ſlew the Governor, *Mengliſh-bey*, with his ſixty Men: Which coming to the Ears of the Commanders of *Hazaraſb* and *Kât*, they fled towrads *Great Bukhâria* [a].

TEN Days after, *Baba Soltân* having diſmiſſed all his *Turkmâns* likewiſe, except fifteen, went to *Hazaraſb*, with his Brother *Paluankuli*: But it being the Vintage-Seaſon, *Hamza* ſtayed at *Khayuk*, to drink his Swill of new Wine. Juſt as *Baba* entered *Hazaraſb*, he perceived two Officers advancing, on a ſmart Gallop, at the Head of an hundred and fifty Horſe. Suſpecting them to be Enemies, he endeavoured to ſhut the Gate; but had ſcarce cloſed one Side, before the firſt came-up, and endeavoured, with his Lance, to keep the other Side open. However, ſome of the Inhabitants running thither in the Nick of Time, they ſhut it alſo, and with their Arrows obliged the Enemy to march-off. In their Retreat, they took a *Sart*, who having informed them of *Hamza*'s Stay at *Khayuk*, they turned on that Side, and arrived there next Day at Noon, while the *Soltân* was taking the Air: But not daring to uſe Force with ſo few Men, they lay concealed till the Evening; when Aſſiſtance coming to them, they made a Paſſage into the Town under one of the Gates; at which having entered, they put all to the Sword: An Event that much diſconcerted the Affairs of *Baba Soltân*.

To underſtand who theſe Troops were, it muſt be obſerved, that *Abdallah Khân*, having ſent *Khojam-kuli* to ſupport his Son *Abdalmomîn Soltân*, while he followed leiſurely to take the Diverſion of catching Water-Fowl beyond *Zarâi*, in *Gordiſh*; on the Road met the Commander of *Hazaraſb*, who having informed him what had paſſed in that City, he ſent him with the News to *Abdallah Khân*, who ordered him to march in haſte towards *Khayuk*, promiſing to follow cloſe with his whole Army. Hereupon *Khojam-kuli* turned towards that City; but found, at his Arrival, that the Work had been already done by his Van-Guard; which determined him to march for *Urjenz*. Uzbek Khâns.

MEAN-TIME *Mahamet Kuli Soltân*, *Hajîm Khân*'s third Son, a Prince of much Courage, having heard of his Couſin *Hamza*'s Death, kept it very ſecret, reſolving to go and join *Baba Soltân* at *Hazaraſb*. He took with him ſome truſty *Turkmâns* and *Jagatays* [b], with two hundred *Uzbeks* newly eſcaped from *Bukhâria*. He began his March by the River of *Urjenz*: But coming near the little Town of *Zilpuk*, he found himſelf of a ſudden ſurrounded by the Troops of *Khojam-kuli*; who imagining the *Soltân* could not poſſibly eſcape him, ordered his Officers to take him alive. But *Mahamet Kuli* forming one large Squadron, with his Men ruſhed headlong on one of the Enemies Wings, and breaking through them, retired into the Country of the *Mankats* [c]; where he tried to draw *Kuzuk Khân* into his Intereſt, by propoſing to marry his Siſter: But that Prince fearing *Abdallah Khân*'s Reſentment, in caſe he gave *Mahamet Kuli* Protection, had him arreſted, and ſent to the *Ruſſians* [d], where he ſoon after died. *Bravery of a Prince.*

HAJIM KHAN being informed of what had happened, left *Urjenz*, accompanied by his Son *Arab Mahamet*, and ſome Soldiers, deſigning to go to *Mankiſhlak*. But the Enemy having overtaken him the third Night after their Departure, he was obliged to fight with them; and being worſted, endeavoured to retire. The Enemy continuing ſtill to follow him, he was forced, next Morning, to a new Engagement, in which he loſt more than half of the few Men he had with him: So that he was conſtrained, once more, to take Refuge at *Aſtarabâd*, from whence he repaired to the *Shâh* at *Kazwîn*. *Abdallah Khân* went in Perſon to beſiege *Hazaraſb*; and having taken it, cauſed *Baba Soltân*, and his fifteen Men, to be ſlain. After which he returned into *Great Bukhâria*, where he died [e] the laſt Day of the Year 1597, called *Tauk*, or *the Hen*. HajîmKhân *flies again*

ON the News of his Death, *Shâh Abbâs Maſi* having gathered a great Army, came next Year and encamped near *Baſtâm*. There *Hajîm Khân* intreated the *Shâh* to let him take a Turn towards *Bukhâria*, to try if *Abdal Momîn*, who had ſucceeded his Father, would reſtore him one *On* Abdallah's *Death*,

[a] Hiſtory of the *Turks*, &c. p. 296, *& ſeqq.* [b] Theſe were the old *Mongols*, who came with *Jagatay Khân* into theſe Parts, from whom they took the Name. *Turkiſtân.* [c] Or, *Karakalpaks*, who poſſeſs the Weſt Part of [d] *Urus's* in the Original. of

Karazm Kingdom.

of his Towns, that he might end his Days in a Quiet. *Shâh Abbâs* having given his Conſent, he departed, accompanied by *Arab Mahamet Soltân*, and his Grandſon *Iſfandiar Soltân*, with a Retinue of fifteen Perſons, leaving *Burandu*, Son of *Ibrahîm Soltân*, behind: But having loſt his Way the ſecond Stage, he found himſelf at length near the Mountain *Kuran*, when he thought he was about *Marû*. As this Miſtake embarraſſed him extreamly, he reſted there that Night, to conſider what he had to do: But going, at Sun-riſe, to ſit in the Shade to ſay his Prayers, becauſe it was Midſummer, he ſaw two *Naymans* on Horſeback coming from towards *Yaurſurdi*; who, at their Approach, wiſhed him long Life, and informed him, that *Abdallah Momîn Khân*, in his Way from *Khoraſân* to his own Dominions, was ſlain at *Zamin* [a], by his own People, and that they came in Search of him, to bring him the News.

Returns to Urjenz.

HAJIM KHAN, rejoiced at theſe Tidings, made haſte to *Urjenz*, where he arrived in eight Days, and found the City without Governor, or Gariſon: For in the Confuſion which the Affairs of *Great Bukhâria* fell-into, after the Aſſaſſination of their *Khân*, the Enemy withdrew out of *Karazm*. *Hajim* kept *Urjenz* and *Wazîr*; he aſſigned *Khayuk* and *Kât* to his Son *Arab Mahamet*, and gave *Iſfandiar*, his Grandſon, *Hazaraſb*. Soon after, the *Uzbeks* made Priſoners by *Abdallah Khân*, took the Opportunity to return home; as did, in the third Year, *Siuntz Mahamet Soltân*; at whoſe Arrival from the Lands of *Rûm* [b], his Father reſigned the Dignity of *Khân* in his Favour, and retired to live at *Khayuk*, with *Arab Mahamet Soltân*. But that Prince did not long enjoy the Sweets of reigning: For he died a Year after his Return to *Urjenz*, and his Son *Abdallah Khân*, who ſucceeded him, lived but another Twelve-month. At length *Hajim Khân* died, in the Year 1602, called *Bars* [c], or *the Tiger* [d].

Reſigns the Crown.

4. *The* Reign *of* Arab Mahamet Khân, *and* Iſfandiar Khân.

Arab Mahamet Khân. *Invaſions by* Koſaks, *and* Kalmûks. *Plots againſt the* Khân: *Two of his Sons riſe in Rebellion: Matters accommodated: Rebel a ſecond Time.* Abu'lghâzi Soltân's *Propoſal to kill them: The* Khân *marches againſt his Sons: Is taken Priſoner: Slain by* Ilbars. Iſfandiar's *Attempt defeated by Perjury: Yet he recovers* Karazm.

ARAB [e] *MAHAMET KHAN* ſucceeding his Father, added *Kât* to his Son *Iſfandiar*'s Portion. Six Months after, while he was paſſing the Summer on the Banks of the River *Amû*, the *Ruſſians* of *Jaîk* [f] knowing there were no Soldies in *Urjenz*, during that Seaſon, came with a thouſand Men; and after they had killed a thouſand of the Inhabitants, loaded as many Chariots with the moſt valuable Effects, burning what they could not carry-away, and marched-off with a thouſand Females. The *Khân* being informed of this in Time, went to cut-off their Retreat at a certain Defile, which he ſo well intrenched and paliſaded in haſte, that the Enemy could not force him, till after an Attack of two Days: However, they were obliged to leave all their Booty behind. Mean-time the *Khân*, who did not deſign to let them eſcape him ſo cheaply, having gotten the Start of them by croſs Roads, went to wait for them at another Paſs: Which the *Ruſſians* not being able to force, and Water beginning to fail, ſo as they drank the Blood of their Slain, they made a laſt Effort; which ſucceeded ſo ill with them, that ſcarce an hundred Men eſcaped. Theſe made-over to the River *Kheſel*, where they built a Cabin a good Way beyond *Tûk*, and there lived by Fiſhing, waiting an Opportunity to get-back: But five Days after, the *Khân* being informed of their Abode, ſent Men there, who ſlew them all.

Six Months after, a thouſand *Kalmûks* [g] came to ſurprize ſome *Uzbeks*, who dwelt along the *Kheſel* towards *Kât*, and having killed a great Number of them, were, on their Return, loaden with Booty and Priſoners. But *Arab Mahamet Khân* being informed thereof, purſued them ſo briſkly, that they had much-ado to eſcape him, after leaving all which they had taken behind them.

Some Time after the *Naymans*, who never reliſhed well the Government of this *Khân*, brought ſecretly into *Khayuk*, *Khiſſeran Soltân*, deſcended of *Ilbars Khân*, with a Deſign to kill *Arab Mahamet*, and ſet the other up in his Room. But the *Khân* having timely Notice of the Plot, had the *Soltân* ſeized, and put to Death. As for *Safi Mirza*, the chief Conſpirator, his own Brother, *Baba Mirza* killed him, as a Perſon unworthy to live after ſuch an Offence. Two Years after, *Saſh Mirza*, with twenty *Vigûrs* went from *Urjenz* to *Samarkant*, and fetched from thence *Seleb Soltân*, a Deſcendant of *Hoſankuli Khân* [h]; whereof the *Khân* being informed, he went forthwith to *Urjenz*, and

[a] Or, *Zam*, on the River *Amû*. [b] Or, *Turkey*. [c] Or, *Pars*. See the *Tartar* Cycle, *p.* 400. [d] H

the new Pretender to Death, without enquiring a farther after his Accomplices, who, he ſaid, might have been innocently drawn into the Plot.

TEN Years after, a thouſand *Kalmûks* having invaded *Karazm* on the Side of *Bakirgan*, plundered many Habitations, and returned with a great Number of Priſoners, in Spite of all the Pains that was taken to purſue them.

ARAB Mahamet Khân had ſeven Sons by ſeveral Wives, *Iſfandiar Soltân*, *Habaſh*, *Ilbars*, b *Abu'lghâzi Bahâdur*, *Shaûf Mahamet*, *Karazm Khân Soltân*, and *Augan*. After that Prince had reigned peaceably for fourteen Years, one Day, when he was gone to *Urjenz*, ſeveral young Men perſuaded *Habaſh* and *Ilbars* (the one ſixteen, the other fourteen) to go with them from *Khayuk* to *Urjenz*, that they might be received in Quality of their Father's Succeſſors. Being advanced to a Fountain in the Country of *Piſhga*, (only one Day's Journey from that City) where c they ſtaid ten Days, the *Khân* ſent for them to come to him, and to tell them, that he would give them *Wazir* for a Portion. Their Anſwer was, that they would come as ſoon as their Men were gotten together. *Arab Mahamet* might have quaſhed this Sedition at once, by only publiſhing his Orders, that none ſhould join the Princes, for he was much feared by his Subjects: But neglecting this Precaution, though at the ſame Time he knew many went to ſee them, the Peo- d ple imagined what they did, was by his own Conſent.

THE young *Soltâns* judging themſelves ſtrong enough, made an Irruption into *Khoraſân*; from whence they returned to their firſt Camp loaden with Plunder, and ſent two *Perſians* as a Preſent to their Father. After this they diſmiſſed all their Troops, excepting fourſcore Men. Hither the *Khân* ſent again a *Vigûr* Lord, to exhort them to come before him: But the *Uzbeks* between the e Countries of *Darugan* and *Bakirgan*, who had joined them, anſwered, that the Princes had no occaſion to go to their Father, and that they had nothing to do with him. As this Language foreboded a Rebellion, the *Khân* being ſeized with Fear, departed inſtantly for *Khayuk*. Hereupon the two Princes went anew to ravage the *Perſian* Territories; and at their Return ſeizing their Father's Granaries, diſtributed the Corn among their Troops, which increaſed them conſiderably. Wheat was then ſo cheap, that two hundred Weight might have been had for a *Tanga* for nothing but that Grain was ſown from the ſmall Town of *Modekan*, to this Side of *Bagan*, and as far as the Country of *Kuigan*.

The *Khân*, who poſſeſſed a great Extent of Land on that Side, cauſed the *Kheſel* to be cut behind *Tûk*, and by Means of that Opening with ſeveral Canals, watered his Lands. After which the Opening being ſhut, the River reſumed its Courſe to the Sea of *Mazanderân*. Uzbek Khâns.

ARAB MAHAMET finding the Mutineers multiply daily, came to an Agreement with his Sons, giving-up to them *Wazîr*, and all the *Turkmâns* depending on it. After which, the two Princes, followed by four thouſand Men, went to *Khayuk*, to ſalute their Father.

FOUR Years after, *Ilbars Soltân* aſſembled Troops near *Wazîr*, under Pretence of going to beſiege *Yaurſurdi*: But hearing the *Khân* was on the Road to *Urjenz*, he went and took *Khayuk*. *Arab Mahamet* being informed of this Surprize, turned back, by Advice of his Lords, who were of Opinion, that on his Approach *Ilbars* would quit the City. But being come to *Khaſgan*, a little Town near that Place, the *Soltân* ſent thither five hundred Men, who entring in the Night, ſeized him, and all his Retinue. From thence being carried to *Khayuk*, *Ilbars* detained them all as his Priſoners, and diſtributed among his Troops all the Money his Father had been hoarding for many Years, as well as the Effects of the Captive Lords [a]. The other Brothers being informed of that deteſtable Action, reſolved to make War on *Ilbars*, even *Habaſh* himſelf offered to accompany them: But they were diverted from that Purpoſe by ſome of their Lords, who judged that ſuch a Proceeding might put their aged Father's Life in Danger; while *Ilbars*, if let alone, would releaſe him of his own Accord; as ſhortly after it came to paſs. *Rebel a ſecond Time.*

THE *Khân* being come back to *Urjenz* with his Son *Iſfandiar*, they reſolved to ſeize *Ilbars Soltân*; but he diſcovering their Deſign, fled to the Deſart with only five or ſix Men: However, they ruined his Habitations, and tranſplanted the greater Part of his Subjects. At their Return from this Expedition, *Abu'lghâzi Soltân* propoſed to go-kill his Brothers *Habaſh* and *Ilbars*, who ſtill cloſely correſponded, as the only Way to ſecure his Father's Life: But the *Khân* would determine nothing till he had conſulted *Zin Haji*. *Abu'lghâzi* returning at the Time appointed, and finding that Lord did not approve of his Propoſal, put his Father in Mind how he had been deceived before, by *Zin Haji*'s magnifying the f Forces of thoſe Princes to whom he was ſent on their firſt Revolt; which had obliged him to retire to *Khayuk*, when he might eaſily have ſeized them, but for that falſe Repreſentation [b]. He added, that as every-body elſe he had conſulted, *Abu'lghâzi Soltân's Propoſal to kill them.*

[a] Hiſtory of the *Turks*, &c. p. 312, *& ſeqq.*

[b] *Abu'lghâzi Soltân* ſhould have made-uſe of this Argument before, when his Father propoſed conſulting *Zin Haji*, in order to have diſſuaded him from that Deſign.

Karazm *Kingdom.*

approved of his Deſign, except *Zin Haji*, it confirmed him in the Opinion he had all along entertained, that he and his Brother *Kurbauk* were Traitors; and held a criminal Correſpondence with *Ilbars*, by Means of their two other Brothers, who were the moſt intimate Confidents of that Prince. In ſhort, he told his Father, that if he did not follow his Counſel, he would repent it when it was too late.

The Khân *marches*

FOR all this, the *Khân* refuſed to enter into his Meaſures; nor would *Iſfandiar Soltân* join with him. Mean-time, *Habaſh* being informed, by one of their Spies, of *Abu'lghâzi*'s Project, never forgave it him. Five Months after, *Arab Mahamet Khân* beginning to repent his not having followed the Author's Advice, ſent Orders to *Iſfandiar Soltân* and him, to join him immediately, with their Troops, at *Khayuk*. In the Interim he ſent to tell *Habaſh* and *Ilbars*, that as they had ten Perſons about them, who never ceaſed giving them evil Counſel, in caſe they delivered them up to him, he could pardon all that was paſt; otherwiſe, he would own them no longer for his Children. Upon their Refuſal, the *Khân* advanced with his Troops to *Kandum*, a Borough not far from *Khayuk*, where he waited for his Sons. *Abu'lghâzi*, leaving his Men to follow leiſurely, rode before [a]; and being come to *Kandum*, propoſed to his Father to march along the right Side of the River; while he, with his eight hundred Men, ſhould oblige the *Turkmâns*, who incamped in the Deſart, and were more than half of them his Subjects, to join him; reſolving to deſtroy thoſe who belonged to his Rebel Brothers, in caſe they refuſed: For, without their Aſſiſtance, they could not raiſe four hundred Men. But the *Khân* not approving of his Advice this Time neither, as ſoon as *Iſfandiar* arrived with his Troops, they proceeded. When they were entered into the Country of *Ikzi Kumani*, *Abu'lghâzi* ſet-upon his Father once more to make a Diverſion among the *Turkmâns*; but to as little Purpoſe as before. In ſhort, having advanced by ſlow Marches as far as the little Canal called *Taſhli Ghermiſh*, the two Princes, who had Time enough given them to get all their Forces together, came and charged their Father ſo vigorouſly, that his Men began preſently to fly, and left the unfortunate *Khân* a ſecond Time Priſoner in the Hands of his unnatural Sons [b].

Againſt his Sons,

Is taken Priſoner,

IN this Battle, which was very bloody, *Abu'lghâzi Soltân*, being hemmed-in by forty Men, was brought-off by ſix of his own, who came to his Relief in the Nick of Time. On this Occaſion he received a Shot with an Arrow in the Mouth; ſo that he was obliged, afterwards, to have ſome little Bone of the Jaw taken-away on the fractured Side. After this, he made towards a River, which he was obliged to croſs by Swimming; but had ſcarce got-off his Coat of Mail, before the Enemy came running after him, and crying, Kill! kill! Hereupon plunging into the Stream, which was very rapid, he, with Difficulty, eſcaped Drowning, by giving the Horſe his Head, and holding faſt by the Main. Having gotten over with three of his Men, he took the Road to *Kât*, where he found ten more; and with them retired into *Great Bukhâria*, to *Imâm Kuli Khân* (the Succeſſor of *Ab'dol Momin Khân*) who received him very kindly at *Samarkant* [c].

ISFANDIAR SOLTAN having retreated to *Hazaraſb* with his Brothers *Sharîf Mahamet* and *Karazm Khân Soltân*, *Ilbars* and *Habaſh* came and beſieged them: But, at the End of forty Days, coming to an Accommodation, *Iſfandiar* retired to the *Shâh* of *Perſia*'s Court, under Pretence of making a Pilgrimage to *Mekka*, leaving the City in Poſſeſſion of *Sharîf Mahamet Soltân*, who, four Months after, retired into *Great Bukhâria* to his Brother *Abu'lghâzi Soltân*. *Karazm*, by his Departure, falling intirely into the Hands of *Ilbars* and *Habaſh*, they divided it between themſelves: The firſt had *Khayuk* and *Hazaraſb*; the latter *Urjenz* and *Wazîr*, with their Dependencies. They aſſigned their Father the little Town of *Kumkala*, to live there with his three Wives and two youngeſt Sons: But a Year after, *Ilbars* having ſent for his Father and two Brothers, cauſed him to be put-to Death with *Karazm Khân Soltân*, and ſent *Augan Soltân* to *Habaſh* with the ſame Intent. This latter, without whoſe Knowledge all the reſt had been done, unwilling to imbrue his Hands in the Blood of his Brother, had him conveyed to *Ruſſia*, where he died. As to the two Sons of *Iſfandiar Soltân*, who were both Infants, *Ilbars* had them educated at *Khayuk*. *Arab Mahamet Khân* loſt his Life in the Year 1621 [d], called *It*, or *the Dog*, after having reigned twenty Years.

THE News of the *Khân*'s Death having reached the *Perſian* Court, the *Shâh* gave *Iſfandiar Soltân* three hundred choſen Men, to try if he could recover his Father's Dominions. Having been joined on the Road by an hundred and ſeven *Turkmâns*, of the Tribes of *Taka* and *Yamut*, he advanced directly to the Camp of *Habaſh Soltân* near *Tûk*; but found him not there. That Prince was then feaſting at the Houſe of one of his Lords, when hearing of a ſudden the Trumpet ſound (which is forbidden on any Account, except the Approach of an Enemy) he inſtantly re-

[a] He left *Kât* in the Morning: He came to *Kandum* late in the Evening. [b] Hiſtory of the *Turks*, &c. 319, *&* *ſeqq.* [c] The ſame, *p.* 333, *&* *ſeqq.* [d] *Hejrah* 1031. The Author of the *Deſcription of Countries bordering on the Euxine, and Caſpian Seas*, at the End of *Tavernier*'s Travels, mentions this Event with ſome little Variation.

Uzbek Khâns.

Horſe, and fled to *Ilbars Soltân*. After this, all those who had any Regard for the Memory of the late *Khân*, as well as ſuch as were the Subjects of his other Sons, came and joined *Isfandiar*, whoſe Affairs were taking the beſt Turn imaginable, when the Artifice of one *Naſar Khoja* intirely changed the Face of them.

THIS Perſon, deſcended from a holy Man, called *Saghidata*, being devoted to *Ilbars*, who had married his Daughter, as ſoon as he ſaw the Storm riſing, ſent to bid his Son-in-law take Courage, and tell him, that he would be with him in two Days, with all the Men he could get together. To this End, arming fifty Men, in Haſte, he went and ſeized the Ford of the River *Kheſel* on that Side, in order to prevent any from paſſing who had a Mind to join *Isfandiar*. After which he took the *Korân* in his Hands, and began to curſe that Prince aloud, giving-out, that he had embraced the *Perſian* Sect, and that wherever he came, he put-to the Sword all the Men, and condemned the Women and Children to Slavery. As he backed all this with the ſolemneſt Oaths, many of the common People (who could not believe, that a Man of his Birth would violate the moſt ſacred Laws purpoſely to impoſe on them) inſtead of repairing to *Iſfandiar*, as they at firſt deſigned, went over to the two Uſurpers.

ILBARS and *Habaſh*, by this Means, ſoon found themſelves in a Condition to go in Queſt of their eldeſt Brother: And the two Armies meeting, *Isfandiar* was forced, after a bloody Action, to retire towards *Mankiſhlak*. However, in that Place being joined by three thouſand *Turkmâns*, and a great Number of *Uzbeks*, who began to be weary of the Government of the two Princes, he went back again; and his Brothers having advanced to meet him, with a conſiderable Army, they continued fighting for twenty-two Days ſucceſſively: But, at length, *Isfandiar* gained the Victory; and having taken his Brother *Ilbars* Priſoner, cauſed him forthwith to be put-to Death. *Habaſh Soltân* took Refuge with *Sharnik Mirza*, a Lord of the *Mântats*[a], on the River *Yem*, hoping a good Reception from the Chief of that Tribe; in Return for having ſent back all the *Mankat* Priſoners within his Domains, when he reigned at *Urjenz*: But that Lord deteſting his Perfidiouſneſs, cauſed him to be arreſted, and ſent him to his Brother, who had him executed, without Delay, in the Year 1622 [b], called *Tongûz*, or *the Hog* [c].

5. *The* Reigns *of* Arab Mahamet Khân, Isfandiar Khân, *and* Sharîf Mahamet Khân.

Partition of the Towns. Plot againſt the Turkmâns. Vigûrs *and* Naymans *ſlain: Stand in their Defence. New Attempt againſt the* Turkmâns. *The* Uzbeks *defeated.* Abu'lghazi's *Valour. The People deſerting, he returns to* Turkeſtân: *Goes thence to* Samarkant: *Returns to* Karazm. Uzbeks *maſſacred.* Abu'lghâzi *ſeized, and ſent Priſoner to* Perſia. Sharîf Mahamet Khân.

THE News of this Event coming to the Ears of *Abu'lghâzi*, and *Sharîf Mahamet*, at *Samarkant*, they took Leave of *Imâm Kuli Khân*, and returned to *Urjenz*. At their Arrival they cauſed *Isfandiar* to be proclaimed *Khân*, and divided the Dominions of their Father among them. The *Khân* had, for his Share, the Cities of *Khayuk*, *Hazaraſb*, and *Kât*; *Abu'lghâzi Soltân*, *Urjenz*, with its Dependencies (being then juſt nineteen Years old) and *Sharîf Mahamet Soltân*, *Wazir*. *Partition of the Towns.*

THE Year after, all the principal Subjects of *Isfandiar Khân* having gone in Autumn to pay their Court to him, *Abu'lghâzi Soltân*, before he ſet-out, invited *Sharîf Mahamet*, with three of his Sons, to his Houſe; and, in Preſence of two of his own Vaſſals, aſked him, if there was not ſome Animoſity between him and the *Khân*. On his anſwering in the Negative, he enjoined all the ſix to Secrecy by Oath; and then told them, he could not comprehend what his Brother meant by keeping the *Turkmâns* about him a whole Year; that, poſſibly, his Deſign was, to deſtroy all the *Uzbeks* about *Khayuk*, for having always favoured *Ilbars Soltân*, in which Caſe he would be ſure to demand Help of them: That, therefore, the beſt Courſe they could take was, not to go to *Khayuk*, which might divert his Intention: But that if they muſt needs go thither, it was his Advice, to kill all the *Turkmâns* they ſhould meet on the Road; and then preſent themſelves before the *Khân*, with Ropes about their Necks, to implore Pardon; excuſing themſelves on the uſual Treachery of that People, and the great Occaſions of Complaint they have had againſt them in Times paſt. But *Sharîf Mahamet Soltân* not approving of ſuch a Proceeding, propoſed killing *Isfandiar Khân* himſelf, and cauſing *Abu'lghâzi Soltân* to be proclaimed in his Room. *Plot againſt the* Turkmâns.

THIS Propoſal was approved by four of the Lords: But *Kurban Haji*, a *Vigûr*, and one of *Abu'lghâzi*'s Vaſſals, not ſatisfied with rejecting

[a] Nicknamed *Kara-kalpaks*. [b] *Hejrah* 1032. [c] Hiſtory of the *Turks*, &c. p. 324, *&* *ſeqq*.

Karazm *Kingdom.*

Vigûrs *and* Naymans *ſlain,*

it, declared, that if ever he heard any more a Mention of ſuch a Plot againſt the *Khân*'s Life, he would impeach them. So blunt a Declaration having broken their Meaſures, they went to *Khayuk*: But four Days after, being about to return, *Isfandiar Khân* cauſed *Abu'lghâzi* to be arreſted, and all the *Vigûrs* and *Naymans* who were then in the City, to the Number of five hundred, to be put to the Sword. On this Occaſion an hundred *Uzbeks*, of other Tribes, were ſlain, although he had forbidden that any of them b ſhould be touched. In like Manner, the Troops which were ſent to deſtroy all about *Khayuk* belonging to thoſe two Tribes (whom he was determined to root-out) contrary to his Orders, ſlew all the *Uzbeks*, who dwelt from *Hazaraſb* as far as the high Stone-Tower where the River *Amû* divides in two Arms [a], not ſparing the very Infants at the Breaſt.

THE *Khân*, after this, ſent *Sharîf Mahamet Soltân* to *Urjenz*, with Orders to cauſe the c Throats to be cut of all the *Vigûrs* and *Naymans* depending on that City. Whereupon thoſe People gave him to underſtand, that they were reſolved not to ſuffer themſelves to be maſſacred without ſelling their Lives dear: But that they were ready to quit the Country, or receive *Abu'lghâzi Soltân*, and *Mahamet Saynbeg* (one of the *Khân*'s moſt truſty Servants) to have an Eye over their Conduct. Theſe Propoſals appearing reaſonable to *Sharîf Mahamet*, he ſent them to d the *Khân*, who pitched-on the laſt Expedient. *Abu'lghâzi Soltân* being arrived, went and reſided on the Side of the *Kheſel*, whither *Sharîf Mahamet* repaired to him, with eighty *Turkmâns*, who went-over to *Mahamet Saynbeg*, as ſoon as he arrived. Mean-time thirty of the moſt conſiderable of the *Uzbeks*, beyond the River, came to welcome him, and offered him a thouſand choice Men to be employed in his Service againſt *Isfandiar Khân*. On this Occaſion, they propoſed to begin by ſlaying *Mahamet Saynbeg*, and his eighty Men; becauſe they looked-on the *Turkmâns* as the only Authors of the late Maſſacres of their Brethren; and then marching to beſiege *Khayuk*, would put to the Sword all ſuch of that Nation as they found in its Neighbourhood.

Stand on their Defence.

New Attempt

BUT this Project appeared impracticable to *Abu'lghâzi Soltân*, who knew that the *Turkmâns* would be ſo much on their Guard, that on the f leaſt Motion of the *Uzbeks*, they would take Flight; ſo that before they could reach *Khayuk*, all the reſt of them would be removed, with their Effects; and what was worſe, the *Kalmûks*, in their Abſence, would come and carry-off their Wives and Children. He was therefore of Opinion, that they ſhould treat *Mahamet Saynbeg*, and his Men, kindly, and ſend them back loaden with Civilities, in order to lull the *Khân* aſleep: That after this *Sharif Mahamet* ſhould go paſs the Winter in the little Town of *Kayuk*, near *Urjenz*; whilſt the *Uzbeks*, beyond the River, ſet-about making an Intrenchment for their Security, as if in Dread of the *Kalmûks*: That they ſhould place Guards along the two Roads leading to the Country of thoſe *Tartars*, as though to obſerve what paſſed; and that in Spring a Man ſhould come running full Speed from thoſe Centries, with News of a *Kalmûk* Invaſion: That on this Advice they ſhould aſſemble Troops, under Pretence of going to meet the Enemy: But in the Way joining *Sharif Mahamet*, they ſhould turn of a ſudden towards *Khayuk*, ſurprize that City, where there could not be then above ſixty Men about the *Khân*, and put all the *Turkmâns* to the Sword.

THE *Uzbeks*, however, had no Mind to depart from their Deſign upon *Mahamet Saynbeg*, and his *Turkmâns*: But they finding it out, retired after Night-fall, when every-body was gone to reſt. The *Uzbeks* arriving ſoon after, *Abu'lghâzi Soltân* told them, that as the ſhorteſt Follies are the beſt, his Advice was to ſend to aſſure the *Khân*, that they knew not the Reaſon of *Mahamet*'s ſudden Departure; and that if they had deſigned him any Harm, they could eaſily have prevented him. But this Advice was not reliſhed by his Brother, and the *Uzbeks*, who inſiſted that they had no other Meaſures to take, but march to *Khayuk*. Arriving in two Days at the Bridge of *Taſh-kupruk*, in the Country of *Khika*, they halted there forty Days, and killed ſome *Turkmâns*, the reſt retiring to that City [b].

MEAN-TIME the *Kalmûks* having ſurprized e one Part of the *Uzbek* Camp, and carried a great Number into Slavery, many of them deſerted the Army, beginning to have a bad Opinion of their Succeſs. On the News of this Revolt, the *Turkmâns*, who dwelt about the Mountain of *Abu'lkhân*, and at *Mankiſhlak*, joining *Isfandiar Khân* at *Khayuk*, he took the Field in his Turn, and encountering the *Uzbeks* in the Place above-mentioned, entirely defeated them. *Abu'lghâzi Soltân* ſeeing the Battle loſt, retired with five f hundred and forty of his Men, into the Intrenchment, which they had raiſed to cover their Baggage. In the Evening *Isfandiar Khân* drew near; but the *Soltân* ſallying on-Foot at the Head of five hundred Men, gave him ſuch a

[a] One of the Arms, called *Tokay*, paſſes by that Tower: The other, which is greateſt, having quitted its old Bed, runs by a large Channel into the *Kheſel* near *Tâk*; which had rendered *Urjenz*, when the Author wrote, no better than a Deſart. [b] Hiſtory of the *Turks*, &c. p. 334, *&* *ſeqq.*

warm Reception, that he durſt not make a ſecond Attempt, intrenching himſelf at ſome Diſtance. After they had looked on one-another in this Manner for ſix Days, without daring to engage, they came the ſeventh to an Accommodation, which the *Khân* had ſet on-Foot only with a View to draw *Abu'lghâzi* into the open Field, where he propoſed to demoliſh him: But miſſed of his Aim, in regard the *Turkmâns* had gone to pillage the Borough of *Khanaka*, inhabited by the *Sarts*, juſt at the Time his Brother paſſed-out of his Intrenchment. However, at their Return, he purſued him with five thouſand Men. The *Soltân* ſuſpecting his Deſign, formed in haſte an Incloſure with his Chariots, and defended himſelf ſo well, that the *Khân* was obliged, at laſt, to come to a ſecond Treaty. After this *Abu'lghâzi*, and his Brother *Sharîf Mahamet*, taking up their Abode at *Urjenz*, all the *Uzbeks*, who dwelt before on both Sides of the *Amû*, came to ſettle about that City.

SOME Time after, a Comet having appeared in the Sky, the common People, who were perſuaded, conſidering the extraordinary Animoſities which reigned among their Princes, that it portended ſome great Calamities, went-off by Troops, which they called *Top*, *Top*, into other Countries. Nor was it in the Power of *Abu'lghâzi Soltân* to reſtrain their Flight: For while he ſent after the Party which went-out on one Side, two or three others withdrew another Way; ſome ſeeking Shelter in *Great Bukhâria*, others in *Turkeſtân*, with the *Kaſats* [a] and *Mankats*: So that having thus, in a Month's Time, loſt three conſiderable Troops of his Subjects, he was conſtrained to retire elſewhere, to avoid lying at the Mercy of *Iſfandiar Khân*. *Sharîf Mahamet Soltân*, who was in the ſame Caſe, went to *Great Bukhâria*: But *Abu'lghâzi Soltân* retired towards the *Kaſachia Orda*, and went to viſit *Iſhîm Khân* at *Turkeſtân*.

THREE Months after, *Iſhîm* going to *Taſhkant*, to pay his Reſpects to *Turſum Khân*, the reigning Prince of thoſe Provinces, preſented *Abu'lghâzi* to him; mentioning the Obligations which they owed his Houſe, on Account of the Protection given many of their Relations, who had fled to *Karazm* for Refuge. Hereupon *Turſum Khân* received him at his Court, and treated him with much Diſtinction. But two Years after, *Iſhîm* having maſſacred the *Khân*, and all thoſe of the *Kataguns* who were his ancient Subjects, *Abu'lghâzi* ſeeing there was no leſs Diſcord between their Families, than there was in his own, went into *Great Bukhâria*. On his Arrival, he found a very cold Reception from *Imân Kuli Khân*, becauſe he had applied firſt to *Turſum Khân*, who was his Enemy. *Uzbek Khâns.*

FOR this Reaſon he told the *Uzbeks*, who had retired thither before him, that he ſhould be obliged to hearken to the *Turkmâns*, who promiſed to eſpouſe his Intereſt to the utmoſt, provided he would forget what was paſt. The *Uzbeks* upon this aſſured him, that though they had retired from him at the Appearance of the Comet, yet he might always depend on their Zeal for his Service: That on the other hand they flattered themſelves, that he would continue his Protection to them; of which they ſaid they had the more Need, as they could not depend on the Promiſe of his Brother *Sharîf Mahamet Soltân*, who was naturally unconſtant, and might, one Time or other, ſide with the *Turkmâns* againſt them. Laſtly, they adviſed him to go-over to the *Turkmâns* on the firſt Invitation, and promiſed to repair to him in proper Time. *Thence to Samarkant.*

SHORTLY after, there came a new Deputy from the *Turkmâns*, to let him know, that *Iſfandiar Khân* being informed they had invited him to their Quarters, had retired to *Hazaraſb*, fearing a Surprize. Upon this *Abu'lghâzi Soltân*, followed only by five or ſix Perſons, went directly to *Khayuk*, where he was immediately joined by Numbers of People from all Parts. Two Months after he learned, that his Brother *Sharîf Mahamet* being reconciled with the *Khân*, was arrived at *Hazaraſb*, and that they intended to turn all their Forces againſt him. On this Advice he took the Field, with what Troops he had, and the two Armies coming to a Battle, that of *Abu'lghâzi Soltân* had the better; which obliged his two Brothers to make Peace with him. Yet ſix Months after, they came unexpectedly, and beſieged *Khayuk* with above fifteen thouſand Men, for all the *Turkmâns* thereabout joined them; But although *Abu'lghâzi* had only ſix hundred with him, he defended himſelf ſo vigorouſly, that he obliged them at length to return with Loſs; the Conſequence of which was a new Treaty [b]. *Returns to Karazm.*

SOME Time after, three thouſand Families of thoſe *Uzbeks*, who three Years before had fled from about *Khayuk* to the *Kaſats* and *Mankats*, to avoid the Fury of *Iſfandiar Khân*, returned and went to ſettle on the Sea-Coaſt, about the Mouth of the River *Amû*. On this News eight hundred others ſet-forward, on their Return from *Great Bukhâria*, in order to ſettle in the Country of *Aral*: But the *Khân*, who looked-on the *Vigûrs* and *Naymans* as the Cauſe of all the *Uzbeks maſſacred.*

[a] Theſe muſt be the *Kaſatſia*, or *Kaſachia* Order, mentioned below, who poſſeſs the Eaſt Part of *Turkeſtân*. The *Mankats*, or *Karakalpaks*, being Maſters of the Weſt Part. [b] Hiſtory of the *Turks*, &c. p. 341, &c ſeqq.

Karazm *Kingdom.*

Misfortunes of his Family, being informed thereof, came upon them by Surprize, with some Troops, on the Banks of the *Khesel* towards *Kât*, and put them all to the Sword, Man, Woman, and Child.

Abu'lghâzi *seized, and*

ISFANDIAR KHAN taking this Occasion to invite his two Brothers to Court, under Pretence of regulating with them what concerned the Affairs of the *Uzbeks*, persuaded *Sharif Mahamet* to repair to the Country of *Aral* among those People, as it were of his own Accord, and unknown to his Brother. Next Morning some of the principal *Turkmâns* coming to visit the *Khân* on that Occasion, he solemnly protested *Sharif Mahamet* had undertaken that Journey without his Privity; and to set them against *Abu'lghâzi Soltân*, pretended, that it was done by his Advice. He went farther, and told them, that it was this last, who had recalled the *Uzbeks* to settle in the Country of *Aral*, with a Design to make-use of them against the *Turkmâns*, and that he had sent his Brother thither to prepare them for the Purpose: He concluded by saying, that as from thence it appeared he was contriving some dangerous Plot against them, their only Course was to prevent him, by seizing his Person.

Sent Prisoner to Persia.

THIS Advice having been approved of by all the Assembly, he caused the Gates of the Castle to be shut, and sent to arrest *Abu'lghâzi Soltân*, who was still fast asleep. After this the *Khân* carrying him to *Yaursurdi*, ordered the Governor to send him under a strong Guard into *Persia*: That Officer, for better Security, conducted him in Person to *Hamadân*, where *Shâh Sefi* [a], the Successor of *Abbâs*, then was; who ordered him to be conveyed to *Ispahân*, where he assigned him a House, and ten thousand *Tanga* [b] a-Year, for his Expences [c]; but at the same Time had him carefully watched, that he might not escape.

ISFANDIAR KHAN died the first Day of the Year 1634 [d], after having reigned twelve Years, and left two Sons, *Yushan* and *Ashrâf*.

Sharif Mahamet Khân

He was succeeded by his Brother, *Sharif Mahamet Soltân*, who fixed his Residence at *Urjenz*. This *Khân* was much at Variance with the *Kalmûks* (or *Eluths*) who in his Time came and seized a great Part of *Karazm*. He died in the Year [e] 1642 [f], leaving, as it should seem, the Throne vacant.

ABU'LGHAZI SOLTAN was born at *Urjenz*, in the Year 1605 [g], on *Monday*, in the Month of *Asfet*, at Sun-rise, forty-eight Days after the Defeat of the *Kosaks*, before-mentioned [h]; who having met-with near the River *Jaïk*, ten Merchants of *Urjenz*, trading to *Russia*, slew eight, and made the other two serve as Guides in their Expedition. On this Occasion his Father *Arab Mahamet Khân* said, that Child will be happy, because his Enemies were defeated before he was born [i]; and in regard his Mother was descended from *Soltân Ghâzi* [k], Son of *Ilbars Khân*, he gave him the Name of *Abu'lghâzi Bahâdur*, and when he was sixteen Years of Age, married him, granting him one Half of *Urjenz*; the other Half of which he at the same Time assigned to *Habash Soltân*. The Year following [l], upon some Difference which happened between the two Brothers, his Father gave him the City of *Kât* for his Portion; and not long after, the unfortunate Battle was fought, wherein the *Khân* was taken Prisoner, and put to Death by his unnatural Sons [m].

WHAT passed from that Time, till *Abu'lghâzi Soltân* was sent into *Persia*, has been already related. After he had remained there in the Condition of a Prisoner ten Years, he formed the Design to make his Escape. This having been approved of by three of his Domestics whom he acquainted with it, he called the Person who had the Guard of him, and after he had ordered him to take a Horse, which had been sent him for his Kitchen, to the Butchers, gave him a thousand *Tanga*, bidding him go-buy a

[a] He ascended the Throne in 1629, at the Age of Sixteen. [b] Coin of *Karazm*. See before, *p.* 484. [c] This happened about the Year 1630; for it was thirteen Years before he was proclaimed *Khân*. [d] *Hejrah* 1044, called *Ghilki*, or *the Horse*. [e] *Hejrah* 1052. [f] History of the *Turks*, &c. p. 329, and 347, & *seqq.* [g] *Hejrah* 1015, called *Taushkan*, or *the Hare*. [h] *P.* 502. [i] The *Tartars*, in general, are full of such superstitious Whimsies. [k] Here the Author gives his Genealogy from *Adam*, which the Reader may easily trace from this History as high as *Jenghiz Khân*, whose Pedigree has been already set-forth. [l] This was in 1621. *Hejrah* 1031. [m] History of the *Turks*, as before, *p.* 330, & *seqq.*

pretty Slave, and pass the Night with her. His Ward being gone full of Joy at his Present, *Abu'lghâzi*, and his Men, went in the Evening to a neighbouring Stable, and took-out eight Horses; after which he caused all their Beards to be shaved: When every-body was at Rest, he made one of them, who could speak the *Turkish* and *Persian*, to put-on his best Cloaths, because he was to represent the Master: The second Domestic was dressed as a Sort of Gentleman: The third wore the Garb of a Valet, and himself was disguised like a Groom.

a In this Equipage leaving *Ispahân*, they got safe to *Bastâm* [a]: But three of their Horses failing a little beyond that City, they were obliged to stop at a Village on the Road, called *Boyish*, inhabited by *Saghits*. He who passed for the Master, being seated on a Carpet at the Gate, with one of the Valets standing behind him, while the other held the Horses, *Abu'lghâzi* entered into the Place to swap the tired Cattle. He presently got-off two of them: But having asked one among the Croud, who flocked about him, which was the Way to the Village of *Maghi*; an old Man of Seventy grew suspicious of him, telling his Neighbours, that as scarce one in ten of themselves knew the Way to *Maghi*, he judged this must be the *Soltân* of the *Uzbeks*, who was making his Escape. He added, that as in case it was so, there would be Couriers after him in a Day or two: He advised them to seize, and carry him to *Bastâm*, or at least not to exchange Horses with him, in regard those who did would have a bad Time of it. On this Occasion the counterfeit Groom, who spoke the Language of the Country perfectly well, by Way of Answer, told the old Man a very formal Story, too long to repeat here; which gaining the People on his Side, he swapped the third Horse, and got sufficient Information about the Road.

Having made great Expedition to pass the Borders of *Khorasân*, he arrived at length in the Neighbourhood of *Karakum* [b], at a Place where the Road dividing, one led to *Mankishlak*, the other to the Mountain of *Kuran*. Resolving to keep the Fields no longer (as till then he had done, to avoid meeting much People) he struck into the latter, and came to a Village; which happening to be inhabited by *Turkmâns*, he asked a Lad, whom he saw near the Road, what Sort of People those were. The Boy having answered, we are *Kisilasaks*; he demanded how they came there, since they belonged to *Mankishlak*? The Youth replied, that the *Kalmûks* had driven them out of their Habitations three Years before, and named some Families of the Tribe of *Irsari*, known to *Abu'lghâzi*, who dwelt not far-off. Uzbek Khâns.

The *Soltân*, glad to find himself out of the *Persian* Dominions, went to the Village, where he was received with extream Joy by the Inhabitants, at whose Invitation he staid there the Winter; but in Spring repaired to the *Turkmâns* b of the Tribe of *Taka*, who dwell near the Banks of the *Amû*, at the Foot of the Mountain *Kuran*. With these he staid two Years, and then went to *Mankishlak*, where he found no more than seven hundred Families, who were reduced under the Obedience of the *Kalmûks* [c]. The *Khân* of the *Kalmûks* being informed of the *Soltân*'s Arrival in his Dominions, sent one of his principal Officers to invite him to Court [d]. *Abu'lghâzi* accepting of the Invitation, was treated with c great Distinction the whole Year he remained with him: After which, having formed a Design of going to *Urjenz*, the *Khân* suffered him to depart, with many Marks of Friendship. *Received by the* Turkmâns,

He arrived at that City in the Year 1643 [e]; and six Months after the *Turkmâns* proclaimed him *Khân*, in the Country of *Aral*, towards the Entrance of the River *Amû* into the Sea of *Mazanderan*: This was in 1644, two Years after the Death of *Sharif Mahamet Khân*. *Yushan* d and *Ashrâf*, the two Sons of *Isfandiar Khân*, his Predecessor, being in Possession of *Khayuk* and *Hazarasb*, the *Turkmâns*, within their Jurisdictions, refused to submit to *Abu'lghâzi Khân*; and put themselves under the Protection of *Nadir Mahamet Khân* of *Great Bukhâria*, after sending *Ashrâf Soltân* to the *Persian* Court to be brought-up there [f]. *Is proclaimed* Khân,

Upon this *Abu'lghâzi Khân* having sent twice to pillage the Habitations of the Subjects of e *Khayuk*, *Nadir Mahamet Khân* placed Commanders and strong Garisons in that City, and *Hazarasb*, and sent *Isfandiar Khân*'s Widow to dwell in the Country of *Kanski*; having afterwards conferred the Government of those two Places on his Grandson *Kasim*, Son of *Khisseran Soltân*, *Abu'lghâzi Khân* resolved to pay him a Visit. To this End he embarked his Infantry in the Country of *Aral*, to ascend the River *Kheset*, as far as the Bridge *Tash Kupruk*, and followed f by Land with his Cavalry. Being arrived at the Place of Rendezvous, he marched, with some of his Foot, to the Borough of *Kandum* [g]; and *Attacks* Khayuk.

[a] In the Province of *Komes*, and Borders of *Astrabâd*. [b] A black, sandy Desart, on the Borders of *Karazm*. [c] Or, *Eluth Mongols*. [d] The Author makes no Mention where the *Khân* of the *Kalmuks* kept his Court, or whether any Part of *Karazm* was then under his Dominion. It was at this Time that the Author learned the *Mogul* Language, in which he wrote his History. See History of the *Turks*, &c. p. 31. [e] *Hejrah* 1053, called *the Ghilan*, or *the Serpent*: Elsewhere, *Yilan*. [f] History of the *Turks*, &c. p. 349, *seqq*. [g] Mentioned before, *p.* 504. c.

passing

Karazm Kingdom.

passing a Brook which lay between him and the City, hid an hundred and eighty of his Men in a Valley: Then with ſixty Bowmen and twenty Muſketeers, advanced-up to the Place, ordering them not to fire till they ſaw him fire.

Without Succeſs,

THE Enemy perceiving them coming, made a Sally with a thouſand Men, of whom ſeven hundred had Coats of Mail, though not above five of the *Khân*'s were ſo accoutred. That Prince, without being diſmayed at their Numbers, drew them dexterouſly to the Place where he deſigned; and then marching-up, gave them ſo rude a Salutation with Arrows and Bullets, at twenty Paces Diſtance, as allayed much of their firſt Fury; while thoſe who lay concealed, coming to charge them at the ſame Time in Flank, they fell-into Confuſion, and fled towards *Khayuk*. The *Khân*, who was not able to purſue for Want of Horſe, returned, and ſent his Troops into Quarters.—Here *Abu'lghâzi Khân* breaks-off his Hiſtory, having been hindered from finiſhing it by a grievous Sickneſs, of which he died. What follows, was added by his Son and Succeſſor, *Anuſha Mahamet Bahâdur Khân*.

Afterwards takes it.

SOME Time after, *Nadir Mahamet Khân*, of *Great Bukhâria*, having recalled his Grandſon, *Kaſſim Soltân*, from *Khayuk*; ſent *Yakûb*, one of his Lords, to *Hazaraſb*, to govern what he poſſeſſed in *Karazm*: But having, in the Interim, been dethroned by his Vaſſals, for his harſh Treatment of them, they ſet-up his Son *Abdalazîz Soltân*. On the News of this Revolution, *Abu'lghâzi Khân* marching to *Khayuk*, in the Year 1646 [a], found no Difficulty to poſſeſs himſelf of it: After which he cauſed Proclamation to be made, that all the *Turkmâns*, who had quitted their Habitations on Account of the late Troubles, might freely return home, on his Promiſe never to think of their paſt Faults.

Perfidious Dealing

ON theſe Aſſurances, thoſe who dwelt beyond *Hazaraſb*, ſent Deputies to the *Khân*; who ordered, that they ſhould all repair to him before that City, which he was going to take Poſſeſſion of, and there tender him their Faith and Homage. The *Turkmâns* being aſſembled, according to his Orders, he ſent to deſire them to provide his Kitchen with Milk and Cattle, for that he intended next Day to make a great Feaſt. This having been performed to the *Khân*'s Satisfaction, he treated them very ſplendidly; but towards Evening cauſed them all to be killed, to the Number of two thouſand Perſons, and then ſent to plunder their Habitations.

With the Turkmâns.

NEXT Year [b] marching into the Country of *Tarkhan*, in Queſt of the *Turkmâns*, who had quitted *Khayuk* after *Hajîm Soltân*'s Departure, he put to the Sword thoſe whom he found; but the greater Number fled into the Province of *Bamaburinak*, whither he went to diſlodge them, in the Year *Zizkan*, or the *Mouſe* [c]. Such as knew not where elſe to go, ſent their Wives and Children into the Country of *Aral*, and intrenched themſelves under the Ruins of ſome old Walls. The *Khân* finding them in this Situation, made them ſome Propoſals: But as they durſt not truſt him, they marched-out a-foot, and threw themſelves deſperately on his Troops; but were ſo well received, that not one of them eſcaped. After this, *Abu'lghâzi Khân* being reſolved to reduce the *Turkmâns* ſo low, that they ſhould not be able to raiſe Diſturbances for the future, made ſeveral Expeditions againſt them; wherein he chaſtized them ſeverely.

IN the Year *Saghir* [d], a Lord of the *Kalmûks*, coming with ſome Troops to *Kât*, cauſed many People to be killed, and others to be carried into Slavery. Soon after another arriving to traffic, the *Khân* let them finiſh their Buſineſs, and then following them, defeated their Rear in the Country of *Yuguruk-baſh*: After which coming-up with the Body of their Troops, he put them to Flight, leaving their Effects behind them. Three Years after [e], *Abu'lghâzi Khân* having been informed, that the *Kalmûks* hovered-upon the Frontiers both of *Great Bukhâria* and *Karazm*, with ſtrong Parties, and made terrible Havock where-ever they came, ſent *Abdol-azîz Khân* Notice to be upon his Guard. Mean-time three Lords of the *Torgauts* invaded the Lands of *Hazaraſb*, where they deſtroyed the Village *Yeſdus*, and took-out of another, called *Dangan*, much Cattle and People.

UPON this Advice, *Abu'lghâzi Khân* took Horſe immediately to purſue them, contrary to the Requeſt of his Officers; and though they were ten Days March a-head of him, yet by riding Day and Night, he at length came-up with their Rear, near the Mountain *Irder*, whom he defeated. Then purſuing the reſt, overtook them in the Country of *Segheri-rabat*; where they were ſo well intrenched, that it was impoſſible to force them. But, on the other hand, as they durſt not ſally-forth to continue their Journey, they ſent all the Plunder they had taken, with their Bows and Arrows, to the *Khân*, intreating Pardon for the Offence; pretending they did not know the above-mentioned Villages belonged to him, and promiſing never to invade

[a] *Hejrah* 1056, called *Tauk*, or *the Hen*. [b] 1647, called *It*, or *the Year of the Dog*. [c] The firſt
the duodenary Cycle of the *Mongols*. It was the Year 1648. [d] Or, of the *Cow*, 1649. [e] In the Yea
Lu, or the *Crocodile*, anſwering to 1652.

his Dominions for the future. Hereupon he ſent them back their Arms, and ſuffered them to return home in Peace [a].

AFTER this, *Subhan-kuli Khân* of *Bâlk*, who had married his Brother *Sharîf Mahamet Khân*'s Daughter, ſent to intreat his Aid againſt *Abdol-aziz Khân*, who had taken the Field with an Intent to deprive him of his Dominions [b]. *Abu'l-ghâzi Khân* willing to aſſiſt his near Relation, and revenge the Injuries done his Houſe by *Abdallah Khân*, advanced in the Year *Koy*, or of *the Sheep* [c], into the Province of *Koghertlik*, bordering on *Great Bukhâria*; and ſent a Body of ten thouſand Men to plunder the City of *Karakul*, while he went in Perſon againſt that of *Siuntz-kala*, which he deſtroyed, with thirty or forty neighbouring Villages. After this he returned, for a While, to *Khayuk*; and then, in a ſecond Invaſion made the ſame Year, plundered *Karakul* afreſh. Thence paſſing-on to the Province of *Gordiſh*, he defeated an Army of fifteen thouſand Men (ſent by *Abdol-aziz Khân*, who was then at *Karſhi*) ſcarce a thouſand of them eſcaping. A great Part of theſe threw themſelves into *Karakul*; but the *Khân* following them, took Priſoners all, who were not ſlain, and burnt the few Houſes that remained in that Town.

IN the Year *Bizin*, or *the Ape* [d], he took the Town of *Zarjui* [e], which he entirely deſtroyed, and plundered the Country round it. Next Year he went and ravaged the Province of *Yayzi* [f], which extends from the City of *Karakul* to that of *Nerſem*; and having taken much Plunder, was gone-back to his own Frontiers, at the ſame Time that *Abdolaziz Khân*, accompanied by *Katim Soltân*, was on the March, with a numerous Army, to make a Diverſion in the Province of *Koghertlik*. But as ſoon as he heard of *Abu'l-ghâzi Khân*'s Return to *Karazm*, he retreated with ſo much Precipitation, that many of his Men killed their Horſes, though no one had Thoughts of purſuing them. *Abu'lghâzi Khân*, who in the mean Time had taken a Turn to *Khayuk*, made another Invaſion the ſame Year, with twenty-five thouſand Men, into *Great Bukhâria*; and having taken the City of *Karmina*, gave it to be pillaged, returning with conſiderable Booty, and many Priſoners.

BUT in his Retreat having paſſed a River over a Bridge, he cauſed his Tents to be ſet-up there, and believing himſelf very ſecure in that Place, ordered that the Baggage ſhould begin to march at Midnight, and that the Army ſhould follow at Day-break, keeping about his Perſon no more than his uſual Guard of an hundred Men. Next Morning, ſome Hours after the Army had decamped, one of his principal Officers entered his Tent, and finding him ſtill faſt aſleep, cried to him, "Riſe, Sir, is this a Time to ſleep here?" But the *Khân* made Anſwer, "Whom is it you "would have me afraid of, ſince we have not "heard of any Enemy-Troops in all this Pro"vince?" At the ſame Time one came to inform *Abu'lghâzi Khân*, that Troops of the Enemy appeared on the other Side of the River: And in Reality it was *Abdolaziz Khân* himſelf at the Head of ſixty thouſand Men; who having been informed, that the *Khân* of *Karazm* was going to beſiege *Karmina*, by a Beggar, whom that Prince gave an Alms to on the Road, ſet-forward immediately, with all his Forces.

Uzbek Khâns.

ABU'LGHAZI KHAN, on the Enemy's Approach, retired leiſurely towards his Troops; *By a great Army,* which being about to paſs a little marſhy Brook, he ſent Orders for them to halt on this Side. Mean-time a thouſand Horſemen in Coats of Mail, began to preſs him at the Heels: On which the *Khân*, having gained a Paſs, made his hundred Men alight (as he did himſelf) the better to make-uſe of their Muſkets, and ſent to order his Army to return. After this he detached *Yadigar Atalik* (the firſt Lord of his Court) with thirty Men, to attack the thouſand Horſe at the Entrance of the Defile, while he ſtood ready to ſupport him with the reſt. *Yadigar* executed his Orders with ſo much Conduct, that having firſt ſtunned the Enemy, by a clever Fire made on them near at hand, he knew ſo well afterwards how to manage his ſmall Forces, by retiring or advancing, as Occaſion ſerved, that he diſputed the Paſs till *Anuſha Mahamet Bahâdur Soltân* (the *Khân*'s Son, then but fourteen Years of Age) came to his Father's Aſſiſtance, at the Head of ſix hundred Horſemen, with three hundred Foot-Soldiers behind them.

ABU'LGHAZI KHAN, upon this Reinforce- *His brave Defence.* ment, marched-out of the Defile to receive thoſe thouſand Men: But as in the Interim the Enemy's Army had Time to approach, they were quickly ſupported by a great Body of Troops; which having ſurrounded the *Khân* on all Sides, would, doubtleſs, have mauled him ſeverely, if he had not ordered his Son, *Anuſha Mahamet*, with four hundred Men, to fall furiouſly on the Right of a great Squadron, which blocked-up the Road to their Army, while he attacked the Left with the ſix hundred that remained. This was executed

[a] Hiſtory of the *Turks*, &c. p. 357. [b] *Bernier* informs us, that *Abdolaziz*, aſſiſted by *Aureng-zeb*, ſent by the *Great Mogul*, *Shâh Jehân*, laid Siege to *Bâlk*; but ſuſpecting *Aureng-zeb* might keep the City, when taken, he ſtruck-up a ſudden Peace with the *Khân*, and marched home. [c] Anſwering to the Year 1655. 1656. [e] In the Tranſlation, *Zardſui*. [f] In the Tranſlation, *Jaizi*.

with

Karazm Kingdom.

with ſo much Succeſs, that having forced the a Enemy's Troops on both Sides, they made their Way through them, and rejoined their own, which advanced in Haſte, to reſcue their *Khân* from the Danger he was in.

Defeats the Enemy,

As ſoon as he had put himſelf at the Head of his Army, he cauſed it to march forward, under Command of *Anuſha Mahamet*, to attack the Enemy's Forces, which began to appear; and as ſoon as the reſt of his Troops arrived, he made them advance to the Right and Left of his Son, b in order to ſuſtain him. Then the Engagement becoming general, they fought a long Time with equal Fortune: But at length the juvenile Courage of *Anuſha Mahamet* prevailing (although the firſt Time he was at ſuch an Entertainment) the Army of *Abdolaziz Khân* was defeated, notwithſtanding its great Superiority, and purſued as far as the above-mentioned River [a]. The Rout was ſo ſignal, that a great Number of the Enemy, who could not gain the Bridge, were drowned c in the Stream; and their *Khân* himſelf, though much wounded, was obliged to paſs it by ſwimming, to avoid being taken.

Makes new Invaſions,

ABU'LGHAZI KHAN returning to *Khayuk* with a great Number of Priſoners, gave a ſplendid Feaſt to all his Lords and great Officers; and after he had in public extolled the Valour of his Son, reſigned to him the City of *Hazaraſb*, with Subjects for its Defence. Next Year [b] the *Khân* again entered *Great Bukhâria*, and took the City d of *Wardanſi*; and cauſing it to be ſacked, returned loaden with Plunder and Priſoners. Four Years after [c], he made another Expedition thither; and advancing to the very Walls of *Bokhâra*, the Capital of the whole Country, cauſed all the Villages, within its Juriſdiction, to be deſtroyed: After which he encamped before the Gate *Namoſga*, with an Intent to take the City; but conſidering that there would be no Glory in ſuch an Exploit, at a Time when the *Khân* was e abſent at *Samarkant*, and that there were none but Women and *Tajiks*, or Burghers, in the Place, he laid aſide the Deſign till another Opportunity, and returned with much Booty, and many Priſoners.

Reſigns the Crown,

ABU'LGHAZI KHAN being now ſixty Years old, began to conſider, that there was Blood enough ſhed to ſatisfy the Paſſion of revenging the Murder of the Princes of his Houſe committed by *Abdallah Khân*; and that it would be acting againſt the Dictates of Conſcience to perſiſt any longer in giving Diſturbance to a Prince, who was of the ſame Religion with himſelf, while he could more uſefully employ his Arms againſt the *Kalmûks* and *Perſians*. Guided by theſe Sentiments, he ſent Ambaſſadors to *Abdolaziz Khân*, with Propoſals of Peace; which having been accepted, he recalled his Troops from the Border of *Great Bukhâria*, and ſent them towards the Country of *Khoraſân*. After this, he reſigned the Throne to his Son *Anuſha Mahamet Bahâdur Soltân*, with a Deſign to ſpend the reſt of his Days in ſerving God: But he died not long after, in the Month of *Ramadhân*, in the Year 1074 [d], having reigned twenty Years [e].

CHARDIN gives *Abu'lghâzi*, or *Abu'l Kazi* [f], (as he writes the Name) a very advantageous Character. He ſays, that Prince knew ſo well how to diſguiſe the natural Barbarity of the *Tartars*, that you would have taken him for a *Perſian*, he behaved with ſuch a Grace and Affability on all Occaſions: So that *Shâh Sefi* (for Diſtinction-Sake called *Mazi* [g]) obſerving him endowed with ſo many rare Qualities, admitted him into his *Mejels*, or royal Aſſemblies, where he ranked him equal with the Grandees of his d Kingdom, and for his Maintenance aſſigned him Penſions no Way inconſiderable.

THE ſame Author informs us, that on his being brought [h] to *Iſpahân*, *Sefi* looked-on him not as a Robber, but a Priſoner of War, and paid him all the Honours due to a Perſon of royal Birth; aſſigned him a Revenue of fifteen hundred *Tomans*, amounting to ſix thouſand Pounds; gave him a ſtately Palace, richly furniſhed, with a ſuitable Number of Officers and Retinue to attend him, during the ten Years he continued e there. After his Return [i] to *Karazm*, he proved a conſtant Friend to *Perſia*, keeping *Subhân-kuli Khân* [k], and *Abdo'laziz Khân* [l] of *Bokora*, in ſuch Awe, that as ſoon as either of them entered *Perſia*, he was in the Bowels of their Territories.

BUT after his Death, the Crown deſcending to his Son, *Enuſh Khân* [m], *Abbâs* the Second

[a] It is much this River is not named: Nor are the Diſtances and Situations of Places marked diſtinctly enough to be of ſuch Service in Geography as might have been expected. [b] Being that called *It*, or *the Dog*, anſwering to 1658. [c] In that called *Bars*, or *the Tiger*, correſponding with 1660. [d] 1663, called *Tauſhkan*, or *the Hare*. [e] Hiſtory of the *Turks*, &c. p. 364, & *ſeqq*. [f] The Author ſays, the Name ſignifies *Father Arbiter*: But *Abu'lghâzi* ſignifies *the Father of one who conquers on Account of Religion*. [g] That is, *the paſſed Reign*. [h] According to *Chardin*, he was made Priſoner after a Battle, in which the Uzbeks loſt twelve or eighteen thouſand Men. [i] The Circumſtances of his Eſcape are differently told by *Chardin*. [k] That is, *the Prince, the Slave of the Praiſe-worthy*, meaning God. [l] *Chardin* writes *Abdolhazize Kaan*, which ſignifies *the Servant of the Majeſty*, meaning *divine Majeſty*. [m] That is, *the Lord of Profit*, the ſame with *Anuſha Mahamet Bahâdur Khân*.

withdrew

withdrew his Penſion, which in Kindneſs he had given his Father: But the Son, who looked-on it as a Kind of Tribute, paid by the *Perſian* Monarch to the King of *Kareſhm*, or *Orkenj*, to keep him from plundering his Dominions, thought the ſureſt Way to recover it, or at leaſt to make himſelf Amends for the Loſs, would be to ravage the Frontier-Provinces. To this Purpoſe he enters into a League with the two other *Khâns* againſt *Perſia*, eſpouſing the Siſter of the Prince of *Bâlk*, and giving his own in Marriage to him of *Bokora*.

HOWEVER, *Abu'lghâzi Khân* having been of the *Shiyah* Sect, of which the *Perſians* are, and not of the *Sunni* Perſuaſion, ſuch as the *Uzbeks* [a] profeſs; *Enuſh Khân* made open Profeſſion of the latter: But his Allies, as a Proof of his Sincerity, required, that he ſhould begin the War firſt, promiſing next Year to aſſiſt him with all their Forces. Hereupon the Prince of *Orkenj* entered *Perſia* in the Year 1665, but met-with a powerful Reſiſtance: For *Abbâs* having been informed of the Conſpiracy of theſe petty Kings, ſet-forward with a great Army, reſolving to conquer their Territories, and annex *Bâlk* to his own Dominions. The *Uzbeks* terrified at his Approach, thought it beſt to deſiſt; and next Year ſent their Ambaſſadors to beg a Peace.

ON the Death of *Shâh Abbâs* II. which happened ſoon after, the *Tartars* taking Heart again, the Prince of *Orkenj*, in 1667, entered *Merve Sava*, with his *Uzbeks* [b]; who finding no Reſiſtance, made ſtrange Havock; nor could the Governors have prevented it, if they had Force enough, conſidering with what Swiftneſs thoſe People invade a Country, and retire. *Perſia* being then governed by a young unexperienced Prince, Preparations to repel the Enemy went-on very ſlowly. At laſt two great Lords ſet-forward with four thouſand Men, to join the Forces already in *Khoraſân*. Six Weeks after, Money was ſent to pay the Troops in that Province, under a Convoy of two hundred Men: But the *Uzbeks* getting Intelligence of it, ſent-out a Party three thouſand ſtrong; who took their Meaſures ſo well, that they carried-off all the Treaſure, in Spite of the Troops that were detached to overtake them [c].

Uzbek Khâns.

FROM this Time we find but little Mention in Authors about the Affairs of *Karazm*, till 1714, when, according to *Bentink*, *Haji Mahamet Bahâdur Khân*, Grandſon of *Abu'lghâzi Khân*, ſent a Miniſter to *Peterſburg*, to treat of an Alliance with the Court of *Ruſſia* [d]. *Webber* mentions this Prince, but calls him only the *Khân* of *Uzbek*, and ſays, the Deſign of the Embaſſy was to prevail-on *Peter* I. to oblige *Ayuka Khân* [e], his Vaſſal, not to join with the Princes his Neighbours, or ſtir them up againſt him. On which Condition he offered to aſſiſt the *Tſar* with fifty thouſand Horſe, at any Time, and allow his Karawâns a Paſſage through his Dominions to *China*; which Journey might be performed on a good Road in four Months, whereas that through *Siberia* was very long and troubleſome [f]. He propoſed alſo to enter into a Treaty of Commerce with *Ruſſia*, which would prove of great Advantage.

Haji Mahamet Bahâdur Khân's

THE Ambaſſador was *Acherbi*, about fifty Years of Age, of a lively and venerable Aſpect, wearing a long Beard, and an Oſtrich-Feather on his Turbân, which none but the chief Lords wear. He ſaid his *Khân* was turned of Twenty, and the Year before married the King of *Perſia*'s eldeſt Daughter: That his Country was called *Uzbek* [g], and Reſidence *Khiva*, which conſiſted only of Tents and Huts, but never fixed to a certain Place [h]: That the *Khân* is a Sovereign Prince, but his Authority limited by a Sort of Senate: That he was able to raiſe two hundred thouſand Horſemen; in which Number the *Tſar* judged were included all his Male-Subjects, old and young: Laſtly, that the Country of *Uzbek* bordered on *China*, *Hindûſtân*, and *Perſia*. Among other Things it is mentioned, that the *Tſar* liked the Ambaſſador's Muſic well enough [i]. On which Occaſion it muſt be obſerved, that the Inhabitants of *Karazm* were formerly very famous for their Proficiency in that Art [k].

Embaſſy to Ruſſia.

BENTINK informs us, that between 1714, and 1724, when he wrote, there happened a Revolution, of which he knew not the Particulars [l].

A late Revolution

[a] *Chardin* writes them *Yuſbeks*; which, according to the *Perſians*, ſignifies *an hundred Lords*, to ſhew that they are governed by many Princes. He adds, that the *Yuſbeks* reject this Etymology as falſe and injurious, ſaying, it is compounded of *Yuſi*, *he*, and *bek*, *Lord*; as who ſhould ſay, *he the Lord*, or *he is the Lord*: As if theſe were the only People on the Earth, who are truly Lords, *Coronation of* Soleyman III. *p.* 115. But in all Likelihood this muſt be a Miſtake, ſince, according to the *Uzbek* Hiſtory, they take their Name from *Uzbek Khân*, agreeable to a common Cuſtom among the *Tartars* in general. [b] This muſt be the Territory of *Merv*, ſo often mentioned before, and for a Time belonging to *Karazm*. [c] *Chardin*'s Coronation of *Soleyman*, p. 116, & *ſeqq*. [d] Hiſtory of the *Turks*, &c. p. 373, in the Note. [e] See before, *p.* 401. a. [f] But ſhould that Road be deſerted, it would hinder the Peopling of *Siberia*. [g] The Author miſtook the Name of the People, for that of the Country. [h] That is, his Summer-Camp is not fixed: But his Winter-Reſidence is *Urjenz*, or ſome other City. [i] Preſent State of *Ruſſia*, vol. 1. p. 20, & *ſeqq*. [k] *De la Croix*'s Hiſtory of *Genghiz Can*, p. 240. [l] Hiſtory of the *Turks*, &c. as before, *p.* 373.

Great Bukhâria.

Perhaps that mentioned by *Nacchi* the Jeſuit [a], a may relate to it. This Miſſioner takes Notice, that ſome Years before he wrote, he ſaw the Prince of the *Uzbeks* paſs-through *Aleppo*, in his Way to *Mohammed*'s Tomb, with an Intention to live there a private Life. His Son had rebelled, and having ſeized him, cauſed his Eyes to be put-out, that he might have no longer Hopes of reaſcending the Throne. He marched on Horſeback with his Eyes bound-up, conducted by fifty Guards. But ſince that Time we underſtand, b ſays *Nacchi*, that the Son died miſerably, and his Father was reſtored [b].

IT may be preſumed, that *Haji Mahamet* was the unnatural Child, although the Title of *Haji*, or *Pilgrim*, better ſuits the blind Prince: But *Mahamet* ſeems too young to have had ſuch an enterprizing Son. However that be, in 1719 the *Uzbeks* of *Karazm* ought to have had a *Khân* of an enterprizing Genius, and who could ſee well to command, in Perſon, the Expedition againſt *Beckowit* [c].

CHAP. V.

A DESCRIPTION *of* GREAT BUKHARIA.

Introduction.

BOKHARIA, *Bukhâria*, *Bogaria*, *Bokaria*, or *Boharia*, as it may be variouſly written, is the Name given at preſent to all the Country or Tract of Land between *Karazm*, and the great ſandy Deſart bordering on *China*. It ſignifies the Country of the *Bukhars*, which *Abu'lghâzi Khân* informs us, is a *Mongol* Word, implying *a learned Man:* Becauſe, adds he, all thoſe, who have a Mind to be inſtructed in the Languages and Sciences, go-into *Bukhâria* [d]. Hence it appears, c that this Name has been impoſed by the *Mongols*, who conquered this Region in the Time of *Jenghiz Khân*. The ſame Author mentions the *Bukhars* elſewhere [e]; but in thoſe Places the Term ſeems to be reſtrained to the Inhabitants of the City of *Bokhara*. This vaſt Region is divided into two Parts, the *Great*, and the *Little Bukhâria:* But it is obſervable, that although *Abu'lghâzi Khân* frequently ſpeaks of the former, he never once mentions the latter; which Name, d poſſibly, may not be ſo much in Uſe with the *Uzbeks*; or may have come in Uſe only ſince the *Eluths*, or *Kalmûks*, conquered the Countries comprized under that Denomination in the laſt Century. Both Names are in Uſe with the *Ruſſians*, from whom they came to us.

SECT. I.

The Names, Extent, Situation, *and* Provinces *of* Great Bukhâria.

Names, Bukhâria. Mawara'lnahr. Turân. Uzbeks *Country: Its Situation and Extent: Soil and Produce: Diviſion.*

THE Country of *Great Bukhâria* is nearly the ſame with that, called by the *Arabs*, *Mawara'lnahr:* Which ſignifies, *what lies beyond the River*, meaning the *Jihûn*, or *Amû*, by the *Greeks*, *Oxus*; and is little other than a Tranſlation of *Tranſoxana*, the Name given by the ſame Ancients to thoſe Provinces. Under this Appellation was comprehended all the Space of Country thoſe Powers poſſeſſed beyond that River, which, at different Times, was of different Dimenſions. Although generally *Mawara'lnahr* ſignified all the Lands between the *Jihûn* and the *Sihûn* [f], now called *Sîr*, which ſeparates them from thoſe of the *Turks*; who, during the Dominion of the *Arabs* in theſe Parts, ſpread very far over *Grand Tartary*. However, *Abu'lghâzi Khân*, though in ſome Places he ſeems to uſe the Words *Great Bukhâria* and *Mawara'lnahr*, to denote the ſame Country; yet, in other Places, the firſt Name ſeems to be more limited, and even reſtrained to the Territory of the *Khân* of *Bokhara*, one of the three Powers into which *Great Bukhâria* is divided.

GREAT BUKHARIA is alſo comprized under the Name of *Turân* [g], or the Country of the *Turks* [h]; which is likewiſe given, by the *Arabs* e and *Perſians*, to the Countries North of the *Amû*, in Oppoſition to *Irân*, or *Perſia* properly ſituate to the South of that River; and includes

[a] He wrote between 1720 and 1724, when his Memoirs were printed, in the fourth Tome of the *Memoires des Miſſions en Syrie, & en Egypt.* [b] See Journey from *Aleppo* to *Damaſcus*, p. 80, & *ſeq.* [c] See before p. 478. c. [d] See Hiſtory of the *Turks*, &c. p. 108. [e] The ſame, *p.* 142, & *ſeq.* [f] By the Greeks *Jaxartes.* [g] *Abu'lfeda* ſays, the Name of *Turân* is given to all *Mawara'lnahr*, that is, the Countries longing to the *Hayatelah*. So thoſe People were called by the *Arabs:* But by the *Perſians*, *Abtelah*, or *of Gold.* Theſe are the *Ephthalites* of the *Byzantine* Hiſtorians. [h] Or of *Tûr*, from whom the *Perſians* the *Turks* are deſcended.

considerable Part of what fell in Division to *Jagatay Khân*, second Son of *Jenghiz Khân*, from whose Descendants the *Uzbeks* conquered it. But here it must be observed, that *Abu'lghâzi Khân* uses the Word *Turân* in a different Sense, namely, to denote the Countries lying between the River *Sir*, and the *Icy Sea* [a], or, perhaps, more particularly *Siberia*: For he tells us, that *Kuchum*, or *Kujum Khân*, was driven, by the *Russians*, out of the Country of *Turân* [b]; and it appears from the *Russian* History, that he resided at *Sibir* (near *Tobolskoy*) then the Capital of *Siberia* [c]. However, we incline to think with the *English* Translator, that instead of *Turân*, in that Place it should be written *Tura*: And this Opinion [d] seems confirmed, by a Passage in *Abu'lghazi Khan*'s History, where the Country of *Tura* is expressly mentioned, together with *Russia* and *Bulgaria*; without Doubt, to signify the Country about the River *Tura*, in *Siberia*, which falls into the *Obi*, over-against *Tobolskoy*.

As our early Geographers gave this Country the Name of *Zagatay*, or *Jagatay*, from *Jagatay Khân*, to whose Share it fell, so the more modern call it *Uzbek*, from its present Possessors; as if the Name of the Conquerors must necessarily pass to the conquered Dominions. But if any Part of this great Continent (adds the Translator) ought to be called so, it should be that situate between the Rivers *Jaïk* and *Sir*; from whence the *Uzbeks* came, and to which *Mirkond* refers, when he tells us [e], *Shaybek Khân* came from *Uzbek*, and drove *Mirza Babor*, the first *Great Mogul*, out of *Mawara'lnahr*. After all, continues he, these are Names given by foreign Historians, and Geographers, to Countries, and which are entirely unknown to the Natives [f].

GREAT BUKHARIA (which seems to comprehend *Sogdiana* and *Baktriana* of the Ancients, with their Dependencies) is situate between the thirty-fourth and forty-sixth Degrees of Latitude, and between the seventy-sixth and ninety-second Degrees of Longitude. It is bounded on the North by the River *Sir*, which separates it from the Dominions of the *Eluths*, or *Kalmûks*: On the East by the Kingdom of *Kashgar*, in *Little Bukharia* on the East: The Dominions of the *Great Mogul* and *Persia* on the South; and the Country of *Karazm* on the West: Being about seven hundred and sixty Miles long from West to East, and seven hundred and twenty broad from South to North.

ACCORDING to *Bentink*, Nature has denied nothing to this fine Country to make living in it agreeable. The Mountains abound with the richest Mines; the Valleys are of an astonishing Fertility, in all Sorts of Fruits and Pulse; the Fields are covered with Grass the Height of a Man; the Rivers swarm with excellent Fish; and Wood, which is so scarce all over *Grand Tartary* [g], is found here in great Plenty in several Parts. In short, it is the best-cultivated and inhabited of all the Northern *Asia*. But all these Blessings are of very little Use to the *Tartar* Inhabitants, who are naturally so lazy, that they would rather go-steal, or rob and kill their Neighbours, than apply themselves to improve the Benefits which Nature so liberally offers them [h]. *The Geography.*

GREAT BUKHARIA is subdivided into three great Provinces, *viz.* those of *Proper Bukhâria*, *Samarkant*, and *Bâlk*. Each of these three Countries hath commonly its particular *Khân*; but at present the *Khân* of *Bukhâria* is in Possession of the Province of *Samarkant*: So that all which lies to the North of the *Amû*, and also the Eastern [i] Part of what lies to the South of that River, being in his Hands, makes him a very powerful Prince. *Division.*

1. *The* Province *of* Proper Bukhâria.

Proper Bukhâria. *Provinces*, Duruganata: Gordish: Kuzin *and* Karmina. Bokhara *City*. *The Water unwholesome. High Priest. The* Khân. *Religious Wars. The Coin. Commerce there, with other Nations: Easy Duties.* Karmina. Wardansi. Karsh. Zamin, *or* Zam. *Pass of the River* Amû.

THE Province of *Proper Bukhâria*, or *Bokhara*, is the most Western of the three, having on the West *Karazm*; on the North a Desart, called by the *Arabs*, *Gaznah*; on the East the Province of *Samarkant*; and, on the South, the River *Amû*. It may be about three hundred and eighty Miles long, and three hundred broad. Proper Bukhâria.

ABU'LGHAZI KHAN, in the History of his Wars, mentions several Provinces and Towns in *Proper Bukhâria* [k], some of which the *French* Editor gives an Account of. With regard to the Provinces, that Author speaks of four, *viz. Duruganata*, *Gordish*, *Kuzin*, and *Karmina*.

THE Country of *Duruganata* is a large Province, bordering on that of *Yanghiarik* in *Kar-* *Provinces*, Duruganata.

[a] History of the *Turks*, &c. p. 141. [b] The same, *p.* 209. See also before, *p.* 489. e. [c] The same, part 2. p. 622. [d] The same, part 1. p. 131. [e] *Teixeira*'s History of the Kings of *Persia*, p. 319. See History of the *Turks*, as before, *p.* 452, *& seqq.* [f] The Author says, over the rest of *Grand Tartary*, thus making *Bukhâria* a Part of it; but improperly, we think. [g] History of the *Turks*, as before, *p.* 56. [h] Rather, we should think, the Western Part. [i] See before, *p.* 511, *& seq.*

Great Bukhâria.

azm. Gordiſh, a large Province alſo, towards the Frontiers of *Karazm*, is one of the moſt agreeable and fruitful in *Great Bukhâria*: It is alſo very populous, and well-cultivated. *Kuzin* and *Karmina*, are two little Provinces, ſituate towards the Middle of *Proper Bukhâria* [a]. The Towns of *Proper Bukhâria*, or *Great Bukhâria*, mentioned by *Abu'lghâzi Khân*, are chiefly *Bokhara*, *Zam*, *Wardanſi*, *Karakul*, *Siuntzbala*, *Karſhi*, *Zarjui*, *Nerſem*, and *Karmina*.

Gordiſh. Kazin *and* Karmina.

Bokhâra *City.*

THE City of *Bokhâra*, or *Boghar*, according to *Jenkinſon*, is ſituated in the loweſt-Part of all the Country, and, by his Obſervation, in thirty-nine Degrees ten Minutes Latitude, twenty Stages from *Urjenz*. It is of great Extent, and fortified with a high Wall made of Earth. It is divided into three Parts, whereof the Caſtle of the *Khân*, who reſides here, and what depends on it, takes-up one: The *Murſas*, Officers of the Court, and thoſe belonging to that Prince's Retinue, the ſecond Part: The third, which is biggeſt, being poſſeſſed by the Burghers, Merchants, and other Inhabitants. In this laſt Diviſion, every Trade, or Profeſſion, has its particular Quarter. The Houſes, for the moſt Part, are of Earth; but the Temples, and many other Structures, as well private as public, are of Stone [b], ſumptuouſly built and gilt; eſpecially the Baths, which are ſo artfully contrived, that the like is not in the World.

The Water unwholeſome.

THE Water of the little River that runs-through the City, is very bad, breeding, in the Legs of thoſe who drink it, Worms an Ell long, between the Fleſh and the Skin; which working-out about an Inch every Day, are rolled-up, and thus extracted: But if they break in the Operation, the Patient dies. For all this Inconveniency, it is there forbidden to drink any other Liquor, but Water, and Mares-Milk: Such as break that Law being whipped through the Markets. There are Officers appointed to ſearch all Houſes for *Aqua vitæ*, Wine, or Brag [c]; and in caſe they find any, to break the Veſſels, ſpoil the Drink, and puniſh the Owners: Nay, often, if a Man's Breath ſmells of ſtrong Liquor, he incurs a good Drubbing.

High Prieſt.

THIS great Strictneſs is owing to the Metropolitan (or Head of the Law) in *Bokhâra*, who is more obeyed than the King: Nay, he depoſes him at Pleaſure, as he did the King, who reigned when *Jenkinſon* was there, and his Predeceſſor, ſlaying him in his Chamber in the Night-time.

The Khân.

THE King hath no great Power, or Riches. His Revenues are but ſmall, and he is maintained chiefly by the City: For he takes the Tenth of all Things there ſold, to the great Impoveriſhment of the People; and when he wants Money to pay his Debts, ſends his Officers to take Goods from the Shop-keepers upon Credit, whether they will, or not. Thus he acted to pay *Jenkinſon*, for nineteen Pieces of Kerſey. However, that Gentleman was very civilly treated by him, who reigned in 1559. He often ſent for, and diſcourſed with him, about the Laws, Religion, and Power of the *European* Countries. At his Inſtance likewiſe, he ſent an hundred armed Men in Purſuit of Robbers, who had attacked his Karawân: Four of whom being taken, were hanged, and Part of his Goods reſtored.

THE Country of *Boghar* was formerly ſubject to the *Perſians*, and the *Perſian* Language is there ſpoken: But the *Bogharians* are continually at War with thoſe Neighbours, on Account of Religion, although both Nations are *Mohammedans*. They likewiſe quarrel with them, becauſe they will not cut the Hair off their upper-Lips, as they, and all other *Tartars* do. This they reckon a great Sin, and for that Reaſon call them *Kafrs*, that is, Unbelievers; as they do the Chriſtians. Ten Days after *Jenkinſon* left the City, the King of *Samarkant* came and beſieged it, in Abſence of that Prince, who was at War with one of his Kinſmen.

THEY have no Gold-Coin at *Bukhâra*, and but one Piece of Silver [d], worth Twelve-pence *Engliſh*. Their Copper-Money is called *Poolu*, whereof one hundred and twenty go to the Silver-Piece; which is not ſo commonly uſed in Payment as the Copper, the King cauſing it to riſe and fall every other Month, and ſometimes twice a Month.

As to the Trade of *Bukhâra*, *Jenkinſon* obſerves, that in his Time there was a great Reſort of Karawâns from *India*, *Perſia*, *Balk*, *Ruſſia*, and other Countries: But he adds, that the Merchants are ſo poor, and bring ſo few Wares, which yet they muſt wait two or three Years to ſell, that there is no Hopes of any Trade there worth following. The *Indians* brought nothing but white Calicos, and carried-back wrought Silks, red Hides, Slaves, Horſes, and ſuch-like; but would not traffic for Kerſeys, and other Cloth.

THE *Perſians* brought *Kraſka*, Woollen, and Linen-Cloth, wrought Silks, Argomaks, and the like; carrying from thence red Hides, with other Wares of *Ruſſia*, and Slaves of divers Countries. The Cloth they had from *Aleppo* in *Syria*, and other Parts of *Turky*; therefore would buy none of *Jenkinſon*'s. The *Ruſſians* carried

[a] Hiſtory of the *Turks*, &c. p. 462. [b] *Bentink* ſays, they are of Brick. [c] Or, *Braga*, as in *Abu'lghâzi Khân*'s Hiſtory. [d] *Bentink* ſays, the Money of *Perſia*, and the *Indies*, is current here alſo.

red Hides, Sheep-Skins, Woollen-Cloths, Wooden-Veſſels, Bridles, Saddles, and ſuch-like; which they exchanged for Calicos, Silks, *Kraſka*, and other Wares; but the Vent is very ſmall. Formerly Karawâns came from *Kathay* [a], when the Way was open. They were nine Months on the Journey, and brought Muſk, Rhubarb, Satin, Damaſk, and other Goods: But that Commerce had been obſtructed for two or three Years, by the Wars which continued to diſtract the Countries of *Taſkent* and *Kaſgar* [b], two Cities that lie in the Way [c].

BENTINK, who ſeems to have taken his Deſcription of *Bokhâra* wholly from *Jenkinſon*, obſerves further, that this City is conveniently ſituated for Trade with the above-mentioned Countries; and that the Duties commonly paid there are very moderate, not amounting to quite three *per Cent.* But that on Account of the extraordinary Oppreſſions, which the foreign Merchants continually meet-with there, the Trade is very ſmall at preſent. However, from hence the Dominions of the *Great Mogul*, and Part of *Perſia*, are ſupplied with all Sorts of dried Fruits, of an exquiſite Flavour [d].

THE ſame Author gives ſome Account of three or four more of the Cities belonging to *Proper Bukhâria*. *Karmina* is ſituate in the Province of the ſame Name, towards the Frontiers of *Karazm*, to the North-Weſt of *Bukhâra*; and is but inconſiderable at preſent.

WARDANSI lies to the Weſt of the ſame City, near the Borders of *Karazm*. It is a pretty large, ſcambling Town, inhabited by the *Bukhârs*, who traffic into *Perſia* and *Karazm*.

KARSHI is ſituate on the North-Side of the *Amû* [e], and is at preſent one of the beſt Towns in *Great Bukhâria*, being large, populous, and better built than any other in that Country. The neighbouring Lands are exceeding fertile in all Sorts of Fruits and Pulſe, and its Inhabitants drive a great Trade in the North-Parts of the *Indies*.

ZAMIN [f] is a ſmall Town upon the right (or North) Side of the *Amû*, towards the Borders of *Perſia*. It is remarkable for nothing, but its Paſſage over that River, which is of great Advantage to the *Uzbeks* of *Great Bukhâria*, in their Expeditions on that Side [g].

The Geography.

2. *The* Province *of* Samarkant.

Bounds and Extent. Samarkant *City*: *The Caſtle*: *Famous Academy*: *The River*: *Silk Paper Fruits.* Otrar, *or* Farab. Kojand *and* Termed. Kâſh. Anghien. *Map of* Bukhâria.

THIS Province, called *Mawara'lnahr*, by *Bentink*, lies to the Eaſt of *Proper Bukhâria*, and North of *Bâlk*. It extends as far as the Borders of *Kaſhgar* in *Little Bukhâria*; being about five hundred and forty Miles long from Weſt to Eaſt, and five hundred broad from South to North. *Bounds and Extent.*

THIS Country, formerly, was full of flouriſhing Cities; moſt of which are now ruined, or much decayed. The chief of all is *Samarkant*, or *Samarkand* [h], ſituated on a River and Valley called *Sogd* [i], in the Latitude of thirty-nine Degrees, thirty-ſeven Minutes, twenty-three Seconds, according to the Obſervation of *Ulugbeg*, who reigned here in 1447. It is ſeven Days Journey to the North-Eaſt of *Bokhâra*. It falls ſhort, at preſent, ſays *Bentink*, of being ſo ſplendid as it was in Times paſt: Yet it is ſtill very large, and well-peopled. It is fortified with ſtrong Bulwarks of Earth [k], and its Buildings are much in the ſame Condition with thoſe of *Bokhâra*, excepting that one finds ſeveral private Houſes built of Stone, there being ſome Quarries [l] about the Town. *Samarkant City.*

THE Caſtle appointed for the Reſidence of the *Khâns*, is one of the moſt ſpacious: But as at preſent this Province has no particular *Khân*, it falls inſenſibly to Ruin; for when the *Khân* of *Great Bukhâria* comes in the Summer to paſs ſome Months at *Samarkant*, he uſually encamps in the Meadows near the City. *The Caſtle.*

THE Academy of Sciences in that City, is one of the moſt famous among the *Mohammedans*; who reſort from all the neighbouring Countries to perform their Studies there. *Famous Academy.*

THE little River, which paſſes by the Town, and falls into the *Amû* [m], would be of great Convenience to the Place, by opening a Communication with the neighbouring Dominions, if the Inhabitants had but the Induſtry to make it navigable [n]. But for Trade to flouriſh, there *The River.*

[a] Or, *China*. [b] Or, *Taſhkant* and *Kaſhgar*. Thoſe People, who were at War with *Taſhkant*, now the Capital of the *Eaſtern Turkeſtân*, were the *Koſſaks*. [c] *Jenkinſon*'s Voyage to *Boghar*, in *Purch. Pilgr.* vol. 3. p. 239, *& ſeqq.* [d] Hiſtory of the *Turks*, &c. p. 465, *& ſeq.* [e] It lies between *Bokhâra* and *Samarkant*. *Timûr-beg* uſually encamped with his Army near this City. *Karſhi* ſignifies a Palace, a Name given to *Nakſhab*, or *Neſef*. It ſtands on the River *Tûm*. [f] Called alſo *Samin*, and *Zam*. [g] Hiſtory of the *Turks*, as before, *p.* 464, *& ſeq.* [h] Written by ſome, *Samarakand*. [i] Hence the *Sogdiana* of the Ancients. [k] *Abu'lfeda* ſays, it had a wide Ditch round the Walls. [l] The ſame Author ſays, they are dug in a Hill called *Kubak*, and that the Streets are paved with Stones. [m] To the South-Weſt: Others make it to run a few Miles Eaſt of the *Amû*, and fall into a Lake to the Eaſt of *Samarkant*. [n] *Abu'lfeda* ſays, the Water was conveyed by Leaden-Pipes into the City. See his *Deſcr. Choraſmiæ*, &c. *p.* 62.

Great Bukhâria.

would require another Kind of Maſter than the *Mohammedan Tartars*.

Silk-Paper Fruits.

IT is ſaid, that *Samarkant* furniſhes the beautifulleſt Silk-Paper made in all *Aſia*, which makes it in great Requeſt throughout the Eaſt. The Country produces Pears, Apples, Raiſins, and Melons, of an exquiſite Taſte, and in ſuch Plenty, that it ſupplies the Empire of the *Great Mogul*, and a Part of *Perſia* with them.

Otrar, *or* Farab.

THE other remarkable Cities in this Province were *Otrar*, *Zarnuk*, *Kojand*, *Kaſh*, *Saganian*, *Waſhjerd*, and *Termed*: But of theſe we meet with ſcarce any Account in modern Travellers. *Otrar*, called by the *Arabs*, *Farab*, is the moſt diſtant City from the Capital, and lies almoſt due North. It ſtands in the moſt North-Weſt Part of the Province, on a ſmall River, which two Leagues thence falls Northward into the *Sir* [a]. This Place is famous for the Death of *Timûr-beg*, or *Tamerlan*, in 1405; and though not conſiderable at preſent, was the Capital of *Turkeſtân*, when that Kingdom was in its flouriſhing State under *Kavar Khân*, before-mentioned [b].

Kojand *and* Termed. Kâſh.

KOJAND, or *KOJEND*, lies ſeven Stages to the North-Eaſt of *Samarkant*, and four South of *Taſhkant*, or *Alſhâſh*, on the River *Sir*, being a famous Paſſage over that River, as *Termed* is over the *Amû*. *Saganian* and *Waſhjerd* are ſeated on the River *Saganian*, that falls into the *Amû*. *Kaſh* lies not far to the Eaſt of *Karſhi*, and South of *Samarkant*. *Timûr-beg* was Prince of this City before he roſe to his Greatneſs.

Anghien.

To theſe Places may be added *Anghien*, which is the moſt Eaſtern-Town of Note in *Great Bukhâria*, ſtanding near its Borders towards *Kâſhgar*, and not far from the Source of the *Sir*, on whoſe Northern-Bank it is ſituate, in the Latitude of forty Degrees; according to the Jeſuits Maps of *Tibet*, drawn from the Journals of *Chineſe* and *Tartar* Travellers. For exhibiting the Country from thence, to the *Caſpian Sea*, thoſe Miſſioners tranſmitted Memoirs, which were put into the Hands of Mr. *Danville*, in order to make a general Map of *Tartary*: But as thoſe Memoirs are not publiſhed with the reſt by *Du Halde*, nor any Marks inſerted in this Map, by Roads, or otherwiſe, whereby one may trace or diſtinguiſh the Places to which thoſe Memoirs relate; we are quite at a Loſs to know how far they were of uſe to that ſkilful Geographer, in drawing the Part which concerns *Great Bukhâria*, more particularly as to the Courſe of the *Sir*, with the Countries and Rivers to the North of it, wherein his Map differs ſo widely from, and ſeems to excel all others.

Map of Bukhâria.

3. *The* Province *of* Bâlk.

Bounds and Extent: Soil and Produce: Inhabitants civilized. City of Bâlk: *The* Khân's *Caſtle: Its Trade.* Anderâb. Lapis Lazuli *Quarries.* Badag-ſhân. *Mines of Gold, Silver, and Rubies.* Belûr-tâg.

THE Province of *Bâlk*, or *Bâlkh*, lies to the South of the Province of *Samarkant*, and Eaſt of that of *Proper Bukhâria*. It is about three hundred and ſixty Miles long, and two hundred and forty in Breadth.

BENTINK obſerves, that although this Part is but ſmall, in Compariſon of all the reſt, which is in the Hands of the *Khân* of *Bukhâria*; yet being extreamly fertile, and thoroughly cultivated, the Prince, in whoſe Poſſeſſion it is, draws a fair Revenue out of it. This Province particularly abounds with Silk, of which the Inhabitants make very pretty Stuffs.

THE *Uzbeks*, ſubject to the *Khân* of *Bâlk*, are the moſt civilized of all who inhabit *Great Bukhâria*, to which the large Trade they have with the *Perſians* and *Indians*, in all Likelihood, contributes much; excepting in this, and that they are leſs thieviſh, and more induſtrious, they differ in nothing from the other *Tatars* [c].

THE Country of *Bâlk* is divided into ſeveral Provinces: The moſt remarkable are *Khotlân*, or *Katlân*, *Tokhareſtân*, and *Badagſhân*. Its chief Cities are *Bâlk*, *Fariyâb*, *Talkân*, *Badagſhân*, and *Anderâb*.

THE City of *Bâlk* is ſituate towards the Borders of *Perſia*, about fifty Miles to the South of *Termed*, on the River *Dehaſk*, which about forty Miles thence to the North-Weſt falls into the *Amû*. *Bentink* informs us, that *Balk* is at preſent the moſt conſiderable of all the Towns poſſeſſed by the *Mohammedan Tatars*, being large, fair, and well-peopled: Moſt of its Buildings are of Stone, or Brick; and its Fortifications conſiſt of Bulwarks of Earth, fenced without with a ſtrong Wall, high enough to cover thoſe employed in its Defence.

THE *Khân*'s Caſtle is a great Building, after the Eaſtern Faſhion, built almoſt wholly of Marble, dug-out of the neighbouring Mountains, which afford fine Quarries of it. It is Jealouſy alone which has hitherto preſerved this Prince in the Poſſeſſion of his Dominions, as it is ſure to find him a Support from one of the neighbouring Powers, when the other appears diſpoſed to ſeize his Territories.

ALL Foreigners having free Liberty to tranſact

[a] Called, formerly, *Jihân*, and *Alſhâſh*. [b] See before, *p.* 420. [c] Hiſtory of the *Turks*, &c. p. 466.

their

their Affairs in this City, it is become the Reſort of all the Buſineſs carried-on between *Great Bukhâria* and the *Indies*; to which the fine River above-mentioned, which paſſes through its Suburb, contributes not a little. Merchandizes pay two *per Cent.* going-in and coming-out; but thoſe who only travel as Paſſengers, pay nothing at all in this Place.

THE Town of *Anderâb* is the moſt Southern, which the *Uzbeks* poſſeſs at preſent; being ſituate at the Foot of the Mountains which ſeparate the b Dominions of *Perſia*, and the *Great Mogul*, from *Great Bukhâria*. As there is no other Way of croſſing thoſe Mountains towards *India* with Beaſts of Carriage, but by the Road through this City, all Travellers and Goods from *Great Bukhâria*, deſigned for that Country, muſt paſs this Way: On which Account the *Khân* of *Bâlk* conſtantly maintains a good Number of Soldiers in the Place; though otherwiſe it is not very ſtrong. c

THE neighbouring Mountains afford very rich Quarries of *Lapis Lazuli*, in which the *Bukhâr* Inhabitants drive a great Trade with the Merchants of *India* and *Perſia*. For the reſt, *Anderâb* is very rich, and well-peopled, conſidering it is but ſmall. Merchandizes pay there four *per Cent.* for Liberty of paſſing.

BADAGSHAN is ſituate at the Foot of thoſe high Mountain [a], which ſeparate the Dominions of the *Great Mogul* from *Grand Tartary*. It is a very ancient City, and exceeding ſtrong, by its Situation in the Mountains. It is dependent on the *Khân* of *Proper Bukhâria*, and ſerves him for a Kind of State-Priſon, where he ſhuts-up thoſe from whom he thinks it convenient to ſecure himſelf.

THIS Town is not very big; but it is well enough built, and very populous. The Inhabitants are enriched by the Mines of Gold and Silver, as well as Rubies, which are in their e Neighbourhood; thoſe who dwell at the Foot of the Mountains gathering a great Quantity of Gold and Silver-Duſt in Spring out of the Channels, made every Year by the Torrents, which fall in abundance from the Top of thoſe Mountains, when the Snow melts [b].

THOSE Mountains are called, in the *Mongol* Language, *Belûr Tâg*, or, *the dark Mountains*: In them riſes the River *Amû*, there called *Harrat*; on the North-Side of which *Badakſhân* f ſtands, about one hundred Miles from its Source. Its Diſtance, from *Bâlk*, is about two hundred and thirty; and from *Anghien*, in the Province of *Samarkant*, two hundred and ten. It is a great Thoroughfare of the Karawâns, deſigned for *Little Bukhâria*, or *China*, which take the ſame Road.

Inhabitants, Bukhârs.

SECT. II.

The Inhabitants *of* Great Bukhâria, *their* Manners *and* Cuſtoms.

THE Inhabitants of *Great Bukhâria* are, 1. The *Bukhârs*, or *Tajiks*, who are the ancient Inhabitants. 2. The *Jagatays*, or *Mongols*, who ſettled there under *Jagatay*, ſecond Son of *Jenghîz Khân*: And, 3. The *Uzbek Tartars*, who are the preſent Poſſeſſors.

1. *The* Bukhârs, *or* Tajiks.

The Bukhârs: *Their Perſons: Mens Dreſs: Womens Habit: Religion, Trade: Averſe to War: Their Origin unknown.*

ALL the Towns, both of *Great* and *Little Bukhâria*, from the Borders of *Karazm* as far as *China*, are inhabited by the *Bukhârs*; who being the ancient Inhabitants of thoſe Provinces, have that Name given them throughout the Eaſt: But the *Tartars* commonly call them *Tajiks*; which Word, in their Language, ſignifies nearly the ſame as Burgeſs [c], or Citizen.

The Bukhârs.

THE *Bukhârs* are commonly of the ordinary d Size, but well-ſet, and very fair complexioned, conſidering the Climate. They have, for the moſt Part, large Eyes, black and lively; are Hawk-noſed; their Faces well-ſhaped; their Hair black, and very fine; their Beards thick: In ſhort, they partake nothing of the Deformity of the *Tartars*, among whom they inhabit. The Women, who are generally large, and well-ſhaped, have fine Complexions, and very beautiful Features.

Their Perſons,

BOTH Men and Women uſe Calico-Shifts and Drawers: But the Men wear, beſides, a *Kaftan* (or Veſt) of ſome quilted Silk or Calico, which reaches to the Calf of the Leg; with a round Cloth-Bonnet, ſhaped much after the *Poliſh* Faſhion, having a large Fur-Border: Some alſo wear Turbans, like the *Turkiſh*. They tie their *Kaftans* about the Middle with a Girdle of a Kind of Silk-Crape, which goes ſeveral Times round the Body; and when they go-abroad throw over it a long Cloth-Gown faced, and even lined in Winter with Fur. Their Boots are made like the *Perſian* Buſkins, but not altogether ſo neat; and they have the Art of preparing Horſe-Hides for the Purpoſe, after a very ſingular Manner.

Mens Dreſs.

[a] Theſe are called *Belûr Tâg*, or, *the dark Mountains*. [b] Hiſtory of the *Turks*, &c. p. 466, *& ſeqq.*

[c] In Contempt for their living wholly in Towns, and following Merchandize: Whereas the *Tartars* prefer the Field, and treat Commerce as a baſe, mean Employment.

Great Bukhâria.

Womens Habit.

THE Women wear long Gowns of Calico, or Silk, which are pretty full, and hang loose about the Body. Their Slippers are shaped like those worn by the Women in the North of the *Indies*; and they cover their Heads with a little flat, coloured Bonnet, letting their Hair hang down the Back in Trresses, adorned with Pearl, and other Jewels.

Religion, Trade.

ALL the *Bukhârs* profess the *Mohammedan* Religion, nearly after the *Turkish* Form, except in some few Ceremonies. They subsist entirely by following mechanic Trades, or Commerce, which is wholly in their Hands, neither the *Kalmûks*, nor *Uzbek Tartars*, meddling with it. But as seldom any foreign Merchants arrive among them, especially in those Parts where the *Mohammedan Tartars* are Masters, the *Bukhârs* go in Crouds to *China*, the *Indies*, *Persia*, and *Siberia*, where they trade to very considerable Advantage.

Averse to War.

ALTHOUGH they possess all the Towns of these Provinces, they never meddle with Arms upon any Account, and trouble themselves only about their own Affairs; paying the *Kalmûks* and *Uzbek Tartars*, who are in Possession of the Country [a], a certain Tribute, regulated yearly for every Town and Village. On this Account the *Tartars* despise them extreamly, treating them as cowardly, simple People; as may be observed in several Places of *Abu'lghâzi Khân*'s History, before inserted.

Their Origin unknown.

THE *Bukhârs* themselves are utterly at a Loss whence they draw their Origin [b]. However, they know by Tradition, that they are not originally of *Bukhâria*, but came thither from some distant Country. They are not divided into Tribes, like the *Tartars*, and many other Eastern People: Whence those, who labour to reconcile sacred History with profane, take Occasion to surmise, that they are the Descendants of the twelve Tribes of *Israel* [c], whom *Salmanasser*, King of *Assyria*, carried-into the Kingdom of the *Medes* [d]. To support this Conjecture it is observed, that the *Bukhârs* have much the Appearance of *Jews*, and many Customs not unlike theirs [e]: But the Author thinks such Similitudes too weak for being convincing Proofs [f].

2. *The* Jagatay Tartars.

The Jagatays.

EVER since the Time of *Jagatay Khân*, second Son of *Jenghiz Khân*, who had for his Share *Great Bukhâria* and *Karazm* [g], those Provinces bore the Name of *Jagatay*, and his *Tartar* (or *Mongol*) Subjects, whom he brought along with him, that of *Jagatay Tartars*; till *Shabakht Soltân*, having driven-out the Descendants of *Tamerlan*, the Name of *Jagatays* gave Place to that of *Uzbeks*: Which, says the Author, our Geographers do not observe, continuing still to give the Name of *Jagatay* to *Great Bukhâria*, although it has ceased above two hundred Years ago. However, it is still used to distinguish the *Tartars* who first possessed that Country, from those who are the present Masters of it, although both, making now but one mixed Body, are comprized under the general Name of *Uzbeks*. On the other hand, the Troops of the *Great Mogul* of *India* are called *Jagatays* by the Orientals; because they were the *Jagatays* who conquered it [h], under *Soltân Babor*, after he had been expelled out of *Great Bukhâria*.

3. *The* Uzbek Tartars *of* Great Bukhâria.

The Uzbeks: *Their Dress, Diet, Language, Arms: Robust and brave: The Women warlike: Their Horses: Always at War: Few dwell in Towns.*

THE *Uzbeks*, who possess this Country, are generally reputed the most civilized of all the *Mohammedan Tartars*, notwithstanding they are great Robbers, like the rest. As low as their Boots, which they wear very clouterly, they are cloathed, Men and Women, after the *Persian* Fashion, but not at all so cleverly; and the chief among them wear a Plume of white Heron's Feathers on their Turbans.

PILLAW (which is boiled Rice, after the Fashion of the Orientals) and Horse-Flesh, are their most delicious Victuals; *Kumis* and Arack, both made of Mares-Milk, their common Drink.

THEIR Language is a Mixture of the *Turkish*, *Persian*, and *Mongol* Tongues: Yet they are able to understand the *Persians*, and the *Persians* them.

THEIR Arms are much the same with the rest of the *Tartars*, *viz.* the Sabre, the Dart, the Lance, and the Bow of a larger Size than ordinary, which they make-use of with much Strength and Dexterity. They have begun, for some Time past, to use Muskets, after the *Persian* Manner.

[a] The *Uzbeks* are in Possession of *Great Bukhâria*, and the *Kalmûks* of the *Lesser*. [b] The Author would have done well to have satisfied his Readers, whether the *Bukhârs* be the same People with the *Sarts* of *Karazm*, or not; and, if not, to have mentioned in what Respects they differ. [c] Methinks their not being divided into Tribes, is an Argument against, not for, this idle Notion. [d] 2 *Kings* xviii. [e] It cannot be otherwise, in Consequence of their being *Mohammedans*. [f] History of the *Turks*, &c. p. 455, *& seq.* [g] Rather the East Part of it, containing *Kat* and *Kayuk*, with the Country of the *Vigûrs*, or *Oyghûrs* and *Kashgar*, which comprizes *Little Bukhâria*. [h] History of the *Turks*, &c. p. 458, *& seq.*

Who

When they go to War, a great Part of their Cavalry wear Coats of Mail, and a little Buckler to defend them. a

THE *Tartars* of *Great Bukhâria* pique themſelves on being the moſt robuſt and brave of all *the Tartars*; and they muſt needs be a courageous People, ſeeing the *Perſians*, who are naturally very brave, are yet in ſome Meaſure afraid of them. The Women alſo of this Country value themſelves on Account of their Bravery. *Bernier* relates to this Purpoſe a very romantic Account, which was given him by the *Khân* of *Samarkant*'s Ambaſſador, to *Aureng Zeb*. The Truth is, that the *Tartar* Women of *Great Bukhâria* go often to War with their Huſbands, and do not fear coming to Blows upon Occaſion. They are, for the moſt Part, very well made, and tolerably handſome; nay, ſome of them may paſs for perfect Beauties in any Country. b

THE Horſes of theſe *Tartars* make but a very ſorry Appearance, having neither Breaſt, nor Buttocks; the Neck long and ſtrait, like a Stick, and the Legs very high, and no Belly. They are, beſides, of a frightful Leanneſs: For all this, they are exceeding ſwift, and almoſt indefatigable. They are eaſily maintained; a little Graſs, though ever ſo indifferent, and even a little Moſs, ſatisfying them in Caſe of Need: So that theſe are the beſt Horſes in the World for the Uſe the *Tartars* make of them. c

THEY are continually at War with the *Perſians*, the fine Plains of the Province of *Khoraſân* favouring their Incurſions: But they cannot penetrate into the Dominions of the *Great Mogul*, for the high Mountains which ſeparate them, and are inacceſſible to their Cavalry. d

SUCH of them as feed upon their Cattle, live under Huts, like their Neighbours the *Kalmûks*, encamping ſometimes here, ſometimes there, according to their Conveniency: But thoſe who cultivate the Lands, dwell in the Villages and Hamlets, very few of them living in the Cities or Towns, which are all poſſeſſed by the *Bukhâri*, or ancient Inhabitants [a]. e

SECT. III.

The Khâns *of* Great Bukhâria.

INTRODUCTION.

AS we do not propoſe to give a compleat Hiſtory of the ſeveral Races of the Kings of this Country, but only of ſuch as deſcended from the famous *Jenghiz Khân*; we ſhall refer our Readers for thoſe who preceded the Times of that *Khân*, to the Tranſlations of *Almakin* and *Abu'lfaraj* [b], with the Extracts given by *Teixeira* and *D'Herbelot* [c], from other Oriental Hiſtorians. The Succeſſion of the *Mogul Khâns* is divided into two Races, or Branches: The firſt that of the *Jagatays*, or thoſe who deſcended immediately from *Jagatay*, ſecond Son of *Jenghiz Khân*: The ſecond that of the *Uzbeks*, who derive their Origin from *Juji*, eldeſt Son of that Conqueror. Of the firſt *Abu'lghâzi* gives a regular Hiſtory, though in brief, and not accompanied throughout with the Dates and Lengths of the Reigns. Of the *Uzbek Khâns* of *Great Bukhâria*, he treats only occaſionally, on Account of the Wars, or Alliances, that happened between them, and the *Khâns* of *Karazm*. f

Jagatay Khâns.

1. *The* Khâns *deſcended from* Jagatay Khân.

Jagatay Khân. Kara Hulaku Khân. Doyzî Khân. Yaſun Timûr Khân. Ali Soltân Khân. Kazan Khân. Amîr Kazagan. Seyruk Tamiſh Khân. Toglûk Timûr Khân. Amîr Timûr Khân.

JAGATAY KHAN had ſomething ſo very ſevere in his Aſpect, that every-body was afraid to look at him: But he had a vaſt deal of Wit, on which Account it was that *Jenghiz Khân* gave him, for his Share, all the Country of *Mawara'lnahr*, and half of *Karazm*, as well as the *Vigûrs* [d], and Cities of *Kaſhgar*, *Badagſhân*, *Bâlk*, and *Gaſnah*, with their Dependencies, as far as the River *Sir-indi* (or *Indus.*) However, he never reſided in his Dominions, but with his Brother *Ugaday* (or *Oktay*, at *Karakoram*) leaving proper Perſons to govern in his Abſence. He had ſeven Sons, *Mutugan*, *Muzi*, *Balda Shâh*, *Saghin-lalga*, *Sarmans*, *Buſſu-munga*, and *Baydar*. Jagatay Khân.

JAGATAY dying in 1242 [e], he was ſucceeded by his Grandſon, *Kara Hulaku*, Son of *Mutugan*; who deceaſing while his Son *Mubarak Shâh* was yet very young, his Mother, *Argata Khatun*, took the Regency, till he attained the Age which qualified him to reign by himſelf. After the Death of *Mubarak Shâh*, *Algu*, Son of *Baydar*, came to the Crown, and had for his Kara Hulaku Khân.

[a] Hiſtory of the *Turks*, &c. p. 458, *&c ſeqq.* [b] Both from the *Arabic*. The firſt by *Erpenius*, under the Title of *Hiſtoria Saracenica*. The ſecond by Dr. *Pocock*, and ſtiled *Hiſtoria Compendioſa Dynaſtiarum*. The firſt in the Hiſtory of *Perſia*. The ſecond in his *Bibliotheque Orientale*. [d] Rather, we preſume, the Country of the *Vigûrs*; which ſeems to have been that Part of *Little Bukhâria* containing the Countries of *Turfân* and *Hami*, or *Khamil*, with the adjoining Parts of *Tartary* Northward. [e] *Hejrah* 640.

Great Bukhâria.

Succeſſor *Barak Khân* [a], who in the third Year of his Reign embraced *Mohammediſm*, and took the Name of *Jelal-addin*. He dying, the Dignity of *Khân* was conferred on *Beghi*, Son of *Sarmans* [b]; who was ſucceeded by *Buga Timûr*, a Great Grandſon of *Mutugan*.

Doyzi Khân.

BUGA TIMUR had for his Succeſſor *Doyzi Khân*, Son of *Barak Khân*; who was ſucceeded by his Son, *Konza Khân*. *Konza* dying, *Baliga* alſo, a Grandſon of *Mutugan*, aſcended the Throne, and was ſucceeded by *Iſan Boga*, ſecond Son of *Doyzi Khân*. After him, his Brother *Dwi Timûr* [c] held the Scepter of *Mawara-'lnahr*, which was poſſeſſed next by his Brother *Tarmaſhir*; who embraced *Mohammediſm*, and reſtored that Worſhip, which had almoſt become extinct ſince the Time of *Barak Khân*.

Yaſun Timûr Khân.

TARMASHIR KHAN was ſlain [d] by his Brother *Butan Khân*, who afterwards ſeized the Throne, and had for his Succeſſor his Nephew *Zangſhi*. *Yaſun Timûr*, Brother of this *Khân*, envying him the Dignity, reſolved to make him away alſo: But their Mother ſuſpecting his Deſign, adviſed *Zangſhi Khân* to be on his Guard; who immediately taking the Field againſt *Yaſun Timûr*, had the Misfortune to loſe the Battle, with his Life: After which the Victor cauſed his Mother's Belly to be ripped-up, in Revenge for having given his Brother the Information abovementioned.

Ali Soltân Khân.

DURING his Reign, *Ali Soltân*, a Prince deſcended from *Ugaday Khân*, became ſo formidable, that after his Death he brought *Mawara-'lnahr* under his Subjection: But *Ali* dying, *Kazan Soltân* [e] reſtored the Poſſeſſion to the Houſe of *Jagatay Khân*. He was a very cruel Prince. He at firſt carried-on a War ſucceſſfully againſt *Amîr Kazagan* [f], whom he defeated: But afterwards having taken-up his Winter-Quarters about *Karſhi*, the Weather proved ſo ſevere, that moſt of his Horſes periſhed. On this Advice, *Amîr Kazagan* returned immediately; and the *Khân* meeting him with his Forces, now reduced to Infantry, he was ſlain in the Battle, in the Year 1348 [g]. *Kazan* was the laſt of the ſixteen Princes of the Poſterity of *Jagatay*, who reigned with the full Power and Dignity of *Khâns*: For thoſe who ſucceeded him had only the Name, without the Authority, each Head of a Tribe aſſuming the Liberty of acting according to his own Fancy.

AFTER *Kazân*'s Death, *Amîr Kazagan* [h], deſcended of *Ugaday Khân*, mounted the Throne; but was ſlain when he had reigned two Years, no-body knows by whom [i]. On this *Bayan Kuli*, Son of *Surga*, Son of *Doyzi Khân*, of the Line of *Jagatay*, ſeized the Scepter, although *Kazagan* left ſeveral Sons; one of whom, called *Abdallah*, he cauſed to be ſlain, on Suſpicion of having a criminal Correſpondence with his Wife [k]. *Timûr Shâh*, Son of *Yaſun Timûr Khân*, ſucceeded *Bayankuli*. His Succeſſor was *Adil Soltân*, Son of *Mahamet Pulad*, Son of *Konza Khân*. Among the Vaſſals of this Prince there were two Heads of Tribes, *Amîr Timûr* [l], Son of *Taragay*, of the Tribe of *Burlas*; the other *Amir Huſſeyn*, Nephew of *Abdallah Khân*, deſcended from *Ugaday Khân*. Theſe two Lords conſpiring againſt *Adil Soltân*, ſeized his Perſon, and, having bound him Hands and Feet, drowned him. They nominated in his Room *Kabul Soltân* [m]. In his Reign they ſeized the City of *Balk*, and ſlew the *Khân*, who governed there [n].

ON *Kabul Khân*'s Deceaſe theſe two Lords ſet-up *Seyruk Tamiſh*, Son of *Daniſhmanza*, deſcended from *Ugaday Khân*; and, after his Death, his Son, *Mohammed Soltân*, was inveſted with the Dignity [o], but poſſeſſed no more of the Power than his Predeceſſors, ſince the Time of *Kazan Khân*. Whilſt the Government was on ſo unſteady a Footing, *Amûr Timûr* made War againſt all the *Mongol* Tribes, in the Country o

[a] Son of *Jaſuntu*, Son of *Mutugan*. [b] Fifth Son of *Jagatay*. [c] *Iſan Boga* having been called to reign in *Kaſhgar*, poſſibly left the Throne of *Mawara'lnahr* to his Brother *Dwi Timûr*. [d] According to the Hiſtory of *Timûr-bek*, vol. 1. p. 18, *Turmaſhirin*, (as he is there called) ſixteenth in Succeſſion from *Jagatay*, died in the Year 1336. [e] Son of *Yaſur*, Son of *Urek Timûr Khân*, Son of *Kutugay*, Son of *Boſay*, Son of *Mutugan*, Son of *Jagatay Khân*. [f] Whom his Tyranny had forced to revolt. See Hiſt. of *Timûr-bek*, vol. 1. p. 2. [g] *Hejrah* 749. *Shams addin* makes it 747, or two Years earlier, and gives him a Reign of fourteen ſolar Years over *Mawara'lnahr* and *Turkeſtân*. Hiſt. *Timûr-bek*, p. 3. [h] He was Son of *Daniſhmanza*, Son of *Kaydu*, Son of *Kaſhi*, Son of *Ugaday*, or *Oktay Khân*. [i] *Shams addin* ſays, he was killed, while hunting, by *Kotluk Timûr*, his Son-in-law, in Revenge for ſome Affront, *Hejrah* 759, or 1357. After *Kazan*'s Death, he ſet on the Throne *Daſhmenjeh Aglen*, deſcended from *Oktay*: But ſoon after putting him to Death, advanced *Beyan kuli Aglen* to the Dignity of Grand *Khân*, himſelf governing the Kingdom. He was an equitable Prince, and of a ſweet and merciful Temper. He reduced *Malek Huſſeyn*, of *Herat* in *Khoraſân*, to Submiſſion in 1351. See Hiſt. of *Timûr-bek*, p. 3, & *ſeqq*. [k] The Hiſtory of *Timûr*, p. 15, affirms, that *Abdallah* ſucceeded his Father, and falling in Love with the Empreſs, ſlew the *Khân*, and ſet-up *Timûr Shâh* the ſame Year. [l] By *European* Authors, called *Tamerlan*. [m] Son of *Dorji*, Son of *Ilzaktay*, Son of *Doyzi Khân*. [n] Hiſtory of the *Turks*, &c. p. 165, & *ſeqq*. [o] He was the laſt of the Poſterity of *Oktay*, that *Kabul Khân* had been of the Deſcendants of *Jagatay*: For afterwards the Government fell to *Timûr bek*, and his Deſcendants.

Mawara

Mawara'lnahr, getting ſometimes the better, at a other Times the worſt. *Togalak* (or *Togluk*) *Timûr Khân* of *Kaſhgar* [a], who was become very formidable during theſe Troubles, perceiving ſo favourable an Opportunity to enlarge his Dominions, entered *Mawara'lnahr* with a great Army. At his Approach one Part of the Inhabitants, tired with their civil Wars, ſubmitted to him [b]; another Part, who reſiſted, was put to the Sword; and the reſt retired with *Timûr* and *Huſſeyn* into *Karazm*.

TOGALAK Timûr Khân having ſtaid a whole Year in the conquered Country, gave the Government to his Son *Ilyas Khoja* [c], and went back to *Kâſhgar*, where he died the Year following [d]. On this News thoſe two Lords returning, conſtrained *Ilyas Khoja* to retire to *Kâſhgar*. After this they divided the ſovereign Authority between them, and lived for ſome Time in good Underſtanding: But, at length, falling at Variance, they came to a bloody Battle near *Balk*; in which *Huſſeyn* being ſlain, left his Rival ſole Maſter of the Country. It is true, *Mohammed Soltân Khân* always bore the Title, but it was *Amîr Timûr* who in Fact reigned; and the *Khân* was ſo far from envying him, that he continually prayed for his Life. *Timûr* having reigned in this Manner for thirty-three Years, at the Age of ſixty, entered into the Country of *Rûm* [e], and fought with *Soltân Bayazîd* a bloody Battle, which laſted from Morning till late in the Night. The *Soltân* ſeeing his Army intirely deſtroyed, fled: But *Timûr* ſending the *Khân* in Purſuit of him, his few Followers were ſlain, and himſelf taken Priſoner.

AFTER a Year's Stay in thoſe Parts, *Timûr* returned to his own Dominions, and put-to Death not only *Soltân Bayazîd*, but alſo the good *Mohammed Soltân Khân* [f]; and then cauſed himſelf to be proclaimed *Khân*. This done, he undertook an Expedition againſt *Kitay*; but got no farther than the City of *Otrar*, where he fell ſick and died in the Year 1404 [g], after he had reigned thirty-ſix Years, and lived ſixty-three [h]. *Abu'lghâzi Khân*'s Deſign having been only to ſpeak of thoſe Princes who deſcended from *Jenghiz Khân*, he gives no Account of the Succeſſors of *Amîr Timûr*, becauſe they were of his Race; whom, at length, the *Uzbeks*, under *Shahbâkht Soltân*, diſpoſſed of their Dominion in *Mawara'lnah*, or *Great Bukhâria*. Uzbek Khâns.

2. *The* Uzbek Khâns *of* Great Bukhâria.

Introduction. Shâhbakht Khân. Kuſhanji Khân. Abuſayd Khân. Obeyd Khân *defeated by* Din Mahamet. Iſkander Khân. Abdallah Khân *ſubdues* Karazm. Abdol momîn Khân. Imâm kuli Khân. Nadir Mahamet Khân. Abdalazîz Khân. *Diſagreement of Hiſtorians.*

WE have in *Teixeira* [i], *D'Herbelot* [k], and other Extracts from the Oriental Authors, ſome Account of the Princes who reigned in *Great Bukhâria* ſince the *Mohammedan* Conqueſts, under the ſeveral Dynaſties of the *Arabs*, *Perſians*, and *Turks*. The ſame Authors treat alſo of the Succeſſors of *Jenghîz Khân* in that Country; but ſpeak very little, and confuſedly of the *Uzbek* Princes who governed there. They neither give us all their Names in Order of Succeſſion, nor the Dates or Lengths of their Reigns, and put an End to their Dominion above two hundred Years ago. In ſhort, the beſt Account of the *Uzbek Khâns* of *Great Bukhâria* to be met-with any-where, is that which *Abu'lghâzi Khân* has inſerted occaſionally in his Hiſtory of *Karazm*, on Account of the Wars that happened from Time to Time between thoſe two Countries, of which chiefly the following is an Abſtract. *Introduction.*

1. *SHAHBAKHT* (or *Sheybeg*) *Khân*, in the Year 1494 invaded *Great Bukhâria*, from whence he drove-out *Soltân Babor*, with the *Jagatays*; who retiring into *India*, made ſome Conqueſts, and ſettled there. After this he entered *Khoraſân*, and ſubdued that Province alſo, from *Soltân Huſſeyn Mirza*. Theſe Conqueſts he finiſhed in 1498, from whence his Reign commences. In the Year 1507, *Soltân Huſſeyn* raiſed an Army at *Herât*, the Capital of *Khoraſân*, with a Deſign to invade *Great Bukhâria*: But dying by the Way, his Son *Padi Azzamon* ſucceeded him. This Prince, unable to withſtand *Shaybeg*, retired to *Kandahâr*; where raiſing Forces, he returned to meet the *Uzbek*: But being defeated, fled into *Perſia* to *Shâh Iſmaël Sofi*. This Prince eſpouſing *Padi Azzamon*'s Cauſe, marched againſt Shâhbakht Khân.

[a] Called by *Shams addîn*, p. 18, King of the *Jetes*. [b] His firſt Invaſion was in 1359: But it is his ſecond in 1360, that is referred to here. See Hiſt. of *Timûr bek*, p. 18, and 28. [c] Called *Elias Khojah Aglen*, by *Shams addin*. [d] In 1362. [e] Or, *of the Romans*, meaning *Turky*. This Battle was fought near *Angûri* in *Natolia*, or *Aſia Minor*, on *Friday* the twenty-eighth of *July*, 1402. [f] Both theſe Facts are contradicted in the Life of *Timûr bek*, where *p.* 270, the *Khân* is ſaid to have died in *Natolia*, ſoon after the Battle with *Bayazid*, as he was in Purſuit of the Enemy; and that *Bayazid* died the Year after at *Akſhahr* in the ſame Country, much regretted by *Timûr*, who had loaded him with Honours and Kindneſſes, when alive. See *p.* 285. [g] *Hegrah* 807. [h] Hiſtory of the *Turks*, &c. p. 171, *& ſeqq.* [i] Hiſtory of *Perſia*, p. 335. [k] Article *Shaybek*.

Great Bukhâria.

Shaybeg, in the Year 1510; and meeting him at a *Marû*, a bloody Battle was fought, wherein *Shaybeg*'s Army was defeated, and himself killed, after he had reigned twelve Years.

Kushanji Khân.

2. *KUSHANJI KHAN*, the Successor of *Shaybeg*, is reckoned the most noble and powerful of all the *Uzbek* Princes who reigned in *Mawara'lnahr*. In 1512, *Soltân Babor* returning out of *India*, and being joined by *Ahmed Isfahani* [a], passed the *Jihûn* (or *Amû*) and ravaged the Country about *Karshi*. In short, they b had almost reduced the whole Country, when *Kushanji Khân*, setting-forward with an Army, met and defeated them. The *Persian* General was killed on the Spot, and *Babor* fled-back to *India*. In 1529, *Kushanji Khân* marched into *Persia*, against *Shâh Tahmasb*, Son of *Ismaël*; but was defeated, and retired to his Dominions. After this he returned to *Marû*, and would again have broken into *Persia*: But a Peace being concluded between the two Monarchs, he went c back to *Samarkant*; where he died the same Year, after a Reign of twenty-eight [b].

Abusayd Khân.

3. He was succeeded by his Son, *Abusayd Khân*; who reigned four Years, without doing any Thing remarkable [c], and died in 1532.

Obeyd Khân

4. *OBEYD KHAN*, his Successor, was the Son of *Mohammed Soltân*, Brother of *Shâhbakht*, who conquered *Great Bukhâria* [d]. This Prince entering *Khorasân*, took some Towns; while the *Uzbeks* of *Karazm*, doing the like on their Side, d *Shâh Tahmasb* thought fit to make Peace with the *Uzbeks*. Stirred-up by *Omar Ghâzi Soltân*, who fled to him from *Karazm*, this *Khân*, in Conjunction with the *Khâns* of *Samarkant* and *Tashkant*, enters that Country in 1542; which they over-ran, seizing *Avanash Khân*, and all the Princes of his Family, whom he divided, together with the Towns, among his Confederates. *Din Mahamet Soltân*, eldest Son of *Avanash Khân*, as soon as *Obeyd Khân* was withdrawn, invading e *Karazm*, retakes *Khayuk* and *Urjenz*. On this News, *Obeyd Khân* returns with a numerous Army; but being met by *Din Mahamet* the same Year with much inferior Forces, was entirely defeated, and the Princes, his Relations, restored by an Exchange of Prisoners [e].

Defeated by Din Mahamet.

About the Year 1550, *Obeyd Khân* entering *Khorasân*, took *Marû* from the *Persians*; but growing jealous of the Governor, and sending an Army to displace him, that Officer surrendered it to *Din Mahamet*, then *Khân* of *Karazm*. After this, *Nûr Mahamet Soltân*, Grandson of *Din Mahamet Khân*, being envied the Possession of his Grandfather's Estate in *Khorasân*, the Princes of his Family combined to take it from him: Whereupon he delivered-up his four Cities of *Marû*, *Nasay*, *Yaursurdi*, and *Duruhn*, to *Obeyd Khân*; imagining that Prince would leave him in Possession, and be content with receiving Tribute from him; but found himself deceived. The Time of *Obeyd Khân*'s Death is not mentioned. *Teixeira* and *D'Herbelot*, after *Mirkond*, place it in 1540 [f], allowing only six Years to his Reign: But this must be a great Mistake. According to *Abu'lghâzi Khân*, he must have reigned above fifty Years, and died about 1584, or 1585 [g].

5. *OBEYD KHAN* seems to have been succeeded by *Iskander Khân* [h], Son of *Janibek*, Son of *Khojah Mahamet*, Son of *Abu'lgayir Khân*, who reigned in *Kipjâk*. There is nothing remarkable mentioned, relating to this Prince, who was not right in his Senses. On the Death of his Predecessor, *Nûr Mahamet* went and recovered his four Towns out of the Hands of the *Bukhârian Uzbeks*. *Shâh Abbâs* I. also willing to profit by that Event [i], went and took *Marû* from him. We find nothing to give Light into the Beginning, End, or Length of his Reign.

6. *ABDALLAH KHAN*, Son of *Iskander Khân*: When he began his Reign is likewise uncertain; only we find, that some Years after the Death of *Ali Soltân*, which happened in 1571, *Abdallah* invaded *Karazm*; but retired on the Approach of *Hajim*, or *Azim Khân*. Some Time after, the Sons of this latter having stripped a *Turkish* Ambassador at *Urjenz*, who was on his Return from *Great Bukhâria*, *Abdallah Khân* enters *Karazm* a second Time, with a great Army; and having conquered it chiefly by Fraud, carried ten Princes of the *Khân*'s Family into *Bukhâria*, where he put them all to Death.

Mean-time *Hajîm Khân* retired into *Persia* to *Shâh Abbâs*, in the Year of *the Serpent* [k]. Two Years after, *Abdallah Khân* invading *Khorasân*, *Hajim Khân* took the Opportunity, while *Shâh Abbâs* marched against that Invader, to surprize *Urjenz* and *Khayuk*; but they were soon recovered again by the Troops of *Abdallah Khân*,

[a] Perhaps the same with *Najemi* (rather *Ajemi*) *Soni*, whom, according to *Mirkond*, in *Teixeira*, *Shâh Ismael* sent with an Army to assist *Babor*. [b] *Teixeira*'s History of *Persia*, p. 335. *D'Herbelot Art. Shaybek*, p. 771. [c] The same. [d] See before, *p.* 492. note e. [e] See before, *p.* 493, & *seq.* [f] In the City of *Bokhâra*. [g] See before, *p.* 496, & *seq.* [h] See before, *p.* 489. b. [i] As from hence it appears, that *Abbâs* took *Marû* soon after *Obeyd Khân*'s Death; and as *Abbâs* began his Reign in 1585, therefore *Obeyd Khân* must have lived till that Year, if not beyond it. But, perhaps, it should be *Tahmasb* instead of *Abbâs*, which may reduce the Date to 1575. [k] This, reckoning back from the Death of *Abdallah Khân*, must be the Year 1593.

who

who in Perſon beſieged *Hazaraſb*, and ſubdued it. After this he returned into *Great Bukhâria*, where he died the laſt Day of the Year 1597, called *Tauk*, or *the Hen*. According to *Teixeira*, and *D'Herbelot*, this active Prince died in the Year 1540 [a], and reigned but ſix Months [b].

7. *ABDOLMOMIN KHAN*, Son of *Abdallah Khân*, by a Daughter of *Mahamet Khân* of *Karazm*, ſucceeded his Father. Being at that Time in *Khoraſân*, he ſet forward to return home; but on his Way, at *Zamin*, on the River *Amû*, was ſlain by his own People [c].

8. *IMAM Kuli Khân*, Son of *Yar Mahamet Soltân*, ſucceeded *Abdolmomin Khân* [d]. In the Year 1620, *Arab Mahamet Khân*, of *Karazm*, having been defeated by his two rebellious Sons, *Abu'lghâzi Soltân*, who had joined his Father, fled, after the Battle, into *Great Bukhâria*, and was received kindly by the *Khân*. In 1622, *Iſfandiar Soltân* having recovered *Karazm*, and put his two rebellious Brothers to Death, *Abu'lghâzi* returned to *Urjenz*: But his Subjects leaving the Country on the Appearance of a Comet, a Year or two after, he retired to *Turkeſtân*, where he ſtaid two Years at the Court of *Turſum Khân*, and then went into *Great Bukhâria* [e] to *Imâm Kuli Khân*; who receiving him but coldly, becauſe he had firſt taken Refuge with his Enemy, he returned again to *Karazm* on the Invitation of the *Turkmâns* [f]. *Imâm Kuli Khan* died about the Time [g] that *Abu'lghâzi Soltân* was proclaimed *Khân* of *Karazm* [h].

9. HE was ſucceeded by his Brother *Nadir Mahamet Khân*. In 1644, the *Turkmâns* about *Khayuk*, and *Hazaraſb*, in *Karazm*, refuſing to ſubmit to *Abu'lghâzi*, upon his being proclaimed *Khân*, put themſelves under the Protection of *Nadir Mahamet Khân*, who conferred the Government of thoſe two Places on his Grandſon, *Khiſſeran Soltân*: But ſoon after recalling him, he ſent *Yakub*, one of his Lords, to command in his Room. In the mean Time he was dethroned in 1646, by his Vaſſal Lords, for his harſh Treatment of them [i]. Uzbek Khâns.

10. HE had, for his Succeſſor, his Son *Abdâlaziz Khân*. This Prince having formed a Deſign to conquer the Country of *Bâlk*, *Subhan kuli Khân*, its Sovereign, ſent to intreat Aid of *Abu'lghâzi Khân*; who laying hold of ſo fair an Opportunity, to revenge the Injuries done to his Family by *Abdallah Khân*, entered *Great Bukhâria* for ſeveral Years ſucceſſively, deſtroyed ſeveral Towns, and committed great Ravages. At length, in 1658, a Peace was concluded between them, as hath been already related more at large [k]. Since that Time we have no regular Hiſtory of the *Khâns* of this Country. Abdalaziz Khân.

THE *Perſian* Hiſtorians, according to *Teixeira*, and *D'Herbelot*, make *Abdallatif*, the Son of *Kuſhanji*, to ſucceed *Abdallah Khân*, in 1540. The firſt ſays he died the next Year, and that in him ended the Sovereignty of the Succeſſors of *Jenghîz Khân* in *Mawara'lnahr* [l]. But this is probably ſome Miſtake committed by *Teixeira*, ſince *D'Herbelot* ſays, from the Authority of the *Lebtarîkh*, that *Abdallatîf* was living in the Year 1541, when that Book was written [m]. However that be, the Reader finds a wide Difference between the Account given by *Abu'lghâzi Khân*, and the *Perſian* Hiſtorians; though he can be at no Loſs to determine which he ought to rely on. *Diſagreement of Hiſtorians.*

[a] *Hejrah* 947. [b] See before, *p.* 499, *& ſeqq.* [c] The ſame, *p.* 502. [d] In the Year 1598, it may be preſumed. [e] About 1627. [f] See before, *p.* 504, and 507. [g] Perhaps in 1642. [h] Hiſtory of the *Turks*, &c. p. 356. [i] See before, *p.* 510, *& ſeq.* [k] The ſame, *p.* 511. [l] *Teixeira*'s Hiſtory of *Perſia*, p. 336. [m] *D'Herbelot*, p. 772.

CHAP.

Little Bukhâria.

CHAP. VI.

A Deſcription of LITTLE BUKHARIA, or the Kingdom of KASHGAR.

INTRODUCTION.

Materials for the Geography. Account of the Map made from accurate Journals. Materials for the Hiſtory.

Materials for the Geography.

ALTHOUGH the *Nubian* Geography, that of *Abu'lfeda*, *Shams addin*'s Hiſtory of *Timûr bek* (or *Tamerlan*) and the Writings of other Oriental Authors, have given *Europeans* ſome tolerable Idea of *Great Bukhâria*; yet the *Leſſer*, though farther diſtant, happens to be better known to them, on Account of being the common Paſſage of the Karawâns from *Perſia* and the *Indies*, as well as *Karazm* and *Tartary*, to *China*. By this Means *Europeans* have not only gotten ſome Information of the Country from the Merchants who performed the Journey [a], but have traverſed it themſelves, from one End to the other; as did the Jeſuit *Goës*. On the other hand, the late Miſſionary Geographers in *China*, making-uſe of the Journals of ſeveral *Chineſe* and *Tartars*, who, on the Score of Commerce, and other Occaſions, travelled through *Little Bukhâria*, have drawn a Map of it, and the adjoining Parts of *Tartary*, with the Roads, much more compleat and accurate than any before extant.

Account of the Map

THIS Map is contained in thoſe of *Tibet* publiſhed by *Du Halde*. It is true, the Authors of the Journals from whence it was made, took no Obſervations of the Latitude, ſo to fix the Poſitions of Places; yet that Defect has been in ſome Meaſure ſupplied by the Miſſioners: For *Jartoux* and *Fredelli* the Jeſuits, with *Bonjour* the *Auguſtinian*, meaſured the Diſtance between *Kya-yu-quan*, the moſt North-Weſtern Place in *China*, at the End of the great Wall, and *Hami*, or *Khamil*, the moſt Eaſtern Place in *Little Bukhâria* [b]; of which they took the Altitudes. By this Means not only the Situation of the Country in general is fixed, with reſpect to *China*; but alſo that of the Cities and Towns muſt be tolerably well aſcertained, as being laid-down from *Hami*, whoſe Poſition was determined [c]. It could be wiſhed, ſays *Gaubil*, one of their Society, that theſe Miſſioners could have proceeded more Weſtward: But it could not poſſibly be done [d].

REGIS informs us, that the Map of *Tſe-vang raptan*'s Country (who was poſſeſſed of all *Little Bukhâria*, as well as the Weſtern-Part of *Great Tartary*) was drawn partly from what the Miſſioners learned at *Hami*, partly from the Journal of the Emperor of *China*'s Envoy to that Prince [e], and partly from the Memoirs of the Imperial Generals [f]. With regard to the *Tartar* Journals, from whence the Map was drawn, *Gaubil* is more particular. He tells us, he had the Peruſal of ſeveral, from *Hami* to *Harkas*. One in particular, tranſlated by *Parennin*, was excellent: For it marked both the Diſtance and Bearing of Places throughout the Road; which ſupplied to him the Want of aſtronomical Obſervations, and more exact Meaſures in drawing a Map of the Country. The Journal was given to *Gerbillon* by a Lord, whom the Emperor *Kang-hi* had ſent to *Tſe-vang raptan*.

THIS Lord, who underſtood Geography, and had good Information given him of the Roads, cauſed them to be meaſured, as exactly as he poſſibly could. He went from *Khya-yu-quan* to *Hami*, from *Hami* to *Turfân*, and thence to *Harkas Ili*. Some Time after *Gaubil* had traced-down the Road, according to that Journal, he ſaw a Map, in the Hands of *Regis*, made from the Journals and Memoirs of ſeveral Perſons, ſent by the Emperor to *Harkas*, among which he obſerved the Rout taken by the abovementioned Lord. He adds, that there were ſeveral other Journals, which gave Places their Situations, very conformable to that Map [g], both as to Latitude and Longitude [h]. Hence it appears, that the *Chineſe* and *Tartars* far excel the Generality of *Europeans*, in keeping exact Journals of the Roads they take in their Travels.

SUCH Materials we have for the Geography

[a] Such as thoſe collected by *Ramuſio*, and by *Johnſon*, who travelled with *Jenkinſon*. [b] This Diſtance they found to be nine hundred and ſeventy *Li*, or *Chineſe* Furlongs; of which ten going to a *French* League, the Meaſure reduced to Leagues will be ninety-ſeven. [c] See the Table of Situations, *p.* 389. [d] See *Souciet*'s *Obſ. Math.* &c. p. 177. [e] Who reſided near the River *Ili* in Tents, his Camp being called *Harkas*, or *Urga*. [f] *Du Halde*'s *China*, vol. 2. p. 253. [g] This ſeems to be the Map of the Country between *China* and the *Caſpian Sea*, which was ſent into *France*. [h] *Souciet*, as before, *p.* 146, and 178.

of

of *Little Bukhâria*. With regard to the Inhabitants and their Customs, besides what little the Travels of *Goës* afford, and the few Remarks made by the Missioners who were at *Hami*, there is an express Treatise on the Subject published at *Cologne* in 1723, intitled, *The present State of Bukhâria* [a], said to be extracted from the Manuscript of a Traveller. It was published (as the *English* Translator of *Abu'lghâzi Khân*'s History was informed) by the *French* Editor, whom we have often cited under the Name of *Bentink*. But it does not appear that he made much, if any, Use of it in his Notes on that Author: For this Reason we have added nothing from thence to his Account of the *Bukhârs* in *Great Bukhâria*. In short, however exact this Tract may be in what regards those People and their Customs, the Geography is very erroneous and trifling.

SECT. I.

Of the Name, Bounds, Extent, *and* Division.

Name Little Bukhâria: Jagatay, *and* Kâshgar. *Bounds and Extent. Climate. Gold and Silver Mines. Precious Stones. Division.*

THE Name of *Little Bukhâria* is given to this Country not because it is less in Extent than the *Great Bukhâria*, being in Reality much larger, but because it is inferior to it, as to the Number and Beauty of its Cities, Goodness of the Soil, Abundance of Inhabitants, or the like. The Appellatives of *Great* and *Little* seem to have been imposed by the *Uzbeks*, to distinguish that Part of the *Bukhârs* Country possessed by themselves, to which they naturally gave the Preference, from the other Part, which was not subdued by them: And yet the Name of *Little Bukhâria* is never once used by *Abu'lghâzi Khân*; who, in his History, speaks of *Kâshgar*, *Yarkien*, and other Countries that belonged to it, as so many distinct Regions not known to him to be comprized under any general Denomination.

BEFORE the *Uzbeks* conquered Part of the *Bukhârs* Country, the Whole was known by the Name of *Jagatay*, or *the Country of Jagatay*, Son of *Jenghiz Khân*, to whose Share it fell. It was also called *the Kingdom of Kâshgar* by *Europeans*; that Province having been the principal Part of the Whole, and Quarter where the *Khân* had his Residence. In the History of *Timûr Bek*, *Little Bukhâria* is considered as Part of *Moguliſtân*, and the Country of *Jetah*, or the *Getes*, whom the *Persian* Geographers place in that Part of *Tartary*, which lies to the North of it. *The Geography.*

LITTLE BUKHARIA lies surrounded by Deserts; on the West, it has *Great Bukhâria*; on the North, the Country of the *Eluths*, or *Kalmûks*, in *Tartary*; on the East, that of the *Mongols* subject to *China*; and on the South, *Tibet* (from which it is separated by a *Kobi*, or Desart, of vast Extent) and the North-West End of *China*; which is divided from it by another Desart, or Branch of the former. *Bounds and Extent.*

IT is situated between the ninety-second and hundred and eighteenth Degree of Longitude; and between the thirty-fifth Degree thirtieth Minute and forty-fifth Degree of Latitude; being in Length, from West to East, about eight hundred and forty Miles; and in Breadth, from South to North, five hundred and seventy. But if it be considered according to its Course (for it takes a semicircular Sweep from the South to the North-East) its Length will be twelve hundred Miles, and its Breadth never exceeding an hundred and forty.

LITTLE BUKHARIA is populous and fertile enough; but on account of the great Elevation of its Land, and the high Mountains, which bound it in several Parts, especially towards the South, it is rendered much colder than naturally it ought to be [b] by its Situation. *Climate.*

IT is very rich in Mines of Gold and Silver; but the Inhabitants reap little Advantage by them; because neither the *Kalmûks* (who are Masters of the Country) nor *Bukhârs*, care for working in the Mines. However, both reap a yearly Advantage from them, by the Abundance of Gold which they gather every Spring out of the Gutters, made by the Torrents that fall from all Sides of those high Mountains when the Snow melts: And from hence comes all that Gold-Dust which the *Bukhârs* carry into the *Indies*, *China*, and even as far as *Tobolskoy* in *Siberia*. *Gold and Silver Mines.*

MUCH Musk also is found in this Country, and all Sorts of precious Stones, even Diamonds: But the Inhabitants not having the Art either to polish or cut them, are obliged to sell them rough as they are found [c]. *Precious Stones.*

THE whole Country consists of one long Chain of Mountains, with its Branches, running through the sandy Deserts, which, towards the Foot of those Mountains, is interspersed with fruitful Plains; so that it may be compared to a long Reef

[a] *Containing an exact Description of its Situation, Customs, Government, and Trade, with an Account of the late Revolution in that Country, the Death of* Bosto Cham, *and Life of* Contaisch Areptan, in Octavo, Pages 47. [b] According to the *Present State of Bukhâria*, this Country abounds in all Sorts of Fruits and Vines: But the Heat is so excessive, that there is no bearing it without Doors. See History of the *Turks*, &c. p. 477. [c] History of the *Turks*, &c. p. 469, *& seq.*

Little Bukhâria.

of Rocks and Islands rising in the Sea. *Regis* observes, that between the Cities in this Country there are no Villages [a]: So that in travelling a whole Day from one to the other, there is not so much as a House of Entertainment. He attributes this, partly, to the Genius of the *Tartars*, who prefer Tents to Houses, and, partly, to the Nature of the Country; which is so divided by Branches of the *Kobi*, that it is only habitable in some particular Places [b].

Division.

LITTLE BUKHARIA consists of several distinct States, or Countries; but their exact Number, Bounds, and Extent, are unknown to us. In the Time of *Goës* it consisted of two Kingdoms, *Kashgar* to the West, and *Chalis* to the East. At present it may be conveniently divided into four Parts; the Kingdom of *Kâshgar*, and the Provinces of *Aksu*, *Turfân*, and *Khamil*, or *Hami*.

1. *The* Kingdom *of* Kâshgar, *or* Kâskar, *and* Province *of* Aksû.

Bounds and Extent. *City of* Kâshgar. Yarkian, *the Capital.* *Castle, and Trade.* Khotam, *or* Hotom. Yalâsâgân, *or* Khambâlik. *Country of the* Kitân, *or* Kara-kitay. *City of* Akfû, Kashgar *and* Chalis.

Bounds and Extent.

KASHGAR is the most Western Province of the four, or, it rather lies to the South of *Aksu*. It hath *Great Bukhâria* to the West; from whence it is separated by a double Chain of Mountains, with Deserts between; on the South, *Tibet*; and to the East, the great *Kobi*, or Desart, extending as far as *Eastern Tartary*. It may be about four hundred and twenty Miles in Length from North to South, and three hundred and sixty broad from West to East. Within this Compass we do not meet with above eight or nine Towns mentioned by Authors [c]; of which only three are of any Note, *viz.* *Kâshgar*, *Yarkian*, and *Khotom*.

City of Kashgar.

KASHGAR [d], or, as it is written in the Jesuits Map, *Hasikar*, lies to the North-West of the other two, towards the Borders of *Great Bukhâria*, at the Foot of the Mountains that separate the two Countries [e]. It is situate on the East Side of a River, which falling from those Hills, loses itself in the Desart, thirty or forty Miles distant from that City. It was heretofore the Capital of the Kingdom of *Kâshgar*: But, as *Bentink* observes, is very much fallen from its former Grandeur, since the *Tartars* have been in Possession of it. However, he says, there is still a pretty good Trade carried-on between this Town and the neighbouring Countries, though very inconsiderable to what it was formerly [f]. This City, for a Time, before *Jenghiz Khan*'s Conquest, was the Capital of *Turkestân*, that is, of the Dominions of the *Turks*; who springing-up in the fixth Century, from an inconsiderable Tribe near the Mountain *Altay*, and, by Degrees, over-running all *Great Tartary* Westward, at different Times as they enlarged their Dominions, changed the Seat of their Empire; thus, as at one Time it was at *Kâshgar*, at another Time we find it at *Otrar*, under *Kavar Khân* [g].

THE City of *Yarkian*, or *Yerghian* [h], according to *Bentink*, is, at present, the Capital of all *Little Bukhâria*, and situate to the North of *Kâshgar*, upon the Banks of a little River; the Waters of which are not reckoned very wholesome. But in this he must be mistaken, since, in the Jesuits Map, it stands to the South-East [i] of that City, about ninety Miles distant, and on a River, which, descending from the Mountains lying at the same Distance to the South-West, runs North-East, and falls into the Lake of *Lop*, about six hundred Miles from its Source. The same Author adds, that it is large, and pretty well built, after the *Eastern* Manner; though most of the Houses are of Brick, baked in the Sun. The Country round it is very fertile, producing Plenty of all Sorts of Fruits and Pulse.

THERE is a Castle in this City, where *Kontayji Khân*, of the *Eluths* or *Kalmûks*, comes from Time to Time to reside a few Months, when his Affairs require his Presence on this Side; whence it is looked upon by some, as the Place of his usual Residence.

As *Yarkian* is the Resort of all the Commerce which is carried-on at present between the *Indies* and the North of *Asia*, *Tibet* and *Siberia*, *Great Bukhâria* and *China*, it must needs be very populous, and the *Bukhâr* Inhabitants very rich, since it is by their Means that those different Countries have a Communication together. The late Emperor of *Russia* intended to have settled a regular Trade between his Dominions and *Yarkian*, by the River *Irtis*, which would have proved very advantageous to his Subjects.

[a] Yet *Bentink*, and the Author of the Description of *Bukhâria* say, the Towns, which are about twenty, have a great Number of Villages depending on them. See History of the *Turks*, &c. p. 471, and 474. [b] *Du Halde*'s *China*, vol. 2. p. 253. [c] The Jesuits Map does not exhibit more. [d] *Abu'lfeda* says, it is also named *Ardûkand*. [e] The Tables of *Abu'lfeda*, *Nasîr addîn*, and *Ulug beg*, place this City in forty-four Degrees of Latitude, but that of *Khrysokokka* in forty Degrees; which is but twenty or thirty Minutes more North than it is exhibited in the Jesuits Map. [f] History of the *Turks*, &c. p. 471. [g] See *D'Herbelot*, p. 610. [h] *Bentink* writes *Yerkeen*, and *Yerkeben*. Others, *Irken*, *Irghen*, *Jarkan*, *Yarkhan*, *Yurkend*, and *Hiarkhan*. [i] *Marco Polo* also passed through it, in his Way from *Kashgar* to *Kotom*, or *Hotom*.

THE

THE Town of *Khotam*, or *Hotom* [a], lies to the South-East of *Yarkian*, on the River *Hotomni Solon*, as in the Map. It is ſubject to the *Grand Khân* of the *Eluths*, and is ſtill in a pretty flouriſhing Condition on Account of its great Trade; the Merchants of *Tibet* and the *Indies* flocking thither from all Quarters. Although the Inhabitants moſtly profeſs *Mohammediſm*, yet Liberty of Conſcience is allowed to all their *Pagan* Neighbours. The City is built of Brick, and the Country about is exceeding fruitful: It pays yearly a certain Tribute to the *Kontayki*, for which it enjoys his Protection, without being in any Sort incommoded by the *Eluths*.

THE Author has been aſſured, that the City of *Talâſâgûn*, which *Ilik Khân* reſigned to *Kavar Khân*, and was called by the *Mongols*, *Khambalik*, or *Good Town* [b], ſtill ſubſiſts in *Little Bukhâria*, near the Borders of the *Greater*, and Country of the *Kalmûks*; and that it is one of the principal Entrances, on that Side, into *Great Bukhâria* [c]. This is the ſame Place which *Abu'lfeda* and *D'Herbelot* [d] write *Balâſâgân*; it being eaſy to miſtake a *B* for a *Y* in the *Arabic*, thoſe Letters differing only by a ſingle Point. The firſt of thoſe Authors in one Place puts it in the Country of the *Turks*, in the Neighbourhood of *Farab*, or *Otrâr* [e]; and elſewhere in the Borders of the *Turks*, beyond the *Sihûn*, or *Sîr*, near *Kâſhgar* [f]. But we meet-with no ſuch Town in the Jeſuits Maps, under either of the Names ſaid to belong to it.

THE Country of *Akſu* lies to the North of *Kâſhgar*, and Weſt of the Province of *Turfân*. We ſuppoſe it to be about three hundred and ſixty Miles long, and ſeventy broad. In this Part of *Little Bukhâria*, the Empire of the Weſtern *Lyau*, or *Kitân*, ſeems to have been founded [g]; conſequently this muſt be the Country of *Kara-kitay*, or *Kara-katay* (about whoſe Situation Authors have been at ſuch a Loſs) agreeable to the Journal of *Goës* the Jeſuit, who in the Way from *Kâſhgar* to *Akſu*, paſſed the ſandy Deſart [h], called *Kara-kathay*, or *Black Kathay*; becauſe the People of *Kathay* dwelt there a long Time. Indeed, as the *Kitân* conquered all the Country of *Tartary*, from *Lyau-tong* to the Kingdom of *Kâſhgar*, the whole Region to the Weſt of the *Whang-ho*, and Province of *Shan-ſi* in *China*, where the Empire of *Kitay* ended, at leaſt all *Little Bukhâria*, with the Country of *Sha-chew* to the South-East of *Khamil*, might have gone under the Name of *Kara-kitay*, with the *Mongols*, before the Ruin of their Empire: After which the Natural Princes of thoſe Parts throwing-off the *Kitân* Yoke, the Name of *Kara-kitay* might have been confined to that particular Quarter, where they founded their new Dominion. *The Geography.*

AKSU [i], the chief Town in this Country, is mentioned by Travellers; but no Account given of it, farther than that *Goës* ſays, it is a City belonging to the Kingdom of *Kaſhgâr*, and that the King's Nephew was Governor of it. According to the Jeſuits Map, it ſtands on the North-Side of a ſmall River, which falling from the Mountains to the North-Weſt, loſes itſelf at an equal Diſtance in the Sands. The River *Ili*, (on the Side of which the *Kontoyki*, Grand *Khân* of the *Eluths*, or *Kalmûks*, uſed to reſide, in his Camp, called *Harkas*, or *Urga*) has its Source in the Mountains on the North-East Part of this Province: And more to the Weſt riſe the *Chûimuren*, and *Talas-muren*; on which laſt *D'Anville* places the Town of *Sayram*. Theſe, after a Courſe of one hundred and eighty Miles, fall into Lakes, ſituated in *Great Tartary*. *City of Akſu.*

IT muſt be obſerved here, that *Goës*, who travelled quite through *Little Bukhâria*, from *Yarkian* to *Khamil*, or *Hami*, never once gives the Country that Name; but ſpeaks of two Kingdoms, into which the Whole was divided, *viz.* *Kâſhgar*, containing the Weſtern Part, and *Chalis* [k], the Eaſtern. *Kaſhgâr and Chalis.*

2. *The* Provinces *of* Turfân *and* Khamil.

Country of the Vigûrs. Turfân *City.* *City of* Khamil: *The Deſart near it.*

THE Province of *Turfân* lies to the Eaſt of *Akſu*, and may be about two hundred and ten Miles long, and eighty broad: That of *Khamil* about one hundred and eighty in Length, and of the ſame Breadth with the other. Theſe two Provinces ſeem to have been the Country poſſeſſed formerly by the *Vigûrs*, or *Oygûrs*, at leaſt the middle-Part to the Eaſt of *Turfân*; eight or nine Leagues Eaſt of which was their capital City, called *Ho-chew* [l], by the *Chineſe*. Whether this was the ſame with *Biſhbalik*, or whether this laſt was another to the North of *Country of the* Vigûrs.

[a] Called *Kotam* by *Marco Polo*, *Hotom* in the Jeſuits Maps, *Koton* in other Maps; *Khateen* by *Bentink*, and *Khoton* by the Oriental Hiſtorians. *Abu'lfeda* ſays, it was incredibly large, and that its Inhabitants were originally of *Katay*. [b] See before, *p.* 421. a. [c] Hiſtory of the *Turks*, &c. p. 471, *& ſeqq.* [d] At the Word *Turk*, and *Turkmân*. [e] *Chowarazmiæ Deſc.* p. 64; but by his Table, *p.* 51, he makes it three Degrees five Minutes more Eaſt than *Farâb*. [f] The ſame, *p.* 74. [g] See before, *p.* 434, and 441. [h] *Haji Mahamet* makes it all a rough Deſart, between *Kâſhgar* and *Akſu*. [i] *Akſu* ſignifies, *white Water*, perhaps from the Quality of its River. [k] *Cialis* in *Trigautius*, after the *Italian* Idiom. [l] See before.

Little Bukhâria.

Turfan, as *Gaubil* places it [a], is hard to determine, till we receive farther Light from the *Chineſe* Hiſtory. They were likewiſe Maſters of the adjacent Parts of *Tartary*, as far as the Springs of the River *Irtiſh*, and *Mount Altay*.

Turfân City.

THE Country of *Turfân* contains ſeveral Towns, of which *Turfân* is the chief. In the Journal of *Goës*, it is ſaid to be a ſtrong, well-fortified City: But the Miſſioners give us no Account of its preſent State, any farther than that it is a conſiderable City [b], and that it is ſix Days Journey from *Hami* (or *Khamil*) croſſing a Branch of the *Kobi*, or Deſart; but ten Days by the Hills to the North of *Hami*, which is the ſafer Road.

City of Khamil,

THE Country of *Ha-mi* [c] contains only one ſmall City, of the ſame Name; but is full of Houſes, and has a few Villages, as deſcribed in the Map. The Inhabitants are large, and robuſt, well-ſhaped, and very neat in their Houſes. *Ha-mi* is ninety Leagues from the Gate of the great Wall called *Kya-yu-kew* [d], and has Lands enough round it, yet extends no farther, becauſe that whole Space is nothing but a dry Sand, and the moſt barren of all *Tartary*.

THIS Country is not infected with the Idolatry of the *Lamas*, the Inhabitants being *Mohammedans*. The Soil ſcarce produces any Fruit, except Melons, but thoſe of a delicate Flavour; and ſo far preferable to the *European*, that they hold good beyond the Seaſon, and are ſerved-up at the Emperor of *China*'s Table all the Winter [e]. *Gerbillon* ſays, the Country produces Plenty of good Fruits, beſides Melons and Grapes [f]; but he was not on the Spot, as the other Miſſioners were.

The Deſart near it.

THE Deſart above-mentioned, lying between *Ha-mi* and the great Wall of *China*, is Part of the great *Sha-mo*, or *Kobi*: It has neither Graſs, nor Water: Travellers frequently loſe [g] their Horſes in croſſing it: The *Tartars*, therefore, rather uſe Dromedaries, becauſe little Food ſerves them, and they can be without Water five or ſix Days. However, the whole *Kobi* is not contained within this Space of ninety Leagues; for it has various Branches, which ſpreading here and there, like ſo many infected Veins, divide the Country into Plots; ſome dry, and utterly uninhabited; others fertile enough to ſubſiſt a few *Tartars* [g].

SECT. II.

The Inhabitants *of* Little Bukhâria.

1. *The* Manners *and* Cuſtoms *of the* Bukhârs.

Their Character: Dreſs of the Men, and Women: Dye their Nails: Wear Breeches: Their Houſes, Furniture, and Utenſils: Their Marriages, Formalities, Ceremony of Bedding, Child-bearing: Polygamy unlawful: Diſtempers, how cured: Their Burials: Money and Language: Their Commerce.

THE *Bukhâr* Inhabitants of *Little Bukhâria*, according to the *Preſent State of Bukhâria*, are generally ſwarthy, and black haired; though ſome of them are very fair, handſome, and well-ſhaped. They do not want Politeneſs, and are very obliging to Strangers. They are greedy of Gain, and given to Trade; which they carry-on to great Advantage in *China*, *Perſia*, the *Indies*, and *Ruſſia*. Thoſe who deal with them, and do not know their Dexterity in Buſineſs, will be ſure to be impoſed-on, or cheated.

THE Mens Habits differ very little from thoſe of the *Tartars*: They fall-down to the Calves of their Legs, having Sleeves very wide towards the Shoulders, and cloſe-about the Elbow, and they wear Girdles like the *Poles*. The Habit of the Women is exactly the ſame with the Mens, and commonly quilted with Cotton. They wear Bobs in their Ears twelve Inches long, falling often as low as their Shoulders. They part and twiſt their Hair in Treſſes, which they lengthen with black Ribbands, embroidered with Gold or Silver, and with great Taſſels of Silk and Silver, which hang-down to their Heels [h]: Three other Tufts of leſs Size cover their Breaſts. They wear Necklaces adorned with Pearls, ſmall Pieces of Coin, and ſeveral Baubles gilt or ſilvered over, making a glittering Shew. Both Sexes carry-about them Prayers, written by their Prieſts, in a ſmall Leather-Bag, in the Nature of Reliques.

SOME Women, and eſpecially the Girls, tinge their Nails red. This Colour, which holds a long Time, is drawn from an Herb, called in the *Bukhâr* Language, *Kena*: They dry it, pulverize it, mix it with powdered Alom, and expoſe it in the Air twenty-four Hours before they uſe it.

BOTH Men and Women wear cloſe Breeches, and Boots of *Ruſſia* Leather, very light, and

[a] See before, *p.* 434. a. [b] They ſay in *Weſtern Tartary*, becauſe the *Tartars* are Lords of the Country. [c] *Bentink* writes *Khamil*; *Goës*, and others, *Kamul*. [d] It has a Fort near it, called *Kya-yu-quan*. [e] *Du Halde*'s *China*, vol. 2. p. 253. [f] The ſame, *p.* 262. [g] The ſame, *p.* 253. [h] Theſe muſt be the ſame called by *Grueber*, *Northern Tartary* Women, whoſe Dreſs is repreſented in Plate Iv.

without

without Heels, or Leathern-Soles; making-uſe of Galloches, or high-heeled Slippers, like the *Turks*, when they go abroad. They alſo wear the ſame Sort of Bonnets, and Covering for the Head; only the Women, and eſpecially the Girls, dreſs theirs with Trinkets, ſmall Pieces of Money, and *Chineſe* Pearls. Wives are no Way to be diſtinguiſhed from Maidens, only by a long Piece of Linen which they wear under their Bonnets, and which folding round the Neck, they tie in a Knot behind, ſo that one End of it hangs-down to the Waiſt [a].

THE Houſes of the *Bukhârs* are of Stone, and pretty good: But their Moveables are few, and no Way ornamental: They have neither Chairs, nor Tables; nor is any Thing to be ſeen in their Chambers, but ſome China-Trunks garniſhed with Iron. Upon theſe, in the Day, they ſpread the Quilts, which they make-uſe of at Night, and cover them with a Cotton Carpet of ſeveral Colours. They have alſo a Curtain ſprigged with Flowers and Figures of different Colours: Likewiſe a Sort of Bedſtead, about half a Yard high, and four Yards long, which they hide in the Day-time with a Carpet. They go to Bed ſtark-naked, but always dreſs when they riſe, and ſit with their Legs acroſs, after the *Turkiſh* Manner.

THEY are very neat about their Victuals; which the Slaves (they either take or buy from the *Kalmûks*, *Ruſſians*, and other Neighbours) dreſs in their Maſter's Chamber; where, according to the Largeneſs of the Family, there are ſeveral Iron-Pots ſet in a Kind of Range near a Chimney, which ſerves alſo to warm the Room in Winter. Some have little Ovens, which are made like the reſt of their Walls, with a ſtiff Clay, or Bricks.

THEIR Utenſils conſiſt in ſome Plates and Porringers of *Capua* (a Sort of Wood) or of China, and in ſome Copper-Veſſels to boil Tea, and to heat Water, when they want to waſh. A Piece of coloured Calico ſerves them inſtead of Table-Cloth and Napkins: They uſe neither Knives, nor Forks; but the Meat being ſerved-up ready-cut, they pull it to Pieces with their Fingers: Their Spoons are of Wood, and made like the Ladles with which we ſkim our Pots [b].

THEIR uſual Food is minced Meats, of which they often make a Sort of Pies, in the Shape of a Half-Moon: Theſe ſerve for Proviſion when they go long Journeys, eſpecially in Winter. They carry them in a Bag, after expoſing them to the Froſt; and make pretty good Soup of them, by boiling them in Water. Their uſual Drink is Tea: They have a black Sort [c], which they prepare with Milk, Salt, and Butter, eating Bread with it, when they have any [d]. *Inhabitants, Cuſtoms.*

THE *Bukhârs* buy their Wives, paying according as they are more or leſs handſome: So that the ſureſt Way to be rich, is to have many Daughters. The Perſons to be married are forbidden to ſee, or ſpeak to each other, from the Time of their Contract, till the Day of the Nuptials: Theſe they celebrate for three Days with Banquetting; as they do three great annual Feaſts. The Evening before the Wedding, a Company of young Girls meet at the Bride's Houſe, and divert themſelves till Midnight, in playing, dancing, and ſinging. Next Morning the Gueſts aſſemble at the Bride's, and help her to prepare for the Ceremony: After which they give Notice to the Bridegroom, who arrives ſoon after, accompanied by ten or twelve of his Relations, or Friends; and followed by ſome playing on Flutes, and an *Abîs* [e], who ſings while he beats two little Timbrels. When the Bridegroom is come, he makes a Horſe-Race: After which he diſtributes the Prizes, being ſix, eight, or twelve in Number, according to the Ability of the Couple; conſiſting in Damaſks, Sables, and Fox-Skins, in *Kitayka* Calico, or ſuch-like Goods. The Feaſt given at the Circumciſion of Children is of the ſame Kind. *Their Marriages, Formalities.*

THEY do not ſee each other while the Ceremony of Marriage is performing; but anſwer, at a Diſtance, to the Queſtions aſked by the Prieſt. When it is over, the Bridegroom returns home, in the ſame Order he went, and entertains his Company. After Dinner, he returns with the ſame Train to the Bride's Houſe, and obtains the Liberty of ſpeaking to her: Then he goes-back, and returns again in the Evening; at which Time he finds her in Bed, and in Preſence of all the Women lays himſelf down in his Cloaths beſide her; but it is only for a Moment. The ſame Farce is acted for three Days ſucceſſively: Nor does he go to Bed to her in earneſt till the third Night; and the fourth Day he carries her home. *Ceremony of Bedding.*

SOME of theſe Huſbands, however, make it in their Bargain to continue ſome Time longer, and often a Year with their Parents, the Woman remaining ſo long with hers: But if ſhe dies in the Interim without Children, her Relations poſſeſs all that her Huſband gave her; unleſs at the End of the Year of Mourning, they are generous enough to return him half. The *Bukhâr* Women are reckoned impure for forty Days after their Delivery, and dare not ſo much as ſay their *Child-bearing.*

[a] Hiſtory of the *Turks*, &c. p. 476, *& ſeqq.* [b] The ſame, *p.* 475, *& ſeq.* [c] This is the *Tartarian* Tea, or Bean-Broth, mentioned often before, ſee Vol. III. *p.* 434. e. [d] Hiſtory of the *Turks*, as before, *p.* 422. [e] A Kind of Prieſt.

Little Bukhâria.

Prayers all that Time. The Child is named the a third Day after its Birth, by the Father, or ſome of the neareſt Relations; who at the ſame Time make him a Preſent of a Bonnet, or Piece of Linen, and ſometimes of a Coat, if they can afford it. They are circumciſed at ſeven, eight, or nine Years of Age, when the Father uſually feaſts his Friends.

Polygamy unlawful.

POLYGAMY is looked-on as a Sort of Sin by the *Bukhârs*, but is never puniſhed; ſo that ſome have ten Wives, or more. Any Man may, at b Pleaſure, ſend-back his Wife; in which Caſe ſhe is intitled to whatever he gave her during their Cohabitation. On the other hand, the Woman, if ſhe has a Mind, may ſeparate herſelf from her Huſband; but then ſhe cannot carry-away the leaſt Thing that belongs to her.

Diſtempers, how cured.

WHEN a *Bukhâr* falls ſick, the Remedy is this: A *Mullah* reads to him a Paſſage out of ſome Book, breathes on him ſeveral Times, and with a very ſharp Knife makes ſeveral Flouriſhes c over, and on the Side of, the Patient's Face. They imagine, that by this Operation they cut the Root of the Diſtemper, which they ſay is cauſed by the Devil. In ſhort, when any of them dies, a Prieſt lays the *Korân* on his Breaſt, and recites ſome Prayers. After this the Corpſe is carried to the Grave, which they commonly chuſe in ſome pleaſant Wood, and incloſe with a Hedge, or Kind of Paliſade [a].

Their Burials,

Money, and Language,

THE *Bukhârs* have no Money but Copper d *Kopeiks*, which weigh a *Soletnik* [b], or near a third Part of an Ounce. When they have a great deal of Gold, or Silver, to receive or pay, they weigh it, after the Manner of the *Chineſe*, and other neighbouring Nations.

THEIR Language, and Religion, differ in many Things from thoſe of the *Turks* and *Perſians*; yet have a Reſemblance of them [c]. *Gerbillon* ſays, the Language of theſe *Tartars* (as he miſcalls them) is apparently that of the *Uzbeks*, e differing from the *Mongol*: But adds, that this laſt is commonly underſtood, by Means of the great Commerce between the two Nations.

Their Commerce.

THE ſame Author obſerves, that theſe People formerly drove a great Trade to *China*, but that the War, for ſome Years, had interrupted it [d]. However, he judged it would revive by Degrees, through the Encouragement and Immunities which the Emperor had granted to all, who come by Land into his Dominions, in order to f traffic [e].

2. *The* Religion *and* Worſhip *of* Little Bukhâria.

All Religions tolerated. Legend of Mary: *Her miraculous Conception, and Birth of* Iſa: *His Enemies puniſhed. Future Puniſhments not eternal. Eight Paradiſes: Their* Lent-*Faſt, Prayers, and Prieſts.*

ALTHOUGH the prevailing (or eſtabliſhed) Religion, in all the Towns and Villages of *Little Bukhâria*, is the *Mohammedan*; all other Religions enjoy an entire Liberty (or Toleration) becauſe the *Kalmûks*, who are Maſters of this Country (though groſs Idolaters) think they ought not, in Conſcience, to ſuffer People to be moleſted on Account of their Belief [f].

ACCORDING to the *Deſcription of Bukhâria*, the *Bukhârs* ſay, that God having compoſed the *Korân*, communicated it to Men, by Means of *Moſes* and the Prophets: That afterwards *Mohammed* made an Explanation of it, and drew a Moral from it, which they are obliged to receive and follow.

THIS is their Notion of Jeſus Chriſt: They ſay, the *Virgin Mary* being a poor Orphan, and her Relations diſagreeing about the Charge of her Education, reſolved to decide it by Lot. They threw a Feather into a Veſſel full of Water, and agreed, that he to whoſe Finger it ſtuck, ſhould have the Maintenance of the Child; which by that Means fell to *Zacharias*'s Lot: For the Feather, though ſunk to the Bottom, came and faſtened to his Finger, on putting it in the Water. Hereupon he carried her to his Houſe, in order to bring her up. It happened one Time, that the Buſineſs of the Temple having kept him from home three Days together, he at length called to Mind he had left the Child locked-up, ſo that no-body could come at her to help her. Upon this he ran home as faſt as he could; but inſtead of finding her dead, as he feared, ſhe was ſurrounded with all Sorts of Eatables; which, as ſhe told him, God had ſent her.

BEING arrived at Fourteen, and taken, for the firſt Time, after the Manner of Women; this holy Maid went to bathe in a Fountain, which was in a great Foreſt; where hearing a Voice, ſhe was ſtruck with Fear, and made haſte to put-on her Cloaths, in order to retreat: But preſently an Angel appearing, told her, ſhe

[a] Hiſtory of the *Turks*, &c. p. 482, & *ſeqq.* [b] A *Ruſſian* Coin. [c] Hiſtory of the *Turks*, as before, *p.* 478. [d] He wrote about the Year 1700. [e] *Du Halde*'s *China*, vol. 2. p. 261, & *ſeq.* [f] This ought to be a Leſſon to the Papiſts, and all other Chriſtians, of a perſecuting Spirit.

ſhould

Inhabitants, Government.

ſhould become with Child of a Son, whom he ordered her to call *Iſay* [a]. *Mary* replied wiſely, that Lying-in would be painful to her, never having had to do with any Man: Upon this the Angel breathing on her Breaſt, made her comprehend that Myſtery, and inſtructed her in what it was neceſſary for her to know.

IN ſhort, ſhe conceived from that Moment; and the Time of her Delivery approaching, went to hide herſelf for Shame in the ſame Foreſt: There falling in Labour, ſhe ſupported herſelf b againſt the Trunk of a decayed Tree, and in that Condition was delivered. When lo! at the ſame Inſtant the rotten Trunk began to put-forth Leaves, and the Country all-about to flouriſh as in Spring. The Angels came alſo, and having bathed the new-born Infant in a Fountain, which of a ſudden appeared within two Paces of the Place, returned him to his Mother; who, going-back to her Relations, was received by them with Curſes and ill Treatment. c She took it all very patiently, and without giving herſelf the Trouble to excuſe the Crime they laid to her Charge, only deſired her Son to plead her Cauſe. This he did immediately, with ſuch Force as intirely juſtified his Mother; explaining to them the whole Myſtery of a Birth ſo miraculous, and contrary to Nature.

YOUNG *Iſay*, in Time, became a great Prophet, and a Doctor of high Authority; but he was generally hated, and perſecuted by every- d body, eſpecially the great Men of his Time. They lay in wait alſo ſeveral Times for his Life, though without Succeſs, and at length ſent two conſiderable Perſons to rid them of him at any Rate: But God fruſtrated their Deſign in the very Inſtant they were going to execute it, by taking *Iſay*, of a ſudden, up to Heaven. He likewiſe puniſhed the two Aſſaſſins in a ſingular Manner: For transforming them one after the other into the Shape of *Iſay*, they became ex- e poſed to the Fury of the People; who deceived by the Reſemblance, put them to a miſerable Death [b].

ALTHOUGH the *Bukhârs*, as appears from what has been related, have no Notion of the Sufferings of Chriſt; yet they believe in the Reſurrection, and another Life: But they cannot be perſuaded, that any Mortal ſhall be eternally damned: On the contrary they believe, that as the Demons led them into Sin, ſo the Puniſh- f ment will fall-upon them. They believe, moreover, that at the laſt Day every Thing, but God, will be annihilated; and, conſequently, that all Creatures, the Devils, Angels, and Chriſt himſelf, will die; and that after the Reſurrection all Men, except a few of the Elect, will be purified, or chaſtized by Fire, every one according to his Sins, which will be weighed in the Balance.

Eight Paradiſes.

THEY ſay, there will be eight different Paradiſes (which they call Array) for the Good; and ſeven Hells for the Wicked, where Sinners are to be purified by Fire, as aforeſaid: That the moſt enormous Sinners, and ſuch as will feel the Puniſhment moſt, are Liars, Cheats, and Makebates: That the Elect, who do not feel the Fire, will be choſen from among the Good, *viz.* one out of an hundred Men, and one out of a thouſand Women; which little Troop will be carried into one of the Paradiſes, where they ſhall enjoy all Sorts of Felicities, till it ſhall pleaſe God to create a new World inſtead of the preſent. It is a Sin, according to them, to ſay God is in Heaven. God, ſay they, is every-where; and, therefore, it derogates from his Omnipreſence, to ſay he is confined to any particular Place.

Their Lent-Faſt.

THEY have, every Year, a Faſt of thirty Days, from the fifteenth of *July*, to the Middle of *Auguſt*: During which Time they taſte nothing all Day, but eat twice in the Night, at Sun-ſet, and Midnight; drinking nothing but Tea, all ſtrong Liquors being forbidden. Any Perſon, who tranſgreſſes theſe Ordinances, is obliged either to ſet at Liberty the beſt of his Slaves, or to give a Treat to ſixty People: He is likewiſe to ſuffer eighty-five Strokes, which the *Aguns*, or Great Prieſt, cauſes him to receive on the bare Back with a thick Leathern Strap, called *Dura*. Yet I have obſerved (ſays the Author) that the common-People do not equally obſerve this Faſt; and that Workmen, eſpecially, are allowed to eat in the Day-time.

Prayers, and Prieſts.

THEY ſay Prayers five Times a Day. 1. Before Morning. 2. Towards Noon. 3. After e Noon. 4. At Sun-ſet: And, 5. In the third Hour of the Night. To which their *Abîs*, a Kind of Prieſts, give the Signal.

THOSE who know how to read, and explain Books, are in great Eſteem with them, and are called *Mullah* [c], which ſignifies a famous and meritorious Man [d].

3. *The* Government *and* Hiſtory *of* Little Bukhâria.

Revolutions in the Country: Form of Government under the Kalmûks. Khâns *of* Kâſhgar. Amul Khojah Khân. Togluk Timûr Khân; *turns* Mohammedan: *Occaſion of this Change: His*

[a] The *Arabs*, *Turks*, &c. call Jeſus, *Iſa*. [b] This is all pretty agreeable to the *Mohammedan* Tradition. [c] Which is the common Name among *Mohammedans*, for a Doctor of their Law. [d] Hiſtory of the *Turks*, &c. p. 472, and 478, *& ſeqq.*

Little Bukhâria.

Subjects converted. Ilyas Khojah Khân. *Kamar oddîn, an Uſurper. Wars with* Timûrbek.

Revolutions in the Country.

WE know but little of the Government of this Country before the Time of *Jenghîz Khân:* It was then divided among ſeveral Nations, or Tribes of People, of whom the moſt remarkable were the *Vigûrs*, or *Oygûrs*, who dwelt moſt Eaſterly about *Turfân*; the *Whey-hu*, who inhabited to the Weſt of them [a], and the *Kitân*, or *Kara-kitayans*, who ſettled between *Akſû* and *Kâſhgar*. Theſe all, it may be preſumed, had their different Forms of Government: But on the Conqueſt of this Region by *Jenghîz Khân*, the Whole fell under the Dominion of *Jagatay*, ſecond Son of that Conqueror. Some Time after his Death, the Kingdom of *Kâſhgar*, including all *Little Bukhâria*, became independent; and probably that Monarchy at length became divided among two or more Princes; but all of the Race of *Jenghîz Khân*. In 1603, when *Goës* travelled through this Country, the Whole ſeemed to have been under the Dominion of one *Khân*, who reſided in *Yarkian:* But in 1683 (as the *Preſent State of Bukhâria* informs us) there happened a great Revolution: For *Boſto*, or *Buſſuktu*, otherwiſe called *Kaldan*, *Khân* of the *Eluths*, or *Kalmûks*, conquered *Little Bukhâria* from the Prince, or Princes, who at that Time reigned there.

Form of Government

ZIGAN ARAPTAN [b], otherwiſe called *Kontayki*, the Succeſſor of *Boſto Khân*, eſtabliſhed ſeveral Magiſtrates in the Kingdom, which ſtill continue, and are ſubordinate one to the other; the loweſt Rank having each the Rule over ten Houſes, or Families; the ſecond Sort over one hundred, and the firſt over one thouſand; all in Subjection to a general Commander, whom the *Khân*, as Sovereign of the Whole, chuſes ordinarily out of the ancient Princes of the Country. Theſe Magiſtrates decide all Differences between the Subjects, and are obliged to report to their Superiors whatever paſſes; whereby good Order is kept-up, and perfect Union preſerved among the Inhabitants [c].

Under the Kalmûks.

THE two Princes above-mentioned, ſucceſſively had Wars with the *Chineſe*, who about 1720, aſſiſted by the *Mongols*, entering the Province of *Hami*, or *Khamil*, and *Turfân*, took both from him [d]. *Gerbillon* ſays, thoſe of *Yarkan* and *Turfân* were diſpoſed to follow their Example: But *Raptan*, by his Preſence, ſecured their Fidelity [e]. However, according to *Gaubil*, in 1726, the whole Country, from *Hami* to *Anghien* (in *Great Bukhâria*) was under his Protection [f].

IT does not appear, either from *Abu'lghâzi Khân*, or the other Oriental Hiſtorians yet come to our Knowledge, when, or on what Occaſion, *Little Bukhâria* fell-off from its Dependence on the immediate Succeſſors of *Jagatay*, who reſided in *Great Bukhâria:* And as Authors tell us not the Names of the firſt *Khâns* who reigned in *Kâſhgar*, neither do they carry-down the Hiſtory of them below the Year 1400. In ſhort, the beſt Account we meet of them, is that given by *Abu'lghâzi Khân*, as follows.

THE Inhabitants of the Cities of *Kâſhgar* and *Yarkian*, of the Countries of *Alatak* [g], and the *Vigûrs*, finding none of the Poſterity of *Jagatay Khân* among them, who was capable of filling the Throne, which was vacant; they ſaw themſelves obliged to call-in *Amûl Khoja*, who at that Juncture reigned in *Mawara'lnahr*, by the Name of *Iſan boga Khân* [h]. *Satil Tamiſh*, the Wife of this Prince, bearing him no Children, he got one of his Slaves, called *Manlaghi*, with Child. Hereupon *Satil Tamiſh* being incenſed, one Day, when the *Khân* was gone a-hunting, gave her in Marriage to a *Mogul*-Chief, who carried her with him to his own Country. *Iſan boga*, at his Return, being informed of what had been done, to avoid having Words with his Wife, ſeemed to take no Notice of it: But dying at length without Iſſue, the State became rent in Pieces by the different Factions.

IN this Extremity, *Amîr Yalauzi*, one of the chief Lords in *Kâſhgar*, ſent a Meſſenger in Queſt of *Manlaghi*. He at length found her, and her Son, called *Togalak* [i], whom ſhe had by the *Khân*, playing with his Brother-in-law. After this, watching his Opportunity, he carried-off the Boy; who on his Arrival at *Kâſhgar* was immediately proclaimed *Khân* by *Amîr Yalauſh*, under the Name of *Togalak Timûr Khân*.

A GREAT Part of this *Khân*'s [k] Reign was ſpent in ſuppreſſing the Factions that oppoſed him in the Countries above-mentioned: After which he entered with a powerful Army into *Mawara'lnahr*, and brought it alſo under his Obedience [l]. Then leaving his Son *Ilyas Khoja* to govern in *Samarkant*, he returned to the City of *Kâſhgar*, where ſome Time after [m] he died.

TOGALAK TIMUR was the firſt deſcended from *Jenghîz Khân*, reigning in *Kâſhgar*, who

[a] See before, *p.* 431. e. [b] Called by the *Eluths*, *Chahar Arbtan Hân*; by the *Chineſes*, *Tſe-vang raptan*. [c] Hiſtory of the *Turks*, &c. p. 474, *&* *ſeq.* [d] See before, *p.* 387. [e] *Du Halde*'s *China*, vol. 2. p. 253, and 261. [f] See before, *p.* 402. e. [g] The Situation of this Country is unknown to us. [h] See before, *p.* 522. b. [i] Or, *Togluk*. [k] He was made *Khân* about the Year of the *Hejrah* 748, of Chriſt 1347. [l] *Hejrah* 762, of Chriſt 1360. [m] About two Years.

embraced

embraced the *Mohammedan* Religion. The *Khân* being one Day a-hunting, perceived ſeveral foreign Merchants in the Place which he had pitched-on for aſſembling the Game, contrary to his expreſs Proclamation. Hereupon in a Paſſion, having ordered them to be brought to him bound, he aſked how they came to infringe his Laws. A *Sheykh*, who was among them, anſwered, that they were ignorant of any ſuch Prohibition, as being Strangers from the Country of *Kuttak*. The *Khân* replied, *It is like ye are* Tajiks, *and, conſequently, worſe than Dogs. If we were not true Believers*, rejoined the *Sheikh*, *there would be Grounds for making no more Account of us than Dogs; becauſe, in that Caſe, notwithſtanding the Reaſon we are endowed with, we ſhould yet be leſs reaſonable than Beaſts.*

THIS Anſwer having touched the *Khân*'s Heart, at his Return from the Chace, he ſent for the *Sheykh*, and taking him in private, ſaid, *What is your Religion, that you durſt make me ſuch an Anſwer a-while ago?* The *Sheykh* hereupon explaining all the Articles of the *Mohammedan* Faith, *Togalak Timûr* was ſo fully convinced of its Truth, that the *Khân* ordered him to repair to him at a proper Seaſon, to concert the Means for eſtabliſhing it in his Dominions. The *Sheykh* dying ſoon after his Return home, his Son, purſuant to his Father's Orders, repaired to *Kaſhgar*; but not being able to get Acceſs to the *Khân*, he went one Morning to a Hill near the Caſtle, where he ſaid his Prayers ſo loud, that he awakened *Togalak*; who ſent for him, to know the Reaſon why he bawled ſo terribly.

THE *Sheykh* taking this Opportunity to execute his Commiſſion, that Prince would no longer defer embracing *Mohammediſm*; which he did ſo ſeaſonably, that all the Lords of his Court followed his Example except one, who ſtanding forth, ſaid, *There is, among our People, a Man endued with extraordinary Gifts; now if the Sheykh dare wreſtle with this Perſon, and throws him, I will then embrace his Religion, otherwiſe I will not.* The *Khân* was unwilling to ſuffer this Trial of Skill; but the *Sheykh* preſſing for Liberty to accept of the Challenge, he at length yielded. The *Sheykh* hereupon advancing up to the *Mogul*, with one back-Stroak of his Hand on the Stomach, laid him flat on the Ground, where for a good While he remained motionleſs. As ſoon as the *Mogol* roſe-up, he fell at the *Sheykh*'s Feet, and declared he was ready to become a *Moſlem* [a]. The Lord who had propoſed this Teſt did the ſame, and all the *Moguls* who were ſubject to *Togalak Timûr Khân*, to the Number of one hundred and ſixty thouſand, followed their Example. *Inhabitants, Government.*

AMIR YALAUSI, who was ſo inſtrumental in helping the *Khân* to aſcend the Throne, happening to die, *Togalak* conferred on *Amîr Khudaydat*, though but ſeven Years old, all his Father's Employments. Hereupon *Kamaroddîn*, the youngeſt of the *Amîr*'s five paternal Uncles, deſired that he might officiate for his Nephew till he came of Age. This Requeſt the *Khân* not thinking proper to grant, *Kamaroddîn*, who was very ambitious as well as powerful, conceived a mortal Hatred againſt him; yet concealed it during his Life: But after his Death, revolting againſt his Son *Ilyas Khojah*, who ſucceeded in the Throne of *Kâſhgar*, he cauſed him, with all his Family, to the Number of eighteen Perſons, to be maſſacred: Then ſeizing the Government himſelf, gave Liberty, by Proclamation, for the People to kill any of the Poſterity of *Togalak Timûr*, who were to be found. This *Khân* was born in the Year 1329 [b], came to the Crown at the Age of eighteen (that is, in 1347) and died at the Age of thirty-four (or in 1362.) *Ilyas Khojah Khân.*

AT the Time of *Kamaroddîn*'s Revolt, *Amîr Aga Khatun*, one of *Togalak*'s Wives, being delivered of a Son named *Kezra Khojah*, to ſecure him from the Tyrant, truſted him to the Care of *Amîr Khudaydat*, who never could be prevailed-on by his Uncle, to deliver-up the young Prince: And War breaking-out afterwards between *Amîr Timûr* (who reigned in *Mawara-'lnahr*) and the Uſurper, *Khudaydat* laid-hold of that Opportunity to ſend him, under a truſty Guard, to the Mountains of *Badagſhân*, where the Jaſper is found. *Kamaroddîn, an Uſurper.*

AMIR TIMUR, and *Kamaroddîn*, waged War together for ſome Time with much Fury, and ſuch Equality, that after five bloody Battles it ſeemed yet uncertain, which in the End ſhould get the Advantage; when it happened, that *Kamaroddîn* fell ill: At which Juncture *Timûr* advancing with a powerful Army, the Troops of *Kâſhgar*, deſtitute of a Chief, betook themſelves to Flight, not daring to wait for the Enemy. As for *Kamaroddîn*, he was in this Confuſion carried, for Security, into certain Deſarts to the Eaſt of the capital City: But after the Retreat of *Timûr*'s Army, he never could be found [c]; although a great While after, his Subjects underſtood, that he reſided with one *Malek Ajân* [d]; yet it is not known who that Man was. *Wars with Timûr bek.*

[a] All this might have been a politic Contrivance of the *Khân*, to bring-about this great Change. [b] *Hejrah* 730. [c] It does not appear when this happened, poſſibly about 1375, or 1383. See *Timûr bek*, vol. 1. *p.* 176, and 235. [d] It appears from the ſame Author, *p.* 346, that he was living in 1390, at which Time he fled croſs the *Irtiſh*, towards the City of *Tawlas*, into the Woods, where Sables and Ermins are found.

Turkeſtân. *AMIR KHUDAYDAT* laying-hold of this a Opportunity, brought-back *Kezra Khojah*, and
Kezra Khojah Khân. cauſed him to be proclaimed *Khân* with the uſual Solemnities. This Prince reigned thirty Years over the Country of *Kâſhgar*, and all thoſe who have poſſeſſed the Throne of that Country have been of his Poſterity [a]. So that *Mahamet*, who was *Khân* of the Kingdoms of *Kâſhgar* and *Chalis* (that is, of all *Little Bukhâria*) in 1603, when *Goës* travelled through the Country, was deſcended from *Kezra Khojah*, as well as the *Khân* who reigned in 1665, when *Abu'lghâzi*'s Hiſtory was finiſhed: But eighteen Years after, *viz.* in 1683, *Little Bukhâria* was ſubdued by the *Eluths*, or *Kalmûks*; as hath been before related.

CHAP. VII.

A DESCRIPTION *of the* COUNTRY *of* TURKESTAN.

Introduction. WE have, in this Book, run-through a vaſt Extent of Country; and beſides deſcribing *Great Tartary* from the Eaſtern Ocean to the *Caſpian Sea*, given what the beſt Authors afford relating to *Korea*, *Tibet*, *Karazm*, and both the *Bukhârias*. In order to compleat the Deſcription of *Middle Aſia*, it remains only to treat of *Turkeſtân*, which, for the moſt Part, falls at preſent within the Bounds of *Great Tartary*. For the Materials concerning this Country, the Public are chiefly obliged to the Enquiries of the *French* Editor of *Abu'lghâzi Khân*'s Hiſtory; and, in ſome Meaſure, to the Remarks of the *Engliſh* Tranſlator, to which we have added ſome farther Reflexions.

SECT. I.

The Name, Bounds, ancient Power, *and* Geography.

The Name: The Bounds: Origin of the Turks: *Their ſudden Conqueſts, and Kings.* Khân *of* Kara-kitay *conquers* Turkeſtân: *Its great Extent. The* Turks *very early over-run* Perſia: *Invade* Mawara'lnahr. *The* Seljûk *Conqueſts.* Karakitayan *Empire very powerful: Deſtroyed by* Jenghîz Khân.

The Name. *TURKESTAN* ſignifies the Country of the *Turks*, and is otherwiſe called, by the *Arabs* and *Perſians*, *Turân*; ſo named according to the latter, from *Tûr*, the Son of *Feridûn*, ſeventh King of *Perſia*, of the firſt or *Piſhdâd* Race: But the *Turks* and *Tartars*, eſpecially the *Mohammedan*, affirm its Name to be derived from *Turk*, the eldeſt Son of *Japhet*, whom they make the Founder of the *Turkiſh* Nation, and common Father of all the Inhabitants of *Grand Tartary*; as has been already obſerved [b].

TURKESTAN is bounded on the North by the River *Yem*, or *Yemba*, and the *Arâl tag*, or *Mountains of Eagles*, which are no better than ſmall Hills in that Part; on the Eaſt by the Dominions of the Grand *Khân* of the *Eluths*, or *Kalmûks*; on the South by *Karazm*, and *Great Bukhâria*; and on the Weſt by the *Caſpian Sea* [c]. It may be about four hundred and eighty Miles long, and two hundred and fifty-two broad; the Bounds of it being exceeding contracted, in Compariſon of what they were in former Ages.

IT has already been obſerved, that according to the *Chineſe* Hiſtory, the *Tu-que*, or *Turks* [d], were in the Year 545 a very inconſiderable People, who dwelt to the North-Weſt of *Turfân* in *Little Bukhâria*; and not long before, their Employment was to work Iron near a Mountain called *Kin* [e]. But in a few Years they grew very powerful, ſubduing the whole Country between the *Caſpian Sea*, and the River *Lyan*. This Account agrees very well with that given by the *Byzantine* Hiſtorians. They inform us, that in the fourth Year of *Juſtin* the Younger, (that is, in 569) the Oriental *Turks*, whoſe Power was greatly increaſed, ſent Ambaſſadors to enter into a Treaty of Peace with the *Romans*. They brought with them Iron to ſell, to make it believed, that there were Mines in their Country, which was divided into four Governments.

THEIR King (or *Kagân*) who was named *Diſabules*, encamped near the Mountain *Ek-tak*, that is, *the Mountain of Gold* [f]. It ſtood in the

[a] Hiſtory of the *Turks*, &c. p. 176, *& ſeqq.* [b] See before, *p.* 408. [c] Hiſtory of the *Turks*, as before, *p.* 562. [d] See *p.* 433. [e] *Kin*, in *Chineſe*, ſignifies *Gold*; and *Altun*, in *Turkiſh*. Their *Khân* encamped at the Mountain *Tu-kin*, which ſeems to be the ſame called in the Text ſimply *Kin*. [f] *Ek-tak*, or *Ak-tag*, ſignifies the white Mountain; *Altun-tag*, the Mountain of Gold. However, it is ſome Confirmation of the *Chineſe* Account.

most Eastern-Part of the *Turks* Dominions [a], and had its Name from the Abundance of Fruits and Cattle that were on it [b]. To the South of it, was a Place called *Talas*; and four hundred *Stadia* to the West, a Plain called *Ikar*. At the Time of their Embassy, they had subdued the *Sogdians* [c], and *Nefthalites*, or *Abdelians* [d]. *Disabules* dying in 580, his Son *Toxander* succeeded. This *Kagân* conquered the *Utrigorians*, and *Avares*. Then marching against the *Ogorites* [e], he subdued them, killing three hundred thousand, b with their King *Kolk*. Afterwards *Turon*, his Relation, revolting, he, by the Assistance of *Sparzagun*, *Khunaxolus*, and *Toldik*, vanquished him in the Plain of *Ikar*: To notify which Victory, he sent an Embassy to the Emperor *Mauritius*, in the Year 600 [f].

As the *Turks* had great Wars among themselves, as well as with the *Chineses*, and the Nations of *Tartary*: So it may be presumed, their Dominions, in Process of Time, became divided c among several *Khâns*; and that many of the Nations, who had been subdued by them from Time to Time, threw-off the Yoke at the Beginning of the tenth Century. The *Kitân*, or *Lyau*, who founded the Empire of *Kitay*, in the North of *China*, subdued all the Countries Westward as far as *Kâshgar* [g]: And after they had been themselves subdued by the *Kin*, in 1124, founded the Empire of the Western *Lyau* (from thence called *Karakitay*) near *Kâshgar* [h]. The *Turks*, at that d Time, seem to have been divided into many Nations, under different Chiefs. The *Kitân* found some Tribes about *Turfân*, and others on the Borders of *Great Bukhâria*, whom they defeated.

In 1179 the *Khân*, possibly of these latter, who resided at *Yalasagun*, or *Balasagun*, being oppressed by the *Kankli* [i], resigned his Dominions to *Nusi Tayghir-ili*, King of the *Kitân*, for Sake of his Assistance. *Nusi* having van- e quished them, pursued his good Fortune, and conquered all the Country Westward to the *Caspian Sea*, assuming the Name of *Kavar Khân*. Thus by uniting the several Tribes, who inhabited within that Space, under one Sovereign, he seems to have restored the Empire of the *Turks*, being called by *Abu'lghâzi*, and the Oriental Historians, *Kavar Khân* [k] of *Turkestân*. *The History.*

By the Way it must be observed, that the Oriental Authors call all that Part of *Great Tartary*, possessed by the *Turks*, *Turkestân*: And thus we find the Seat of their Empire sometimes in *Little Bukhâria*, about *Kâshgar*; and at other Times in *Great Bukhâria*, about *Otrar*, just as the reigning *Khân*, when under one Sovereign, shifted his Residence; or as the Power passed from one Chief to another, when divided under many.

The Dominions of *Kavar Khân* extended far Eastward [l]; and, possibly, the *Turks* settled about *Turfân*, had submitted to him: For the *Vigûrs*, their Neighbours, to the East were under his Protection, till the Year 1212, when they went-over to *Jenghiz Khân*. In 1216, *Kuchluk* the *Nayman*, who having been defeated by that Conqueror, fled to *Kavar Khân*, or his Successor, for Shelter, deprived him of near half his Dominions; which a Year or two after fell entirely under the Power of *Jenghiz Khân* [m]. And thus an End was put to the Empire of the *Turks* in *Tartary*, whose very Race seems to have been destroyed with their Power: For since then we hear no more of them in that vast Region, except in the Name of *Turkestân*, given to the Country we are now describing; which is that Part of their Dominions they last possessed, but very inconsiderable in respect of what they were once Masters of. *Its great Extent.*

Although the *Turks* subdued *Great Bukhâria*, and *Karazm*, very early, as hath been observed above; yet, according to the *Persian* Historians, they did not long enjoy that Conquest. These Writers tell us, that while *Khosraw Nushirwân* (who reigned in the Time of *Justin*, and *Justinian*, the *Roman* Emperors) was busy in conquering the Countries of the *Abtelah*, *Kabulistân*, and other Provinces, *Shahbasha*, the *Khakhân* of the *Turks* [n], subdued most Part of *Mawara'lnahr*; but that it was soon after recovered by his Son *Hormûz*. This Prince succeeding his Father, the *Khakhân*, who was his Uncle, enters his Dominions with an Army of four hundred thousand Men; which was yet defeated by *The Turks very early*

[a] *Menander*, ch. 6, to the 14th. [b] *Simocatta*, Book 7. ch. 8. [c] Or People about *Samarkant*, which is situated in the Valley of *Sogd*. [d] The *Nefthalites*, or *Abdelians*, the *Abtelah* of the *Persians*, and *Hayatelah* of the *Arabs*. They were in Possession of *Karazm*, and *Great Bukhâria*. [e] These *Ogorites*, or *Ogors*, seem to be the *Oygûrs*, or *Vigûrs*, often mentioned before. They were become powerful by their Numbers, and Dexterity at their Weapons. They inhabited the Banks of the River *Til*, called by the *Turks*, the *Black River* (*Kara-su*, or *Kara-muren*.) The ancient Princes who commanded them, were called *Var*, and *Khuni*, (or *Huni*) whence those People have taken the same Names. *Simocat.* book 7. ch. 7. [f] See *Menander* and *Simocatta*, as before. [g] See before, *p.* 434. [h] The same as before, and *p.* 441. [i] A Tribe of *Mogals*. See before, *p.* 414. [k] Or, *Kûr Khân*, and *Gûr Khân*. [l] The *Persian* Historians place the Eastern Bounds at the River *Benaket*, or *Ashaniket*. See *D'Herbelot*, p. 610. [m] See before, *p.* 420, 422, and 442. [n] *Taixeira* calls them *Tatars*.

Turkeſtân. only twelve thouſand *Perſians*, under the Conduct of *Bahram Chubi*, a famous General [a].

Over-run Perſia. FROM that Time the *Turks* ſeem to have remained quiet, till the Year 654, being the nineteenth of the Reign of *Yazdejerd*, laſt King of *Perſia*; at which Time vaſt Multitudes of them paſſed the River *Sihûn*, or *Sir*, and laid-waſte the Countries to the South of it. At the ſame Juncture the *Arabs* invaded his Dominions on the other Side; and he dying next Year, the Whole fell a Prey to them by Degrees [b]. At length in 716, they drove the *Turks* out of *Karazm* and *Mawara'lnahr*. In 894, *Iſmaël al Sammâni*, who ſet-up for King of thoſe Countries, marched into *Turkeſtân*, and defeating the *Khân*, took him Priſoner, and ten thouſand Men, beſides a vaſt Treaſure. Some Time before his Death, which happened in 909, he made another Expedition thither, ſubduing ſeveral Provinces [c].

Invade Mawara'lnahr. ABOUT the Year 990, *Kâra*, *Khân* [d] of *Turkeſtân*, invited-in by a Rebel-General of *Núh ebn al Manſûr*, of the Race of *Iſmaël*, took *Samarkant*, and *Bokhâra*: But the *Khân* dying, his Army returned home. His Son *Ilek Khân*, at the Inſtigation of another Rebel, marching from *Kâſhgar*, invaded *Mawara'lnahr* again, in 996; but Matters being accommodated, he retired to *Turkeſtân*. Yet two or three Years after, urged by the ſame Rebel, he returned, and took thoſe two capital Cities. In 1000 he entered the Country again, and ſeizing *Abdal malek*, the new King, Brother of *Núh*, ſent him to *Dizghend* [e]. This *Khân*, with *Kader Khân*, of *Ketau Kotan* [f], in 1008 paſſes the *Jihûn*, or *Amû*, with an Army; but is defeated by *Mahmûd Gazni*, who afterwards reconciles *Ilek Khân*, and his Brother *Togan* (or *Dogan*) *Khân*. Thenceforward *Mawara'lnahr* ſeems to have continued under the Dominion of *Mahmûd* [g].

The Seljûk Conqueſts. MEAN-TIME the Sons of *Seljûk*, who came-out of *Turkeſtân* in 985, and had ſettled about *Samarkand* and *Bokhâra*, applied to *Mahmûd*; who ſuffered them to paſs the *Jihûn*, or *Amû*, and fix themſelves in the Neighbourhood of *Neſſa*, and *Bawerd*. *Mikaël*, eldeſt of the *Seljûks*, had two Sons, *Togrûl-beg* and *Jaffer-beg*, Chiefs of the Colony, who increaſed ſo faſt, by the continual Paſſage of the *Turks* [h], that they became formidable in the Time of *Maſſûd*, Succeſſor of *Mahmûd*. This Prince not taking-care to repreſs them in Time, his Forces were beaten at length by *Togrûl* in 1039; who thereupon cauſed himſelf to be crowned *Soltân* in *Niſhabûr*, then the Capital of *Khoraſân*. This is the Account given by ſome *Perſian* Hiſtorians. *Mirkond* ſays, the *Seljûks* having conquered *Mawara'lnahr*, and *Karazm*, paſſed-into *Khoraſân*, under *Maſſûd*, in the Year 1034 [i], and founded their Monarchy of *Irân*, or *Perſia* [k].

DURING this Dynaſty, the *Kitân*, or Weſtern *Lyau*, fixed their new Empire in *Little Bukhâria*. The *Perſian* Hiſtorians call them *Karakathayans*. Theſe growing powerful, *Sanjar*, ſixth *Soltân* of the *Seljûks* of *Irân*, being at *Samarkant* about the Year 1145, was prevailed-on to attack *Gurjaſb*, King of *Karakathay*; but he was defeated, and all his *Harâm* (or Women) taken [l]. In 1172, *Takaſh*, Son of *Il Arſlân*, King of *Karazm*, applying to the King of *Karakathay*, for Aid againſt his Brother *Soltân Shâh*, he ſent *Karamara*, his Son-in-law, with a powerful Army; which recovered the Crown for him [m]. After this, upon ſome Occaſion, the *Khân* of *Karakathay* [n] invading *Karazm* with a great Army, obliged *Takaſh* (called by *Abu'lghâzi*, *Vighis*) to pay him Tribute.

THIS Tribute, his Son *Mohammed* refuſed to pay, and raiſing great Forces in the Year 1200 [o], firſt reduced *Bokhâra*, and the other Cities of *Mawara'lnahr* (which had become independent under Princes of their own) and then marching into the Dominions of *Karakathay Kurkhân* [p], overthrew his Army, commanded by *Taniku Taraz*, a famous Commander. After this he took *Otrar*, at that Time the Capital of all *Turkeſtân*, and returned. Not long after, the *Karakathayans* entering *Mawara'lnahr*, laid Siege to *Samarkant*: But hearing, at the ſame Time, both of the Approach of *Mohammed*, and the Revolt of *Kuchluk* the *Nayman*, againſt *Kurkhân* his Father-in-law, they raiſed the Siege, and returned to *Turkeſtân*. Hereupon *Kuchluk* ſent Ambaſſadors to conclude a Peace with *Soltân Mohammed*, whom he left at Liberty to take *Kâſhgar* and *Kotân*, in caſe he could conquer them. But the *Soltân* was baffled in the Attempt; and *Kuchluk*, though at firſt he had the better, was at laſt vanquiſhed [q].

THIS is the *Perſian* Account; what the *Chineſe* and *Tartars* ſay on this Occaſion, has been already related: And thus we have given a ſummary Account of the *Turks* in *Tartary*, from the

[a] See *Teixeira*'s Hiſtory of *Perſia*, p. 163, 171, and 184. [b] The ſame, *p.* 197, *& ſeqq.* [c] The ſame, *p.* 236, *& ſeqq.* [d] In *Teixeira*, *Bokhâra Khân*. Tartary

stân. Time they first grew powerful, till the Ruin of their Empire by *Jenghiz Khân*.

SECT. II.

The Rivers, Provinces, Cities, *and* Inhabitants *of* Turkestân.

The River Sir: *Cities on its Banks: The famous* Daria. *River* Yem, *or* Yemin. *Division of* Turkestân.

THERE are only two considerable Rivers in *Turkestân*; the *Sir*, which bounds it on the South; and the *Yem*, which makes its Frontier to North-West. The *Sir* is that River called by the *Arabs*, *Sihûn*; and by the *Greeks*, *Jaxartes*. It rises in the Mountains, that make the most Eastern Limits of *Great Bukhâria*, towards the Frontiers of *Little Bukhâria*, and runs winding to the North-West, till at length it falls c into the Lake of *Aral* [a].

It has on its Banks, which are very fruitful, a great many fine Towns, such as *Aughien*, *Aderkand*, *Andugân*, *Akſikat*, *Kojend*, *Taſhkant*, *Tonkat*, *Otrâr*, or *Farab*, *Saganak*, *Sabrun*, and *Yaſſi*. Formerly *Jund* and *Yenghikant* stood upon this River, when it discharged its Waters into the *Caſpian Sea*, before its Stream was turned into the above-mentioned Lake. Some lesser Rivers fall into it: The *Fargana* on the d South-Side, opposite to *Aderkant*; another at *Akſikat*, a third at *Tonkat*, and the *Taraz*, or *Talaſh*, called also *Arj* at *Otrâr*: These three descend from the North.

THIS River, as hath been already observed, is the *Daria*, so famous of late for its Gold Sand [b], which appeared to be very rich, in an Assay caused to be made by *Peter* I. Emperor of *Russia*: But the Event has shewn, that it never came from the *Sir*. In short, it was no other e than the Gold-Dust gotten by the *Bukhârs* in the Torrents of the Mountains towards *India* [c], and carried by them into *Siberia*, to truck for Skins.

THE River *Yemin* (or *Yem*) called *Yemba* by the *Russians*, rises in the *Uluk tag*, or great Mountains, towards the fiftieth Degree of Latitude. The Course of this River, according to *Kyrillow*'s Map, is winding from North-East to South-West, along the Borders of *Russia*; and after running about an hundred Leagues, it falls f into the North-East Corner of the *Caſpian Sea*, about forty-six Degrees of Latitude. This River, which abounds exceedingly with all Sorts of excellent Fish, is excessively rapid, but shallow: Its Stream is very delightful, and its Banks extraordinary fertile: But they are very little cultivated at present, because the *Kalmûks*, who possess the Western-Side of that River, have not the Use of Agriculture; and the *Tatars* of the *Kaſatſhia* [d] *Orda*, who are Masters of the Eastern-Side towards its Entrance into the *Caſpian Sea*, cultivate only just as much as is absolutely necessary for their Subsistance. There is neither b Town, nor Village, upon the *Yemba*: For having only five Foot Water at the Entrance, the *Russians* do not think it worth their While to settle there; and its *Tartar* Inhabitants live under Tents and Huts [e]. *Inhabitants, Mankats.*

TURKESTAN is divided into two Parts, the Western, and the Eastern. The first possessed by the *Karakalpaks* (or *Mankats*) may extend from the Town of *Turkeſtân*, to the *Caſpian Sea*. The second, in the Hands of the *Kaſatchia Orda*, reaches from the said Town to the Mountains East of *Andugan*, and, perhaps, beyond them. All the Towns, of both Parts, stand on the River *Sir*, or the Rivers that fall into it. *Division of* Turkestân.

1. *The* Western Part *of* Turkestân, *inhabited by the* Kara-kalpaks, *or* Mankats.

City of Turkestân *very ancient.* Mankats, *or* Karakalpaks, *live by robbing: Their* Khân *limited: Their Force.*

THIS Western Part has for its Capital the Town of *Turkeſtân*, which is the Metropolis of the whole Country [f], and Residence of the *Khân* of the *Kara-kalpaks*, during the Winter Season: It is situate on the right Side of a small River, that runs from the North-East, and falls into the *Sir* at a small Distance from the Town: Though built of Brick, is yet a very sorry Place, and is remarkable for nothing but its agreeable Situation [g]. *City of* Turkestân

THIS Town, as well as the whole Country, is often called *Turon*, or *Turân*, in the *Persian* Authors, who ascribe the building of it, as well as the founding of the whole *Turkish* Nation, to *Tur*, one of the Sons of *Ferdun* the seventh, King of the first *Persian* Dynasty, called *Pîshdâd*. But although still existing, and the Capital of *Turkeſtân*, it is difficult to tell where to fix it. *Strahlenberg* places it a little to the North-West f of *Saganak*, between *Otrâr* and *Sabrân*. *Del 'Isle* also puts it to the West of *Otrâr*, half-Way between that City, and the Lake of *Aral*, into *Very ancient.*

[a] See before, *p.* 478. [b] See before, *p.* 478. [c] See before, *p.* 519. [d] Or, *Kaſachia Orda*. These are the *Kaſats*. [e] History of the *Turks*, &c. p. 570, *&* *ſeq.* [f] In *Del 'Isle*'s last Map of *Persia*, it is written *Tiour Kustan*, as if a different Name from *Turkeſtân*: And in *Strahlenberg*'s, *Turguſtan*. [g] History of the *Turks*, &c. as before, *p.* 568.

Turkeſtân. which the *Sir* falls: But we know not what Authority either of them goes upon.

Mankats, or Karakalpaks

THE People who inhabit this Part of *Turkeſtân*, are a Tribe of *Mongols*, or *Tartars*, called *Mankats*, to whom the *Ruſſians* have given the Nickname of *Kara-kalpaks*, from the Kind of Cap, or Hats, they wear; which are open before and behind, with broad Brims on each Side; theſe Caps the *Ruſſians* call *Coulpaks* [a].

THE *Karakalpaks* are profeſſed Robbers, who have nothing to live-on but what they ſteal, either from the *Kalmûks*, or the Subjects of *Ruſſia*. They often paſs the *Aral tag*, or *Mountains of Eagles*, in Company generally with thoſe of the *Kaſatſhia Orda*, and make Inroads very far within *Siberia* towards the *Tobol*, *Iſeet*, and *Iſhim*; which extreamly incommode the *Ruſſians* who inhabit the Boroughs and Villages along thoſe Rivers. As in Winter theſe *Tartars* reſide in the Towns, like other *Mohammedan Tartars*; in Summer they go and encamp towards the Shores of the *Caſpian Sea*, and the Mouth of the River *Sir*, in the Lake *Aral* [b].

Live by robbing,

Their Khân *limited,*

ALTHOUGH the *Kara-kalpaks* are very ſtrong, by their Numbers; yet their *Khân* has very little Authority among them: For as their *Murſas* have great Power over them, they obey his Orders no further than thoſe Chiefs will permit them [c].

ACCORDING to *Abu'lghâzi*'s Hiſtory, the *Uzbeks* ſay the *Khâns* of *Turkeſtân* are deſcended from *Janiſh Soltân*, fourth Son of *Janibek Khân* [d]. The ſame Author informs us, that it is a Cuſtom with the *Mankats*, that when the *Khân* has a Spouſe, who is Daughter of a *Murſa* of that Tribe, ſhe is called *Biyim* [e]; and that no other Wife of a *Khân*, let her be of what Family ſhe will, has a Right to that Title [f].

Their Force.

THE Term *Bijaul*, which occurs in the abovementioned Hiſtory [g], denotes a military Charge among both the *Kara-kalpaks* and *Kaſatchia Orda*, which comes pretty near that of Colonel [h]. Theſe *Tartars* can bring twenty thouſand Horſe into the Field.

2. *The* Eaſtern Part *of* Turkeſtân, *ſubject to the* Kaſats, *or* Kaſatchia Orda.

City of Taſhkant. Shâh Rukhiyah. Kaſatſhia Orda: *Their Dreſs: Their Arms: Their Women.* Tartar *Hunting: Their Habitations: Continually invading their Neighbours: Trade in Slaves: Religion and Strength: Their* Khân *limited.*

THIS, which is called the Eaſtern Part of *Turkeſtân*, ſeems to incloſe, or ſhut-up the Weſtern Part, between the River *Sir*, and the *Caſpian Sea*; in regard the *Kaſats* extend from the ſame River as far as the *Yem*, or *Yemba*, in the Borders of the *Ruſſian* Dominions.

THE Capital of this Province is *Taſhkant*, ſituate on the Eaſt Side of the *Sir*, about the Latitude of forty-two Degrees thirty Minutes [i], and ninety Miles to the North of *Kojend* on the ſame River.

BENTINK obſerves, that it is a very ancient Town, and has been often deſtroyed, and rebuilt, on Account of the frequent Wars among the neighbouring *Tartar* Princes. Though it is not very conſiderable at preſent, yet it is the Winter's Reſidence of the *Khân* of the *Kaſatſhia Orda*: For in Summer he goes and encamps on one Side or other of the River *Sir*, according to the Cuſtom of all the *Tatar* Princes [k].

SEVERAL other Towns on the River *Sir* belong to the *Kaſats*; among the reſt is that of *Shâh Rukhiyah*, called by *Bentink*, *Shahirokheya*; who ſays it ſtands on the right (or Eaſt Side) of the River *Sir*, ſixteen Leagues to the Eaſt of *Taſhkant* [l]; but it is at preſent a miſerable, paultry Place, of about two hundred wretched Cabins [m]. This ſeems to have been the City of *Fenikant* [n], which *Jenghîz Khân* having ruined, *Timûr bek* rebuilt, and called it *Shah Rukhiya*, in Honour of his Son *Shâh Rukh*, who ſucceeded his Father in the Empire of *Jagatay*, *Khoraſân*, and the *Indies*.

THE *Kaſachia Orda* (or *Kaſats*) who poſſeſs this Part of *Turkeſtân*, reſemble the *Kalmûks* (or *Eluths*) much, being of a middle-Size, but exceeding well-ſet; their Faces broad and flat, their Complexion very ſwarthy, Eyes of the Pink-Form, black, ſparkling, and cut like thoſe of the *Kalmûks*; but they have the Noſe very well ſhaped, the Beard thick, and the Ears formed as uſual. They cut their Hair, which is exceeding black and ſtrong, within four Inches of the Head, and wear round Bonnets a Span high, of thick Cloth, or black Felt, with a Fur-Border.

THEIR Cloathing conſiſts in a Shirt of *Kitayka*, a Pair of Sheep-Skin Breeches, and a quilted

[e] In the Tranſlations, *Biim*. [f] The ſame, *p.* 243. [g] The ſame, *p.* 263. [h] The ſame, *p.* 575. [i] According to *Abu'lfeda* and *Ulug beg*'s Tables, where it is called *Alſhâſh* and *Chaj*. *D'Anville* places it, in his Map, fifteen Minutes more Northerly. [k] Hiſtory of the *Turks*, &c. as before, *p.* 569. [l] Rather to the South, or South-Eaſt. [m] Hiſtory of the *Turks*, &c. as before, *p.* 569. [n] Or, *Fenakant*. In *Abu'lghâzi*'s Hiſtory, *Farnakant*.

Veſt of the ſame Calico: But in Winter they wear over it a Sheep-Skin Gown, which ſerves them inſtead of a Quilt. Their Boots are very clouterly, and made of Horſe-Skin, as well as every one can make them himſelf.

THEIR Weapons are the Sabre, the Bow, and the Lance: For as yet Fire-Arms are very little uſed by them.

MOST of the Women are large, and well-made; and though their Faces be broad and flat, yet they are not diſagreeable. They dreſs much like the *Kalmûk* Women, excepting that they wear high-pointed Bonnets, which they fold on the right Side, and a Sort of big Slippers.

THEY are always on Horſeback, and when they are not upon their Incurſions, make Hunting their whole Employment; leaving the Care of their Flocks and Dwellings to their Wives, and Slaves, if they have any. Their Horſes make no Appearance, but they are very mettleſome, and fleeteſt of all the *Tartar* Horſes.

THESE *Tartars* poſſeſs very fine Quarters along the River *Yemba*, and towards the Mountains which ſeparate the Country of *Turkeſtân* from the Provinces of the *Kalmûks*; but all their Thoughts being bent on Rapine, they only cultivate juſt as much of their Lands as ſuffices for their Occaſions, they living on their Flocks, or Game, and uſing but little Bread. Few of them have fixed Habitations, and they encamp, for the moſt Part, under Huts and Tents, towards the Frontiers of the *Kalmûks*, and the River *Yemba*, to be ready to lay-hold on all Opportunities of pillaging.

THEY are continually at War with their *Pagan* Neighbours. In Winter they pay a Viſit on one Side to the *Kalmûks*, ſubject to the Grand *Khân*; who about that Time go to ſcour the Frontiers of *Great Bukhâria*, and other Parts to the South of their Country: On the other Side, they perpetually incommode the *Koſaks* of *Jaïk*, the *Nogay Tartars*, and the *Kalmûks* ſettled under *Ayuka Khân*, in the Kingdom of *Aſtrakhân*:

But in Summer they often croſs the *Mountains of Eagles*, which are very eaſy to paſs towards the Head of the River *Jaïk*; and make Inroads a great Way into *Siberia*, to the Weſt of the River *Irtis*: And as thoſe are the very beſt cultivated Parts in all that Country, the *Ruſſians* are obliged to keep Guards all Summer in the Villages and Boroughs along the *Tabol*, the *Iſhim*, and the *Tebenda*, to prevent their Deſigns. Though they are often very ill-treated in thoſe Incurſions, and even all they ſteal is not equivalent to what their Lands, if tilled, might yield, ſo fertile and excellent they are; yet they chuſe to expoſe themſelves to a thouſand Fatigues and Dangers, in order to ſubſiſt by robbing, rather than apply themſelves to ſome regular Buſineſs, and live comfortably.

Inhabitants, Kaſats.

Their Neighbours.

THEY ſell the Slaves they make in thoſe Invaſions in *Karazm*, or *Great Bukhâria*, to the *Perſian*, *Armenian*, and ſometimes *Indian* Merchants, who repair thither ſolely on Account of that Trade, which is the only one that is carried-on with any Security in thoſe Provinces, by reaſon it is the chief Livelihood of the *Uzbeks*; and it is principally with a View of preſerving the Means of ſelling thoſe Slaves, that the *Kaſatſhia Orda* cultivate Friendſhip with them. They retain very few Slaves themſelves, except to keep their Flocks; but commonly reſerve all the young Women and *Ruſſian* Girls they can ſnap-up in *Siberia*.

Trade in Slaves.

THESE *Tatars* are *Mohammedans*, but have neither *Korân*, *Mullas*, nor *Moſks*. They are able to bring into the Field about thirty thouſand Men: So that when joined with the *Karakalpaks*, they make, in all, fifty thouſand ſtrong.

Religion and Strength.

THEIR *Khân* is no leſs limited, than he of the *Karakalpaks*; the *Murſas* taking almoſt all the Power into their own Hands [a].

Their Khân *limited.*

THE Author of the *Deſcription of the Countries bordering on the Caſpian Sea* [b], ſays, *Kaſachi Orda* ſignifies *a wild People*.

BOOK

BOOK III.

TRAVELS *through* Tartary, Tibet, *and* Bukhâria, *to and from* China.

INTRODUCTION.

First Travellers Friars. John de Plano Carpini. William de Rubruquis. Marco Polo. Mandeville. *Embaſſy of* Shâh-rukh. Anthony Jenkinſon. Benedict Goês. Grueber, Deſideri. Averil's *Travels*. Verbieſt, Gerbillon. *Other Travellers: Method obſerved.*

First Travellers Friars.

THE prodigious Conqueſts of the *Mongols* and *Tartars*, under *Jenghiz Khân*, towards the End of the twelfth, and Beginning of the thirteenth Centuries, having made *Tartary*, and its Inhabitants, famous through the Continent, that vaſt Region, whoſe Name was ſcarce known before in this Part of the World, began to be viſited by *Europeans*, for Sake of Trade, or Curioſity: But what opened the Way to theſe Undertakings, was the Zeal, or rather Folly and Preſumption, of the Popes, who took it in their Heads to ſend ſome Friars, by Way of Envoys, to the Succeſſors of the above-mentioned Conqueror, to perſuade them to deſiſt from their deſtructive Invaſions, and embrace the *Romiſh* Faith.

John de Plano Carpini.

WITH this ridiculous View, joined, no doubt, to that of prying into the Affairs of the *Tartars*, *Innocent* IV. in 1246, ſent *John de Plano Carpini*, and *Bennet*, or *Benedict*, a *Polander*, *Franciſcans*, to *Kuinè* [a] *Khân*. Next Year he diſpatched others, *Aſcelin*, *Simon de St. Quintin*, *Alexander*, and *Albert*, all of the Order of Preaching Friars, on the ſame idle Errand, and, conſequently, with as little Effect. The two *Franciſcans* publiſhed an Account of their Travels, of which *Vincent* of *Beauvais* [b], a *Jacobin*, their Contemporary, has inſerted an Abſtract, in his *Speculum Hiſtoriale*: And by Way of Supplement hath added what he had learned from the Mouth of *Simon de St. Quintin*.

AFTER this, *Louis* IX. of *France*, commonly called *St. Louis*, following the Example of his Holineſs, in 1253 ſent *William de Rubruquis*, a *Capuchin*, to *Mangu Khân*, on the ſame romantic Kind of Miſſion: But this Embaſſy meeting with no better Succeſs than the former, they began to be convinced of the Vanity of ſuch Attempts, and ſo thoſe religious Expeditions were thenceforth laid aſide.

HOWEVER, this did not diſcourage others, who ſet-out upon rational Foundations, from penetrating into *Tartary*: For in 1272, *Marco Polo*, the *Venetian*, took a Journey thither, with his Father and Uncle, on the Score of Trade; and found his Account in the Journey, both as to Honour and Profit, far beyond his Expectations. But from this Time we meet with no *European* Traveller into *Tartary* for above three hundred Years, excepting our *Mandeville*, who went thither fifty Years after. Indeed, about that Time Commerce became interrupted, and the Roads through *Tartary* rendered inſecure for Merchants, by reaſon of the Wars that aroſe among the contending Princes in the ſeveral Quarters into which the Empire of *Jenghiz Khân* was divided: Nor was the Paſſage ſufficiently free for Commerce in 1404, when the Ambaſſadors of *Shah-rukh*, Son and Succeſſor of *Timûr-bek*, or *Tamerlan*, paſſed through thoſe Regions in their Way to *China*. The Relation of this Embaſſy, tranſlated from the *Arabic*, is a very curious Piece, and gives no ſmall Light into the Geography of *Tartary* and the *Bukhârias*.

[a] Miſprinted, perhaps, for *Keyuk Khân*.

[b] In *Latin*, *Vincentius Belvaſenſis*, or *Bellovicenſis*.

THE next Account of Travels into the *Middle Asia*, which occurs, is that of our Countryman Mr. *Anthony Jenkinson*, who went by the Way of *Russia*, *Boghar*, or *Bokhara*, in order to strike-out a Way for Trade on that Side; but found it impracticable, through the rapacious Disposition of the *Uzbek Tartars*, who live by robbing their Neighbours, and plundering the Karawâns that fall into their Hands. However, his Companion *Johnson* gathered what Accounts he could of the Roads from thence to *China* through *Little Bukhâria*, which have their Use in Geography: But since then no *Europeans* had attempted to push a Trade that Way, till of late the *Russians* formed such a Design, and in 1718 sent *Beckowitz*, with three thousand Men, to lay a Foundation towards putting it in Execution; the fatal Success of which Expedition has been already related [a].

IN 1603, the Jesuit-Missioners, who were in *India*, sent *Goës*, one of their Society, to find-out a Way to *China* by Land; which he effected, by joining himself with the Karawâns of Merchants, who were going thither through *Little Bukhâria*. After that the Jesuit *Andrada*, and *Chesaud*, about 1624 attempted a shorter Road from *India* to *China*, through the Country of *Tibet*: But what they failed in doing (if, indeed, they ever went about it) was performed in 1661, by *Dorville* and *Grueber*, two others of the Society.

IT might have been expected, that as the Difficulties were thus removed by them and *Goës*, the Design would have been prosecuted by the Missioners: But we hear no more of their religious Expeditions, on this Side, till 1714, when the Jesuit *Desideri* made a new Attempt to open a Way for them through *Tibet*; and as his two Predecessors had taken the Southern Road by *Bengal*, he took the Northern-one through *Kashmir*, being the middle-Way between theirs, and that of *Goës*, which was more round-about. Of these two Roads through *Tibet*, we have some farther Account from *Tavernier* and *Bernier*; which last Author procured some Information concerning the Way from *Kashmîr* to *Kâshgar*. Lastly, in 1742 Friar *Horace de Penna*, with other *Capuchins*, was sent expresly on the Mission to *Tibet*; where, according to the printed Relation, they did most surprizing Exploits, almost converting the Grand *Lama*, though he pretends to be no less than God Almighty himself.

WHILE Discoveries were thus carrying slowly on by the Missioners in the South, they made an Essay to cut-out a Road to *China* through *Tartary* by the North. For this Purpose, in 1685, *Avril* was deputed to go by the Way of *Russia* with the *Siberian* Karawâns: But not being able to succeed in his Design, the farther Prosecution thereof, on that Side, was dropped. However, he brought home some Account of the several Roads through *Tartary* to *China*; which, for the Time, might pass for no inconsiderable Discoveries. *Introduction.*

IN 1682, and the Year following, *Verbiest* made two Journeys, one into *Eastern Tartary*, which has been already given [b]; the other into *Western Tartary*; both in the Retinue of the Emperor of *China*, who made those Progresses himself. Ten Years after, *Gerbillon* performed eight Journeys into *Western Tartary*, some across the great sandy Desart towards *Siberia*; others through the Countries bordering on the great Wall of *China*; sometimes attending on the Emperor, sometimes on other Occasions. This gave him an Opportunity of viewing most Parts of that vast Region. In short, the Travels of these last two Jesuits are the most exact and curious of all which the Missioners to *China* have published relating to the neighbouring Countries. Had these who made the Map of the *Tartarian* Empire, published the Detail of their Travels and Observations, by Way of Journal, it might have been a great Addition to their other geographical Performances. Verbiest, Gerbillon.

BESIDES the Travels already mentioned, there are several others, which have a Relation to *Tartary*; such as those of *Bakhof*, *Isbrand Ides*, *Lange*, and other *Russians*, to *China*. But as those who performed them, only crossed the Country in one or two Places, and above three Parts in four of the Road they travelled lay through *Siberia*; we therefore thought fit to postpone giving their Journals, till we come to treat of that extensive Region in a future Volume. *Other Travellers.*

WITH regard to the Relations of *Marco Polo*, *Carpini*, and the other early Missioners into *Tartary*, we must likewise inform our Readers, that we do not intend to tire them with their long-winded Descriptions of the *Tartar* Inhabitants, and their Conquests, of which a more exact Account hath been already given: Nor with their religious, or other Transactions, equally little to the Purpose; but shall confine ourselves to what relates simply to the Geography and History of the Countries they passed through, touching only in brief upon Matters of another Nature. *Method observed.*

CHAP.

CHAP. I.

The TRAVELS *of* John de Plano Carpini, *and other Friars, into* TARTARY, *in the Year* 1246.

Introduction. AN *Engliſh* Tranſlation of this Friar's Travels, as well as the Abſtract taken from the thirty-ſecond Book of the *Speculum Hiſtoriale*, of *Vincentius Beluacenſis*, is inſerted in *Hakluyt*'s Voyages. There is a *French* Verſion of it in the Collection printed at the *Hague* in 1735, intitled, *Voyages faites principalment en Aſie dans les* 12, 13, 14, and 15, *Siecles*, &c. It is there put in better Order, than it appears in *Hakluyt*; who having given it according to the Method and Chapters of the *Speculum*, *Carpini*'s Account of the *Mongols* is placed before his Journal, which begins at the ſixteenth Chapter of the above-mentioned Book.

SECT. I.

Embaſſy *of* Carpini, *from the* Pope *to the* Great Khân.

Carpini *ſets-out: Enters the* Tartar *Dominions. Country of* Komania. Batu Khân's Orda: *His State. Bounds of* Komania. Baſkirs *Country.* Naymans: Mongals. *The Emperor's* Orda. *Magnificent Aſſembly.* Kuyne *enthroned: His Perſon, and Character.* Carpini's *Audience. Another* Orda. *The Emperor's Letter. No Ambaſſadors ſent. The Friars return.*

Carpini *ſets-out,* CARPINI, and his Companion *Benedict*, a *Pole*, ſetting forward on their Journey, repaired to the King of *Bohemia*, their Acquaintance, who defrayed their Expences to *Boleſlaus*, Duke of *Sileſia*. He did the like till they got to *Conrade*, Duke of *Lautiſcia* (or *Mazovia*) at whoſe Court *Waſilic*, Duke of *Ruſſia*, happened to be. There underſtanding, that they muſt make Preſents to the *Tartars*, they provided themſelves with Beaver, and other Skins. After which *Waſilic* being prevailed on by the Duke of *Cracow*, and others, he took them along with him, and ſent them, by Way of *Danilow*, to *Kiow*, then the Capital of *Ruſſia*. Here leaving their Horſes, becauſe no Forage was to be found on the Road, and they could not dig the Graſs from under the Snow, like the *Tartar* Horſes, they took Poſt-Horſes, and a Guide, the fourth of *February*, and arrived at *Kanow*, the firſt Town under the *Tartar* Dominion. Thence riding to another Town, they were conducted to the firſt Guard of the *Tartars*, who behaved rudely, and were very inquiſitive to know who they were, and their Buſineſs. Being gratified, they ſent them forward to *Korrenſa*, Lord of the Weſtern Marches, who had under him ſixty thouſand Men.

Enters the Tartar Dominions.

As ſoon as they came to *Korrenſa*'s Court, they were conducted to his *Orda*, or Tent, where they bowed thrice with the left Knee before the Door, taking-care not to touch the Threſhold of it. Being entered, they repeated the Subſtance of their Commiſſion, and preſented the Pope's Letters kneeling. Hence they were ſent, with three Guides, to Duke *Bathi*[a], and were on the Journey from the firſt *Tueſday* in *Lent*, to *Holy Thurſday*, although they rode a hard Trot, and changed Horſes often four Times a Day. Their Road lay through *Komania*, a plain Country, waſhed by the *Nieper*, the *Don*, the *Wolga*, an exceeding great River, and the *Jaëk*. On the Weſt Side of the *Nieper*, *Korrenſa* marched; on the Eaſt, *Montij*; Prince *Tubon*, married to *Bathi*'s Siſter, poſſeſſed the Banks of the *Don*; and *Bathi* the *Wolga*. A Colonel, with his Men, marched on each Side of the *Jaëk*.

THESE *Tartars*, in Summer, aſcended the Rivers to the Mountains; and in Winter moved down toward the *Euxine Sea*, along which the Friar paſſed, often over the Ice. They were lodged above three Miles from *Bathi*'s *Orda*, and when they went to wait on him paſſed between two Fires; the *Tartars* believing that Caution would prevent any Miſchief that might happen from Spells, or Poiſon. Having entered his Tent with the ſame Ceremonies as they did *Korrenſa*'s, they, on their Knees, preſented the Pope's Letters tranſlated; which *Bathi* read, and then they were ſent-back to their Tent; where they had no Victuals given them, but a little Millet, the firſt Night.

THIS Prince obſerved great State. He ſat on a lofty Seat, or Throne, with one of his Wives beneath him; where his Brothers, Sons, and other great Lords, were ſeated on a Bench in the Middle of the Tent, and others on the Ground behind him, the Men on the Right-hand, the Wo-

[a] *Batu Khân.*

men on the Left. The Friars also sat on that Side as all Ambassadors do in going to Audience; but in returning from the Emperor, they were placed on the Right. On a Table near the Door were Gold and Silver Vessels filled with Liquor. There attended Musicians likewise, who played when he drank. When on Horseback, a Canopy, or small Pavilion, is carried-over his Head, on the Point of a Spear. The same Customs have all the *Tartar* Princes, and their Wives. That Prince, though courteous to his People, was much feared by them: He was a great Master in the Art of War, to which he had been long inured [a].

On *Easter-Day* they set-out with two *Tartars* for the Court of the Emperor *Kuyne* [b], very weak. Their Food, all *Lent*, was only Millet, boiled with Water and Salt: Their Drink, Snow, melted in a Skillet. *Komania*, on the North, has *Russia*, the People called *Morduins*; the *Bileri*, who inhabit *Great Bulgaria*; the *Bastarsi* [c], who possess *Great Hungary*; the *Parositæ*, and *Samogetæ*; next whom are the People with Dogs Faces, inhabiting the Shores of the (Northern) Ocean. On the South lie the *Alans*, *Chirkassians*, *Gazarians*, and *Greece*; *Iberia*, the *Kathes*, the *Brutakes* (said to be *Jews* shaving their Heads all-over) *Scythia*, *Georgia*, *Armenia*, and *Turky*. On the West it has *Hungary* and *Russia*. *Komania* is very large. The *Tartars* slew most of the Inhabitants, the rest fled; but returned afterwards. Eight Days after *Easter* they left this Country, and entered that of the *Kangittæ* [d], where the People are few, Water being scarce. On *Ascension-Day* they entered the Country of the *Bisermins* [e], who speak the *Komanian* Language, but are *Mohammedans*. Here they met-with innumerable Cities, and Castles, ruined; the *Tartars* having destroyed the People, with *Soldân Alti* their Prince.

This Land, which hath in it high Mountains, and was possessed by *Siban* [f], *Bathi*'s Brother, borders Southwards on the *Mohammedan* Territories [g]. In the next Country dwell the Dukes *Burin* and *Kadun*, Sons of *Thiaday* [h], Son of *Chinghiz Khân*. On the North lie the *Black Kitayans* [i], and the Ocean. They were travelling through this Country from *Ascension-Day*, to the sixteenth of *June*, and then entered the Dominions of the *Black Kitayans*, where the Emperor built a House. After this they found a small Sea, on whose Shore stands a Hill, where there is a Hole; from whence, in Winter, they say proceed dreadful Storms. They travelled along this Sea, which has many Isles in it, for many Days [k], leaving it on the Left-hand. In this Land dwelt *Ordu* [l], oldest of all the Dukes, in his Father's *Orda*, or Court, where one of his Wives resided, and received Presents; according to the Custom of the *Tartars*, who never suffer the Courts of their Princes to go to Ruin. Carpini, 1246.

At length they came to the first Court of the Emperor, where one of his Wives dwelt. Here they were well entertained, for one Day, but not admitted into it, because they had not yet seen his Majesty. The twenty-eighth, departing thence, they entered into the Land of the *Naymans*, who are *Pagans*, and were destroyed by the *Tartars*. Next Day it snowed. The Country is extreamly cold, and full of Mountains, intermixed with few Plains. After many Days Journey through this Region, they came into the Land of the *Mongals*, whom *Europeans* call *Tartars*; where having travelled at a great Rate, for three Weeks continually, they came to the Court of the Emperor *Kuyne*, on the twenty-second of *July*: But as he was not yet elected, they were not admitted to Audience. Naymans, Mongals.

Five Days after, he sent them, with Guides, to his Mother's Court, called *Sira Orda*, where they found a huge Tent of white Cloth, large enough to hold two thousand People, with a Palisade round it, painted with Figures. There were also assembled the great Lords, who the first Day were dressed in White; the second, on which *Kuyne* arrived, in Scarlet; the third in blue Robes; and the fourth in rich Robes of *Baldakin* Cloth [m]. The Palisade had two great Gates, one without Guards, and continually open for the Emperor to pass; the other, for the Assembly to enter, had Guards. Many of the great Men had Gold on the Furniture of their Horses, to the Value of twenty Marks. The Grandees having entered the Tent, consulted (as *Carpini* judged) about the Election till Noon; and then fell to drinking Mares-Milk in surprizing Quantities. They sent for the Friars to drink, by Way of honouring them; but plied them so hard with their Ale (for they did not like their Milk) that they desired to be excused. This continued till Evening, the People withdrawing all the While to a great Distance round the Court. *The Emperor's Orda.*

Without the Door stood Duke *Jeroslaus*, of *Susdal* in *Russia*, with many Lords of the *Kithay* and *Solangi*, the two Sons of the King *Magnificent Assembly.*

[a] Hakluyt's Voyages, vol. 1. p. 63, *& seqq.* [b] Or, *Ken Khân*, is *Kayuk*, third Emperor of the *Mongols*, or *Megals*. [c] Rather, the *Beskars*, or *Baskirs*. [d] Rather, the *Kanghilli*, or *Kankli*. [e] Perhaps *Mosiemans*, or *Mohammedans*. [f] *Sheybani Khân*. See before, *p.* 489. [g] As those of *Persia*. [h] *Jagatay*. [i] Or, *Karakitayans*. [k] This may be the Lake *Saysan*, through which the *Irtish* runs. [l] *Ordu Itzen*, eldest Son of *Zuzi*, or *Juji*. See before, *p.* 489. [m] Scarlet, or Crimson.

Great Tartary.

of *Georgia*, the Ambaſſador of the *Khalif* of a *Baldak* [a], and ten other *Soldâns* of the *Mohammedans*. *Carpini* was told, there were more than four thouſand Ambaſſadors in all, ſome from Princes who were Tributaries, or ſent to ſubmit themſelves; others from Governors of Provinces, or foreign Kings, with Preſents. All theſe were placed without the Liſts, and had Drink given them. Here they remained four Weeks; during which Time, in their Opinion, the Election was made, the rather becauſe, when *Kuyne* came-out of the Tent, the Muſic played before him, and he was bowed to, or honoured with Wands, having purple Wool at the End of them, all the While he was in the open Field; Ceremonies paid to none of the other Princes.

Kuyne *enthroned*,

FROM thence the whole Aſſembly rode three or four Leagues, to a Place, where in a fine Plain by a River's Side, between Mountains, there was another Pavilion erected, called the *Golden Orda* [b]. There was a Tent alſo ſet-up on Pillars, covered with Plates of Gold, and joined to other Timber with Gold Nails. It was covered, on the Inſide, with *Baldakin* Cloth, and on the Outſide with another Sort. On the twenty-fourth of *Auguſt* the Multitude, who were aſſembled, ſtood with their Faces to the South. Of theſe there was a Party about fifty Yards diſtant, who prayed, and kneeling, proceeded farther South. Having continued thus a long Time, they returned to the Tent, and ſet *Kuyne* on the Throne, placed there for the Purpoſe; then his Lords firſt, and afterwards the whole Multitude, kneeled before him, except the Friars, who were none of his Subjects.

His Perſon and Character.

THE Emperor ſeemed then to be about Forty, or Forty-five. He was of a middle Stature, and behaved with exceeding Gravity. He was a very wiſe Prince, and ſeldom laughed. *Carpini* pretends he had many Chriſtian Clergymen [c] about him, and that ſome of them aſſured him he intended to become one himſelf. The Emperor never ſpeaks to a Foreigner, but by a third Perſon; nor his Subjects to him, but on their Knees. In his Letters, he ſtiled himſelf *the Power of God, and Emperor of all Mankind.* On his Seal were engraven theſe Words: *God in Heaven, and* Kuyne Khân *on Earth, the Power of God: The Seal of the Emperor of all Men* [d].

Carpini's Audience.

SOME Time after the Friars were called to Audience, with other Ambaſſadors; whoſe Names being called-over in Preſence of the Emperor, and his Lords, each of them bowed the left-Knee four Times, without the Threſhold of the Tent; and then having been ſearched, to ſee if they had any Weapons about them, entered the Door on the Eaſt Side, the Weſt Door being left for the Emperor only. All other Ambaſſadors were there received by him, but few admitted into his Tent. The Preſents made on that Occaſion, in fine Cloths, Silks, and Furs, amounted to a great Value. Theſe Friars were aſked for theirs, but they had nothing left to give. There were more than five hundred Carts on a neighbouring Hill, full of Silver, Gold, and Silk Habits; which were all divided between the Emperor, and his Dukes.

DEPARTING thence, they came to another Place, where there was a magnificent Tent of Purple, a Preſent of the *Kitays* [e]. Here, on a lofty Stage, ſtood an Ivory Throne, curiouſly made, and adorned with Jewels: It had Steps to go-up to it, and was round at-Top. There were Benches placed about it, where the Ladies ſat on Stools on the Left-hand; for none ſat on the Right. The Lords ſat on Benches below [f]. The Emperor's Wives had beautiful Tents of white Felt. Here his Majeſty parted with his Mother, and *Jeroſlaus*, before-mentioned, died; ſuſpected to have been poiſoned at a Banquet, that the *Tartars* might poſſeſs his Dukedom without Trouble. After this the Friars were, by the Emperor's Order, ſent to his Mother; he intending next Day to ſet-up his Standard againſt the Countries in the Weſt, or *Chriſtendom* [g], which he had no Mind they ſhould know.

ON their Return, they remained a Month at the *Orda*, almoſt periſhed with Hunger and Thirſt; the Proviſion allowed them for four Days, having been ſcarce ſufficient for one. At length they were relieved by *Coſmas*, a *Ruſſian* Goldſmith, who made the Imperial Throne and Seal. After this the Emperor ſending for them, ordered them, by his Secretary, to put-down in Writing the Purport of their Buſineſs, and deliver it to him. Having done this, he ſent for them again, and aſked if the Pope had any about him, who underſtood either the *Ruſſian*, *Arabic*, or *Tartarian*. They anſwered in the Negative: But ſaid, if his Majeſty's Letter was interpreted to them, they could pen it in their own Lan-

[a] So the *Europeans* of thoſe Times called *Baghdâd*. were, doubtleſs, the *Bonza* Prieſts (ſo like the *Romiſh*) to. See *Gaubil*'s Hiſt. *de Gentchis Khân*, &c. p. 105.

[b] In the *Mongol* Language, *Altun Orda*.

[c] Theſe whom *Kayuk* is remarked to have been much attached

[d] *Hakluyt*'s Voyages, p. 66, *& ſeqq.*

[e] Or *Kitayans*, who poſſeſſed the Northern Provinces of *China*, and adjoining Parts of *Tartary*, conquered by *Jenghiz Khân*. See before, *p.* 434.

[f] In this, as in many other Things, they ſeem to have imitated the *Chineſe*.

[g] This is no Sign that he loved Chriſtians, much leſs that he intended to turn Chriſtian himſelf.

guage

guage, and deliver both the Tranſlation, and a Original, to the Pope. This Method being approved of, the chief Secretary, and other Clerks, ſent for them ſome Days after, and interpreted the Letter; which *Carpini* took-down in *Latin*. Then they made him explain every Sentence, and read the Letters twice over to avoid Miſtakes. They gave them the ſame alſo in *Arabic*.

THEY were told by the *Tartars* who attended them, that the Emperor deſigned to ſend his Ambaſſadors with them to *Europe*: But at the ſame Time was deſirous (as the Friars judged) that the Propoſal ſhould come from them. One of their *Tartars* adviſed them to petition him to that Purpoſe: But they declined it, not caring that Ambaſſadors ſhould be ſent, fearing, 1. That the Diſſenſions, which reigned among the Chriſtian Princes, would encourage the *Tartars* to make War on them. 2. That their Envoys might be forced from them, or ſlain by the Way: For our Nations (ſays *Carpini*) are arrogant and proud [a]; and it is the *Tartar* Cuſtom never to be reconciled to ſuch as kill their Ambaſſadors, till they have taken Revenge [b]. 3. That they could come for no Purpoſe but to be Spies; and the rather, as they had nothing to do, but deliver the ſame Letters, which they themſelves carried.

THE thirteenth of *November*, having received their Paſſport, they ſet-forward, and travelled all Winter through the Deſarts, without ſo much as a Tree to be ſeen. They had an uncomfortable Time of it, lying often on the Snow, except with their Feet they made the Ground bare; and often in the Morning found themſelves covered with Snow, driven over them by the Wind. At length, on *Aſcenſion-Day*, they arrived at the Court of *Bathi*. From thence they paſſed-on to *Korrenſa* and *Montij*, where new Guides being allowed them, they proceeded till they had paſſed all the *Tartar* Guards, from the laſt of which, in ſix Days, they arrived at *Kiow* on the eighth of *June*. They were feaſted ſplendidly by the Dukes *Daniel*, and *Waſilik*, who ſent with them Ambaſſadors to acquaint the Pope, that they had already acknowledged his Supremacy, and the *Romiſh* Church for their Miſtreſs [c].

Carpini, 1246.

SECT. II.

An Account *of the* Mongals, *and* Nations *conquered by them.*

Mongals *Country: Their Perſons, Character, Laws, Cuſtoms: Their Religion: Superſtitious Notions.* Chinghîz Khân's *Original: Conquers* Kitay: *Defeated by* Preſter John. *Mountains of* Adamant. *A noiſy Sun. Weſtern Conqueſts. Strange People. One-legged Men.* Mongul *Diſcipline: Their Armour, and Arms.*

THE Country of the *Mongals* has on the Eaſt the Land of the *Kitayans* [d], and *Solanghi*; on the South-Weſt that of the *Huires*; on the Weſt the *Naymans*; and on the North the Ocean. It conſiſts of Mountains and Plains, but is every-where ſandy and barren, having but few Rivers; yet affords good Paſture. They have neither Villages, nor Cities, except one [e], half a Day's Journey from *Sira Orda*, which is ſaid to be a pretty good one; but the Friars did not ſee it. The Weather is very uncertain: The Cold and Winds are exceeding violent. It ſeldom rains in Summer; never in Winter. There fell ſo much Hail at the Emperor's Election, that melting, an hundred and forty Perſons of the Court were drowned, and ſeveral Houſes carried-away. Often exceſſive Heat is ſucceeded by exceſſive Cold. *Mongals Country.*

THE Faces of the *Tartars* are very broad between the Eyes and Cheek-Bones, their Noſes ſmall and flat, their Eyes little, and Eyelids ſtanding erect. They ſhave the Crown of the Head. They braid their Hair behind in two Locks, binding each behind an Ear. They have ſhort Feet. The Dreſs of Men and Women is alike. Their Houſes are round, with a Hole a-Top, for Window and Chimney: Some are large, others ſmall: Some made to be taken to Pieces, others always fixed on Carts, drawn by one, or more Oxen. *Their Perſons, Character.*

THE *Tartars* highly reverence their Lords, and never tell them a Falſhood: Seldom or never fall-out among themſelves, even in Drink; or ſteal from one another: Endure great Fatigue: Will ſing and be merry, though faſting all Day. Their Women very chaſte; yet ſome will talk obſcenely. They are exceeding friendly and courteous to each other; but rude and deceitful

[a] He gives, as an Inſtance, that when the *German* Ambaſſadors, who went with him, returned dreſſed in the *Tartar* Habit, they were almoſt ſtoned to Death, and compelled to change their Dreſs. [b] A Crime of this Nature cauſed them to deſtroy the *Karazmian* Empire. See before, *p.* 422. [c] *Hakluyt*'s Voyages, *p.* 69, *&c. ſeqq.* [d] In *Carpini*'s Relation, *Kitay*. *Haython* and *Marco Polo* write *Kathay*, which is not ſo true. [e] *Hakluyt* has thruſt into the *Engliſh* Text, *Cracurim* (for *Karakoram.*) He has corrupted it in ſeveral other Places.

Great Tartary.

to Strangers. The Great Duke of *Ruſſia*, King of *Georgia*'s Son, and *Soldâns*, at the Emperor's Court were treated with very little Reſpect. They had the Mortification to ſee their very *Tartar* Attendants go before them, and were often obliged to ſit behind their Backs. Robbery and Adultery are puniſhed with Death; nay, Fornicators ſuffer the ſame Puniſhment. In Marriage no Degrees of Affinity are prohibited, excepting thoſe of Mother and Daughter, and Siſter by the Mother's Side. They marry their Siſters by the Father's Side; and the younger Brother, or ſome Relation, is obliged to marry the Widow of the elder. When *Carpini* was in *Ruſſia*, Duke *Andrew* [a] being put to Death by *Bathi*, on a bare Accuſation of ſelling *Tartar* Horſes out of the Country, he conſtrained his Widow and younger Brother (who ſolicited that the Dukedom might not be taken from them) to be married together. They make no Difference between the Sons of Wives and Concubines. Polygamy is in Uſe, each Wife, with her Family, living a-part.

Laws, Cuſtoms.

Their Religion,

As to their Religion, they believe in one God, but have no Notion of a future State; yet fancy they ſhall paſs into another World, and live in the ſame Manner they did in this. They begin their Enterprizes at the New, or Full Moon, which they call *the Great Emperor*, and worſhip on their Knees. Every-body, even Strangers, their Cattle, Goods, and every Thing muſt be purified by Fire. They kindle two Fires, and ſetting-up two Javelins near them, ſtretch a Cord from the End of one to the other, under which the Things to be purified paſs. They think it a Fault with a Knife to touch the Fire, or take Fleſh out of the Pot; or to cleave Wood with a Hatchet near the Hearth, imagining it takes away the Fire's Power. It is no leſs faulty with them to lean on a Whip, or touch Arrows with it: To kill young Birds, or pour Liquor on the Ground: To ſtrike a Horſe with the Bridle, or break one Bone againſt another. Whoever piſſes in his Houſe is put to Death, or muſt pay a great Fine, and all be purified by Fire: Alſo if a Perſon, not able to ſwallow a Bit of Meat, ſpits it out, he is drawn through a Hole made for the Purpoſe, in the Floor of his Houſe, and ſlain. It is Death to tread on the Threſhold of the Habitation of their Princes [b].

Superſtitious Notions.

Chinghiz Khân's *Original,*

THE Country of *Mongal* was inhabited formerly by four Nations, of the ſame Make and Language: The *Yeka Mongals*, or *Great Mongals*; the *Su Mongals*, or *Water Mongals*, who took the Name of *Tartars* from a River there; the *Merkat*, and the *Metrit*. *Chinghiz* [c], who was of *Yeka Mongal*, having allured the People of that Province to join him, attacked the *Su Mongals*, or *Tartars*, ſlew their Chief, and ſubdued them: As afterward he did the *Merkats*, and *Metrits*. Hereupon the *Naymans*, who were governed by the young unexperienced Sons [d] of their late potent Emperor, to whom theſe four Nations paid Tribute, invaded their Territories, ſlew the People, and carried-off their Effects. *Chinghiz*, on this News, gathered his Subjects; and meeting the *Naymans*, joined by the *Karakitay*, in a narrow Valley, killed the greater Part, and took the reſt Priſoners.

IN the Country of the *Karakitay*, *Okkoday* [e], Son, and Succeſſor of *Chinghiz*, built a City, called *Omil* [f], near which, to the South, is a vaſt Deſart, reported to be inhabited by wild Men, who cannot ſpeak, and have no Joints in their Legs.

AFTER this the *Mongals* marching againſt the *Kitayans*, were overthrown, and only ſeven left alive: But recruiting, they firſt ſubdued the *Huiri*, who were Chriſtians of the *Neſtorian* Sect, and from them took their Writing Characters [g]: Then the Country of *Saruyur*, of the *Karanites*, and Land of *Hudirat*. Laſtly, *Chinghiz Khân* marching a ſecond Time againſt the *Kitay*, by Degrees conquered moſt of their Country, took the capital City, and ſlew their Emperor.

THE People of *Kitay* are *Pagans*, are very courteous, and have no Beards. They uſe a peculiar Kind of Characters, have Hiſtories of their Country, Hermits and Houſes like the *Romiſh* Churches. Have divers Saints, worſhip God, and believe a future State. *Carpini* adds what muſt be falſe, *viz.* that they adore Jeſus Chriſt, and reverence the *Old* and *New Teſtament*; which, he ſays, they are reported to have among them.

NEXT he led his Troops againſt the King of *Greater India*, called *Preſter John*; but was defeated. They made the Friars believe, that this was done by Means of Copper Statues, which being hollow, had Fires within. Theſe

[a] In the *French*, he is called Duke of *Savogle*. [b] *Hakluyt*, p. 54, *&* *ſeqq.* [c] In the Original, *Chingîs*. [d] They were then divided between two *Khâns*. See before, *p.* 419, 420. [e] *Oktay*, or, as *Abu'lghâzi*'s Tranſlators write, *Ugaday*. [f] So named in the Book publiſhed by *Carpini*: But in the Extract of *Vincentius*, *Khanil*; rather, perhaps, *Khamil*, at the Extremity of *Little Bukhâria*, at the Entrance of the great Deſart. This may alſo be the *Anmil*, or *Tamil*, mentioned by *Abu'lfaraj*, p. 282, and 322, where began the Diviſion of *Tartary*, which fell to *Oktay*'s Share. [g] Theſe muſt be the *Vigûrs*, or *Oygûrs*; but they were of *Fo*'s Religion, which being ſo like their own, the Friars ignorantly, or by Deſign, repreſent them as Chriſtians.

were ſet on Horſes, and a Man behind each, a who, with a Pair of Bellows, blew the Fire upon the Enemy; which burnt them, and raiſed a great Smoke. On their Return through the Deſarts, they met-with a People, whoſe Men were ſhaped like Dogs. Theſe Monſters, on the Approach of the *Mongals*, ran into a River, and then rolling themſelves on the Ground, the Duſt and Water became frozen together (it being Winter) and formed a Kind of Armour, Proof againſt the Swords, and Arrows of their b Enemies; whom they fell-upon, Tooth and Nail, and thus drove them out of their Country. This, *Carpini* ſays, was ſolemnly affirmed to him by ſeveral *Ruſſian* Prieſts [a], and others, at the Emperor's Court.

FROM thence, in their Way home, the *Mongals* came into the Country of *Burithabeth* (or *Tibet*) and conquered it. The People are *Pagans*, and eat the Bodies of their deceaſed Parents. They are very deformed, and have no Beards, plucking- c out the Hairs as faſt as they grow, with an Iron Inſtrument. *Chinghîz Khân* moved Weſtward next, againſt the *Kirghis*, and penetrated as far as the *Caſpian* Mountains. Theſe the Author tells us, were of *Adamant*; that the Inhabitants lived within the Hills under-Ground; that on the Approach of the *Mongals* they made a Breach through the Mountain, which yet was rendered inacceſſible by a Cloud that ſtood before it: That getting by ſubterraneous Paſſages, under d the Field where the Enemy was encamped, they broke through the Ground, and made a great Slaughter of them. Laſtly, that the Reaſon they gave, why they dwelt under the Earth, was, becauſe the Sun made ſuch a dreadful Noiſe at riſing, that they could not endure it [b]. Theſe, and the like ridiculous Fables, was this Friar capable of relating; and ſuch is the idle Account he brought home of the Wars of *Chinghîz Khân*; who, according to him, was ſlain by Thunder. e

WHAT he ſays of the Emperor *Okkoday*, relates only to the Expeditions of *Bathi ared*, and *Sirpodan* [c]. According to this Author, *Bathi* firſt ſubdued *Alti Soldân*, then the *Biſermini*, meeting great Oppoſition from the City *Barthia* [d], which they deſtroyed. Whereupon *Jakint* [e], another, ſurrendered, and was ſpared. Then they went and beſieged *Orna*, a rich and populous City of the *Mohammedans*, being a conſiderable Mart, and Kind of Port ſtanding on the River *Don* [f], f which ran through it. They took it at length by turning the Stream, and ſo drowning the Place, with its Inhabitants. This done, they marched towards *Ruſſia*, and, after a long Siege, took *Kiow*, the Capital; which was very large, and populous: But when *Carpini* was there, it had not above two hundred Houſes, and the Inhabitants were reduced to Slavery. From thence they proceeded to *Hungary* and *Poland*, where many of them were ſlain; and had the *Hungarians* withſtood them bravely, they muſt have been forced-back. Returning Eaſtward, they ſubdued the *Morduins*, who are *Pagans*; and the *Bileri*, or thoſe inhabiting *Great Bulgaria*. Thence marching Northward, they conquered the *Baſtarci*, or *Great Hungaria*. Next the *Paroſitæ*, who having but little Stomachs, and ſmall Mouths, could eat no Fleſh, it ſeems, but lived on the Steam of the Pot. Then they maſtered the *Samogetæ* [g], who lived by hunting, and wore the Skins of Beaſts. Laſtly, they ſubdued a Nation dwelling on the Northern Ocean, who had the Feet of Oxen, and Faces of Dogs. The Reader will ſcarce believe theſe Things, although *Carpini* proteſts he delivers nothing but what he ſaw himſelf, or had from Perſons worthy of Credit.

Carpini, 1246.

Strange Peoples.

As to *Sirpodan*, he was ſent againſt the *Kerghis* [h], beardleſs *Pagans*, whom he ſubdued. Then marching Southward againſt the *Armenians*, in certain Deſarts found Monſters with only one Arm growing out of their Breaſts, and one Leg. Their Motion was by hopping and leaping, yet ſo ſwift, that they outran Horſes; and, when weary, made-uſe both of their Hand and Foot, turning round as it were in a Circle [i]. It required two of them to ſhoot a Bow. *Carpini*'s Authority for theſe palpable Lies, ſeems to have been the *Ruſſian* Prieſts before-mentioned, who told him thoſe one-footed Gentry had ſent many Ambaſſadors to the Emperor. No doubt perceiving him to be a ſilly credulous Mortal, they did this to make Game of him.

One-legged Men.

CHINGHIZ KHAN divided his Troops into Tens, Hundreds, Thouſands, and Ten thouſand, with their proper Officers, one ſubordinate to the other; and over the Whole were placed two or three Dukes, one of whom was Chief. Whoever flies, unleſs all give Way together, is put to Death: If one, or more, out of ten turns his Back, he is ſlain; or if he be taken by the Enemy, unleſs the other nine reſcue him, they are ſlain; or if one, or more, march forward, and the reſt ſtay behind, they undergo the ſame Fate. Their Arms are one or two Bows, three

Mongal Diſcipline.

[a] In this Caſe the *Romiſh* Prieſts were Fools, the *Ruſſian*, Knaves. [b] *Hakluyt*, p. 57, *& ſeqq.* [c] He writes, *Cyrpodan*. This muſt be *Hulaku*. [d] In *Vincentius*, *Barchin*. [e] Or, *Yakint*. In *Vincentius*, *Sargut*. [f] In *Vincentius*, there is no Mention of the *Don*; ſo little are the Extracts of ſome Authors to be depended on. [g] Or, *Samoyeds*. [h] *Kergis*, in the Original. [i] In that Sort of Motion, doubtleſs, which Tumblers call the *Catharine-Wheel*; which is progreſſive, not central.

Quivers

Great Tartary.

Quivers of Arrows, an Ax, and Ropes to draw a Engines. The better Sort have one-edged Swords, with ſharp Points, and ſomewhat crooked [a]. Some are armed with Helmets and Jackets, made of Neats-Leather, which being cut into Pieces as large as one's Hand, and laid three or four over one another, are tied together with Thongs, or Cords; ſo that they ply to all the Motions of the Body.

Their Armour,

SOME have theſe Jackets all of Iron-Plates, about an Inch broad, and eight long, with ſo b many Holes in each. Theſe are laid Part of one over Part of another, till of the due Length, and then faſtened like the former, having at-Top a Strap of Leather to keep them firm together. The Whole conſiſts of four Pieces, two for the Back and Breaſt, and two to cover the Arms from the Shoulder to the Hands, all faſtened together with Hooks. The upper-Part of their *Caſque* is of Iron, but that which covers the Neck of Leather. They keep them exceeding c clean and bright. Their Horſes are clad in the ſame Sort of Armour, conſiſting of five Pieces, one on each Side from Head to Tail, and faſtened to the Saddle, Back and Neck; another on the Crupper, with a Hole for the Tail to go through; a fourth on the Breaſt, reaching to the Knees; and on their Foreheads they faſten a Plate of Iron.

And Arms.

SOME have a Hook fixed to the Head of their Lance, to pull the Enemy off their Horſes. The d Heads of their Arrows are very ſharp, and with two Edges. They have Wicker-Targets, but never wear them in the Field: For croſſing Rivers, they have a round Piece of light Leather, on which laying their Cloaths they draw it, by Means of a Rope, and Loops made round the Edges in Form of a Purſe: Then getting on their Saddle, which is placed at-Top, they commit themſelves to the Stream with two Oars, or have it drawn at the Tail of a Horſe [b].

SECT. III.

The Travels *of* Friar Aſcelin, *and his* Companions [c], *towards the* Tartars *in* 1247.

Arrive at the Army: Ordered to be ſlain: The Sentence revoked: Reproached with Idolatry: Treated with Contempt, and Delay: At length diſmiſſed.

IN the Year 1247, Friar *Aſcelin*, ſent by the Pope, with three other Friars [d], to the *Tartars*, arrived at their Army, then in *Perſia*, commanded by Prince *Bayoth Noy* [e]: Which being notified to him, he ſent his *Eghip*, or chief Counſellor, with Interpreters, to know from whom they came. *Aſcelin* anſwered, that he was Ambaſſador from the Pope, who was the greateſt in Dignity among Chriſtians, and honoured as their Father. Being offended at thoſe proud Words, they were aſked, *If they did not know that the* Khân [f] *was the Son of God* [g], *and* Bayoth Noy, *and* Batho, *his Princes? Aſcelin* anſwered, that the Pope knew none of their Names, otherwiſe he would not have omitted them in his Letters which they brought: But that being grieved for the Slaughter of ſo many Men, eſpecially Chriſtians, he, by the Advice of his Cardinals, had ſent them to the next *Tartarian* Army they could find, to exhort the General to forbear ſuch Ravages, and repent of what they had done.

THE Meſſengers went often to and fro, every Time changing their Garments, and were very ſolicitous for Preſents to the *Khân*: But the Friars ſaid it was not the Cuſtom of the Pope to ſend Preſents to any Chriſtians, much leſs to Infidels; who rather paid that Compliment to him; and that the Chriſtian Princes never ſent any to one another with their Letters: They likewiſe refuſed, at all Hazards, to perform the Ceremony of kneeling to *Bayoth Noy* [h], leſt they ſhould thereby intimate a Subjection of the Pope to the *Tartars*; but conſented to ſuch Reverence as was cuſtomary in their own Country. Enraged at this, they called the Pope and them e Dogs. The Friars would have replied to theſe Indignities, but were not able, for the Noiſe made on the Occaſion. And it was well they could not: For *Bayoth Noy* was ſo incenſed, that he ordered them inſtantly to be put to Death. Some of his Counſellors were for ſlaying only two, and ſending the other two back. Others adviſed him to have the principal of the

[a] Of the Scymetar Kind. [b] *Hakluyt*, p. 60, *& ſeqq.* [c] This Relation is taken from the Memoirs of Friar *Simon de St. Quintin*, inſerted likewiſe in the thirty-ſecond Book of the *Speculum Hiſtoriale* of *Vincent* of *Beauvais*. *Purchas* has made an Abſtract of it: But in the *French* Collection before-mentioned, it is given at large. Our Extract is made from *Purchas*, with ſome Additions out of the *French*. [d] *Alſerik*, or *Alberik*, *Alexander*, and *Simon*. [e] In the Original, *Bajoth-noy*. *Vincentius* obſerves, that *Noy* is his Dignity. It ſeems to be *Noyan*, often mentioned before in the Hiſtory of *Jenghîz Khân*. [f] In this, as well as the former Relation, it is always written *Cham*; which reduced to the *Engliſh* Idiom, will be *Kham*; but *Khân*, or *Hân*, is the true Pronunciation, as hath been often obſerved before. [g] They might call him the Son of Heaven, in the ſame Manner the *Chineſe* and *Kitan* Emperors were ſo termed, in a figurative Senſe. [h] *Guichard*, a Friar, who had lived at *Trifel*, or *Triſtis* (a Town of the *Tartars*) ſeven Years, told them it was no proper Adoration, but only a Reverence.

Friars

Friars flayed alive, and his Skin, ſtuffed with Hay, ſent to the Pope. Some were for whipping them to Death through the Army; others for ſetting them in the Front of the firſt Battle they had with the Chriſtians, there to be killed by them.

So much were they divided, it ſeems, in Opinion, about demoliſhing four Friars, when the oldeſt of the Prince's ſix Wives, and thoſe who had the Care of Ambaſſadors interpoſing, ſhe put him in Mind of the Infamy he would incur by putting Ambaſſadors to Death, and the Precedent he would ſet others to ſlay his own. The other Advocates added, that he ought to remember how much the *Khân* had been enraged with him once before, for executing an Ambaſſador, and after tearing-out his Heart, cauſing it to be dragged at a Horſe's Tail through the Army, in order to deter others from coming on Embaſſies: That for their Parts, if he ordered them to treat thoſe who were there in the ſame Manner, they would not obey him, but rather fly to the *Khân*, to teſtify their Innocence, and accuſe him of Cruelty and Perfidiouſneſs. Hereupon *Bayoth Noy* changed his Sentence, and became appeaſed.

AFTER this the Lords came to the Friars, to ſee what Sort of Reverence they paid their own Princes: Which *Aſcelin* ſhewed them, by pulling-up his Hood, and bowing the Head. Then one of them ſaid, Since you Chriſtians make no Scruple to adore Stocks and Stones, why do you refuſe to do the ſame Honour to *Bayoth Noy*, whom the *Khân* hath ordered to be adored in the ſame Manner as he is himſelf? *Aſcelin* anſwered, that they did not adore Stocks and Stones, but the Sign of the Croſs carved thereon, for Sake of Jeſus, who died on the Croſs. Some Time after, *Bayoth Noy* let them know, that he intended to ſend them, with their Letters, to the *Khân*: But they declined it, as exceeding their Commiſſion. Then he ſent for the Letters, which were tranſlated firſt in *Perſian*, and thence into the *Tartar* Language.

BAYOTH NOY, and his Officers, detained them at his Court, under one frivolous Pretence or other, during the Months of *June* and *July*. When they demanded Leave to return, he always put them off with ſome ſneering Anſwer: As, that ſince they came to ſee the Army, not the *Khân*, they could not be diſmiſſed till it was compleat: They would promiſe to acquaint the Prince with their Requeſt, but never brought them any Anſwer: So that they have often waited at the Door of the Court from Morning till Night, in the Heat of the Sun, and faſting, ready to die with Hunger. In ſhort, the *Tartars* did nothing but make Game of them, treating them with the utmoſt Contempt, as if they had been the worſt of Scoundrels, or ſo many Dogs. This was the Uſage which the good Friars met-with from *Bayoth Noy*, in Return (as he alledged) for the Rudeneſs of their Anſwers. And to ſay the Truth, thoſe which are inſerted in the Relation, are generally ſo inſolent and provoking, that it is not to be believed they had the Raſhneſs to make them. *Aſcelin*, 1247.

IT was ſix Weeks longer before *Bayoth Noy* came to a Reſolution to diſmiſs them. But after he had written his Letters to the Pope, and appointed Ambaſſadors to go-along with them, he changed his Mind, reſolving to wait for a Lord who was coming from the *Khân*. That Lord came, and ſeveral Weeks more paſſed: When at length Winter approaching, the Friars reſolved to make a laſt Attempt, by Means of one of the Prince's Counſellors; and the better to ſucceed in their Deſign, offered him ſome Preſents. This Application, it ſeems, had an immediate Effect. Whence it may be preſumed, if they had thought of that Method ſooner, they might have been diſmiſſed ſooner. They had been a whole Year in the *Tartar* Dominions. *And Delay.*

As for *Aſcelin*, it was three Years and ſeven Months before he returned to the Pope, by the Way of *Acra* in *Syria*; which was about threeſcore Days Journey from the Place where he found the *Tartar* Army. He carried with him the Letters of *Bayoth Noy* to the Pope, and of the Grand *Khân* to *Bayoth Noy*. The Purport of the former was to let the Pope know [a], that his Envoys ſpoke in a very high Strain. In Anſwer to the Pope's Words, *Ye kill, and ye deſtroy many Men*; *Bayoth Noy* intimated, it was God's Will that the *Tartars* ſhould ſubdue the World, and, therefore, thoſe who would not ſubmit, ſhould be deſtroyed, for oppoſing, as it were, the divine Command. He, therefore, adviſes the Pope to come in Perſon, and ſubmit; otherwiſe God only knew what might be the Conſequence: But firſt directs him to ſend Ambaſſadors ſpeedily, to acquaint him whether he will, or not, in Anſwer to the Command diſpatched to him by the Hands of *Ali beg* and *Sargis*. It was dated the twentieth Day of the Month of *July*, near the Caſtle of *Sitiens* [b]. *At length diſmiſſed.*

THE *Khân*'s Letter to *Bayoth Noy*, which the *Tartars* call the Letters of God, begins thus: "By Command of the living God, *Chinghîz Khân*, the Son of God, ſweet and venerable, ſaith: Foraſmuch as God is high, over all, and immortal, and that *Chinghîz Khân* is the ſole Lord on Earth, our Will is, that theſe Words may be publiſhed in all Countries, and in the Hearing of every-body." The Remainder of the Letter is only to enjoin *Bayoth Noy* to ſee that Ordinance executed,

[a] His Words are, *Pope know this.*

[b] We meet with no ſuch Place in *Perſia*.

Introduction. executed, and to deſtroy ſuch as refuſed to receive, or neglected to obſerve it [a]. But this Letter ſeems to be forged (if not that to the Pope) not only as the Subject, relating to nothing but a chimerical Title, is too frivolous; but becauſe *Chinghiz Khân* had been dead twenty Years before it is ſuppoſed to have been written.

CHAP. II.

The TRAVELS *of Friar* William de Rubruquis, *into the* Eaſtern Parts *of the* World, *in the Year* 1253.

INTRODUCTION.

Tartar *Ambaſſadors to* St. Louis, *very ſuſpicious. Marks of Forgery; how accounted for. Embaſſy to the* Tartars. *Travels of* Rubruquis. *Their Character. The Extract.*

Tartar *Ambaſſadors*

WHILE *Louis* IX. of *France*, commonly called *St. Louis*, was at *Nicoſia* in *Cyprus*, waiting for his Paſſage into *Syria*, there arrived Ambaſſadors, with Letters written in *Perſian*, from a great *Tartar* Prince, called *Erkaltay* [b], then in the Eaſtern Borders of *Perſia*. Friar *Andrew*, of *Lontumel*, or *Louciumel*, a *Jacobin*, who happened to be there, knew the principal of them, called *David* [c], whom he had ſeen in the *Tartar* Army; to which he had been formerly ſent, with other Friars, by Pope *Innocent* IV.

THESE Ambaſſadors, as we are told, informed the King, that the Grand *Khân* [d] had three Years before turned Chriſtian, by Perſuaſion of his Mother, who was one; and that all his Lords and Army, as well as himſelf, were baptized: That *Erkaltay* himſelf had alſo re-

To St. Louis, ceived Baptiſm, and been ſent by the Emperor with great Forces to propagate the Chriſtian Religion, to ſupport thoſe who adored the Croſs, and deſtroy all their Enemies. Laſtly, that he greatly coveted the Amity of the King of *France*. They added, that the ſaid *Erkaltay* would the *Eaſter* following go and beſiege *Baldak* [e], the Reſidence of the *Khalifah* of the *Mohammedans*, who had often aided the *Soldân* of *Egypt*, eſpecially during the Siege of *Damietta*. The King, rejoiced at this News, highly careſſed the Ambaſſadors, feaſted them, and carried them to Maſs with him; where they behaved like ſo many good Catholics.

THE Letter of *Erkaltay* ſpeaks of defending the Adorers of the Croſs, and recommends Union amongſt the *Latin*, *Greek*, *Armenian*, *Neſtorian*, and *Jacobite* Sects: But mentions nothing of his own, or the Grand *Khân*'s Converſion, who is therein called *Kiokay*. This Name approaches neareſt that of *Kiyuk*, or *Kayuk* [f]. But then *Kayuk* died in 1248, five Years before this Letter from *Erkaltay* is ſuppoſed to have been written; and *Mangu*, or *Mengko Khân*, aſcended the Throne of the *Mongol* Empire in 1251: So that this Letter is very ſuſpicious, and the rather as having no Date. It is only ſaid to be given at *Four Merkharran*, a Place no-where to be found in our Geography.

WE are told alſo, the Ambaſſadors informed the King, that the *Tartars* had their Name from that of the Country whence they came; which is contrary to what the *Tartars* relate themſelves [g]: That in their firſt Expedition they vanquiſhed the Son of King *Preſter John*; a Name which both *Tartars* and *Chineſe* are Strangers to [h]: That the Mother of *Kiokay Khân* was a Chriſtian, and Daughter of *Preſter John*. Whereas if there ever was ſuch a Perſon, he had been deſtroyed many Years before by *Jenghiz Khân*. Laſtly, that the Name of the Sovereign Pontiff began to grow famous among the *Tartars*. Can any-body believe this, when but ſix Years before (as we are told by Friar *Aſcelin*) the Pope and Chriſtians were held in ſuch Contempt by the *Tartars*?

[a] *Purchas Pilgr.* vol. 3. p. 59; and the *French* Collect. *p.* 64, *&* *ſeqq.* [b] *Purchas* ſuppoſes he was the ſame called *Sartak*, by *Rubruquis*. [c] Or, *Sabaldin Mouſat David*, and the other *Mark*. The firſt is rather an *Arabic*, or *Perſian* Name, than a *Tartar*, or Chriſtian. *Sabaldin* ſeems to be *Sahab aldîn*, or *addîn*, that is, *the Lord of the Religion*; *Mouſat*, perhaps, *Maſâd*; and *Dawd*, or *David*, is a Name common among the *Mohammedans*. [d] In the Original, *Cham*. [e] *Baghdâd*. [f] Called *Kuyne*, in the former Journals; which *Vincentius* ſays, was alſo named *Kok*. [g] See before, *p.* 408. [h] See before, *p.* 448. Alſo *Rubruquis* hereafter.

If there really was any ſuch Embaſſy ſent to *Louis*, the Caſe muſt have been either, that *Erkaltay*, from the Reſemblance of the *Romiſh* Worſhip, to that of the *Lamas*, or *Bonzas*, (which began in the Time of *Kayuk* to prevail among the *Tartars*) took the Chriſtians to be of the ſame Religion, or elſe that he politically pretended ſo, in order to procure their Aſſiſtance: For the expreſs Deſign of this Embaſſy was to engage *Louis* to attack the *Soldân*, or *Soltân* of *Egypt*, ſo to hold his Forces employed, while *Erkaltay* proſecuted his before-mentioned Expedition againſt the *Khalifah*.

However that be, the Hiſtory tells us, that *Louis* ſent Ambaſſadors both to *Erkaltay* and the Grand *Khân*, with Letters and Preſents; among which, at the Inſtigation of the Ambaſſadors, he ſent the Emperor a Tent, or Chapel of Scarlet, finely embroidered with the Story of the Paſſion, beſides other Ornaments, and Things fit for divine Service. To *Erkaltay* he ſent (as is pretended) a Piece of the true Croſs, exhorting him to continue in the Faith. To compleat the Farce, the Legate *Odo* wrote Letters, to let them know with what Joy the Holy *Roman* Church heard of their Converſion, and in how affectionate a Manner ſhe received them as her well-beloved Children; exhorting them inviolably to preſerve the Orthodox Faith, to acknowledge the *Roman* as the Mother of all Churches, and the Pope as Vicar of Jeſus Chriſt.

The Ambaſſadors ſent on this Occaſion, were Friar *Andrew* before-mentioned, with two others of his Order, two Clerks, and two of the King's Officers. They departed with the *Tartar* Envoys the twenty-eighth of *January*, from *Nicoſia*; and ſome Time after *St. Louis* diſpatched, on the ſame Errand, *William de Rubruquis*, a *Frenchman*, and *Minorite* Friar [a], of whoſe Voyage we are going to give an Abſtract.

The Travels of *Rubruquis* were originally written by himſelf, in *Latin*, by Way of Letter to the King, purſuant to his Majeſty's Orders at parting. *Hakluyt* publiſhed Part of it, with an *Engliſh* Tranſlation [b]. But *Purchas*, from a Manuſcript found in *Bennet's College*, *Cambridge*, has given a Verſion of the Whole; which, according to him, had never been publiſhed before in any Language [c]. *Bergeron* tranſlated it from the *Engliſh*, towards the Middle of the laſt Century, after comparing it with two *Latin* Manuſcript Copies; and the ſame has been inſerted in the *French* Collection. Rubruquis, 1253.

As to the Fidelity of this Author, *Bentink* ſays, that by the Account he has given of the Country, from the *Boryſthenes* or *Nieper*, to the *Jaïk*, one cannot doubt his having been there: But that his Journey from the *Jaïk*, to the Court of *Mangu Khân*, ſeemed very ſuſpicious to him, as containing many Things contrary to the Truth [d]. However, he does him the Juſtice to declare, that of all the Writers of thoſe early Times, he has given the moſt exact Deſcription of the *Tartars*, and the Country they inhabit; for that what he relates concerning their Shape, Manners, Food, and even their Dreſs, agrees ſo well with the *Kalmûks*, that any-body may eaſily perceive he is ſpeaking of their Anceſtors [e]. For this Reaſon we ſhall not repeat all which the Friar has ſaid on thoſe Heads. We ſhall likewiſe only recite, in brief, his Travels, till he enters the *Tartar* Dominions; reſerving moſt of what he has ſaid concerning other Countries to their reſpective Places. *Their Character.* *The Extract.*

SECT. I.

Journey *from* Conſtantinople, *to the* Court *of* Mangu Khân.

Leave Conſtantinople: *Land at* Soldaia: *Paſs through* Gazaria: *Enter* Kapchak. Komans, *or* Kapchaks: *Croſs the* Tanais. *Country and Inhabitants.* Sartak's *Court. Proceed to* Baatu: *That Prince's Court: Their Audience: Proceed forward. The* Jaïk. *Incommodious Travelling: Turn Southward.* Kenkat *Town.* Kara-kitay. Ken Khân. Preſter John. Vut Khân. *Riſe of* Chinghîz Khân.

RUBRUQUIS left *Conſtantinople* the ſeventh of *May* 1253, by Water, and entered the *Euxine*, called by the *Bulgarians*, the *Great Sea*. To the South lies the Province of *Sinopolis*; to the North that of *Gazaria*, as the *Latins* call it, but the *Greeks*, *Kaſſaria* [f]. This Province is triangular; on the Weſt Side is the City *Kerſona*, and before it an Iſland, with a Church built by Angels. About the Middle, on a Point in the South Coaſt, directly oppoſite to *Sinopolis* (or *Sinopi*) ſtands the City *Soldaia*, which is the Port of the Merchants trading between *Turky* and *Ruſſia*. In the Eaſt is the City of *Materta* [g], *Leaves Conſtantinople.*

[a] See *Vinc. Bellov.* Book 32. ch. 90. *Purchas Pilgr.* p. 60; and the *French* Collect. *p.* 151, *& ſeqq.*
[b] Collect. Voy. vol. 1. p. 71, and 93. [c] See his *Pilgrims*, vol. 3. p. 1. [d] Rather they do not agree with the Geography, as reported by ſubſequent Travellers. [e] See Hiſtory of the *Turks*, &c. p. 514, and 791.
[f] That is, ſays the Author, *Cæſarea*: But he muſt miſtake, for *Kaſſaria* is *Khozaria*, or *Khozar*, as the *Arabs* write it. However, hence it appears, that *Gazaria*, and *Khozar*, are the ſame Country, and confined by him to the Peninſula of *Krîm*. [g] *Matriga.*

Great Tartary.

at the Mouth of the *Tanais*, which is twelve Miles wide, and falls into a leſſer Sea [a], which, though ſeven hundred Miles long, is not above ſix Paces deep; ſo that only ſmall Veſſels, or Barks, can ſail in it. Thus *Gazaria* is waſhed by the Sea on all Sides, but the North: And the Country from the *Tanais* Weſt, to the *Danube*, and thence to *Conſtantinople*, is poſſeſſed by the *Tartars*. *Walakhia*, and *Bulgaria*, pay them Tribute.

Lands at Soldaia,

BETWEEN *Kerſona* and *Soldaia*, there are forty Caſtles, each having a different Language. There are likewiſe *Goths* among them, who ſpeak the *German*. He arrived at *Soldaia* the twenty-firſt of the ſame Month: From whence he ſet-out the firſt of *June*, with four covered Waggons, and two others for their Beds, drawn by Oxen: Beſides five Horſes for himſelf and Company, who were Friar *Bartholomew* of *Cremona*; *Gozet*, who carried the Preſents; the Man of God, *Turgemannus* [b]; and *Nicholas*, a Lad whom he bought at *Conſtantinople*: They gave them alſo two Men to drive the Waggons, and take-care of the Cattle. Having paſſed the Mountains to the North of the Town, they entered a Plain, inhabited by the *Tartars*, five Days in Length, which brought them to the End of the Province; which there terminates in a narrow Neck of Land, like a great Ditch, between two Seas [c]. This Plain was inhabited by the *Komans*, before the *Tartars* drove them out: After which flying towards the Sea-Coaſt, they were compelled, for Want of Food, to eat one another almoſt alive; as a Merchant, who ſaw it, aſſured *Rubruquis*. At the End of this Country there are great Lakes, whoſe Waters congealed afford Salt; from whence *Baatu*, and *Sartak*, draw great Revenues.

Paſſes through Gazaria,

THE third Day of their March through the Plain of *Gazaria*, they met the *Tartars* for the firſt Time. They were very inquiſitive, and importunate for Gifts; but took nothing by Force. Next Day they came to the Court of *Skakatay*, *Baatú*'s Brother, to whom they had Letters of Recommendation from the *Greek* Emperor. It conſiſted of Waggons loaded with Houſes and Huts, which appeared like a great City. The Oxen, Horſes, and Sheep, were numberleſs; but he had not above five hundred Men with him. They found him ſitting on his Bed, with a Guitar in his Hand, and his Wife beſide him. His Noſe was ſo ſhort, that *Rubruquis* thought it had been cut-off. He accepted a Preſent from the Friars, of Biſcuit, Fruit, and a Bottle of Wine; which he diſtributed among his Attendants: And having heard the Friars Expoſition on the *Romiſh* Faith, only ſhook his Head, without ſaying any Thing [e].

THEY travelled with *Skakatay* till *Whitſun-Eve*, at which Time there came to them ſome *Alans*, there called *Acias*, or *Akas*, who are of the *Greek* Church, and uſe their Language. The ſame Day he gave them a Guide to *Sartak*, with Proviſion, and but a little *Koſmos* [f]; becauſe it is very ſcarce, and dear with them. Being come at length to the above-mentioned Neck of Land, at the End of *Gazaria*, here they found a Habitation, where the Tax-Gatherers of the Salt-Pits reſided. Theſe told them, they ſhould meet no People for fifteen Days, and gave them eight Oxen, with many Bladders of Milk, for their Support. In ten Days, travelling directly Eaſt, they got to another Lodge. They had a Sea on the South, and a Deſart to the North; which, in ſome Places, was twenty Days Journey in Breadth, without either Mountain, Tree, or ſo much as a Stone to be ſeen [g]. They found no Water, but in Pits dug in two Places, and two Brooks: Yet there is excellent Paſture.

HERE, with their Cattle, dwelt the *Komanians*, called *Kapchak* [h], but by the *Germans*, *Valani*, and their Country *Valania*: The whole Country, from the *Danube* to the *Etîl* (or *Wolga*) was poſſeſſed by theſe *Koman Kapchak*. In their Journey they were much incommoded at every Habitation they came to: For the *Tartars* would importune them to ſee what they had in their Waggons; and were ſo naſty, that to ſave the Trouble of going aſide, they would exonerate before them, often while talking to them. But what grieved the good Friar moſt, was, that when he had a Mind to inſtruct them in the Faith, his fooliſh Interpreter would ſay, *You ſhould not make me preach thus: I tell you, I neither can, nor will repeat ſuch Words.* And, accordingly, when *Rubruquis* ſpoke one Thing, he ſaid another; which obliged the former to deſiſt.

HAVING travelled thus from Lodge to Lodge, and paſſed-over many fine Streams full of Fiſh, a few Days before *Mary Magdalen*'s *Day* they arrived at the *Tanais*, which bounds *Ruſſia* on the Eaſt, and divides *Aſia* from *Europe*: It was as broad as the *Sein* at *Paris*. On the Eaſt Side was a Cottage, where, by Order of *Baatú* and *Sartak*, ſeveral *Ruſſians* attended, to ferry-over Ambaſſadors and Merchants. The Men croſſed

[a] The *Palus Meotis*, or *Sea of Aſof*. [b] *Tarjeman* is an Interpreter. The *French* renders it a good *Turkiſh man*, or Interpreter. [c] Hence it appears, that *Gazaria* is the Peninſula of *Krim*, in *Little Tartary*. [e] It is well he was out of their Reach. [f] Or, *Kumis*, which is the thin Part of Mare's Milk. [g] See *Purchas*'s *Pilgrims*, vol. 3. p. 1, *&c ſeqq.* The *French* renders it directly contrary, *where nothing but Forreſts and Mountains with Stones.* [h] In *Hakluyt*'s *Latin*, and the *French*, *Capchat*: In *Purchas*, *Capthac*.

first, and then fastening the two Boats together, a they brought-over the Carts, putting one Wheel in each Lighter. Here they staid three Days, and had Provision given them from the neighbouring Village, among the rest a large Turbut. The *Tartars* ascend the River no higher than this Place in Summer, returning about *August* to the South. The foolish Guides having sent-back their Horses, they were forced to proceed on-foot, not being able to procure any, till the fourth Day after they met-with People who furnished b them: And thus, on the last Day of *July*, they arrived at the Court of *Sartak*, which was within three Stages of the *Etil* (or *Wolga.*)

THE Country, from thence to the *Tanais*, is very fine, full of Rivers, and vast Forests, towards the North, inhabited by two Sorts of People. First, the *Moxel*, who are *Pagans*, and dwell in Cottages in the Woods. Their Lord, with many of them, were slain in *Germany*. They have Abundance of Falcons, Hogs, and c Honey, Wax, and Variety of rich Furs. The second are the *Merklas*, called by the *Latins*, *Merdui*. They are *Mohammedans*, and are bounded on the East by the *Etil*, which falls into the *Caspian Sea*, or Lake, to the South. In their Journey, they had to the South vast Mountains, whose Sides, towards the Desart, were inhabited by the *Kerghis* [a], and *Alans*, or *Akas*, who are Christians, and at War with the *Tartars*. Beyond them, towards the said Lake, are the *Les-* d *ghi*, *Mohammedans* subject to the *Tartars*, and beyond them the *Iron Gate* [b] (now called *Derbent.*)

SARTAK's Court appeared very great. He had six Wives, and his eldest Son three. The Women had a great House, and each two hundred Waggons. The Friars waiting on the *Janna* (so they call him who receives Ambassadors) that Lord treated them kindly, excused their Want of Presents, and said he would ra- e ther give, than take from them. Next Day, at his Request, they appeared before *Sartak* in their Vestments, singing the *Salva Regina* as they entered his Tent. He viewed their Bible, Psalter, and Crucifix, which he had not seen before: For the *Nestorians* and *Armenians* do not put any Figure on the Cross, either because, says the Author, they do not believe the Death of Christ, or are ashamed of it. Here they found a Knight Templar, and some *Armenian* Priests, who un- f derstood the *Syriak*, *Turkish*, and *Arabic*. They had no Victuals allowed them, during the four Days they staid here.

SARTAK thinking it proper to send them to his Father *Baatû*, they set-forward, leaving all their Carts behind. Travelling due East, the third Day after they came to the *Etil*, which is four Times larger than the *Sein*. In their Way to *Baatû*, they travelled in great Fear of meeting with certain *Russians*, *Hungarians*, and *Alans*, Servants of the *Tartars*, who robbed in Companies. At the *Etil* they found a Hut with *Tartars* and *Russians*, to ferry-over Messengers. Thus far *Baatû* ascends the River in Summer; and as he was on his Return Southward, they passed by Water down to his Court. Hence it is five Days Journey to the Villages of *Great Bulgaria*, whose Inhabitants are the most strict *Mohammedans*; and from thence to *Derbent*, which is thirty Days Journey, there is no Town to be met-with, but only some Cottages near the Mouth of the *Etil*. *Rubruquis*, 1253. *Proceed to Baatû*,

RUBRUQUIS was astonished at the Sight of *Baatû*'s Court, whose Houses, or Tents, appeared like a vast City of a great Length, and the People ranging about for three or four Leagues. The Court being always placed in the Middle, is therefore called *Horda* [c]; and the Houses, when taken-off the Carts, are ranged on all Sides, except the South, facing the Court-Gates. *That Prince's Court*,

NEXT Day they were brought before *Baatû*, where they stood in the Middle of the Tent bare-foot, and bare-headed, in their Habit, gazed-at by the Assembly [d]. That Prince sat on a large Seat like a Bed, gilt all-over, with his Wife beside him. He had a fresh, ruddy Complexion; and looking earnestly at them, at length ordered them to speak. Then their Guide bid them kneel on both Knees; which they did, and *Rubruquis* began to pray for *Baatû*'s Conversion: At which he modestly smiled; but the rest of the Assembly clapped their Hands, and jeered them. Having delivered him the King's Letter, he e asked them some Questions. Then he bid them sit-down, and sent them *Kosmos* to drink. After which they departed [e]. *Their Audience*,

SOON after their Guide came to tell them, that as their King desired Permission for them to stay in the Country, and *Baatû* could not grant it without Consent of *Mangu Khân*, it was necessary for them to repair to the Emperor. Accordingly the two Friars, and their Interpreter, set-forward; *Gosset* the Clerk, and the Lad, re- f turning to *Sartak*. Of the twenty-six *Iperperas* [f] remaining of the Alms-Money bestowed on him, he kept ten for them, giving the other sixteen for Use of the Friars. They descended the *Etil* *Proceed forward*.

[a] Or, *Kerkis*. [b] *Purchas Pilgr.* p. 9, & *seqq.* [c] Or, *Curia Orda*, the Court of the Middle, as in the *French*. [d] He observes, that *Carpini* avoided their Contempt, by having proper Changes of Habit. [e] *Purchas*, as before, p. 12, & *seqq.* [f] Money current in *Greece* and *Syria*, worth about five Sols.

Great Tartary.

along with *Baatû*, for five Weeks, moſtly on-foot, and half ſtarved for Want of Victuals, they were ſo ill ſupplied.

AT length, the ſixteenth of *September* they departed for the Court of *Mangu Khân*, which was a Journey of four Months. They brought them each a Gown, Breeches, and Boots of Sheep-Skin, with the Wool on, Shoes made of Felt, and Hoods of Skins. They rode Eaſtward till the firſt of *November*, through the *The* Kankli. Country of *Kangle* [a], a People deſcended from the *Romans*. They had on the North *Greater* *The* Jaïk. *Bulgaria*, and on the South the *Caſpian Sea*. Twelve Days beyond the *Etil*, they found the *Jagak* [b], a great River, which riſes to the North, in the Land of *Paſkatir* [c], and falls into the ſame Sea. That Country borders Weſtward on *Great Bulgaria*. The Inhabitants live in Tents, and ſpeak the ſame Language as the *Hungarians*, formerly called *Huns* [d], who came from thence. *Iſidore* ſays, theſe People had Tribute paid them as far as *Egypt*, and waſted all the Countries between them and *France*, being joined by the *Blakians* [e], *Bulgarians* [f], and *Vandals*.

Incommodious Travelling.

IN this Journey through the Land of *Kangle*, they travelled every Day as far as from *Paris* to *Orleans*, and ſometimes farther; being provided with Poſt-Horſes, which they changed ſometimes twice or thrice a Day. Often their Gait was intolerable: Sometimes tiring, two were forced to ride one Horſe; at other Times, not finding People for two or three Days together, they travelled ſlower. *Rubruquis* had always a ſtrong Horſe, for he was very corpulent and heavy. They ſuffered much by Cold and Hunger: For they had no Fleſh till the Evening, being put-off in the Morning with a little Drink, or boiled Millet; but the Broth at Night was very refreſhing. Their Guide, who was a Man of Subſtance, ſhewed great Contempt of them at firſt; but being better acquainted, he carried them by the Courts of rich *Mongols*, who deſired their Prayers, and wondered they would not accept either of Money, or rich Garments [g]. They had a Report among them, that the Pope was five hundred Years old [h].

Turn Southward.

THE thirty-firſt of *October* they ceaſed proceeding Eaſtward, and ſtruck directly Southward along Mountains, for eight Days. In the aforeſaid Deſarts he ſaw Aſſes, which they call *Kolan*; but they were more like Mules [i], and ſo ſwift, that their Guide could not catch any. The ſeventh of *November*, there appeared to the South huge Mountains, and they entered a fine cultivated Plain. The eighth they arrived at *Kenkat*, a Town of the *Mohammedans*, whoſe Governor met their Guide at the Entrance with Ale and Cups; a Ceremony paid to the Meſſengers of the *Khân*, and *Baatû*. A great River deſcended from the Mountains, which being cut into Canals, watered the whole Country, and ended in a Lake. *Rubruquis* ſaw many Vines, and drank of the Wine. Next Day they came to a Cottage near the Mountains [k], which run from the *Caſpian Sea* to the Eaſt. Here the Author enquired after ſome *Dutchmen*, who dwelt at *Talas*; but only heard that *Ban*, their Lord, was put to Death by *Baatû*, in whoſe Juriſdiction he lived, for ſpeaking diſreſpectfully of him in his Drink; and that they were removed from that City to *Bolak*, a Village a Month's Journey more Eaſtward, there to dig Gold, and make Armour. They did not come within three Stages of *Talas*.

FROM the Cottage they turned directly Eaſt again, along the Mountains, and came among the *Khân*'s Subjects, who every-where ſung and danced before their Guide. A few Days after they entered among thoſe Mountains, where formerly the *Karakitayans* dwelt, and found a mighty River.

HERE it may be proper to obſerve, that when the *French* took *Antioch* (in 1097) there reigned in thoſe Northern Parts, one *Kon Khân*. *Kon* is a proper Name, and *Khân* a Title, ſignifying a Diviner [l]. To him the *Turks* ſent for Aid againſt the Chriſtians, for they themſelves came from thence. *Kon* was a Native of *Karakitay* [m], a Country ſo called, to diſtinguiſh it from *Katay* in the Eaſt. Theſe *Karakatayans* dwelt on the Hills before-mentioned, and in the Plains within them lived a People called *Nayman* [n], who were *Neſtorians*; whoſe Chief, after *Kon Khân*'s Death, ſeized the Kingdom. Him the *Neſtorians* called King *John*, reporting ten Times more of him than was true, as is uſual with them. In like Manner they gave-out, that *Sartak*, *Mangu Khân*, and *Ken Khân*, were Chriſtians; although nothing could be more falſe. As for *Sartak*, he rather made a Jeſt of Chriſtians; and when I, ſays *Rubruquis*, paſſed-by King *John*'s Country, no Mortal could give any Account of him, except a few *Neſtorians*.

JOHN had a Brother, called *Vut*, who was

[a] The *Kankli*. [b] Or, *Jaïk*. [c] *Baſkir*. [d] The *Hungarians* are a different People from the *Huns*. [e] Or, *Walakians*. *Rubruquis* ſays, the *Tartars* not pronouncing the *B*, ſay *Ilak*. [f] They ſeem to have given Name to the *Wolga*, or the *Wolga* to them. [g] The Friars are very ſelf-denying abroad, but refuſe nothing that is offered them at home; nay, are greedy of Preſents, and beg Gifts. [h] Either they miſtook him for the Great *Lama* of *Tibet*, or the lying *Neſtorians* might have given out ſuch a Report, to ſet the Pope on a Footing with the *Lama*. [i] Theſe, perhaps, are what *Gerbillon* calls wild Mules, that propagate. took them for *Caucaſus*. [l] Rather, a Sovereign Prince. [m] Poſſibly this was ſome Predeceſſor of *Kouri* or *Kur*, *Khân* of *Karakitay*, mentioned before, *p.* 420. [n] *Yaman*, in the *Latin*.

very powerful alſo, and dwelt, with his Flocks, beyond the Hills of *Karakatay*, about three Weeks Journey diſtant. He was Lord of the Village *Karakarum*, and worſhipped Idols; but his Subjects, named *Krit*, or *Merkit*, were *Neſtorians*. Beyond his Paſtures, ten or fifteen Days Journey, were thoſe of *Mongol* [a], a poor beggarly Nation, without Law, or Government: And near them the *Tartars*, by which laſt Name the *Mongols* cannot endure to be called. King *John* dying without Iſſue, his Brother *Vut* got himſelf proclaimed *Khân*, and extended his Territories to the Borders of the *Mongols*; among whom, at that Time, was one *Chinghîz* [b], a Blackſmith. This Perſon having ſtolen Cattle from *Vut*, the latter entered the *Mongol*'s Country, and *Chinghîz* fled to the *Tartars*. *Vut* being returned with the Spoils of both Nations, *Chinghiz* made them ſenſible how liable they were to be oppreſſed for Want of a Chief. Hereupon they elected him their Captain, and marching againſt *Vut*, obliged him to fly to *Katay*. *Vut*'s Daughter being taken Priſoner, was married to a Son of *Chinghîz*, and bore *Mangu Khân*. The Country they firſt inhabited, and where the Court of *Chinghiz Khân* ſtill remains, is called *Mankerule*, (or *Oman Kerule.*)

SECT. II.

The Author's Journey *continued, to the* Court *of* Mangu Khân.

Village Equius. *Vaſt Lake. The* Jugurs: *Temples and Images: Their Prieſts: Dreſs, and Belief, like the* Mongol. Tangût. Tibet. Langa *and* Solanga. *The* Muk. Great Katay. Neſtorians, *Prieſts: Scandalous Livers. End of the Lake. A rugged Country.* Ken Khân *killed.* Shiramun's *Conſpiracy. Arrive at the Court: Are examined. Monkiſh Lies. Extream Cold. The* Khân's *Perſon: Their Audience, and Requeſt. News of Chriſtians.*

HAVING ferried-over the above-mentioned River, they came into a Valley, where they ſaw a ruined Caſtle, whoſe Walls were only of Mud, and plowed Ground about it. They found alſo a Village, named *Equius*, inhabited by *Mohammedans* [c], who ſpoke the *Perſian* Language. Next Day having croſſed the Mountains, which from the great Mountains branched Southward, they got into a beautiful Plain, having on their Right high Mountains, and on their Left a Sea, or Lake, fifteen Days in Compaſs [d]. In Summer they returned by the North Side of this Lake, where there are vaſt Mountains alſo. The Plain, formerly, was full of Villages; but the *Tartars* deſtroyed them, to turn all into Paſture. They found there one great trading City, called *Koylak* (or *Kaylak*) where they ſtaid fifteen Days. Rubruquis, 1253. Koylak *City.*

ALL the Country, before deſcribed, is called *Organum*; becauſe, as they were told, the Inhabitants were ſkilled in playing on the Organ [e]. They had alſo their own Language and Characters, which the *Neſtorians* in thoſe Parts uſe: But the whole Land was poſſeſſed by the *Kontomanni*. Here the Author firſt ſaw Image Worſhippers, who are of different Kinds [f]. Firſt, the *Jugurs*, who inhabit the Mountains bounding *Organum*, on the Eaſt [g]. They are middle-ſized, like the *French*. Being brought in Subjection to *Chinghîz Khân*, that Monarch gave his Daughter in Marriage to their King. They have many Cities: That of *Karakarum* itſelf is in a Manner within their Territory; which lies to the South of the Country of King *Preſbyter John*, and his Brother *Vut*, whoſe Subjects dwell in Tents. The *Neſtorians* dwell in all the *Jugur* Towns; as well as thoſe of the *Mohammedans* towards *Perſia*. *The* Jugurs.

IN *Koylak* were three Idol Temples. In one, *Rubruquis* ſaw behind a Cheſt, which ſerved for an Altar, an Image with Wings, like that of *St. Michaël*; and others, holding their Fingers, as if going to give the Benediction. In the ſecond Temple, he found the Prieſts in their Ornaments. All theſe Idolaters worſhip towards the North, falling flat, with their Hands cloſed above their Foreheads, wherefore the *Neſtorians* ſpread-out their Arms. *Temples and Images.*

THEIR Temples are in Length from Eaſt to Weſt. On the North Side is a Chamber, like a Veſtry. If the Temple be ſquare, in the Midſt, towards the North Side, where the Choir ſhould be, they have a Chamber, where is placed a large Cheſt like a Table, with Candles and Oblations; and behind it, to the South, ſtands their principal Image, with others ſet round it, all-over gilded. *Rubruquis* ſaw one at *Karakarum* as big as that which the Papiſts make of *St. Chriſtopher*: But a *Neſtorian* Prieſt, who had been in *Katay*, told him, there is one ſo big in that Country, as to be ſeen at two Days Journey Diſtance [h]. The Doors of their Temples are always open towards the South, contrary to the Cuſtom of the *Mohammedans*; and they uſe

[a] Every-where *Moal*, by this Author. [b] In the Original, *Cyngis*. [c] The Author always calls them *Saracens*. [d] This ſeems to be the Lake mentioned by *Carpini*. See before, *p.* 545. a. But we know of none ſo large in this Part of *Tartary*. If the *Sayſan*, Part of the River muſt be included. [e] Moſt ridiculous Reaſon! *Purchas Pilgr.* vol. 3. p. 17, & *ſeqq.* [g] *Hayton* calls their Country the Kingdom of *Tarſa*. [h] Perhaps he had heard of a Hill in *Fo-kyen*, which *Martini*, in his *Atlas*, p. 69, ſays, is cut in Form of an Idol, whoſe Eyes, Noſe, and Mouth, may be diſtinguiſhed two Miles off.

Bells,

Great Tartary.

Bells, like the Weſtern Chriſtians; for which Reaſon he thinks the Eaſtern Chriſtians uſe none [a].

Their Prieſts,

THEIR Prieſts, who have their Beards and Heads ſhaved all-over, live unmarried, one or two hundred together, in a Convent. They wear yellow Garments in their Temples, and ſit uncovered on two long Forms, one half oppoſite to the other; reading ſoftly to themſelves in their Books, which ſometimes they lay-down. *Rubruquis* once attempted to provoke them to ſpeak out, but could not. They always carry a String with an hundred or two Nutſhells thereon, like the *Romiſh* Beads; and continually repeat the Words, *Ou mam Haktavi*, that is, *Lord thou knoweſt*, as one of them expounded it; which they hold meritorious. Their Temples have fair Courts, like Church-Yards, round them, well-walled: And on the South Side is a great Gate, where they ſit and converſe. On the Top of the Gate they erect a long Pole, which is ſeen all-over the Town. Theſe Ceremonies are common to all the idolatrous Sect.

Dreſs, and Belief,

THE *Jugur* Prieſts wear certain Paper Ornaments on their Heads, and on their Bodies cloſe yellow Jackets girt about (after the *French* Faſhion;) with a Cloak on their left Shoulder, that falls in Folds over the Breaſt, and behind on the right Side, like the *Romiſh* Deacons, when they carry the Bread-Box in *Lent*. They write from Top of the Page to the Bottom, multiplying the Lines from the Left-hand to the Right. Their Temple-Walls are hung with Paper-Scrolls. *Mangu Khân*'s Letters to *Louis* were written in the *Mongol* Language, but Characters of the *Jugurs*; whoſe Language is the Root from whence ſprung the *Turkiſh*, and *Komanian*. They burn their Dead, and depoſit the Aſhes in the Top of a Pyramid [b]. They believe in only one God; as the Prieſts told *Rubruquis*, in Anſwer to his Queſtions: That he is a Spirit, not corporeal, and never aſſumed the human Nature: That the Images they uſed were not made to repreſent the Deity, but conſiderable People, of both Sexes, whoſe Relations cauſed their Statues to be ſet-up in their Temples; which in Remembrance only of the Party deceaſed, they reverenced.

Like the Mongol.

THE *Mongols* are of their Sect, ſo far as to the Belief in one God, and Uſe of Images, which they make of Felt, and place in Carts; which none dare touch, but the Prieſts, to whoſe Care they are intruſted. Theſe Prieſts, or Diviners, in all their Journeys go before them, like the cloudy Pillar before the *Iſraelites*, and appoint the Ground where the Tents muſt be pitched, firſt taking-down their own Houſes from the Carts; after which thoſe belonging to the Court do the like. On Feſtival-Days, the Images being placed round the Houſe appointed for them, the *Mongols* enter, and bowing worſhip them: But no Stranger muſt go in, as *Rubruquis* found by Experience.

EASTWARD of the *Jugurs*, is the Nation of *Tangût*, who are exceeding valiant, and took *Chinghiz* in Battle: But being releaſed by Treaty, he afterwards ſubdued them. The Oxen of this Country have Tails like Horſes, with long ſhaggy Hair on their Backs and Bellies, Legs bigger than other Cattle, and are exceeding fierce. They run at any Perſon in Red, like the Buffalo. Their Horns are ſmall, long, ſtrait, and ſharp-pointed. Their Owners cut-off the Ends. They draw the great Houſes of the *Mongols*. The Author ſaw, in this Country, luſty, tall Men, but ſwarthy.

NEXT to *Tangût*, is *Tibet*, whoſe Inhabitants uſed formerly to eat the Corpſe of their Parents, judging it a Mark of Affection: But growing odious, on that Account gave-over the Cuſtom. Yet ſtill they made Cups of their Skulls, to put them in Mind of them; as *Rubruquis* was told, by an Eye-Witneſs. Gold is ſo plenty, that it is had by only digging in the Ground. Theſe People are very deformed, as the Author obſerved [c].

ADJOINING to *Tibet* is *Langa* and *Solanga* [d], whoſe Envoy *Rubruquis* ſaw at the *Mongol* Court. They had more than ten Carts with them, each drawn by ſix Oxen. They were little brown Men, like *Spaniards*. They wore Jackets like the upper Veſtment of a Deacon, only the Sleeves were cloſer. They had Mitres on their Heads, but the Fore-part was a little lower than the hinder; neither did they terminate in a Point, but were ſquare at-Top, and made of Straw, hardened by the great Heat, and ſo gloſſy, that they glittered like Glaſs, or burniſhed Helmets. From them, on the Sides, hung-down two long Bands of the ſame Material, which played in the Wind; but when the Motion was troubleſome, they brought them croſs over their Mitres from one Temple to the other. The Chief of them had a ſmooth Ivory Tablet, about a Foot long, and half broad, which he looked whenever he ſpoke to the Emperor, or any other Perſon; as if he found there what he had to ſay, without ever taking-off

[a] The Reaſon is, the *Mohammedans*, to whom they were ſubject, would not ſuffer it. [b] The Pyramids mentioned *p.* 397, ſeem to be of the ſame Kind. [c] *Purchas Pilgr.* p. 22, *& ſeq.* [d] Mentioned by *Carpini*. [e] This is according to the *French*, which ſeems better than the *Engliſh* Tranſlation in this, and other Places.

Eyes. He did the ſame, both approaching, and retiring from, the Preſence of the Prince.

BEYOND theſe People are others, called *Muk*; who, as *Rubruquis* was informed, lived in Villages, and had Cattle in common, which would come with a Hoop and Hallow, to ſuch as wanted any. They ſhut-up all Ambaſſadors, and other Strangers who came among them, in a Houſe, till their Affairs were finiſhed: For if they were ſuffered to go-about the Country, the very Smell of them would make the Cattle run wild.

BEYOND *Muk*, is *Great Katay*; where *Rubruquis* was credibly informed, there was a City, having Walls of Silver, and Bulwarks of Gold. The Country contained many Provinces, of which the greater Number remained then unconquered by the *Tartars* [a]. The *Katayans* are of little Stature, ſpeak through the Noſe, and have ſmall Eyes, like all the People of the Eaſt. They are excellent Mechanics, breeding their Children to their own Trades. Their Phyſicians are well-ſkilled in the Virtues of Simples, and judge exactly of Diſeaſes by the Pulſe; but never examine the Urine, as *Rubruquis* obſerved at *Karakarum*.

THE *Neſtorians*, as well as *Mohammedans*, are mixed with all theſe idolatrous Nations, as far as *Katay*; where the former inhabit fifteen Cities: The fartheſt of which, called *Seghin* [b], is a Biſhop's See; but he comes among them ſcarce once in fifty Years. Their Service-Books are in the *Syriac*, which they know nothing of, and ſing like our Monks, ſays *Rubruquis*, who are ignorant of the *Latin*. Hence it comes, that they are quite corrupted, being great Uſurers and Drunkards [c]. Some have many Wives. When they go to Church, they waſh their Lower-Parts, like the *Mohammedans*: Like them alſo on *Friday* they eat Fleſh, and celebrate their Feaſts. They cauſe all their Sons to be conſecrated, even in the Cradle; ſo that they are almoſt all Prieſts. They are alſo *Simoniſts*, for they adminiſter no Sacrament without Money [d]; and ſo anxious for their Wives and Children, that they neglect propagating the Faith to their own Gain. Hence, although they teach the Sons of ſuch *Mongol* Nobility, as they educate, the Articles of Faith; yet their bad Morals, and inſatiable Avarice, give their Pupils an Averſion to Chriſtianity: For the *Mongols* and *Tuinians*, which laſt are Idolaters, lead much more harmleſs Lives.

DEPARTING from *Koylak*, *November* the thirtieth, within three Leagues of it they found a Caſtle, or Village, of *Neſtorians*, with a Church, which they had not ſeen for a long Time before. Three Days after they came to the Entrance of that Province, and End of the aforeſaid Lake, which ſeemed as boiſterous as the Sea, and had a great Iſland in it. The Water was brackiſh, but might be drank. Oppoſite to it, between high Mountains, that lay to the South-Eaſt, was a large Valley; and in the Midſt of the Hills another great Lake, which commuicated with the former, by a River that ran through the Valley [e]. Rubruquis, 1253. *End of the Lake.*

THE Wind here was ſo very ſtrong, that to avoid being blown into the Lake, they turned Northward into the hilly Country, covered with Snow. They entered it on the ſixth of *December*, and found the Road exceeding difficult; nor met with any People, but the *Jani*, or thoſe placed at the End of every Day's Journey to conduct Meſſengers; yet made ſuch Haſte, that they performed two of thoſe Stages in one, travelling more by Night than Day, the Weather extreamly cold. Next Day, as they paſſed between frightful Rocks, their Guide ſent to *Rubruquis*, to ſpeak ſome Words that might charm the Devils away; who in that Place, it ſeems, often carry-off Men, or their Horſes, and ſometimes draw-out a Man's Bowels, leaving the Carcaſs ſitting on the Horſe: But by ſinging *Credo in Deum*, through the Grace of God, all our Company (ſays the Friar, who was ſuch a Noodle to believe [f] that idle Report) paſſed-through unhurt. Hereupon they got him to write them Scrolls, to carry on their Heads by Way of Spells. *Arugged Country.*

AFTER this they entered the Plain where *Ken Khân* kept his Court, and the *Naymans*, who were *Preſbyter John*'s Subjects [g], formerly dwelt. *Baatú* was for raiſing *Mangu* to the Throne, on *Ken Khân*'s Death. The Circumſtances of which *Rubruquis* could never learn with Certainty. Friar *Andrew* told him, it was occaſioned by a Medicine ſuſpected to be procured by *Baatú*. According to others, *Baatú* being ſent for to Court, ſet-out; but being afraid, ſent his Brother *Stitchin* [h] before; who while he waited at Table, in preſenting *Ken Khân* the Cup, Words aroſe between them, and they ſlew each other: Whereupon *Mangu* was choſen; at which Ceremony *Andrew* was preſent. Ken Khân *killed.*

KEN KHAN had a Brother, called *Siremon*, Shiramun's *Conſpiracy.*

[a] Here *Hakluyt*'s printed Copy ends: But he ſupplied it out of a Manuſcript in *Bennet*'s *College, Cambridge*, he told *Purchas*, who has given the Tranſlation, and by that Means firſt publiſhed the intire Work, which eſteems a *Jewel of Antiquity*. [b] In the *Latin, Segin*. [c] Theſe Habits, joined to that of Lying, are Qualifications for Men ſent to convert Infidels. [d] Then the *Romiſh* Prieſts are *Simoniſts*. [e] So the Lake. [f] Or Knave to countenance. [g] *Ung Khân*, King of the *Karaits*, is by others made the *Preſbyter* See before, *p.* 448. So much at a Loſs they are about this imaginary Prince. [h] *Stitchin*'s Widow the Friars a whole Day to bleſs, that is, pray for her.

who

Great Tartary.

who by Advice of his Widow, and her Vaſſals, a ſet-forward to kill *Mangu*, under Pretence of doing him Homage: But one of his Waggons happening to break-down, within a Day or two Journey of the Court, the Waggoner revealed the Secret of his Maſter's Expedition, to a Servant of the *Khân*, who came to help him to mend it. *Mangu* coming by this Means acquainted with the Plot, ſent ſome Forces againſt him; who, with his Followers, being taken, and brought before the *Khân*, was ſlain, with his eldeſt [a] Son *Ken Khân*, and three hundred *Tartar* Lords, beſides the Ladies, who were firſt whipt to make them confeſs. However, his youngeſt Son *Khen* was ſpared, and the Palace left him, with all his Father's Effects. They paſſed by it both going and coming; but their Guides durſt not turn in [b].

Arrive at the Court.

THENCE they proceeded again through a hilly Country, always Northward, till *St. Stephen*'s Day, when they entered a great Plain like the Sea, where there was not a Mole-Hill to be ſeen. Next Day, *December* the twenty-ſeventh, they arrived at the Grand *Khân*'s Court. Four or five Stages before they got thither, the Perſon, with whom they lodged, would have had them taken a Road fifteen Days Journey about, either that they might paſs-by *Onam Kerule* [c], the Country where the Court of *Chinghîz Khân* was kept, as *Rubruquis* conjectured; or to give them a greater Notion of the Extent of the *Khân*'s Dominions, as others would have it, according to their Practice with Strangers.

Are examined.

THEIR Guide had a great Houſe appointed him, and the Friars a little Hut, ſcarce big enough to ſtow themſelves, and their Baggage. Here they drank Rice-Wine, which differed from that of *Auxerre* only in Colour [d]. They were immediately examined about the Cauſe of their coming. They anſwered, that *Baatû* ſhould have ſent them Word: For that they were ſent by their King only to his Son *Sartak*, becauſe he heard that Prince was a Chriſtian; otherwiſe he ſhould not have deſired to make a Peace with him [e]. Next Day alighting, as all do, about a Bow-Shot from the Palace, they went thither bare-footed; where the Secretary, who was a *Neſtorian*, aſked them many Queſtions.

Monkiſh Lies.

ON their Return, a Bow-Shot Eaſt from the Court, they found a Houſe with a little Croſs on it; which proved to be an *Armenian* Chapel, where they found a Monk clad with Hair-Cloth. His Name *Sergius*. The Altar was furniſhed with Images, adorned with Gold and Pearl. The Monk told them the Deity had appeared to him three Times, commanding him to go to the Prince of the *Tartars*: But that delaying the third Time, God threw him on the Ground, and threatened to kill him, if he went not. On this obeying the Command, he told the *Khân*, that in caſe he turned Chriſtian, the whole World ſhould obey him, not excepting the *French* [f] and Pope. He adviſed *Rubruquis* to declare the ſame to that Monarch: But the Friar could not conſent, that both his temporal and ſpiritual Sovereign ſhould become *Mangu*'s Servants.

AFTER this the Friars Toes freezing, they put-on Shoes. In thoſe Parts the Cold is extream. From the Time it begins to freeze, the Froſt never ceaſes till *May*: Nay, in that Month it froze every Morning; and was there any Wind during that Time, as in *France*, nothing could live there: But the Weather is always mild till *April*, and then the Winds riſe. When they were there, about *Eaſter*, the Cold roſe at the ſame Time, which killed infinite Creatures. In Winter little Snow fell; but about the End of *Eaſter* it fell ſo thick, that the Streets of *Karakarum* were full.

THE fifth of *January* they were brought to the Court, and ſet before the Gate (the Felt being lift-up) where, in regard it was *Chriſtmas*-Time, the Friars ſang a Carol. Then being ſearched for Knives, and warned not to touch the Threſhold, they were admitted, and ſeated on a Bench before the Ladies. The Houſe was hung with Cloth of Gold. In the Midſt was a Fire made of Thorns, Wormwood-Roots of a great Size, and Ox-Dung. The *Khân* ſat on a Bed, and was clad with a Robe of ſpotted Fur which ſhined like a Seal-Skin. He was of a middle Stature, flat-noſed, and about forty-five Years old. His Wife, who was a little pretty Woman, ſat by him; and in another Bed next it ſat one of his Daughters, named *Sirina* (grown-up, but very hard-favoured) and ſeveral little Children; for that being her Mother Court (a Chriſtian Lady, whom the *Khân* very fond of) ſhe was Miſtreſs of it.

THE *Khân* cauſing them to be aſked what liquor they would drink [h], they left the Choice

[a] This is pretty agreeable to what *Abu'lghâzi Khân* relates in his Hiſtory, *p.* 160; only *Shiramun*, according to him, was pardoned. [b] *Purchas Pilgr.* p. 23, *& ſeq.* [c] Perhaps it ſhould be, *paſs along the Onan & Kerulen*, two famous Rivers in thoſe Parts, mentioned before, *p.* 357, and 373. [d] So the *French. Purchas* in Scent. [e] The Friar, to ſhew he was of the Church which propagates Religion by the Sword, ſays, might be ſuffered, he would preach War againſt them continually, and have it carried-on againſt them to laſt Extremity. [f] Rather the *Franks*, by which is to be underſtood *Europeans* in general. [g] Elſewhere *Khirina*. [h] Naming to them four Sorts: Firſt, Wine; *Seraſina*, a Drink made of Rice; *Kara Koſmus*, is, Cows-Milk; and *Bal*, or Drink made of Honey, perhaps Mead; which four Kinds of Drink they Winter.

him

himſelf; who ordered them *Seraſina*, which was a clear and well-taſted as White-Wine: Then calling for Falcons, and other Birds, he took them on his Hand, and looked at them a long Time. At length having commanded them to ſpeak, they were made to bow their Knees. Then *Rubruquis* told him, that they were ſent to *Sartak*, ſuppoſing him to be a Chriſtian, made Apology for their Want of Preſents, and deſired Leave to remain in the Country as Miſſioners, at leaſt till the Cold was over. *Mangu* began to b anſwer in this Manner: *Even as the Sun diffuſes his Beams every-where, ſo our Power, and* Baatû's *Power, being ſpread through all Countries, we have no Need of your Silver and Gold.* But they could not underſtand a perfect Sentence more: For their Interpreter, who ſtood near the *Kaſmos* Table, at the Door, was ſo plied by the Butlers, that he grew intoxicated; and, as they thought, the *Khân* himſelf was drunk.

HAVING made their Apology, he cauſed them c to riſe, and ſit-down again: Then after anſwering a few Queſtions, they made their Reverence, and departed. Soon after the *Khân*'s Interpreter, who was a *Neſtorian*, came and told them, that his Majeſty having Compaſſion on them, allowed them two Months Time to ſtay, and Liberty, if they pleaſed, to go to *Karakarum*, ten Days Journey diſtant; adding, that he would furniſh them with Neceſſaries: But they choſe to ſtay where they were, for Sake of the *Armenian* d Monk above-mentioned; and their Guide returned to *Baatû* [a].

HERE they found a Chriſtian of *Damaſcus*, ſent by the *Soldân* of *Mons Regalis* and *Krak*, offering to pay the *Tartars* Tribute. Soon after they met-with one *Paſcha* [b], a Woman of *Metz* in *Loraine*, who belonged to the Chriſtian Lady, (or Queen) before-mentioned: She had been taken Captive in *Hungary*, and was very miſerable at firſt; but was then well to paſs, being e married to a young *Ruſſian*, who was a Builder, (a Buſineſs in great Requeſt with the *Tartars*) and had three Children by her. She informed them alſo, that at *Karakarum* there was a Goldſmith, named *William Boucher*, born at *Paris*, whoſe adopted Son was a very good Interpreter; but as the Father was doing a Piece of Work [c] for the *Khân*, which employed fifty Hands more, ſhe feared he could not ſpare the Youth at that Time; and ſo on the Friar's writing to him it f proved: But he promiſed to ſend him next Moon.

[a] *Purchas Pilgr.* p. 25, *& ſeqq.* [b] Or, *Paquete.* [c] For this the *Khân* delivered to him three hundred *Jaſkots* of Silver, equal to three thouſand Marks. [d] For, ſays *Rubruquis*, he had heard of what had happened at *Mallora*; or *Malorre*, as in the *French*.

SECT. III.

Rubruquis, 1254.

What paſſed at the Court, *till its Remove to* Karakarum.

Theodolus, *a Prieſt, impoſes on the* Khân: *Puniſhed as a Cheat. The* Khân's *Baptiſm. A Monkiſh Fiction: Viſits the Chapel. The Queen's Gifts. Griping drunken Prieſts. Blade-bone Divination. Viſit to the Queens.* Armenian *Croſs, and Impoſition. Lady* Kota *falls ſick.* Neſtorian *Sorcery. Lady* Kotota's *Alms. The Monk's Arrogance: Ignorance in Scripture. The* Khân's *Bounty: His Progreſs. The neighbouring Countries. Race of Pigmies. The* Tauſe, *and* Manſe. *Paper-Money, and Characters.*

Theodolus, *a Prieſt.*

ABOUT a Year before *Rubruquis* arrived at the *Tartar* Court, one *Theodolus*, who called himſelf *Raymond*, a Clerc of *Acon* in *Syria*, paſſed from *Cyprus* with Friar *Andrew* into *Perſia*. This Man having procured certain Inſtruments there in Writing, after *Andrew*'s Return, went forward to *Mangu Khân*; pretending that he had ſet-out with Letters written in Golden Characters, ſent from Heaven to *Odo*, a Holy Biſhop, ſubject to a King of the *Franks*, called *Moles* [d], with Orders from God to diſpatch them to the Emperor of the *Tartars*, becauſe he was to be Lord of the whole Earth: But that his Horſe which carried them, and other Things, had on the Road broken looſe, and run-away with them.

Impoſes on the Khân.

HAVING promiſed to conduct Ambaſſadors to that King and Biſhop, the *Khân* cauſed a Bow to be made ſo ſtrong, that two Men could ſcarce bend it; and two Arrows with Silver Heads full of Holes, which made them whiſtle in their Flight through the Air. Theſe he delivered to a *Mongol*, ordering him to preſent them to the King of the *Franks*, and tell him; that in caſe he entered into a League with him, he (the *Khân*) would ſubdue all the *Mohammedan* Countries as far as the King's Frontiers, and give him all the other Regions to the Weſt of them: But that in caſe he refuſed, then the Envoy, inſtead of delivering the Bow, was to tell the King, that his Maſter could ſhoot far with it, and do a great deal of Miſchief. At the ſame Time the *Khân* gave him his Gold Tablet, being a Plate of Gold as broad as one's Hand, and half a Cubit long, on which his Orders were engraven.

Great Tartary. Whoever carried that might command what he would, and was instantly obeyed.

Punished as a Cheat. THEN *Mangu* causing *Theodolus* to withdraw, commanded the Ambassador to observe the Roads through the several Countries, the Strength of their Cities, and Arms of the Inhabitants. *Boucher*'s Son, who was Interpreter, being present, afterwards reproached *Theodolus* for undertaking to carry the *Tartar* Envoys along with him, for that they went only to be Spies. The Clerc answered, that he would carry the *Mongol* b to Sea, so that he should not be able to know which Way he either went, or returned. In short, *Theodolus* setting-forward with the Ambassador, came at length to *Vastas* [a]; intending to pass-over to the Pope, in order to deceive him, in the same Manner as he had deceived *Mangu Khân*: But *Vastas* finding he had no Letters to that Pontiff, seized all his Effects, and imprisoned him: However, the *Mongol* Ambassador dying there, he sent-back the Golden Tablet by c his *Tartar* Servants; whom *Rubruquis*, in his Return, met at *Arzerûm*, in the Entrance of *Turky*.

The Khân's Baptism. THE Beginning of *January*, *Sergius* the Monk having told the Author, that he was to baptize the *Khân* on the Day of *Epiphany*; the Friar intreated he might be a Witness of the Fact; and the *Armenian* promised he should: Yet when the Day came, never went near him: But at Six of the Clock, *Rubruquis* being sent for to d Court, met him returning with his Cross, and the Priest with the Censer and the Gospel: For it was *Mangu*'s Custom, when he made a Feast, to have the *Nestorian*, *Mohammedan*, and *Pagan* Priests, to pray for him, and bless his Cup. The Monk told the Friar, that although the *Khân* made-use of other Priests, yet he believed only in the Christian. But in that, says *Rubruquis*, he lied; for the *Khân* believed in none of them: Yet they all followed his Court as Flies do Ho- e ney, and prophesied Prosperity to him.

A Monkish Relation. RETURNING from Court, he called-on the Monk, who blushed for the Falshood he had told him about baptizing the *Khân*; yet some of the *Nestorians* affirmed, that he was baptized. But the Friar answered, he would not believe it, since he did not see it himself. The *Tartars* provided the Friars and Lad with Bedding, Fuel, and Victuals; allowing the three a little lean Ram for six Days, and every Day a small Dish full of f Millet. They lent them also a Pot and Trivet, to boil their Meat. The *Khân* also sent them Cloaths made of Skins; and, their House being too little, lodged them with the *Armenian* Monk [b].

THE fourteenth of *January*, *Kotota Katen* [c], the *Khân*'s first Wife, came to the Chapel with her Son *Baltu*, and younger Children, attended by many other Ladies. They first fell prostrate, ducking after the *Nestorian* Manner; next they touched all the Images with their Right-hand, which they kissed afterwards, and then gave to all who stood about them. Then the Priests sang, and gave the Lady Incense; which she having put on the Fire, they perfumed her. This done, she took-off the Ornaments of her Head [d], which was shaved. Then commanding the Friars to withdraw, they saw a Silver Bason brought, but knew not whether she was baptized [e]. While they were going to their Lodging, the *Khân* himself came to the Church, or Chapel; and a Golden Bed was brought, on which he sat with his Queen, over-against the c Altar.

THEN the Friars being sent for, they first bowed to the Altar, and next to *Mangu*. After they had sung a Hymn, the *Khân* perused their Bible and Breviary, and enquired what the Images meant [f]. Presently he retired; but his Lady staid, and bestowed Gifts on all the Christians present. She gave the Monk a *Jasket* [g], and the Archdeacon another. The Friars were offered a *Nassik*, or Piece of Cloth, as large as a Sheet, and a *Bukkran*: But refusing them, they were given to their Interpreter; who sold the *Nassik* at *Cyprus* for eighty *Soltanies* of that Country, although much the worse for the Carriage. Then Liquor being brought, as *Kosmos*, Drink made of Rice, and Red-Wine, like that of *Rochel*; the Lady taking the Cup, desired Blessing on her Knees, and while the Priests sang, drank it off. As the Friars would not drink, they made them sing; and when all the rest were near drunk, a whole Ram, and several large Carps, were brought-in, which were devoured in a Trice, without Salt, or Bread. By Evening the Lady herself being drunk; went away in her Chariot. Next Day the *Khân*'s Son, by the Christian Lady, came and did the like, making the Priests drunk; but he gave them only parched Millet to eat, and no Gifts.

THE *Nestorian Lent*-Fast coming-on, *Rubruquis* saw the Chancellor *Bulgay*, who was the great Secretary of State, ordering Victuals for them. They sent to the *Khân* to fast that Week, which he did, as the Author was told. On *Septuagesima*, they all went in Procession to *Mangu*'s

[a] Orig. *Vastacius*, that is, *John Ducas*, who resided at *Trapezund* in *Asia Minor*. [b] *Purchas Pilgr.* p. 28, & *seqq.* [c] *Katen* (says *Rubruquis*) signifies *Lady*. It should be written *Katun*, or *Khatun*. [d] They are called, he says, *Bakka*. [e] It is a Wonder the *Nestorians* did not say she was. [f] Great Emperors can sometimes amuse themselves with Trifles. [g] Or, *Yasket*, equal to ten Marks.

Dwelling-

Dwelling-House. As they entered, they saw a Servant carrying-out the Shoulder-Bones of Rams [a], burnt black. These he consults on all Occasions, be they ever so trivial; as whether he shall admit such a Person into his Presence. The Method is this: He calls for three Bones, then holding them, thinks whether he shall do what he proposed, or not. Then delivers them to be burnt, which is done in two little Rooms near the House. When they are black, they carry them to the *Khân*, who looks at them; and if they be cleft lengthways, he may do it [b]; if across, or round Pieces have flown out of them, he must not.

THE Priests having censed the *Khân*, blessed his Cup, sang, and drank, they departed: But in going-out, the Companion of *Rubruquis* turning hastily, after making his Reverence, stumbled at the Threshold. Hereupon he was seized, and sent to the great Secretary, who is the Criminal Judge.

MEAN-TIME the rest went to *Baltu*'s House, which stood to the Right of his Father's. As soon as he saw them coming, he leaped from his Bed, and knocking his Forehead against the Ground, worshipped the Cross: Then rising, had it elevated on a new Cloth near him. He had for a Preceptor, one *David*, a *Nestorian* Priest, who was a very Drunkard. Having drank, and given him the Benediction, they went to Lady *Kota*'s, the *Pagan* Queen; who, though sick and a-Bed, the Monk made her rise, and adore the Cross, by Prostrations. This he obliged her to do three Times, in different Places of the Room, though she was scarce able to stand, and taught her to cross her Forehead. Next they went to the third and fourth Ladies, who worshipped, and set the Cross on Pieces of Silk; which turned-out well to the Monk, for such Goods were his Perquisite. The Monk carried it with him every-where; and the other Priests observing how much Gain it brought him, began to envy his Success [c].

THIS Cross was brought by an *Armenian*, who came with the Monk from *Jerusalem*. It was of Silver, weighing about four Marks, with a precious Stone in each Corner, and one in the Middle, but no Figure of Christ on it; the *Nestorians* being ashamed that their God should appear nailed to a Gibbet. This Cross having been presented by him to the *Khân*, the latter asked him, what Request he had to make. The *Armenian* answered, that being the Son of a Priest, whose Church the *Mohammedans* had destroyed, he craved his Assistance in rebuilding it. The *Khân* demanded how much would do. He said two hundred *Jaskots*, or two thousand Marks. Hereupon *Mangu* ordered him Letters for the Receiver of his Tribute in *Persia*, and *Armenia*, to pay him that Sum. The Priests being drunk, made a terrible Noise and Bawling, in their Way back. After this the Friar was sent home; and next Day *Bulgay* came to enquire if he had been warned not to touch the Threshold. On its being alledged, that their Interpreter was not present when the Fault was committed, the Secretary pardoned him; but would never after suffer him to enter any of the *Khân*'s Houses.

Rubruquis, 1254. *And Imposition.*

AFTERWARDS the Lady *Kota* falling dangerously ill, and Divination by Lots being of no Avail, *Mangu Khân* sent to the Monk to see what he could do for her. *Sergius* hereupon undertook to cure her. Cutting Rhubarb very small, he put it into Water, together with a little Crucifix. By this, he said, he knew whether the Patient would live, or die: For if she was to recover, it would stick to her Breast like Glue; if not, it would not stick at all. This was his Remedy for all Sorts of Ailments: But the judicious *Rubruquis* concluded so bitter a Potion must needs gripe their Bowels. This Friar, who was better skilled in Priestcraft, than Physic, persuaded him to use some *Romish* Holy Water, which he said had the Virtue to expel Devils; for he understood [d] the Lady was possessed. *Sergius*, who was no Priest, but an ignorant Weaver, as *Rubruquis* found at his Return, readily consented: And having gotten some, mixed his Rhubarb with it, and then laid his Crucifix to steep in it all Night.

Lady Kota *falls sick.*

NEXT Morning away goes the Friar, the Monk, and two Priests; who having administered the Liquor, and read the Gospel over her, she found herself better. This procured them four *Jaskots* [e]; but as *Rubruquis* refused to receive his, the Monk greedily reached-out his Hand, and took it for himself. The Lady jested on the Author, because he was mute, and began to teach him the Language. As they were going the Day after to their Patient, the *Khân* sent for them. They found him, with a few Servants, supping liquid *Tam*, which is a Sort of Paste good for the Head, and the Shoulder-Blades lay before him. He then gave the Monk Leave to carry the Cross aloft on a Lance, or how he thought fit. Proceeding thence to the Lady's, they found her very hearty, and repeated their Remedies: But, says *Rubruquis*, those mi-

Nestorian *Sorcery.*

[a] The Author says, they every Day searched the *Leskar*, or Tent-dwelling, for them. *Leskar* is the Word still used by the *Turks* for a Camp. [b] It is enough if one of them be so cleft. [c] *Purchas Pilgr.* p. 30, & *seqq.* [d] Or pretended so, to serve his Views. [e] Or forty Marks.

Great Tartary.

ſerable Prieſts never taught her the Faith, or adviſed her to be baptized: Neither did they ever find Fault with any Kind of Sorcery; on the contrary, they practiſed it themſelves. About the Lady were four Swords, half-drawn; one at the Head of the Bed, another at the Feet, and one on each Side. There alſo hung againſt the Wall a Silver Chalice, full of Aſhes, and a black Stone at-Top. The Author ſuppoſes it Part of the Plunder of *Hungary*. In three Days the Lady was perfectly recovered [a].

Lady Kotota's *Alms.*

THE *Quinquageſima*, which is the *Lent* of all the People of the Eaſt, being come, the great Queen *Kotota*, who faſted that Week, with all her Women, went every Day to the Oratory, and gave Victuals to the Prieſts, and other Chriſtians, who crowded thither. She beſtowed on each of the Friars, a Coat and Breeches of grey *Samit*, lined with a coarſe Fur [b]. *Bartholomew* was very glad thereof, his Skin being too heavy; but *Rubruquis* gave his to the Interpreter. The Porters of the Court obſerving ſuch Multitudes flocking daily to the Church, ſent to acquaint the Monk, that they would not ſuffer ſuch Crowds to meet within the Precincts of the Court. The Monk taking this as an Affront, threatened to complain of them to the *Khân*: But they were before-hand with him. So that ſoon after the Prieſts being ſent-for to Court, they made him pull his Shoes off, to ſee if he had a Knife there: And the *Khân* not only reprimanded him ſharply, but ſeeing *Rubruquis* ſtanding behind with his Head bare, ſaid, Why doſt thou not pull-off thy Cap when thou comeſt before me, as that *Frank* doth? Hereupon he took-off his Cap, contrary to the Cuſtom of the *Greeks* and *Armenians*. Theſe Things ſo mortified him, that he could not carry the Croſs back again for Shame. However, a few Days after the *Khân* was reconciled to him, he promiſing to go to the Pope, and bring all the Nations of the Weſt to his Obedience. Such was his Preſumption!

The Monk's Arrogance.

Ignorance in Scripture.

ABOUT the ſame Time a Diſpute aroſe between *Jonas*, a Prieſt of Learning, and this Monk; who affirmed, that the Scripture ſays, Man was created before Paradiſe. *Did not the Devil*, ſaid he, *bring Earth on the firſt Day from the four Parts of the World, and making Clay thereof, form the Body of Man, into which God breathed a Soul? Rubruquis*, who was a mortal Foe to Hereſy, bad him be ſilent, for that he knew nothing of Scripture. *Sergius* offended to be dealt ſo plainly with, mocked him for his Ignorance in the *Mongol* Language.

THE Lady *Kotota* ceaſing, after the firſt Week of the Faſt, to come to the Oratory, and diſtribute Victuals, the Friars had nothing to eat but Bread, baked under the Aſhes, and Broth made of Paſte; becauſe their Water was only diſſolved Ice, or Snow, which was very bad. Their Caſe being made known to the *Khân*, by *David*, his Son's Preceptor, he ordered Wine, Flour, and Oil to be given them. But they were little the better for this Bounty; for the Prieſts, though drinking all Day at Court, would impudently thruſt-in to get Share of the Wine at Night. The Monk too, when he had Viſitants, would ſend for ſome to treat them. He pretended he would eat only on *Sunday*: But he had a Cheſt of Almonds, Raiſins, dried Plums, and other Fruits, under the Altar, which he viſited every Day, when he was alone [c]. Theſe Things we relate, that our Readers may ſee what Sort of People theſe *Neſtorian* Miſſioners were; and that they went into *Tartary* more to get Money by their Hypocriſy, and cheating Arts, than to convert the Inhabitants.

SINCE the Friars arrived at Court, *Mangu Khân* had ridden but twice towards the South; after which he began to return North, towards *Karakarum*. On which Occaſion, *Rubruquis* obſerved, agreeably to what had been told him at *Conſtantinople*, that in his Journey forward he continually aſcended, the Land riſing all the Way. For the Courſe of all the Rivers was from Eaſt to Weſt, inclining to the North, or South [d]. The *Katayan* Prieſts teſtified the ſame to him.

FROM the Place where he found the *Khân*, to *Katay*, were twenty Days Journey to the South-East: To *Onan Kerule*, the proper Country of the *Mongols*, where the Court of *Chinghiz Khân* is, ten Days due Eaſt. In theſe Parts, there is not a Town, but there are People called *Su Mongals*, or *Mongals of the Waters*, who live on Fiſh and Game, having neither Flocks, nor Herds. Northward likewiſe, there is no City to be found, but ſeveral Sorts of poor People; as the *Kerkis*, feeding Cattle; and the *Orangbey* [e], who binding ſmooth Bones on their Feet, paſs ſo ſwiftly over the Snow and Ice, that they catch Birds and Beaſts. Theſe have on the Weſt the Country of *Paſkatir* [f], which is the *Greater Hungary*. All theſe Nations, according to the Laws of *Chinghiz Khân*, muſt ſerve in

[a] For all this, ſhe died a few Weeks after.
[b] *Stuppa Setae.*
[c] *Purchas Pilgr.* p. 32, *& ſeqq.*
[d] This is true enough, till you have paſſed *Mount Altay*, and then they begin to decline Eaſtward.
[e] These, perhaps, are thoſe at preſent called *Oi aks.*
[f] Or, the *Baſkirs.*

ſame

Rubruquis, 1254.

some Trade, till superannuated. The Bounds of the Continent Northward, are not known, for the extream Cold. The Author could hear nothing of the human Monsters, mentioned by *Isidore* and *Solinus*.

YET one Time asking a *Katayan* Priest, who was dressed in Red, where they had that Colour? He told him a formal Story: That in Caves among high craggy Rocks, to the East of *Katay*, there dwelt Creatures shaped like Men, but not above a Cubit in Height. They were covered over with Hair, and had no Joint in their Knees, so that they went leaping: That they who hunt them, in order to come at them, make Cavities in the Rocks, and filling them with strong Drink made of Rice [a], hide themselves: That then the little Animals coming out of their Holes, taste the Liquor, and cry, *Chin chin*, which brings Multitudes of them together; who having drank it all up, fall fast asleep: That then the Hunters binding them, open the Jugular Vein, and taking-out three or four Drops of Blood from each, let them go again; and that Blood, he said, was an excellent purple Die. *Rubruquis* could believe any Thing that was told him, but what came from his Brother Monk, and the Priests.

BOUCHER told him, that People called *Tause* and *Manse*, inhabiting Islands, whose Sea is so frozen in Winter, that the *Tartars* might easily invade them, by Means of the Ice, sent Ambassadors to *Mangu*, offering to pay two thousand *Tumen* [b] of *Jaskots*, by Way of Tribute, that they might live in Peace.

RUBRUQUIS adds these farther Remarks, that the common Money of *Katay* is Paper, made of Cotton, as large as one's Hand: That they write with Pencils, and comprize many Letters in one Figure, which makes a Word: That in *Tibet* they write like the *French*, and have Characters nearly resembling the *Roman*: That the People of *Tangut* write from the Right-hand to the Left, like the *Arabs*, and multiply the Lines from the Bottom of the Paper towards the Top, contrary to the *Jugurs*; who proceed from Top to Bottom. Lastly, that the common Money of the *Russians*, was at that Time little Pieces of spotted and grisled Skins [c].

SECT. IV.

Journey *to* Karakarum, *with a* Description *of that* City, *and* Occurrences *there, till the* Author's *Return.*

The Court removes: Comes to Karakarum: *That City described: The* Khân's *Palace. Great Silver Tree for conveying Liquors. Form of the Palace. Armies sent forth. Monk's Insolence punished. The* Khân *proposes a religious Dispute: Censures the Christians. Friars ordered to return. Several great Feasts.* Rubruquis *prepares for his Departure.*

The Court removes.

ABOUT *Mid-Lent*, *Boucher*'s Son arrived at Court from *Karakarum*, to acquaint the *Khân*, that the Work, which he had commanded to be made, was finished. He brought with him a Silver Crucifix, after the *French* Fashion, which the Monk and Priests could not bear the Sight of, for the Reason already mentioned. It was designed for a Present to *Bulgay*, the chief Secretary: And this, it seems, no less offended *Rubruquis*.

As soon as the *Khân* was informed, that the Tree was made, he sent Orders to *Boucher*, to set it up; and about *Passion-Sunday* went before with little Houses (or Pavilions) leaving his larger behind. He took his Way through the hilly Countries, where the Cold was extream, and as he passed there rose a great Wind, and fell so much Snow, that he sent to the Monk and Friars to pray for mild Weather; because the Cattle, which were ready to bring forth their Young, would otherwise be destroyed. The Monk sent the *Khân* Incense, to offer to God: But whether he did, or not, the Storm ceased the second Day.

Come to Karakarum.

ON *Palm-Sunday*, in the Morning, they entered *Karakarum*, and proceeded, with the Cross aloft, through the Street of the *Mohammedans*, to the Church. They supped at *Boucher*'s, where was his Wife, a *Lorainer*, and one *Basil*, an *Englishman*, who were both born in *Hungary*, and spoke the *Komanian* Language, besides *French*. From thence they went to the Hut appointed for them, near the Church [d].

That City described.

THE City of *Karakarum*, exclusive of the *Khân*'s Palace, is not so good as the Castle of *St. Dennis* at *Paris*; and the Monastery of that Saint is ten Times more valuable than the said Palace. It has two Streets, one of the *Mohammedans*,

[a] On this Occasion the Author remarks, that they had no Wine then in *Katay*, but began to plant Vineyards. [b] The *Tumen* (or *Toman*) is the Value of ten thousand Marks in Silver; the *Jaskot* ten Marks: So that the Whole must have been two hundred thousand Marks. [c] *Purchas Pilgr.* p. 33, & *seq.* [d] The same, p. 35.

Great Tartary.

where the Market and Fairs are kept; the other of the *Katayans*, who are all Artificers. Without those Streets there are large Palaces, being the Courts of the Secretaries. Twelve Kinds of Idolaters, of divers Nations, are found there, besides *Mohammedans*, who have two Churches there, and the Christians one, at the End of the Town, which is inclosed with a Mud-Wall, and has four Gates. At the Eastern Gate is sold Millet, and other Grain, though seldom brought thither: At the Western, Sheep and Goats: At the North Gate, Horses are to be bought; and, at the Southern, Oxen and Waggons. The Place has a great Resort of Merchants, by Reason of the Court, which is always near, and the great Number of Ambassadors [a].

Khân's Palace.

NEAR the City, there is a large Piece of Ground encompassed with a Brick-Wall, like the Monasteries in *France*, and within a large Palace, where he holds two great Feasts every Year. The first in *Easter*, when he arrives there; the other in Summer, when he returneth (Southward.) The latter is most solemn of the two, because all the Lords and Gentry, within two Months Journey of the Court, repair thither; on whom the *Khân* bestows Habits, and other Things, wherein he displays his Magnificence. In Summer Water is conveyed, by Canals, into every Part of this Palace. Near it there are several other spacious House, as Magazines, where his Victuals, Provisions, and Treasures are kept.

Great Silver Tree,

AT the Entrance within the Palace stood the great Silver Tree, before-mentioned, made and contrived by *Boucher*, for conveying Milk, and other Liquors, into the Court, to avoid its being brought in Vessels, which did not look graceful. At the Foot of this Tree there were four Lions, with each a Pipe, which being conveyed within-Side, came out again at the Top, and bent downward: One was for Wine, another for *Karakosmos*, the third for *Bâl*, and the fourth for *Tarasina*. Upon each was a Golden Serpent, whose Tails twined round the Body of the Tree; and underneath were Vessels to receive the several Liquors. At the Top of all was an Angel holding a Trumpet; and under the Tree a Vault, from whence a Pipe ascended to the Angel. All these Appurtenances, as well as the Branches and Leaves of the Tree, were of Silver.

For conveying Liquors.

WITHOUT the Palace was a Chamber for the Liquors: Now when within they wanted Drink, the Head-Butler called to the Angel to sound the Trumpet: Then a Man placed in the Vault blowing the Pipe strongly, which reached to the Angel, the Angel set the Trumpet to his Mouth, which gave a shrill Sound. At this Signal the Servants, who were ready in a Chamber without the Palace, where the Liquors were kept, poured the four Sorts into their respective Pipes; through which they were conveyed into the Vessels underneath, from whence they were drawn by the Butlers, and served about. The *Khân* gave *Boucher*, for his Reward, an hundred *Jaskots*, or a thousand Marks [b].

THE Palace was like a Church, with a middle Space, or Isle, and a Row of Pillars on each Side. It extended, in Length, from North to South, where the Entrance was, by three Gates. Before the Middle-one stood the Silver Tree, and the *Khân* sat on a high Place on the North Side, that he might be seen of all the Court. It had a double Stair-Case, by one of which his Cup-Bearer went-up, and descended by the other. On the Right, or West Side, were all the Men, and on the Left the Women; for the Palace extended in Length from North to South. On both Sides, near the Pillars, were Seats raised after the Manner of a Theatre. On the right Side sat the *Khân*'s Son, and Brother; on the Left, his Wives and Daughter: Only one of his Wives sat near him, but not so high as he. As for the middle Space, or Isle, between the Tree and the Stair-Case, it was left for those who served-up his Victuals; and for the Ambassadors who brought Presents to the *Khân*, who was there elevated like a God.

THE Priests, the Day after their Arrival, went to Court, and stood before the *Khân*, having, at their Backs, the Silver Tree; which, with its Appurtenances, took-up a great Part of the Palace. They presented him some Fruit, with two small Loaves, one of which he began to eat, and sent the other to his Son and younger Brother, named *Arabuka* [c]. *Mangu* promised to visit their Church the next Day, but left *Karakarum* without doing so; because, as he sent them Word, he understood the Dead were carried thither [d].

ON *Monday* before *Ascension-Day*, they were sent for by the Great Secretary, who examined them strictly concerning the Country they came from, and what they came about? This Enquiry was made, because the *Khân* was informed, that four hundred *Hassassins* [e], or secret Murderers

[a] *Purchas Pilgr.* p. 39. [b] The same, *p.* 35, and 39. [c] Or, *Aribuga*. He was sixth Son of *Tolui*, or *Tuli*, Son of *Jenghiz Khân*, and kept his Mother's Court; who being dead, *William Boucher*, who belong to her, fell to him. She died in 1252. See *Gaubil*'s Hist. *Mongol* Emp. *p.* 111. [d] *Purchas*, as before, 36. [e] This is the true Orthography of the Name of the People commonly called *Assassins*; the Explanation also is just. Although *Assemani* says, the Name is derived from the Country of *Hassassa*, near *Tigris*, the *Tigris*, from whence they originally came.

called by the *Tartars*, *Mulibet* [a], were gone forth in various Diſguiſes, to kill him. Againſt theſe he ſent one of his Brothers, by the Mother's Side (of whom he had three, and five by the Father's) with an Army, intirely to root them out [b]: Another was ſent into *Perſia*, whoſe Forces were to be employed againſt *Baldak*, *Turky*, and *Vaſtas:* And a third was diſpatched into *Katay*, to quell a Rebellion there.

REPAIRING to the Palace a few Days after, *Aribuga*, near whom ſat two *Mohammedan* Lords of the Court, being apprized of the Animoſity that reigned between the Chriſtians, and the Followers of *Mohammed*, aſked the Monk, if he was acquainted with the latter? *Sergius* anſwered, *I know they are Dogs, why have you them ſo near you?* They replied, *Why do you treat us in ſo injurious a Manner, who give you no Cauſe of Offence?* The Monk juſtified himſelf, by ſaying he ſpoke the Truth, adding, *that both you, and your* Mohammed, *are vile Dogs.* Provoked at ſuch Language (if ſuch he durſt utter) they began to blaſpheme Chriſt: But *Aribuga*, it ſeems, forbad them, ſaying, *we know that the Meſſias is God.* Some Time after, certain *Mohammedans* meeting the Monk on the Road, urged him to diſpute: And as they laughed at him, becauſe he could not defend his Religion by Reaſon, he was going to confute them with his Whip. Theſe Things coming to the *Khân*'s Ears, he commanded *Sergius*, and the other Prieſts, to remove at a greater Diſtance from the Court.

RUBRUQUIS had all along flattered himſelf with the Hopes of ſeeing the King of *Armenia* arrive [c]: He likewiſe expected a *Dutch* Prieſt from *Balak*; but hearing no News of either, he applied to know *Mangu*'s Pleaſure concerning them: Becauſe, if they were to depart, it was high Time to think of it before Winter came on; for it was then *May*, they having ſtaid three Months beyond the Time allowed them by the *Khân*. Next Day being brought to the Court, the Chief Secretaries examined him, as at other Times, about his Errand. After this he diſputed with a *Mohammedan* in the *Khân*'s Preſence. Next Day *Mangu* ſent to acquaint him, that as there were *Chriſtians*, *Mohammedans*, and *Tuins*, at his Court, and each of them pretended his Law was beſt, and his Scriptures trueſt, he would be glad to have the Matters argued, that he might be Judge whoſe Cauſe was beſt. Rubruquis, 1254.

A religious Diſpute.

ON the Day appointed, the Parties met before a numerous Audience. Three of the *Khân*'s Secretaries, one of each Perſuaſion, were Arbitrators. The Author tells us, that he confuted his *Tuin* Adverſary; who affirmed, that there was one ſupream Deity, and ten or eleven inferior Gods; that none of them was omnipotent; that one Half of Things are good, the other bad [d]; and that the Souls of Men paſſed from one Body to another [e]. So far the Friar may be credited: But in what he adds, that the *Mohammedans* confeſſed they believed every Thing contained in the Bible, and always prayed to God, that they might die the Death of Chriſtians, he muſt needs be a great Liar [f].

Cenſures the Chriſtians.

THE *Khân* having been told, that *Rubruquis* had called him a *Tuin* (or Idolater) on *Whit-Sunday* ſent for him, and before his *Tuin* Adverſary aſked him the Queſtion. The Friar anſwering in the Negative, *Mangu* ſaid he was of that Opinion all along, and then declared his Faith, ſaying, *The* Mongols *believe there is but one God, and have an upright Heart towards him: That as he hath given to the Hand many Fingers, ſo he hath infuſed into the Minds of Men various Opinions. God hath*, continued he, *given the Scriptures to you Chriſtians; but you obſerve them not: You find it not there, that one of you ſhould revile another, or that for Money a Man ought to deviate from Juſtice.* The Friar confeſſed all this; but going to apologize for himſelf, the *Khân* replied, that he did not apply what he had ſpoken to him, repeating, *that God has given you the Scriptures, and you keep them not; but he hath given us Soothſayers* [g], *whoſe Injunctions we obſerve, and we live in Peace.*

[a] Whence this Name comes we know not. They were by the *Arabs* and *Perſians* called alſo *Al Batanîyah*, *Melâhîdah*, and *Melâhedah*; which laſt Word ſignifies *Heretics*, and *wicked People*. See Journey from *Aleppo* to *Perſia*, p. 6. [b] They inhabited the North-Part of *Perſian Irâk*. [c] *Hayton*, the Monk, who was a Relation of this King, in his Oriental Hiſtory, ch. 23, ſays, that he ſent his Brother to the *Khân* in 1253; which *Rubruquis* mentions his Arrival afterwards, having paſſed-by while he was on the Road back:) That after four Years Stay he returned, and then the King himſelf went, and found *Mangu* at *Al Malek* (a City of *Cathay*.) He adds, ch. 24, that at the Requeſt of the King, *Mangu* was baptized, with all his Court, among whom were many of the chief Men of his Empire. But this is only a farther Proof how much the Spirit of Lying prevails among the Oriental Monks and Prieſts. [d] *Purchas Pilgr.* p. 39, *& ſeqq.* [e] *Boucher* told *Rubruquis*, that a Child was brought from *Katay*, who in Appearance could not be above three Years old, yet was endued with great Underſtanding. He affirmed, that he had been three Times incarnated, and knew how to die.—This ſeems to be ſome faint Intelligence of the *Great Lama* of *Tibet*. [f] For the *Mohammedans* look upon the Chriſtians, on Account of the Trinity (eſpecially thoſe who uſe Images, or Pictures) as the groſſeſt Idolaters; and their Bible as a ſpurious, or greatly corrupted Copy. [g] By Soothſayers, or Diviners, is to be underſtood the *Mongol* Prieſts, called *Shamman*.

Great Tartary.

HE drank four Times, during the Time he was ſpeaking what he had to ſay on this Occaſion. After which changing the Subject at once, *You have*, ſaid he, *ſtaid a long Time here, it is my Pleaſure, therefore, that you return to your own Country.* He added, *There are two Eyes in the Head, and yet they have both but one Point of View; for which ever Way one of them directs the Sight, the other doth the ſame. You came from* Baatû, *and, therefore, you muſt return by him* [a]. *You ſaid*, continued he, *that you durſt not carry my Ambaſſadors with you; will you carry my Meſſage, or my Letters?* *Rubruquis* having anſwered in the Affirmative, the *Khân* aſked him, if he would have Gold, Silver, or rich Garments? The Friar anſwered in the Negative, but deſired he might be maintained at his Majeſty's Expence on the Road, through his Dominions, and furniſhed with a Paſs, to carry him into the King of *Armenia*'s Country. *Mangu* replied, *I will cauſe you to be conveyed thither, and after that look to yourſelf.* Then *Rubruquis* having obtained Leave to ſpeak, intreated the Liberty of returning into *Tartary*, chiefly on Account of ſome of his Religion at *Bolak*, who ſtood in Need of a Prieſt. But the *Khân* made no Anſwer to his Requeſt; only at laſt he ſaid, You have a long Way to go, make yourſelf ſtrong with Food. Then ordering Drink to be given him, he was diſmiſſed [b].

Friars ordered to return.

Several great Feaſts.

ABOUT the fifteenth of *June*, the *Khân* held a great Aſſembly at *Karakarum*, whereat all the Ambaſſadors were preſent: Among the reſt, the Author ſaw thoſe of the *Khalifah*, and of the *Soldâns* of *Turky*, and *India* [c]. At this Feaſt, which laſted four Days, *Boucher* was chief Butler. All the Company, both poor and rich, ſang, danced, and clapped their Hands before *Mangu*; who afterwards made a Speech, acquainting them, that *he had ſent his Brothers into diſtant Nations, to encounter with Difficulties and Dangers; and that it would be ſeen what thoſe preſent would do when he ſhould ſend them abroad alſo, for the Good and Aggrandizement of his Dominions.* Each Day of the Feaſt he appeared in Garments of a different Colour from Head to Foot. On *St. John*'s Day, and that of *St. Peter* and *Paul*, the *Khân* had other great Feaſts, whereat *Rubruquis* counted an hundred and five Carts, and ninety Horſes, laden with Cows Milk.

Rubruquis prepares

AT length the *Khân*'s Letters to King *Louis* being prepared, they were explained to *Rubruquis*, who wrote down the Tenor of them. Mean-time Friar *Bartholomew*, the Companion of our Author, hearing they were to go by the Wilderneſs to *Baatû*, went to the Chief Secretary *Bulgay*, and informed him by Signs, that he ſhould die if he travelled that Road: So that the ninth of *July*, when they went to Court to get their Paſs, the Secretaries told him, that the *Khân* gave him Leave to ſtay, if he thought fit, till there was an Opportunity of returning with ſome Ambaſſador, or otherwiſe. *Rubruquis* hearing him ſay he would ſtay, bad him beware of what he did, and declared he would not leave him. *You leave not me* (quoth the Friar) *but I leave you; becauſe, in Caſe I ſhould go with you, both Body and Soul would be in Danger; for I can never ſupport ſuch Fatigue.*

THEN they were often aſked, according to Cuſtom, what they would have, or what ſhould the *Khân* do for them? And ſtill anſwering nothing, they were preſented each with a Habit; which they received, it being deemed very rude to refuſe their Gifts. After this their Guide brought ten *Jaſkots* [d], and depoſited five with *Boucher*, at whoſe Houſe they then were, for defraying the Friar's Expences [e], who ſtaid behind: The other five he gave to *Rubruquis*'s Interpreter. One of them the Author diſtributed among the poor Chriſtians, with another he bought Garments, and a third was laid-out by the Interpreter in Goods, to diſpoſe of in the Journey: The other two were reſerved for bearing their Expences on the Road [f].

SECT. V.

The Author's *Return from* Karakarum *to* Tripoli *in* Syria.

He leaves Karakarum: *Comes to* Baatû's *Court. Obtains a Paſs. City of* Samerkant. *Sarai. The* Alans. *The* Leſghi. *The* Iron Gate, Derbend. Samaron, *or* Sabran. *Shamakie. Bridge of Boats.* Nakſuan. *A lying Prophecy.* Mount Ararat. *Country of* Saheni. *City* Ayni. Marſengen *Caſtle. Head of* Arras. *Earthquake at* Arzerûm. *Caſtle.* Ikonium. Tripoli *in* Syria. *State of* Turkey. Tartar *Miſſion.*

HAVING gotten every Thing ready for the Purpoſe, *Rubruquis* departed, in Company

[a] This ſhews the great Reputation *Baatû* was in. been ſent from the *Turkiſh* King of *Delli* and *Multân*. Ambaſſadors brought, as a Preſent, eight Leopards, and ten Hounds, for Courſing, who were taught to the Horſe's Buttocks.

[f] *Purchas*, as before, *p.* 45, *&* *ſeq.*

pany with his Interpreter, his Guide, and one Servant [a]; who had Orders to allow a Sheep for their Proviſion every four Days. They were two Months and ten Days travelling from *Kara-karum* to *Baatû*'s Court, in which Space they found neither Town, nor Habitation, except one poor Village (where they could not get even Bread) and from Time to Time Graves of the Inhabitants: Nor did they reſt more than one Day, and that becauſe they could not procure Horſes. They returned, for the moſt Part, thro' b the ſame Kinds of People; but through different Parts of *Tartary*, much more to the North, it being then Summer: Only for fifteen Days they were obliged to travel along a certain River, both in going and coming. They were ſometimes two or three Days without any Proviſion, but *Koſmos*: And once not being able to find any People, were in Danger of periſhing, both as their Proviſions failed, and Horſes tired.

WHEN he had travelled twenty Days, he c heard that the King of *Armenia* had paſſed-by, and at the End of *Auguſt* met with *Sartak*, and his Family, his Flocks, and Herds, going to *Mangu Khân*. The Friar paid his Reſpects, and the Prince ſent him two Habits, one for himſelf, the other for King *Louis*, to whom he ſent both by the Perſon who carried his Letter [b]. He got Letters alſo from *Koyak*, to his Father, to reſtore all the Friar's Goods left behind. In ſhort, he arrived at *Baatû*'s Court on the ſixteenth of *Sep-* d *tember*, 1254, the ſame Day they left it the Year before. Here he found the young Men in Health. They had ſuffered much, but muſt have ſuffered more, only for the King of *Armenia*'s [c] Bounty; and concluding *Rubruquis* was dead, the *Tartars* began to aſk them if they could keep Horſes, and milk Mares; ſo that had he not returned as he did, he concludes they would have been made Slaves of.

THE *Khân* having written to *Baatû*, to make e what Alterations he thought fit in the Letters he ſent by *Rubruquis*, the Friar was ordered to appear before him, to hear them read and explained. His neareſt Way home to *France*, was by *Hungary*; but as he imagined the King was ſtill in *Syria*, he choſe to go through *Perſia*. He travelled a Month with *Baatû*, before he could obtain a Guide. At laſt that Prince appointed him a *Jugur*; who underſtanding that the Friar had nothing to give him, and intended to pro- f ceed directly for *Armenia*, he procured Letters of Recommendation to the *Soldân* of *Turky* [d], in Hopes of getting ſome Preſent from him, as well as of gaining more (by Traffic) on that Road. Rubruquis, 1254.

ABOUT the fifteenth of *October* they began to direct their Courſe to *Saray*, due South along the *Etil* (or *Wolga*) which divides into three Branches, each twice as large as the *Nile* at *Damiatta*: Afterwards it ſplits into four leſſer Arms; ſo that they paſſed it by Boat in ſeven Places. On the middle Stream ſtands the City of *Samarkant* [e], without Walls; but is encompaſſed like an Iſle with the River, when it overflows. The *Tartars* were eight Years beſieging, before they could take it: And it was inhabited by *Alans* and *Mohammedans*. They found there a *Dutchman*, and his Wife. *Baatû*, and *Sartak*, deſcend no lower than this Place. *Koyak*'s Father delivered *Rubruquis* moſt of his Goods [f], and prayed him, in caſe he returned to that Country again, to bring with him one who underſtood how to make Parchment: For having, by Command of *Sartak*, built a Church on the Weſt-Side of the River, he deſigned to have the Scriptures written-out, for the Uſe of that Prince. But, ſays the Friar, I knew well that *Sartak* would not trouble his Head about any ſuch Matter. City of Samarkant.

As to *Saray*, and the Palace where *Baatû* keeps his Court, they are on the Eaſt-Side of the River; and the Plain, wherein its ſeveral Branches ſpread themſelves, is more than ſeven Leagues broad. This Place is ſtored with Fiſh. Saray.

THE firſt of *November* taking Leave of *Koyak*, he departed, travelling Southward. On *St. Martin's Day*, they came to the Mountains of the *Alans*. Between *Baatû* and *Saray*, they found no People for fifteen Days, only one of his Sons, who advanced before him with a great Train of Falconers, and a ſmall Village. In the Way, they had like to have periſhed with Thirſt, not meeting with any Water for a Day and half. As the *Alans* ſtill held-out, *Sartak* was obliged to ſend one Man out of five of his Subjects to guard the narrow Paſſages of the Hills, to prevent them from deſcending into the Plain, and ſtealing their Cattle. The Alans.

FROM the *Alans* to the *Iron Gate* [g], are two Days Journey through a Plain, called *Arkacci*, between the *Caſpian Sea*, and the Mountains; The Leſghi.

[a] Speaking before of the *Indian* Ambaſſador, he ſays, he returned for ſix Weeks together the ſame Road with him, Weſtward, and then ſtruck-off to the Left. [b] Whence we have made this Extract: It was ſent from *Tripoli* in *Syria*. [c] His Name was *Hayton* I. [d] That is, to the *Soltân* of the *Seljuks* of *Rûm*, or *Natolia*. [e] This muſt be the City now called *Aſtrakhan*, or one near it. [f] Among thoſe he could not recover, was a Book in *Arabic*, worth three *Biſantins*, or *Soltanins*. [g] In *Turkiſh*, *Demir*, or *Temir Kapi*. By the *Perſians*, *Derbent*, or rather *Darbend*, that is, the *Shut-Gate*. It is the Northern Entrance into *Perſia*, by the Province *Shirwân*, to which it belongs.

Great Tartary.

and where that Plain begins to contract, there is a a *Mohammedan* Nation, called *Leſghi*, who likewiſe oppoſe the *Tartars*; ſo that they were obliged to give them a Guard of twenty Men, to convoy them beyond that City. *Rubruquis* was glad of this, becauſe he hoped, by that Means, to ſee them armed; for he could never ſee their Armour. When they came to the moſt dangerous Paſſage, he obſerved, that two of them had Cuiraſſes, which they ſaid they had from the *Alans*, who are excellent Smiths. The Day before they arrived at the *Iron Gate*, they found one Caſtle of theirs, which then belonged to *Mangu Khân*, who had ſubdued all that Country. There they firſt met with Vineyards, and drank Wine.

The Iron Gate, *or* Derbend.

THE City called the *Iron Gate*, was built by *Alexander*. It takes-up the whole Space, being a little Plain, between the *Caſpian Sea* and the Mountains, to the Top of which the Wall aſcends: So that there is no Paſſage but through the Town itſelf, where there is an Iron Gate, whence it takes the Name. It is not above a Stone's Throw in Breadth, but a Mile long from Eaſt to Weſt; at which End, on the Hill, ſtands a ſtrong Caſtle. The Walls are ſtrong, and fortified with Stone-Towers; but has no Ditch, and the *Tartars* have demoliſhed the Tops of the Towers, and Bulwarks of the Walls. The adjacent Country uſed to be like a Paradiſe [a].

Samaron, *or* Sabran.

TWO Days Journey from thence, they came to *Samaron* [b], a City abounding with *Jews*: After which they ſtruck Southward into the high Countries, where they ſaw Walls, deſcending from the Mountains to the Sea. Next Day they paſſed through a Valley, where appeared the Foundations of Walls from one Mountain to another. Theſe alſo were built by *Alexander*, to hinder the Inhabitants of the Mountains from invading the Low-Lands. The Day following they arrived at the City *Samag* [c], and afterwards entered a great beautiful Plain, call *Moan* [d], through which runs the River *Kur*; whence the *Kurji*, by *Europeans* called *Georgians*, take their Name. It paſſes through *Tiflis*, the Capital of the *Kurji*; breeds excellent Salmon, and runs, from Weſt to Eaſt, into the *Caſpian*. Through the ſame Plain, where they again found *Tartars*, likewiſe flows the *Araxis* [e], coming from the *Greater Armenia* with a North-Eaſt Courſe.

City of Shamaki.

They paſſed through the Meadows of *Bakku*, who is General of the *Tartar* Army there, with which he ſubdued the *Kurji*, *Turks*, and *Perſians*. *Rubruquis* viſited *Bakku*, who gave him Wine to drink. There is another Governor, called *Argon*, at *Tauris*, who collects the Tribute; but *Mangu* recalled them both, on ſending his Brother [f] into theſe Countries. To the Weſt of that Plain lies *Kurjeh*, where formerly the *Kroſmins* [g] dwelt; and in the Entrance of the Mountains (a little Weſt of the *Kûr*) is *Ganjeh*, a great City, which was their Capital, and hindered the *Kurji* from deſcending into the Plains.

AFTER this they came to a Bridge of Boats [h], faſtened together with an Iron Chain ſtretched acroſs the River, which is here made by the Junction of the *Araxes* with the *Kûr*, the latter loſing its Name. Having paſſed it, they marched South-Weſt along the former, which they traced to its Source, from the Feaſt of *St. Clement*, to the ſecond *Sunday* in *Lent*. Putting forward, they came at length to *Naxuan* [i], formerly a great City, and Capital of a Kingdom; but the *Tartars* have ruined it: Alſo out of eight hundred *Armenian* Churches, the *Mohammedans* had left but two. A Biſhop told *Rubruquis*, that in one of them *St. Bartholomew* and *Judas Thadeus* were martyred: Alſo that they had two Prophets, the firſt *Methodius*, a Martyr, who foretold the Conqueſts of the *Iſmaelites*, which were fulfilled in the *Mohammedans*: The ſecond *Aitkron*, who at his Death propheſied as followeth, *viz.*

THAT a Nation of Archers ſhould come from the North, and conquer all the Countries of the Eaſt; but that they ſhould ſpare the People, in order to make-uſe of them in conquering thoſe of the Weſt. Yet that the Franks, *who were Catholicks, ſhould not obey them: That they ſhould take the Port of* Conſtantinople, *and the wiſeſt Man among them ſhould enter the City; where beholding the Church and lovely Ceremonies uſed by the* Franks [k], *ſhould cauſe himſelf to be baptized, and ſhew them how they might ſlay the Emperor of the* Tartars, *who thereby would be confounded: That the* Franks *in* Syria *hearing of this, ſhould ſet-upon the* Tartars *bordering on them; and by Help of the* Armenians *purſue them in ſuch Sort, that the King of the* Franks *ſhould place his royal Seat at* Tauris *in* Perſia, *which all the unbelieving Nations of the*

[a] *Purchas Pilgr.* p. 47, & *ſeq.* [b] Doubtleſs, the ſame with *Sabran.* [c] In the *French*, *Samakh*, that is, *Shamakhi*, the preſent Capital of *Shirwân* in *Perſia.* [d] Rather, *Mokan*, or *Mogan*, as *Olearius*, and others write it. It is obſervable, that this Author leaves out the *g* in this Word, in the ſame Manner as he does in *Mogal*, or *Mongal.* [e] Now called *Alrâs*, or *Arras.* [f] This was *Hulaku.* [g] *Kharazmians*, *Karezmians*, the People of *Karazm*, who followed *Jalaladdin* into thoſe Parts, in the Time of *Jenghiz Khan.* [h] Called *Tzawat*, or *Chawat*, by *Olearius*, and other Travellers, who paſſed it. [i] *Nakſhuan*, or *Nakſhuan*. In the Copies *Naxnan*, and *Vaxnam*. It ſtands to the North of the *Arras*; ſo that he muſt have paſſed the River ſome-where to get to it. [k] *Conſtantinople* was at this Time in the Hands of the *Franks.*

ſhould be converted to the Faith, and univerſal Peace enſue. *Rubruquis* ſays, this Prophecy was as firmly believed all over *Armenia*, as the Goſpel itſelf [a]; and though when he firſt read it at *Conſtantinople*, he made light of it; yet on the Biſhop's ſpeaking of it, he began to pay ſome Regard to it.

NEAR *Naxuan* are two Mountains, one greater than the other, where it is ſaid the Ark reſted. At the Foot of them, waſhed by *Araxes*, ſtands a little Town, called *Semainum*, that is, *Eight*, from the eight Perſons who come-out of the Ark, and built it. Many have attempted to climb the greater, named *Maſſis*, but could not. The Biſhop told *Rubruquis*, that a certain Monk being very much troubled to find, after ſeveral Trials, that he was not able to ſucceed; an Angel brought him a Piece of the Ark [b], and bid him give-over farther Enquiry; which Piece of Wood, he ſaid, they had in their Church. The Hill ſeemed not difficult to aſcend, on Account of its Height; but an old *Armenian* gave the Author a merry Reaſon, *why no Man ought to get a-Top of* Maſſis, *becauſe* (ſays he) *ſhe is the Mother of the World.*

THEY found *Bernard Cathalane*, and another Friar, at *Naxuan*, where the Snow had kept them a long Time. At length departing the fourteenth of *January* (1255) they got, in four Days, to the Country of *Sahenſa* [c], a *Kurjin*, who had been a potent Prince, but was then Tributary to the *Tartars*. His Father *Zakharias* had obtained that Territory of the *Armenians*, for having delivered them from the *Mohammedans*. It is full of handſome Villages, with Churches; and in every Houſe there is a Wooden Hand, holding a Croſs, with a Lamp burning before it. They acknowledged the Pope, and as we, ſays the Friar, ſprinkle Holy Water to drive away evil Spirits, ſo the *Armenians* here burn Incenſe, carrying it every Evening, with the ſame Intent, all over the Houſe. *Rubruquis* was well entertained by *Sahenſa*, and his Wife. Their Son *Zakharias*, a promiſing young Man, not brooking the *Tartar* Yoke, ſeemed inclined to retire to *France*.

FROM that Town of *Sahenſa*'s, in fifteen Days, they entered the *Soldân* of *Turky*'s Dominions, on the firſt *Sunday* in *Lent*. But firſt, on the ſecond of *February*, they came to a City of *Sahenſa*'s, called *Ayni* [d], very ſtrong by Situation. It had an hundred *Armenian*, and two *Mohammedan* Churches; but was under a *Tartar* Governor. There *Rubruquis* met with five preaching Friars, who were going to *Sartak*, and *Mangu Khân*, with Letters from the Pope, deſiring Liberty for them to preach the Goſpel: But being told what a bad Reception they were likely to meet with, if that was all their Buſineſs in *Tartary*, they went to *Teflis*, to conſult the Friars of their Order what Courſe to take. Rubruquis, 1255.

THE firſt Caſtle they found in *Turky* was called *Marſengen* [e], inhabited by *Armenians*, *Kurji*, and *Greeks*; but under a *Mohammedan* Governor, who having had Order not to furniſh any *Frank*, or even the Ambaſſadors of the King of *Armenia*, or *Vaſtas*, with Proviſions, *Rubruquis* was thenceforth obliged to buy them. Here his Guide procured him Horſes, and took Money for the Victuals: But this he converted to his own Uſe; for whenever he met with a Flock of Sheep, he took one, and gave it his Family to eat, wondering the Friar would not taſte of his Robbery [f]. Marſengen Caſtle.

THE ſecond *Sunday* in *Lent* they came to the Head of the *Araxes*, which riſes in a Mountain, beyond which there is a fine City, called *Arzerum* [g]; and near it to the North the *Euphrates* has its Source, at the Foot of the Mountains of *Kurjia* [h], to which the Author would have gone, but for the Snow. On the other Side of thoſe Mountains, Southward, are the Springs of the *Tigris*. Croſſing over the Mountain, they came to the *Euphrates*, along which deſcending Weſtward, in eight Days they arrived at a Caſtle, called *Kamath* [i], where the River bends South, towards *Halap* [k] (or *Aleppo.*) There paſſing it, they proceeded Weſt through the Mountain-Country, in deep Snow. *Head of the* Arras.

THIS Year there happened ſo great an Earthquake at *Arzengan* [l], that ten thouſand Perſons of Note, beſides the ordinary Inhabitants, periſhed. They ſaw the Chaſms made by the Shock, and Heaps of Earth that fell from the Mountains for three Days together. It cauſed a Lake to appear in the Valley where the *Sol-* *Earthquake at Arzerûm.*

[a] But Time has proved *Akakron*, like many others, to be a falſe Prophet, and ſhewn what Abſurdities whole Nations may be betrayed into by their Credulity. [b] We find the Biſhops can deceive, and tell Lies, as well as the Prieſts. [c] Perhaps *Shâhin Shâh*, as much as to ſay, *King of Kings*, a Title in the Eaſt. [d] Or, *Ainı* on the *Arras*. [e] In the *French*, *Arſengan*, but faultily. Perhaps ſituate at the Confluence of the River *Zenı* with the *Arras*, to the South of *Erivan*. [f] *Purchas Pilgr.* p. 49, *& ſeq.* [g] Or, *Arzen al Rûm*, that *Arze of the Romans*. [h] It riſes in the ſame Mountain, on the Weſt-Side, as the *Aras* does on the Eaſtſide. [i] Perhaps, miſprinted for *Kamach*; for this ſeems to be *Kemak*, *Kamak*, or *Kamk*, a ſtrong Caſtle on the *Euphrates*, twenty-one Miles South of *Arzenjan*. See Hiſt. of *Timûr bek*, book 5. ch. 43. [k] The *Turks* ſay *Halap*, or *Halep*, wanting the *B* of the *Arabs*, who pronounce *Hâleb*, which ſignifies *Milk*. [l] Rather *Arzenjân*.

Great Tartary.

dân of *Turky* [a] was vanquiſhed by the *Tartars*. As they rode through it, a Servant of the Author's Guide ſaid that the latter, in whoſe Army he was, did not exceed ten thouſand Men; but that the *Soldân*'s Troops were two hundred thouſand Horſe. They were in *Sebaſte*, belonging to *Leſſer Armenia*, in *Eaſter* Week; where there is a Caſtle, and above it the Church of *St. Blaze*. On *Low-Sunday* they came to *Cæſarea*, of *Cappadocia*, where is a Church of *St. Baſil the Great*.

Cæſarea, Ikonium.

FIFTEEN Days after they arrived at *Ikonium*, making ſmall Journeys, and reſting three Days in every Town, that their Guide might have Time to traffic. Here *Rubruquis* found many *Franks*, particularly two *Genoeſe* Merchants, who carried all the Alom out of *Turky*, by Contract with the *Soldân*, which made it ſo dear, that it roſe from fifteen to fifty *Soltanins*. Being preſented to the *Soldân*, by his Guide, that Prince readily conſented to have him eſcorted to the Sea of *Armenia*, or *Cilicia* [b]. But the ſaid Merchants finding he was deſpiſed by the *Mohammedans*, and burdened by his Guide, who teazed him for Gifts, cauſed him to be conveyed to *Kurko* [c], a Port of *Armenia*, where he arrived the Day before the *Aſcenſion*, and ſtaid till *Whitſun Monday*. Then hearing that the King was returned, he went to his Majeſty's Father [d], who confirmed it, and cauſed him to be conveyed to the Port of *Ayyas* [e]; from whence he paſſed over to *Cyprus*, and thence to *Antioch*, which was in a very weak Condition.

Tripoli *in* Syria.

FROM *Antioch* he ſet-out for *Tripoli* in *Syria*, where he arrived on *Aſſumption-Day*. From hence he intended to have ſailed for *France*, to give King *Louis* an Account of his Travels; but his imperious Provincial would not ſuffer him to perform his Duty to his Sovereign; and he, it ſeems (more afraid to diſobey his ſpiritual [f], than temporal Superior, the Friar than the Saint) by his Orders, went to *Akon*, or *Akra*, and thence wrote the above Relation to his Majeſty: In which he deſires the King to write to his Controller for Leave, that he might wait upon him.

State of Turky.

HE adds with Regard to *Turky*, that more than nine in ten of the Inhabitants were *Greeks* and *Armenians*: That the *Soldân* was defeated by the *Tartars*, and being taken Priſoner, they ſet a Child of his on the Throne, who had neither Men, nor Money, to withſtand an Enemy: That the King of *Hungary* had not above thirty thouſand Soldiers: That the Son of *Vaſtas* was Ru weak, and in War with the Son of *Aſſan* [g], who was alſo a Child: So that, ſays the zealous Friar, if an Army of the Church (truly militant) come to the *Holy Land*, it would be very eaſy to ſubdue all thoſe Countries, and even more beyond them: Nay, he affirmed, that if the King's meaner Subjects would go clad as the *Tartars*, and be content with ſuch Food as they eat, they would be able to conquer all the World.

As to the Converſion of the *Tartars*, he judged it not expedient to ſend any more Friars among them; but that a Legate, diſpatched by the Pope, might be of Uſe, becauſe they hear whatever an Ambaſſador has to ſay; and when he has done ſpeaking, aſk, Has he any Thing farther to propoſe? But then he ought to be provided with good Interpreters, and a large Sum to bear his Expences [h].

SECT. VI.

Some Account of the Manners *and* Cuſtoms *of the* Mongols.

AS the *Mongols*, in the Time of *Rubruquis*, were in their flouriſhing State; it may be proper to give an Account of certain Cuſtoms in which they differ at preſent, as well as ſome other Matters which are not ſo fully handled by later Writers; and the rather, as we have received Letters from ſome of our curious Subſcribers [i], deſiring an ample Abſtract of this Author: But in Reality we had anticipated their Wiſhes.

1. *Their* Dreſs, Houſes, *and* Diet.

Dreſs of the Men: Of the Women: Their Houſes and Cheſts. Courts of Princes: Bed, and Images: Their Diet dried Fleſh, Horſe-Pudding, Minced Mutton: Their Liquors: Kara Koſmos. *Their Butter, and* Gri-ut. *Mares, how milked. Libations and Ceremonies in drinking at Entertainments. Prohibited Degrees, and Marriages. Buſineſs of the Men: Of the Women. Cloaths never waſhed. Exerciſes, Hunting, Hawking.*

IN Summer the *Mongols* are clad with Cloth of Gold, and the faireſt Silks that come from the Countries South of *Tartary*; and, in Winter, with the coſtly Skins and Furs brought from the Northern Regions, as far as *Ruſſia*: Of which they have two Gowns, one has the H

[a] That is, of *Rûm*, or *Natolia*, called by the Weſtern Writers, the *Soltân* of *Ikonium*. [b] The Provi of *Cilicia* was then Part of the Kingdom of *Leſſer Armenia*. [c] Or *Kurkh*: In the *Latin*, *Curcum*. does not ſay where he was, perhaps at *Sis*, the Capital, about thirty-five Miles to the North-East of A [e] In *Purchas*, *Aijax*: In the *French*, *Layace*, commonly called *Lajazzo*. [f] Not daring, ſays he, to diſo his Commands. [g] Or, *Haſſan*. [h] *Purchas Pilgr.* p. 51. [i] Particularly one near *Salop*, for whoſe marks we are much obliged to him; and of whoſe Correſpondence we intreat the Continuance.

Tartary inward, the other outward, to defend them againſt Wind and Snow; made chiefly of the Skins of Wolves, of Foxes, and Papions. In the Houſe they wear a finer Gown. The poorer Sort make their upper-Gown of Dog, or Goat-Skin. They alſo make Breeches of Skins. The rich *Tartars* ſometimes line their Gowns with Velvet [a], which is exceeding ſoft, light, and warm: The poorer Sort with Cloth made of Cotton, and the fineſt Wool: Of the coarſer Part they make Felt to cover their Houſes, Cheſts, and Benches: Alſo for their Bedding, and Caps, to keep-out the Rain. Of the ſame Wool, mixed with one third Part of Horſe-hair, they make all their Cordage: In which Uſes they conſume a great Part of their Wool [b].

THEY ſhave all the Head, leaving only a Lock hanging over the Forehead, and two behind, which they braid, and bring behind the Ears. The Women alſo, after Marriage, ſhave their Head, from the Crown down to the Forehead. Their Dreſs, which before was the ſame with the Mens, only longer, is changed to a wide Garment, or Tunic, ſuch as Nuns wear; but larger every Way, being open before, and girt on the right Side, as the *Turks* do on the Left. They have an Ornament for the Head, called *Botta*. It is made of the Bark of Trees, or ſuch light Matter, round and hollow; yet ſo large, that it requires both Hands to ſpan it: Over it riſes a ſquare Cone, more than a Cubit high. The Whole is covered with Silk, and on the Cone they put a Bunch of Quills, or ſlender Canes, as long as itſelf; which Bunch they adorn at-Top with Peacocks Feathers, and the Sides with thoſe of Mallards, and precious Stones. Great Ladies bind this Dreſs on their Heads by Means of a Hat, with a Hole in the Crown to let the Cone thorough, tying it under the Chin. Their Hair bound-up on the Top of their Heads is covered by the *Botta*, which at a Diſtance makes the Women look like Soldiers carrying their Lances above their Helmets. The Females ride ſtraddle-legged, like the Men. They bind their Gowns about the Waiſt with a ſky-coloured Silk Scarf, and with another about their Breaſts. They tie alſo a Piece of Silk, like a Muffler, under their Eyes, which reaches to their Boſom. The Ladies are all exceeding fat, and the leſſer their Noſes, the more beautiful. They daub their Faces with Greaſe abominably [c].

THEIR Houſes are built round, with Pieces of Wood interwoven with Wickers. The Foundation is of the ſame Materials, and fixed on Carts with four Wheels. The Roof is ſloping, and has an Opening at-Top, from whence riſes a Chimney. This they cover with white Felt, and ſometimes black, laying-on Mortar, Marl, or Bone-Aſhes, to make it ſhine white. They adorn the Roof with beautiful Pictures, and before the Door have a Felt painted with Birds, Trees, and Beaſts. Theſe Houſes are thirty Foot Diameter, ſtretching on each Side five Feet beyond the Wheels. *Rubruquis* counted twenty-two Oxen drawing one Cart, eleven on each Side [d]. The Axel-tree was as big as the Maſt of a Ship. The Driver ſtands at the Door of the Houſe. Their Houſhold Stuff, and Treaſure, is kept in ſquare Wicker Cheſts, rounded at-Top, with a Door at one End. They cover them with black Felt, rubbed-over with Tallow, or Sheeps Milk, to keep-out Rain, and adorned with Paintings, or Feathers. Theſe alſo are fixed on Carts drawn by Camels, for croſſing Rivers, and are never taken-down like the Houſes, which, when diſmounted, are placed with the Door facing the South. Then they range the Cheſt-Carts on each Side, at a little Diſtance from the Houſe, which is ſituate between two Rows of them, as it were between two Walls. One rich *Mongol* has one or two hundred ſuch Carts with Cheſts.

Rubruquis, 1255.

And Cheſts.

EACH of Duke *Baatû*'s ſixteen Wives had a great Houſe, and ſeveral ſmall ones, which they placed behind, where the Maids and Servants dwelt. To each (great) Houſe belonged two hundred Carts. When taken-down, the chief Wife places her Court to the Weſt; the reſt range theirs, one after the other, to the Eaſt, at about a Stone's-throw Diſtance. Thus one rich Man's Court looks like a great Village. The leaſt of their Wives will have twenty or thirty Carts in her Train, tied with their Oxen, or Camels, one to the Tail of another; with a Woman before, who is ſufficient to conduct the whole Number, the Country is ſo even: But when they come to any rugged Ground, they untie the Carts, and let them proceed ſeparately; for they go no faſter than an Ox, or a Sheep, commonly walks.

Courts of Princes.

THE Houſe being ſet on the Ground, they place the Maſter's Bed on the Side oppoſite the Door, where he ſits facing it. The Women ſit on his Left-hand, the Men on the Right: They are ſo exact in this Reſpect, that they will not hang their Quivers on the Female Side. Faſtened to the Wall, over the Maſter's Head, is an Image made of Felt, called his Brother; and over that of the Miſtreſs another, called her Brother; and between both, but higher-up, a little lean one,

Bed and Images.

[a] In the Tranſlations, called Silk Shag, or Pluſh; the Name uſed, perhaps, in the Time of *Rubruquis*.
[b] *Purchas Pilgr.* p. 6. [c] The ſame, *p.* 6, *& ſeq.* [d] *Purchas* makes two Ranks of Oxen, one before the other, eleven a-breaſt. There is great Variation between the *Engliſh* and *French*, in many Places.

which

Great Tartary.

which is Guardian of the Houſe. The Miſtreſs a places, at her Bed's-Foot on the Right-hand, a Kid-Skin, ſtuffed with Wool, or the like; and near it a little Image, looking towards the Girls and Women. Next the Door alſo, on the Womens Side, is an Image with a Cow's Udder, for the Women who milk the Kine; and on the other Side next the Men, one with a Mare's Teat, for the Men who milk the Mares [a].

Their Diet,

THE great Lords have their Store-Houſes, for Proviſion, towards the South; whence they b are furniſhed with Millet, and Meal, for the Winter. The poorer Sort procure ſuch Neceſſaries in Exchange for Skins of Beaſts. Beſides the Fleſh of their Horſes, Cows, and Sheep, they eat that of other Animals, as Rabbits with long Tails like Cats, covered with black and white Hairs. Hares are not plenty; but they have Abundance of little Creatures, called *Sogur* [b], which ſleep in Caves, twenty or thirty together, all Winter, for ſix Months. They c have many other ſmall Animals good for Food: But they eat no Sort of Mice. As for large Beaſts, beſides thoſe before-mentioned, they have no Deer; but great Numbers of *Gazellas*, or Roe-Bucks, and wild Aſſes like Mules: Alſo a Beaſt called *Artak*, with a Body like a Ram, and crooked Horns ſo large, that *Rubruquis* could ſcarce lift up a Pair with one Hand. Of theſe they make Drinking-Cups [c].

Dried Fleſh,

THEY eat the Fleſh of Beaſts that either die, d or are killed: But in Summer, ſo long as their *Koſmos*, or Mares-Milk laſts, they care for no other Food. They cut the Fleſh in Slices, and hanging it up in the Air, it is dried by the Sun and Wind, without corrupting, though not ſalted.

Horſe-Puddings,

THEY make better Puddings of their Horſe, than Hogs Guts [d]. Theſe they eat when new-made, reſerving the reſt of the Fleſh till Winter.

Minced Mutton.

THEY ſet the Fleſh of a Ram, minced, in a e Bowl, with Salt and Water, which is all their Sauce, before fifty or an hundred Perſons; and then with the Point of a Knife or Fork, deal more or leſs, according to the Number of Gueſts. But firſt the Maſter of the Houſe takes what he pleaſeth, and if he gives any one of the Company a Part, and the Receiver cannot eat it all, he muſt not give it to any of the reſt, but muſt ſend it home by his Servant, or put it up in his *Saptargat*, or ſquare Wallet, which they f carry with them for the Purpoſe; as well as to put the Bones in, which they have not Time to pick abroad; ſo careful they are, that not a Scrap ſhould be loſt.

THE *Mongols* have ſeveral Sorts of Liquors. We have already mentioned four, uſed in the Courts of the *Khân*, and Princes [e]. Beſides the Wines which come from foreign Countries, they make excellent Drink of Rice, Millet, and Honey, being well-flavoured, and high-coloured, like Wine: But their chief Liquors are the *Koſmos* [f], and *Kara-koſmos*.

THEIR *Koſmos* is made of Mares-Milk, which is as ſweet as that of Cows. Filling a great Skin-Bag with it, they beat upon it with a Club, which has a Knob at one End as big as one's Head, but hollow. As ſoon as they beat, the Milk begins to boil, like new Wine, and turn ſour. They continue this Labour till the Butter comes: Then taſting it, if it be pretty ſharp, it is fit to drink: For it pricks the Tongue like c Rape-Wine, and leaves a Flavour like that of Almond-Milk. It intoxicates weak Heads, is very pleaſant, and diuretic.

KARA-KOSMOS, or *black Koſmos*, is the Drink of great Lords, and made thus. They beat the Milk till the groſſer Part ſubſiding like White-Wine Lees, the purer remains a-Top, like new Whey. The Settlings are given to Servants, and cauſe them to ſleep exceeding ſound. *Rubruquis* ſays, it is an extraordinary d pleaſant and wholeſome Liquor.

BAATU had thirty Dairies within a Day's Journey of his Reſidence, each of which ſupplied him daily with the *Kara-koſmos* of an hundred Mares Milk; in all three thouſand, beſides the white (or pure Milk) which his Subjects brought every third Day, juſt as the Huſbandmen of *Syria* gave their Lords the Third of their Fruits.

OUT of their Cows-Milk [g] they firſt churn Butter, which they boil thoroughly, and then e put it up in Ram-Skins for Winter, without ſalting it: Yet it keeps ſweet, which is owing to the long Boiling it received. When the Butter-Milk has ſtood to be as ſour as poſſible, they boil it, which turns it all into Curds: Theſe they dry in the Sun as hard as the Droſs of Iron; then ſtow it up in Skin-Bags till Winter: At which Time, when Milk fails, they put the Curds, called by them *Gri-ut* [h], into a Skin-f Bottle, and filling it with hot Water, beat it till it is quite diſſolved. This Liquor is very

[a] *Purchas Pilgr.* p. 3, & *ſeq.* [b] Or, *Sagur.* [c] *Purchas*, as before, *p.* 6. [d] It does not follow from this Expreſſion, that they eat Hogs-Puddings at all. The preſent *Eluths* eat no Swine's-Fleſh. See before, *p.* 395; whence it may be preſumed their Anceſtors eat none. [e] See before, *p.* 560. Note h. [f] By other Authors called *Kumis*. [g] In the *French*, Goats-Milk. [h] The ſame which, in *Contarini*'s Time, the *Krim Tartars* called *Tour*.

Tar-tour. They take-care not to drink fair Water alone; but their Slaves muſt be content with muddy Water.

Their Way of milking the Mares is thus: They tie the Foals to a long Rope, extended between two Poſts fixed in the Ground: Then the Dams coming up to them, ſuffer their Teats to be drawn. But if any of them prove unruly, they put the Colt under her to ſuck a While, and then carrying it away again, another Man comes to milk the Mare [a].

The *Koſmos*, and other Drinks, always ſtand on a Bench within, placed on one Side of the Door; and next to it the Fidler. *Rubruquis* ſaw many Sorts of muſical Inſtruments, not known in *France*; but no ſuch Citterns, or Viols, as are in Uſe there.

When they meet to drink, and make merry, they ſprinkle ſome Liquor on the Images, beginning with that over the Maſter's Head: Then a Servant going-out of the Houſe with a Cup full of Drink, ſheds ſome thrice towards the South, in Honour of the Fire, bowing the Knee each Time: He does the like towards the Eaſt, in Honour of the Air: To the Weſt, in Honour of the Water; and to the North, in Behalf of the Dead. Then returning into the Houſe, two others ſtand ready with two Cups, and two Baſons, to carry Drink to their Maſter, and his Wife, ſitting together on a Bed. The former always before he taſtes ſpills ſome on the Ground, or on his Horſe's Neck, if he be mounted. If he has more Wives than one, ſhe, with whom he ſlept the Night before, ſits by him next Day, (at her Houſe) where all his other Wives muſt repair to drink; and for that Day Viſits are received. The Preſents alſo made that Day, are laid-up in her Cheſts.

At theſe Entertainments, when the Maſter of the Houſe begins to drink, one of his Servants cries-out, *Hâ*, and the Muſic ſtrikes-up. But when it is a great Feaſt, they all clap their Hands and dance, the Men before their Maſter, and the Women before their Miſtreſs. The Maſter having drank, his Servant cries *Hâ* again; on which the Muſic ceaſes, and Liquor is ſerved round to both Men and Women: This Courſe is continued often, till the whole Company is drunk. When they would urge any-body to drink, they take him by the Ears, and lug him, till he opens his Mouth to receive it; then clap their Hands, and dance before him [b]. On extraordinary Rejoicings, one of the Company takes a Cup brim-full, and with another on each Side, goes-up, ſinging and dancing, to the Perſon it is deſigned for: But as ſoon as he ſtretches-out his Hand to receive it, they run-back, and then return as before, tantalizing him thus three or four Times, till he becomes jocund, and eager to drink: Then delivering him the Cup, they ſing, dance, and ſtamp with their Feet, till he has drank it off [c]. Rubruquis. 1255.

As the *Mongols* are obliged to buy their Wives, the Maidens are ſometimes very ſtale before they are married, if their Parents have not a quick Sale. They do not wed within the firſt and ſecond Degrees of Conſanguinity; but have no Regard to thoſe of Affinity, not ſcrupling to marry two Siſters even at the ſame Time. Widows never marry again, becauſe they believe all who ſerved them in this Life, ſhall ſerve them alſo in the next, and Wives return to their Huſbands: Yet the Son may marry all his Father's Wives, except his own Mother; for as the Court, or Houſe, of the Father, or Mother, falls to the youngeſt Son, who is conſequently to maintain all his Father's Wives, as being Part of his Inheritance, ſo he makes-uſe of them as his own; but then they are to return to his Father after Death. When the Bargain is ſtruck with the Parent for his Daughter, he makes a Feaſt, and ſhe flies to ſome Relations to hide herſelf. The Bridegroom coming to demand his Wife, the Father-in-law ſays, *My Daughter is yours, go take her where-ever you can find her.* Having thus obtained his Warrant, he, with his Friends, runs-about ſearching; and having found her, ſeizes her as his Property, and carries her home, as it were by Force. After Delivery, the Women never keep their Beds. *Prohibited Degrees.* *And Marriages.*

All Buſineſs, or Labour, is thus divided between the Men, and the Women. The Office of the Men is to make Bows and Arrows, Stirrups, Bridles, and Saddles: To build Houſes and Carts: To keep Horſes, milk Mares, churn *Koſmos*, and Mares-Milk; alſo to make Skin-Bottles, or Bags to put it in. They tend Camels likewiſe, and load them. As for Sheep and Goats, they rear and milk them in common with the Women. With Sheeps-Milk thickened and ſalted, they dreſs and tan their Hides. *Buſineſs of the Men.*

The Buſineſs of the Women is to drive Carts [d], ſet their Houſes on them, and take them down again: To milk Kine, make Butter, and *Gri-ut:* To dreſs Skins, and ſow them: This they perform with Sinews of Beaſts, divided into ſlender Strings, and then twiſted into one long Thread. They make all Sorts of Gar- *Of the Women.*

[a] *Purchas Pilgr.* p. 5, *& ſeq.* [b] In the *French, with him.* [c] *Purchas*, as before, *p.* 4. [d] In another Place, the Author ſays, the Matrons make for themſelves Carts ſo beautiful, that he was not able to deſcribe them, and wiſhed he underſtood Drawing, that he might have repreſented every Thing to the King by Cuts. See *Purchas*, p. 4.

ments,

Great Tartary.

ments, Sandals, and Galloſhes: Alſo Felt, and a cover their Houſes with it.

Cloaths never waſhed.

As to their Cleanlineſs, they never waſh their Diſhes, or Bowls; only when their Meat is boiled they rinſe the Platter, that is to hold it, with the Broth, which they pour back again into the Pot. Neither do they ever waſh any Cloaths; nay, they beat ſuch as waſh, and take their Garments from them; for they ſay, God will be angry, and dreadful Thunder enſue, if ſuch Things be hung-out to dry. They are ſo terrified at b Thunder, that as ſoon as they hear it they drive all Strangers out of their Houſes, and wrapping themſelves up in black Felt, lie cloſe till it is all over. Their Way of waſhing themſelves, is to take a Mouthful of Water, and then ſpurting it gradually into their Hands, waſh both them and their Heads [a].

Exerciſes, Hunting, Hawking.

THE chief Exerciſes of the *Mongols*, are Hunting and Hawking; by which, in a great Meaſure, they ſubſiſt. They catch Beaſts by c incloſing them in a Circle [b]. For the etherial Game, they have Plenty of Falcons, Girfalcons, and other Kinds of Hawks, which they carry on their Right-hand. They put about the Falcon's Neck a Leather-Strap, which hangs half-way down the Breaſt; and when they let him fly after his Prey, with the Left-hand bend-down the Head and Stomach of the Bird, that it might not be toſſed with the Wind, or ſoar too high [c].

2. *Their* Burials, Puniſhments, *and* Prieſts.

Deaths and Burials: Tombs and Sepulchres: Laws and Juſtice: Puniſhments. Mongol *Prieſts foretel future Events: Conſecration of Mares: Deſtroy People in Revenge, or to ſave their Credit, The* Khân's *Juſtice. They raiſe Storms: Raiſe the Devil. A merry Inſtance. Subſtance of the* Khân's *Letter. Remarks upon the* Tartar *Miſſions.*

Deaths and Burials.

SICK People are never ſeen by any, but the Perſon who attends them: So that when any-body falls-ill, and keeps his Bed, a Mark is ſet on his Houſe, that none may viſit him. On this Occaſion Guards are placed round the Courts of great Men, to hinder any from approaching, for Fear ſome evil Spirits, or Winds, ſhould enter along with them.

WHEN a Perſon dies, they make great Lamentation for him. The Mourners are exempt from paying Tribute for one Year: But whoever happens to be in the Houſe at that Time, muſt not enter the *Khân*'s Court for a Twelvemonth, if the Deceaſed be a Man; or for a Month, if a Child. Near the Graves they generally leave one of the Defunct's Houſes. If he be of the Race of *Jenghiz Khân*, his Sepulchre is rarely known: Thoſe of the Grandees have Men appointed to keep them, lodged in the aforeſaid Houſe. *Rubruquis* could never learn, that they buried Treaſures with the Corps [d].

THE *Komanians* (or *Kapchaks*) build a larger Tomb over their Dead, and ſet his Image upon it, with its Face towards the Eaſt, holding a Drinking-Cup before his Belly. On the Monument of rich Men, they erect Pyramids, or little conic Houſes. In ſome Places the Author met-with vaſt Brick-Towers; in others Stone-Pyramids, although there are no Stones to be found in the Neighbourhood [e]. At one Grave he ſaw ſixteen Horſe-Hides hung-up on high Poſts, four towards each Quarter of the Heavens, with *Koſmos* ſet for the Deceaſed to drink, and Fleſh to eat: Yet they ſaid he had been baptized. He obſerved other Kinds of Sepulchres towards the Eaſt, namely, large Floors, or Pavements of Stone, ſome round, others ſquare, with four tall Stones erected at the Sides, each reſpecting one of the Cardinal Points.

WITH Regard to their Laws, Juſtice, and Puniſhments: When two are fighting, no third d Man muſt interpoſe to part them; nay, a Father dare not help his Son: But he who comes by the worſt [f], appeals to the Court of his Lord, and if any Man offers him any Violence after ſuch Appeal, he is put to Death: But then this muſt be done without the leaſt Delay, by the Perſon injured, bringing the Offender with him as his Priſoner.

THEY put no Man to Death for any Crime, unleſs he be taken in the Fact, or confeſſeth it e himſelf: But then they torture the Perſon accuſed, in order to force a Confeſſion. They puniſh Murder with Death; as they do a Man's lying with any Women but his own, that is, his Wife, or Slave. Robbery, or any great Theft, is ſubject to the ſame Penalty: But for ſmall Thefts, as the ſtealing of a Sheep, provided the Party has not been often detected, they apply the Baſtonado with great Severity; and in caſe an hundred Strokes be adjudged him, the Sentence muſt f be executed with ſo many different Sticks. They inflict Death alſo on counterfeit Meſſengers from foreign Princes; and on ſacrilegious Perſons, that is, Witches and Sorcerers [g].

[a] *Purchas Pilgr.* p. 7. [b] The Method is deſcribed at large before, *p.* 363, and elſewhere. [c] *Purchas*, as before, *p.* 6. [d] Yet this is affirmed by others, and found to be Fact. See before, *p.* 399. d. [e] This anſwers to what hath been related before, *p.* 397. b. and confutes *Bentink*'s Opinion thereon. [f] *Who is of fended*, according to the *French*. [g] *Purchas*, as before, *p.* 8.

THE *Mongol* Priests [a] are also Soothsayers, a and very numerous; and whatever they command is performed without Delay: But what the Author relates concerning them, he had from *Boucher*, and other Persons who appeared to him of Credit. These have a Chief Priest, like a Patriarch, whose House always stands about a Stone's-throw from the *Khân*'s Palace; under whose Care are the Waggons which carry their Images: Behind the Palace others reside, in Places appointed for them, who are consulted b by such, from all Parts of the Country, as have Faith in Sorcery. Some of them are well-skilled in judicial Astrology [b], especially their Patriarch; and foretel Eclipses of the Sun and Moon: As soon as these happen, they beat on Drums and Basons, making great Outcries; and when they are ended, rejoice over good Chear, which they never want, the Laity supplying them plentifully, with both Meat and Drink.

THEY declare likewise, what Days are lucky, c or unlucky, for undertaking any Sort of Business. Thus the *Mongols* never raise an Army, or enter-on a War, without their Direction: They would have returned into *Hungary* a long Time ago, says *Rubruquis*, but their Soothsayers will not suffer them. They make all Things that are sent to Court pass between two Fires, and have a Part thereof. They purge the Household Goods of deceased Persons, in the same Manner as they did those which belonged to d Lady *Kota*. Friar *Andrew*, and his Companions, were purified thus on a double Account; not only as he brought Presents, but also because they had belonged to *Ken Khân*, who died not long before: But no such Purgation was required of *Rubruquis*, because he brought none. If any living Creature, or other Thing, happens to fall while passing between the Fires, it comes to the Priests.

THEIR Custom is, on the ninth of *May*, to e bring-together all the white Mares, and consecrate them. The Christian Priests also must assist, with their Censers. On this Occasion they shed some of their new *Kosmos* on the Ground, and make a great Feast; because then they first begin to drink that Liquor, in the same Manner as is done in *France*, with regard to Wine on the Feasts of *St. Bartholomew* and *Sixtus*; or when they taste Fruits on *St. James* and *St. Christopher*'s Days.

WHEN any Child is born, these Diviners are *Rubruquis*, invited to tell his Destiny: They are likewise 1255. sent-for to employ their Charms over sick Folks, and tell whether their Disorder be natural, or the Effect of Sorcery. On this Occasion *Pascha*, before-mentioned, told *Rubruquis*, as he says, the following Story.

SEVERAL costly Furs having been presented *Destroy People* the Lady *Shirina* (the Christian Wife of *Mangu Khân*) the Priests, after drawing them betwixt b the Fires, took more than their Due. She, being informed of this Fraud by the Woman who kept her Treasure, reproved them for it. But some Time after falling sick, and complaining of Pains in all Parts of her Body, the Soothsayers [c] were sent for; who sitting at a Distance from the Patient, ordered one of her Women to put her Hand on the Part where her Lady felt most Pain, and if she found any Thing, to seize it. She did so, and brought away a Piece of Felt; c which by their Command being set on the Ground, began to make a Noise, and creep, as if alive: Then putting it into Water, it was turned into a Horse-Leech. Upon this they boldly affirmed, that she was bewitched; and accused the very Woman, who had accused them before, in relation to the Furs.

THE poor Creature was carried without the *In Revenge*, Tents, and bastonadoed for seven Days successively, to extort a Confession. In the mean Time her Lady dying, she said to them, *Kill me, that I may go after her, for I never did her any Harm.* But the *Khân* being informed, that she confessed nothing, ordered her to be set free. Then they accused the Nurse of the Lady's Daughters, who was married to the chief *Nestorian* Priest. This Person, and a Maid of hers, being put to the Torture, the latter declared, that her Mistress sent her one Day to ask some Questions of a Horse: And the Mistress herself e confessed, that she had given some Charm to her Lady, in order to gain her Favour; but never any Thing to do her a Prejudice. She also declared her Husband was not concerned, having burnt the Characters and Letters she used, that he might not discover any Thing of it. However, she was put to Death, and he sent to be tried by his Bishop, who was then in *Kathay* [d].

SOON after *Mangu Khân*'s chief Wife having *To save* been delivered of a Son, the Priests predicted *their Credit.* f long Life and Prosperity to the young Prince:

[a] They are called *Samans Shammans*, by the *Mongols* and *Eluths*. [b] *Purchas* says, in Astronomy. [c] In the *English* and *French* Translations, they are sometimes called Soothsayers, and Diviners; sometimes Sorcerers, Conjurers, and Wizards: Yet they seem not to have practised Sorcery; but, on the contrary, made it their Business to detect Sorcerers, by their divining Art: They pretended also to expel Devils out of People, like the Priests of the Church of *Rome*; with whom it has ever been a Custom to accuse those of other Religions with Sorcery, though none act more like Sorcerers than themselves. [d] *Purchas Pilgr.* p. 43, *& seq.*

Great Tartary.

But a few Days after the Child dying, the Mother, in a Rage, sent for those Impostors, and reproached them with prophesying falsely. As Deceivers have always their Subterfuge ready, they boldly answered, *Madam, the Nurse of* Shirina, *who was put to Death a few Days before, has killed your Son; and lo! we see that Sorceress carry him away this Instant.* Hereupon the infatuated Lady sent for that unhappy Woman's youngest Son and Daughter, and had them both slain; the first by a Man, the latter by a Woman.

The Khân's *Justice.*

NOT long after, the *Khân* happening to dream of those Children, next Morning asked what was become of them. His Servants having at length informed him, he, much enraged, sent for his Wife, and demanded *how she, being a Woman, durst take upon her to pronounce Sentence of Death, without the Consent of her Husband?* And at the same Time ordered her to be shut-up in a Dungeon for seven Days, without either Meat, or Drink. As for their Executioners, he caused the Man to be beheaded; and the Woman, with his Head hung-about her Neck, to be beaten with Firebrands through the Streets, and then put to Death [a]. He would also have put his Queen to Death, but for the Children he had by her. After this he left his Court, and did not return for a whole Month.

They raise Storms.

THESE Sorcerers (or Priests) can disturb the Air, it seems, with their Charms: But when their Art fails to dispel the Cold, which is extreamly intense about *Christmas*, they accuse, as the Cause of it, some Persons then in the Camp, who are instantly seized, and put to Death. A little before *Rubruquis* left *Karakarum*, these Diviners being sent-for to one of the *Khân*'s Concubines, who had been long sick, they mumbled some Charms over a *Dutch* Slave of hers; the Effect of which was, that she slept for three Days together [b]. When she awaked, they asked what she had seen? She answered, several Persons. These they judged would die soon: But because she did not see her Mistress among them, they declared she would not die that Bout.

Raise the Devil.

IN short, some of these Priests (if you will believe the Friar) raise Devils, in order to learn from them what they want to know. When they require an Answer to any Question which the *Khân* demands, at Night they set boiled Meat in the Middle of the House: Then one of them begins to mutter his Charms, and strikes a little Drum, which he holds in his Hand, forcibly against the Ground: After this he puts himself into strange Agitations, and begins to rave: Then he causes himself to be bound, and at length the Devil comes, in the Dark, and gives him some of the Flesh to eat, and answers his Questions.

AT one of these nocturnal Meetings, as *Boucher* told *Rubruquis*, a certain *Hungarian* having hidden himself in the House where those Conjurers met, to see what passed; in the Midst of their Incantations, they heard the Devil roaring on the Roof, and complain that he could not enter, because there was a Christian among them. The *Hungarian* hearing this, and observing the Priests began to search for him, fled as fast as he could [c]. This is plainly an Invention of our good Catholics, as in all Probability the other Fictions were: But the Author preferring the Character of the believing Fool, to that of the imposing Knave, always takes-care to shift the Imputation of Forgery off himself, by delivering them as told him by others; a Piece of Cunning and Caution rarely to be met-with in the travelling Friars, who by the glaring Falshoods they relate as Eye-Witnesses, seem fond of meriting the Reputation of egregious Liars.

As for the *Khân*'s Letter to *Louis*, it begins thus. *The Commandment of the eternal God is this: There is but one eternal God in Heaven; on Earth let there be but one (Sovereign) Lord,* Chinghîz Khân [d] *(Son of God, and of)* Temingu Tinjey *(or* Chinjey*) that is to say, the Sound of Iron* [e]. *We, whether* Mongols, Naymans, Merkets, *or* Moslemans, *make known by* Mangu Khân, *to* Louis *King of* France, *and all other Lords and Priests,* &c. The Words which follow are many; what is contained in them to the Purpose, but little, and to this Effect: That *David*, who had repaired to him *(Louis)* as Ambassador from the *Mongols*, was a Liar, and Impostor: That the Ambassadors, whom *Louis* had sent-back with *David* to *Ken Khân*, arriving at that Prince's Court after his Death, his Wi-

[a] Why did he not punish the Villain Priests? [b] *Rubruquis* saw her, with her Head still aking, by reason of that Sleep. Rather by reason of something which they must have conveyed into her by the Nose, or Mouth, to cause it. [c] *Purchas Pilgr.* p. 44, *&* *seq.* [d] It is very odd, that this Letter should be penned thus, as if *Chinghîz Khân* was still alive. There is, possibly, some Mistake in the Wording; perhaps it should be rendered, *Let there be on Earth but one* Chinghîz Khân, *or Sovereign Lord*; for so that Word signifies, or, more directly, *Most Great Lord.* See before, *p.* 420. Note a. Yet *Chinghiz Khân*, in *Ascelin*'s Letter, can hardly be taken as an Appellative, or otherwise than as the Name of the Founder of the *Mongol* Empire. [e] For so they still call *Chinghiz*, says *Rubruquis*, because he was the Son of a Smith; though now they call him the Son of God. So ignorant was this Friar as to the Parentage of *Chinghiz Khân*, though he had been so long in the Country. The Words closed within Parentheses, are added from the *French*.

Tar- dow *Kharmis* [a] had diſmiſſed them with a Piece of *Naſik* Silk, and Letters: But that ſhe (who is called a wicked Woman, and more vile than a Dog [b]) could not poſſibly know any Thing relating to Peace or War, or the Good of the State: That the two Monks, whom he *(Louis)* had ſent to *Mangu Khân*, not venturing to take his Ambaſſadors along with them, he had therefore ſent him, by thoſe Prieſts, the Commandment of the eternal God; which was, that in caſe he was diſpoſed to obey the *Khân*, he ſhould ſend his Ambaſſadors to treat of Peace; but that if, on the contrary, truſting in the Diſtance of the Country, Height of his Mountains, and Wideneſs of the interjacent Seas, he made War againſt the *Mongols*, he ſhould then ſee what they could do [c].

THUS we have given the Voyage of *Rubruquis* [d], much reduced in Words; but containing all that is any Way eſſential with reſpect to Geography, Hiſtory, or the Tranſactions of the *Neſtorian* Miſſioners, whoſe Impoſtures and ſcandalous Lives the Author has ſet-forth [e]. Perhaps the *Neſtorians* could, with equal Juſtice, have painted the *Romiſh* Miſſioners in no leſs black Colours; for what Morals, or good Example, could proceed from notorious Liars, ſuch as they appear to be from their own Writings? However that be, when *Rubruquis* talked to the *Khân* of ſtaying to preach the Faith, *Mangu* denied his Requeſt, and, as it were in Contempt, reproached the Chriſtians for not acting agreeably to what their Scriptures taught. *Bergeron* himſelf confeſſes, that *the* Khân *obſerving the Lives of the Chriſtians* (he ſhould have ſaid the Chriſtian Prieſts) *did not correſpond with what they profeſſed, would not hear the Friars, who were ſent by* Louis *to preach the Faith to him, and his People* [f]. Rubruquis, 1255.

AND it is remarkable, that the wicked, debauched Behaviour of the Chriſtians, Clergy as well as Laity, has always been alledged as the Reaſon why Chriſtianity made no Progreſs, or their Miſſions have been deſtroyed in *Aſia*, and other Parts of the World: That Zeal for Intereſt, more than Religion, was the Pope's Motive for ſending his preaching Friars to the *Tartars*, appears, among other Things, from hence, that he received Ambaſſadors ſent from one of their Princes in 1248, to treat with him ſecretly, as it was judged, about attacking *Vaſtas*, or *John Ducas* [g], a Schiſmatic, and Son-in-law of the Emperor *Frederic* II. who was the Enemy of the *Roman* Church, or rather, ſays *Bergeron*, of the Pope [h]: Which ſhews, continues the ſame Author, though a Papiſt, that to revenge themſelves on Chriſtians, as Enemies, they made no Scruple, in thoſe Days, to make Alliance with, and aid the Infidels. *The* Tartar *Miſſions.*

[a] It ſhould, perhaps, be *Khanmis*. The Oriental Authors call her, *Ogul-ganmiſh*. She was put to Death by *Mangu Khân*, for eſpouſing the Intereſt of *Siramon*, purſuant to the Will of *Oktay Khân*; for which the *Chineſe* Hiſtorians bear very hard upon him. [b] The *Tartars* are more polite than to call a Woman a Bitch. [c] *Purchas Pilgr.* p. 45. [d] The *Germans* call him *Ruiſbrouk*; and the *Latin* Manuſcript, *Rubruk*. [e] He has alſo taken Notice of their Hereſies, and idolatrous Rites introduced in their Worſhip: But we were not willing to give the Reader more on the Subject, than we have done. [f] *Bergeron Trait. des Tartares*, ch. 8. [g] Who reigned at *Nice* (in *Bythinia*) now called *Iſnik*. [h] The ſame, from *Matthew Paris*.

CHAP. III.

The TRAVELS *of* Marco Polo, *or* Mark Paul, *the* Venetian, *into* Tartary, *in* 1272.

INTRODUCTION.

Voyage of Nicholas, *and* Matthew Polo: *Return to* Venice. Mark *visits* Tartary: *Honoured by* Kublay: *Returns home. Writes his Relation: If in* Italian, *or in* Latin. *First* Latin *Edition. How the* Polo's *made themſelves known.* Marco *taken Priſoner: Writes his Relation in* Latin. *Nature of the Abſtract.*

Voyag of Nicholas,

IN the Year 1250, under *Baldwin* [a], Emperor of *Conſtantinople*, *Nicholas* and *Maffio* (or *Matthew*) two Brothers of the illuſtrious Family of the *Polos*, embarked at *Venice* for *Conſtantinople*; from whence they ſailed through the *Euxine Sea*, to *Soldaüa* (or *Soldaia*) and travelled to the Court of a great *Tartar* King, called *Barka* [b], who reigned in the Cities of *Bolgara* and *Aſſara*. Having ſtaid there a whole Year, they propoſed to return; when War broke-out between *Barka* and *Allau*, another *Tartar* King. The former being defeated, the two *Venetians* departed that Country by Ways round about, and came firſt to a City named *Oukak* [c]; a little beyond which they paſſed the *Tigris*. Then entering a vaſt Deſart, found neither Men nor Towns till they arrived at *Bokara*, a conſiderable City of *Perſia*, where reſided King *Barak*.

And Matthew Polo.

HERE they remained three Years: At the End of which, a great Lord, ſent from *Allau* to the *Tartar* Emperor, arriving at *Bokara*, by Preſents, engaged them to go along with him; for they could already ſpeak the *Tartar* Language. They took with them certain Perſons they had brought from *Venice*; and ſetting-out, after ſome Months Travel, arrived at the Court of *Kublay*, who received them graciouſly, and aſked them many Queſtions concerning the Laws and Religion of the Chriſtian Countries. At length, it came into his Head to ſend them with an Ambaſſador, named *Kogatal* [d], to the Pope, to deſire of him an hundred learned Men, in order, ſays the Author (who had learned to lie for Sake of his Church) to convince the *Tartar* Prieſts, that the Chriſtian Religion (by which is meant the Popiſh) was not only the beſt of all, but the only one by which Men could be ſaved; and that the Gods of the *Tartars* were no other than Devils, who had impoſed on the Eaſtern Nations to procure Adoration.

THE Emperor gave them a little gold Tablet, with the imperial Arms engraved thereon; which ſerved as a Paſſport through his Dominions, and obliged the Governors every-where to furniſh them with all Kinds of Conveniences. They had ſcarce ridden twenty Miles before the Ambaſſador fell ſo ill, that they were forced to continue their Journey without him. The Roads, it ſeems, were ſo overflowed, that they were three Years getting to *Jazza* [e], a City of *Armenia*: From whence they arrived at *Akra* in *April* 1269, and ſo to *Venice*; where *Nicholas Polo* found his Wife dead, whom he had left with Child; but a Son, called *Mark*, who was nineteen Years old [f]. Two Years after, the two Brothers, and the Nephew, ſet-out with Pope *Gregory*'s Letters, accompanied by *Nicholas* and *William* of *Tripoli*, preaching Friars.

HAVING paſſed by Sea to *Jazza* in *Armenia*, they proceeded by Land; and after a fatiguing Journey, at length arrived at *Klemen fu* [g], a City dependent on the Great *Khân*; who being informed of their Arrival, though at a great Diſtance, ſent forty thouſand Men to meet [h] and eſcort them to his Reſidence. They were honourably received, and ſo highly careſſed, that the Courtiers grew jealous of them. Young *Mark* having learned both to ſpeak and write the four different Languages of the *Tartars*, grew ſo

[a] *Conſtantinople* was taken from *Baldwin* II. in 1261; ſo that the Journey of the *Polo's* could not be in 1269, as the *Baſil* Copy puts it. [b] In the *Baſil* Copy, *Guthak*; in the *Berlin* MS. *Barba*. [c] In the *Berlin* MS. *Grikata*. [d] In the *Baſil* Copy, *Gogacal*. [e] *Glaſia:* In the *Baſil* Copy, *Glaza*. Perhaps *Aryas*, or *Lojazzo*. [f] One Copy makes him ſeventeen; which Years taken from 1269, will bring his Birth to 1252. The *Berlin* Copy makes them ſet out in 1252. [g] In the *Baſil* Copy, *Klemini fu*. [h] A vaſt Number much truly!

much in Favour, by the Account he gave *Kublay* a of the Countries they had paſſed through, their Inhabitants and Animals, that though but ſeventeen Years old, the *Khân* employed him in the moſt important Affairs of State, ſending him to the City *Karakan*, and into different Parts of the Empire. His Method was, after he had executed his Commiſſion, to employ the reſt of his Time in obſerving what was curious in the ſeveral Provinces and Cities, their Situation, and the like. All which he committed to Writing; as b ſet forth in the ſecond Book of his Travels.

SOME Years after, our *Venetians* deſired Leave to return; but the *Khân* was not willing to part with them. However, their Uneaſineſs to be gone being known to the Ambaſſador of *Argon*, King of the *Indies*, who came to demand a Wife for his Maſter out of *Koplay*'s Family, he obtained Leave for them to accompany the Princeſs *Kogatin* [a], in order to do Honour to *Argon*.

QUITTING the Court of *Kublay*, they em- c barked on board a Fleet of fourteen Sail, each loaded with Munition, and carrying four Maſts. They had two gold Tablets for the Uſes before-mentioned; and conducted Ambaſſadors to the Pope and ſeveral other Chriſtian Princes. After three Months Navigation they came to an Iſland called *Java* [b]; from whence croſſing the *Indian Sea*, they arrived at the Court of *Argon*, who being dead, the Princeſs was given to his Son. The *Venetians* having obtained two other Tablets from d *Khiakato*, who governed the Kingdom during the Minority, departed; and, after many Fatigues, arrived firſt at *Trabeſond* and *Conſtantinople*, then at *Venice*, in 1295, loaded with Honour and Riches.

THIS is the brief Account which *M. Polo* gives of his Travels, and the Occaſion of them, in the firſt ten Chapters of the Work which he compoſed after his Return. There are ſeveral Tranſlations and Editions of this Work in different Languages. It was firſt publiſhed at *Liſbon*, tranſ- e lated into *Portugueze* in 1502, along with two other Voyages, *viz.* thoſe of *Nicholas* the *Venetian*, or *de Conti* [c], who had been twenty-five Years in the Eaſt, about the Year 1400; and that of *Jerom de St. Stephen*, a *Genoeſe*, in a Letter written from *Tripoli* to a *German* Friend, in 1499. It was chiefly by the Lights given by theſe three Authors that the *Portugueze* began and proſecuted their Diſcoveries of the *Eaſt-Indies* by the *Cape of Good Hope*; and it f was with a View to promote this great Deſign that thoſe Voyages were publiſhed [d].

Introduction.

IT is a Doubt among the Learned, whether the Author wrote his Travels originally in *Latin* or *Italian*. But, *Muller* ſays, it is eaſy to judge by the Prefaces of the two *Latin* Tranſlations, that it was written in *Italian*. The firſt of thoſe Verſions was made at *Bolonia*, by *Francis Pepin*, a Contemporary of *Polo*'s; which is a ſtrong Argument of its having been written in *Italian*. The ſecond was made in *Germany*, and ſaid in the Preface to be done from the *Italian* written by *Mark Polo* himſelf. *Muller* cannot ſay, that the Copy publiſhed by *Ramuſio*, in 1553, was from the Original. But, in 1590, there was an *Italian* Edition, printed at *Treviſo*, which *Muller* had not ſeen; and which, we are told by *Bergeron* [e], was printed from the Original writ- *Or in Latin.* ten by the Author himſelf, in the Language of that Age, which differs from that ſpoken when *Ramuſio* wrote; as appears by comparing the Titles of both Copies together.

THOSE who think *Polo* wrote in *Latin* ſay, that he was long in Priſon at *Genoa*, and compoſed his Book during his Confinement: That ſome Time after it was tranſlated into *Italian* by an Inhabitant of that City; and that from thence a new *Latin* Verſion was made by a *Franciſcan*. But *Muller*, from whom this Paſſage is taken, could find nothing certain relating to *Polo*'s Impriſonment.

THE firſt of the two *Latin* Tranſlations before-mentioned was never printed; but there is a Manuſcript Copy of it at *Padua*, in the Library of the Canons of *Latran*, in the Verger of St. *John*; and another at *Berlin*, in the King of *Pruſſia*'s Library.

THE ſecond *Latin* Tranſlation, made in *Ger-* *Firſt Latin* *many*, was firſt publiſhed ſingly at *Baſil*, under *Edition.* the Title of *Marci Pauli Veneti, de Regionibus orientalibus, libri tres*; and then inſerted in the *Novus Orbis*, or *Collection of Voyages* by *Simon Grynæus*, which has gone through many Editions; the firſt at *Paris*, in 1532. Two Years after, a *High-Dutch* Tranſlation of *Grynæus*'s Copy was printed at *Straſburg*, by *Michael Herrius*.

THE next Edition of the Work was the *Italian*, by *Ramuſio*, in 1553, before-mentioned, under the Title of *De i Viaggi di Meſſer Marco Polo Gentilhuomo Venetiano*, &c. In 1585 it was publiſhed in *Latin*, along with other Tracts, at *Helmſtad*, by *Reinerus Reineccius*.

IN 1590, the *Italian* Edition before-mentioned *The Original* was publiſhed at *Treviſo*, under the Title of *Italian.* *Marco Polo* [f] *Venetiano delle Maraviglie del Mondo*

[a] *Berlin* Manuſcript, *Koganin*. [b] In the ſame, *Jana*. [c] *Ortelius* calls him, *Nicholas des Comtes*. *Poggius*, the Pope's Secretary, wrote it in *Latin* from the Mouth of the Author. It is to be found in *Ramuſio*, *Purchas*, and other Collectors. [d] See *Muller*'s Preface to his Edition of *Mark Paul*'s Voyages. [e] *Traite des Tartares*, ch. 9. [f] Hence, with ſome, we chuſe to name him *Polo*, rather than *Paolo*, or *Paulo*, as others write.

Introduction. *per lui Vedute.* *Jerom Megiſerus* compoſed a Chorography of *Tartary* upon the *Italian* Text of *Ramuſio*, which he printed at *Leipſic* in 1611. And, in 1625, *Purchas* inſerted an *Engliſh* Tranſlation from *Ramuſio*'s Copy in his great Collection of Voyages. In 1664, a *Dutch* Tranſlation from the *Latin* of *Reineccius* was publiſhed at *Amſterdam* by one *J. H. Glazemaker*, along with the Relations of St. *Stephen* and *Haiton*.

Muller's Edition. LASTLY, in 1671, *Andrew Muller*, of *Greifſenhag*, publiſhed, at *Berlin*, a new Edition of the *Latin* printed at *Baſil*: A *French* Tranſlation of which is inſerted in the Collection of ancient Voyages into *Aſia* printed at the *Hague* in 1735 [a].

And Improvements. THIS Edition of *Muller*'s is the ampleſt that has yet been publiſhed: For, beſides a Diſſertation on *Katay*, Judgments of ſeveral Writers on the Work, with his own Remarks upon, and Defence of it, he hath compared the *Baſil* Copy he makes uſe of with the *Berlin* Manuſcript, and the *Italian* of *Ramuſio*, by ranging ſeveral of the diſcording Paragraphs in oppoſite Columns. He likewiſe obſerves, that the Numbers of the Chapters do not always agree; and that there are two added in the *German* Edition, which are not found in any of the reſt. What is more ſurpriſing, ſays *Muller*, is to find ſeveral Paſſages reported by the Moderns as if taken from the Work of *Polo*, which are not to be found in any of the printed Editions. Several of theſe Paſſages are likewiſe cited by him.

Polo diſcovers more *RUBRUQUIS* and *Polo* are the moſt remarkable of all the early Travellers into *Tartary*. Their Relations too have their peculiar Excellencies and Uſes in Geography; as the firſt made known the Northern Parts of *Tartary*, the latter the Southern. *Rubruquis* hath alſo given a very exact Account of the Cuſtoms and Manners of the *Mongals*: But then his Journey lay all through the Deſarts; whereas *Polo* travelled through fruitful Countries, ſtored with Cities, as well as Inhabitants. *Rubruquis* went no farther than *Karakarum*: But *Polo* proceeded by ſeveral Roads to the Eaſtern Bounds of the Continent; and deſcribes in Order the Provinces and Cities of *Little Bukhâria*, *Tangut*, and *Katay*, as well as the neighbouring Regions of *Tartary*; whereof the other hath given but very imperfect and confuſed Ideas.

Than the Portugueze. OUR *Venetian* did not ſtop here; but launching on the oriental Ocean, he ſailed round to *India*; a Courſe which none of the ancient *Greeks* or *Romans* themſelves had performed; and landing there, travelled home through *Perſia* and *Turky*. Not content with the Knowledge of thoſe Countries he had ſeen, he enlarged it conſiderably by his Enquiries; and brought home Informations concerning all the maritime Countries of *Aſia* and *Africa*, from *Japan*, Weſtward, to the *Cape of Good Hope*.

As a farther Proof of this, we are aſſured, that one of his Maps of the World is kept in *St. Michele de Murano*, at *Venice*; wherein is diſtinctly marked the Cape called ſince then the *Cape of Good Hope*, the Coaſt of *Zenzibar*, or *Zenjibar*, and the Iſland of *St. Laurence* [b], as they are at preſent named [c]. From hence it appears, that the *Portugueze*, in their famous naval Expeditions, Eaſtward, at the End of the fifteenth and Beginning of the ſixteenth Centuries, did but diſcover, and that from *Polo*'s Lights, Part of thoſe Regions which he had diſcovered two hundred Years before. It was not till the Beginning of the ſeventeenth Century that the *Europeans* began to follow him into *Tartary*; but with ſo ſlow a Pace, that from his Time, till the late Travels and Surveys made by the Jeſuit Miſſioners, they had viſited ſcarce a third Part of the Countries he deſcribes. Indeed, *Polo*, in travelling by the *Khân*'s Orders, or in the *Mongol* Armies, had an Advantage which none of thoſe who went before the Miſſioners could boaſt of.

HOWEVER, it muſt be confeſſed, that the Relation of *Polo* is full of Imperfections: For, firſt, the Names are often ſo faultily written, that there is no Poſſibility of knowing what Places they belong to: The Difficulty is farther increaſed by his giving frequently to the *Chineſe* Cities and Provinces, the *Mongol* Names then in Uſe; many of them at preſent not known perhaps to the *Mongols* themſelves. Had he given the *Chineſe* Names alſo, it would have been of ſingular Uſe. How long was it before it was diſcovered, that *Khân Balu*, or *Palu*, is *Pe-king*, *Quin-ſay*, *Hang-chew*, &c? However, this is not charged as a Fault in our Traveller, and may prove an Advantage to Geography in Time.

SECONDLY, he took no Latitudes of Places, nor are the Diſtances and Bearings much to be depended on: For either they are frequently ſet down very erroneouſly, or elſe the Countries do not regularly follow one another in the Order he deſcribes them; ſo that one cannot lay them down in a Map with any Juſtneſs from his Account; which alſo is exceeding ſuperficial [d], and mentions very few of the Towns belonging to each.

As to the hiſtorical Part of his Relation, it is full of Errors and Fables. Of the laſt Kind is his affirming, that twenty thouſand Men, of thoſe met on the Road, were ſlain at *Mongu*

[a] See before, *p.* 544. [b] Rather *Madaigaſcar*, as *Polo* in his Book calls it. But he makes *Zanzibar* an Iſland, *lib.* 3. *cap.* 39, and 41. [c] See *Giornal. de Litter. ann.* 1686. vol. 1. p. 72. [d] He does little more than mention *Karakoram*, then the Summer Capital of *Tartary*.

Khân

Introduction.

Khan's Funeral [a]; becauſe the Number is exceſſive, nor are the Roads there ſo thick of People. One may travel many Weeks and not meet with the tenth Part of the Number. He ſays, there are two Diſtricts in *Tenduk*, called *Gog* and *Magog* [b], which is a palpable Falſity. Can anybody believe what he ſays of the *Tartar* Magicians (or Prieſts) raiſing Storms, yet leaving the *Khân*'s Palace free from Wind; and making the Diſhes leap of themſelves from the Buffet to the Table [c]? Yet theſe Things are all related as of his own Knowledge. *Polo* was certainly as hard-mouthed as any of the Friars. His Account of a holy Man removing a Mountain, near *Tauris*, in *Perſia* [d], ſhews, he made no Scruple any more than they, to tell a Lie to ſerve his Religion. Hence he may well be ſuſpected of aſſerting a Falſhood, when he ſays, moſt of the Inhabitants of *Preſter John*'s Country were in his Time Chriſtians [e].

AMONG the Errors with which his Work abounds, he makes *Chinghiz* King of the *Tartars*, and tributary to *Ung Khân*, or *Preſter John* [f]: He likewiſe gives us for his immediate Succeſſors, *Kui*, *Barkhim*, *Allau*, *Mongu*, and *Kublay* [g]; whereas they were *Ogotay*, or *Oktay*, *Kayuk*, *Mangu*, and *Kublay*. Is it poſſible, that our *Venetian* could have given no better Account of Things, if he underſtood the Languages, and was in ſuch Favour at Court, as he pretends?

HENCE there is Room to ſuſpect, that he never was either in *Tartary*, or *Katay*: For why might he not have penned all he hath written of thoſe Countries from the Reports of others, as well as moſt of what he relates of other Countries and Iſlands, which make the greater Part of his Work, and are, for the general, more exactly deſcribed? His Account of the ſeveral Parts of *India*, and Coaſts of *Africa*, ſeems to be taken from the Books or Mouths of the *Mohammedans* [h]; moſt of the Names being ſuch as are given them by the *Arabian* and *Perſian* Authors.

HAD our *Venetian* been really on the Spot, with thoſe Advantages he had of informing himſelf, how is it poſſible he could have made not the leaſt Mention of the Great Wall; the moſt remarkable Thing in all *China*, or, perhaps, in the whole World? It is in vain to ſay with *Martini*, that he entered *China* by the Southern Provinces, in the *Tartar* Army: For he begins his Itinerary from the Weſt, through *Kaſhgar*, and the reſt of *Little Bukhâria*, to *Kamul*, or *Kamil*, the laſt Town of it, in the Edge of the little Deſart between that Country and *China*, from whence the Road paſſes to *Sukkuir* and *Kampion*, where it divides; one ſtriking Northward to *Etzina* and *Karakarum*; the other Eaſtward to *Shandu*, one of the Capitals of *Tartary*, juſt without the Great Wall, to the North of *Kambalu* or *Pe-king*. Now, if *Sukkuir* be *Su-chew* at the Weſt-End of the Wall, and *Kampion*, *Kan-chew* [i], a little to the South of the Wall, how could he have travelled any of theſe Roads without paſſing through or ſeeing the Wall? The like he muſt have done in his Way between *Shan-du*, or *Shan-tu*, and *Khân-balu*. After all, ſuppoſing he had not ſeen this Wonder of *China*, he could not poſſibly but have heard of it.

The Great Wall.

IN ſhort, the moſt we can do in Favour of *Polo* is to ſuppoſe, that in Caſe he was in the Countries, which he deſcribes as an Eye-Witneſs, he never kept a regular Journal of his Travels, as he pretends; but when he returned to *Venice*, drew-up his Relation on the Strength of his Memory, which in many Things deceived him; and inſerted, as his own Remarks, the idle Reports of others, which he had taken for granted, without farther Enquiry. It would be no difficult Matter for a Perſon, who had converſed much with Travellers into thoſe Parts of the World, to ſit down and write a much better Relation than *Polo* has done; notwithſtanding, it muſt be confeſſed, that he is the Father of modern Diſcoverers, and led the Way to all the reſt.

His Relation, how written.

WE muſt not forget to obſerve with regard to his *Preſter John*, that he is quite a different Perſon from the *Preſter John* of *Rubruquis*, *Carpin*, and others; who, indeed, properly, have each a *Preſter John* of his own. *Rubruquis* places the Country of King *John* within (or to the South of) the Mountains of the *Karakitayans*; but ſays, on *Kon Khân*'s Death, he ſeized his Dominions, which lay beyond (or to the North of) thoſe Mountains: That his Brother *Vût* was Lord of the Countries Eaſtward of him, as far as *Karakarum*; and that his Subjects called *Krit*, or *Merkit*, were *Neſtorians* [k]. *Carpini* makes *Preſter John* King of *Greater India* [l]. *Zakut*, the *Jew*, in his Chronicle, does the ſame; and calls him *Unad Khân* [m], by a Miſtake, perhaps, of the Tranſcribers, or Preſs, for *Ung* (or *Vang*) *Khân*. *Abulfaraj*, who calls him by this laſt Name, ſays, King *John* was Sovereign of the Eaſtern *Turks*, and ſprung from the Tribe of *Kerrit* [n] (or *Kara-it*) which inhabited to the North of the

Moguls

Introduction. *Moguls* and *Naymans* [a]. But *Polo* differing from all the reſt, places his *Preſter John* in the Province of *Tenduk* [b]; which, according to the Courſe of his Itinerary, muſt have been ſituate in the Parts ſtored with Cities, near the Great Wall, to the North of *Shan-ſi*. Thus this imaginary Chriſtian Prieſt, and King, like the *Will-with-a-Wiſp*, or *wandering Jew*, is every-where and no-where.

Great Lama *the firſt.* HOWEVER, from theſe obſcure and diſcording Accounts, ſome Light may be drawn: For *Carpin* and *Zakut* place the *Preſter John* originally in the *Greater India*; by which we underſtand *Tibet* (which till of late was always taken for a Part of *India*) and this is in ſome Meaſure confirmed; for that *Rubruquis* places the Country of *Preſter John* to the South of the Mountains of *Karakitay*, which correſponds with the Situation of *Tibet*. Suppoſing this to be the Caſe, by *Preſter John* muſt be underſtood the *Grand Lama*, who from the Similitude of Religions, was by the *Neſtorians* repreſented, and by the *Mohammedans* miſtaken, for a Chriſtian Prince.

Ung Khân *the ſecond.* THIS *Preſter John*, of *India*, it ſeems, ſeized the Dominions of *Kon Khân*, after his Death, and thus paſſed into *Tartary*. The Subjects of his Brother *Vut*, whoſe Territories lay next Eaſtward, are ſaid to be *Neſtorians*; and thus he became intitled to the Name of *Preſter*: For it is manifeſt, that the *Vut* of *Rubruquis*, the *Unad* of *Zakut*, the *Un*, or *Unk*, of *Polo*, the *Ung* of *Abulfaraj*, and *Vang* of the *Chineſe* Authors, is the ſame Perſon; that is, the *Khân* of the *Karaits* (called by the *Neſtorians*, the *Preſter*, and *Chriſtian King*) who was ſlain by *Chinghiz Khân*: But as we have already obſerved, that neither the *Tartar*, *Perſian*, nor *Chineſe* Hiſtorians, mention him under the laſt Character [c]; ſo it is remarkable, that *Hayton* the *Armenian* ſpeaks not a Word of any ſuch Perſon as the *Preſter John*, or *Chriſtian King*, throughout his Hiſtory of the *Tartars*.

How the Polo's IT would be wrong to cloſe this Article, without relating what *Ramuſio* has added, in his Preface, to ſupply the Account given by *Polo*, concerning our three Travellers, after their Return to *Venice*. When they came to that City, none knew them; every one concluding they were dead: Beſides, their Voyage had ſo altered them, that they ſeemed rather *Tartarians* than *Italians*; having in a Manner forgotten their native Language, and being clad in thick Cloth like thoſe People. They went to their Houſe in *St. John Chryſoſtom*'s-*Street*, which is ſtill to be ſeen, then a fair Palace, and now called the Court of the *Millions*; our Author having gotten the Name of *Mark Millions* [d]: Becauſe, in ſpeaking of the *Khan*'s Treaſure, he never reckoned by leſs than Millions.

THEY found there ſome of their Kindred; but being at a Loſs how to make themſelves known, they invited ſeveral of their Relations to a ſumptuous Feaſt. They received their Gueſts firſt in Crimſon Satin; when the Company being ſeated to Dinner, they appeared in Crimſon Damaſk; and at the next Courſe in Crimſon Velvet; and, laſtly, in the common Habit; ſtill giving thoſe they threw-off to the Waiters. Dinner ended, and the Servants withdrawn, *Marco* brought forth their Cloth-Coats which they came home in; and ripping the Lining in ſeveral Places, let-fall on the Table a vaſt Quantity of precious Stones; which they had thus conveyed ſafely through their long Journey from the Court of the *Khân*, of whom they had received them [e].

MAFFIO (or *Matthew*) was made a Magiſtrate of *Venice*, and all were highly reſpected. A few Months after, *Lampa Doria*, General of the *Genoeſe* Fleet, arriving at the Iſle of *Curzola* with ſeventy Galleys, *Andrea Dandolo* was ſent againſt them with another, in which *Marco* was made a Captain: But his Galley happening to be taken by the Enemy, he was carried to *Genoa*; where he continued a long Time a Priſoner, all Offers of Ranſom being rejected. Hereupon his Father, that he might not leave his Wealth without an Heir to inherit it, married again, and had three Sons. But, at length, *Marco*'s Merit obtaining for him that Liberty which no Money could purchaſe, he returned to *Venice*; where taking a Wife, he had only two Daughters, called *Moretta* and *Fautina*. The three Brothers alſo by the ſecond Venter died without Male Iſſue; and ſo the Family of the *Polo's* became extinct in 1417.

WHILE *Marco* was Priſoner at *Genoa*, his Story being ſoon made public, a certain Gentleman, who daily viſited him, urged him to write an Account of what he had ſeen. *Marco*, at length, complying with his Requeſt, ſent to *Venice* for his Notes; and, by the Help of that Gentleman, penned his Relation. The Book was firſt written in *Latin*, and thence being tranſlated into *Italian*, became common through *Italy*. One of the *Latin* Copies, tranſcribed from *Marco*'s Original, *Ramuſio* compared with the *Italian* Copy which he publiſhed. This was lent him

[a] See before, *p.* 415. *Rubruquis* gives him the *Naymans* for his Subjects. [b] Book 1. ch. 64, and p.
[c] See before, *p.* 448. [d] *Meſſer Marco Millioni.* [e] This was told *Ramuſio* by the *Magnifico Miſſer Goſpa Malipiero*, a very old Gentleman of great Integrity, from the Report of his Father, Grandfather, and others

by a *Venetian* Gentleman of the *Ghiſſi* Family, his Friend; who ſet a great Value on it. This Copy had two Prefaces in *Latin*, one compoſed by the *Genoeſe*, who aſſiſted *Marco* to write in 1298 [a]; the other by *Franciſco Pepino*, a preaching Friar, who tranſlated the Work out of the *Italian* into *Latin*, in 1322.

BUT what Occaſion was there for that, in caſe it was firſt written in *Latin*? *Ramuſio* ſays, this happened becauſe no Copy of the original *Latin* had fallen into *Pepino*'s Hands, or been ever b ſeen by him. But this Tranſlator, in his Preface, ſpeaks as if he had been utterly ignorant of ſuch *Latin* Original; and ſays, the *Italian* he made-uſe of was written by *Polo* himſelf. *Pepino*, however, did not give a compleat Tranſlation, but abbreviated the Work; and, perhaps, gave Occaſion, ſays *Purchas*, to that Corruption, which was afterwards increaſed by others [b].

OUR Extracts from *Polo* will be chiefly confined to the Countries he travelled through: Nor c ſhall we pretend to ſettle the Geography of every Place; for out of a great Number which he mentions, the modern Names of but a very few are with Certainty known: To give a thorough Comment upon ſuch an Author, would be the Buſineſs of a particular Work.

SECT. I.

The Author's Journey *from* Venice *into* Tartary.

Lands in Armenia. *Road from* Kerman. Kobinam *City*. Timokaim *Kingdom*. Mulehedah, *or Aſſaſſins*. Sapurgan *City*. Badakſhân *Province*. Baſſia *and* Kaſhmîr. Vokan *Province*. *Great Lake and River*. Samarkand *City*. Karkan. Kotam. Peim. Charchan. Lop *City, and Deſart*. Sakion *City, burn their Dead*. Khamul *Province*. *Obliging Huſbands*. Kinkintalas. *Incombuſtible Cloth*. Sukuir. Kampion *City*. *The Road divides*.

MARCO POLO does not give a regular Journal of his Travels, but only deſcribes Countries ſomewhat in the Order which he had a ſeen them. The firſt Country he tells us he entered, was *Armenia Minor*, where is the Port of *Jazza* [c], a Place much reſorted to by Merchants. He deſcribes very briefly, according to his Cuſtom, that Country, *Turky*, *Greater Armenia*, *Zorzania* (or *Georgia*) with the Kingdoms of *Moſul* and *Baldak* (or *Baghdâd*) divided by a River, which ſeventeen Stages thence enters the Sea at *Kiſi* below *Balſara* [d], Afterwards he ſpeaks of the City *Tauris*, and then of *Perſia*, which he ſays is famous for Horſes. The next Place he mentions is *Yazd*, a great and rich City, between which, and *Kermain* [e], there are no Habitations. This is a great City, famous for *Turcois* Stones. Marco Polo, 1272.

FROM thence the Road lies through a vaſt Plain, where, at the End of ſeven Days, you come to a Deſcent, which continues ſenſibly for two Days Journey; and then you enter into a large Plain, where was a great City, called *Kamandu*, deſtroyed by the *Tartars*, the Country named *Reobarle* [f]. Here the Oxen have Bunches on their Backs, and the Sheep are as large as Aſſes, with huge Tails, weighing thirty Pounds. This Region is full of Cities, but infeſted by Robbers, called *Karawnas* [g]. Theſe encamp like Armies ten thouſand ſtrong, under *Nugodar*, Nephew of *Zagathay* (the Great *Khân*'s Brother) who ruled in *Greater Turky* [h]. This *Nugodar* hearing of the *Malabars*, ſubject to *Soltân Aſidin*, went and d took *Deli*, with other Cities, and erected a new Principality. His People mixing with the *Indian* Women, begot the *Karawnas* [i], and there learned to darken the Day for a long Time, that none may perceive their Approach. *Marco* once, by that Means, had like to have fallen into their Hands (as ſome of the Company did) but eſcaped to *Kouſalmi* [k], a ſtrong Caſtle [l]. At the End of the Plain, which extends five Days South, the Road deſcends, and is very bad for twenty Miles: e Then you enter the fine Plains of *Ormus* [m], which bring to the Sea, where is an Iſland with a City in it, called *Ormus* [n], reſorted by Merchants from *India*. It is Capital of the Kingdom of *Kermain*, and its King, *Rukmedin Achmach* [o], is ſubject to that Crown. He not pay- *Road from* Kerman.

[a] In this Preface it is ſaid, that the Remarks contained in his Relation are few, in Compariſon of what he could have ſet-down, had he imagined he ſhould ever have returned to *Italy*. [b] See *Purchas Pilgr.* vol. 3. p. 68, *&* *ſeq.* [c] Where he firſt landed. See before. [d] But the true Name is *Baſrah*: *Europeans* write it thus. [e] Rather, *Kermân*: In the *Latin* of *Baſil*, *Crermam*: In that of *Berlin*, *Crerinam*. [f] The *Berlin* Manuſcript has *Reolbarde*; but we meet-with no ſuch Places in *Perſia*. [g] In the *Baſil* Copy, *Karaons*. [h] That is, in *Great Bukhâria*, and the adjoining Countries. [i] What relates to *Nugodar* thus far, is not in *Muller*'s Copies, which differ much from *Ramuſio*'s. [k] In the ſame, *Kanoſalem*. [l] *Purchas*, as before, vol. 3. p. 69, *&* *ſeqq*. [m] The *Baſil* Copy has, called *Formoſa*: That is, *beautiful*; for we do not take *Formoſa* for a proper Name. [n] In the *Baſil* Copy, *Cormoſa*: In the *Berlin*, *the Cormiers*; which ſignifies, *the Service Trees*. This Place is alſo made a City on the Coaſt. [o] A Miſtake, doubtleſs, for *Rokn-addin Mahmud*, twelfth King of *Ormuz*, who died in 1278, after reigning thirty-five Years. See *Teixeira*'s Hiſtory of *Perſia*, p. 385. But none of this is found in the *Baſil*, or *Berlin* Copies; which ſhews that of *Ramuſio* to be more perfect and exact; as for the general it is.

Little Bukhâria.

ing the Tribute, the King of *Kermain* ſent five a thouſand Foot, and fifteen hundred Horſe, againſt him: But they were all deſtroyed by a ſuffocating Wind, which blows there. Their Ships have but one Maſt, Sail, and Deck; and are faſtened with Wooden-Pegs, and Ropes made of Cocoa-Huſks, inſtead of Iron-Pins, the Wood being too brittle: Hence many of them are loſt in croſſing to *India*.

Kobinam City.

RETURNING from *Ormus* to *Kermain*, and leaving that City, in three Days you come to b a Deſart, which extends as far as *Kobinam* [a], ſeven Stages diſtant, and affords only brackiſh Water, which cauſes the Flux in Man and Beaſt. *Kobinam* is a great City, where Steel-Mirrors are made; alſo *Tutia*, good for the Eyes, and *Spodio*. They take a certain Earth, which they put into a Furnace, and thence ariſeth a clammy Vapour, which ſticks to an Iron-Grate above; this is called *Tutia*, and the groſſer Matter remaining in the Fire, *Spodio*.

Timokaim Kingdom.

BEYOND *Kobinam* is another barren Deſart, c eight Days over, yielding only bitter Water. From thence you enter the Kingdom of *Timokaim*, ſituate in the Northern-Borders of *Perſia*. It is full of Cities, and the moſt beautiful Women in the World. In a great Plain, where the Inhabitants ſay *Alexander* fought with *Darius*, there is a great Tree, called *the Tree of the Sun*, and *the dry Tree*. It is large, ſolid, and yellow, like Box; the Leaves green on one Side, white d on the other: It bears prickly Huſks, like thoſe of Cheſnuts, but nothing in them.

Mulehedah, or Aſſaſſins.

LET us now ſpeak of the Country, called *Mulehet*, that is, in *Arabic*, a Place of Heretics. The People are named *Mulehetici* [b], or *Heretics*. Their Prince *Aloadin* [c], was called *the old Man of the Mountains* [d]. He had in a Valley fine Gardens, with handſome Girls, in Imitation of *Mohammed*'s Paradiſe. The Entrance of the Valley was defended by the ſtrong Caſtle. He had e alſo a Number of Youths, ſeveral of whom from Time to Time being made to ſleep, were carried into this Paradiſe, where they were amuſed for four or five Days; and then, in another ſound Sleep, conveyed back to their Maſter; who queſtioning them concerning the Place, which they believed to be Paradiſe, promiſed it to ſuch as ſhould defend their Lord. This Hope made theſe *Aſſaſſins* undertake any Thing he commanded, and many Princes were ſlain by them. He had two Subſtitutes, one near *Damaſcus*, the other in *Kurdiſtân*. He uſed to rob all who paſſed that Way: But *Ulau* [e] took his Caſtle by Famine, after three Years Siege, and put him to Death [f].

DEPARTING hence, you enter a pleaſant fruitful Country; in which having travelled ſix Days, you croſs a Deſart forty or fifty Miles over, and come to the City *Sapurgan* [g], famous for excellent Melons. From thence they came to *Balak* [h], a great and ſumptuous City, till deſtroyed by the *Tartars*. It ſtands on the Borders of *Perſia*. Proceeding thence East North-East, in two Days they came to the Caſtle *Thaikan* [i]. Some of the high Mountains, to the South, are of the fineſt Rock-Salt. Three Days farther, through a good Country, but murderous People, is *Skaſſem*, a City with many Caſtles in the Mountains. A great River runs through it. The People have a peculiar Language. The Coun- c try breeds Porcupines. Three Stages forward, through an uninhabited Region, is the Province of *Balaxiam* [k], whoſe Princes are *Mohammedans*, and being deſcended from *Alexander*, are ſtiled *Zulkarnen* [l]. Here are found the precious Stones called *Balaſſes*, beſides excellent Azure, and Horſes. The Country produces Store of Grain, Nut-Oil, and that made of *Suſiman* (or *Seſamum*.) The People go clad with Skins. The Paſſes in the Mountains are well fortified. The Women, d in the Skirts of their Garments, put ſixty or eighty Yards of Cotton.

TEN Days South of *Balaxiam*, is the Province of *Baſſia* [m]. The Country hot, People brown, and Idolaters. Seven Days thence is the Province *Keſmur* [n]: The Inhabitants Idolaters alſo, with a peculiar Language. They eat Fleſh of Animals, killed by the *Mohammedans*, among them; but kill none themſelves: Are exceeding lean, yet live long. Here are Hermits, who obſerve great Abſtinence and Celibacy. Coral bears e a great Price. The King is independent.

BUT to purſue the direct Road East North-East to *Katbay*. Beyond *Balaxiam* is a River [o], whereon ſtand many Caſtles and Villages belonging to that King's Brother. Three Stages farther is the Province of *Vokan*, three Days Journey in Length and Breadth, abounding with Game. The Inhabitants are warlike, have a peculiar Language, and worſhip *Mohammed*.

[a] *Del Iſle* places *Kobin*, or *Kunin*, near the City of *Sageſtân*, in the Province of the ſame Name. [b] Properly, *Molahedah*. See *p.* 567. a. [c] *Ala'ddîn*. [d] In *Arabic*, *Sheykh al Jebâl*, that is, *Lord of the Mountains*. [e] *Hulaku*. [f] *Purchas Pilgr.* p. 71, & *ſeq.* [g] Perhaps, *Niſhapur*. [h] Or, *Balk*. *Purchas* ſuppoſes it to be *Balduk*. [i] The *Berlin* Copy has *Caycam*. Doubtleſs it ſhould be *Talkan*, which lies about the ſame Diſtance from *Balk*. [k] *Badagſhân*, or *Badakſhân*. See before, *p.* 519. [l] Rather, *Zu'lkarnayn*, as the *Perſians*, and *Dhu'lkarnayn*, as the *Arabs*, pronounce the Word; which ſignifies, *the Lord of the two Horns*, in Alluſion to the Eaſtern and Weſtern Empires. [m] In the Copies, *Baſcia*. [n] In the Copies, *Choſmur*: This is *Kaſhmîr*. [o] *Badakſhân* itſelf ſtands on a large River, the *Amû*. It is ſtrange he does not mention it.

HENCE

HENCE proceeding East North-East, you a ascend for three Days, and come to the higheſt Mountain in the World; where, between two great Hills, is a large Lake, whence runs a fine River through a Plain [a]: Near it are charming Paſtures, and wild Sheep, with Horns ſome ſix Spans long, of which they make divers Sorts of Veſſels. This Plain, called *Pamer*, is twelve Stages long, but quite uninhabited, and ſo cold, that no Birds are ſeen. From hence the Road lies East North-East forty Days farther, through b the Mountains, Hills, and Valleys; in which are many Rivers, but no Habitations, or any Herb. The Country is called *Beloro* [b]. The Tops of the Mountains, indeed, are inhabited by a wild idolatrous People.

AFTER this, they came to the Province of *Kaſkar* [c], five Stages in Length, tributary to the Great *Khân*. The Soil is fertile, producing Fruit, Wine, Cotton, Hemp, and Flax. The Inhabitants are Merchants, Artificers, and have a c Language of their own: So covetous, that they eat bad Diet. There are ſome *Neſtorians* among them who have Churches.

SAMARKAN is a large and famous City in this Country [d], abounding with Gardens and fruitful Plains, ſubject to the Great *Khân*'s Nephew. *Zagatay*, who reigned about an hundred Years before, having been perſuaded to be baptized [e], the Chriſtians built a Church; whoſe Roof was ſupported by one Pillar, that ſtood on d a ſquare Stone taken, by *Zagatay*'s Favour, from a Building of the *Mohammedans:* Theſe obtained of that Prince's Son and Succeſſor (but not in the Faith) an Order to reſtore the Stone. But when refuſing all Compoſition, they inſiſted on having it, Behold! the Pillar lift-up of itſelf, and letting them take it away, continues ſuſpended in the Air [f].

LEAVING this City [g], you come next to the Province of *Karkan* [h]: It is above five Stages in e Length. Moſt of the Natives have ſwelled Legs, and a Bump in their Throat, occaſioned by the bad Water. Here are ſome *Neſtorians*. It has Plenty of Proviſions; but nothing elſe remarkable.

THE Province of *Kotam* [i] follows to the East North-East. Its Length is eight Stages. It has many Caſtles and Cities; whereof *Kotam* is the chief. Cotton, Flax, Hemp, Corn, and Wine, are plenty. The People of theſe two Provinces are Merchants and Artificers, ſubject to the Grand *Khân*'s Nephew [k]. Marco Polo. 1272. Kotam.

THE Province of *Peim* occurs next; five Stages in Length, and ſubject to the Great *Khân*. It is ſtored with Caſtles and Cities; the Chief of the ſame Name: Near which runs a River where Jaſpers and Calcedonies are found. If a Man goes from home, and returns not in twenty Days, the Wife may take another Huſband; the Men do the like. Peim.

THE City and Province of *Charchan* [l] has many Cities and Caſtles. Its Rivers abound with precious Stones, like thoſe before-mentioned, which are carried even to *Oukak*. This Province and *Peim* are all Sand, with little good Water; and ſo it continues for five Days more to the City *Lop*. *Kaſkar*, and all the Country thus far, are in the Bounds of *Great Turky*; and the People *Mohammedans*. Charcham.

LOP is a great City ſubject to the Great *Khân*, at the Entrance of the great Deſart of the ſame Name [m], ſituate between the East and North-East; which requires a Year to travel its Length, and a Month to croſs it. The Road is through Sands and barren Mountains. Water is found every Day, but often in very ſmall Quantities; and in three or four Places out of thirty-two, it is ſalt and bitter. Merchants muſt carry their Proviſions with them. Neither Beaſts nor Birds are found there: But, by Report, it is inhabited by Spirits, who call lagging Travellers by their Names; or talking as if their Companions, thus lead them to be loſt. The Noiſe of Muſic, Drums, and Arms, are alſo heard in the Sky. Lop City, and Deſart.

HAVING croſſed the Deſart East North-East, you come to the City *Sakion* [n], in the Province of *Tangût*. The Inhabitants, who do not trade, are *Mohammedans*, and a few *Neſtorians:* But moſt *Pagans*, who have Monaſteries full of Idols, to whom they ſacrifice. When a Boy is born, he is conſecrated to ſome Image, and a Sheep Sakion City

[a] Can this be the Sea, or Lake and River mentioned by either *Carpin*, or *Rubruquis?* We think not, unleſs we ſuppoſe the Road to take a vaſt Sweep to the North. [b] Or, *Belor*, perhaps *Belur*. See before, *p.* 519. [c] Or, *Kâſhgar:* But this Country cannot poſſibly be fifty-two Days Journey, as *Polo* makes it, from *Balaxiam*, or *Badakſhân*. [d] He means, perhaps, in *Great Turky*, or *Zagatay*'s Dominions. He cannot mean in *Kâſhgar*, without committing an egregious Blunder; for *Samarkand* is in *Great Bukhâria*, thirty or forty Days Journey to the Weſt, according to the Rate he travelled. In ſhort, he ſeems to introduce it only for Sake of the ſtupid lying Miracle. [e] This is a Fiction, like the reſt of the Story. [f] Like *Mohammed*'s Tomb in *Arabia*; or *Poncet*'s Pillar in *Abiſſinia*. [g] *Kaſhgar* ſure, not *Samarkand*. [h] This ſeems to be *Yarkan*, or *Yarkien*, Capital of *Kâſhgar*. [i] Or, *Hotom*; but it lies South-East. See before, *p.* 529. [k] *Purchas Pilgr.* p. 73, & *ſeqq*. [l] In the *Italian*, *Ciarcian:* In the *Baſil* and *Berlin* Copies, *Ciartiam*. [m] And, perhaps, near the Lake *Lop*, inſerted in the Jeſuits Map. [n] In the Copies, *Sachion*. This, we are told by *Gaubil*, in his Hiſtory of the *Mogols*, p. 50, and 231, is *Sha-chew*, in the Jeſuits Map, between the Lake of *Lop* and *So-chew*, the firſt City in *China* on that Side, at the End of the Great Wall.

Little Bukhâria.

bred in Honour of it for a Year in the Houſe: Then, on the Idol's Day, both are preſented to it. The Mutton being boiled, is ſet before the Image to ſuck the Juice, while the Relations are ſaying Prayers: After which, they take it home and feaſt on it, preſerving the Bones. The Prieſts have for their Share the Head, Feet, Entrails, Skin, and Part of the Fleſh.

Burn their Dead.

THEY burn the Corps of the Dead, on Days appointed by their Aſtrologers, keeping them in the mean-time in very cloſe Cheſts; and offer b Meats every Day to regale their Souls. They are often forbidden to carry them out through the chief Door; and ſometimes break a Hole through the Wall for the Purpoſe. They likewiſe ſtop at wooden Sheds erected in the Way, to regale the Spirits with Wine and Food. At the Grave they burn the Paper Figures of Men, Cattle, Money, and Garments; ſuppoſing the Deceaſed will have ſo many Attendants in the next World.

Khamul Province.

THE Province of *Khamul* [a] is in *Tangut*, having many Caſtles and Cities; the Chief of the ſame Name. It borders on two Deſarts; the Great mentioned before, the Leſſer of three Days Journey. It has Plenty of Neceſſaries. The Inhabitants are Idolaters, with a peculiar Language, and paſs their Time in Dancing, Muſic, and Delights. When a Traveller puts-up at any Houſe, the Maſter orders his Family to obey him during his Stay; and then going d from home, the Gueſt makes uſe of his Wife, Daughter, and the reſt, at Pleaſure. The Women are very beautiful. *Mangu Khân* commanded them to aboliſh this Cuſtom: But, three Years after, finding Things did not thrive ſo well with them as before, which they imputed to this Prohibition, they ſent Ambaſſadors to the *Khân*, intreating him to recal his Edict. *Mangu* anſwered, *Seeing you deſire your Reproach and Shame, let it be granted you.*

Obliging Huſbands.

Kinkintalas.

NEXT to *Khamul* follows the Province of *Kinkin-talas*, which is bounded on the North by the Deſart, ſixteen Stages in Length. Here are many Cities and Caſtles. The People are *Mohammedans* and Idolaters, with a few *Neſtorians*. There is a Mountain here yielding Steel, Andanik, and alſo Salamanders; of which incombuſtible Cloth is made. *Kurſifar* [b], a *Turk*, who had

Incombuſtible Linen.

the Care of the Mines, told *Polo*, that a certain Marco mineral Earth yields Threads like Wool; which 127 being pounded, and waſhed from the Clay, is ſpun, and then woven. They clean the Cloth by throwing it into the Fire [c]. It is ſaid, there is a Salamander Napkin at *Rome*. But *Polo* could never hear in the Eaſt, of that Animal living in the Fire.

FROM this Country, proceeding ſtill Eaſt Solitude North-Eaſt for ten Days, through few Habitations, you come to the Province of *Sukuir* [d], which is full of Towns; the Chief of the ſame Name. The beſt Rhubarb grows here in the Mountains. Among the *Pagan* Idolaters a few *Neſtorians* are found.

KAMPION [e] is a great City, and the Capital Kampion of all *Tangût*. The Inhabitants are Chriſtians City. (who have three large Churches there) *Mohammedans*, and Idolaters: Theſe laſt have many Monaſteries. Their Images are of Stone, Clay, c or Wood. Some well made, and gilded, ten Fathom high, with ſmall ones about them. The religious Men are chaſte. They reckon by Moons; obſerving three, four, or five Faſt-Days in each. The Laymen marry twenty or thirty Wives, if they can maintain them. The Women bring no Portions; but may be turned-off at Pleaſure. They marry their Kinſwomen or Mothers-in-law. The *Polo's* ſtaid in this City a whole Year to trade [f].

ALL the Cities before-mentioned from *Sa-* The *kion*, with *Ezina*, which is deſcribed next, be- Desert long to *Tangût* [g].

SECT. II.

The Road *from* Kampion *to* Karakarum *and* Shandu. *With a* Deſcription *of* Kambalu.

Karakarum *City. Riſe of* Chinghiz Khân. *Vaſt* e *Plain of* Bargu. Singui *City.* Egrigaya. Tenduk Preſter John. Sindiſin. Jangamur. Shandu *City. Solemn Sacrifice. A ſwinging* Polo, *or Lie.* Khânbalu *deſcribed: Its Streets: The* Khân's *Palace: The Roof: Apartments: Artificial Mount. High Roads.*

OUR Author deſcribes two Roads leading From from *Kampion*: One ſtretching North and

[a] Or, *Khamil*, by the *Chineſe*: *Hami*, as in the Jeſuits Map. [b] *Kurficar* in the *Baſil*, and *Tuſifar* in the *Berlin* Copies. [c] *Le Brun* got a Piece of incombuſtible Cloth in *Ruſſia*, ſaid to have been made in *Kitay*, between *Bukhâria* and *China*. Preſent State of *Ruſſia*, vol. 2. p. 417. [d] In the *Baſil* Copy, *Suchur*: In the *Berlin*, *Sucuir*. This, according to *Gaubil*, is *Su chew*, or *So-chew*: If ſo (and it ſeems to be the Caſe from the Circumſtances of the Rhubarb, and other Journals) the Road from *Khamul* thither, through *Kinkintalas*, muſt not only be very far about, but South Eaſtward. [e] In the *Baſil* Copy, *Campition*: In the *Berlin*, *Campicion*: But in *Haji Mehemet*'s Journal, hereafter inſerted, it is written *Campion*. [f] Methinks then *Marco* might have afforded a more particular Deſcription of this famous Place, and the Country of *Tangût*. [g] *Purchas Pilgr.* p. 75, & *ſeq.*

North-

North-East through *Korakoram*; the other Eastward to *Shan-du* (or *Shan-tu*) one of the then Capitals of *Tartary* [a]. The North-Eastern Road proceeds thus. There are twelve Stages from *Kampion* to the City *Ezina* [b], which has on the North a ſandy Deſart. The Inhabitants are Idolaters, and do not trade. Thoſe who would croſs the great Deſart, which is forty Days over, muſt here provide all Neceſſaries; neither Habitations nor Graſs being to be found, excepting a few Huts in the Mountains, where ſome retire in Summer. But wild Aſſes, and other Beaſts, are plenty.

HAVING paſſed-over the great Deſart, you come to the City of *Kara-koram*, ſituate to the North of it [c], and three Miles in Compaſs; being ſtrongly rampierd with Earth, for they want Stone. Near it is a great Caſtle; and in it a fair Palace where the Governor reſides. It was near this Place, formerly, that the *Tartars* aſſembled themſelves. They dwelt in the Northern Parts, called *Chorza* [d] and *Bargu*, full of Plains and Rivers, but no Towns. They had no Prince of their own; and paid Tribute to a great King, named *Um-kan*; which, according to ſome, in our Language, ſignifies *Preſbyter John* [e]: But increaſing greatly, *Um-kan* became afraid of them, and reſolved to diſperſe them.

UPON this the *Tartars* fled to the Deſarts Northward; where, about 1162, having choſen *Chinghiz Khân* [f], a wiſe and valiant Man, for their Prince, the whole Nation, charmed with his Juſtice, ſubmitted to him. Thus ſtrengthened, he paſſed Southward; and having ſubdued many Provinces and Cities, required *Um-kan*'s Daughter in Marriage. That Prince offended at the Propoſal of his Servant, threatened to put him to Death if he repeated it. *Chinghiz* hereupon marching to the Plain of *Tandûk* [g], conſulted his Aſtrologers; who ſplitting a Reed, wrote on one *Chinghiz*, on the other *Um-kan*; and ſticking them in the Ground, mumbled over their Prayers and Charms. At length the Canes beginning to move and fight, *Chinghiz* bore-down the other; whence they predicted Victory. Accordingly *Um Khân* advancing with a great Army, loſt the Battle, and was ſlain. The Conqueror reigned ſix Years after this, and ſubdued many Provinces; but at length was ſlain by an Arrow ſhot in his Knee, before the Caſtle of *Thaigin* [h], and was buried in the Mountain *Altay* [i]. Marco Polo. 1272.

LEAVING *Karakoram*, and the Mountain *Altay* [k], you come to the Plain of *Bargu*, which extends ſixty Days Journey Northward, inhabited by the *Mekrit* [l], ſubject to the Great *Khân*. Their Manners are the ſame with the *Tartars*. They live by Hunting: But want Corn and Wine. At the End of forty Days [m], you come to the Ocean where *Aſtori* and ſtrange Falcons breed; which are carried to the *Khan*'s Court [n]. *Plain of Bargu,*

THE ſecond Road from *Kampion* proceeds five Days Eaſt, through Places diſturbed by Devils, to the City *Erginul* [o], Capital of a Kingdom of the ſame Name, which contains many other Kingdoms full of Cities and Caſtles. The Inhabitants are Idolaters, with ſome *Neſtorians* and *Turks*. *Second Road.*

PROCEEDING South-Eaſt, towards *Kathay*, there is *Singui* [p], a famous City and Province of *Tangût*, tributary to the Great *Khân*. Here are wild Oxen near as large as Elephants, with white and black Hair, three Spans long, on the Shoulders; but ſhort every-where elſe: That long Hair is fine and white as Silk. Theſe Beaſts tamed are very ſerviceable. The beſt Muſk comes from this Province: The Animal that produces it is of the Size of a Goat, with coarſe Hair like a Stag, Feet and Tail like a Gazella, but no Horns; four Teeth, two above and two below, Singui *City.*

[a] It was neceſſary to premiſe this for Method-Sake, and to ſhew that the Author does not proceed directly forward in his Itinerary. [b] Or, *Etzina*, and *Echina*, on a River of the ſame Name. See before, *p.* 446. a. The Courſe hither from *Kampion* muſt have been North North-Weſt. Thus altering his Courſe without taking Notice of it, has, doubtleſs, been the Occaſion of miſleading Geographers. [c] Here the Courſe of the Road changes again to the North-Eaſt, without being mentioned. [d] In the *Italian*, *Ciorza*: But the *Latin* Copies have left out theſe Names, as well as the ſhort Account of *Karakoram*, written in the *Baſil* Copy *Tarocoram*, and *Carocarum*. [e] This diſcovers either great Ignorance in the *Tartar* Language, or a ſtrange Diſpoſition to impoſe on his Readers: For ſuppoſing *Um*, *Un*, or *Ung*, to mean *John*, in that Caſe it ſhould be *King John*; but could not poſſibly be *Preſbyter*, or *Prieſt John*. [f] In *Ramuſio*, *Cingis Khân*. [g] In the *Berlin* Copy, *Tanduth*. [h] *Mangu* was ſlain before *Ho-chew* in *Se-chwn*; but *Chinghiz* died of a Diſorder, as is before related. [i] In the *Latin* Copies, *Alchay*; which is wrong: He was buried elſewhere. See before, *p.* 447. [k] This Mountain lies ſome Weeks Journey to the Weſt of *Karakoram*. [l] *Medites*, in the *Baſil*; and *Metlites*, in the *Berlin* Copy. [m] The other Copies mention no Time here, but ſpeak of Iſles in the Ocean, and ſay the Country borders on *Kumania*, and the *Armenians*. [n] *Purchas Pilgr.* p. 77, *& ſeq.* [o] *Erigimul*, in the *Baſil*; and *Ergmul*, in the *Berlin* Copy. The firſt joins with it the Kingdom of *Cerguth*, (or *Cherguth*) and ſays, *Singui* City lies between both Kingdoms. [p] This, from the Oxen, Muſk, and Similitude of Name, muſt be *Si-ning*, or *Sining-chew*, at the End of the Great Wall South-Eaſt of *So-chew*. See before, *p.* 55.

three

Kitay *Empire.*

three Inches long, and white as Ivory: The Fleſh is good to eat. The Inhabitants live by Trade, and are Idolaters. The Men corpulent, with black Hair, little Noſes, and no Beard, except four Hairs on their Chin [a]. The Women fair. This Province extends in Length twenty-five Stages [b], and is very fertile. Here are many beautiful Birds, and Pheaſants with Tails eight or ten Spans long.

Egrigaya.

EIGHT Stages farther Eaſtward is the Province of *Egrigaia*, ſtored with Caſtles and Cities; the Principal called *Kalacha* [c], all ſtill in *Tanguth*, and ſubject to the Great *Khân* [d]. The Inhabitants are Idolaters. In *Kalacha* they make the beautifulleſt Camlets in the World of white Wool and Camels Hair mixed.

Tenduk, Preſter John

FROM *Egrigaia* the Road leads to the Province of *Tenduk* [e], full of Caſtles and Cities. Prieſt *George*, deſcended of Prieſt *John*, uſually reſides here, paying Tribute to the Great *Khân*; and moſt of his Subjects are Chriſtians. This King is the fourth from *John*; to whoſe Succeſſors the Great *Khans* always gave their Daughters in Marriage. But *George* does not poſſeſs all the Territories that belonged to *John*. There is a Nation called *Argon*, expert in Trade, who inhabit two Diſtricts, called *Og* and *Magog*; but the Natives name them *Ung* and *Mongul*: In *Ung* are *Gog*, and in *Mongul* the *Tartars* [f].

Sindiſin.

RIDING Eaſt ſeven Days, toward *Katay*, are many Cities of Idolaters, *Mohammedans*, and Chriſtians. Among the reſt, one called *Sindiſin*, famous for Arms of ſeveral Kinds. The Mountain Country called *Idifa* [g] produces rich Silver Mines.

Jangamur.

THREE Stages from *Sindiſin* is the City *Jangamur* [h], that is, *White Lake*, where the *Khân* has a Palace, and often diverts himſelf, becauſe of the many Lakes and Rivers ſtocked with Swans; as the Plains are with Cranes, Pheaſants, Partridges, and other Fowl. The Cranes are of five Sorts; the Feathers of ſome like Peacocks, full of Eyes, but yellow; others mixed with red and blue, or with black Wings; ſome their Heads red and black.

THREE Stages North-Eaſt from hence lies *Shandu* [i], built by the Great *Khân Kublay*, then reigning; and encompaſſed with a Wall, from whence the Palace extends to the Middle of the City. It is raiſed with Marble and other Stone. On the other Side of the ſame Wall is a Park ſixteen Miles in Compaſs, where he takes Delight to hawk and hunt with Leopards trained to ſit on Horſeback. In the Middle of the Park is a fine Wood, and in the Center a Palace raiſed on Pillars gilt and varniſhed, having each a gilded Dragon winding round it, whoſe Head and Wings diſplayed, ſupport the Cieling. The Roof is framed of ſplit Canes gilt alſo and varniſhed, that Rain cannot enter. This Houſe may be taken-down and ſet-up like a Tent, being ſuſtained by two hundred ſilken Cords. *Kublay* reſided here every *June*, *July*, and *Auguſt*.

THE twenty-eighth of *Auguſt*, the *Khân* departed to perform a ſolemn Sacrifice. He had an Herd of ten thouſand white Horſes; and of whoſe Milk none muſt drink except the Family of *Chinghiz Khân*, and that of *Boyrat* [k], in Reward of their Valour. The Sacrifice conſiſted in diſperſing (or ſhedding) that Milk in ſeveral Places, in Honour of the Guardian Spirits [l].

THERE are two Sorts of Sorcerers; one called *Thebeth*, the other *Keſmir* [m]. Theſe affect Negligence in Dreſs; and in Storms, aſcending

[a] Theſe are *Chineſe*, by their Form. [b] Yet the Author mentions but one City in the Whole. Had he named a few out of the many ſaid to be in each Province, it might have been of much Service to Geography. [c] Or, *Kalaſia*: In the Copies, *Calacia*. [d] What is ſaid all along of *Tanguth*, anſwers alſo to the Empire of *Hya*, with which the other became, as it were, incorporated. *Kampion* (or *Kan-chew*) might latterly have been the Capital of *Tangût*, as *Ning-hyu* was of *Hya*. [e] In the *Baſil* Copy, *Teuduk*. [f] What a Heap of Jargon is this, invented to aſſign the Situation of the Scripture *Gog* and *Magog*! [g] *Berlin* Copy, *Iſifa*. [h] In the *Baſil* Copy, *Cianiganior*: In the *Berlin*, *Cyangamor*; rather *Changan Nor*, or *Naur*; which is *White Lake*, in *Tartarian*, as *Hyde* obſerves, in his *Epiſt. de Menſuris & Pond. Sinenſ.* p. 22. *Ulan Hotun*, in the Map, anſwers as to Site and Diſtance from *Shang-tu*. But, in Truth, there is no gueſſing at the Situation of the Countries, for Want of the modern Names between *Kampion* and this laſt Place; or whether the Road lay all on the North-Side of the Great Wall, or partly on the South, till you come to *Tenduk*, or *Preſter John*'s Country; which, it may be preſumed, was in *Tartary*. As *Singui* (or *Sining*) is in the Road, and the Country all the Way full of Towns, we incline to the latter Opinion: For had it lain all through *Tartary*, the firſt Part of the Road muſt have been through Deſarts, till it approached the Borders of *Shan-ſi*: But then, how comes it we hear nothing of either the Great Wall, or the *Whang-ho*, both which muſt have been paſſed in this Journey? Indeed the Whole is but a very imperfect Account of the Country. [i] *Shan-tu*, or *Shang-tu*: In *Ramuſio*, *Xandu*: In the *Latin* Copies, *Ciandu*, which anſwers to *Chandu*, or *Shandu*. It ſtood in the Country of *Kan-chin*, on the River *Shan-tu*. *Kublay*, or *Hupely Khân*, who built it, was crowned here. The Latitude was found by his Aſtronomers to be forty-two Degrees twenty-two Minutes. It lies in *Tartary*, to the North North-Eaſt of *Pe-king*, or *Khan-palu*. *Gerbillon* ſaw the Ruins of it. It is ſurprizing they are not marked in the Jeſuits Maps. If any Place marked therein, it muſt be *Chau Nayman Sume Hotun*, on the River *Shan-tu*. [k] Perhaps, the *Burats*, or *Virats*. [l] *Purchas Pilgr.* p. 79, *& ſeq.* [m] They ſeem to be no other than Prieſts of *Tibet* and *Koſhmir*, whom, according to the Rancor that reigns in thoſe of his calumniating Church, he calls Sorcerers, and reports Lies of.

the Palace, ſuffer no Rain to fall thereon: This, they pretend, is effected by their Sanctity. They eat the Fleſh of Animals executed. They are of an Order called *Bakſi*, like the preaching Friars. They, by Magic, cauſe the Veſſels, filled with Wine and Milk, to diſcharge their Liquor into the Cups; and theſe of themſelves to ſkip from the Buffet through the Air into the Grand *Khan*'s Hand, ſitting at his Table eight Yards high; and when he has drank, to return to their Places. Under Pretence that their Idols will bring-down great Plagues on Grain and Cattle, if not honoured by Sacrifices, they apply, by ſome Court Lords, to the *Khân* for Sheep, Incenſe, and Aloes; and on the Feaſt-Day killing the Beaſts, ſprinkle the Broth before the Image.

SOME of their Monaſteries are as large as Cities; and contain two thouſand Monks, diſtinguiſhed from the Laity by their Tonſure and Dreſs. In their Worſhip they light Candles, and ſing Hymns. Some, called *Sen-ſim* [a], lead an auſtere Life, eating nothing but Meal mixed with Water, or Bran: And all theſe worſhip the Fire, not Images; whence the others call them *Heretics* [b]. Theſe never marry, as others do. They wear hempen Garments, of a black, or bright yellow Colour.

THREE Months of the Year, *viz.* in *December*, *January*, and *February*, *Kublay* reſides in *Kambalu* [c], that is, *the City of the Prince*. It is ſituate in the North-Eaſt Border of *Katay*, on a great River; and was the regal Seat, from all Antiquity. The *Khân* underſtanding by his Aſtrologers that it would rebel, on the other Side of the River built a new City, called *Tay-du* [d], and made the Inhabitants of the old remove into it. It is an equilateral Square, twenty-four Miles in Compaſs. The earthen Walls are ten Paces thick at the Foundation, diminiſhing, till at the Top, they contract to three. The Battlements are white. It has twelve Gates, three on each Side, with ſumptuous Palaces built over them; alſo at the Angles of the Walls, where are kept the Arms of the Gariſon, being a thouſand Soldiers at every Gate.

THE Streets well built, are ſtrait as a Line, and croſs at right Angles. All retire at the third Sound of a Bell hung in a Tower in the Center of the City; nor dare ſtir out, but on ſome urgent Buſineſs, as a Woman in Labour, and with a Light; otherwiſe, they are ſeized by the Guards, and baſtonadoed ſeverely. At each Gate there is a large Suburb three or four Miles long, where Merchants and Strangers abide. The Bodies of the Idolaters are burnt, and thoſe of others buried without the City. There are twenty-five thouſand licenſed Harlots in the Suburbs, under the Command of Officers, as Captains of Hundreds, and Thouſands, ſubject to a General, whoſe Buſineſs is to ſupply Ambaſſadors with Change of Women every Night at free-coſt; for this is the Queen's Tribute. Marco Polo. 1272.

The Khân's Palace.

ON the South-Part of this new City is the *Khân*'s Palace. The outer-Wall is a Square, thirty-two Miles in Circuit, with a deep Ditch round it, and a Gate in the Middle of each Side. After this is the Space of a Mile in Compaſs, for a Parade: Then an Incloſure ſix Miles ſquare, with three Gates on the South-Side, and three on the North. The two middle-ones, which are largeſt, are always ſhut, but when the *Khân* goes abroad, who only paſſes through them. At each Corner of this Wall, and in the Midſt, is a fair Palace, eight in all, and very large, where the Horſes, Arms, and Implemenes of War are kept. Within this Square is another, four Miles in Circumference, with ſix Gates and eight Palaces, like the former, where the Proviſions are kept. Between theſe two Squares are many Groves, and Meadows, ſtocked with Deer, and other Game; the Paths being raiſed three Feet, to preſerve the Graſs. Within this laſt Incloſure is the Palace itſelf, joining the Wall on the North and South-Sides.

The Roof, Apartments.

IT has no Cieling, but a very high Roof, where nothing appears, but Gold and Figures. The Foundation of the Pavement is ten Palms high, with a Marble-Wall round it two Paces wide, like a Walk. At the End of the Wall without, is a fair Turret with Pillars. The Walls of Halls and Chambers are adorned with Dragons, Men, Beaſts, Wars, carved and gilded. Every Square of the Palace contains a great Marble-Hall, holding Multitudes. The Chambers are diſpoſed in the propereſt Manner: The Roofs of all Colours. Behind the Palace are large Rooms, and Magazines for the *Khân*'s Treaſures, Jewels, Women, and other Uſes. Oppoſite to this Palace, is another for his Son *Chinghîz* [e], whoſe Court was like his Father's. Near the Palace to the North, is an artificial Mountain a Mile round, and an hundred Paces

Artificial Mount.

[a] *Seng* is the Name of them. See before, *p.* 207. b.

[b] As the Papiſts, for the ſame Reaſon, call Proteſtants.

[c] It ſhould be *Khânpalu*, or *Hânpalu*, that is, *the Palace of the Prince, or King:* For the *Tartars* do not uſe the *b*, as *Trigautius* and *Magalhaens* tells us, in his firſt Chapter. It is now called *Pe-king* by the *Chineſes*; at leaſt *Pe-king* ſtands nearly on the ſame Ground.

[d] Rather *Tay-tû*, or *Ta-tu*; that is, the Great Court. It is the Groſs of the *Tartar* City of *Pe-king*. The Walls ſixty *Li*, or ſix Leagues in Compaſs, with twelve Gates. See *Gaubil*'s Hiſt. *de Gentch.* p. 146.

[e] Rather *Chenkin*, who died before his Father, and left a Son, called *Temûr*, who ſucceeded; as *Polo* relates.

Kitay *Empire.*

high, beſet with Trees always green, whence a called the *Green Mountain*. The Places whence was dug the Earth, of which it is made, form two Lakes parallel to each other, ſupplied by a pretty River ſtored with Fiſh. The *Khân* has in his Court twelve thouſand Horſemen, called *Kaſitan* [a], or *the truſty Soldiers of their Lord*, under four Captains; who, with their Men, mount Guard by Turns, for three Days together the Year round [b].

High Roads. FROM the City of *Khân-balu*, Roads extend b through the neighbouring Provinces to the Ends of the Empire, with Inns at every twenty-five, or thirty [c] Miles, called *Lamb* [d], or *Poſt-Houſes*; having fair Palaces, and Chambers furniſhed with Beds, and other Neceſſaries, fit to accommodate great Lords, or Princes. Four hundred Horſes are here ready for Meſſengers and Envoys. There are ten thouſand Inns thus furniſhed, with two hundred thouſand Horſes. Cities adjoining to Deſarts are ceſſed to provide Horſes and Pro- c viſions thorough them: Thoſe near Rivers and Lakes furniſh Ferry-Boats. Their Poſts will ride two hundred, or two hundred and fifty Miles in a Day: Sometimes they go both Day and Night; Footmen lighting them with Links, if the Moon ſhine not. They wind a Horn on their Approach, that Horſes may be gotten ready; and having their Bellies and Heads ſwathed, run as faſt as the Horſes themſelves.

HERE are other Habitations, conſiſting of a d few Houſes, three or four Miles aſunder, where Foot-Poſts dwell, who wear Girdles, ſet-round with little Bells. Theſe are for conveying the Letters, or Mandates of the *Khân*; who thus receives News, or Fruit, in two Days from Places ten Stages diſtant, as from *Kambalu* to *Shandu*. All theſe Poſts, beſides receiving good Wages, are exempt from Taxes.

SECT. III.

THE Grand *Khân* having ſent *Polo* from *Khânbalu*, on ſome Affairs of State into the moſt diſtant Parts of his Empire; during the four Months that he was employed in executing his Commiſſion, he examined every Thing carefully, both going, and returning. This Preamble, we muſt inform our Readers, is found in the *Baſil* and *Berlin* Copies; but not in that of *Ramuſio*, which only ſpeaks of proceeding to the Deſcription of the other Countries which *Polo* travelled, by Order of *Kublay*.

TEN Miles from *Khânbalu* you come to a great River, called *Puli Sangan* [e]. It falls into the (Eaſtern) Ocean, and many Ships aſcend it. Here there is a curious Bridge three hundred Paces long, and eight broad: It has twenty-four Arches, ſupported by twenty-four Pillars made of Serpentine Stone: It is flat and even at-Top: On the Sides are Pillars nine Foot aſunder, with Li- ons [f] on the Top, and Marble-Pannels between, adorned with Sculpture. In the Middle is one much greater than the reſt, reared on a Marble Tortoiſe, with a Lion at the Foot, and another on the Top: Oppoſite to it, and nine Paces diſtant, is another Pillar with a Lion. Thirty Miles Weſtward, through Vineyards and Fields, is *Gouza* [g], a fine and large City, famous for Lawns, and of great Trade.

A MILE beyond the Road divides, one leads e Weſtward through *Katay*, the other South-Eaſt towards *Manji*. Proceeding in the former for ten Days, through fair Cities and Caſtles, cultivated Lands and Vineyards, whence *Katay* is ſupplied with Wine, you come to the Kingdom of *Tain fû* [h]; whoſe Capital, of the ſame Name, trades in Munition for the *Khân*'s Armies. The Wine about it ſerves the whole Province.

[a] In the *Baſil* Copy, *Queſite:* In the *Berlin*, *Quæſica*. The right Word is *Que-ſye*, in the *Mongol*. See *Gaubil*'s Hiſt. *de Gentch.* p. 6. Note 2. [b] *Purchas Pilgr.* p. 81, *& ſeqq.* [c] More exactly eighty ſeven. [d] In the *Baſil* Copy, *Jan-li*, or Lodgings for Horſes: In the *Berlin*, *Janib*. [e] In the *Berlin* Copy, *Puli-ſangnis:* In the *Baſil*, *Puli-ſachniz*. *Gaubil*, who made uſe of the laſt Copy, ſays, *Puli-ſachniz* is the River *Sankan*, *When*, or *Lukew*, two Leagues from *Pe-king*. See his Hiſt. *de Gentch.* p. 24, and 339. *Magalhaens* does the ſame, *p.* 11. of his Relation of *China* (and, indeed, the Name proves it.) *Puli-ſangan*, he ſays, is the *Mongol* Name: But that *Polo* has miſtaken this Bridge, which has but ſeventeen Arches, for that on the *Syuen-li-ho*, three Leagues more to the Weſt, which anſwers to his Deſcription. [f] A Miſtake, perhaps, for Tigers; the *Chineſe* having no Idea of Lions. See before, *p.* 313. [g] More correctly in the *Baſil* Copy, *Gougui*. This is *Cho-chew*, according to *Gaubil*, p. 239. [h] This is *Ta-yuen fû*, in *Shan-ſi*.

SEVEN Days farther is another fine and rich trading Country, like the former: After which you come to the great City of *Pian fû* [a], where there is a brisk Trade for Silks. Westward is the fair Castle of *Tay-jin* [b], built of old by King *Dor*. Here is a spacious Palace, with a fair Hall, in which are painted all the Kings who reigned there. Of this King *Dor* [c], they say, that he was very powerful, and attended only by young Women; who, when he had a Mind to take his Pleasure, drew him about the Castle in a light Chariot. The Place being very strong both by Art and Nature, *Dor* rebelled against *Un Khân*, or *Presbyter John*, his Lord [d]: But being seized while hunting, by seven treacherous Officers, and carried to *Un Khân*, that Prince, after sending him to keep his Cattle for two Years, pardoned [e], and sent him back nobly attended.

TWENTY Miles beyond *Tay-jin*, is the River *Kara-moran* [f], exceeding broad and deep. Its Banks are adorned with many fine Cities, of great Trade. The Country abounds with Ginger, Silk, and Pheasants, three for a *Venice* Groat. Canes grow here, twelve and eighteen Inches round.

HAVING passed this River, two Days bring you to the famous City *Karian fû* [g], where Cloth of Gold is made, and many Sorts of Spices grow, as Ginger, Galengal, and Spike. The People are Idolaters [h]. Proceeding seven Days more Westward, through a fine Country, and many Cities, you find many *Mohammedans* and *Nestorians*.

SEVEN Days farther, you meet with *Quenzan fû* [i], the chief City in the Kingdom. This has been the Seat of many famous Kings, and here in *Polo*'s Time *Mangala*, the Great *Khân*'s Son, was Governor. Five Miles from the City, there is a well-watered Plain, inclosed with high Walls five Miles in Compass; and in the Midst the Prince's Palace, painted with Gold and Azure. The Country yields Plenty of Necessaries, Silk, and Game. The Inhabitants the same as before.

THREE Days Journey West from the Palace, through Plains full of Cities, you come to a mountainous Country, yet well inhabited, belonging to the Province of *Kunkin* [k]: The Inhabitants Husbandmen, and Idolaters. Here are Lions, Bears, Stags, Roebucks, and Wolves. This Country extends twenty Days Journey Westward, at the End of which you enter the Province of *Ak-baluk* [l] *Manji*, that is, *the white City of the Borders of* Manji. It is well peopled. For two Stages it is plain: After follow Mountains, Valleys, and Woods, for twenty Days Westward. Among the wild Beasts is the Musk Animal: Among the Vegetables, Ginger, Corn, and Rice [m].

Kun-kin Province.

HAVING passed through it, you come to a Plain and Province, in the Borders of *Manji*, called *Sindin fû* [n]; whose Capital bears the same Name, is twenty Miles in Compass, and exceeding rich. It had formerly many rich and mighty Kings; but the old King dying, left three Sons for his Successors; who dividing the City in three Parts, each inclosed his own Share with a Wall: But the Great *Khân* subdued them, and their Dominions. About and through this City run many Rivers, some half a Mile, others two hundred Paces over, and very deep; covered with Stone-Bridges eight Paces wide; and ranged on the Sides with Marble-Pillars supporting Timber-Frames that cover the Bridges, there being Shops on each Side. These Rivers, below the City, form a great River, called *Kyang* [o], which runs an hundred Days Journey from hence to the Ocean. On those Rivers, which are frequented by trading Vessels, stand many Cities and Castles.

Sindin fû City.

PROCEEDING five Days farther, through a

Tebeth, or Tibet,

[a] This is *Ping-yang fû*, South-West, in the same Province, *Magalhaens*, p. 8. [b] In the *Latin* Copies, named *Khinkui*. [c] In the same Copies, called *Darius*. They also place this Castle two Stages from *Pian fû*. [d] According to this Account, Priest *John* possessed Part of that Part of *China*, called *Kitay*, or *Katay*. [e] The *Latin* Copies insert a Dialogue between the two Kings. *Purchas* has curtailed this Article; and by the same Method spoiled that above, relating to the Bridge of *Puli Sangan*. [f] *Kara-moran*, or *Muren*, signifies *Black River*, in the *Mongol* Tongue. This is the *Whang-ho*, or *Yellow River*. [g] The *Basil* Copy has *Cian fû*: The *Berlin*, *Kasiam fû*. It is hard to say what City this is. [h] This must always be understood of the Sect of *Fo*, which being most numerous, *Polo* might think all the *Chinese* were of the same Religion. [i] In the *Basil* Copy, *Quenquina fû*: In the *Berlin*, *Gyan fû*. This, according to *Gaubil*, is *Si-ngan fû*, the Capital of *Shen-si*. It was then called *Chang-gan*. See *Hist. de Gentch.* p. 25, and 239. [k] In the *Italian*, *Cunchin*: The *Basil* Copy, *Chunchi*: The *Berlin*, *Chimchim*. [l] In the *Italian*, *Ach baluch*, that is, in *English* Characters, *Ak baluk*. *Ak*, in the *Mongol* or *Turkish* Language, signifies *white*; and *Baluk*, *Balik*, or *Baleg*, *a City*. In the *Basil* Copy, it is written *Achalech mangi*: In the *Berlin*, *Archilechi mangi*: So that the *Italian* of *Ramusio* has generally the truer Spelling. *Manji* is that Part of *China* South of *Kitay*, or *Katay*, subject to the *Chinese* Emperors of the *Song* Race, before *Kublay* conquered it. [m] *Purchas Pilgr.* p. 89. [n] In the *Berlin* Copy, *Syndi fû*. We know of no Place that answers to the Description and Site of this City, so well as *Ching-tu fû*, Capital of *Se-chwen*. [o] In the Original, *Quian*: In the *Basil* Copy, *Quian fû*: In the *Berlin*, *Quian fu*. This is the great *Yang-tse-kyang*.

Kitay *Empire.*

Plain ſtored with Cities, Caſtles, and Villages, you enter the Province of *Tebeth* [a], conquered by the Great *Khân*, where the Cities and Caſtles lie ruined for twenty Days Journey together; ſo that becoming an uninhabited Wilderneſs, wild Beaſts have multiplied exceedingly. Theſe Creatures Travellers drive-away in the Night, by burning green Reeds, whoſe Crackling is heard four Miles off. Theſe grow here ten Paces high, three Spans thick, and as many from Knot to Knot.

Odd Cuſtom there.

HAVING paſſed through *Tebeth*, you meet with Cities and Villages, as before. As it is the Cuſtom here never to marry a Virgin, when Foreigners arrive, the Women bring their grown-up Daughters for them to make-uſe of, during their Stay. The Girl, in parting from her Gallant, deſires ſome little Preſent, as a Token that he has lain with her: Theſe ſhe wears as Ornaments, when ſhe goes abroad; and ſhe who has moſt, is always moſt eſteemed. After Marriage, they are debarred from the ſame Liberty; and the Men are very careful not to offend one another in that Particular. They are Idolaters, and cruel, thinking it no Crime to rob and ſteal. They live on Game and Vegetables; are great Sorcerers, cauſing Thunder and Tempeſts.

Muſk Animal.

THE Muſk-Animals, called by them *Gudderi* [b], are plenty here. The People have a peculiar Language, and uſe Coral inſtead of Money: Go clad with Skins, or coarſe Hemp. This Country belongs to *Tebeth* [c], which once contained eight Kingdoms, full of Cities, Towns, Mountains, Lakes, and Rivers, in which Gold is found. The Women and Images wear Coral about their Necks. The Country breeds Dogs as large as Aſſes, which catch wild Beaſts, eſpecially Oxen, called *Beyamini*; and produces many Sorts of Spices never brought into *Europe*.

Ka-indu *Province,*

ON the Weſt of *Tebeth* lies the Province of *Kaindu* [d], under its own Kings, till conquered by the *Khân*. It contains many Cities; the Capital is of the ſame Name, and ſtands in the Entrance of the Province. Here is a great Salt-Lake, ſtored with Fiſh, and ſo affluent in Pearls, that they would be of no Value, if carried-away at Pleaſure. Hence it is made Death to ſearch for them, without the *Khân*'s Leave. In a Mountain here alſo is found Turcoiſe-Stones, but ſubject to the ſame Prohibition. Wild Beaſts, and Birds of ſeveral Kinds, abound here. Here are no Vines, but they make excellent Liquors of Corn, Rice, and Spices; of which there is Cinnamon, Ginger, and Cloves, in Plenty. Theſe laſt grow on ſmall Trees, whoſe Boughs and Leaves are like the Laurel, but ſomewhat longer and ſtraiter, with very ſmall white Flowers.

THE Inhabitants of *Kaindu* are Idolaters, and think they pleaſe their Images, by proſtituting their Wives and Daughters to Strangers; which they do by leaving their Houſes to them, juſt in the ſame Manner as hath been mentioned at *Khamul* [e]. They have two Sorts of Money: The firſt is Bits of Gold, which paſs by Weight; the other is Salt, made into little Lumps by boiling, and impreſſed with the Prince's Stamp. With this they buy Store of Gold and Muſk, from the wild Inhabitants, where thoſe Commodities abound.

LEAVING this Province, they proceed fifteen Stages through Caſtles and Villages, whoſe People have the ſame Cuſtoms with the former, and arrive at the River *Brius* [g], where *Kaindu* ends. In this River Plenty of Gold-Sand is found, called by them *Dipaiola* [h]; and on its Banks Cinnamon-Trees: It runs to the Ocean. Having croſſed the *Brius*, you paſs Weſtward into the Province of *Karaian* [i], containing ſeven Kingdoms. *Sentemur* [k], the Great *Khân*'s Son, a wiſe and juſt Prince, is King of it. The Inhabitants are Idolaters, and have a peculiar Language difficult to learn.

RIDING five Days through a populous Country, breeding excellent Horſes, you come to *Ya-Cachi* [l], the Capital, a great and populous City, rich in Trade. The Idolaters here are mixed with *Chriſtians*, *Neſtorians* [m], and *Mohammedans*. Rice makes their Bread and Drink. Their Diet is raw Fleſh ſhred ſmall, and ſeaſoned with Spices, or Garlick. Any Man is free to lie with their Wives, provided they are willing to re-

[a] In the *Berlin* Copy, *Thebet*. [b] In the *Latin* Copies, *Gadderi*. [c] It ſeems to be the Weſtern Part of it, or *Butân*. [d] In the *Berlin* Copy, *Cayndu*. [e] See before, *p.* 588. [f] The *Latin* Copies have but ten. [g] This ſeems to be the *Kincha-kyang*, or River of *Golden Sand*, which falls into the *Great Kyang*, mentioned before, *p.* 451. It bounds the Province of *Yunnan*, in Part, on the North; which favours the Opinion, that *Karaian* is Part of *Yunnan*, according to *Gaubil*, Hiſt *de Gentch.* p. 499. [h] In the *Baſil* Copy, *Paglola*: In the *Berlin*, *Depaglola*. [i] According to this Courſe, *Kaindu* ſhould be Part of *Se-chuen* (ſuppoſing the *Brius* to be either the *Kincha*, or the *Kyang*.) But as this is hardly probable, it muſt be judged, that from *Tibet*, *Polo*, inſtead of proceeding Weſtward (or between the South and Weſt, as he intimates in one Place) he returned with a Sweep to the Eaſt, or South-Eaſt, and in that Point entered *Karayan*, or *Yunnan*. [k] In the *Baſil* Copy, *Eſentemur*: In the *Berlin*, *Onſentemus*. There is none of this Name among the ten Sons of *Kublay*, mentioned by *Gaubil*, p. 223. [l] In the Original, *Jacci*. [m] In this, and ſeveral other Places, he ſeems to diſtinguiſh *Neſtorians*, as if they were not Chriſtians.

ceive him. They uſe, for Money, as well as Ornaments, white Porcelains [a], found in the Sea. Much Salt is made in this City, of Spring-Water. There is a Lake (in this Country) an hundred Miles in Compaſs, abounding in Fiſh [b].

TEN Days Weſtward of *Yachi*, you come to the Province of *Karazan* [c], governed by *Gogatin* [d], *Kublay*'s Son. The chief City has the ſame Name. The Rivers yield Gold-Duſt; the Mountains, Gold-Ore. They exchange this Metal for ſix Times its Weight in Silver. They uſe Porcelain-Money, brought from *India*; whither their Horſes, which are very large, are carried. Their Stirrups are long. In War they uſe Targets, and Armour made of Buffalo-Hides, Lances, and Croſs-Bows, poiſoning their Arrows. They who are guilty of Crimes, are ſaid to carry Poiſon about them; which, if catched, they take, to prevent being tortured; but the Magiſtrates cauſe them to throw it up again, by ſwallowing Dog's Dung. Before the *Khân* ſubdued them, they uſed to kill Strangers endued with Beauty, or Underſtanding, who happened to lodge in their Houſes, conceiting that ſuch Perfections would remain with them.

THERE breed, in this Country, Serpents ten Paces long, and ten Spans thick, with two little Feet towards the Head, and Claws like a Lion; the Eyes bigger than Cows, and very ſhining: Their Mouths are wide enough to ſwallow a Man; their Teeth great and ſharp. They lie hid in the Day for the Heat, and creep-out at Night in Queſt of Prey, devouring wild Beaſts. The People take them, by laying Spikes in the Track they make in the Sand going to drink. The Fleſh being very delicious, bears a great Price: The Gall is good for Women in Labour, for Boils [e], and the Biting of Mad Dogs, a Penny-Weight being given in Wine [f].

FIVE Days Weſtward of *Karazan*, is the Province of *Kardan* [g]. The chief City *Vocham* [h]. It is ſubject to the Great *Khân*. Porcellains and Gold by Weight paſs for Money; for there are not in this, and the neighbouring Countries, any Mines of Silver; for five Ounces of which, you get one of Gold. The Inhabitants plate their Teeth with this laſt Metal. The Men make black Liſts round their Arms and Legs, with a Needle and Ink. They mind nothing but hunting, hawking, or exerciſing with their Weapons, leaving the Houſhold-Buſineſs to the Women and Slaves, bought or taken in War. As ſoon as a Woman is delivered, ſhe riſes, waſhes, and dreſſes the Child: Then the Huſband getting into Bed [i] with the Infant, keeps it there forty Days, and receives Viſits as if he had lain-in; while the Wife looks to the Houſe, carries him his Broths, and gives the Boy ſuck. Marco Polo. 1272. *Lying-in Men.*

THEY dwell moſtly in wild and mountainous Places, whoſe bad Air kills Strangers. Their Food is Rice, and raw Fleſh, dreſſed as before-mentioned. Their Liquor Rice-Wine. They have no Idols, but worſhip the oldeſt Man in the Family, as the Being to whom they owe themſelves, and whatever they poſſeſs. They have no Writing Characters, but make their Contracts with Wooden-Tallies, each Party keeping one-half of the Tally; which the Creditor returns when the Debt is paid.

THERE are no Phyſicians either in this Province, *Kaindu*, *Vocham*, or *Karaian*. But when any is ſick, the Magicians or Prieſts are ſent for; and being told what his Diſtemper is, fall a dancing, and ſinging Hymns, by the Sound of Muſic. At length the Devil entering one of them, they give-over their Gambols, and conſult the Poſſeſſed; deſiring the Spirit to implore the offended God, and promiſing the Patient ſhall offer ſome of his Blood to him, in caſe he recovers. If the Devil thinks he will die, he tells them, that the God is not to be appeaſed, the Offence was ſo great: But if he judges the Man will recover, he orders ſo many Magicians, with their Wives, to be ſent for; and ſo many Rams, with black Heads, to be ſacrificed by them. Accordingly Candles are lighted, the Houſe perfumed, and the Blood of the Ram, as well as the Broth, poured-out in the Air, the Prieſts and their Wives dancing, and ſinging in Honour of the God; who being thus appeaſed, they ſit-down, and make merry with the Fleſh of the Victim [k]. *The Devil a Doctor.*

IN the Year 1272, the Great *Khân* ſent an Army of twelve thouſand Men [l] to guard the Kingdom of *Vocham* and *Karazan*, under the Command of *Neſtardin* [m], an experienced General. As ſoon as the Kings of *Mein* [n] and *Bengala* heard this, they joined their Forces; and the King of *Mein* marched with about ſixty *Conqueſt of* Mein

[a] Shells in the *Baſil*, and Stones in the *Berlin* Copy. [b] *Yunnan* ſtands on the Eaſt-Side of a large Lake; but it is not ſaid that *Yachi* is ſeated on the Lake mentioned in the Text. [c] In the *Latin* Copies, *Caraiam*. [d] In the *Baſil* Copy, *Gogracam*: In the *Berlin*, *Cogaam*. Perhaps *Kokochû*, his ninth Son. [e] In the *Baſil* Edition, for the Piles. [f] *Purchas Pilgr.* p. 91, *& ſeq.* [g] In the *Berlin* Copy, *Ardandan*: In the *Baſil*, *Arcladam*. [h] In the *Italian*, *Vociam*: In the *Baſil* Copy, *Unchiam*: In the *Berlin*, *Once*. [i] *Purchas* obſerves, that *Strabo*, l. 3, reports the ſame to be done by the *Spaniards*, in ſome Places: *Apollonius*, by the *Tibereni*; and *Lerius*, by the *Braſilians*. [k] *Purchas*, as before, *p.* 92. [l] The Author obſerves afterwards, that moſt of thoſe who compoſed this Army were Jeſters, of which the *Khân*'s Court is always full. [m] In the *Baſil* Copy, *Naſcordin*: In *Gaubil*'s Hiſtory, *Naſoulatin*. [n] *Mein* is by *Gaubil*, and other Miſſioners, ſaid to be *Pegu*.

Kitay *Empire.*

thouſand Horſe and Foot, alſo a thouſand Elephants with Towers on their Backs, each carrying twelve or ſixteen Men [a]. The *Tartar* General, who had encamped near a great Wood, knowing the Elephants would not enter it, the King of *Mein* advanced to attack him: But the *Tartar* Horſes were ſo terrified at thoſe Animals, which were placed in the Front, that they could not be brought forward. Hereupon the *Tartars* alighted, and tying their Horſes to the Trees, went-up, and plied the Elephants ſo warmly with their Arrows, that they preſently fled to the Wood, where they broke their Caſtles, and overthrew the Men. Then remounting their Horſes, they fell furiouſly on the King of *Mein*, who after much Slaughter on both Sides, was put to Flight. The *Tartars*, after the Victory, returning to the Wood by the Help of their Priſoners, caught two hundred of the Elephants; and ever after that Time the *Khân* made-uſe of thoſe Beaſts in War. His Forces purſued their good Fortune, and ſubdued the Countries of *Mein* [b] and *Bengala*.

And Bengala.

DEPARTING from the Province of *Kardandan*, you meet with a great Deſcent, which continues for two Days and a half, without any Habitations; only in a very large Plain, where Merchants meet, to trade three Days in a Week. People come-down from the high Mountains of that Country, inacceſſible to Strangers, with Gold, exchanging one Ounce for five of Silver.

Kingdom of Mein.

BEYOND that Plain, fifteen Stages Southward, through Woods and Countries inhabited only by Elephants, Unicorns, and other wild Beaſts, you come to *Mein*, the Capital of the Kingdom of *Mein*, which borders on *India*. The Inhabitants are Idolaters, and have a peculiar Language. When the *Tartars* took this City, they ſpared the Monument erected over the Grave of one of the Kings of *Mein*. It conſiſted of two Marble Pyramids, ten Fathom high, one at the Head, the other at the Feet of the Sepulchre, with a Ball at-Top of each; one covered with Gold, the other with Silver an Inch thick, and both hung-round with Bells of the ſame Metals, which tinkled in the Wind. The Monument itſelf was covered in the ſame Manner. This he cauſed to be erected in Honour of his Soul, and to preſerve his Memory on Earth [c].

THE Province of *Bengala*, which borders South upon *India*, has a King and Language of its own. The Inhabitants are all Idolaters, and have Schools, wherein they are taught Theology and Magic. Their Diet is Fleſh, Rice, and Milk. This Country abounds with Oxen as tall as Elephants, ſeveral Sorts of Spices, and Cotton, with which, and Eunuchs, they drive a great Trade. It is thirty Stages in Length; at the End of which, to the Eaſt [d], is the Province of *Kanjigu*.

KANJIGU abounds with Elephants, Gold, and Spices; but being remote from the Sea, they cannot be eaſily tranſported. The Inhabitants are Idolaters, and tributary to the Great *Khân*. Their Diet the ſame as in *Bengal*. They ſupply the Want of Wine, by Liquor made with Rice and Spices. They adorn their Faces, and all Parts of their Bodies, with indelible Figures of Animals. They have their own Language, and a King who keeps three hundred Wives.

TWENTY-FIVE Days Eaſtward is the Province of *Amû* [e], ſubject to the *Khân*. The Inhabitants worſhip Idols, and have a peculiar Language: They wear Bracelets of Gold and Silver on their Arms and Legs. The Country abounds with Proviſions, Buffalos, Oxen, and excellent Horſes, which are ſent to *India*.

EIGHT Stages Eaſtward ſtill is the Province of *Tholoman* [f], ſubject alſo to the *Khân*. The Country is ſtored with populous Cities, and ſtrong Caſtles. The Inhabitants worſhip Idols, and have a Language of their own; are tall and handſome, but ſwarthy. The Men good Soldiers. They burn their Dead, and hide the Aſhes in the Mountains. Gold is very plenty, and Porcelains [g] uſed inſtead of Money, the ſame as in *Kanjigu* and *Amû*.

FROM *Tholoman* the Road proceeds Eaſtward on a River, along which are many Cities and Caſtles. In twelve Days you arrive at the great City *Chintigui* [h]. The Country is ſubject to the Great *Khân*. The People Idolaters, and valiant. Excellent Cloths are made here, of the Barks of Trees. The Money is Paper. Silk is plenty, and tranſported by the River [i] to other Provinces. The Land is infeſted by Lions; but there are great Dogs which will venture to attack them. A Man ſets two of them on the Beaſt,

[a] They carry commonly not above three or four. [b] The *Chineſe* Hiſtory places the Conqueſt of *Mien* (or *Pegu*) in 1283; in which Year Prince *Siantar*, accompanied by *Kulye*, *Noſulating*, and other Generals from the Weſt, entering that Country from *Yunnan*, ſubdued *Kyang-ſew* and *Taykong*, the Royal Cities, in the eleventh Month. See *Gaubil*'s Hiſt. *de Gentch.* p. 199. [c] *Purchas Pilgr.* p. 93. [d] Here our Author changes his Courſe, from the South-Weſt to the Eaſt, or rather North-Eaſt. [e] In the *Berlin* Copy, *Anyn*: The *Baſil*, in one Place, *Aimu*. [f] In the *Berlin* Copy, *Coloman*. Perhaps it ſhould be *Loloman*, or the Country *Lolo*, in *Yunnan*. See before, *p.* 65. [g] Little Stones, or rather Shells, which ſeem to be the *Kori* Shells. [h] In the *Italian*, *Cintigui*. [i] This ſeems to be the *Kinſha*, mentioned before, which runs along the North of *Yunnan* into *Se-chuen*; or elſe the *Kyang*, which is a Continuation thereof.

and while the latter retreats to some Tree to secure his hinder Parts, which the Dogs always seize upon, plies him with Arrows, that sometimes he falls before he arrives there.

TEN Stages farther you come to *Sidin fû*, and twenty beyond that City to *Jingui* [a]. In four Days more is *Pazan fû*, towards the South, situate in *Katay*, returning by the other Side [b] of that Province. This City, which hath many others under it, stands on a great River; and from thence, by Means of Canals, Goods are conveyed to *Khanbalu*. Paper-Money is current here. Here also Cloth of Gold, and Silks, are made, with beautiful Lances. The People are Idolaters, and burn their Dead. Some are Christians, who have a Church.

DECLINING three Stages from hence, towards the South of *Katay*, is *Changlu*. The Inhabitants, who are Idolaters, burn their Dead; and use Paper-Money. There are fine Peaches here, weighing two Pounds each. Abundance [c] of Salt is made in this City, and its District. They raise great Heaps of Earth, which is impregnated with that Mineral; and, pouring Water on it, wash-out the Salt, which is congealed by boiling, and very white.

FIVE Days Journey beyond *Changlu*, passing still in *Katay* Southward, through many Cities and Castles, is *Changli* [c], through which runs a great River, convenient for Trade.

SIX Stages farther Southward, through the [d] same Kind of Country, is the noble Kingdom, and great City of *Tudin fû*, having eleven others famous for Trade within its District. It had its own King, when subdued by the *Khân* in 1272; is rich in Silk, and has delightful Gardens. *Lukanfor* being made Governor, with eighty thousand Horse under his Command, rebelled against *Kublay*: But an hundred thousand being sent against him, he was defeated, and slain.

SEVEN Stages Southward, still through a fruitful Country stored with Cities, is *Sin-gui-matu* [d], a famous City, washed on the South-Side by a great River; which being divided by the Inhabitants of the Country into two Streams, one runs [e] East towards *Katay*, the other West towards *Manji*; both are crouded with an incredible Number of Vessels, on Account of Trade. Marco Polo. 1272.

PROCEEDING sixteen Stages more Southward, still through trading Cities and Towns, you come to the great River *Karamoran* [e], which is said to flow from the Kingdom of *Un Khân*, or *Presbyter John*, situate in the North. It is very deep, and carries Ships of great Burden. There are upon it, within one Day's Journey of the Sea, [b] no fewer than fifteen thousand Sail, each carrying fifteen Horses, and twenty Soldiers, besides Mariners. This Fleet is kept ready to carry an Army over to any of the Islands, in case of a Rebellion, or to any distant Country. Near the River, in the Part where this Fleet is stationed, is *Koyganzu* [f]; and, on the opposite Side, *Quanzu* [g]; one a great City, the other small [h]. After passing this River, you enter the Kingdom of *Manji*. Karamoran, *or* Whang-ho. Koyganzu City.

HERE the Author gives his Readers Notice, [c] that he is so far from having treated of the whole Province of *Katay*, that he has not described the twentieth Part: What he mentions, being only such as occurred in his Passage through the Province, without meddling with those which lay out of his Road [i].

WE shall only add two Particulars more with Regard to *Katay*. The first concerns their Rice-Wine, made with Spices; which, adds *Polo*, [d] excels even Grape-Wine for agreeable Taste, and sooner intoxicates. The second is that, all over this Province, certain black Stones are digged out of the Mountains, which burn like Timber, and are used by many; because the Wood, though plentiful, would not suffice for heating the Stoves and Baths three Times a Week [k]. These black Stones are the Pit, or Sea-Coal, so common with us: But, as *Purchas* observes, strange to an *Italian*. He adds, that [e] *Æneas Sylvius*, and the (early) *Chinese* Jesuits, have told Wonders of them. *Rice Wine*, *Pit Coal*.

[a] In the *Italian*, *Gingui*. All between this, and *Tholoman*, is omitted in the *Latin* Copies. [b] That must be by the Southern Part, as he set-out by the more Northern Road. [c] In the *Italian*, *Ciangli*. [d] *Matu* signifies a Place of Trade. The Cities above-mentioned do not appear to be all *fû*, or of the first Rank. [e] Or, *Whang-ho*, already mentioned: But then the Course all along from *Jingui*, or from *Pazan fû*, must have been Northward instead of Southward. [f] In the *Basil* Copy, *Corgangui*: In the *Berlin*, *Cyangam*. According to *Magalhaens*, p. 8, *Koyganzu* is *Whay-gan fû*. [g] In the *Basil* Copy, *Caigui*. [h] These Circumstances do not seem to answer so well to the *Whang-ho*, as the *Kyang*; on whose Banks, about the same Distance from the Sea, stands *Ching-kyang fû*, one of the Keys of *China*, with *Qua-cheu* opposite to it. It is true, *Koyganzu* comes nearer *Whay-gan fû*; but then that City is some Miles from the *Whang-ho*, and has not another opposite to it. After all, the Names of the Countries and Places in this Road are so different from those now in use, that it is not possible, from any Circumstances, to determine their Situations. *Magalhaens*, p. 16, supposes *Polo* has corrupted the Names; but the Difference is too great to be owing solely to Corruption. Some of them are, doubtless, the Names given by the *Tartars*, and other Nations; of which *Karamoran*, *Khanbalu*, &c. are Instances. [i] *Purchas Pilgr.* p. 94, *& seq.* [k] The same, *p.* 88.

SECT.

Manji *Empire.*

SECT. IV.

The Author's Travels *through Part of* Manji, *or* Southern China.

Province of Manji. Koyganzu *City.* Paughin *City.* Kaim *City.* Yangui *City.* Nanghin *City.* Sianfu *City.* Singui *City. River* Kyang. Kayngui. Chinghian fû, *or* Chingchang fû. Tinguigui, *or* Chang-chew. Singui, *or* Su-chew fû. Quinſay, *or* Hang-chew. *The Markets: Vaſt Plenty there. Common Women. The Inhabitants: Their Character, and Occupations. The Lake deſcribed. Hoſpitals. Aſtrologers. Guards of Bridges. The Government. The Imperial Palace, and Apartments. Groves and Gardens. Number of Inhabitants. Revenue to the* Khân. Ta-pinzu, *or* Tayping ſû. Gieza, *or* Kyu-chew. Que-lin fû, *or* Kyen-ning fû. Kongiu *City.* Zaytum *Port. Kingdom of* Quinſay: *Government and Forces. Conqueſt of* Manji *by* Bayan Centoculi, *the* Mongol *General.*

Province of Manji.

THE Province of *Manji* [a], according to our Author, was the moſt rich and famous throughout the Eaſt. It contained nine Kingdoms, into which it was divided by the Great *Khân:* But *Polo* ſaw only two of them, called *Quinſay* and *Kongiu*, which ſeem to have been compoſed out of *Che-kyang*, *Fo-kyen*, and Part of *Kyang-nan*. His Travels alſo were confined chiefly in the maritime Parts of them.

Koyganzu *or* Whaygan ſû.

HAVING paſſed-out of *Katay* into *Manji*, you find the fair and rich City of *Koyganzu* [b] (before-mentioned) ſituate towards the South-Eaſt and Eaſt, in the Border of that Province, on the River *Karamoran*. The Place is always crouded with trading Veſſels; and Abundance of Salt is made there.

a FROM thence you travel South-Eaſt along a Cauſeway, having on both Sides Fens, and navigable Waters: Nor is *Manji* to be entered in any other Part, but by Shipping. At the End of one Day's Journey, you find *Paughin* [c], a great and fair City. The *Khân*'s Paper-Money is current here.

ONE Stage farther South-Eaſt, is *Kaim* [d], a famous City, abounding with Fiſh and Game, Pheaſants as large as Peacocks three for a Groat.

b A Day beyond *Kaim* South-Eaſt, is *Tingui* [e], a ſmall, but plentiful City, of great Trade, and Reſort of Shipping, three Stages from the Ocean; in the Way to which are many Salt-Pits, affording Salt in Abundance. After this you meet with *Chingui* [f], a great City, whence the Country is furniſhed with Salt.

FROM this Place riding South-Eaſt [g], you meet with *Yangui* [h], a noble trading City, with twenty-ſeven others under its Juriſdiction. Arms

c and warlike Inſtruments are made here. It is the Reſidence of one of the twelve Barons who govern the Provinces; and here, in Place of one of them, *Marco Polo* commanded for three Years, by Commiſſion from *Kublay*.

NANGHIN [i] is a Province to the Weſt, one of the greateſt and moſt ſplendid in all *Manji*, and a Place of great Commerce, the Cuſtoms bringing a great Revenue. Cloth of Gold and Silks are made here. Corn is plenty, and Paper-

d Money current [k].

SIAN FU [l] is a great and noble City, commanding over twelve other rich ones: So ſtrong, that it was beſieged three Years in vain by the *Tartars*; for being encompaſſed with Lakes, there was no Way into it, but on the North, by which it was ſupplied with Proviſions by Water [m]. The *Khân* being troubled at their bad Succeſs, *Nicholo*, and *Maffio Polo*, then at Court, offered their Service to make Engines, after the

e *European* Manner, for caſting Stones three hun-

[a] This is the Southern-Part of *China*, then poſſeſſed by the *Chineſe* Emperors of the *Song* Race, as *Katay* was the Northern-Part. *Manji*, according to *Magalhaens*, p. 6, is derived from *Mantzû*, that is, *barbarous*. The Northern *Chineſe*, to be even with the Southern, who called them *Pe-tay*, or, *Fools of the North*, nickname them *Nan-man*, *Barbarians of the South*, or, ſimply, *Man-tzû*, *Barbarians*. The *Tartars* likewiſe, in Contempt, call the *Chineſe*, *Man-zu*. But as theſe People, eſpecially the *Eaſtern Tartars*, cannot well pronounce the *tzû*, they ſay, *Manji*, as the Author had twenty Years obſerved; which Word *Polo* miſtook for the Name of the Country. [b] In the *Baſil* Copy, *Conigangui:* In the *Berlin*, *Coygangui*, [c] In the *Latin* Copies, *Panchi*. This ſeems to be *Pau-in kyen*, South of *Whay-gan fû*. [d] Perhaps *Kau-yew-chew*, on the Lake *Kau-yew*. In the *Baſil* Copy, *Chain:* In the *Berlin*, *Caym*. [e] In the *Berlin* MS. *Cyngui*; perhaps *Tſing-kyang kyen*, near the Mouth of the *Kyang*. [f] In the *Italian*, *Cingui*. *Gaubil* obſerves, that *Polo*'s *gui* anſwers to *chew*; which Word denotes a City of the ſecond Rank, as *fû* does one of the firſt Order. [g] The *Baſil* Copy ſays Northward. [h] In the *Italian*, *Jangui:* In the *Berlin* Copy, *Yangni*. The *Baſil* does not name it. Perhaps *Yang-chew fû*, between the Lake *Kau-yew*, and City *Qua-chew* on the *Kyang*, oppoſite to *Ching-kyang fû*. [i] In the *Baſil* Copy, *Navigui:* In the *Berlin*, *Nayngui*; doubtleſs by Miſtake in copying. This, probably, is *Nan-king*, Capital of *Kyang-nan*. [k] *Purchas Pilgr.* p. 96. [l] This, according to *Gaubil*, p. 157, is *Syang-yang fû*, in *Hu-quang*, on the River *Han*, deſcribed before, *p.* 45. [m] *Gaubil* ſays, p. 157, that it is evident *Polo* has deſcribed this City from the Report only of others.

dred

dred Weight [a]. Their Carpenters were *Neſtorians*, who made three *Mangani*. Theſe being brought before the City, the firſt Stone falling on a Houſe ſo demoliſhed it, that the Inhabitants immediately capitulated.

FROM *Sian fû*, to the City *Singui*, are fifteen Miles South-Eaſt [b], which, though not large, has a vaſt Multitude of Ships, being ſeated on the *Quian* [c], the greateſt River in the World. Its Breadth, in ſome Places, extends to ſix, eight, and ten Miles: Its Length above an hundred Days Journey. Innumerable other navigable Rivers fall into it. It flows through ſixteen Provinces, and waſhes two hundred Cities. It is full of trading Ships; but the greateſt Commodity is Salt [d]. *Polo* ſaw once at *Singui* five thouſand Veſſels; yet ſays other Cities on that River have more. They are all covered, having but one Maſt and Sail. Their uſual Burden from four to twelve thouſand *Venetian Cantari*. They uſe no Hempen Ropes, except for the Maſt and Sail; but ſplit Canes [e] into thin Pieces, and twiſting them, make very ſtrong Cordage, ſome two hundred Fathom long; with which they draw their Ships, by Means of ten or twelve Horſes, up-and-down the River. In many Places are rocky Hillocks, with Monaſteries on them, and all the Way Villages and Places inhabited.

KAYNGUI [f] is a little City [g] South-Eaſtward on the ſame River, where annually Corn and Rice is brought, in order to be carried thence to *Khânbalu*, by Lakes, Rivers, and the great Canal made by Command of the *Khân*, to avoid going by Sea: A Work truly wonderful; and along the Waters are raiſed great Cauſeways, for Conveniency of travelling by Land. In the Midſt of the River is a rocky Iſle, on which is erected a great Temple and Monaſtery, containing two hundred Monks; theſe being the Mother of all other ſuch Structures. Marco Polo. 1276. Kayngui.

CHINGHIAN FU [h] is a rich trading City, with Plenty of Neceſſaries. It has two Churches, built by *Maſakis* the *Neſtorian*, ſent Governor thither by the *Khân* in 1274 [i]. Chinghian fû, *or* Ching-chang fû.

FROM thence three Stages South-Eaſtward, paſſing many Cities and Caſtles, you come to *Tinguigui* [k], a great and fine City, double walled. *Kinſam Bayan* [l], the *Tartar* General, having ſent a Body of Chriſtians, called *Alans*, againſt the Place, the Beſieged retired within the inner-Wall: The *Alans* then took Poſſeſſion of the outer Incloſure, where finding Plenty of Wine, they made themſelves drunk: So that the Citizens came, and ſlew them all in their Sleep. For which Reaſon *Bayan* afterwards having taken the City, put them all to the Sword [m]. Tinguigui, *or* Chang-chew.

[a] *Purchas* obſerves, that hence it appears, that they had not the Uſe of Cannon. According to *Gaubil*, p. 157, the *Chineſe* Hiſtory ſays, they were the *Whey-hu*, or *Mohammedans*, who contrived theſe Engines; but adds, that the Hiſtorian might eaſily have miſtaken one for the other; which to us ſeems very unlikely. [b] Perhaps *Kin-chew fû*, which is the neareſt City on the *Kyang*, but a hundred Miles diſtant to the South, which does not at all agree with the Diſtance aſſigned; perhaps it ſhould be five Days Journey inſtead of fifteen Miles. [c] Or, *Kyang*; called alſo *Yang-tſe*, *Kyang*, and *Ta-kyang*. [d] This agrees with what the Miſſioners ſay before, *p.* 131. e. [e] Bambû. [f] In the *Baſil* Copy, *Caigui*: In the *Berlin*, *Caygni*. [g] *Magalhaens* ſays, this Place, properly, is neither a Town, nor City. The *Chineſe* call it *Chin-kyang-kew*, that is, *the Mouth of the Son of the River*, in Regard an Arm of the River ſeparates there, and runs as far as *Hong-chew*, the Capital of *Che-kyang*. On each Side of this Mouth there is a *Ma-tew*, or *Place of Trade*, where Barks come to Anchor in the Night; which, from the Number of Veſſels, *Polo* might call a Town, though not walled, or large enough for a City, *Magalhaens*'s Relation of *China*, p. 7.—To us this Place appears rather to be *Quachew*, which is a *Ma-tew*, and oppoſite to *Ching-kyang fû*, with ſuch an Iſland or Rock between. See before, *p.* 27. Whatever may be the Caſe, it plainly ſhews how difficult a Thing it is to trace the Places mentioned by *Polo*: For here is a Skip at once of no leſs than five hundred Miles, without any Light to guide us, but the Bearing; which alſo muſt be wrong: For the Mouth of the *Kyang* lies rather North-Eaſt from *Kin-chew fû*, or any other City on its Banks thereabout. However this be, with *Magalhaens*'s Leave, *Tſe-kyang-kew*, and not *Chin-kyang-kew*, is *Chineſe* for *the Mouth of the Son of the River*. [h] In the *Italian*, *Cinghian fû*: In the *Baſil* Copy, *Cingiam fû*: In the *Berlin*, *Sygian fû*. We learn from *Magalhaens*, p. 8; and *Gaubil*, p. 172, that this Place is *Ching-chang fû*, deſcribed before, *p.* 26, on the South of the *Kyang*, oppoſite to *Quachew*. But for any Thing that appears from *Polo*'s Account, it might be as far from that Place, as we find *Keyngui* is from *Sian fû*. [i] The *Baſil* and *Berlin* Copies, in 1288; which muſt be falſe. [k] In the *Baſil* Copies, *Cingingui*: In the *Berlin*, *Chimchimgui*. [l] *Polo* ſays, *Chinſam* ſignifies *an hundred Eyes*: But *Gaubil*, who will have it to be a Corruption of *Tſay-ſyang*, ſays this Word ſignifies *Miniſter of State*. He writes the Name *Pe-yen*, not *Bayan*. See *Hiſt. de Gentch.* p. 171. Note 4. [m] This Circumſtance ſhews *Tinguigui* to be *Chang-chew*: So that *Polo* has for once hit the Bearing and Diſtance pretty exactly; *Chang-chew fû* being nearly as he puts it, from *Chinghian fû* (or *Ching-chang fû.*) *Gaubil*, in his *Hiſt. de Gentch.* p. 170, and 172, informs us, that *Chang-chew fû* was taken by *Peyen*, the ſecond Time, in 1275, and the Inhabitants all ſlain; for what Cauſe, is not mentioned: But this is the only City that great General ever ſhewed ſo much Severity to. He had, in his Army, ſome of a Tribe called *Walonno*; and of them, perhaps, *Polo* has made his *Alans*; and in Conſequence of being *Alans*, *Chriſtians*.

SINGUI,

Manji *Empire.*

Singui, *or* Su-chew [a].

SINGUI [a] is a great and populous City, a twenty Miles [b] in Compaſs. It abounds with Riches, Merchants, and Handicraſts, Phyſicians, Sorcerers, and Philoſophers. It has ſixteen Cities of great Trade under its Juriſdiction. The Mountains produce Plenty of Rhubarb and Ginger. It hath many Silk Manufactories. *Singui* ſignifies *the City of the Earth.*

ONE Day's Journey from thence is *Vagiu*, where is Abundance of Silk, Merchants, and Artificers: And three Days farther, through a well-peopled Country full of Cities, Caſtles, and Villages, you arrive at *Quinſay* [c].

Quinſay, *or* Hang-chew

QUINSAY ſignifies *the City of Heaven* [d], for the World hath not its Fellow, it being a terreſtrial Paradiſe. *Polo*, who was often here, ſet-down every Particular relating to it. He ſays, it is commonly reckoned an hundred Miles in Compaſs, for the Streets and Canals are very wide; and it has very large Markets. On one Side there is a Lake of clear Water [e], and, on the other, a great River; which entering the City in many Places, and carrying-off the Filth, runs through the Lake, purſuing its Courſe to the Ocean, twenty-five Miles diſtant East North-East [f]. Near to its Mouth is a City, called *Gampu* [g], where the Ships from *India* arrive. The Canals are ſaid to be covered with twelve thouſand Bridges, ſome ſo high, that a Ship with her Maſt up may paſs underneath, while Chariots and Horſes croſs it over Head. On the other Side of the City it is incloſed by a Ditch forty Miles long, made by the ancient Kings, very broad, and filled with Water from the River. The Earth dug out of it ſerves as a Bank, or Fence.

The Markets,

AMONG infinite Markets through the City, there are ten principal ones, each two Miles ſquare, and four Miles aſunder, all fronting the chief Street; which is forty Paces wide, and runs in a Line the whole Length of the City, with many Bridges croſſing it. It contains many Palaces with Gardens, mixed with the Houſes of Trades-Folks; and ſuch a Multitude of the People paſſing to-and-fro, that one would wonder where Victuals could be found to ſupply them. A Cuſtom-Houſe Officer told *Polo*, that there was daily conſumed of Pepper in *Quinſay*, forty-three *Soma*, each two hundred and twenty-three Pounds: Whence the Quantity of Proviſions may be gueſſed at. On each Side there is a Pavement ten Paces broad, the middle-Part being gravelled, with Paſſages for the Water. It is full of long Chariots, each carrying ſix Perſons ready for Hire, to take the Air, or the like. All the other Streets are paved with Stone. Behind the Markets there runs a ſpacious Canal, on whoſe Sides are large Store-Houſes of Stone for the *India*, and other Merchants.

THESE Markets, in which many Streets meet, are frequented three Times a Week by forty or fifty thouſand People; who bring all Sorts of Proviſion of Herbs, Fleſh, and Fowl, in ſuch Plenty, by Means of the Lake, that you may have two Geeſe, or four Ducks, for a *Venetian* Groat. Among the Fruits, are excellent Pears, each weighing ten Pound. Raiſins are brought from other Places, becauſe no Grapes grow about *Quinſay*; which is ſupplied with infinite Fiſh daily from the Ocean, as well as the Lake. All thoſe Market-Places are encompaſſed with high Houſes, in whoſe Shops are ſold all Sorts of Goods and Merchandizes: In ſome of them there are Baths, both of cold and hot Water. The firſt for the Natives of both Sexes, who uſe them from their Infancy, waſhing every Day: The latter for Strangers, not accuſtomed to the other Sort.

PHYSICIANS, Aſtrologers, and Proſtitutes, are very numerous hear: The latter ply not only near the Markets, where they have Places appointed; but in all the other Streets. At each Corner of the Market-Places is a Palace, where a Magiſtrate reſides, to determine Diſputes between the Traders, and have an Eye to the Guards of the Bridges.

THE Inhabitants are fair-complexioned, and go clad moſtly with Silk, which there abounds. Their Houſes handſome, and adorned with Pictures, and other coſtly Furniture. They are very peaceable, without any Strife, or Contention; living in ſuch Unity, that a whole Street ſeems but as one Houſe. Such Regard is paid to the conjugal State, that no Jealouſy reigns among them; it being reckoned infamous to ſpeak an immodeſt Word to a married Woman.

THEY are extreamly courteous to Strangers, and ready to adviſe them in what concerns their Affairs: But they have no Genius for War, nor ſo much as keep Arms in their Houſes. The Mechanics are divided into twelve principal Trades, to each of which belong a thouſand

[a] In the *Berlin* Copy, *Cynggui*. This, as *Martini* and *Gaubil* obſerve, is *Su-chew*, deſcribed before, *p.* 2[illegible] which in thoſe Days was named *Ping-kyang*. [b] The *Latin* Copies have ſixty Miles. [c] *Purchas Pilgr.* P[illegible] 97. [d] *Magalhaens*, p. 18, ſays, this Explanation is falſe, and that *Quinſay*, *King ſay*, or rather *King-ſe*, ſignifies *the Maſter Court*. *Gaubil*, p. 177, ſays, *King-tſe*, or *King-che*, is the Name given often by the Chi[illegible] to the Place where the Emperor keeps his Court; and that its Name, at this Time, was *Ping-kyang*. [e] See the Deſcription of *Hang-chew* before, *p.* 41. [f] The Bearing and Diſtance here is pretty juſt. [g] Perhaps *Ning-po*, though at a great Diſtance from the Entrance of the River, in the Bay before it.

Shops

Shops; and to each Shop, or Work-House, from ten to forty Workmen, under one Master: And though the Law obliges the Son to be of the Father's Trade, yet the Rich are permitted not to work themselves, but go richly dressed, especially their Wives. In every Street there are Stone-Towers, to secure Peoples Goods in case of Fire, which the Wooden-Houses here are subject to.

THE Lake is surrounded with handsome Buildings, large Palaces of the chief Men, Temples, and Monasteries. In the Middle are two Islands, b and on each Isle a Palace with a Multitude of Apartments, where the Citizens resort to celebrate Marriages, or give Entertainments; for an hundred may be accommodated at once in several Rooms. The Pleasure-Boats and Barges that ply on the Water, are covered with a Pavilion, or Chamber, neatly painted, and flat over Head, where Men stand with Poles to push-forward the Vessel, the Lake being but shallow. Hither in the Evenings, after Work, c they take their Diversion with their Friends, or Women; or else pass their Time in riding through the City in Chariots.

THERE are a great Number of Hospitals in *Quinsay*, founded by the ancient Kings, with large Revenues. Thither are carried those, who through Sickness cannot labour; but when they have recovered their Health, they are compelled to work.

THE Markets are crouded with Astrologers, d whom they consult on every Occasion; as on a Marriage, or the Birth of a Child, to know what Fortune will attend them. When a Person of Note dies, the Kindred, cloathed in Canvas, accompany him with musical Instruments, and singing Prayers to their Idols, to the burning-Place, where they cast Paper-Figures into the Fire (as hath been before remarked.)

MOST of the Bridges are guarded by ten Men, five by Day, and five by Night; and in each e Guard a Box with a great Bason in it, whereon they strike the Hours, beginning at Sun-rise, and ending at Sun-set [a], when they begin to number them again. They patrol to see if any keep a Candle lighted, or walk abroad after the limited Time of Night. In case of Fire, the Bridge-Guards resort from divers Parts to quench it, and secure the Goods in Boats, the Islands of the Lake, or the above-mentioned Towers: For in the Night none of the Citizens dare stir-out, except those whose Houses are in Danger.

QUINSAY is governed by one of the Vice-Roys set-over the nine Provinces of *Manji*, and here the *Khân* keeps some of his best Troops. There are likewise, in many Places, Mounts raised of Earth [b], a Mile distant from each other, with a Wooden Centry-Box thereon, where a Man, with a Mallet, strikes a great Board, which he holds in his Left-hand; the Sound whereof gives Notice to the next Guards, in case of Fire, Insurrections, or the like [c]. Marco Polo. 1276.

THE Palace where *Fanfur* [d], King of *Manji*, formerly resided, stood in a square Plot of Ground, b inclosed with high Walls ten Miles in Compass, and divided into three Parts: The middle Part was entered by a Gate, having on each Side large Galleries, whose Roof was sustained by Pillars painted with Gold and Azure. These grew larger gradually; that at the End largest of all: The Roof gilded, and the History of the former Kings curiously painted on the Walls [e]. Under those Terrasses, on certain Festival-Days, *Fanfur* feasted his chief Lords, with the great Doctors, and rich Citizens of *Quinsay*, ten thousand at a Time, for ten or twelve Days successively, with incredible Magnificence. *The Imperial Palace.*

BEHIND this middle Building was a Wall, and Passage, which divided the Palace. In this was a Sort of Cloyster, with Pillars supporting the Portico, or Terras, that surrounded it, wherein were the King and Queen's Apartments. From this Cloyster you entered a covered Gallery six Paces wide, and extending to the Lake. On each Side of the Gallery were ten Courts like Cloysters, each containing fifty Apartments, with their Gardens. In these were lodged a thousand young Ladies, Concubines to the King; who sometimes with them, sometimes with his Queen, took the Pleasure of the Water in his Barges. *And Apartments.*

THE other two Parts of the Inclosure were divided into Groves, Lakes, and Gardens, planted with Trees, where all Sorts of Beasts, e Roebucks, Stags, Horses, Hares, and Rabbits were kept: None had Access there, but the King and his Ladies, who hunted the Game: After which stripping themselves in the Groves round the Lakes, they came-out naked before *Fanfur*, and went into the Water to swim. Sometimes he dined in these delightful Shades, attended by his Damsels, without once thinking of Arms; which voluptuous Indolence cost him dear. This was told *Polo* by a rich Merchant, f who had been a great Favourite with *Fanfur*, and shewed our *Venetian* the Palace, where the *Khân*'s Vice-Roy then resided. He found the first Galleries intire, as they were before; but *Groves and Gardens.*

[a] Or Beginning of the Night, as in the Original. [b] *Purchas* says, Wooden Ramparts built. [c] *Purchas Pilgr.* p. 98, & *seq.* [d] In the *Basil* Copy, more correctly *Facfur*, agreeably to what the *Arabs* and *Persians* write. *Abu'lfeda* stiles the Emperor of *China*, *Fagfur*, or *Tumgaj Khân*; others *Bagbûn*. [e] The Description in the *Latin* Copies is not near so full.

Manji Empire.

the Apartments of the Ladies ruined: The Wall also that incloſed the Woods and Gardens was fallen down, the Beaſts and Trees being gone.

Numb er of Inhabi tants.

POLO ſaw a State of the Revenue of *Quinſay*, and Roll of Inhabitants taken while he was there; by which there appeared to be an hundred and ſixty *Toman*, ten thouſand each, of Fires, that is, Families, or Houſes, making in all ſixteen hundred thouſand [a], of which there is only one Church of *Neſtorians*. Every Houſe-keeper is obliged to have written over his Door the Names of all the Perſons, Male and Female, dwelling therein; alſo the Number of Horſes; and as the Family increaſes, or decreaſes, Names are to be added, or eraſed: An Order obſerved through both *Manji* and *Katay*. In like Manner Inn-keepers write the Names of their Gueſts, with the Time of their Departure, in a Book which they ſend daily to the Magiſtrates reſiding in the Market-Places. In *Manji* the Poor, who are not able to bring-up their Children, ſell them to the Rich.

Revenue to the Khân.

THE Revenue which accrues to the *Khân* yearly from this City, and the reſt dependent on it, being the ninth Part of all *Manji*, is firſt with Regard to Salt, eighty *Tomans* [b] of Gold, which amount to ſix Millions, and four hundred thouſand Ducats. This vaſt Sum is owing to the great Number of Lakes on the Coaſt of *Quinſay*, which is a maritime Kingdom, where the Water in Summer is condenſed into Salt, ſufficient to ſupply five other Kingdoms of *Manji*. Sugar, which grows here, Spices, and Rice-Wine, pay three Parts, and one Third in the Hundred. The twelve Trades, occupying twelve thouſand Shops, as well as all Goods brought-in, or carried thence by Sea, do the ſame. Merchants from *India*, and other foreign Countries, pay ten *per Cent*. The *Khân* hath likewiſe the Tithe of all Animals, Vegetables, and Silk. All which Duties, excluſive of the Salt, by a Computation made in *Polo*'s Preſence, amounted to two hundred and ten *Toman*, that is, ſixteen Millions and eight hundred thouſand, in Gold.

ONE Day's Journey South-East from *Quinſay*, the Road all the Way full of Houſes, Villages, and Gardens, is *Tapinzu* [c], a fair and great City, in the Juriſdiction of *Quinſay*. Three Days hence, South-Eaſt, is *Uguiu* [d]. The Road beyond, for two Days, ſeems to be through one continued City: And three Days farther you find the City *Gengui* [e], fair and large. Travelling South-Eaſt four Days, through a Country where there are Oxen, Buffalos, Goats, and Hogs, but no Sheep, you arrive at the City *Zengian* [f], built on a Hill in the Midſt of a River, which the Hill divides, one Part running South-Eaſt, the other North-Weſt.

THREE Days Journey thence, through a very populous Country like the former, is *Gieza* [g], a great City, the laſt in *Quinſay* Kingdom: After which you enter the Kingdom of *Konka* [h], the principal City whereof is *Fugiu* [i]. Travelling South-Eaſt through Hills and Dales, you find a well-inhabited Country, full of Lions, Game, and Fowl. Galengal and Ginger are plenty, eighty Pounds of the latter for a *Venetian* Groat: Alſo a Plant like Saffron in Colour, Smell, and Quality, uſed in Sauce. The People are Merchants; and when they go to War, ſhave the Head over, and paint their Faces with Azure. They are all Foot, except the General, who rides. They uſe Swords and Lances, are very cruel, and when they kill an Enemy, firſt drink his

[a] Theſe, at no more than ſeven People to a Family, amount to eleven Millions two hundred thouſand Souls; which is not impoſſible, and a more moderate Account than ſome Miſſioners have given us of *Pe-king*, and *Nan-king*. [b] *Polo* obſerves, that a *Toman* contains eighty thouſand *Sari* of Gold, and that each *Sari* is more than a Gold Florin. [c] In the *Baſil* Copy, *Tampingui*: In the *Berlin*, *Tampigni*. This City, according to *Magalhaens*, p. 8, is *Tay-ping fû*, a City of *Kyang-nan*, on the *Kyang*, one Stage or Day's Journey to the South-Weſt of *Nan-king*, and five or ſix to the North-Weſt of *Hang-chew*. If this be the Caſe, it ſhews how almoſt impoſſible it is to trace *Polo*, with any Degree of Certainty, through the greater Part of his Itinerary: For beſides giving the Bearing and Diſtance wrong, he omits a Circumſtance of the *Kyang*, which might have helped to the Diſcovery. [d] Perhaps *Hu-chew fû*, which lies nearly in that Poſition, and two Stages North-Weſt of *Hang-chew fû*. *Uguiu* is omitted in the *Latin* Copies. [e] In the *Berlin* MS. *Chengui*: In *Engliſh* Characters, *Kewgui*. Perhaps *Yen-chew fû* in *Che-kyang*, two Days Journey South-Weſt of *Hang-chew fû*, and on the ſame River, and South South-Weſt of *Hu-chew fû*. [f] In the *Baſil* Copy, *Ciangian*. Perhaps *Sven-ping hyen*, a Stage North-Weſt of *Chu-chew fû* in *Che-kyang*; if not *Chew-chew fû* itſelf. [g] In the *Baſil* Copy, *Cugui*: In the *Berlin*, *Cingui*; a Miſtake, perhaps, for *Cuigui*. Theſe Readings are more exact than the *Italian*, and ſhew the Place, as *Martini* obſerves, to be *Kyu-chew fû*, on the Borders of *Che kyang*. See before, *p.* 43. The ſame Author obſerves, that the *Tartars* ſay *gui* inſtead of *chew*: But *i* is often written *giu* in the *Italian*, or *ju*; which Variations in the Copies ſhew, that great Miſtakes have been committed between the Pen and the Preſs. [h] In the *Italian*, *Concha*. The *Latin* Copies mention nothing of *Konka* here, but call this the Kingdom of *Fugui*, making it a different Kingdom from that of *Konka*, which they ſpeak of afterwards; but, as appears, out of its Place. [i] In the *Baſil* Copy, *Fugui*: In the *Berlin*, *Seugni*. This is plainly *Fu-chew*, or *Fu-chew fû*, the preſent Capital of *Fo-kyen*. *Martini* on the Place, *Magalhaens*, p. 8, of his *China*, and *Gaubil*, p. 180, of his Hiſt. of *Jenghiz Khân*, &c. are of the ſame Opinion. However, there is great Variation among the Copies, with regard to this, and other Cities, whoſe Names ſeeming ſometimes to be omitted, at other Times corrupted and tranſpoſed, cauſe great Perplexity.

Blood, and then eat his Fleſh, preferring the a human to that of other Animals, provided the Party does not die of Sickneſs.

AFTER travelling ſix Days, you come to *Quelin fû* [a], a great City, with three Bridges [b], each eight Paces broad, and above an hundred long. The Women are beautiful: Silk and Cotton plenty. *Polo* was told, they have Hens without Feathers, and hairy like Cats, yet good Food.

THREE Stages [c] farther is the City *Unguem* [d], where is Abundance of Sugar, ſent thence to b *Khanbalu*. They knew not how to make it before the Conqueſt, only boiling it into black Paſte; till ſome *Babylonians* in the *Khân*'s Court taught them to refine it with certain Wood-Aſhes.

FIFTEEN Miles beyond is *Kangiu* [e], ſtill in the Realm of *Konka*, where an Army is kept to guard the Country. Through the City paſſes a River a Mile broad, finely built on both Sides, and crouded with Ships laden with Sugar [f], and c other Goods. It falls into the Sea, five Days diſtant South-Eaſt, at *Zaytum* [g], a Port where the *Indian* Ships arrive, and then paſs-up the Stream to that rich and delightful City, having Camphire-Trees in View along the Banks.

ZAYTUM is a famous Port, one of the moſt commodious in the World, and greatly reſorted by *Indian* Ships. The Pepper carried to *Alexandria* in *Egypt* is ſcarce the hundredth Part of what is brought hither. All Merchandize pay d ten *per Cent*. In the City much Arras and Embroidery is made. The River, which is very wide and ſwift, divides, one Arm running to *Quinſay* [h]. At the Place of Diviſion ſtands *Tingui* [i], where *Polo* was told Porcelain Diſhes were made, of a certain Earth, which is raiſed in great Heaps, and left untouched for thirty or forty Years. Being thus refined by Time, it is fit for making Veſſels, which they paint, and bake in Furnaces: You may have eight for a *Venetian* Groat. Marco Polo. 1276.

THE Kingdom of *Konka* yields near as great a Revenue as that of *Quinſay*. *Polo* was in both theſe Kingdoms of *Manji*: But as he was in none of the other ſeven, he forbears ſpeaking of them: For *Kublay*, after his Conqueſt of this Country, which before made but one Monarchy, divided it into nine Kingdoms, and ſet a King, or Vice-Roy, over each, to adminiſter Juſtice. They annually return the *Khân* an Account of the Revenue, and other Affairs relating to this Province; and every third Year are changed, as all other Officers are. *Kingdom of* Quinſay.

THE Vice-Roy of *Quinſay* has under his Go- *Government* vernment above an hundred and forty Cities, all *and Forces.* rich and great; there being in all *Manji* twelve hundred ſuch, wherein the *Khân* maintains Gariſons of one, ten, or twenty thouſand Men, who are not all *Tartars*, for theſe are Cavalry, and keep where they can exerciſe their Horſes: But into *Katay* out of *Manji*, thoſe fit to bear Arms are ſent; and *Katayans* into *Manji*. Theſe are draſted-out every third Year, and ſtationed in Places twenty Days Journey from their own Country; where they remain four or five Years, and then are replaced by others. The City of *Quinſay* hath conſtantly a Gariſon of thirty thouſand Soldiers, and none fewer than a thouſand Horſe and Foot together. In maintaining ſuch numerous Forces, moſt of his vaſt Revenues are expended: But then, by this Means, if any City rebels, he can preſently form an Army out of the neighbouring Gariſons to ſubdue it [k].

IN 1269 *Manji* had a King, named *Fanfur* [l], more rich and potent than any of his Predeceſ- *Conqueſt of* Manji

[a] In the *Berlin* MS. *Quemi fû: Martini*, from the Mountains lying between *Cuigui*, or *Kyu-chew*, in *Che-kyang*, and *Quelin fû* in *Fo-kyen*, concludes this laſt City to be *Kyen-ning fû*, deſcribed before, *p.* 34. *Magalhaens* is of the ſame Opinion, *p.* 8, of his *China*. As *Quelin fû* ſeems to be a *Chineſe* Name (the Capital of *Quang-ſi* being the ſame) it is much *Martini* did not find it among the Names which *Kyen-ning* took from Time to Time, according to the Cuſtom of *China*. [b] Doubtleſs, over the River which runs cloſe by the Walls, according to the *Baſil* Copy; which adds, that the Bridges are adorned with magnificent Marble Pillars. [c] The *Baſil* Copy makes the Diſtance but fifteen Miles. [d] In the *Latin* Copies, *Unquem*: But who can pretend to ſay what City it is at preſent, the Names and Diſtance are in ſuch Confuſion? [e] The *Baſil* Copy writes *Fugui*; the *Berlin*, *Scugui*, adding, that it is the Capital and Entrance of the Kingdom of *Concha*. [f] *Martini*, who uſed the *Baſil* Edition, where this Place is, called *Fugui*, proves it to be *Fu-chew*, from this Circumſtance of the Sugar: But Sugar might have been ſhipped at *Chang-chew fû*, and other Ports, as well as this. [g] Called *Zarten* in the *Baſil*, and *Caycan* in the *Berlin* Copies; which differ here, and in other Places greatly, both in the Names and Deſcription of Places, from the *Italian*. *Martini* takes *Zarten* to be either *Chang chew fû*, or elſe *Sven-chew fû*, five Stages from *Fu-chu*, as *Polo* places *Zarten*. *Gaubil* ſays, *Sven-chew fû* is *Polo*'s *Zarten*, Hiſt. *de Gentch.* p. 180. [h] There is no River in *Fo-kyen*, to which this Deſcription anſwers; but Exactneſs is not to be expected from our Author, who in that, and many other Particulars, depended on Information. [i] *Tingui* alſo in the *Berlin* Copy; but *Figui* in the *Baſil*: Perhaps *Ting-chew fû*, near the Borders of *Kyang-ſi*: For we are not to mind the Author's Account of the River. [k] *Purchas Pilgr.* p. 100. [l] In the *Baſil* Copy, *Facfur*. *Abu'lfeda* ſtiles the King of *Katay*, *Fagfur*; others *Bagbûn*. See *Renaudot. Ancienn. Relat.* p. 182, and 186. Which ſhews it was the Title given the *Chineſe* Emperor, either by the *Tartars*, or the People in the Weſt of *Aſia*, from whom *Polo* muſt have had it.

Manji *Empire.* sors for an hundred Years before, but of a peaceable Diſpoſition. All his Cities were ſurrounded with Ditches filled with Water, a Bow-ſhot wide; and he was ſo beloved by his Subjects, that he ſeemed invincible. This made him ſo ſecure, that he kept no Horſe in Pay, and gave himſelf up to Pleaſure with his Women. The People following his Example, loſt the Uſe of Arms: Yet he took ſuch Care to preſerve Peace and Juſtice, that Shop-keepers left their Doors open all Night, and the Roads were free from Robbers. He was very charitable, and relieved the Poor. Every Year he took-up twenty thouſand Infants, expoſed (in the Streets) by their Parents through Neceſſity; and having educated them, put them out to Trades, or married the young Men and Women together.

By Bayan Centoculi, AGAINST this Prince *Kublay Khân* ſent a great Army and Fleet, commanded by *Kinſan Bayan* [a]; who coming before *Koyganzu* [b], ſummoned it to ſurrender. On its refuſing, he paſſed-on to the next, and ſo to the third and fourth; which in like Manner rejected his Summons: But the next Place he marched to, he aſſaulted with great Fury, and taking it by Force, put every Soul to the Sword [c]: Which ſo terrified the other Cities, that they yielded forthwith.

The Mongol *General.* *BAYAN* being reinforced with a ſecond Army, marched againſt *Quinſay* the Capital, from whence the King fled with his Treaſure, to certain impregnable Iſlands in the Sea, where he afterwards died, leaving his Conſort to defend the City [d], as well as ſhe could. It ſeems King *Fanfur* [e] had been told by his Diviners, that his Kingdom ſhould never be taken from him, but by one who had an hundred Eyes; which gave the Queen Hopes of preſerving *Quinſay*, in a Perſuaſion that ſuch a Man was never born. But hearing one Day, that the Name of the *Tartar* Commander ſignified an hundred Eyes [f], ſhe judged him to be the Man appointed by Fate to take the City, and ſo delivered it up to him. On this News the whole Province ſubmitted to the Great *Khân*; and the Queen being ſent-up to Court, was honourably received, and maintained ſuitable to her Dignity [g].

SECT. V.

Some Account *of the* Tartars, *and their* Khân's Court.

1. *Of the* Tartars, *and their* Khân, Kublay, *his* Wives, *and* Children.

Manners of the Tartars. *Computation of Time. Marriage of the Dead. Conduct in War: Their Puniſhments: Their Religion: Tranſmigration.* Mongol *Emperors.* Kublay, *his Character.* Nayam *rebels: Is reduced and ſlain: His Banner the Croſs.* Kaydu's *Dominions. Land of Darkneſs.* Kublay's *Policy: Why no Convert: Rewards his Officers: Their Badges: His Wives, and Concubines: His Sons.*

MARCO POLO's Account of the *Mongols*, or *Tartars*, as he calls them, as to their Marriages, Dreſs, Diet, Employment, Houſes, and Religion, agrees with that of *Rubruquis*, only not near ſo ample, or particular. What we ſhall inſert here is only ſuch Matters as others have treated of, with ſome Variation, or not quite ſo fully.

THE *Tartars* have a comely Speech, ſalute chearfully and honeſtly, have a graceful Carriage, and feed cleanly. They bear great Reverence to their Parents, and if any prove undutiful, or neglect to help them in their Neceſſity, there is a public Office appointed to take Cognizance of, and puniſh them.

THEIR Computation of Time is by a Cycle of twelve Years: The firſt called a Lion, the ſecond an Ox, the third a Dragon, the fourth a Dog, and ſo on. Thus if a Man be aſked when he was born; he will anſwer, in ſuch a Minute, Hour, and Day of the Year *Lion*; for the Fathers take-care to book-down the exact Time of their Childrens Birth [h].

IF a Son and Daughter of different People die unmarried, their Parents marry them when dead, and reducing the Contract to Writing, burn it, with the Figures, Servants, Cattle, Cloaths, and Money, painted on Paper; by whoſe Fumes, they ſay, all thoſe Conveniences are conveyed to them in the other World, and the Marriage ratified in Heaven.

THEIR Troops are divided into Tens, Hundreds, Thouſands, and Ten thouſands: Each

[a] Or, *Pe-yen*, as hath been already obſerved, *p.* 599. [b] Or, *Whay-gan fû*. See before, *p.* 597. [c] This was *Chang-chew fû*, as hath been already obſerved, *p.* 599, which happened in 1275. [d] *Polo* ſpeaks here of an after Event. The City, then called *Lingan* by the *Chineſe*, was attacked, and ſurrendered in 1276; and both the Emperor *Kong-tſong*, who was but ſeven Years old, and the Empreſs his Mother, Regent, were made Priſoners, and ſent to *Pe-king*. Afterwards the *Chineſes* proclaimed *Twon-tſong*, nine Years of Age. This was he who retired to an Iſle in 1278, and died there the ſame Year. The Hiſtory of this War is given at large by *Gaubil*, in his curious Hiſt. *de Gentch.* p. 160, *&* *ſeqq.* [e] It is obſervable, that *Polo* conſiders *Fanfur*, or *Faifur*, as a proper Name: But it is a Title, ſignifying, we are told, *Son of Heaven*; which anſwers to *Tyen-tſe*, the Title which the *Chineſes* give their Emperor. [f] He was an *Argus*, or *Centoculi*, truly; one of the moſt extraordinary Men that ever was, for all the Virtues military and civil. [g] *Purchas Pilgr.* p. 95, *&* *ſeq.* [h] The ſame, *p.* 88.

Hundreds

Hundred is called *Tuk*, and Ten a *Toman*. They have always their Scouts abroad, to prevent a Surprize. Each Man has with him eighteen Horſes and Mares. They carry alſo their Light-Houſes with them for Shelter, in Time of Rain. Their Diet, on ſuch Expeditions, is Milk dried like Paſte. They boil the Milk, and of the Cream make Butter: Then dry the reſt in the Sun. Each Man carries ten Pound of this in a Wallet, and every Morning puts half a Pound, with Water, into a ſmall Leather Bottle, which the Jumbling, cauſed by riding, prepares for his Dinner.

WHEN they attack an Army, they ride here and there, ſhooting. They ſometimes feign a Flight, ſhooting as they fly. When they find the Enemies Troops broken, they re-unite their own, and purſue the Victory. But as in *Polo*'s Time the *Tartars* were mixed with other Nations in ſeveral Parts of the Empire, ſo were their Manners.

THE Puniſhment for petty Theft, is to receive a Number of Blows with a Stick, as far as an hundred, always leaving-off with ſeven, as ſeven, ſeventeen, twenty-ſeven, and ſo on: But if the Goods ſtolen be a Horſe, or the like, the Criminal is cut-aſunder in the Middle with a Sword, except he can redeem his Life, by reſtoring nine Fold. They mark their Cattle with a Brand, and ſend them to Paſture without a Keeper [a]. Priſoners alſo are releaſed at three Years End, and marked on the Cheek, that they may be known to have been Malefactors [b].

WITH Regard to Religion, they acknowledge one Deity, and have a Tablet ſet aloft in the Wall of their Chamber, on which is written, *The High God of Heaven:* Before this every Day they burn Incenſe, and lifting-up their Heads, ſtrike their Teeth together thrice, praying it [c] to give them a good Underſtanding and Health: This is all they petition for. They have another Deity, called *Natigay*, the God of earthly Things; who preſerves their Families, Cattle, and Corn. His Image, with thoſe of his Wife and Children, made of Felt, ſtand on the Ground, the Wife on his Left-hand, and Children before him. They pay him the ſame external Worſhip as they do the celeſtial Deity, deſiring of him temperate Weather, Fruits of the Earth, Children, and the like. Always before they eat, they greaſe the Mouths of the Images with the Fat, and ſhed the Broth without-Doors in Honour of their Spirits. Marco Polo. 1295.

THEY hold the Soul to be immortal, and that when a Man dies, it enters into another Body, better or worſe, according as he had lived in the World. Thus a good poor Man becomes firſt a Gentleman, then a Lord or Prince, till at laſt he is aſſumed into God. On the contrary, if wicked, he will be firſt a poorer Man, then a Dog, ſtill deſcending to the loweſt Degree of Baſeneſs [d]. *Tranſmigration.*

THE firſt King of the *Tartars* was called *Chinghiz* [e]; the ſecond, *Kyn*; the third, *Bathin*; the fourth, *Eſu*; the fifth, *Mangu*; and the ſixth, *Kublay* [f]; whoſe Power is greater than that of all his Predeceſſors, having to the Dominions left by them, added in a Manner the reſt of the World. In ſhort, for the Immenſeneſs of his Treaſures, Number of Cities, and Multitudes of Subjects, he is the greateſt Prince that ever was on Earth. He aſcended the Throne in 1256, being then twenty-ſeven Years old, and governed near ſixty Years [g]. He is named *Kublay Khân*, which laſt Term ſignifies Emperor. Mongol Emperors.

KUBLAY is a handſome Man, of middle Stature, ſtrong, well-made, and proportioned: His Complexion fair, mixed with Red and White; his Noſe well-ſhaped; his Eyes black and comely. He is expert in War Affairs, and prompt in the Execution. Before he attained to the Empire (which was againſt the Will of his Brethren) he often gave Proofs of his Valour and Conduct, in both which he excelled all the Commanders the *Tartars* ever had: But ſince his Advancement to that Dignity, he went but once into the Field, ſending his Sons, and his Generals, on all Expeditions. Kublay, *his Character.*

IN 1286 [h], his Uncle *Nayam* [i], then thirty Years of Age, having the Command of Countries ſo extenſive, that he was able to raiſe four hundred thouſand Horſe [k], took it in his Head to rebel. Hereupon he ſent to invite *Kaydu* [l], *Kublay*'s Nephew (who poſſeſſed the Parts towards *Turky*, and hated the *Khân*) to join him with Nayam *rebels,*

[a] *Purchas Pilgr.* vol. 3. p. 79. [b] The ſame, *p.* 88. [c] This is the Author's Ignorance, or Malice. He ſpeaks here of the *Tartars* then in *China*, who obſerved, in great Meaſure, the Rites of the *Chineſe*, who do not pray to the Board, but to God, whoſe Name is inſcribed thereon. [d] *Purchas*, as before, *p.* 78, and 88. [e] In the *Italian*, *Cingis*. [f] We have already taken Notice, that this Liſt is falſe. The *Baſil* Copy has *Chinchis*, *Cui*, *Barchim*, *Allau*, *Mongu*, and *Cublai*: The *Berlin* MS. *Chinchis*, *Carce*, *Saim*, *Rocon*, *Mongu*, and *Cublai*: Such Variation there is in the Copies. [g] *Mangu*, or *Mengko*, reigned till 1259; and *Kublay* was elected the Year following. He died in 1294; ſo that he reigned but thirty-four Years. As he was Eighty at his Death, he was Forty-ſix when he began his Reign. [h] In the *Berlin* Copy, 1280. [i] The *Chineſe* Hiſtory places this Revolt of *Nayen* (as he is there called) in 1287. He was *Kublay*'s Nephew. [k] He poſſeſſed no leſs than nine Parts out of twenty, into which *Eaſtern Tartary* was then divided. [l] In the *Baſil* Copy, *Laidu*: In the *Chineſe* Hiſtory, *Hay-tu*. This Prince was in Rebellion long before, and had corrupted *Nayen*.

Kublay Khân.

his Forces, and was promiſed Aid in Perſon with an hundred thouſand Men. *Kublay* being informed of theſe Deſigns, ſet Guards on the Roads, to prevent the Enemy getting Intelligence; and made ſuch Haſte, that in twenty Days he had aſſembled three hundred and ſixty thouſand Horſe, and an hundred thouſand Foot, ten Days Journey from *Khânbalu* [a]. With theſe, after a March of five Days and Nights, he arrived, unlooked-for, in *Nayam*'s Territories, and reſted his Men two Days. Then cauſing his b Aſtrologers to employ their Art in Preſence of the whole Army, to diſcover which Side ſhould have the Victory (a Thing they always practiſe, in order to encourage their Men) they declared it in Favour of *Kublay* [b].

Is reduced, and ſlain.

ONE Morning, while *Nayam* was faſt-aſleep in his Tent, the *Khân* appeared with his Troops divided into three Bodies, on a neighbouring Hill. He ſat in a Wooden-Caſtle full of Archers, carried by four Elephants, with the Royal c Standard, bearing the Figures of the Sun and Moon, diſplayed on the Top of it. He ſent the right and left Wing againſt the Enemy, aſſigning to every ten thouſand Horſe, five hundred Foot; taught in caſe of Flight to leap-up behind the Cavalry, and on any Advantage to alight again, and ſlay the Enemies Horſes with their Lances. *Kaydu* was not yet arrived with his Forces. The two Armies meeting, a bloody Battle enſued, which laſted from Morning till Noon; when d *Nayan* being taken [c], *Kublay* ordered him to be ſewed between two Carpets, and toſſed to Death, that ſo the Imperial Blood might not be expoſed to the Sun. After this Defeat his People ſubmitted, conſiſting of four Nations [d], *Chorza*, *Karli*, *Barſkol*, and *Sittingui*.

NAYAM, if you will believe *Polo*, was ſecretly baptized, and diſplayed a Croſs in his principal Standard, having with him an infinite Number of Chriſtians, who, it ſeems, were all ſlain. Hereupon the *Jews* and *Mohammedans*, who were in *Kublay*'s Army, reproaching the Chriſtians with the Defeat of the Croſs, they complained to the *Khân*. This Prince, after ſharply reproving thoſe Scoffers, ſaid to the Complainants, *If the Croſs of Chriſt has not given Aid to* Nayam, *it has done what is reaſonable and juſt; becauſe having been a Traitor and Rebel to his Lord, the Croſs would not favour ſuch a wicked Man* [e].

KAYDU, before-mentioned, is an independent King, of the Race of *Chinghiz Khân*, reigning in the Northern Provinces of *Tartary* [f]; whoſe Inhabitants follow the Cuſtoms of their Anceſtors, dwelling in the open Fields, without Cities, or Caſtles. They have no Grain, but live on Fleſh, breeding Store of Horſes, Cows, Sheep, and other Cattle: The Country alſo affords white Bears twenty Palms long, great black Foxes, wild Aſſes, and little Animals, called *Ronds*, which yield the Sable Skins, *Vari*, *Arkolins*, and *Pha-*

[a] They aſſembled at *Shang-tu*. [b] *Purchas Pilgr.* p. 78, and 81. [c] *Polo* errs in this Narrative, as he does in every Thing he relates from Report. The Fact, according to the *Chineſe* Hiſtory, in brief, is this. *Nayen* being a powerful Prince, by the Extent of his Poſſeſſions in *Eaſtern Tartary*, *Hay-tu*, who was very potent in the Weſt, and had oppoſed *Kublay* ever ſince the Year 1268, gained the other over to his Party. The Emperor aſſembled his Armies, and reſolving to attack his Nephew, encamped near the River *Lyau*, and advanced with a few Troops. *Nayen*'s General coming to reconnoitre *Kublay*'s Camp, that Prince put a good Face on the Matter, and although in Danger of being made Priſoner, did not diſcover the leaſt Sign of Fear. It being Night, Notice was given the Emperor's Troops to come inſtantly to his Succour; which they did, by the Horſe taking the Foot behind them. Mean-time *Nayen* lay quiet in his Camp, and his General durſt not attack the Emperor for Fear of an Ambuſcade. *Li-ting*, General of the *Chineſe*, with ten reſolute Soldiers, approaching the Camp of that Commander, fired a Cannon into it, whoſe Noiſe ſo terrified *Nayen*'s Troops, which beſides were undiſciplined, that their Leader concluding the whole Imperial Army was at his Heels, betook himſelf to Flight. The *Chineſe* and *Tartar* Forces having in the Interim arrived, *Nayen* was attacked on all Sides (*Kublay* himſelf engaging at the Head of his Guards) and was entirely defeated, taken, and afterwards put to Death. See *Gaubil*'s Hiſt. *de Gentch.* p. 147, and 206, *& ſeq.* What this Author renders Cannon, is in the *Chineſe* called *Pau of Fire*. This Circumſtance of Fire, with that of the Noiſe it made, induced him to call it Artillery; he thinks it might have been a Bomb. By a Remark made before, *p.* 599. Note a. there is Reaſon to believe they had no great Guns. [d] According to the *Latin* Copies, four Provinces: Named, in the *Baſil*, *Funotia*, *Cauli*, *Barſcol*, and *Sinchintingui*: In the *Berlin*, *Fuciorcia*, *Cauli*, *Barſel*, and *Sichintingui*. [e] *Purchas*, as before, *p.* 82. [f] We are told, that this Prince founded a Dominion in the Neighbourhood of *Almalig*, often mentioned before: But it is hard to fix the Situation of this City. Little can be gathered from the Tables of *Naſsîr addin* and *Ulug Beig*, who place it in Latitude forty-four, and Longitude an hundred and two Degrees thirty Minutes, that is one Degree fifty Minutes more South, and eight Degrees thirty Minutes, (or five hundred and ten Miles) more Weſt than *Biſhbalig*; which, according to *Gaubil*, p. 126, lay to the North of *Turfân*. In *Shamsaddin*'s Hiſtory of *Timur bek*, Book 3. ch. 9, it is remarked, that *Almaleg* is near the Mountain of *Arjatû*, and that there his Army croſſed the River *Abeile*. If this be the River *Ili* (for *ab* in *Perſian* for a River) the Difficulty will be in great Meaſure removed, the Courſe of that River being deſcribed in the Jeſuits Maps. From *Almaleg* the Army advanced Eaſtward to *Karatal*, *Ichna-Buchna*, *Uker keptaji*, and then to the *Irtiſh*.

rash's Rats. As the great Lakes that are frozen a most Part of the Year, render the Roads scarce passable in Summer, the Merchants, who go to buy their Furs, have for fourteen Days Journey through the Deserts, set-up a House at the End of every Stage, to lodge and barter in. In Winter they travel in Sleds, rounding-off at the End. They are drawn over the Ice by Beasts like Dogs, three Couple to each.

BEYOND this Country of the *Tartars*, is the *Region of Darkness* [a], so called, because reaching b to the farthest North; for most Part of the Winter there is nothing but a Twilight, the Sun not appearing above the Horizon. The Inhabitants are pale-complexioned, and large of Stature; have no Prince, and live like Beasts. The *Tartars* often rob them, in these dark Nights, of their Cattle and Furs; because better than their own. They take the Animals which yield them, during their long Summer, and carry them to sell as far as *Russia*. This last is a large Country, c extending to the Ocean, and bounded Northward by the *Region of Darkness*. The People, who are *Greek* Christians, handsome and fair, pay Tribute to the *Tartars of the West*. The Land produces Store of Furs, Wax, and Minerals, with Abundance of Silver [b].

KUBLAY, after the Victory over *Nayam*, returned in great Triumph to *Khânbalu* in *November*. On *Easter-Day* following, he called the Christians before him, and kissing their Gospels, made his d Barons do the same. The like he does to those of the *Mohammedans*, *Jews*, and *Pagans*, on their great Feasts, to the End that *Sogomombar Khân*, the God of Idols, *Mohammed*, *Moses*, or whoever else is greatest in Heaven, might help him. This was the Reason he himself gave for it. However, adds our Catholic Traveller, he seemed to like the Christian Faith best; yet would by no Means suffer its Professors to carry the Cross before them, because so good a Man as e Christ was thereon represented, as scourged and put to Death.

NICHOLAS and *Matthew Polo*, at the Time when the Ambassador to the Pope was appointed, dropping some Words concerning the Christian Faith; the *Khân* said, How can I become a Convert? You see the Christians, who are in these Parts, are so ignorant, that they neither know, nor can do any Thing: While the Idolaters perform whatever they please, causing the Cups f full of Wine, and other Things, to come to me of themselves, when sitting at Table; making their Idols speak, and foretel what is to come; besides many other Wonders. He therefore added, that as Things stood, if he turned Christian, he could not be able to assign his People any Reason for it; and that the Idolaters, by their Arts, might easily make him away: But assured them, in case the Pope sent him an hundred Persons learned in their Law, who should convince the Idolaters, that what they did was by the Power of the Devil, and should restrain them from performing such Things in their Presence, he would instantly receive Baptism, with all his Subjects [c]. Marco Polo. 1295.

THE *Khân* has twelve Barons, or Counsellors, who acquaint him with the Merit of each Officer; according to which he raises them from the Command of an hundred Men, to a thousand; from one thousand, to ten thousand, and so on; giving them, at the same Time, Vessels of Silver and Tablets. The Captain of an hundred hath a Silver Tablet; he of a thousand, one of Gold, or Silver gilt: The Commander of ten thousand, a Gold Tablet, with a Lion's Head on it. The Weight of the Tablets differs also, according to the Greatness of the Post. On each are inscribed these Words: *By the Strength and Power of the great God, and by the Peace which he hath given to our Empire, the Name of the* Khân *be blessed: And let all those die, and be destroyed, who will not obey him.* They who have Tablets, have also Privileges in Writing, specifying what Duties they are to perform, and what Power they are vested with, in their several Departments. All great Generals, or Commanders over an hundred thousand Men, have a Cloth [d] borne over their Heads when they ride in public, and always sit in a Silver Chair. Their Tablet weighs three hundred *Saggi*, or fifty Ounces of Gold, with the Figures of the Sun and Moon upon them. The Barons have a Griffin on their Tablet, and may take, for their Guard, the Troops of any great Prince, or the Horses of any Persons of lesser Dignity. *Rewards his Officers.* *Their Badges.*

KUBLAY KHAN has four Wives reckoned lawful, of whom the First-born is Heir to the Crown. Each is stiled Empress, and has her Court, attended by three hundred Ladies, and Female Servants, besides Eunuchs; the Number of her Domestics amounting to ten thousand Persons. Besides his Wives, he hath many Concubines, most of them of the *Ungut* Tribe; to whom he sends Ambassadors every two Years for *His Wives.*

[a] So the *Arabs* call those Northern Parts, called *Siberia*, then little known; and the Sea beyond them, the *Sea of Darkness*. In short, *Polo* seems to have had most of his Informations from the *Mohammedans* of the West, who were at the Court, and in the Armies of *Kublay*. [b] *Purchas Pilgr.* p. 107. [c] This is one of *Polo*'s pious Lies. The *Basil* Copy has nothing of it; and *Purchas* but little more. [d] Or, Umbrello.

that

Kublay Khân.

that Purpoſe, and theſe bring home four or five hundred beautiful Recruits. Having cauſed the handſomeſt Maidens that can be found to be brought before them, they appoint Perſons to examine them all over, and ſet a Price on each, from ſixteen to twenty-two Carats: Thoſe of Twenty, and upwards, are conveyed to the *Khân*, who gets them viewed by other Examiners; and having choſen about thirty of the beſt, puts them into the Hands of ſome of his Barons Wives, to ſee if they ſnore in their Sleep, have any offenſive Smell about them, or Fault in their Behaviour. Five of them wait three Days and Nights, by Turns, in his Bed-Chamber: The reſt are lodged in an adjoining Apartment, to bring the *Khân*'s Victuals, Drink, and whatever thoſe in waiting order them. The lower-rated Women are put to Cookery, and other Offices of the Palace. Sometimes the *Khân* beſtows them on Gentlemen with great Portions.

And Concubines,

His Sons.

THE *Khân* has twenty-two Sons [a] by his Wives: Seven of them are Kings of great Provinces, and govern with much Reputation. The eldeſt, by his firſt Wife, called *Chinghiz* [b], who was to have ſucceeded, dying, the Empire, after *Kublay*'s Death, will deſcend to *Temûr*, a Son whom he left [c]. This Prince is valiant, wiſe, and exerciſed in Arms. The *Khân*, by his Concubines, has twenty-five Sons, all great Lords, and trained to War [d].

2. Public Feſtivals *obſerved at* Court, Magnificence *of the* Khân, *and other Particulars.*

Order obſerved at Feaſts: The Khân*'s Birth-Day:* New-Year*'s Day. Ceremony of Homage: Tokens of Reſpect. Order in Hunting: The great Huntſmen: Method of flying, and calling their Falcons. The Hunting-Camp. Tribunals, military and civil. The* Khân*'s Care in Times of Diſtreſs: His Charities, Aſtrologers, and Kalendar: His Paper-Money.*

Order obſerved

ON Feſtival-Days the *Khân*'s Table is placed on the North-Side of the Hall, where he ſits, facing the South. On his Left is his firſt Queen; and, on the Right, his Sons, with other Princes of the Blood: But their Tables are ſo much lower than his, that they ſcarce touch his Feet with their Heads. The Seat of the eldeſt is higher than thoſe of the reſt. The Barons and Princes ſit lower ſtill. Their Wives alſo obſerve the ſame Order. Thoſe of the Princes of the Blood ſit lower on the Left-hand, and afterwards thoſe of the Lords and Officers, according to their Ranks, for the moſt Part on Carpets, there not being Tables for them all.

AT every Door there ſtand two huge Fellows with Sticks in their Hands, to ſee that none touch the Threſhold: For if any does, they take his Cloaths off; which he muſt either forfeit, or redeem, by receiving ſuch a Number of Blows, as ſhall be awarded him. All the Servitors cover their Mouths with Silk, that their Breath may not come near the King's Victuals, or Liquors. When he has a Mind to drink, the Damſel, who preſents the Cup, goes back three Steps, and kneels; on which the Barons, with all the reſt of the Aſſembly, kneel, and the Muſicians ſtrike-up.

THE *Tartars* are very careful to celebrate their *Khân*'s Birth-Day in the beſt Manner: That of *Kublay* is kept on the twenty-eighth of *September*. He is then richly dreſſed in Cloth of Gold: His Barons and Officers, twenty thouſand in Number, are alſo cloathed in the ſame Gold-Colour and Silk, each wearing a Girdle wrought with Gold and Silver, which is given him, with a Pair of Shoes. Some, as the *Quichitarie*, are adorned with Pearls and Jewels of great Value: But theſe Habits are worn only on their thirteen Monthly Feaſts. On this Day all the Kings, Princes, and Nobles, ſubject to the Great *Khân*, are obliged to ſend him Preſents, as their Emperor. Such alſo as deſire to obtain any Poſt of Dignity, or Profit, preſent their Requeſts to twelve Barons appointed for the Purpoſe; whoſe Decree is definitive: And People of all Religions whatever are bound to pray for the Life, Safety, and Proſperity of the Great *Khân*.

THE Feaſt of the New-Year, which begins the firſt of *February* [f], is ſtill more ſolemn. All appear cloathed in white Garments, which they reckon a Symbol of Good-luck, in Hopes Fortune will favour them all the Year after. On that Day the Governors of Cities and Provinces ſend the Emperor Preſents of Gold and Silver, Pearls and precious Stones, many white Cloaths, white Horſes, and other Things of the ſame Colour. The *Tartars* in general ſend white Preſents likewiſe, to one another. The Cuſtom is for every one, if he is able, to preſent nine Times nine, or eighty-one Things of a Sort,

[a] According to the *Chineſe* Hiſtory, he had no more than ten: But often only thoſe are mentioned, who were moſt of Note. *Polo* ſpeaks nothing of his Daughters, though the Hiſtory ſays he had many. See *Gaubil*'s *Hiſt. de Gentch.* p. 223, in the Note. [b] In the *Italian*, *Cingis*: It ſhould be *Chenkin*, as obſerved before. [c] *Timûr* was not the only, or eldeſt Son of *Chengkin*; for he had an elder Brother, called *Kammala*: But *Timûr* was declared Succeſſor by *Kublay*. See *Gaubil*'s *Hiſt. de Gentch.* p. 223. [d] *Purchas Pilgr.* p. 8[illegible] *& ſeq.* [e] Theſe are the *Chineſe* Habits of Ceremony. [f] In the *Latin* Copies it is called, *the White Feaſt*, whether

whether Gold, Cloth, or other Goods: So that a the *Khân*, by this Means, gets ſometimes an hundred thouſand Horſes. At this Time likewiſe the Emperor's five thouſand Elephants are brought to the Court, covered with figured Tapeſtry, and carrying two Cheſts filled with Veſſels of Gold and Silver: Camels likewiſe in Cloaths of Silk, bearing other Things for Service of the Palace [a].

IN the Morning all the Kings, Barons, Generals, Soldiers, Phyſicians, Aſtrologers, Falconers, Governors of Provinces, and other Offi- b cers of the Empire, aſſemble in the great Hall, and, for Want of Room, in a Place adjoining [b], where the *Khân* may ſee them. All ſtanding thus in Order, according to their reſpective Ranks, a great Man, like a Biſhop [c], riſeth, and cries aloud, *Bow down, and adore.* Preſently all do Reverence, bending their Forehead to the Earth. Then he ſaith, *God preſerve our Lord with long Life, and Joy.* All anſwer, *God grant.* This they do four Times. Afterwards the Prelate goes c to an Altar richly adorned, on which is a red Tablet, inſcribed with the *Khân*'s Name. Then taking a Cenſer, they perfume both with great Reverence, in Honour of his Majeſty, and return to their Places. This done, the Preſents before-mentioned are offered; and the Tables being prepared, they are entertained with a Banquet. Laſtly, a tame Lion is brought-in; which lying at the *Khân*'s Feet like a gentle Whelp, ſeems to acknowledge him for his Lord [d]. d

WITHIN half a Mile of the Place where the Grand *Khân* reſides at any Time, there is a profound Silence; not any Noiſe, or ſo much as a Voice being heard. Every Baron carries about him a little Veſſel, with a Cover, to ſpit in; none daring to ſpit in the Hall: They likewiſe take-off their Buſkins, and put-on others of white Leather, that they may not dirty the Carpets with which the Floor is covered [e].

DURING the three Months that the *Khân* re- e ſides at *Khânbalu*, the Hunters belonging to the Emperor, in all the Provinces ſurrounding *Kathay*, apply themſelves to Hunting. They who are within thirty Days Journey of the Court ſend the large Game, ſuch as Stags, Bears, Roebucks, wild Boars, Deers, and the like, to the *Khân*, by Waggons, or Barks; having firſt bowelled them: But they who are forty Stages removed, ſend him only the Skins fit to make Armour. The *Khân* has many Wolves, Leopards, and Lions; ſome greater than thoſe of *Babylon*, trained for Hunting. In the Hair of theſe laſt, f there appear Stars of divers Colours, white, black, and red. It is ſurprizing with what Fierceneſs and Dexterity theſe Lions catch wild Oxen, Aſſes, Bears, and other large Beaſts. They carry two of them in a Waggon with a Dog, by which they are tamed, and againſt the Wind, leſt the Beaſts ſhould ſmell them, and fly away. He hath likewiſe tame Eagles, ſo fierce, that they take Hares, Roebucks, Deer, and Foxes: Nay, ſome will ſeize Wolves, and harraſs them to ſuch a Degree, that the Hunters may catch them without any Pains, or Danger. Marco Polo. 1295.

THE Great *Khân* has in his Court two Brothers, *Bayan* and *Mingan*, called the *Chivichi* [f], or, *the Maſters of the Game*, each commanding ten thouſand Men; one ten thouſand cloathed in Red, the other in Sky-Colour, when they go to hunt. Theſe keep five thouſand Maſtiffs, and other Kinds of Dogs. In the Chace they march one Body on the King's Right-hand, the other on his Left, extending the Space of a whole Day's Journey through the Plain; ſo that not a Beaſt can eſcape them. The *Khân*, who goes in the Middle, takes great Delight to ſee the Dogs follow the Stags, Bears, and other Beaſts. Theſe *Chivichi* are obliged to bring to Court every Day, from the Beginning of *October* to the End of *March*, a thouſand Head of Beaſts and Birds, beſides Quails and Fiſhes; reckoning to a Head as much as will ſerve three Men. *The great Huntſmen.*

IN *March* the Great *Khân* proceeds from *Khânbalu* North-Eaſterly towards the Ocean, two Days diſtant, with about ten thouſand Falconers, carrying Falcons, Hawks, Gerfalcons, and other Birds of Prey. Theſe diſperſe themſelves one hundred or two in a Company. The Birds taken are for the moſt Part brought to his Majeſty; who being troubled with the Gout, ſits in a Wooden-Houſe [g], carried by two Elephants: It is covered with Lion-Skins, and lined with Cloth of Gold. He has with him to divert the Time, twelve choice Hawks, and as many Favourite Courtiers. On each Side ride ſeveral Noblemen and Soldiers, to guard his Perſon. Theſe, when they ſee Pheaſants, Cranes, or other Game on the Wing, apprize the Falconers near the *Khân*; who giving his Majeſty Notice, uncover his Houſe, and letting their Hawks and Falcons fly, afford him the Diverſion attending that Paſtime. *Method of flying, and*

BESIDES the firſt ten thouſand, there is another Body of the ſame Number of Men, who run-about by two and two after the Birds are caſt from the Fiſt, to help them on Occaſion. f Theſe are called *Taſkaol*, that is, *Watchmen*, or *Markſmen*; who with a Whiſtle call-in the Hawks which are flown. Every Hawk has a *Calling their Falcons.*

[a] *Purchas Pilgr.* p. 83, *& ſeq.* [b] Doubtleſs, the Court before the Hall. [c] Miſtaken for a Herald.
Purchas, as before, *p.* 85. [e] The ſame, *p.* 88. [f] In the *Italian*, *Civici*. [g] Or, Litter.

Kublay Khân.

little Plate of Silver faſtened on her Foot, with a her Maſter's Mark; but if the Mark cannot be known, the Hawk is delivered to a certain Baron, called, on that Account, *Bulangazi* [a], that is, *the Keeper of ſuch Things as want an Owner*; otherwiſe the Finder would be deemed a Thief. Thoſe who loſe any Thing repair to his Quarters, which for that Reaſon are poſted on ſome Eminence, with his Enſign diſplayed, that all may know where to find him.

The Hunting Camp.

THUS ſporting as they advance, they at length b arrive at a great Plain, called *Kakzarmodin* [b], where the Camp is prepared, conſiſting of ten thouſand Tents, or Pavilions, which at a Diſtance look like a great City. The chief of theſe is the *Khân*'s, under which ſtand ten thouſand Soldiers, beſides Barons and Noblemen, the Door facing the South; and to the Eaſt is another Tent, with a great Hall of Audience. Next is his Bedchamber. This Pavilion is ſuſtained by three Pillars, finely carved, and covered with c the Skins of Lions ſtreaked with various Colours, which keep-out the Rain. The Walls within are hung with rich Ermins and Sables, which the *Tartars* call *the Queen of Furs*, and are ſometimes ſo coſtly, that Skins worth two thouſand *Soltânins* of Gold, will ſcarce make a Pair of Veſts. The Cords which ſupport thoſe Pavilions are of Silk. The Wives, Sons, and Concubines of the *Khân*, have their Tents alſo. Farther on there are others, for the Birds of d Prey, uſed in Hawking.

THE *Khân* continues all *March* in this Plain, where infinite Beaſts and Fowl are taken: For none elſe dare hunt in any Province of *Katay*, at leaſt within five Days Journey of the Court one Way, ten another, and fifteen a third; nor keep any Hound, or Hawk, eſpecially from *March* to *October*: During which Time no Man is permitted to catch the Game by any Method whatever; and hence it is, that they e are ſo very numerous [c].

Tribunals, military and civil.

THE Court of the twelve Barons beforementioned, who are the *Khân*'s Council of War, and diſpoſe of all military Employments, is called *Thay* [d], that is, *the high Court*. There are alſo twelve other Barons, appointed Counſellors for the thirty-four Provinces, who have a fine Palace in *Khânbalu*; where there is, for each Province, a Judge, and many Notaries in ſeparate Apartments [e]. Their Court is called *Singh*, or, *the* f *ſecond Court*. They have Power to chuſe the Governors of Provinces, and then preſent their Names to the *Khan*, who confirms their Choice: They have the Management alſo of the Treaſury. Theſe two Courts have none ſuperior to them but the *Khân*.

THIS Prince ſends every Year proper Perſons into the Provinces, to enquire if the Corn has received any Damage from Tempeſts, Locuſts, Worms, or the like: In which Caſe he remits the Tribute, for that Year, to the Sufferers, and ſupplies them with Grain both for their Support, and Sowing, out of his Granaries. For in Time of Plenty he buys-up vaſt Quantities, which he keeps for three or four Years; and in caſe of Scarcity, ſells it out at a fourth Part of the common Price. In like Manner, if any Mortality happens among the Cattle, he makes good the Loſs out of his Tithe-Cattle. Where a Beaſt has been killed by Lightning, he takes no Tribute of that Herd, or Flock, though ever ſo numerous, for three Years: Nor Cuſtom of a Thunder-ſtricken Ship, conceiving God to be angry with the Owner, and the Goods to be unlucky.

HIS Care likewiſe extends to People travelling the great Roads. For in fruitful Territories he has cauſed Trees to be planted near them, at a ſmall Diſtance from each other; and in ſandy, barren Places, Stones and Pillars to be ſet-up, that the Way may be diſtinguiſhed. Theſe Works have their Overſeers: And he is the more inclined to plant Trees, becauſe his Aſtrologers tell him, that it prolongs Life [f].

WHEN he hears of any Family in *Khânbalu* which has been reduced by Misfortunes, or is not able to work, and has nothing to ſupport it, he gives them both Proviſion and Cloathing for the Year; which are delivered them by Officers appointed for the Purpoſe, on producing his Order. Theſe Cloaths, as well as thoſe for his Army, are made in every City out of his Tithe-Wool. It is obſervable, that the *Tartars* formerly never gave Alms, but reproached the Neceſſitous as hated of God: But the Idolaters, eſpecially the *Bakſi*, have recommended Charity to the *Khân* as a Work pleaſing to the Deity: So that in his Court, Bread is never denied to any-body who aſks for it; and twenty thouſand Crowns worth of Rice, Millet, and *Pannic*, is given away daily at the Palace; which makes him eſteemed as a God.

HE likewiſe provides Food and Raiment yearly for about five thouſand Aſtrologers and Diviners in that City. Theſe conſiſting of Chriſtians, *Mahammedans*, and *Katayans*, have an Aſtrolabe marked with the Planets, the Hours, and leſſer

[a] In the *Baſil* Copy, *Bularguci*: In the *Berlin*, *Bugtami*. [b] In the *Baſil* Copy, *Caciamordin*, that is *Kachamordim*, or *Mordin*, as the *Berlin* Copy. [c] *Purchas Pilgr.* p. 85. [d] Or, *Tay*. [e] Theſe are the Tribunals, military and civil, ſuch as at preſent ſubſiſt in *China*; perhaps with ſome Difference as to the Form and but ſuperficially deſcribed by *Polo*. [f] *Purchas*, as before, *p.* 86, *& ſeq.*

Parts of Time throughout the Year. By Help of this they obſerve the Courſe of the Heavens, and Diſpoſition of the Weather every Moon. They write down alſo in certain Squares called *Tacuini* [a], the Events that are to happen during the current Year (adding, however, this Salvo) provided the Deity makes no Alteration in them. Theſe Books they ſell. They whoſe Predictions fall-out trueſt, are moſt honoured. Such as propoſe to undertake any great Work, or a long Journey, have Recourſe to theſe Aſtrologers, to ſhew them in the Heavens whether they ſhall ſucceed or not. This they do by comparing the Conſtellation which then rules with that which governed at his Birth; the exact Time of which being told them [b].

THE Great *Khân*'s Money is not made of Metal, but of the middle Bark of the Mulberry-Tree, hardened and cut into round Pieces of different Sizes, which are ſtamped with the Emperor's Mark. All the Empire is ſerved with it from *Khânbalu:* Nor dares any Perſon, Native or Stranger, on Pain of Death, refuſe it, or utter any other in his Dominions. The foreign Merchants, when they arrive at the Capital, receive this Money for their Gold and Silver, Pearls and Diamonds. And as it will not paſs in other Countries, they lay it out again in Merchandizes. The *Khân* pays his Troops and Officers in the ſame Coin: So that by this Means he has acquired a greater Treaſure than any other Prince in the World [c].

SECT. VI.

An Account *of the* Iſlands, *and* maritime Countries, *of the* Greater India.

1. *Of the* Iſlands *in the* Indian Ocean.

Ships of India. Zipangu, *or* Japan, *invaded by the* Tartars: *Their Attempt miſcarries. Sea of* Chin. Ziamba *Country. The* Greater Java. Sondur *and* Kondor. Pentan *Iſland.* Leſſer Java. Felek *Kingdom.* Baſma *Province. The Rhinoceros.* Sumatra *Province.* Dragoyan *Province.* Lambri *Province.* Fanfur *Province. Iſlands* Nokueran, Angaman. *Iſland* Seylan. Adam's *Sepulchre.*

THE Ships of *India* are made of Fir, with one Deck, on which are Cabins for the Merchants (twenty or fewer) according to the Bulk of the Veſſel. Some have two Maſts, others four, and as many Sails. They uſe alſo Oars, four Men to each. The Hull is divided into *Kolti*, or Chambers, the larger have thirteen; ſo that if the Water gets in by the Stroke of a Whale, or a Rock, it goes no farther than that Diviſion, and the Lake is ſoon ſtopped. They are all double, or have two Courſes of Planks one within the other, well calked with Okam, and nailed with Iron. Inſtead of Pitch they make uſe of the Oil of a Tree mixed with Lime and Hemp beaten ſmall, which does better than Pitch and Lime. The larger Ships carry from an hundred and fifty to three hundred Seamen, and from five to ſix thouſand Bags of Pepper. They are attended by ſmaller Veſſels of a thouſand Bags Burthen, and about ſixty Men, which ſometimes ſerve to tow the greater. They have alſo with them ten ſmall Boats for Fiſhing, and other Services, faſtened to their Sides, and let-down at Pleaſure. They ſheathe them every Year till they come to have ſix Courſes of Boards on the Outſide, and then break them up. Marco Polo. 1295. *Ships of India.*

ZIPANGU [d] is a very large Iſland, fifteen hundred Miles Eaſt of the Coaſt of *Mangi*. The Inhabitants are Idolaters, fair of Complexion, and courteous in Behaviour. The Idols in this and the neighbouring Iſlands have the Heads of Cows, Dogs, and other Animals. Some have Faces on their Shoulders, and from four to an hundred Hands [e]: To which laſt they aſcribe moſt Power, and pay greateſt Reverence. They ſometimes eat the Fleſh of thoſe they take in War, reckoning it a Dainty. *Zipangu, or Japan.*

GOLD is plenty in *Zipangu*, for Merchants ſeldom reſort thither, and its Exportation is prohibited by the King; whoſe Palace, according to the Report of Traders, is floored and covered with Gold, as Churches in *Europe* are with Lead, and the Windows gilded. Pearls abound there. The Fame of its Riches having tempted *Kublay* to conquer this Iſland, he ſent thither a great Fleet, with an Army under two Barons, *Abbakkatan* and *Vonſanchin* [f]. The Generals ſailed from *Zaytum* [g] and *Quinſay*; but falling out between themſelves, could take but one City, and *Invaded by the* Tartars.

[a] Perhaps it ſhould be *Tacuim*, which anſwers to *Taquîn*, or rather *Takwîm*, an *Arabic* Word, ſignifying, properly, a Work divided by Tables, and by Analogy an Almanac, or Kalendar. This ſhews the Kalendar was then chiefly under the Direction of the *Arab* Aſtronomers. [b] *Purchas Pilgr.* p. 88. [c] The ſame, *p.* 86. [d] The ſame in the *Berlin* Copy: But *Zipangri*, in the *Baſil.* This, taking away the Termination *gu*, from the Name, as well as other Circumſtances, is plainly *Japan*, or *Jepan*, the Z anſwering to our J Conſonant. [e] It is much that he mentions no ſuch *Briarean* Images in *Katay*, or *Manji*, where they are plenty. [f] In the *Baſil* Copy, *Abatan* and *Nanſachum:* In the *Berlin* Copy, *Abatam* and *Voſanchim.* [g] The Port ſuppoſed to be *Suen-chew*. See before, *p.* 603.

Indian *Iſlands.*

put all to the Sword except eight Perſons; who being, it ſeems, proof againſt Iron, by Means of an inchanted precious Stone lodged in the right Arms, between the Skin and the Fleſh, were ſlain with Clubs. At length, by a Storm from the North, ſome of the Ships riding in the Port being caſt away, and others driven to Sea, the reſt, with the two Leaders and principal Officers, returned home.

Their Attempt miſcarries.

ABOUT thirty thouſand eſcaped by ſwimming on Planks to a deſert Iſle [a] four Miles off *Zipangu*; againſt whom, unprovided with either Victuals or Weapons, the Enemy came with a Fleet: But landing without any Order, the *Tartars* wheeled about the Iſland, which was high in the Middle, and, unſeen, ſeized their Ships. Thence ſailing to the Capital of *Zipangu*, with the Colours flying, they were admitted without any Suſpicion; but found few there beſides Women. Here they were beſieged ſix Months by the King, and then ſurrendered on Condition to have their Lives. This happened in 1264 [b]. The *Khân*, to puniſh the two Commanders, cut-off the Head of one, and ſent the other to the Iſland of *Zorza*, where Offenders are put-to Death. They bind their Hands, and ſew them up in a Buffalo's Skin new flayed-off, which ſhrinking as it dries, cauſes them to die miſerably.

Sea of Chin.

THE Sea, in which this Iſland ſtands, is called *the Sea of Chin* [c], which ſignifies, the Sea oppoſite to *Manji*; and in the Language of that Iſland *Manji* is called *Chin* [d]. The Pilots ſay, it contains ſeven thouſand four hundred and forty Iſlands, moſt of them inhabited; and that all their Trees are fragrant, abounding with Aloes, Pepper, and many other Spices. The Ships of *Zaytum* ſpend a Year in the Voyage, ſetting out in Winter, and returning in Summer, by Means of two different Winds which reign in theſe Seaſons [e]. But the Author never was at theſe Iſlands.

LEAVING *Zaytum*, you meet with a great Gulf (or Sea) called *Kheynan* [f], which continues two Months Sailing Northwards. Towards the South it waſhes *Manji*; alſo *Ania* [g], *Toloman*, and other Provinces before-mentioned [h]. It is interſperſed with infinite Iſlands, moſtly inhabited; that it looks like another World. They produce Store of Gold, and trade with one another.

HAVING ſailed fifteen hundred Miles South-Weſtward through this Gulf, you come to *Ziamba* [i], a rich and great Iſland, with a King and Language of its own; but paying a yearly Tribute to the great *Khân* of twenty Elephants, and a great Quantity of Aloes Wood. In 1268, *Kublay* hearing of the Wealth of this Iſland, ſent *Sagatu* to [k] invade it: But the King, *Akkambalu*, being old, they bought his Peace. It abounds with Woods of Ebony.

SAILING thence, between the South and South-Eaſt, fifteen hundred Miles, is *Java* (the Greater) ſuppoſed to be the greateſt Iſland in the World; being more than three thouſand Miles in Circuit. Its King is independent. The *Khân* durſt not attempt to ſubdue it, on Account of the Length and Danger of the Voyage [l]. The Merchants of *Zatum* fetch thence Store of Gold and Spices.

SOUTH and South-Weſtward of *Java* ſix hundred Miles are two deſart Iſlands, *Sondur* [m] the Greater, and *Kondor* the Leſſer. Fifty Miles South from thence is *Lokak*, a very rich and great Province on the Continent, but mountainous and wild. The People are Idolaters, with a King and Language of their own. *Braſil* Wood, Gold, and Elephants are plenty, beſides other wild Beaſts and Fowl. Here is a very good Fruit called *Berchi*, as large as Lemons; and abundance of Porcelane Shells are exported to other Countries to ſerve for Money. But the

[a] This, poſſibly, is the Iſland *Ping-hu*, very near *Japan*, for whoſe Situation *Gaubil* is at a Loſs. See *Hiſt. de Gentch.* p. 194. Note 2. [b] According to the *Chineſe* Hiſtory, the Expedition to *Japan* was in 1280, and 81, under the General *Argan*; who dying at Sea, *Attahay* commanded the Fleet. Coming in Sight of the Iſland *Ping-hû*, a Storm diſperſing the Fleet, *Attahay* got-off with ſome Ships, the reſt fell into the Hands of the Enemy, who made Slaves of ſeventy thouſand *Chineſe*, or *Koreans*, and ſlew thirty thouſand *Mongols*. *Gaubil*, p. 194. [c] In the *Italian*, *Cin*. [d] This is a plain Proof, that the Name of *Chin*, or *China*, came from the Eaſt. [e] Theſe are the Monſons, or Trade-Winds. [f] This, doubtleſs, is *Haynan* (which may be written *Khaynan*) that is, the Southern Sea. [g] Perhaps this ſhould be *Gan-nan*, which comprizes *Tong-king*, and *Kochinchina*. *Gaubil* obſerves, that *Europeans* corruptly write *Anam*, and the Language *Anamatic*, *Hiſt. de Gentch.* p. 194. [h] See *p.* 596. [i] In the *Baſil* Copy, *Ciamba*: Perhaps the Kingdom of *Champa*, in the South-Part of the farther Peninſula of *India*, although the Name comes equally near *Siam*, only leaving out the Termination *ba*. According to the *Baſil* Copy, *Polo* was in this Kingdom. [k] This ſeems to be the General *Songtutay*, mentioned by *Gaubil*, p. 179; or elſe *Sutu*. p. 202. But we meet with no foreign Expeditions before the Year 1280, when all *China* was reduced under the Obedience of *Kublay*. *Polo* is ſeldom right in his Dates. [l] Yet, perhaps, this is the Iſland called *Qua-wa*, in the *Chineſe* Hiſtory, which was attempted in 1292, with a Fleet of a thouſand Sail; but without Succeſs. *Gaubil*, p. 220, ſuppoſes *Qua-wa* to be *Borneo*, as this *Greater Java*, or *Yawa*, is thought to be by *Purchas*, not without ſome Reaſon. [m] This, probably, is the *Senderfulat* of the *Arabs* (who write *fulat* for *Pulo*, the *Malayan* Word for an Iſland) and not *Pulo Kandor* (or *Kondor*) as *Renaudaut* ſuppoſes, *Ancien. Relat.* p. 145, though placed near to it; if, indeed, *Kondor* here be the ſame.

King

King does not encourage the coming of Strangers.

FIVE hundred Miles Southward of *Lokak* [a] is *Pentan* [b], a wild Island, but full of odoriferous Trees. For fifty Miles of the Way, the Sea is in many Places but four Fathom deep. Thirty Miles farther South-East is the Island *Malayur* [c], abounding with Spices, which has a King and peculiar Language. From *Pentan*, an hundred Miles South-East, is the *Lesser Java*.

THIS *Lesser Java* [d] is about two hundred Miles in Compass. It abounds with Spices, Ebony, and *Brasil* Wood; lying so far South, that the North-Star is never seen there. It is divided into eight Kingdoms, with each a different Language. Our Author was in six of them, *viz.* *Felekh*, *Basma*, *Samara*, *Dragoian*, *Lambri*, and *Fanfur*.

FELEKH [e], by frequent Trade with the *Mohammedans*, has embraced their Faith in the Cities: But the Mountain People, who eat human Flesh, and other impure Food, are still Idolaters, worshipping whatever they see first in the Morning.

BASMA [f] Kingdom is inhabited likewise by a beastly People, who live without Law like Beasts. They sometimes send Hawks to the *Khân*, who lays Claim to the whole Island. They have wild Elephants and Unicorns [g]. These are much less than the former; but have Feet shaped like them, and Hair like the Buffalo. Their Horn is in the Middle of the Forehead, but make no use of it in Encounters: For their Way is first to trample-on a Person, then keeping him down with their Knee, wound him with their Tongue, which is covered with long Prickles. They carry their Head, which resembles that of a wild Boar, downward, in walking. They love to stand in the Mire, and are far from being such delicate Creatures as the Unicorn is represented to be in *Europe*; suffering themselves to be catched by young Maidens. This Country abounds with large Goss-Hawks, all black, and many Sorts of Apes, one very small, with a Face like the human. These they preserve in Boxes, by Means of Spices, and sell to Merchants, who shew them about for Pigmies.

SAMARA is next, where *Polo* was detained five Months by ill Weather. He landed with two thousand Men, and fortified himself against the Natives, who eat human as well as other Flesh; yet traded with them for Provisions; having excellent Fish, and Date-Tree Wine [h], both white and red. It is very good for the Dropsy, Phthisic, and Diseases of the Spleen. Here are *Indian* Nuts [i] as big as one's Head, the Middle full of a pleasant Liquor better than Wine. None of the Stars in *Ursa Major* could be seen here [k]. Marco Polo. 1295.

DRAGOYAN [l] Kingdom is claimed by the Great *Khân*. *Polo* was told, that when any Person is sick, they send to enquire of the Sorcerers whether he shall escape. If the Devil answers No, his Relations send for the Officers appointed to strangle such Folks; which done, they cut his Body in Pieces, and eat all up, even to the Marrow: For, say they, if any of his Substance should remain, Worms would breed therein; which, for want of Food, would die, to the grievous Torture of the dead Man's Soul. The Bones they carry to some Cave in the Hills, that no Beast may come at them. They also eat all Strangers who fall into their Hands. Dragoyan Province.

LAMBRI abounds with *Brasil* Wood; some of whose Seed *Polo* brought to *Venice*, but the Soil was too cold to produce it. Most of the Natives have Tails more than a Span long, like Dogs, but without Hair, and dwell in the Mountains, not in Cities. Unicorns are plenty here, besides Game and Fowl [m]. Lambri Province.

THE Kingdom of *Fanfur* hath the best Camphire, which is sold for its Weight in Gold. Here are found tall Trees, as large as two Men can fathom; whence taking the thin Bark and Wood about three Fingers thick, the Pith within is Meal [n]. This they put in Water, and stirring well, the Dross swims at-Top, and the purer Part falls to the Bottom, whereof they make Paste, tasting like Barley-Bread. *Polo* brought some of it to *Venice*. The Wood of this Tree sinks in Water like Iron. They make short Lances of it, for the long would be too heavy, hardening the Points in the Fire; which thus prepared, will pierce Armour sooner than if made of Iron. Fanfur Province.

ABOUT an hundred and fifty Miles from *Lambri*, sailing Northwards, are two Islands; first *Nokueran* [o], where the Natives live like Beasts, going all naked. They worship Idols. Here are excellent Trees, Cloves, Sanders white and Islands Nokueran, Angaman.

[a] In the *Basil* Copy, *Boëach*: In the *Berlin*, *Loeach*. [b] In the *Latin* Copies, *Petan*. [c] In the *Basil* Copy, *Maletur*: In the *Berlin*, *Malenii*. [d] This, we presume, is the Island which at present goes by the Name of *Java*. [e] In the *Basil* Copy, *Ferlekh*. [f] In the same Copy, *Basman*. [g] The Rhinoceros is to be understood here; although the Description is not exact. [h] Called *Toddi*. [i] Cocoa Nuts. [k] According to the *Berlin* Copy, the *Great Bear* is visible; but not the North Pole. [l] In the *Basil* Copy, *Dragoiam*: In the *Berlin*, *Dagoiam*. [m] *Purchas Pilgr.* p. 103. [n] This is the *Sagu*, or *Sagoe*. [o] In the *Basil* Copy, *Necuram*: In the *Berlin*, *Pecuram*, once *Mecaram*.

red,

Coaſts of India.

red, *Indian* Nuts, *Braſil*, and other Spices: a The other *Angaman* [a], ſavage as the former. *Polo* was told, they had Dogs Heads.

Iſland Seylan.

SAILING hence a thouſand Miles, Weſt by North, is *Zeilan* [b], the beſt Iſland in the World, two thouſand four hundred Miles round. Formerly it was three thouſand ſix hundred Miles in Compaſs, as appears from the Sea-Charts uſed in thoſe Parts; but the North-Winds have drowned a great Part of it. The Natives are Idolaters, and go naked, only wearing a Cloth before. b They have no Corn, but Rice, and Oil of *Seſamin*, Milk, Fleſh, and Wine of Trees, Abundance of Braſil, the beſt Rubies, with Saphires, Topazes, Amethyſts, and other Gems. The King, called *Sendernaz*, is ſaid to have an invaluable Ruby, one Palm long, and as thick as a Man's Arm, without Spot, and ſhining like Fire. *Kublay Khân* ſent, and offered the Value of a City for it: But the King anſwered, that all the Treaſures on Earth ſhould not purchaſe it, as c having deſcended to him from his Anceſtors [c].

Adam's Sepulchre.

THERE is in this Iſland a high Mountain, which none can aſcend, as *Polo* was told, but by Iron Chains. On the Top is to be ſeen *Adam*'s Sepulchre [d], according to the *Mohammedans*; but the *Pagans* ſay it is the Body of *Sogomonbar Khân*, Son to a King of that Iſland; who retired to this Place, to lead a ſolitary Life, from whence no Pleaſures, nor Perſuaſions could draw him. After his Death, his Father made his Image of d Gold, adorned with Gems, and commanded all his Subjects to worſhip it; and hence began Idolatry. They come from far in Pilgrimage to this Mountain, where his Hair, Teeth [e], and a Diſh of his, are ſhewed, as precious Reliques. The Report made by the *Mohammedans*, cauſed the Grand *Khân*, in 1281, to ſend Ambaſſadors thither; who obtained two Teeth, a Diſh, and ſome of the Hairs [f], from the King of *Zeilan*; which he cauſed to be received by the whole Peo- e ple of *Khânbalu* [g], without the City, and brought to his Preſence with great Honour [h].

2. Account *of the* maritime Countries *of* Greater India.

Country of Malabar. *Pearl Fiſhery. The King, his State. Certain Cuſtoms: Their Religion: Debtors Law: Their Soothſayers: Idols, and Votaries. City of* St. Thomas. *A lying Miracle.* Murfili *and* Lak. *The* Bramins. Tingui, *or Monks.* Kael *City.* Koulam *and* Deli. Malabar *Kingdom.* Guzerat *Kingdom.* Kanam *and* Kambaya. Kheſmakran. *Iſle of Women.* Sokkotra *Iſland. Ambergriſe.* Magaſtar, *or* Madaigaſkar. *The Bird* Rukh. Zenzibar *Iſland. The* Giraffa. Indian *Iſlands.* Abaſha, *or* Abiſſina: *Inhabitants brown.* Adem, *or* Aden. Eſher, *or* Shahr: *Produce.* Kalayat *City. Iſland of* Ormus. Polo's *Relation rendered intelligible: Its Advantages.*

SAILING ſixty Miles Weſt from *Zeilan*, is c the great Province of *Malabar* [i], on the Continent, called *India the Greater*, the richeſt Country in the World. There are in it four Kings, the chief of whom is *Senderbandi* [k]. In his Kingdom [l] there is a Pearl-Fiſhery, betwixt the Coaſt and *Zeilan* [m], in a Bay where is not above twelve Fathom Water. This is performed by Divers, who in Bags, or Nets, tied to their Bodies, bring-up the Oyſters, which contain the d Pearls: And becauſe the Place is infeſted with dangerous Fiſhes, they hire Bramines to charm them: Theſe have the Twentieth, the King the Tenth. *Betala* Road produces moſt. The Oyſters are found here only during *April*, and till the Midſt of *May*: But in *September* they meet with them again, in a Place above three hundred Miles off, and till the Midſt of *October*.

THE King goeth as naked as the reſt, excepting his Ornaments; which are a Collar of pre- e cious Stones about his Neck, and a Silk String at his Breaſt with an hundred and four Pearls (as Beads) to number his Prayers, which he muſt ſay

[a] In the *Latin* Copies, *Angania*. If this be the Iſland *Anduman*, oppoſite to the Coaſt of *Malakka* and *Siam*, (for it was in the Courſe the *Arabs* followed in ſailing to *China*, which *Polo* ſeems to have taken) it lies too far from *Java*, unleſs *Sumatra* be included under the ſame Name; which is not improbable: But if the Bearing from *Aguman* to *Seylon*, be regarded (which, however, we think ought not to be) *Angaman* ſhould lie ſomewhere off the Weſt-Side of *Sumatra*. [b] In the *Latin* Copies, *Seylam*: In the *Malabar* Language, *Selan* or *Seylandiv*; whence the *Arabs* have made their *Serandib*, by liquifying the *l*, and putting *b* for *v* Conſonant which they want. *Coſmas Indopleuſtes* writes *Seylendiba*. [c] *Purchas Pilgr.* p. 104. [d] Or, *Adam*'s Food. See *Knox*'s Hiſt. of *Ceylon*, p. 3; *Renaudot Ancien. Relat.* p. 134; and *Ribeiro*'s *Ceylon*, p. 172. [e] Later Authors ſpeak of but one Tooth, deſtroyed by the *Portugueze*, See before, *p.* 207. Note g. [f] No doubt they have the Art of multiplying their Reliques, and preventing their Exhauſtion, as well as the Papiſts, who, though the Hairs of *St. Peter*'s Beard, ſome of the *Virgin Mary*'s Milk, Nails and Wood of the Croſs, have been given away from Time to Time, ſtill keep-up the Quantity by proper Supplies. [g] All this Paragraph is omitted in the *Latin* Copies, as many Things are added in them; the Variations, in every Reſpect, being very great throughout. [h] *Purchas*, as before, *p.* 106. [i] In the *Latin* Copies, *Maabar*. [k] In the *Latin* Copy, *Senderba*: In the *Berlin*, *Scuderba*; perhaps the *Samorin* of *Kalekut*. [l] Called, in the *Latin* Copies, *Var*, or *Vaar*. [m] This agrees with the Pearl-Fiſhery on the Coaſt of *Tutekorin*, near *Cape Komori*.

daily to his Idols, conſiſting of the Words *Pakkauka, Pakkauka, Pakkauka*, repeated ſo many Times. The like Bracelets he weareth on three Places of his Arms and Legs, on his Fingers and Toes. He hath one thouſand Women, taking whomever pleaſeth him; as he did one from his Brother, which had kindled a War, if their Mother, by threatening, in caſe they proceeded, to cut-off her Breaſts which had nouriſhed them, had not prevented it. He is always accompanied by numerous Horſemen, as his Guard; who, when he dies, burn themſelves with his Corpſe, to attend him in the next World.

ALL the Horſes in *Malabar* are brought from *Ormuz*, *Diulfar*, *Pekher*, and *Adem*; for the Country breeds none: And it happens ſometimes, they are very ill-ſhaped, and good for nothing. Condemned Perſons offer to ſacrifice themſelves in Honour of their Idols. This is performed by twelve Wounds, given with ſo many different Knives, in divers Parts of the Body; at every Blow, ſaying, *I kill myſelf in Honour of that Idol*; and the laſt he thruſts into his Heart, and then is burned by his Kindred. The Wives alſo caſt themſelves into the Fire with their dead Huſbands; ſuch as refuſe being reckoned infamous.

THEY worſhip Idols, and moſt of them Oxen; nor would eat of their Fleſh for the World. There are, however, ſome called *Gavi*, who eat the Fleſh of thoſe that die, and dawb-over their Houſes with Ox-Dung. Theſe *Gavi* being deſcended from the Men who ſlew *St. Thomas*, not one of them can ever enter the Place where his Body is, though puſhed forwards by ten others. They ſit on Carpets on the Ground. In this Kingdom, they have no Corn, but Rice; are no Warriors, and eat no Fleſh of Animals, but what are killed by the *Arabs*, or other People. Both Men and Women waſh Morning and Evening, nor will otherwiſe eat: They who obſerve not this Cuſtom, are accounted Heretics. They touch not their Meat with their Left-hand, uſing it only to wipe, and do other unclean Offices. Each drinks out of his own Pot, and will not drink out of another Man's, nor ſuffer his own to touch his Mouth; but holds it over, and pours the Liquor in. As Foreigners cannot uſe their Pots, they pour Drink into their Hands, for them to ſuck-up.

JUSTICE is ſeverely executed for Crimes, and a Creditor may draw a Circle round his Debtor, which he dares not paſs, till he hath paid, or given Security: If he doth, he is put to Death. *Polo* once ſaw the King himſelf on Horſeback thus encircled by a Merchant, whom he had long put-off: Nor did he ſtir out of it, till he had ſatisfied the Debt, the People applauding his Majeſty's Juſtice. They are very ſcrupulous in drinking Grape-Wine; and they who do, are not admitted to be Witneſſes. The like Privilege is alſo denied thoſe who uſe the Sea; for they ſay ſuch Men are deſperate. They think Lechery no Sin. They have no Rain, but in *June*, *July*, and *Auguſt*; without which refreſhing Showers, they could not live for Heat. Marco Polo. 1295.

THEY have many Phyſiognomiſts, and Sooth-ſayers; who caſt Nativities, and obſerve Beaſts and Birds. They aſſign to every Day of the Week an unlucky Hour, called *Khoyak*; to *Monday*, that betwixt Two and Three; to *Tueſday*, the third Hour; to *Wedneſday*, the ninth; and ſo on, noting them down in their Books all through the Year. At thirteen Years old, they put the Boys to get their own Bread, giving them a ſmall Stock to begin, with which they run up-and-down to buy and ſell. In the Fiſhing-Seaſon, repairing to the Port, they buy a few Pearls, and ſell them again at a ſmall Profit to the Merchants; who remain in the Houſes, to avoid the Heat. Out of their Earnings, they buy Victuals, which they bring to their Mothers to dreſs; for they muſt not eat at their Father's Coſt. *Their Soothſayers.*

THEY have Idols, Male and Female, in their Monaſteries; to which they offer their Daughters. On theſe Occaſions the Monks (or Prieſts) meeting to feaſt, ſing and dance, to cheer the Idols: The Maidens thus conſecrated to them, ſet Victuals before them, and ſing during the Space of a Meal: Then ſaying they have eaten, fall-to themſelves in earneſt; after which they return home. The Cauſe of theſe Solaces is, the Houſhold Quarrels betwixt the God and his Goddeſs; which if they did not thus appeaſe, they ſhould loſe their Bleſſing. *Idols and Votaries.*

THE great Men have Litters of large Canes [a]; which, when they have a Mind to ſleep, can be drawn-up by Cords to a good Height from the Ground, and thereby prevent the Biting of Tarantulas, Fleas, and other Vermin, as well as procure the freſh Air.

THE Sepulchre of *St. Thomas* [b] is a ſmall City [c], little frequented by Merchants, but infinitely by *Chriſtians* and *Mohammedans*, on the Score of Devotion: For the latter hold him a *City of St. Thomas.*

[a] The Bambû Palakins. [b] *Purchas* obſerves, that *Malabar* is by this Author extended to *Choromandel* alſo. [c] The *Syrians* call it *Beit Tûma*, or, *the Houſe of Thomas*. Whence the Corruption *Betuma*, in the two ancient *Arab* Voyages, publiſhed by *Renaudot*, p. 13, and 146. *John* of *Empoli*, *Barboſa*, *Corſali*, and almoſt all the early Travellers affirm, that his Sepulchre is at *Madras*, called by the *Portugueze*, *St. Thomas*.

Coaſts of India.

great Prophet, and call him *Ananias*, that is, *a holy Man* [a]. The *Chriſtians* give the Earth where he was ſlain, which is red, mixed with Water, to the Sick.

A lying Miracle.

IN the Year 1288 [b], a great Prince having more Rice than Room to ſtow it in, made bold with *Thomas*'s Church, in the Chamber where Pilgrims were received: But by a ſeaſonable Viſion of that Saint in the Night, was ſo terrified, that he quickly freed the Place. The Inhabitants are become black, by anointing themſelves with *Seſſamine* Oil. They paint the Devil white, and their Idols black. The Beef Worſhippers carry with them to Battle, ſome Hair of a wild Ox, as a Preſervative againſt Dangers.

Murfili *and* Lak.

THE Kingdom of *Murfili*, or *Monſul*, is Northward of *Malabar* five hundred Miles. The Hills produce Diamonds, which the Natives, who are Idolaters, ſearch-for after great Rains. Weſtwards from *St. Thomas*, is *Lak*, *Loak*, or *Lar* [c], whence the *Bramins* [d] have their Original. Theſe are the faireſt Merchants in the World: They abhor Lying and Theft, never break their Truſt, and deal juſtly for thoſe who employ them either to buy, or ſell Goods. They are known by a Cotton Thread, which they wear over the Shoulder, tied under the Arm croſſing the Breaſt: Are in eating very abſtemious, and long-lived: Have but one Wife, and are great Diviners. When about to traffic, they conſider their own Shadow in the Sun, and thence conjecture according to their Rules. They chew a certain Herb (the Betel) which preſerves their Teeth, and helps Digeſtion.

The Bramins.

Tingui, *or Monks.*

THERE are ſome Religious of them, called *Tingui*, who go quite naked, and live auſterely, wearing the Figure of an Ox in Braſs on their Forehead. Of the Aſhes of the Bones of that Animal, they make an Ointment, wherewith they anoint their Bodies in divers Places. They neither kill, nor eat any living Creature, nor Herb, or Root, before it is dried; believing, when green, they have a Soul. Inſtead of Diſhes, they lay their Victuals on dry Leaves of Apples of Paradiſe. They exonerate in the Sands, diſperſing their Ordure, leſt it ſhould breed Worms, which muſt preſently die for Want of Food [e].

Kael *City.*

KAEL is a great City, governed by *Aſtiar*, one of the four Brethren, who is very rich, and uſes Merchants kindly. He hath three hundred Women. The People are continually chewing a Leaf called *Tambul* [f], with Spices and Lime.

KOULAM [g] is a Kingdom independent, five hundred Miles North-Weſt from *Malabar*. Here, among the Idolaters, dwell *Jews* and *Chriſtians*, who have a Language of their own. The Produce are Pepper, Braſil, Indigo, black Lions, and white Parrots of divers Sorts, ſome blue, others red, and ſome very little [h]: Peacocks and Peahens, much differing from ours, and greater; as are their Fruits. They are very libidinous, and marry their Siſters: Have many Aſtrologers and Phyſicians. In the Province of *Kumari* [i] are Apes as large as Men; and here *Polo* had Sight of the North Star. Three hundred Miles Weſt of *Kumari*, is the Kingdom of *Deli* [k], which hath a peculiar Language. The People are idolatrous, and have Store of Spices. Here is no Port, but a great River, with a good Mouth, where the Ships of *Manji* arrive in Summer.

MALABAR [l] is a Kingdom in the Weſt, in which, and in *Guzerat*, are many Pirates; who ſet-out with above an hundred Sail, carrying their Wives and Children. They keep the Sea all Summer, ſpreading their Ships five Miles aſunder, to catch the Merchants, whom they rob, and then ſet on Shore. Here you meet with Ginger, Pepper, Kubebs, and *Indian* Nuts. The Ships of *Manji* bring hither Oars, Cloth of Gold, Silks, Gold, Silver, and other Commodities; which, with the Goods of the Province, are tranſported to *Aden*, and *Alexandria* in *Egypt*.

THE Kingdom of *Guzerat* has its own King, and Language, being a Weſtern maritime Province. The Pirates here make the Merchants drink Water mixed with Tamarinds, to exonerate the Pearls and Jewels, which they ſwallow. Ginger, Pepper, Indigo, and Cotton abound. The Trees are ſix Fathom high, and endure twenty Years: But after twelve Years Growth, the Cotton is good only for Quilts, not for Spinning. Unicorns [m] are plenty. The moſt curious Embroideries in the World, with other Goods, are made here.

PROCEEDING Weſtward is *Kanam* [n], a large and noble Kingdom. It yields Store of Frankincenſe, and has a great Trade for Horſes. *Kambaya* [o] is another great Kingdom towards the Weſt, producing much Indigo, Bukram, and

[a] *Ananias* is a *Hebrew* Word, ſignifying, *the Cloud*, or *Divination of the Lord*. In the *Baſil*, it is *Avoryam*; and in the *Berlin*, *Avarnam*, that is, *holy Man*. [b] So alſo in the *Berlin* Copy; but in the *Baſil*, 1277. [c] In the *Latin* Copies, *Loë*. [d] In the *Baſil* Copy, *Abrajamins*: In the *Berlin*, *Abrajans*. [e] *Purchas Pilgr.* p. 105. [f] The *Arabic* Name for the Betel; or Betle, the *Malabar* Word, *Teix*. p. 18. [g] Perhaps on the Coaſt toward *Surat*: In the *Latin* Copies, *Coilum*. [h] Or, Perokites. [i] In the *Latin* Copies, *Comari*, far from *Cape Komari*, or *Komorin*. [k] In the *Baſil* Copy, *Eli*: In the *Berlin*, *Heli*: Perhaps the Kingdom of *Dehli*, or *Delli*, then extended to the Sea-Coaſt Southward. [l] In the *Latin* Copies, *Malibar*. [m] The Rhinoceros. [n] In the *Baſil* Copy, *Tana*: In the *Berlin*, *Caria*. [o] In the *Baſil*, *Cambaath*: In the *Berlin*, *Cambaech*.

Cotton.

Cotton. *Servenath* [a] is a Kingdom ſtill to the a West: Has a peculiar Language. The Inhabitants are Merchants; a good People, though Idolaters.

KHESMAKORAN [b] is a large Kingdom. Moſt of the Inhabitants are *Mohammedans*; the reſt Idolaters. They live by Merchandize and Manufactures, and are reſorted by Traders both by Sea and Land. This is the laſt Province of *Greater India*, proceeding North-Weſtward from *Malabar*, which here ends: And here *Polo* obſerves, that all the Provinces and Cities thereof, which he has mentioned, lie along the Sea-Coaſt.

FIVE hundred Miles South of *Kheſmakoran*, are ſaid to be two Iſlands, thirty Miles aſunder; one of Men, the other of Women [c]; whence they are called the Male and Female. The Men viſit the Women, and ſtay with them all *March*, *April*, and *May*. It ſeems, the Air will not permit them to remain longer. The Women keep their Sons twelve Years, and then c ſend them to their Fathers: But their Daughters till they are married. They are good Fiſhers, and have Store of Amber: Are Chriſtians, and have their Biſhops from *Sokoktera*, five hundred Miles to the South.

SOKKOTERA [d] is a very large Iſland, whoſe Archbiſhop is not ſubject to the Pope, but to a *Zatolia* [e], who reſides in *Baldak*, and chuſeth him. The *Sokkoterans* go naked, all but a Cloth before: Have no Grain, except Rice; and are d the greateſt Magicians in the World. They allay Storms; and, when they pleaſe, raiſe Winds, to bring back ſuch Pirate-Ships as have wronged them. Theſe bring them Goods, which being the Spoil of *Mohammedans* and Idolaters, they make no Scruple to traffic for. Much Ambergreaſe is found on the Coaſt, which comes-out of the Belly of Whales. Theſe they take with Harpen-Irons tied to a long Cord, having at the End a Piece of Wood, which floats on e the Sea, and ſhews where the Whale is to be found when dead. By this they drag it a-ſhoar, and cutting open the Belly, take-out the Ambergreaſe. The Head yields many Caſks of Oil [f].

A THOUSAND Miles thence, South-Weſtward, is *Magaſtar* [g], one of the greateſt and richeſt Iſles of the World, three thouſand Miles in Circuit, inhabited by *Mohammedans*, and governed by four old Men [h]. The People live by Traffic, and ſell great Store of Elephants Teeth. They feed on Camels Fleſh, as moſt delicious of all other. Much Ambergreaſe is driven here upon the Shores. The Iſland abounds with wild Beaſts, as Lions, Giraffas, wild Aſſes, and other b Game. Silks, Cloth of Gold, and other rich Goods, are brought hither from foreign Countries. Veſſels ſeldom ſail Southward to any of the numerous Iſlands, except this and *Zenzibar*, by reaſon of the violent Currents: For there is no returning Northward; and the Ships which from *Malabar* make the Voyage in twenty, or twenty-five Days, are three Months going-back.

POLO was told by Eye-Witneſſes, that at a *The Bird* Rukh. c certain Time of the Year, there comes hither, from the South, a wonderful Bird, called *Rukh*, like an Eagle, but ſo large, that it takes-up an Elephant in its Talons, and ſoaring aloft, kills him, by letting him fall, then feeds on him: That his Wings, when ſpread-out, extend ſixteen Paces, the Feathers being eight long, and proportionably thick: That a Meſſenger ſent by the Great *Khân* to view the Iſland, brought back one of the Feathers, which meaſured nine Spans [i], d and the Barrel two Palms; beſides the Tooth of a Chinghial, a Beaſt that bred there, as big as a Buffalo, which weighed fourteen Pound.

AFTER this you meet with the Iſland of *Zen-* Zenzibar *zibar* [k], two thouſand Miles in Compaſs. The *Iſland.* Natives are black, and go naked: Are very thick, and ſhort, but ſo ſtrong, that one will carry as much as five *Italians*, and eat in proportion. They have large, frightful Features. Their Diet is Fleſh, Milk, Dates, and Rice; e of which Grain, and Sugar, they make a Wine ſcarce inferior to that of the Grape. Ships come here for Ivory and Ambergreaſe, there being many Whales on the Coaſt. When the Male Elephant wants to couple, he digs a hollow

[a] In the *Baſil* Copy, *Semenath*: In the *Berlin*, *Semenach*. [b] In the *Baſil* Copy, *Reſmakoram*. Perhaps the Province of *Makran* in *Perſia*, bordering on *India*. [c] This ſeems to be the Iſland of *Legebâlus*, in the ancient *Arab* Voyages, publiſhed by *Renaudot*, p. 11, and 12; and, doubtleſs, is an *Arabian* Fiction. [d] In the *Baſil* Copy, *Scoria*: In the *Berlin*, *Scoira*. [e] Rather, *Zatolico*, that is, a *Catholicos*, or Patriarch of the *Neſtorians* at *Baghdâd*. See *Renaudot Ancien. Relat.* p. 173. [f] *Purchas*, as well as the *Latin* Copies, omits this curious Diſcovery, which has of late been verified. It is ſtrange *Renaudot*, who quotes the *Italian* Edition of *Polo* ſo often, ſhould not mention this Authority in his Diſſertation on Ambergreaſe, *Ancien. Relat.* p. 210, *& ſeqq.* [g] In the *Baſil* Copy, *Madaigaſcar*: In the *Berlin*, *Madeigaſcar*. [h] It is in the *Italian*, *Sicchi* (that is, *Sheykhs*) ſignifying, *old Men*; rather *Lords*, when applied to Rulers. [i] It ſhould, probably, be no more than nine; which yet is abundantly too much. This is another Fiction of the *Arabs*, from whom moſt of what he writes ſeems to be taken. [k] In the *Baſil* Copy, *Zenzibar*: In the *Berlin*, *Zamzibar*. He miſtakes this Country, which is Part of the Continent, for an Iſland; the Iſland of that Name, which lies on the Coaſt, being very ſmall. The Name, ſignifying the *Coaſt of the Zenji*, was given by the *Arabs* on Account of the *Zenji Blacks*.

Coaſts of India.

Place, and lays the Female on her Back to come at her, the Pudenda lying very forward.

The Giraffa.

THE *Giraffa*, a beautiful gentle Creature, is found in this Iſland. The Forelegs are longer than the hinder: The Neck long alſo, and the Head ſmall. The People are good Warriors: Having no Horſes, they fight on Camels and Elephants, which carry Caſtles holding fifteen or twenty Men, armed with Lances, Swords, and Stones. They give the Elephants Wine, to make them more courageous in Battle.

Indian Iſlands.

IF the Mariners of thoſe Countries, and their Writings which *Polo* had ſeen [a], are to be credited, the leſſer Iſlands in the *Indian* Seas, ſubject to the greater, which have been deſcribed, are no fewer than twelve thouſand ſeven hundred, reckoning both the inhabited and deſart. *Greater India*, which begins at *Malabar*, and ends at *Kheſmakoran*, contains thirteen very large Kingdoms; whereof *Polo* has mentioned but ten. *India the Leſſer*, beginning at *Ziambi*, and ending at *Murfili*, comprizes eight Kingdoms, beſides the numerous Iſlands. It remains to ſpeak of the ſecond, or *Middle India*, called *Abaſha* [b].

Abaſha, or Abiſſina,

ABASHA abounds with Proviſions and Gold, Elephants, Lions, Giraffas, Aſſes, and other Animals. Seven Kings reign there, four *Chriſtian*, and three *Mohammedan*, all ſubject to one of the *Chriſtian* Kings. The *Chriſtians*, for Diſtinction, have three Marks made on the Face with a hot Iron; one in the Forehead, the other two in the Jaws; and this is the Baptiſm of Fire. The *Mohammedans* have a Mark down the Forehead to the Middle of the Noſe. The *Jews* one on the Jaw. The chief *Chriſtian* King reſides in the Midſt of the Province: The *Mohammedan* towards *Adem*. *St. Thomas* having preached in *Nubia*, came to *Abaſha*; from whence he paſſed to *Malabar*.

Inhabitants brave.

THE *Abiſhins* are very brave, being always at War with the *Soldân* of *Adem*, the *Nubians*, and other neighbouring Nations. IN 1288, as *Polo* was told, the great King intended to viſit *Jeruſalem*; but being diſſuaded, on Account of the many Kingdoms of the *Mohammedans*, his Enemies, which he was to paſs-through in his Way, ſent a Biſhop to pay his Devotions there; who, in his Return, was ſeized by the *Soldân* of *Adem*, and circumciſed by Force. Hereupon the *Abiſſhin* King, aided by two of the *Mohammedans*, defeated the *Soldân*; and taking his City, ſpoiled it in Revenge.

ADEM [c] is full of Cities and Caſtles. It has a fine Port, where the *Indian* Merchants arriving, put their Goods on board leſſer Veſſels, to be ſent to *Alexandria*. Then ſailing through a Gulf of the Sea, they come, in twenty Days, to a Port, where they are loaded on Camels, and in thirty Days carried to the *Nile*. Thence they are conveyed in Barks, called *Zerma* [d], down the River to *Kayro*, and forward through a Canal, called *Kalizena* [e], to *Alexandria*. This is the ſhorteſt Way of importing Goods from *India*. Likewiſe from *Adem*, Horſes are exported to all Parts of *India*. In ſhort, being the greateſt Mart in all theſe Countries, its *Soldân* is become very rich. *Polo* was told, that when the *Soldân* of *Babylon* [f] went, in the Year 1200, to beſiege *Akra* [g], he of *Adem* ſent him thirty thouſand Horſes, and forty thouſand Camels, in Hatred to the *Chriſtians*.

FORTY Miles South-Eaſt of *Adem*, and ſubject to it, is the City of *Eſher* [h], which has many Towns and Caſtles under its Juriſdiction. Its Port is much reſorted by *Indian* Ships, which trade for Horſes. Here is Store of white Incenſe, which diſtils from little Trees like the Fir, an Inciſion being made in the Bark. The *Soldân* has it at ten *Biſantins* the *Kantara*, and ſells it for forty. No Grain is produced but Rice and Millet. Date-Trees are plenty, of whoſe Fruit, Sugar, and Rice, they make Wine. Their Sheep are ſmall, and in Place of Ears, have two Horns, below which are two Holes. There is Plenty of large *Tunni* on the Coaſt, with other Fiſh; which the Inhabitants take in *March*, *April*, and *May*. Theſe being dried, ſerve their Cattle and Sheep for Food all the Year, the Country affording no Graſs for the Heat. They likewiſe make Bread, by reducing the dried Fiſh to Flour, and making it into a Paſte, which they bake in the Sun [i].

DULFAR [k] is a fine and great City, twenty Miles South-Eaſt of *Eſher*; its Produce and Trade being of the ſame Kind. It has a good

[a] This proves what has been obſerved before, that his Relation is taken chiefly from the Report, or Books, of the Eaſtern People. [b] In the *Italian* and *Berlin* MS. *Abaſcia*: In the *Baſil*, *Abaſia*. It is commonly called *Abiſſina*, or *Abiſſinia*. The *Arabs* write *Habeſh*. [c] In the *Latin* Copies, *Aden*; as it is commonly called. It is a Territory and City in the South-Part of *Arabia*. [d] Or, *Jerma*. [e] Or, *Kalij*; which ſignifies a *Canal*, in *Arabic*. [f] By *Babylon* here, muſt be underſtood *Kayro*, or *Kahera*, in *Egypt*, mentioned in the former Paragraph; and by the *Soldân*, *Saluh addin*, or *Saladin*, as he is commonly called; but he took *Akka*, or *Akra*, in 1187. [g] In the *Baſil* Copy, *Acora*; the ſame with *Ptolemais* in *Paleſtina*. [h] In the *Italian*, *Eſcier*: In the *Berlin* Copy, *Eſyer*. Perhaps *Shahr* in *Arabia*. But it lies North-Eaſt of *Aden*, as does all the Coaſt. [i] *Purchas Pilgr.* vol. 3. p. 106. [k] Rather, *Dhofar*: But it ſtands ſeventy Miles North-Eaſt of *Shahr*. *Purchas*, as well as the *Latin* Copies, omits this City, and the two following.

Port,

Port, and is ſubject alſo to *Adem:* Yet has many Cities, and Caſtles under it.

KALAYAT is a great City, and good Port, at the Entrance of a Gulf called *Kalatu*, five hundred Miles South-Eaſt from *Dulfar* [a]. It is ſubject to *Melikh* [b] of *Ormus*, who flies hither as to a ſtrong Hold [c], when invaded by the King of *Khermain*, on his refuſing to pay ſuch Tribute as he impoſes. It has a very ſtrong Caſtle, which ſo commands the Bay, that no Ships can enter without Leave. The People live on Dates and Fiſh, having no Corn but what comes from abroad.

THREE hundred Miles to the North-Eaſt is the Iſland *Ormus*, which has a great and fair City, on the Sea-Side. It has a *Melikh*, which Title anſwers to Marquis [d], who has under him many Towns and Caſtles. They have Ventiducts in all their Houſes, without which there would be no living, for the exceſſive Heat [e].

THUS we have gone-through the Relation of *Polo*, augmenting and correcting the Tranſlation of *Purchas* from the *Italian* of *Ramuſio*; whoſe Copy appears to us much more accurate and compleat than the *Latin*, which in infinite Places varies greatly from it; ſometimes adding, oftener omitting, and giving a different Account of Things. We have taken no ſmall Pains to mark thoſe Variations; but more to clear-up the Author's Geography: And though we do not pretend to have diſcovered the preſent Names of all the Countries and Cities which he mentions, (a Thing which ſeems ſcarce poſſible to be done) yet we have ſucceeded in ſo great a Number of the moſt conſiderable Articles, that it is preſumed we have thereby rendered *Polo*'s Relation, for the greater Part, intelligible; and enabled a Reader, by our Notes, to trace his Travels through the ſeveral Parts of *Tartary* and *China*; for Want of which Advantages, the former Editions of his Work have, in Point of the Geography, been moſtly uſeleſs. *Marco Polo.* 1295. *Rendered intelligible.*

WE ſhall farther add, that this Author, with all his Imperfections, has made very great Diſcoveries, conſidering the Age he travelled in; and brought home a vaſt Number of uſeful Obſervations, whatever Way he came by them. His Account of the Cuſtoms among the *Tartars* and *Chineſe*, are for the general very curious, and agreeable, to what we find at preſent; and he ſeems to have travelled farther in the Countries South-Weſt of *China*, than any other ſince his Time. It is only to be regretted, that he was not more particular and exact in ſetting-down Places on the Roads, with their Names and Situations. *Its Advantages.*

[a] Here are two great Errors; for it lies North-Eaſt by Eaſt, not above an hundred Miles from *Dhofar*. See our Chart of *Arabia*, Vol. I. This Place lies near *Cape Ras al gat*, at the moſt Eaſtern Point of *Arabia* towards *Perſia*. [b] This muſt have been *Malek Seyfaddin Abubekr*, who uſurped the Crown of *Ormus* from *Amir Seyfaddin Noſerat*; but was afterwards expelled, and *Malek* reſtored; yet ſoon murdered in 1291, having reigned twelve Years, including *Malek*'s Uſurpation, See *Teixeira*'s Hiſtory of *Perſia*, p. 383. [c] The Kings of *Ormus* were originally from *Arabia*, about *Kalayat*. [d] *Malek*, in *Arabic*, ſignifies *King*. [e] See *Ramuſio*, vol. 2. p. 59.

CHAP. IV.

The EMBASSY *of* Shâh Rokh, *Son of* Tamerlan, *and other Princes, to the* Emperor *of* Katay, *or* China.

Tranſlated from the Perſian *into* French, *and now firſt done into* Engliſh.

INTRODUCTION.

Travels of Odoric, *a lying Friar.* *Sir* John Mandeville's, *of the ſame Stamp.* Baldenſel *to* Tartary. *Miſſioners ſent by the* Popes *into* Tartary. *Embaſſy from* Shâh Rokh.

Travels of Odoric,

THE next Traveller we meet with into *Tartary*, and the Eaſtern Countries, after *Marco Polo*, is Friar *Odoric*, of *Udin* in *Friuli*, a *Cordelier*; who ſet-out about the Year 1318, and at his Return the Relation of it was drawn-up, from his own Mouth, by Friar *William* of *Solanga*, in 1330. *Ramuſio* has inſerted it in *Italian*, in the ſecond Volume of his Collection; as *Hakluyt*, in his Navigations, has done the *Latin*, with an *Engliſh* Tranſlation. This is a moſt ſuperficial Relation, and full of Lies; ſuch as People with the Heads of Beaſts, and Valleys haunted with Spirits: In one of which he pretends to have entered, protected by the Sign of the Croſs; yet fled for Fear, at the Sight of a Face that grinned at him. In ſhort, though he relates ſome Things of the *Tartars* and *Manci*, (as he writes *Manji*) which agree with *Polo*'s Account; yet it ſeems plain, from the Names of Places and other Circumſtances, that he never was in thoſe Countries, but impoſed on the Public the few Informations he had from others, mixed with the many Fictions of his own. He ſet-out again for the Eaſt in 1331; but warned, it ſeems, by an Apparition a few Miles from *Padua*, he returned thither, and died.

A lying Friar.

Sir John Mandeville's,

IN 1332, Sir *John Mandeville*, an *Engliſh* Knight, performed a Journey into the ſame Parts, where he ſpent thirty-three Years. At his Return to *Liege*, where he died, he wrote his Book in three Languages, *Engliſh*, *French*, and *Latin*. We are told by *Bergeron* [a], that the *French* Manuſcript is in the King's Library at *Paris*. The *Latin* and *Engliſh* at Length, and very correct, in fifty Chapters, is found in *Hakluyt*'s Collection [b]. The ſame Author adds, that *Odoricus* and *Mandeville*'s Relations are ſo much alike, in the Remarks both true and fabulous, that one of them ſeems to be taken from the other: But as the *Engliſhman* did not return from his Travels till 1355 [c], *Bergeron* concludes, that he copied from the *Italian*. Yet both (continues he) relate ſuch improbable Things, although they affirm to have ſeen them, that there is great Reaſon to believe they have taken for Fact all the Lies that had been told them, according to the romancing Humour of that Age.

Of the Stamp.

PURCHAS has given an Abridgement of *Mandeville*'s Travels [d], and in his Preamble ſuppoſes they had been corrupted by ſome lying Friars out of the *Tales of* Ogerus *the* Dane, and the above-mentioned *Odoricus*. However that be, we do not think either of them deſerves a Place in our Collection.

THERE is likewiſe a Journey into *Tartary*, by *William de Baldenſel*; or, more properly, as *Fabricius* remarks, *Baldenſleve*. He was a *German* Nobleman, before called *Otto de Rienhuſs*. In 1315, having deſerted the Order of Preaching Friars, with the Pope's Abſolution, he went to the *Holy Land*, thence to *Egypt*, *Mount Sinai*, and, laſtly, into *Tartary*. At his Return, he wrote, in *Latin*, an Account of his Journey to Cardinal *Thalyrandus* [e]. There is, in the *French* King's Library, an old *French* Verſion of his Travels, made by *John le Long*, of *Ypres*, in 1351 [f]. *Caniſius* has inſerted the *Latin* Copy in his Collection [g], and calls him *Baldenſel*; as does *Baluz* [h].

Baldenſel as Tartary.

AFTER this Author, we meet with no remarkable Travels into *Tartary* by any *Europeans*, before thoſe of our *Jenkinſon* in 1557. However, the Popes kept-up with that Country, and the *Tartar* Princes, the Intercourſe by Miſſions, which had been ſet on-foot by *Innocent* IV. In 1256, *Alexander* IV. ſent Letters to the *Soltân* of *Perſia*, in order to convert him. In 1269,

Miſſ. ſent

[a] *Traite des Tartars*, ch. 9. [b] It is in the firſt Edition, and in *Latin* only. [c] This muſt be underſtood of his Return from *England*. He died at *Liege*, *November* 17, 1372, and was buried in the Abbey of the Order of the *Gulielmites*; as we learn from *Bale*'s Preface in *Hakluyt*. [d] In his third Volume, from *Hakluyt*'s compleat Relation. [e] *Bergeron* calls him *Vallerand*. [f] Who alſo tranſlated *Hayton* and *Oderic*. [g] *Lectiones Antiquæ*, tom. 5. part 2. p. 96, of the old Edition; and tom. 6. p. 332, of the new Edition, by *Baſnage*. [h] See *Fabric. Biblioth. Med. & Inſim. ætat.* p. 689.

the

Introduction. the *Tartars* in *Syria*, assisted by the *Armenians*, a made War on the *Mohammedans*; and the Great *Khân* sent his Ambassadors to *St. Louis*, *James* of *Arragon*, *Charles* of *Sicily*, and other Christian Princes, inviting them to join his Forces. This caused *Louis* to undertake his second Voyage to *Africa*, where he died. The King of *Arragon* received the Ambassadors at *Valence*, and promised mighty Matters; but did nothing.

The Popes In 1272, *Nicholas* IV. sent *Cordeliers* with Letters to the *Tartars*, *Jacobites*, and *Armenians*, in order both to convert them, and excite them to War against the *Mohammedans*. He wrote to *Argon* in *Persia*; also to *Oblay Khân*, and *Kaydan* [a], *Tartar* Princes. In 1294, or 1300, *Kassan* the *Tartar*, King of *Persia*, having carried-on the War in *Syria*, sent to *Boniface* VIII. and the Christian Princes, for Aid, promising to give-up to them the *Holy Land*. In 1307, *Clement* V. wrote to the King of the *Tartars*, exhorting him to be baptized: And in 1314 dispatched a *Cordelier*, Archbishop of *Khânbalek*, with eight or nine Bishops, into the Eastern Parts. Two Years after, he caused a Treatise, or Catechism, to be written for the Use of the *Tartars*, by *Ægidius Romanus*, a great Theologian; and sent it to all the *Tartars*, *Pagans*, and *Mohammedans*, of the East and North.

Tartary. In 1322, more Bishops and Preaching-Friars went to the same Parts, by Order of *John* XII. and in 1328 there came Ambassadors to *Benedict* XII. from the Great *Khân* [b], with Letters, craving his Blessing. Our Author *Bergeron* informs us, that these Letters were dated from *Khânbalek* [c], in the Year of the *Rat* [d], the third Day of *March*, and sixth Day of the Lunation. In 1341, the last-named Pope sent *Cordeliers*, who with the *Khân*'s Permission, we are told, made many Converts in *Tartary*, and baptized several Monasteries. In 1354, *Innocent* VI. sent *Jacobin* Inquisitors to the *Nestorians* of *Tartary*. In 1365, many Privileges were granted those Friars by *Urban* V: And, lastly, in 1378, *Urban* VI. gave Orders to the General of the *Dominicans*, to send three Inquisitors, one into *Georgia*, another into *Greece* and *Tartary*, and a third into *Russia* and *Walakhia* [e].

WHILE these Things were transacting on the Side of *Europe*, *Tartary* was visited by the Curious, as well as Merchants, of the neighbouring Countries, and Embassies sent from their respective Princes [f]. Many of these were written and published among the Orientals; but none of them have been translated into any *European* Language, except that of *Shâh Rokh* to the Emperor of *Katay*, or *Kitay*, which *Thevenot* has given us in the fourth Tome of his *French* Collection. It was written, as he informs us [g], in *Persian*, but does not mention by whom it was translated. It contains twelve Folio Pages, without any Notes, or Explanations. It must be observed, that this Embassy was performed in the Time of *Ching-tsu*, or *Yong-lo* [h], third *Chinese* Emperor of the *Ming* Race, founded by *Hong-vu*, who had expelled the *Mongols* fifty-one Years before. The Substance of it is as follows.

Shâh Rokh's Embassy. 1419. Embassy from Shâh Rokh.

SECT. I.

1. *The* Ambassadors Travels *from* Herat *to* Khânbalek, *and Reception there.*

Ambassadors set-out. Balkh. Tashkant, Sayram. Bilgotû, Ildûz. Tarkan, *or* Turfân. Karakoja. Kabul, *or* Kamul. Katayan *Politeness. Elegantly feasted in the Desart.* Karaul *Fortress.* Sekju, *or* So-chew. *Centries and Post-Houses.* Kamjû, *or* Kan-chew. *Banquetting-Halls. A huge Image. Fine* Kiosk, *or Tower. River* Karamûran. Sadin fû. *Vast Image. Arrive at* Khânbalek. *State of the Emperor on his Throne. Criminals sentenced. Ambassadors pay Reverence: Their Audience: Their Lodging.*

IN the Year 822 of the *Hejrah*, or 1419 of Christ, *Shâh Rokh* sent Ambassadors, the chief of them *Shadi Khoja*, to *Katay* [i]. At the same Time Prince *Mirza Baysangar*, his Son, dispatched *Soltân Ahmed*, and the Painter *Khoja Gayath addîn*, who had Orders to make an exact Journal of their Travels; taking Notice of whatever was remarkable in each City and Country, the Nature of the Roads, the Police and Customs

Ambassadors set-out.

[a] Perhaps *Hublay*, or *Kublay Khân*, and *Kaydu*, mentioned by *Polo*. [b] Called *Cham*, in the *French*; as it generally is by the early Writers. [c] In the *French*, *Cambaleth*. [d] Rather of the *Mouse*, which is the first Year of the *Tartar* duodenary Cycle. On this Occasion, *Bergeron* tells us, that the first Animal the *Khân* meets with on New-Year's Day, he takes for his God all the twelve Months after, and gives its Name to the Year; and hence this, he says, was called that of the *Rat*, the *Khân* having seen one that Day in his Chamber. Strange that this Author, who was so well-acquainted with the Belief of the *Tartars*, from *Rubruquis*, *Polo*, and others, could be imposed-on by such a ridiculous Fiction! [e] See *Bergeron Traite de Tartares*, ch. 11. [f] This appears also from *Carpin* and *Rubruquis*. [g] In his Preface to the fourth Part of his Collection, where he tells us, he had another Piece of Travels by Land, from the *Indies* to *China*, which he had translated himself from the *Arabic*; but he did not publish it. [h] This Emperor began his Reign in 1404, and died in 1425, the Year of the Ambassadors Return. [i] As the Orientals call it. In the *French* it is commonly written *Khatay*; but more properly *Kitay*: By which is here to be understood all *China*, then under the Dominion of the *Ming* Emperors.

of

Travels to Katay.

of People, with the Magnificence and Government of their Sovereigns.

Balkh.

THE Ambaſſadors leaving *Herat* [a] the eleventh of the Month *Zi'lkaadeh* [b], arrived at *Balkh* the ninth of *Zi'lhejjeh*; where they were detained by the Rains till the firſt of *Moharram*, 823 [c]; and then departing in twenty-two Days, got to *Samarkand*. Here they found, that the *Mirza Ulug Beg* [d] had already ſent his Ambaſſadors, *Soltân Shars*, and *Mehemmed Bakhſhi*, with all his *Khatayans*. The Ambaſſadors of *Khoraſân*, *Badakſhân*, and other Princes, being come together, they ſet-out with thoſe of *Katay*.

Taſhkant, Sayram.

HAVING paſſed-through the Cities of *Taſhkend*, *Sayram*, and *Aſh*, they entered into the Country of the *Mogols* the eleventh of *Rabiya the latter*; where they underſtood that Hord was in great Confuſion, *Awis Khân* having made War on *Shîr Mehemmed Aglan*. Theſe Diſturbances being over, the *Amîr Khudadad* (mentioned before, *p.* 355.) who commanded in that Country, came to inform them, that the Ambaſſadors might continue their Journey with Safety.

Bilgotû, Ildûz.

THE eighteenth of *Jomâda prior*, they came to a Place called *Bilgotû*, on the Territories of *Mehemmed Beg*, where they waited for the *Dajis* [e], and Retinue of the *Shâh* of *Badakſhân*. After their Arrival, they paſſed the River *Kenker* the twenty-ſecond, and the twenty-third ſaw *Mehemmed Beg*, Prince of that Hord; whoſe Son *Soltân Shadi Karkan*, was *Shâh Rokh*'s Son-in-law; and a Daughter of that Prince had married *Mirza Mehemmed Jûki* [f]. The twenty-eighth they entered the Country of *Ildûz* [g], and of *Shîr Behrâm*. They were ſurprized to find Ice two Inches thick in this vaſt Deſart, the Sun being then in the Summer Solſtice [h].

Tarkan, *or* Turfan.

THE eighth of *Jomâda the latter*, being frighted at the News, that the Son of *Ahmed Beg* had plundered the *Daji*, who was *Awis Khân*'s Ambaſſador; they, in haſte, paſſed the Deſiles and Mountains, notwithſtanding the Hail and Rain. At the End of the Month they arrived at *Tarkan* [i], where there is a great Temple, with a huge Idol in it, which the Inhabitants, who are Idolaters, ſay is the Image of *Shakmonni*. Departing hence the ſecond of *Rajeb*, they came the fifth to *Karakoja* [k]. Here, on the tenth, came certain *Katayans*, who took-down the Names of the Ambaſſadors, and all their Retinue. The nineteenth they got to the Town of *Ata Sûfi*, where reſided *Khânzadeh Taj'oddîn*, of the Prophet's Race, originally of the City *Tormul*, and Son-in-law of *Amîr Fakraddîn*, chief of the *Moſlems* dwelling in *Kabul*.

THE twenty-ſecond they arrived at *Kabul* [l]. Here *Amîr Fakraddîn* had built a fine Moſk, near a Temple of the Idolaters, ſet-round with Images, and ſtrange Figures of various Sizes. At the Doors were two gigantic Statues, which ſeemed to fight. *Mengli Timûr Bayri*, a handſome young Man, was Governor of the City. Departing the twenty-fifth, they entered a Deſart, where they met-with Water every two Days; and the twelfth of *Shaabân* ſaw Lions, Oxen, and other wild Beaſts: Theſe Oxen are ſaid to be very large, and ſtrong. The fourteenth they arrived at a Place within twelve Stages of *Sekjû* [m], the firſt City of *Katay*.

FROM this Time the *Katayans* came daily to meet them, erecting Tents in the Deſart, and furniſhing Tables with Fowl, Fruits, and other Victuals, ſerved in China-Ware; beſides ſtrong Liquors to regale them, as ſplendidly as if in the Cities: They likewiſe ſupplied the Ambaſſadors with Proviſions. According to the Liſt taken by them, *Amîr Shadi Khoja*, and *Gakſheh*, had two hundred Perſons in his Retinue; *Soltân Ahmed*, and *Gayath addîn*, five hundred; *Argdak*, ſixty; *Ardvan* fifty; and *Taj'oddîn*, fifty. Thus the Merchants paſſed for the Ambaſſadors Equipage. They made them ſwear there were no more Perſons than what were named in the Liſt; letting them underſtand, that they contemned thoſe who did not tell the Truth.

THE ſixteenth of *Shaabân* they were informed, that *Dankji*, Governor of the Borders, where they were, intended to regale them that

[a] The Capital of *Khoraſân* in *Perſia*, then the Reſidence of *Shâh Rokh*. [b] Or, *Zu'lkaadeh*, as the *Perſians* pronounce it; or, *Dhu'lkaadeh*, as the *Arabs*. It is the eleventh Month of the *Mohammedan* Year; which being Lunar, runs through all the Seaſons like the reſt, whoſe Names we ſhall give in Order, according to the *Perſian* Form, for the Readers better underſtanding the Courſe of this Journal. 1. *Moharram*. 2. *Safar*. 3. *Rabîya al Awal*, or *prior*. 4. *Rabîya al Akher*, or *latter*. 5. *Jomâda prior*. 6. *Jomâda latter*. 7. *Rajeb*. 8. *Shaabân*. 9. *Ramazân*. 10. *Shawâl*. 11. *Zu'lkaadeh*. 12. *Zu'lhejjeh*. [c] Which began *January* 16, 1420, on a *Tueſday*. [d] The Son and Succeſſor of *Shâh Rokh*, famous for his Aſtronomical Tables. [e] In the *French*, *Dagis*: Elſewhere, *Dakgis* [f] *Shâh Rokh*'s fifth Son. [g] Perhaps, the ſame called by others *Yuldûz*, and *Yildûz*; ſuppoſed to be the *Chialis* of later Authors, in *Little Bukhâria*. There is a River called *Chuldus*, in the Jeſuits Map, near the *Ili*, on which the Town might have ſtood. [h] *Thevenot*, Part 4. Art. 4. p. 1. [i] A Miſtake, doubtleſs, for *Tarfan*, or *Turfan*, in *Little Bukhâria*; the *Arabic F* and *K* differing only by a Point. [k] This is ſuppoſed to be the ſame with *Aramuth*, in the Journal of *Goëz*; and that to be *Oramchi*, in the Jeſuits Map. [l] This, no doubt, is the ſame with *Kamul*, or *Khamul*; called alſo *Khamil*; and by the *Chineſe*, *Hami*. See before, *p.* 530. [m] This, doubtleſs, is *So-chew*, near the Entrance of the Great Wall in *Shen ſi*.

Day with an Imperial Feaſt, being arrived where he was encamped, to receive them, they found a ſquare *Arpent* [a] of Ground incloſed with Tents, the Cords of which faſtened to Pegs were ſo interlaced, that there was no getting into the Incloſure, but by the four Gates, or Entrances. In the Midſt of this Place, they had raiſed a great Shed, or Covering very high, of Cloths, ſupported by wooden Pillars; and at the End was a great Imperial Canopy borne-up by two varniſhed Pillars; between which ſtood a great Chair of State for the Emperor, and other Seats on each Hand. The Ambaſſadors were ſet on the Left, and the *Katayan* Officers on the Right. Before each Ambaſſador were placed two Tables, one covered with Meats and Fruits, the other with Cakes and delicate Bread, ornamented with Feſtons in Silk and Paper. The reſt had but one Table each. The Buffet ſtood oppoſite full of China, and Silver Veſſels, for ſerving the Liquors. There was a Band of Muſic, and Youths oddly dreſſed, who played ſeveral Kinds of Tricks. They were entertained alſo with a Comedy, by Actors in Maſks, repreſenting the Faces of Animals; and an artificial Stork with a Child in it, which walked, and performed Variety of ſurprizing Motions. Nothing could be more magnificent [b].

THE ſeventeenth continuing their Journey through the Deſart, they arrived, in a few Days, at *Karaul*, a ſtrong Fortreſs in the Mountains, which bars-up the Road ſo, that you muſt enter by one Gate, and paſs-through the other. Here they were numbered, and their Names ſet-down again. From *Karaul* they went to *Sekjû*, where they were lodged in a great public Structure raiſed over the Gate. Here, and in all other Lodgings, they found Proviſions, Beds, and Horſes; with Matreſſes and Coverlets for the Beds at Night, even for the Servants.

SEKJU [c] is a large and ſtrong City, quite ſquare, in the Entrance of *Katay*. It has ſixteen Market-Places, each fifty Cubits ſquare, and well ſwept. In them are ſeveral covered Galleries, with Shops on both Sides, and a handſome Hall at the Entrance, adorned with Pictures. They have Hogs in every Houſe, and the Butchers hang their Pork in their Shambles along with the Mutton [d]. The City-Walls are flanked with Towers, twenty Paces diſtant. There is a Gate in each Side, from which one may ſee that oppoſite, with the Middle of the City, and its four Quarters. Over each Gate there is raiſed a Pavilion of two Stories, the Top of which is tiled with Porcelain, and is ſhaped like an Aſs's Back, according to the Faſhion of *Katay* and *Mazanderan*. The Temples here take-up near ten *Arpens* of Ground each: All very neat, and the Brick-Pavement poliſhed like Glaſs. At the Gates ſtand pretty Youths, who after regaling Strangers, ſhew them the Temples.

ShâhRokh's *Embaſſy.* 1419.

FROM *Sokjû* to *Khânbalek*, where the Emperor reſides, are ninety-nine Days Journey, through a very populous Country; for one always lodges at Night in a great Borough, and finds by the Way many *Kargu's* and *Kidifu's*. Theſe laſt [e] are Structures ſixty Cubits high, which have always Perſons on Guard, and are ſeen from each other: So that in caſe of any Alarm, Notice is given by Fires, in one Day and Night, the Diſtance of three Months Journey. The Letter containing the Particulars of the Affair, paſſes in like Manner from *Kidifû* to *Kidifû*, which are ten *Merres* [f] aſunder, till it reaches the Imperial City. The Guards of the *Kargû's* are relieved every ten Days; but thoſe of the *Kidifû's* are permanent, having Houſes there, and Ground to till [g].

Centries and Poſt-Houſes.

FROM *Sokjû* to *Kamjû* [h], are nine Stages, or Days Journey; and the *Dankji*, who reſides there, is ſuperior to all the other *Dankji's* of the Borders. At each Day's Lodging the Ambaſſadors were furniſhed with four hundred and fifty Horſes, Mules, and Aſſes; alſo fifty-ſix Chariots, or Waggons. The Servants, who tend the Horſes, are called *Ba fû*; the Muletiers, *Lu fû*; and the Chariotmen, *Jip nû*. Theſe Chariots are drawn each by twelve young Men, with Cords bearing on their Shoulders, from one Lodging to another, through all Difficulties, the *Ba fû's* running before as Guides. At theſe Lodgings they always found Proviſions. The Ambaſſadors were feaſted likewiſe in every City, in a Hall for the Purpoſe, called *Raſûn* [i], where ſtands an Imperial Throne turned towards the Capital of the Empire, with a Canopy over Head, and Curtains on the Sides. At the Foot of it is a great Carpet, on which the Officers and Ambaſſadors ſat, with their People behind them Rank and File, like the *Moſlems* when at

Kamjû, *or* Kan-chew.

Banquetting Halls.

[a] *Arpent* is a *French* Meaſure, of which the *Engliſh* Acre contains near one and an half. [b] *Thevenot*, as before, *p.* 2. [c] Or, *So-chew*, as obſerved before. [d] This Remark, which ſeems very trifling, was Matter of great Surprize and Scandal to the *Mohammedans*, who look on Hogs as unclean Animals. [e] The *Kargu* rather ſeems to be ſpoken of. [f] Six *Merres* make a *Paraſang*, or *Perſian* League, equal to four *Engliſh* Miles, and eight hundred ſixty-eight Feet. See *Geography reformed*, &c. p. 134, *& ſeq.* [g] *Thevenot*, as before, *p.* 3. [h] In the *French*, *Kamgiou*. This is *Kan-chew*, the ſame with *Polo's Kampion*, often mentioned before. It is in *Shen-ſi*, near the Great Wall and Deſart. [i] It muſt be obſerved, that they are not all Chineſe Names that are given to Things in this Journal, particularly they have not the *r* in their Language.

Prayers.

Travels to Katay.

Prayers. Then the Guard, which ſtands beſide the Throne, cries-out thrice; whereat the *Katayan* Officers bow their Heads to the Ground, and oblige the Ambaſſadors to do the like; after which each goes and ſits at his Table.

THE twenty-fifth of *Ramazan* the *Dankji* of *Kamjû* ſent to invite the Ambaſſadors to a Feaſt, letting them know, that it was the Emperor's Banquet, and that they ought to conſider it as ſuch: But they excuſing themſelves, as being their faſting Month, he ſent them all the Victuals he had prepared to treat them with. b

A huge Image.

IN *Kamjû* they ſaw a Temple, each Side five hundred *Kes*, or Cubits, in Length; and in the Middle an Idol lying, as it were aſleep, fifty Feet in Length: So that the Hands and Feet were nine Foot long, and the Head twenty-one round. There were others at his Back, and over his Head, each a Cubit high, in ſuch Attitudes, that they ſeemed alive. The great one was all-over gilded, having one Hand under his Head, and the other ſtretched-down along his Thigh. They called him *Samonifû*, and run in Crouds to bow before him. The Walls were alſo adorned with Figures. About this Edifice were little Temples, like the Chambers of Karawanſerays, with Tapeſtry or Brocade Curtains, Stools, and eaſy Chairs gilded, Chandeliers and Veſſels, which ſerved for Ornament. c

Fine Kioſk, *or Tower.*

THEY ſaw ten more ſuch Temples in the City, and a Structure, which the *Moſlems* call *Teherki felek*. This is twenty Cubits in Circuit, in Form of a *Kioſk* [a], with eight Fronts, and fifteen Stories in Height: Each Story was twelve Cubits high, and had Chambers finely varniſhed, with Galleries round it, embelliſhed with Paintings; repreſenting, among the reſt, the Emperor of *Katay* ſitting with his Courtiers, having young Boys and Girls on the Right and Left. At the Foot of the *Kioſk* were the Figures of Giants, which ſeemed to carry it on their Backs. It was built with Wood, finely poliſhed, and ſo richly gilded, that it ſeemed of maſſy Gold. In a Vault under the Edifice, there is an Iron Axis, (or Pillar) which reſts on a Plate of Iron, and reaches from the Bottom to the Top. This being moved with Eaſe, ſets the whole Fabric in Motion, and turning round [b], in ſuch a ſurprizing d e

Manner, that all the Carpenters, Smiths, and Painters in the World ought to go thither, to learn the Secrets of their Trades [c]. Shâh-Zad 141

BEFORE they left *Kamjû* they were furniſhed with Horſes and Carriages, which they returned in their Way back. There alſo they conſigned the Preſents for the Emperor, except a Lion, which was carried to the Court. In Proportion as they approached the Capital, the *Katayan* Magnificence increaſed. In ſhort, they arrived every Evening at a *Yam* [d], or Lodging, and once a Week at a City, till the fourth of *Shawal*, that they came to the *Karamûran* [e], which is as large as the *Jihûn* (or *Amû* [f].) It is covered by a Bridge of twenty-ſix Boats, laid over with Planks, and kept together by Iron-Hooks and Chains, which are faſtened to Iron-Pillars on each Bank, as thick as a Man's Thigh, ſo that it is as firm and even as could be. Beyond the River they found a great City, where the Ambaſſadors were feaſted more ſplendidly than at any Place before: They likewiſe ſaw a more ſuperb Idol-Temple than any of the former: They took Notice alſo of three public Stews, full of very beautiful Harlots: And as the Women here are handſomer than elſewhere in *Katay*, this is called *the City of Beauty*.

HAVING paſſed ſome other Cities, they arrived, on the twelfth of *Zu'lkaadeh*, at another River as large again as the *Jihûn* [g], which they paſſed in Boats. After they had croſſed ſeveral other Rivers in the ſame Manner, as well as over Bridges, they arrived the twenty-ſeventh at *Sad-in fû*, a great and populous City [h]. In a Temple here ſtands an Image of Braſs gilded, fifty Cubits high, called the Image of a thouſand Hands, as having many, and in the Palm an Eye: The Feet are near ten Cubits long: Round it ſtand ſeveral other Structures and Chambers, which appear like ſo many Niches of different Heights, one reaching to the Ancle, another to the Knee, and a third to his Breaſt. They reckon this Work took-up an hundred thouſand Load of Braſs. The Top of the Temple is a finiſhed Piece, terminating in an open Hall. There are eight of theſe Eminences [i], or Mounts, which may be aſcended both on the Inſide and Outſide, having Grottos in them, where are

[a] A Sort of Pavilion, or Summer-Houſe, for taking the Air, common in the Eaſtern Countries. This was an octogonal Tower, after the Manner of that at *Nan-king*, and other Places in *China*. [b] This has much the Air of a Fiction, although it is hard to imagine the Author would venture to report, to *Shâh Rokh*, what his Ambaſſadors muſt have contradicted, if it was not Fact. [c] *Thevenot*, p. 4. [d] In the *French*, *Lamb Polo*'s *Lamb*, p. 592. [e] This is the *Whang-ho*, or *Yellow River*, mentioned by *Polo* under the ſame Name. See before, *p.* 593. [f] *Thevenot*, inſtead of *Amû*, puts the *Oxus*. It divides *Great Bukhâria* from *Perſia*. [g] This muſt needs be the *Whang-ho*, which they croſſed a ſecond Time, between *Shen-ſi* and *Shan-ſi*; where it is much larger than towards *Lan-chew*, where it is probable they paſſed it the firſt Time. [h] This muſt have been ſome City in *Pe-che-li*, or near the Borders of it in *Shan-ſi*; but we find no ſuch under that Name, either now, or formerly. [i] There is no Mention of any Eminences before.

Travels to Katay.

painted Prieſts, Idols, and Hermits; and, on the Walls, Tigers, Leopards, Serpents, and Trees. There are ſeveral ſmaller Images painted over, which, with the Mountains and Arches, ſeem to be made of Plaiſter. About the Temple are very fine Buildings, and, among the reſt, a turning Tower of ſeveral Stories, like that of *Kamjû*, but more large and fair.

Arrives at Khânbalik.

THE Ambaſſadors continued their Journey, travelling four or five *Paraſangs* a Day, till the eighth of *Zu'lhajjeh*; when they arrived, before Day, at *Khânbalik* [a]. This City is ſo great, that each Side of the Wall is a *Paraſang* in Length. An hundred thouſand Houſes lay ſtill in Ruins, un-rebuilt, againſt the Walls. They were conducted, on-foot, along a Cauſeway ſeven hundred Feet in Length, to the Palace-Gate, where ſtood five Elephants on each Side. Having paſſed-through, they entered a beautiful paved Court, of great Extent; where they found near an hundred thouſand Men waiting at the Emperor's Gate, although it was not yet Day. Facing this Court there was a *Kioſk*, whoſe Baſis was thirty Cubits, on which were erected Pillars fifty Cubits high, ſupporting a Gallery ſixty long, and forty wide. It has three great Gates, with leſſer on the Sides; the middle-one being for the Emperor. Above the *Kioſk*, over the Gates on the Right and Left, was a *Kurkeh*, or great Drum, placed on a Stool, and a Bell hung, attended by two Perſons, waiting for the Emperor's Appearance on his Throne [b].

Out of the Town.

THEY reckoned near three hundred thouſand Perſons aſſembled before the Palace, and among them two thouſand Muſicians, who ſung Hymns for the Emperor's Proſperity. Two thouſand others, armed with Halberds, Battoons, Darts, Arrows, Lances, Swords, and Maces, had enough to do to keep-off the Croud. Others held Fans, or Umbrellos. Round this Court were Apartments, and Sofas under the high Porticos, cloſed-up with Grates. In ſhort, Day being come, the Drums, the Trumpets, Flutes, Hautboys, and Bell began to ſound: At the ſame Time the three Gates were opened, and the People crouded-in to ſee the Emperor. The Ambaſſadors having paſſed-out of the firſt Court into the ſecond, found a *Kioſk* bigger than the former; where was prepared a triangular Eſtrade, or Sofa, four Cubits high, and covered with yellow Satin, with Gildings and Paintings, repreſenting the Simorg, or Phœnix [c]; which the *Kitayans* call the Royal Bird. *Shâh Rokh's Embaſſy. 1421.*

ON this Sofa was a Seat (or Throne) of maſſy Gold, and, on both Sides, Ranks of Officers, commanding ten thouſand, a thouſand, and an hundred Men, each holding a Tablet a Cubit long, and a Quarter broad; which they continually looked-on, without minding any Thing elſe [d]. Behind them ſtood infinite Guards, all in profound Silence. At length the Emperor coming-out of his Apartment, aſcended to the Throne by nine Steps of Silver. He was of a middle Stature, his Beard ſizable; and two or three hundred long Hairs deſcended from his Chin upon his Breaſt. On each Side the Throne ſtood two very beautiful Maidens, their Faces and Necks bare, with their Hair tied on the Top of their Heads, and great Pearls at their Ears. They held a Pen [e] and Paper in their Hands, with great Attention, to write whatever the Emperor ſpoke: For they take-down all his Words; and when he retires, preſent him the Papers, to ſee if he has any Alteration to make in his Orders. Afterwards they are carried to his Diwân [f], to be put in Execution. *On his Throne.*

THE Emperor being ſeated, the ſeven Ambaſſadors were brought facing his Majeſty, along with the Criminals, ſeven hundred in Number. Some were faſtened by the Neck, others had their Head and Hands incloſed by a Board [g], ſix ſometimes to one Board. Each had a Keeper, who held him by the Hair, waiting the Imperial Sentence. Moſt of them were ſent to Priſon, and but few condemned to Death; which Power reſides ſolely in the Emperor. The Governors every-where, however diſtant, ſend Malefactors to *Khânbalik*, to appear before that Monarch. Each Perſon's Crime is written on one End of the Board he carries-about his Neck, with his Chain, or Irons; and the Crimes againſt Religion are puniſhed moſt ſeverely of all. Great Care is uſed in examining Facts, ſo far, that the Emperor takes Council twelve Times before he condemns to Death. Hence a Perſon who has been condemned in eleven Councils, is ſometimes acquitted in the twelfth; which is always held before the Emperor, who never condemns any, but thoſe he cannot ſave [h]. *Criminals ſentenced.*

WHEN the Criminals were diſmiſſed, the Ambaſſadors *Ambaſſadors pay Reverence,*

[a] The ſame with the *Khânbalu* of *Polo*: One Name ſignifies *the Palace*, the other *the City* of the *Khân*. [b] *Thevenot*, as before, *p.* 5. [c] This is the *Fong-whang*, or fabulous Bird of the *Chineſe*, often mentioned before. The *Simorg*, or *Simorg Anka*, is ſuppoſed by the *Perſians* to have exiſted among the *Preadamites*, and to have aſſiſted *Solomon* in his Wars. [d] Something like this is obſerved by *Rubruquis*, of other Nations. See before, *p.* 558. [e] Rather, a Pencil. [f] The *Turkiſh*, or *Tartar* Word for the Council of State, or Tribunal of Juſtice. [g] See this Puniſhment deſcribed before, *p.* 279. [h] This extream, but neceſſary Tenderneſs for the Life of Criminals, ſo unuſual in theſe Parts of the World, has been remarked by others. See before, *p.* 277.

Travels to Katay.

baſſadors were led within fifteen Cubits of the a Throne, by an Officer, who on his Knees read out of a Paper the Purport of their Embaſſy; adding, that they had brought his Majeſty Rarities for Preſents, and were come to knock their Heads againſt the Ground before him. Then the *Kadhi*[a] *Mulâna Haji Yuſof*, a Commander of ten thouſand, a Favourite of the *Soltân*[b], and one of his twelve Counſellors, approached the Ambaſſadors, with ſome *Moſlems*, who ſpoke the Language; bid them fall-on their Knees, and b knock the Ground with their Foreheads; but they only bowed the Head three Times.

Their Audience,

THEN they delivered the Letters of *Shâh Rokh*, and the other Princes, wrapped in yellow Satin, to *Kadhi Mulâna*, who gave them into the Hands of a *Khoja* of the Palace, at the Foot of the Throne, and he preſented them to the Emperor; who took, opened, looked-on, and delivered them back to the *Khoja*. Then deſcending from the Throne, he ſat beneath it on a Seat. c At the ſame Time they brought three thouſand Veſts of fine, and two thouſand of coarſe Stuffs, wherewith his Children, and Houſhold, were cloathed. Next he cauſed the Ambaſſadors to draw-near, and being on their Knees, enquired after the Health of *Shâh Rokh*, with other Queſtions: Which having anſwered, the Emperor bid them riſe, and go eat, ſaying, they had come from far. From hence the Ambaſſadors were carried-back to the firſt Court, and there feaſted, d in the ſame Order as at other Times before.

Their Lodging.

THE Entertainment being over, they were conducted to their Lodgings. The principal Chamber was furniſhed with a Bed, an Eſtrade laid with fine Silk Cuſhions, a great Baſin, and a Pan for Fire. On the Right and Left were other Chambers, with Beds, Silk Cuſhions, and Foot-Carpets, or fine Mats, for lodging the Ambaſſadors ſeparately. Each had a Kettle, a Diſh, a Spoon, and a Table. They gave them each e Day, for ſix Perſons, a Sheep, a Gooſe, two Fowls; each two Meaſures of Flour, a large Diſh of Rice, two great Baſins full of Things done with Sugar, a Pot of Honey, Garlic, Onions, Salt, ſeveral Sorts of Herbs, a Bottle of Dirapum, and a Baſin of Walnuts, Nuts, Cheſnuts, and other dried Fruits. They had likewiſe a Number of handſome Servants in Waiting, from Morning till Night [c].

Ambaſſadors feaſted. Splendor of the Court. Order of the Feaſt. Players and Tumblers. Feaſt of New Year. The new Palace. Another Audience. Illuminations and Fireworks. Edict, how publiſhed. Emperor's Preſents to the Ambaſſadors: Thrown in Hunting by a Preſent-Horſe. Ambaſſadors in Danger of being impriſoned. The Emperor pacified. New Palace fired. Emperor falls ſick. Ambaſſadors leave Khânbalik: *Return home. Farther Remarks on the Journal.* Shâh Rokh Embaſſy 1422

THE ninth of *Zu'lhajjeh*, the *Sekjin*, or Officer, who had the Care of them at Court, came before it was light; and raiſing the Ambaſſadors out of Bed, told them the Emperor intended to feaſt them that Day. He brought them to the Palace, mounted on Horſes ſent for the Purpoſe; and placed them in the outer Court, where there were two hundred thouſand Perſons waiting. As ſoon as the Sun was up, they were led to the Foot of the Throne, where they ſaluted the Emperor with the Head to the Ground five Times. At length his Majeſty deſcending from the Throne, they were carried-back to the firſt Court, where they ſeparated for a While, to do their Deeds of Neceſſity; being told, that during the Time of the Feaſt, they would not be ſuffered to ſtir-out on any Account whatever. *Ambaſſadors feaſted.*

AFTER this they were led-through the firſt and the ſecond Court, into that of the Throne of Juſtice; and thence into the third [d], which was intirely open, and paved with fine Free-ſtone. They found in Front a Hall, ſixty Cubits long, with Chambers over it. In the Hall was a great Sofa higher than a Man, aſcended by three Silver Stairs, one before, the other two on the Sides; where ſtood two *Khojas* of the Palace, with a Kind of Paſte-board, which covered the Mouth, faſtened to their Ears. Upon this Sofa was a leſſer, in Form of a Couch with Pillows, and Cuſhions for the Feet. On each Side were Pans for Fire, with their perfuming-Pans. This Sofa was of Wood beautifully gilded, looking freſh, though ſixty Years old. Every Thing was finely varniſhed; the moſt eminent *Dakji's* ſtood on each Side the Throne armed, and behind them the Soldiers of the Emperor's Guard, with their naked Sabres. The Ambaſſadors were on the Left-hand, as moſt honourable. Three Tables were placed before the *Amirs*, and moſt diſtinguiſhed Perſonages: Others had f only two; and the reſt but one. There were at leaſt a thouſand Tables at this Entertainment [e]. *Splendor of the Court.*

BEFORE the Throne, near a Window of the Hall, was a great *Kurkeh*, or Drum, with two Men on a Stage, and beſide it the Muſic. Part of the Hall was taken-off by Curtains, which

[a] Or, *Kazi*, as the *Perſians* pronounce. The *dh* is pronounced as *th*, in *thee*, *thou*, &c. [b] So the *Chineſe* Emperor is here called. [c] *Thevenot*, p. 6, & *ſeq.* [d] It ſeems to have been the fourth. [e] *Thevenot*, p. 7. came.

Travels to Katay.

came close to the Throne, that the Ladies might see the Company without being seen. When the Victuals and Liquors were all brought-in, two *Khoja's* drawing the Curtains, which were before a Door behind the Throne, the Emperor came-out with the Sound of Instruments; and sat under a Canopy of yellow Satin, with four Dragons on it. After the Ambassadors had made five Prostrations, they sat-down to Table, and were treated as at other Times. The first Players, who appeared in the Comedy, were painted b with white and red, like Girls, with Pearls in their Ears, and dressed in Gold Brocade, holding Nosegays of artificial Flowers.

Players and Jugglers.

AFTER this, a Man lay on his Back, as if asleep, but with his Feet raised in the Air; then putting several thick Canes, seven Cubits long, between his Legs, another held them with his Hand, while a Youth of Ten or Twelve mounted them with surprizing Agility, and did several Tricks at-Top: At last the Cane slipping away, c every one thought he must have fallen, and been dashed to Pieces; but the pretended Sleeper instantly starting up, catched him in the Air. There was one who played Tunes after the twelve different Manners of the *Katayans*. Two others played the same Air together, each with one Hand on his own Instrument, and the other on that of his Companion. In the Court of the Palace were several Thousands of different Birds, which flew-about, and lighting among the Peo- d ple, eat what they found on the Ground, without being scared at the Multitude.

DURING the five Months that the Ambassadors staid in *Khânbalik*, they were regaled at several other Banquets, and with new Plays, much surpassing the first. The seventeenth of *Zu'lhajjeh* all the Criminals were carried to be punished, as the Law prescribed, according to the Nature of their Offences.

New Year.

THE twenty-fifth of *Moharram*, *Mulâna Kadhi Yusof* sent to acquaint the Ambassadors, e that next Day being the first of the Year, the Emperor went to his new Palace, and that no-body was to wear White, as being a Mark of Mourning with them. The twenty-eighth at Midnight, the *Sejin* came to conduct them to the new Palace, which had been nineteen Years building, and was but just finished. Every-body had his House, or Shop, illuminated with Torches, Lanthorns, Candles, and Lamps, so that it appeared as light as at Noon-Day. f They found, at the Palace, an hundred thousand People, who had come thither from all Parts of *Katay*, the Countries of *Tachin* and *Machin*, *Kalmak* [a], *Tebet*, *Kabul*, *Karakoja*, *Jûrga*, and the Sea-Coasts. This Day the Ambassadors Tables were set-out of the Hall where the Throne was: Those of the *Amîrs* [b] in it. There were near two hundred thousand armed Men, with Umbrellos and Bucklers. Among the Music, were Songs in Praise of this new Palace. The Feast lasted till Afternoon [c].

ShâhRokh's Embassy. 1422.

The new Palace.

TO give some Idea of this superb Structure; from the Gate of the Hall to the first Inclosure, are nineteen hundred and twenty-five Paces. On each Side are Buildings and Gardens one within another. These Edifices are of Freestone, Porcelain, or Marble, so delicately put together, that they seem inchased. There are two or three hundred Cubits of Pavement, the Stones of which are so even and well-joined, that they look like the chequered Rulings in Books. Nothing, in other Countries, can equal the *Katayans* in Masonry, Joiners Work, making Relievos in Plaister, and in Painting.

Another Audience.

THE ninth of *Safar* early, the Ambassadors were called to Audience, the Emperor having come-out from his eight Days Retirement: For it is his Custom, every Year, to retire, for some Days, without eating any Kind of Victuals, going near his Women, or seeing any-body else. In this Retreat he has with him neither Picture, nor Idol [d], saying, that he there adores and invokes none but the God of Heaven. The Elephants, that Day, were adorned with a Magnificence not to be expressed. They had Silver Seats, shaped like round Litters, on their Backs, with Standards of seven Colours, and armed Men upon them: Fifty of them carried the Musicians. These were preceded, or followed, by fifty thousand, in profound Silence and Order. In this Pomp the Emperor re-entered the Apartment of his Women; after which every one went home.

Illuminations and Fire-works.

THE Illuminations, which were occasioned by the Astrologers predicting, that this Year the Palace would suffer by Fire, lasted seven Days. In the Imperial Court was an artificial Mountain of Wood, covered with Branches of Cypress, and set with an hundred thousand Torches. These were lighted, by Means of little Mice made of Bitumen [e]; which, on kindling one Torch, ran-along a Rope to the next, and so from one to the other, that in a Moment they were all lighted, from the Bottom of the Moun-

[a] That is, of the *Eluth Mongols*; which Name was given them early by the *Mohammedan Tartars*, as these Ambassadors, and their Princes were. [b] By *Amîrs*, must be understood the great Officers and Lords of the Emperor's Court. [c] *Thevenot*, p. 8. [d] The *Mohammedans*, who strictly observe the Command relating to Images, call them Idols, with much better Grace than the Papists, who use them; and in the same Manner with those they stigmatize. [e] Rather Wildfire, we presume.

Travels to Katay.

tain to the Top. At the ſame Time a Multitude of Lights appeared in the City. During thoſe ſeven Days, no Criminal is ſearched after, the Emperor makes large Preſents, diſcharges Debtors under Arreſt, and opening the Jails, ſets-free all but Murderers. This was notified on the thirteenth by an Edict at the Palace, where were gathered more than an hundred thouſand Strangers, the Emperor ſitting on his Throne in the firſt *Kioſk*, or Pavilion, of the firſt Court. The Edict notified farther, that the Emperor would ſend no Ambaſſadors to any Country for three Years. The Edict being read, by three Officers ſtanding on a Bench before his Majeſty, it was conveyed down from the *Kioſk*, by Means of yellow Silk Cords faſtened to a Ring; and being laid on a Board with a Gold Border, was carried into the City, the People and Muſic following, as far as the Lodging of the Ambaſſadors; who after the Emperor had left the *Kioſk*, were feaſted as at other Times [a].

Edict, how publiſhed.

Emperor's Preſents

THE firſt of *Rabiya prior*, the Ambaſſadors being called again to Court, the Emperor, who had ordered ſeveral *Shankars* [b] to be fetched-in, told them, that he intended to give them to ſuch as had brought him good Horſes; and at the ſame Time cauſed three to be given to each of the Ambaſſadors of the *Mirza Ulug beg*, *Mirza Bayſangar*, and *Shâh rokh*. Next Day ſending for them anew, he ſaid to them, *The Army is marching to the Borders of the Empire, prepare yourſelves to return, at the ſame Time, to your own Country.* Then turning to *Arjak* [c], Ambaſſador of *Siûrgatmiſh Mirza*, *I have no* Shankar *to give you; and in caſe I had, I ſhould not give you any, leſt it ſhould be taken from you, in the ſame Manner as it was from* Ardeſhîr, *a former Ambaſſador of your Maſter. If your Majeſty will do me that Honour*, replied *Arjak*, *I will engage my Word, that no-body ſhall take it from me. On that Condition*, ſaid the Emperor, *I will give you two, which are coming hither.*

To the Ambaſſadors.

ON the eighth the Ambaſſadors *Soltân Shâh*, and *Bakſhi Malek*, were ſent for, to receive the *Sankiſh*, or Preſent of the Emperor. The firſt had eight *Baliſh* of Silver, thirty Imperial Veſts furred, twenty-four Under-Petticoats, two Horſes, one of them with Furniture; an hundred Bundles of Cane-Arrows, twenty-five great Porcelain Veſſels, and five thouſand * * *. *Bakſhi Malek* had as much, bating one *Baliſh* of Silver. There was no Silver for the Ambaſſadors Women, but they had half the Quantity of Stuffs given to their Lords.

THE thirteenth the Ambaſſadors being ſent for, the Emperor ſaid, *I am going to hunt, take you* Shankars *to divert you in the mean-time. The* Shankars *fly well, but the Horſes brought me are worth nothing.* His Majeſty's Son returning from the Country of *Nemray*, the Ambaſſadors went to compliment him to the Eaſt of the Emperor's Palace; where they found him ſeated with his Attendants, and his Table ſerved in the ſame Manner as the Emperor.

Shâh Rokh Embaſſy. 1422. *Thrown in Hunting*

THE firſt of *Rabiya the latter*, Notice was given them to go meet the Emperor, who was returning from the Chace. Being on Horſeback before Day, they found *Mulâna Kazi Yuſof* at the Door of their Hotel, very much dejected. Enquiring the Cauſe, he told them privately, that the Emperor having been thrown in Hunting by the Horſe *Shâh Rokh* ſent him, had ordered them to be carried in Chains, to the Cities in the Eaſt of *Katay*. The Ambaſſadors, in great Affliction, continued their Journey; and having gone twenty Miles, arrived at the Emperor's Camp. In the Night the *Katayans* had incloſed a Spot of Ground five hundred Paces ſquare, with Walls ten Cubits high, made with Earth preſſed-down between two Planks, as in a Mould. It had two Gates, and the Place whence the Earth was dug-up ſerved for a Ditch. The Gates had Guards, and the other Soldiers were poſted along the Ditch. Within this outward Incloſure, there were two Inner, made with yellow Satin, each twenty-five Cubits high, ſupported by ſquare Poſts, and ſet-round with Tents of yellow Satin [d].

By a Fall from Horſe.

THE Ambaſſadors being arrived within five hundred Paces of the Emperor's Quarter, *Mulâna Kazi Yuſof* bid them alight, and wait his Majeſty's coming, while he went before. The Emperor was on the Point of cauſing them to be arreſted, when *Lidaji* and *Jandaji* [e], who ſtood before the Emperor, and *Kazi Yuſof*, falling proſtrate, intreated him not to come to that Extremity, ſaying, *that to put them to Death might have bad Conſequences, and give the World Room to ſay, that his Majeſty had violated the Law of Nations in the Perſon of the Ambaſſadors.* The Emperor having yielded to their Reaſons, *Kazi Yuſof* went with Joy, to let them know he had pardoned them: That Prince alſo ſent them Victuals; but being mixed with Pork, they could not touch it.

Ambaſſ. Dif. in Mu-

AFTERWARDS the Emperor mounted a large black Horſe, with white Feet, the Preſent of *Mirza Ulug beg*, covered with Brocade Houſing,

[a] *Thevenot*, p. 9. [b] *Shonkers*, or *Shongars*, Birds of Prey, famous in *Tartary*, deſcribed before, *p.* 389.

and

Travels to Katay.

and two Perſons on each Side at the Saddle-Bow, a marched ſlowly forward. He was dreſſed in a Veſt of Gold Brocade on a red Ground, and his Beard incloſed in a Bag of black Satin. His Women followed in ſeven covered Litters, carried by Men; and after them a much greater one, borne by ſeventy. A Body of Horſe marched before the Emperor, in Squadrons, twenty Paces aſunder, extending to the City. The Emperor was in the Middle, attended by ten *Dajis*, and the three Lords before-mentioned; one of whom, *Mulâna Kazi Yuſof*, came to bid the Ambaſſadors alight, and proſtrate themſelves: Which having done, his Majeſty ſpoke to them to mount again, and accompany him.

The Em- per pur-

THEN the Emperor turning to them, ſaid to *Shadi Khoja*, that *the Preſents, Rarities, Horſes, and wild Beaſts, which are ſent me for the future, muſt be better choſen, in order to increaſe the Amity which I have for your Princes.* c *I mounted, at the Hunt, the Horſe which you preſented me; but it is ſo vicious, and I am ſo aged, that it threw me, whereby I am wounded. I have received a Contuſion in my Hand, which gave me a great deal of Anguiſh; but by laying much Gold on it, the Pain is aſſuaged.* Shadi *Khoja* made an Apology, telling the Emperor, that *it was the Horſe which the Grand* Amîr Timûr Karkan [a] *rode-on; and that* Shâh Rokh, *who kept it for a Rarity, had ſent it his Majeſty,* d *as the Horſe which was of greateſt Value in all his Dominions.* The Emperor being ſatisfied with this Anſwer, called for a *Shankar*, and let it fly at a Crane; but the Bird returning without ſeizing its Prey, his Majeſty gave it three Strokes on the Head: Then alighting from his Horſe, and ſitting on a Chair with his Feet reſted on another, he gave a *Shankar* to *Soltân Shâh*, and another to *Soltân Ahmed*; but none to *Shadi Khoja*. After this he mounted his Horſe e again, and as he approached the City, was received by Crouds of People with a thouſand Acclamations.

THE fourth of the ſame Month the Ambaſſadors were carried to Court, to receive their Preſents from the Emperor; who ſitting on his Throne, cauſed Tables to be ſet before him, with the Preſents on each; which were much of the ſame Nature with thoſe given before to *Soltân Shâh*, and *Bakſhi Malek*. Mean-time the f Emperor's moſt beloved Wife dying, her Death was made public the eighth of *Jomâda prior*, and the next Day appointed for her Interment. The Night following the new Palace took Fire, not without Suſpicion of the Aſtrologers having a Hand in it. By this Misfortune, the principal Apartment, which was fourſcore Cubits long, and thirty broad, adorned with varniſhed Pillars painted with blue, and ſo large, that three Men could ſcarce graſp them with their Arms, was intirely conſumed. From thence the Flames b catched a *Kioſk* of twenty Fathoms, and the Apartment of the Ladies, ſtill more magnificent. Two hundred and fifty Houſes alſo were burned, beſides ſeveral Men and Women [b].

Shâh Rokh's Embaſſy. 1422.

New Palace fired.

THE Emperor, and his *Amîrs*, did not conſider, ſays our *Mohammedan* Author, that this Chaſtiſement fell on them for being Infidels: On the contrary, the Emperor going to an Idol-Temple [c], and kneeling, ſaid, *The God of Heaven is angry with me, and, therefore, hath burned my Palace; although I have done no Evil: I have neither offended my Father, nor Mother; nor can I be charged with exerciſing any Act of Tyranny.* He was ſo affected with this Accident, that he fell ſick. The Ladies of the Palace are buried on a certain Mountain, where the Horſes, which belonged to them, are left, to feed on the Ground appointed for that Purpoſe. Several Maidens, and ſome *Khojas* of her Palace, are alſo poſted there, with Proviſions to ſubſiſt on d for five Years, or, perhaps, more; to the End that their Victuals failing, they may die themſelves.

Emperor falls ſick.

IN regard the Emperor's Illneſs continued [d], the Prince, his Son, ſupplied his Place in the Palace, and gave the Ambaſſadors Audience of Leave: After which they received no farther Subſiſtance from the Court, till their Departure. They left *Khânbalik* the fifteenth of *Jomâda prior*; the *Dajis* accompanied them, and they e were furniſhed with Neceſſaries, as well as treated on the Road, in the ſame Manner as at firſt. They arrived, the firſt of *Rajeb*, at the City *Nikian* [e], where the Magiſtrates came-out to meet them; but did not ſearch their Baggage, as is cuſtomary here, by an expreſs Command of the Emperor. Next Day they were magnificently feaſted. The fifth of *Shaaban* they reached the *Karamûran*; and the twenty-fourth *Kamjû* [f]; where they had left their Servants and f heavy Baggage. Here they ſtaid ten Months and a half, the Roads through *Mogoliſtân* [g] not

Ambaſſadors leave Khânbalik.

[a] Rather, *Kurkan*. This is the famous *Timûr bek*, or *Tamerlan*, as he is called by our Authors. [b] *Thevenot*, p. 11. [c] This ſeems to be malicious; for, without doubt, the Emperor performed this Humiliation in one of the Imperial Temples at *Pe-king*, where there are no Images. [d] He died this Year, perhaps of this ſame Illneſs. [e] There is no ſuch Name among the Cities, either of *Pe-che-li*, or *Shan-ſi*; nor is it poſſible which of them to refer it to. [f] Or, *Kan-chew*, in *Shen-ſi*. [g] That is, the Country of the *Mogols*.

Travels to Bokhâra. being ſafe to travel, and then departed the ſeventh of *Zu'lkaadeh*.

Return home. THEY got to *Sokjû* [a] the ninth, where they met-with Ambaſſadors from *Iſpâhân* and *Shirâz*, in *Perſia*; who told them they found great Difficulties in the Way. Having, therefore, reſted at this City for ſome Time, they ſet-forward at Full-Moon, in *Moharram*, in the Year 825 [b]. After ſome Days March, they came to *Karaul*, where their Baggage was ſearched. Then left it on the nineteenth; and to avoid the Obſtacles they were likely to meet-with on Account of the War, took the Road through the Deſart [c]; where they ſuffered much for Want of Water, till the ſixteenth of *Rabiya prior*, that they got out of it. The ninth of *Jomâda the latter*, they arrived at the City of *Khoten* [d]; the ſixth of *Rajeb*, at the City of *Kâſhgar*. The twenty-firſt, a little beyond the City of *Endkoien* [e], the Ambaſſadors ſeparated, ſome taking the Road of *Samarkand*, the reſt that of *Badakſhân*. Thoſe of *Shâh Rokh* arrived at the Caſtle of *Shadman* the twenty-firſt of *Shaaban*; at *Balkh* the firſt of *Ramazân*; and the tenth at *(Herat)* the Court of that Prince [f].

THIS curious Journal affords Variety of Remarks relating to the Magnificence of the *Chineſe*, and the Ceremonial obſerved in giving Audience to Ambaſſadors; which is nearly the ſame at preſent in Uſe. It gives Light alſo into *Polo*'s Journey through *Little Bukhâria* and *Kampion*, (which is our Author's *Kanjû*) to *Khânbalu*. It hath, beſides, this Singularity, that it takes no Notice of the Great Wall of *China*, although the Ambaſſadors muſt have paſſed it in the Way to *So-chew*; and one would think it could hardly have eſcaped the Notice of ſo many Perſons as were in their Train. But it muſt be conſidered, that as they only ſaw it at the very End (ſuppoſing they paſſed-through the Fort of *Khya-yu-quan*) they might take it only for a Piece of Wall raiſed for Defence of the Borders in that Place. Whereas *Polo* muſt have paſſed it often in other Parts, where it was intire; and underſtanding the Language, as well as having free Liberty of making his Obſervations, which the Ambaſſadors had not, there is no accounting for his Omiſſion, otherwiſe than as hath been already done.

Jenkinſon 1557. Farther remarks.

On the Wall.

CHAP. V.

The VOYAGE *and* TRAVELS *of Mr.* Anthony Jenkinſon, *from* Ruſſia, *to* Boghâr, *or* Bokhâra, *in* 1557.

To which are added, ſome Informations of others, concerning the Road thence to Katay, *or* China.

INTRODUCTION.

Deſign of the Voyage, MR. *Jenkinſon*, a very intelligent Merchant [g], was ſent by the *Muſcovy* Company, by Way of *Ruſſia*, to diſcover the Road to *Boghâr*, or *Bokhâra*, in *Great Bukhâria*, and ſettle a Trade, if advantageous and convenient, in that Country. He left *Graveſend* the twelfth of *May*, 1557, chief Captain of a Fleet of four tall Ships, accompanied in the *Primroſe* by *Oſep Nepea Gregoriwich*, the Emperor of *Ruſſia*'s Ambaſſador, and his Retinue, whom he had Orders to convoy home. Sailing round *Norway*, they arrived at *St. Nicholas* in *Ruſſia* the twelfth of *July*, from whence they travelled to *Moſkow*. There having obtained the Emperor's Letters to ſeveral Princes, through whoſe Dominions he was to paſs, he proceeded for *Boghâr*, with three Servants, *Richard Johnſon*, *Robert Johnſon*, and a *Tartar Tolmach* [h], with ſeveral Sorts of Merchandizes.

THIS Gentleman was the firſt who led the

[a] *So-chew*, or *Su-chew*, near the Weſt-End of the Great Wall. [b] It began the twenty-fifth of *December*, 1421, on a *Thurſday*. [c] Probably, by the Lake of *Lop*, to the South of *Little Bukhâria*. [d] The ſame with *Hotom*, *Koton*, or *Khateen*. See before, *p.* 529. [e] Probably, the ſame with *Anghien*, on the River *Sir*. See before, *p.* 518. [f] *Thevenot*, p. 12, *&* *ſeq.* [g] *Hakluyt*, in his Preface, ſtiles him, *that valiant, wiſe, and perſonable Gentleman*. [h] Whether *Tolmach* was his Name, or it be a Miſtake of the Preſs for *Kolmak*, we cannot determine.

Way

Way to the *Uzbek Tartars*; but, indeed, was not ſeconded till of late by the *Ruſſians*, hitherto without Succeſs. He afterwards made three other Voyages to *Ruſſia*; one of them in Quality of Ambaſſador from Queen *Elizabeth*. Theſe Voyages and Remarks, written by Way of Letters to the *Muſcovy* Company, and others, are inſerted both by *Hakluyt* and *Purchas*, in their Collections. They contain a great many curious Obſervations, and are particularly valuable for the Latitudes, which the Author took of the principal Places he was at. We ſhall begin our Journal at *Moſkow*, or, more properly, at *Aſtrakhân* [a]; reſerving what relates to *Ruſſia*, till we come to treat of that Country. And as his Servant *Johnſon* procured certain Informations, while at *Boghâr*, concerning the Road thence to *Katay*, we ſhall add them as a proper Appendix, together with thoſe given by *Haji Mehemet*, a *Perſian* Merchant, to *Ramuſio*.

SECT. I.

The Author's Voyage *over the* Caſpian Sea, *and* Journey *to* Urjenz.

They leave Moſkow: *Come to* Aſtrakhân: *That City deſcribed: The Trade poor: Enter the* Caſpian Sea: *Sail North-Eaſt. The* Blue Sea. *Iſland* Bauleata. *River* Jaïk. Serachik. *Boarded by Pirates: Lucky Eſcape. The River* Yem. *Port of* Manguſlave: *Ill Treatment there. Duties levied on the Road. Author's Good-luck. Come to a Gulf. Courſe of the* Oxus. Sellizure, *or* Shayzure. *City of* Urjenz. *Land of* Turkman. *The* Khân's *Authority.*

THE twentieth of *April*, 1558, they left *Moſkow* by Water; and the twenty-ninth came to the City of *Kazan*, on the River *Wolga*, conquered nine Years before from the *Tartars*: From thence to the *Caſpian Sea*, there is no Place of Trade. They departed the thirteenth of *June*. Fifteen Leagues lower the *Kama* falls into it. The Country between, on the left (or Eaſt-Side) is called *Vachen*; the Inhabitants *Pagans*. On the Right-hand, oppoſite the *Kama*, are the *Cheremizes*, half *Gentiles*, half *Tartars*: And all the Land on the Left, from thence to *Aſtrakhân*, and ſo along the *Caſpian* Shores to the *Turkmen*, is named the Country of *Mangat* [b], or *Nogay*; whoſe Inhabitants, while the Author was at *Aſtrakhân*, in 1558, were all deſtroyed by Civil Wars, Famine, and Peſtilence, to the Number of an hundred thouſand, and great Satisfaction of the *Ruſſians*.

ALL the Country on the right Side of the *Wolga*, from the *Kama* to *Aſtrakhân*, is called *Krîm* [c]. They are *Mohammedans*, and live like the *Nogays*; are always at War with the *Ruſſians*, and ſupported by the Great *Turk*. The twenty-eighth of *June* they came to the Ruins of a Caſtle of the *Krîms*, on an Hill, in the Latitude of fifty-one Degrees forty-ſeven Minutes, half-way from *Kazan* to *Aſtrakhân*, which are about two hundred Leagues diſtant. The fourteenth of *July* paſſing-by an old Caſtle, which was *Old Aſtrakhân*, on the Right, they arrived at *New Aſtrakhân*, which the Emperor conquered in 1552; being the laſt Place he hath taken from the *Tartars* towards the *Caſpian Sea* [d]. *Jenkinſon.* 1558. *Come to Aſtrakhân,*

THIS City is ſituate in an Iſland on the Side of a Hill. It has a Caſtle within it, fenced with Earth and Timber; neither fair, nor ſtrong; but a good Gariſon is kept on-foot. The Town is alſo walled with Earth: The Buildings and Houſes, except thoſe of the Governor's, and a few others, very mean, and poor. Fiſh, eſpecially Sturgeon, is the only Food; Fleſh and Bread being very ſcarce. Theſe they hang-up in their Streets and Houſes to dry; which makes this Place, more than any other, ſwarm with Flies, and occaſions the Air to be ſo bad. In the Plague and Famine before-mentioned, the *Nogay Tartars* came to ſeek Relief from their Enemies the *Ruſſians*; who beſtowed their Charity ſo ill, that they died in Heaps over the Iſland; the reſt the *Ruſſians* ſold, or drove from thence. That was a proper Time to have converted them, if the *Ruſſians* themſelves had been good Chriſtians. The Author could have bought Thouſands of pretty Boys and Girls of their Parents, for a Sixpenny Loaf apiece; but had more Need of Victuals at that Juncture. The Trade is very trifling, although there is a good Reſort of Merchants. *That City deſcribed,*

THE chief *Ruſſian* Commodities are red Hides, red Sheep-Skins, wooden Veſſels, Bridles and Saddles, Knives, and other Trifles; with Corn, Bacon, and other Victuals. The *Tartars* bring divers Kinds of Silks and Cotton-Cloths: The *Perſians* from *Shamakki*, coarſe ſowing Silk, Silk-Girdles, Kraſſo, Coats of Mail, Bows, Swords, and the like: Sometimes alſo Corn, and Walnuts; but all in ſuch ſmall Quantities, that there is no Hopes of Trade in thoſe Parts worth following. The foreſaid Iſland of *Aſtrakhân*, which is deſtitute of Wood and Paſture, and will bear no Corn, is in Length twelve Leagues, and in Breadth three; lying Eaſt and Weſt, in the Latitude of forty-ſeven Degrees nine Minutes [e]. *The Trade poor,*

[a] The Voyage between thoſe two Places being but briefly touched on, by Way of Introduction. [b] Or, the *Mankats*, the ſame with the *Karakalpaks*. See before, *p.* 540. [c] In *Purchas*, *Crimme*. [d] *Purchas* Pilgr. vol. 3. p. 232. [e] *Olearius* puts it in four.

THE

Travels to Bokhâra.

Enter the Caſpian Sea.

THE ſixth of *Auguſt* they embarked with their Goods on the *Wolga*, in Company with certain *Tartars* and *Perſians*, *Jenkinſon* having the whole Care of the Navigation down the River, which is very crooked, and full of Flats toward the Mouth. The tenth they entered the *Caſpian Sea*, on the Eaſtern-Side of the River, which has ſeventy Mouths, being twenty Leagues from *Aſtrakhân*, in the Latitude of forty-ſix Degrees, twenty-ſeven Minutes [a].

Sail North-Eaſt.

THE Wind being briſk, they kept the North-East Shore; and the eleventh having ſailed ſeven Leagues East North-East, came to an Iſland with an high Hill on it, called *Akkurgar*, a good Mark at Sea. From thence East ten Leagues, they fell with the Iſland *Bawhiata*, much higher than the former. Within theſe two Iſlands to the North, is a great Bay, called the *Blue Sea*. From thence ſailing East by North ten Leagues, the Wind contrary, they came to an Anchor in a Fathom Water, and ſo rid till the fifteenth, having a great Storm at South-East. Then the Wind coming North, they ran South-East that Day eight Leagues.

The Blue Sea.

Iſland Baughleata.

THUS proceeding forwards, the ſeventeenth they loſt Sight of Land, and ſailed thirty Leagues, next Day twenty, winding East, and fell with a Land, called *Baughleata*, ſeventy-four Leagues from the Mouth of the *Wolga*, in the Latitude of forty-ſix Degrees, fifty-four Minutes [b], the Coaſt lying neareſt East by South, and Weſt by North. At the Point of this Iſland is the Tomb of a *Tartar* Saint, where the *Mohammedans* pay their Devotions [c].

River Jaïk.

THE nineteenth winding East South-East, they ſailed ten Leagues, and paſſed by a River, called *Jaïk*, which riſes in *Siberia*, near the foreſaid River *Kama*, and runs-through the Land of *Nogay*. One Day's Journey up it, is a Town called *Serachik* [d], ſubject to *Murſa Smille*, the greateſt Prince in all *Nogay*, which is now in Friendſhip with the *Ruſſians*. There is no Trade in this Country, the Natives having no Money, but Cattle, and living by Robbery.

Serachik.

Boarded by Pirates,

ON the twentieth, as the Bark lay at an Anchor before this River, all the Men being aſhore excepting *Jenkinſon*, who was ſick, and five *Tartars* (whereof one, called *Azi*, was reputed a holy Man, becauſe he had been at *Mekka*) there came a Boat with thirty Men well-armed, who beginning to enter the Bark, *Azi* aſked them what they would have, and ſaid a Prayer. Upon this the Rovers deſiſted, declaring that they were Gentlemen baniſhed from their Country, and came to ſee if there were in the Veſſel any *Ruſſians*, or other *Kafrs* [e], ſo they call Chriſtians: But the good Pilgrim ſwearing ſtoutly, that there were none, they departed. Thus the Author obſerves, that by the Fidelity of that *Tartar*, he, with all his Company and Goods, were preſerved. Soon after leaving this Place, they ſailed that Day ſixteen Leagues, winding East and South-East.

Lucky Eſcape.

THE twenty-firſt they croſſed a Bay ſix Leagues over, and fell with a Cape, having two Iſlands to the South-East. Doubling the Cape, the Land trended North-East, and made another Bay, into which falls the great River *Yem*, riſing in the Land of *Kolmak* [f]. Three Days they lay at Anchor. The twenty-fifth the Wind proving fair, they ſailed twenty Leagues, and paſſed-by a low Iſland, about which are many Flats and Sands: To the North of it there runs-in a great Bay. Hence they ran ten Leagues, winding South, to come into deep Water: Then East South-East twenty Leagues, and fell with the main Land, full of copped Hills. They paſſed-along the Coaſt twenty Leagues, the Land growing higher the further they ſailed.

THE twenty-ſeventh they croſſed-over a Bay, whoſe South Shoar was the higher Land, and fell with a high Point, where there aroſe a violent Storm at East, which continued three Days. From this Cape they paſſed to a Port called *Manguſlave*. The Place where they ſhould have arrived, at the Southermoſt Part of the *Caſpian Sea*, is twelve Leagues within a Bay: But they were driven by the Storm to the other Side of the Bay, oppoſite to *Manguſlave*, to a Place where never Bark, nor Boat, had before arrived. [g]

FROM this Haven they ſent ſome of their Men aſhore, to know of the Governor, if they might ſafely land with their Goods, and get Camels to carry them to *Sellizure*, twenty-five Days Journey diſtant. The Meſſengers returning with very fair Promiſes, the third of *September* they landed, and at firſt were civilly entertained: But at laſt they ſhewed their evil Diſpoſitions, for they were always fighting with them, ſtealing, or begging from them. They raiſed the Price of Horſes, Camels, and Victuals, double what it uſed to be, and forced them to buy the Water they drank: So that for every Camel's Lading, being but four hundred Weight *Engliſh*, they

[a] *Purchas Pilgr.* p. 233. [b] Only fifteen Minutes more South than the Mouth of the *Wolga*. [c] *Purchas*, as before, *p.* 234. [d] In *Purchas*, *Serachicke*. [e] In the Original, *Caphars*. *Kafr* is an *Arabic* Word, ſignifying *Infidels*. [f] Rather, the Country of the *Kalmûks*. [g] From this Circumſtance, as well as the Courſe and Diſtance from the River *Yem*, *Manguſlave* ſhould be more to the South than the Latitude, viz. forty-five Degrees, given by our Author, places it; but for which we ſhould judge it to be the ſame with *Minkiſhlak*, often mentioned by *Abu'lghâzi Khân*. See before, *p.* 482.

agreed

agreed to give three Hides of *Ruſſia*, and four wooden Diſhes; and to the Prince or Governor of the People, one Ninth, and two Sevenths; namely, nine ſeveral Things, and twice ſeven ſeveral Things; for they uſe no Money.

THE fourteenth they departed, being a Karawân of a thouſand Camels, and in five Days came to the Dominions of *Timûr Soltân*, another Prince, Governor of the Country of *Manguſlave*, where they intended to have carried their Bark, but for the Storm. In the Way they were met by ſome of his *Tartars*; who, in his Name, opened their Bales, and took a Ninth of ſuch Things as they thought beſt, without Money [a].

JENKINSON having wrangled with them in vain, rode to the ſame Prince, requeſting his Favour, and Paſſport to travel through his Country, that he might not be robbed by his People: The *Soltân* received him very kindly, granted him his Requeſt, and ordered him to be well-feaſted with Fleſh and Mares-Milk: For they uſe no Bread, nor other Drink, except Water. In lieu of the Goods, worth fifteen Rubles [b], he gave him a Horſe worth ſeven, and his Letter. *Jenkinſon* was glad to get away ſo well; for he was reckoned a mere Tyrant, and had given Orders to rob and deſtroy the Author, in caſe he had not gone to him.

THIS *Soltân* lived in the Fields, without Caſtle, or Town. *Jenkinſon* found him ſitting in a little round Houſe made of Reeds, covered with Felt, and hung with Carpets; accompanied by the great Metropolitan of that wild Country, reverenced like the Pope, and other chief Men. They aſked him many Queſtions, concerning his Country, Laws, and Religion; as alſo the Cauſe of his coming into thoſe Parts.

PROCEEDING on their Journey, they travelled twenty Days in the Wilderneſs, from the Sea-Side, without ſeeing Town or Habitation. Their Proviſions failing, they were forced to feed-on their Cattle. *Jenkinſon* killed a Camel and a Horſe. All their Drink was very brackiſh Water, drawn-out of deep Wells, two or three Days diſtant; for Rivers there are none. The fifth [c] of *October* they came again to a Gulf of the Sea, where they found the Water very freſh. Here they were met by the Officers of the King of *Turkmân*; who, for Cuſtom, took one out of every twenty-five, and ſeven Ninths for the ſaid King, and his Brethren. Here they ſtaid a Day to refreſh themſelves. Jenkinſon 1558.

FORMERLY the great River *Oxus* [d] fell-into this Gulf, but at preſent runs-into the *Ardok* [e]; which ſhaping its Courſe Northward about a thouſand Miles, loſes itſelf in the Ground, and after a ſubterraneous Paſſage of above five hundred Miles, iſſueth-out again, and falls-into the Lake of *Kitay* [f]. *Courſe of the* Oxus.

THEY left the foreſaid Gulf the fourth [g] of *October*, and the ſeventh arrived at *Sellizure* [h], a ſorry Caſtle, ſituate on a Hill, where reſided *Azim Kan* [i], with three of his Brethren [k]. The ninth *Jenkinſon* being ordered to appear before him, delivered the Emperor of *Ruſſia*'s Letters, and gave him a Preſent of a Ninth. That King received him kindly, and treated him with the Fleſh of a wild Horſe, and Mares-Milk, without Bread. Next Day he ſent for him again, and aſked many Queſtions, relating to the Affairs both of *Ruſſia* and *England*. At his Departure he gave him his Letters of ſafe Conduct. Sellizure, or Shayzure.

THE fourteenth leaving the Caſtle of *Sellizure*, they arrived the ſixteenth at a City called *Urjenz* [l], where they paid Cuſtom for themſelves, their Camels, and Horſes. Here they ſtaid a Month, before they could proceed: In which Time *Ali Soltân*, the *Khân*'s Brother [m], and King of that Country, being returned from a Town called *Koraſan* [n], in the Borders of *Perſia*, which he had lately conquered, ſent for *Jenkinſon*; who preſented him the Emperor's Letters, was kindly entertained, and after anſwering ſeveral Queſtions, obtained his Letters of ſafe Conduct. The chief Commodities here come from *Perſia*, and *Boghâr*; but are not worth ſpeaking of. *City of* Urjenz.

ALL the Country, from the *Caſpian Sea* hither, is called *the Land of Turkmân*. The People dwell in Tents, roving in great Companies, with their Camels, Horſes, and Sheep; which laſt are large, and have Tails weighing ſixty or eighty Pounds. They are ſubject to the *Khân*, and his five Brothers, who pay him but little Submiſſion; nor is he obeyed much, except in his own Dominions: For each is King in his own Territory, and ſeeks to deſtroy the reſt; *Land of* Turkmân. *The* Khân's *Authority.*

[a] *Purchas Pilgr.* p. 235. [b] A *Ruſſian* Coin. [c] It ſhould be the fourth. [d] The *Jihûn*, or *Amû*. See before, *p.* 477. [e] This we take to be the Stream of the *Kheſel*, that runs by *Tuk*, or *Dok*, as in *Ardok*. [f] The Author was in this miſinformed; for it falls into the Lake of *Aral*, about ſixty Miles North of *Tûk*. See before, *p.* 477. [g] It ſhould be the fifth. [h] In the Margin both of *Hakluyt* and *Purchas*, we find *Sellizure*, or, *Shayzure*, as the Names of this Place. Perhaps *Sellizure* may be *Saliſaray*, a Pleaſure-Houſe. [i] In the Tranſlation of *Abu'lghâzi Khân*'s Hiſtory, written *Hadſim*, or *Hajim Khân*, p. 270; but he reſided at *Wazir*. [k] An Account of this Place, the Country and Fruits, has been given from *Jenkinſon* already, *p.* 481. [l] In the Original, *Urgence*. It is already deſcribed from *Jenkinſon*, p. 481. See before, *p.* 497. [m] He was the *Khân*'s Couſin. [n] Rather, a Town of *Khoraſân*.

Travels to Bokhâra.

being born of different Mothers, and commonly the Children of Slaves. They have at leaſt four or five Wives, beſides Maidens and Boys, who live moſt viciouſly. When theſe Brothers are at War, which is commonly the Caſe, he who is vanquiſhed flies to the Deſart, and there robs Paſſengers and the Karawâns, till he can gather Strength to take the Field again [a]. Many of their Sheep are wild, as well as their Horſes, which they take with Hawks [b].

SECT. II.

The Author's Travels *from* Urjenz *to* Boghâr, *and* Return.

Paſs the Ardok: *Travel through the Deſart. Blade-bone Divination. Attacked by Robbers: Come to a Parley, and Compoſition: Come to the* Oxus: *More Danger from Thieves.* Boghâr, *or* Bokhâra *City: The Country.* Jenkinſon's *Audience: His kind Reception. Trade of* Boghâr. *Informations concerning* Katay. *Reaſons for returning: He leaves* Boghâr: *Comes to* Urjenz, *and to their Bark. Dangerous Tempeſt.* Caſpian Sea *deſcribed. Large Rivers: Small Trade. Return to* Moſkow: *Preſents the Ambaſſadors: Comes to* Kolmogro.

Paſs the Ardok,

THE twenty-ſixth of *November* they left *Urjenz*, and having travelled by the *Oxus* an hundred Miles, paſſed-over the *Ardok*, a great River, mentioned before. There they paid a ſmall Duty. The ſeventh of *December* they arrived at *Kait* [c], a Caſtle ſubject to *Saramet* [d] *Soltân*; who intended to have robbed all the Chriſtians, but for fear of his Brother, the King of *Urjenz*, as they were informed by one of his chief Counſellors, who adviſed them to ſend him a Preſent; which they did. They paid here for every Camel, a red Hide of *Ruſſia*, beſides trifling Gifts to his Officers.

Travel through the Deſart.

THUS proceeding on their Journey, the tenth at Night there came four Horſemen, whom they ſeized, and ſent bound to the *Soltân* of *Kait*. The *Soltân* immediately ſet-forward with three hundred Men; and meeting the ſuſpected Perſons on the Road, by Threats learned from them, that they belonged to a baniſhed Prince, who three Days Journey on the Way lay in wait to deſtroy the Karawân. The *Soltân* hereupon left them fourſcore Soldiers for their Convoy; who the fifteenth in the Morning riding before to ſcour the Deſart, in four Hours returned on a hard Gallop, ſaying, they had ſeen the Track of Horſes, and aſked what the Company would give them to ſtay longer. No Agreement being made, they went-back to their *Soltân*; who, the others judged, was in the Plot.

Jenkinſon. 1558

As ſoon as they were gone, ſome reputed holy Men, for having been at *Mekka*, killed ſome Sheep, and after boiling the Blade-bones, burnt them [e]; then mixing their Aſhes with the Blood, wrote certain Characters, with a great many Ceremonies and Words: By which they diſcovered, that they ſhould meet with Robbers; but ſhould vanquiſh them. *Jenkinſon*, and his People, gave no Credit to this Prediction: But they found it true: For within three Hours they perceived thirty-nine Horſemen well-armed, making towards them, with the baniſhed Prince at their Head. Theſe called to them to yield, threatening otherwiſe to deſtroy them. The Travellers put them to Defiance; whereon the Fight began, which continued from Morning till two Hours in the Night. Many, on both Sides, were killed and wounded, Men, Horſes, and Camels. Had it not been for four Muſkets, which *Jenkinſon* and his Servants had, they muſt have been overcome: For the Thieves were better armed, as well as better Archers: But as the Guns had brought-down ſeveral of them, they durſt not venture near. This made them propoſe a Truce till next Day. Mean-time the Karawâns encamped on a Hill, fencing themſelves and Cattle, with their Packs of Goods. The Enemy encamped alſo a Bow-ſhot diſtant, but were between them and the Water; which proved a great Affliction, as neither they, nor their Camels, had drank for two Days before.

THUS keeping good Watch, at Midnight, the roving Prince ſent a Meſſenger half-way to ſpeak to the Karawân Baſhâ; who ſaid he would not go meet him, but would ſend one to talk to him, provided his Prince and Followers would ſwear by their Law to keep the Truce: This being done ſo loud, that they could all hear it, they ſent a holy Man to the Meſſenger; who told him, "That his Prince had ſent to them, "who were *Buſſarmans* [f], to deliver-up all the "*Kafrs*, or Unbelievers (meaning the Chriſti-"ans) with their Goods; that in ſuch Caſe he "would ſuffer them to depart quietly, but "otherwiſe would treat them with equal Seve-"rity if he overcame them, as he made no "Doubt of doing." The Karawân Baſhâ anſwered, that he had no Chriſtians in his Company, nor any Strangers, except two *Turks*: But that in caſe he had, he would rather die than deliver them; and as for his threatening, they were

[a] *Purchas Pilgr.* p. 236, *&c ſeq.* [b] As before deſcribed from this Author. See *p.* 484. c. [c] In the Original, *Kaite*; the ſame with *Kat.* See before. [d] Perhaps, *Sariahmed.* [e] See before, the ſame Sort of Divination, *p.* 563. [f] Or, *Moſlemans*, properly *Moſlems.*

not

not afraid of them, as they ſhould ſee ſo ſoon as it was Day.

THE Thieves, contrary to their Oaths, carried the holy Man with them, crying in Token of Victory, *Ollo! Ollo* [a]*!* This diſmayed the *Engliſhmen*, fearing he would diſcover them: But although he was roughly treated, they could get nothing out of him; not ſo much as how many Men were ſlain and wounded. Next Morning the Robbers ſeeing them prepared for Defence, propoſed an Agreement, but made a great Demand. However, moſt of the Company being unwilling to renew the Fight, as having but little to loſe, the reſt were compelled to give them twenty Ninths, or twenty times nine, ſeveral Things, with a Camel to carry them away: Which the Rovers having received, they departed, and the Karawân went forward [b].

THAT Night they came to the *Oxus*, where they ſtaid all next Day, making merry with their ſlain Horſes and Camels: Then departing, they for Fear of meeting with the ſame, or other Thieves again, left the high Road along the River, and paſſed-through a Deſart of Sand. They travelled four Days in the ſame, and then came to a Well of very brackiſh Water, being forced to kill their Horſes and Camels for Food.

IN this Wilderneſs alſo, they had almoſt fallen into the Hands of Thieves: For one dark Night being at Reſt, there came certain Scouts, and carried-away ſome of their Company, who lay a little ſeparated from the Karawân; which cauſed a great Outcry: The reſt immediately laded their Camels, and departed, putting-on very hard, till they came again to the *Oxus*; for then they feared nothing, as being fenced by the River. Thus having eſcaped this new Danger, on the twenty-third they arrived at the City of *Boghâr*, in *Baktria*.

BOGHAR [c] is a City of great Extent, incloſed with a high Wall of Earth. The Caſtle, where the *Khân* reſides, takes-up one Third of the Town. This, and ſome other Buildings, are of Stone; the reſt of Earth. The Water of the little River that runs-through the City, breeds Worms in the Legs. Strong Liquors are prohibited. This Strictneſs is owing to the Metropolitan, who is more obeyed than the King, whom he depoſes at Pleaſure; as he did one when *Jenkinſon* was there, ſlaying him in the Night. The King has no great Power, or Riches. He exacts a Tenth of all Things ſold; and when he wants Money, ſends his Officers to take Goods upon Credit by Force. Thus he acted to pay for nineteen Pieces of Kerſey, had of the Author. Jenkinſon. 1558.

THE Country of *Boghâr* was formerly ſubject to the *Perſians*, whoſe Language is there ſpoken: But the *Tartars* are continually in War with them, on Account of ſome religious Difference, and becauſe they will not ſhave the upper Lip. They have no Gold Coin at *Boghâr*, and but one Piece of Silver, worth Twelve-pence; which the King raiſes and falls every other Month, and ſometimes twice a Month. Hence it is not ſo current as the Copper-Money, called *Pooles*, whereof an hundred go to the Silver-Piece. *The Country.*

THE twenty-ſixth of *December* he was ordered to appear before the King, to whom he preſented the Emperor of *Ruſſia*'s Letters. That Prince received the *Engliſh* very kindly, made them eat in his Preſence, and often ſent for them in private; where he diſcourſed with them familiarly concerning the Power of the Emperor and the Great *Turk*: He alſo enquired into the Laws, Religion, and Strength of *England*: Made them ſhoot with their Muſkets before him, and practiſed himſelf. But after all, the Author ſays, he ſhewed himſelf a very *Tartar*; for that he went to the Wars without paying what he owed him. He owns, indeed, that he left Orders for the Payment; but ſays, he was forced to abate Part, and take Goods for the reſt. Yet he muſt needs praiſe him, for that on their Arrival at *Boghâr*, he ſent an hundred Soldiers in Queſt of the Robbers, who had attacked the Karawân. Theſe meeting with them, killed Part, and brought back four Priſoners; of whom two had been wounded by the *Engliſh* Fire-Arms. The King firſt ſent for *Jenkinſon* to ſee them, and then ordered them to be hanged at his Palace-Gate, for an Example to others, becauſe they were Gentlemen: Part alſo of the Goods that were recovered, were reſtored to him [d]. Jenkinſon's *Audience*, *His kind Reception.*

As to the Trade of *Boghâr*, there is great Reſort from *Kathay*, *India*, *Perſia*, *Balgh* [e], *Ruſſia*, and other Countries: But the Merchants are ſo poor, and bring ſo few Wares, that there is no Hope of any Trade there worth following [f]. While *Jenkinſon* was there, Karawâns arrived out of all the above-mentioned Countries, except *Kathay*, with which the Trade had been obſtructed for three Years, by the Wars betwixt two great Countries and Cities, called *Taſkent* and *Kaſkar*, that lie in the Way, and certain neighbouring People. Thoſe at War with *Taſkent*, are *Mohammedans*, called *Koſſaks*: They *Trade of* Boghâr.

[a] Rather, *Allah! Allah!* that is, *God.* [b] *Purchas Pilgr.* p. 238. [c] Or, *Bokhâra.* [d] *Purchas*, as before, *p.* 239, *& ſeq.* [e] *Balkh*, or *Balk.* [f] For what relates to Merchandizes imported and exported, the Deſcription of *Boghâr*, and other Matters already touched-on, they are more fully handled before, *p.* 516, out of this Author.

in Arms againſt *Kaſkar*, are called *Kings*, *Gentiles*, and *Idolaters*: Which two Nations are of great Force, living in the Fields, and have almoſt conquered thoſe Cities.

Informations concerning Katay.

HERE the Author got Informations concerning *Kathay* [a], which was nine Months Journey diſtant: But the Seaſon for the Departure of the Karawâns being come, and the Town in Danger of being beſieged, on a Report that the King was defeated in Battle, he was adviſed by the Metropolitan to depart. His Intention was to have gone to *Perſia*, to pry into the Trade thereof; although he had learned enough at *Aſtrakhân* and *Boghâr*, to perceive, that it was not much better than that among the *Tartars*, it lying chiefly in *Syria* and the *Mediterranean Sea*.

Reaſons for returning.

But when he was ready to ſet-forward, he was prevented by ſeveral Conſiderations: For firſt, by the Wars newly broken-out between the Sofi and *Tartar* Kings, the Roads were become unſafe. About ten Days Journey from *Boghâr*, a Karawân from *India* and *Perſia* was plundered by Robbers, and many ſlain. Then the Metropolitan took from him the Emperor of *Ruſſia*'s Letters; for Want of which he ſhould be made a Slave where-ever he came. Beſides, the Goods he was obliged to take in Payment of the King, and his Nobles, were not vendible in *Perſia*. Theſe Reaſons determined him to return to *Ruſſia* by the Way he came [b].

He leaves Boghâr,

THE eighth of *March*, 1559, the *Engliſh* left *Boghâr*, in Company with a Karawân of ſix hundred Camels: And it was well they did, ſince, had they ſtaid, they had been in Danger to have loſt both Life and Goods: For ten Days after, the King of *Samarkand* came and beſieged the City, while the King was abſent, in the Wars againſt another Prince, his Kinſman, as happens frequently in thoſe Parts: For it is a Wonder if a King reign there above three or four Years; which frequent Revolutions prove very detrimental both to the Country, and Merchants.

Comes to Urjenz,

THE twenty-fifth they arrived at *Urjenz*. In the Way they eſcaped four hundred Rovers, who lay in wait for them. Moſt of theſe were the Kindred of thoſe they met-with before, as they found by four Spies, who were taken. The Author had in his Charge, two Ambaſſadors, one ſent by the King of *Boghâr*, the other by him of *Balk* [c], to the Emperor of *Ruſſia*. Having ſtaid at this Place and *Sellizure*, eight Days, for aſſembling their Karawân, the ſecond of *April* they departed, with four more Ambaſſadors, for the *Ruſſian* Court, ſent from the King of *Urjenz*, and other *Soltâns*, his Brethren, with Anſwer to the Letters brought them by the Author; who took an Oath on the Goſpel, that they ſhould be well-uſed in *Ruſſia*, and ſuffered to return in Safety, conformable to what the Emperor had written in his Letters: For they were in ſome Doubt, becauſe none had been ſent for a long Time before. Jenkin. 155

THE twenty-third of *April* they got to the *Caſpian Sea*, where they found their Bark, but neither Anchor, Cable, Cock, nor Sail. However, as they brought Hemp with them, they ſpun a Cable, and other Tackling, made a Cotton Sail-Cloth, and rigged the Veſſel out as well as they could; but had neither Boat, nor Anchor. While they were contriving to make an Anchor of a Cart-Wheel, there arrived a Bark from *Aſtrakhân*, which had two; whereof *Jenkinſon* procured one. Being thus equipped, he hoiſted the red Flag of *St. George*, and departed. There were on board, beſides himſelf, and the two *Johnſons*, who ſerved for Maſter and Mariners, the ſix Ambaſſadors, and twenty-five *Ruſſians*, who had been Slaves a long Time in *Tartary*, and ſerved to row, when requiſite. Arri. at Bark.

SAILING ſometimes along the Coaſt, ſometimes out of Sight of Land, the thirteenth of *May* they came to an Anchor, three Leagues from Shore: There in a Storm, which continued forty-four Hours, their Cable breaking, they loſt their Anchor. As they were off a Lee-Shore, and had no Boat to help them, they hoiſted Sail, and bore clear of it, expecting every Moment to be caſt-away. At length they ran into a Creek full of Ooze, and ſo ſaved themſelves, with their Bark; for had that periſhed, they muſt have been deſtroyed, or made Slaves of by the wild Inhabitants. When the Storm was over, they put to Sea again; and having by their Compaſs, and other Marks, fixed the Place where they loſt their Anchor, returned, and found it, to the great Surprize of the *Tartars*. Two Days after, there aroſe another great Storm, at North-Eaſt; by which being driven far to Sea, they had much-ado to keep their Bark from ſinking. At length the Weather permitting them to take the Latitude, and knowing how the Land lay, they fell with the River *Yaik* [d]. In ſhort, the twenty-eighth of *May* they arrived at *Aſtrakhân*. Dang. of Tem.

THIS *Caſpian Sea* is in Length about two hundred Leagues, one hundred and fifty broad: On the Eaſt lies the great Deſart-Land of the *Turkmâns*: On the Weſt, the Countries of the *Chirkaſſes* [e], and Mountains of *Caucaſus*; the *Euxine Sea* is a hundred Leagues diſtant. To

[a] Among which thoſe of *Johnſon*, that follow, doubtleſs, make a Part. [b] *Purchas Pilgr.* p. 240. [c] Before written *Balgh*. [d] Before written *Jaïk*: It may be pronounced both Ways. [e] *Cherkas*, or *Circaſſians*, as commonly written.

the

Roads to Katay.

the North is the River *Wolga*, and the Land of a *Nogay*; and to the South, the Countries of *Media* and *Persia*. This Sea is fresh in many Places, and in other Places as salt as the Ocean.

Large Rivers, small Trade.

ALTHOUGH several large Rivers fall into it, yet it has no Way of discharging its Waters, except under-Ground. Those Rivers are the *Wolga*, called by the *Tartars*, *Edel* [a]. It issues from a Lake, not far from *Novogrod* in *Russia*, and runs above two thousand *English* Miles [b]. Next are the *Yaïk* and *Yem*, which rise in *Siberia*: Also the *Cyrus* [c], and *Arash* [d], whose Springs are in *Caucasus*. But the few Ships upon this Sea, the Want of Marts and Port-Towns, the Poverty of the People, and the Ice, renders the Trade good for nothing. *Jenkinson* offering to exchange his Wares with some Merchants of *Shamaki*, they refused, saying, they had them elsewhere as cheap as he could sell them.

b

Leave to go.

THE tenth of *June* he left *Astrakhân*, with the Ambassadors, having an hundred Gunners to escort them, and him. The twenty-eighth of *July* they reached the City of *Kazan* [e], all the Way through a Country where they met-with no Habitations, or fresh Provisions. The seventh of *August* leaving *Kazan*, they transported their Goods by Water, as far as the City of *Morum*; and then by Land to *Moskow*, where they arrived the second of *September*.

c

Leave to depart.

THE fourth *Jenkinson* appeared before the Emperor, and having kissed his Hand, presented him a white Cow's Tail, of *Katay*, and a *Tartarian* Drum. After this he produced the Ambassadors, and the *Russian* Slaves. He dined that Day in Presence of the Emperor, who sent him Meat from his Table by a Duke, and asked him several Questions touching the Countries where he had been. The seventeenth of *February* departing from *Moskow*, with the Emperor's Leave, he came the twenty-first to the Factory at *Vologda* [f]: There he staid till the twenty-fifth of *March*, when having seen the Company's Goods put on board their Boats, he departed, and arrived the ninth of *May*, 1560, at *Kolmogro* [g]; where his Journal breaks-off.

d

Arrives to Kolmogro.

SECT. III.

Informations *concerning the* Roads *to* Katay.

Informations of Roads, how procured. The first Road. Second Road. Third Road. Countries beyond Katay. *Fabulous Reports. Fourth Rout.* Yeshilbash, *or* Uzbeks. Sukkuir, *or* Suchew. Kampion, *or* Kan-chew. *Huge Images. Mountebanks. Inhabitants, Dress: Their Money. Printing. Rhubarb described: The Root, how preserved: Exceeding cheap. A very dear Root. Tea. Road to* Kampion: *The same inverted. Road from* Kashmîr *to* Kâshgâr.

Informations of Roads.

THESE Informations consist of five Itineraries, or Memoirs. The three first were procured at *Boghâr*, from the *Tartar* Merchants, by *Richard Johnson*, who accompanied Mr. *Jenkinson* thither; and, though scanty, are of Use in Geography, as they serve to confirm and explain, supply and rectify, other Accounts. The same may be said, with more Justice still, of the fourth Information, which was given to *Ramusio* by *Haji Mehemet* [h], a very judicious *Persian* Merchant, of the City *Tabas* in *Khilân* [i], who performed the Journey himself with the Karawâns. This Account of *Mehemet*, was procured by Means of *Michael Mambrè*, skilled in the *Arabic*, *Persian*, and *Turkish* Languages; in which last he was Interpreter to the Signory of *Venice*. It is inserted by that learned Collector in the second Tome of his Voyages [k]: And *Purchas* [l] has given a Translation of it in his third Volume of *Pilgrims*. The Notes gathered by *Johnson* are published also by him after *Hakluyt*. The Road from *Kashmîr* to *Kâshgar* comes from *Bernier*.

How procured.

I. THE first Information was received by *Johnson* from *Sarnichok*, a *Tartar* of *Boghâr*, as follows:

The first Road.

From *Astrakhân*, to *Serachîk*, by easy Stages, such as Merchants take with their Goods, is ten Days Journey.

From *Serachîk*, to *Urjenz*, fifteen Days.

From *Urjenz*, to *Boghâr*, fifteen Days.

From *Boghâr*, to *Kaskar*, thirty Days.

From *Kaskar*, to *Katay* [m], thirty Days Journey.

The second Road.

Another more safe Way to travel, according to the same Person.

f From *Astrakhân*, to *Turkmân* [n], by the *Caspian Sea*, ten Days Sail with Barks.

[a] *Adil*, or *Atel*. [b] *Purchas Pilgr.* p. 241. [c] Or, *Kûr*. [d] Or, *Arras*. [e] In fifty-five Degrees, thirty three Minutes Latitude. [f] Or, *Wologda*, as others write it. [g] *Purchas*, as before, *p.* 242. [h] Written *Chaggi Memet*, in *Ramusio*. Here the *Ch* seems to stand for the guttural *H*, and in other Places for the *K*. [i] We meet with no such City as *Tabâs* in the Province of *Khilan*, or *Ghilan*. Perhaps he was a Native of *Tabas Kileki*, a City in *Kûhestan*, or Mountain *Irâk*. [k] In his Dissertation on *Marco Polo*'s Travels. [l] *Hakluyt* has only inserted the Names of Places in the Road with the Distances, vol. 1. p. 337. [m] *Johnson* writes, *Cathaya*. [n] That is, the Country of the *Turkmâns*, crossing-over the neareſt Way.

From

Roads to Katay.

From *Turkmân*, to *Urjenz*, by Land, especially with Camels, each carrying fifteen *Poodes* Weight, is ten Days.

From *Urjenz*, to *Boghâr*, fifteen Days.

Note. *Boghâr* is the Mart, or Place, where the *Turks*, *Katayans*, and other Nations of those Parts meet; and there all Merchandizes pay one fortieth Part Duty.

From *Boghâr*, to *Kaskar*, the Frontier of the Great *Khân*, is one Month's Journey.

From *Kaskar*, to *Katay*, is another Month's Journey, by Karawân, having many Towns and Forts by the Way.

This *Tartar* told *Johnson* likewise, that Ships might sail from *Katay* to *India* [a]: But knew not of any other Roads, or along what Coasts that Navigation was performed [b].

Third Road.

II. THE Information of another *Boghâr* Merchant, as he received it from his Countrymen, who had been there.

From *Astrakhân* by Sea, to *Serachîk*, fifteen Days [c]; or else as before, to *Turkmân*.

From *Serachik*, to *Urjenz* [d], fifteen Days.

From *Urjenz*, to *Boghâr*, fifteen more.

Note. As in the thirty Days Journey, between *Serachîk* and *Urjenz*, there are no Habitations, Travellers carry their own Provisions and Tents to lodge in; meeting daily with many Wells of fair Water, at equal Distances for baiting.

From *Boghâr*, to *Taskent* [e], easy travelling with Goods, fourteen Days.

From *Taskent*, to *Occient* [f], seven Days.

From *Occient*, to *Kaskar*, the capital City of *Reshit Kân* [g], twenty Days.

From *Kaskar*, to *Sowchik* [h], the first Border of *Katay*, thirty Days.

From *Sowchik*, to *Kamchik* [k], five Days.

From *Kamchik*, to *Katay*, is two Months Journey [l], through a Country inhabited, temperate, and abounding with Variety of Fruits. *John.* 155

Kambalu, the chief City of the whole Land, is yet ten Days Journey from *Katay* [m].

BEYOND *Katay*, which they praise for the Civility of the Inhabitants, and represent as unspeakably rich, is the Country called by the *Tartârs*, *Kara-kalmak*, inhabited by black People [n]; but the *Katayans* are white, and fair: Their Religion is the Christian [o], or resembling it; and they have a peculiar Language. *Countries beyond Katay.*

IN travelling the Roads above-mentioned, one meets with no furious wild Beasts, except white and black Wolves. Woods being scarce in those Countries, no Bears breed there; but there are other Creatures, and, among the rest, one called by the *Russians*, *Barse* [p]; which by the Skin, exposed to Sale at *Astrakhân*, appears to be as large as a Lion, and being finely spotted, it was taken there for a Leopard, or Tiger.

TWENTY Days Journey from *Katay*, is a Country named *Angrim*, where breeds the Animal producing the best Musk, which is cut-out of the Knee of the Male. The People are tawny, and the Men beardless; wherefore, for Distinction Sake, they wear the Figure of the Sun in Iron, like a Boss, upon their Shoulders; and the Women on their Pudenda. The Inhabitants of this Country, and another called *Titay* [q], feed on raw Flesh: The Duke there is called *Khân*. They worship the Fire, and are thirty-four Days Journey from *Great Katay*: In the Way lie the beautiful People called *Komoron*, eating with Knives of Gold: But the Land of small People [r], is nearer *Moskow* than *Katay* [s]. *Fabulous Report.*

III. *HAJI MEHEMET* told *Ramusio*, *Fourth* (*Mambre* interpreting what he spoke) that he had been at *Sukkuir* and *Kampion* [t], Cities in the Province of *Tangût*, and Entrance of the State

[a] *Hakluyt*, vol. 1. p. 335. [b] Yet *Polo* had shewed this two hundred and fifty Years before. [c] This Distance seems too great; for *Jenkinson* sailed to the *Jaik*, on which this Town stands, in seven Days easy Sailing. [d] Here written, *Urgence*. [e] Or, *Toshkant*, on the River *Sir*. [f] Whether this be *Uzkent*, or what other Place, is hard to determine from the single Light of the Distance. [g] Rather *Rashîd*, or *al Rashid Khân*. [h] This, doubtless, must be *So-chew*, at the End of the Great Wall of *China*. [i] Rather, the first City in the Borders of *Katay*. [k] This must be *Kan-chew*, *Polo*'s *Kampion*. [l] Yet all this Journey seems to be through *Katay*, or *China* itself: Unless we suppose, that at *Kamchik*, or *Kan-chew*, which lies at the great Wall, the Road passed-out of *Katay*, and led through *Tartary* to one of the Gates of the Wall, ten Days Journey from *Khanbalu*, or *Pe-king*. [m] If *Kambalu* was the chief City of *Katay*, how could it be ten Days Journey from it? Supposing the Road from *Kamchik* lay through *Tartary*, the Sense must be, that *Kambalu* lay ten Stages within, or from the Entrance of *Katay* on that Side. [n] These are the *Pagan Mongols*, invidiously so called by the *Mohammedan Mongols*, commonly miscalled *Tartars*. [o] This proves what we have often observed before, that the Reports of Christians being in *Tartary* had their Rise from the Mistake of one Religion for the other, on Account of the great Likeness. [p] More correctly, *Bars*, or *Pars*; which in the *Mongol* Language signifies a *Leopard*. See the *Tartar* Cycle, *p.* 400. [q] Or, *Kitay*, according to *Hakluyt*. But this cannot be, for *Kitay* and *Katay* are the same Country, *viz.* *China*, with which this Circumstance does not agree. [r] Or, Pigmies. This Paragraph is all an idle Fiction, such as Travellers bring home, or invent, to impose on others. [s] *Hakluyt*, as before, *p.* 336. [t] Both mentioned by *Polo*.

of

of the Grand *Khân*, or Great Emperor of the *Tartars*, called *Daymir Khân* [a], to whom they were ſubject. They are the firſt Cities Eaſtward beyond the *Mohammedans* [b]. Karawâns are ſuffered to proceed no farther, nor any Merchant, except he goes Ambaſſador to the Great *Khân* [c]. He went thither with a Karawân, which ſet-out from *Tauris* in *Perſia*. He returned by another Road, with an Ambaſſador ſent by the *Yeſhilbaſh* [d], or *Green-head Tartars*, to *Conſtantinople*, to make a League with the Great *Turk* againſt the *Perſians*, their common Enemy. Theſe *Yeſhilbaſh Tartars* are *Moſlems*, and poſſeſs the Countries to the North of *Perſia*: *Bokhâra* and *Samarkand* are in their Dominions, each having a Lord of its own [e]. They wear green-picked Turbans of Felt, for Diſtinction from the *Perſians*, who have them red; and are always at Variance with them about their Religion, or ſettling their Limits. They have three particular Sciences, *Khimia*, or Chemiſtry, the ſame as in *Europe*; *Limia*, whoſe End is to cauſe Love; and *Simia*, to make Men ſee that which is not. They have no Coin, but cut thin Rods of Gold and Silver into Pieces, as they do at *Sukkuir*.

SUKKUIR is a great and populous City, having fair Houſes, after the *Italian* Manner, with many great Temples and Idols, all of Stone. It is ſituate in a Plain, watered by infinite Rivulets; abounds in Silk, and all Sorts of Proviſions. They have no Wine, but make a Drink with Honey. The Country being cold, there grow no Fruits, but Pears, Apples, Apricots, Peaches, Melons, and Cucumers. Rhubarb (of which *Mehemet* brought a great Quantity to *Venice*) grows all-over the Country.

THE City of *Kampion* ſtands in a fertile, cultivated Plain. It is fortified with a thick Wall, the Inſide filled with Earth, able to carry four Carts a-breaſt; with Towers, and Artillery as large as thoſe belonging to the Great *Turk*. The Ditch is wide, and dry; but they can make it run with Water at their Pleaſure. Their Houſes are of Stone, with two or three Lofts, ſloperoofed, painted with Variety of Figures. They have one Street only of Painters. Great Men have a great Loft, or Pageant, on which are erected two Tents of Silk, embroidered with Gold, Silver, Pearls, and Jewels: Here ſtanding with their Friends, they are carried, for their Pleaſure, by forty or fifty Slaves, through the City. Others are carried on a ſimple Pageant, by four or ſix Men, without other Furniture. Haji Mehemet. 1560.

THEIR Temples are built like the Churches at *Venice*, large enough to hold four or five thouſand Perſons: In them are ſeen the Statues of a Man and Woman ſtretched on the Ground, each forty Foot long, all of one Piece, and gilded [f]. There are alſo ſmall Images, with ſix or ſeven Heads, and ten Hands, holding one a Serpent, another a Bird, a third a Flower, and ſo forth. There are ſome Monaſteries of religious Men, who never ſtir-out during Life. There are innumerable others, like our Friars, ſays *Ramuſio*, who go up-and-down the City. They are excellent Stone-Cutters: Their Materials are brought from Quarries two or three Months Journey diſtant, on Shod-Carts of forty Wheels, very high, drawn by five or ſix hundred Horſes and Mules. Beſides which Cattle, they have a Kind of very large Oxen, with long, thin, and white Hair [g]. *Huge Images.*

IN the Market-Places of *Kampion*, you meet with Mountebanks, who by their Skill in the Science of *Simia* [h], ſurprize the gaping Multitude with ſtrange Sights; as of a Man cutting-off his Arm, or thruſting himſelf through with a Sword, and ſeeming to be all bloody, and the like. *Mountebanks.*

THE Inhabitants go dreſſed in black Cotton-Cloth, furred in Winter with Skins of Wolves and Sheep, if they be poor: If rich, with Sables and Martins. Their Garments reach to the Ground, and have wide Sleeves. They wear black Bonnets, ſharp, like a Sugar-Loaf. Their Mourning is white Cotton-Cloth. The Men are rather ſmall, than large, and wear Beards, eſpecially at a certain Time of the Year. *Inhabitants, Dreſs.*

THEY have no Coin in theſe Parts, but making their Gold and Silver into ſmall Rods, cut-off Pieces of a *Saggio* Weight, which in Silver is worth twenty *Venetian Soldi*; and, in Gold, a Ducat and half [i]. *Their Money.*

THE *Katayans* have the Uſe of Printing; and, as well as the Idolaters [k], are forbidden to go-out of their own Country to merchandize. *Printing.*

[a] By the Grand *Khân* here, is to be underſtood the Emperor of *China*. Perhaps *Daymir* ſhould be *Daymin*, or *Taymin*, the Name, or Title, of the then reigning Family; or might be a Name given him by the *Perſians*, or *Tartars*. [b] As were the Inhabitants of *Khamul*, and the other Cities of *Little Bukhâria*, though mixed with Idolaters. [c] Or, in the Ambaſſador's Train; as thoſe did who went with *Shâh Rokh*'s. [d] In the *Italian*, *Jeſcilbâs*. They are the *Uzbek Tartars*, called *Green-heads*, becauſe they wear green Turbans; in Oppoſition to the *Perſians*, who wear red ones; therefore nick-named *Yeſhilbaſh*, or *Red-heads*. [e] There was then a *Khân* in each. [f] See *Shâh Rokh's* Voyage before, *p.* 624. [g] *Polo*, *Conti*, and others, ſpeak of ſuch Oxen. [h] Which is no more than Juggling, or Sleight of Hand. [i] *Purchas* notes, that ſix *Saggi* make an Ounce. [k] Here a Diſtinction is made, as if the *Katayans*, or *Chineſe*, were not Idolaters. Perhaps by *Katayans*, muſt be underſtood thoſe of the *Confuſian* Sect.

Roads to Katay.

Rhubarb described.

RHUBARB is called *Ravend Chini*, by the *Kitayans* [a]. The beſt grows in the Neighbourhood of *Sukkuir*, in high, ſtony Hills, full of Springs, and Woods of high Trees. The Land is of a red Colour, and by reaſon of many Rains and Springs almoſt always miry. *Mehemet* ſhewed a Picture of the Plant [b], brought-out of the Country. The Leaves are ordinarily two Spans long, narrow below, and broad above, covered with Down, or ſmall Hairs: The Stalk is green, four Fingers high, and ſometimes a Span from the Earth: The green Leaves with Age grow yellow, and ſpread on the Ground: In the Midſt of the Stalk grows a thin Branch, with Flowers ſhaped like the *Mamole* Violets, but larger, of the Colour of Milk and Azure, with an offenſive Smell.

The Root, how preſerved.

THE Root is a Span or two long, and ſometimes as big as a Man's Thigh, or Leg: From it ſhoot little Roots, or Sprigs, which ſpread in the Ground, and are cut-away. The great Root is tawny on the Out-ſide, and yellow within, being full of red Veins, filled with red and yellow Juice, which is clammy. This iſſues-out when the Root is cut in Pieces; wherefore, to preſerve as much of the Virtue as they can, they lay the Pieces on Boards, turning them ſeveral Times a Day, that the Juice may incorporate with them. After four or ſix Days, they hang them to dry in the Wind, where the Sun may not come at them, and in two Months they are prepared for Uſe. The Root is uſually taken-out of the Ground in Winter [c], as being then moſt impregnated with the Virtue, which at other Times is diſperſed into the Leaves and Flowers, the Juice alſo gone, and the Root becomes light and hollow.

Exceeding cheap.

THEY ſell a Cart-Load of Roots, with Leaves, for ſixteen Silver *Saggi*; but it muſt be cut and dried, before it is brought to Market; for ſhould they do it afterwards, it would corrupt in five or ſix Days; and ſeven Loads green will not yield above one dry. The *Katayans* value it ſo little, that they would not gather it, if foreign Merchants did not come for it. Thoſe of *China* [d] and *India* carry-away the greater Part. When it is green it is intolerably bitter; and in *Katay* they uſe it not for Medicine, but mix it pounded with other odoriferous Compoſitions, to perfume their Idols. In ſome Places there is ſuch Store, that they burn it dry inſtead of Wood; others give it their old crazy Horſes.

Very dear Root.

HOWEVER, they highly prize another ſmall Root, which they call *Mambroni Chini* [e], growing in the ſame Mountains where the Rhubarb is found. It is uſed for Diſeaſes, thoſe eſpecially of the Eyes; but ſo very dear, that *Mehemet* did not think any of it was brought into *Europe*. They much uſe the Leaves of another Herb, which they call *Chiay Katay* [f], which grows in a Place of *Katay*, called *Ka-chan fû* [g]. They boil it, whether new or dry; and a Cup or two of that Decoction, drank very hot faſting, takes-away the Fever, Pain of the Head, or Stomach, Back, Joints, and other Diſeaſes, eſpecially the Gout: It is good alſo for Digeſtion. They carry this *Chiay Katay* with them in their Voyages, and will give a Sack of Rhubarb for an Ounce of it. The *Katayans* ſay, that if the *Perſian* and *Frank* Merchants knew its Excellency, they would buy no Rhubarb.

Road to Kampion.

As to the Road *Mehemet* travelled, he ſaid, that if he had returned the ſame Way he went to *Katay*, his Rout would have been as follows: From *Kampion* to *Gauta*, in ſix Days; from *Gauta*, to *Sukkuir*, in five Days; from *Sukkuir*, to *Khamul*, in fifteen: Here the *Muſulmans* begin: From *Khamul*, to *Turfon*, in thirteen: From *Turfon* they paſs three Cities; firſt *Khialis* [h], ten Days Journey thence; then *Kucha* other ten; laſtly, *Akſu* in twenty. The Way hitherto, is through Places inhabited. From *Akſu*, to *Kaſkar*, are other twenty Days, all rough Deſart [i]. From *Kaſkar*, to *Samarkand*, twenty-five Days; from *Samarkand*, to *Bokhâra* in *Koraſſam* [k], five; from *Bokhâra*, to *Eri* [l], twenty; from thence, to *Veremi* [m], in fifteen; from *Veremi*, to *Kaſbin*, in ſix; thence to *Soltania*, in four; and thence to *Tauris*, in ſix Days.

[a] Not ſo, but by the *Perſians*. [b] The Cut is given by *Ramuſio*, but is different from ours, *p.* 307. [c] The Spring there begins at the End of *May*. [d] By *China* here, muſt be underſtood the Southern-Part, called by *Polo*, *Manji*; as the Country ſtood divided before the Conqueſt of the *Mongols*: Which Diſtinction ſeems to have been ſtill kept-up by the Weſtern Nations of *Aſia*. [e] *Mambroni Chini*, or *Cini*, as *Ramuſio* writes it, muſt be the *Perſian* Name. It ſeems to be *Fu-ling* of the *Chineſes*. See before, *p.* 307. [f] So it is written in the *Italian*; and, conſequently, ſhould be ſpelled by us *Khiay Katay*: But as we take it to be the Tea, called in *China*, *Cha*; we have not changed the Orthography. [g] In the *Italian*, *Cacan fû*. [h] In the ſame, *Chialis*. [i] Theſe Diſtances, as well as the former, given on the Strength of Memory, are not exact. The Diſtance from *Kya yu quan*, at the End of the *China* Wall near *So-chew*, to *Hami* or *Kamul*, was meaſured ninety Leagues, which at ſix Leagues a Day make fifteen Days. Then by the Jeſuits Map to *Turfan*, will be fifty-ſix Leagues, or about ten Days; thence to *Akſu* an hundred Leagues, or ſeventeen Stages; and to *Kâſhgar*, ſeventy-four Leagues, or thirteen Stages. [k] This is contrary to what is ſaid before, that it belonged to the *Green-head Tartars*, or *Uzbeks*, who poſſeſſed *Great Bukhâria*, to which *Bokhâra* belongs. [l] This is *Heri*, or *Herat*, the Capital of *Khoraſân*, in *Perſia*. [m] Or, *Varumi*. *Del'Iſle* places it in *Irâk*, South-Eaſt of *Kaſbin*.

NOTE,

NOTE, A Day's Journey is eight *Farſenks* [a], each of which is three *Italian* Miles; but on the Hills and Deſarts they travel not half that Diſtance in a Day [b].

HAKLUYT has given this Road inverted [c], or leading from *Perſia* to *Katay*, in the following Manner:

	Stages.
From *Tauris*, to *Soltania* - -	6
From *Soltania*, to *Kaſbin* - -	4
From *Kaſbin*, to *Veremi* - -	6
From *Veremi*, to *Eri* - -	15
From *Eri*, to *Boghâra* - -	20
From *Boghâra*, to *Samarkand* -	5
From *Samarkand*, to *Kaſkar* -	25
From *Kaſkar*, to *Akſu* - -	20
From *Akſu*, to *Kukhi* - -	20
From *Kukhi*, to *Khialis* - -	10
From *Khialis*, to *Turfon* - -	10
From *Turfon*, to *Kamul* - -	13
From *Kamul*, to *Sukkuir* [d] - -	15
From *Sukkuir*, to *Gauta* - -	5
From *Gauta*, to *Kampion* - -	6

IV. To theſe Informations may be added that which *Bernier* gives of the Road from *Kaſhmîr*, in the *Mogol*'s Empire, to *Kâſhgar*. The Merchants of the Country, who came to *Kaſhmîr* to ſell Slaves, told him, that it lies Weſt of *Kaſhmîr*, drawing a little to the North: That the ſhorteſt Way thither, was through *Great Tibet*; but the Paſſage then (in 1664) being ſhut-up, they were forced to travel through *Little Tibet*. Bernier. 1560.

LEAVING the City of *Kaſhmîr*, they got, in four Days, to *Gûrche*, a ſmall Town, and the laſt depending on *Kaſhmîr*.

FROM *Gûrche*, in eight Days, they came to *Eſkerdû*, the Capital of *Little Tibet* [e].

From *Eſkerdû*, in two Days more, to *Sheker*, a ſmall Town in the ſame Kingdom, ſituate on a famous medicinal River.

From *Sheker*, in fifteen Days, to a Foreſt on the Confines of *Little Tibet*.

From the ſaid Foreſt, in fifteen Stages more, to *Kâſhgher* (or *Kâſhgar*) a ſmall Town, once the Reſidence of the King of *Kâſhgher*, which is now at *Yârkend* (or *Yarkian*) ten Stages diſtant, ſomewhat more to the North [f]. To Kâſhgar.

From *Kâſhgher*, to *Katay*, is but two Months Journey, and every Year Karawâns go thither from *Perſia*, returning through the *Uzbeks* Country; as others do through *Patna*, into *Hinduſtân*. To go to *Katay*, Travellers muſt get to a Town that is eight Stages from *Koten*, the laſt City of the Kingdom of *Kâſhgar*: The Roads are very difficult, and in one Place, in whatever Seaſon it be, they muſt march for about a Quarter of a League upon Ice. This is all *Bernier* could get out of the *Kâſhgar* Merchants, who were very ignorant, and his Interpreters bad [g].

CHAP. VI.

The TRAVELS *of* Benedict Goëz, *a* Portugueze *Jesuit, from* Lahor *in the* Mogol's *Empire, to* China, *in* 1602.

INTRODUCTION.

News of Katay: *A Mission thither resolved on, and why.* Pagans *deemed* Christians. Goëz *prepares for his Journey. Abstract, whence taken.*

News of Katay,

THE Name of *Katay*, first made known in *Europe* by *Marco Polo*, had since his Time been so little heard of, that most People doubted if there ever was such a Country: But while the Public were thus divided in their Opinions, News came from the Jesuits of *Lahor* [a] concerning that famous Empire. They had their Information from an aged *Mohammedan* Merchant, who had distributed an hundred thousand Pieces of Gold at *Mekka*, and had lived in *Khânbalu* [b] thirteen Years, whither he went as Ambassador from the King of *Kaygar* [c]. He said the *Katayans* were a very fair and handsome People, exceeding the *Rûms*, or *Turks*, in Comelineſs: That they were Christians, having Temples full of Pictures and Images; had Crucifixes, which they devoutly adored: Priests, whom they much reverenced, and fed with Presents: Monasteries, Altars, Lamps, Processions, and other Ceremonies. He added, that among them were some *Jews*, and many *Mohammedans*; which latter were in Hopes of converting the Christian King to their Religion.

A Mission thither

ON these Tidings, *Nicholas Pimenta*, a *Portugueze*, Visitor of the *Indies* at *Goa*, out of his jesuitical Zeal, formed a Design of sending Missioners to instruct this Nation; who, being at so great a Distance from the Head of the Church, might otherwise, it seems, be liable to fall into Errors. Hereupon he sent Advice to the Pope, and King of *Spain*; who forthwith gave Orders to *Arias Saldanna*, then Vice-Roy of *India*, to assist and defray the Expences of the Expedition, as *Pimenta* should direct. *Goëz*, who was Coadjutor to *Xavier*, Superior of the Mission in the *Mogol*'s Empire, and spoke the *Persian*, as well as understood the Customs of the *Mohammedans*, being then at *Goa* on an Embassy to the Vice-Roy, from the *Great Mogol*, *Akbar*, who had a great Esteem for him, *Pimenta* [d] pitched on him as a fit Person to undertake this new Mission.

THOSE of the Society were informed, by the Letters of *Matthew Ricci*, sent from *Pe-king*, that *Katay* was the same Country with *China*: But as that Information was contrary to the Advice of the *Lahor* Jesuits, the Visitor inclined to the Opinion of the latter. On the one Hand, he could not conceive, it seems, that so very foolish a Sect as the *Mohammedan* could penetrate into *China*; and, on the other, it was affirmed, that there was not the least Sign of Christianity ever having been in that vast Empire. Whereas *Katay* was reported to be a Christian Country, and this was the rather believed, as it came from the *Mohammedans* themselves. However, it was thought not improbable, that *Katay* might have communicated its Name to *China*, as being a Kingdom contiguous to it. On the Whole, it was thought proper to pursue the Design, with a View both to remove the Doubt, and find-out a shorter Way of trading with *China*.

WITH regard to the Christians, whom they took for granted would be met-with in *Katay*, the *Mohammedans*, says *Trigautius*, either told Lies, according to their Custom, or were deceived by Appearances: For as they do not worship Images themselves, and saw many in the Temples of the *Chineſe*, not much unlike those by which the Papists represent the Mother of God, and certain Saints, they might think both followed the same Religion. They observed, that the Priests put Candles and Lamps on their Altars: That these *Pagan* Sacrificers wore sacred Vestments, like what the *Romish* Books of Ceremonies call *Pluvials* [e]: That they make Processions, and sing much in the same Manner as is done in the *Romish* Church, according to the Institution of *St. Gregory*, and such like Things; which the Devil, says our Author, who imitates sacred Ceremonies, had transferred to the *Chineſe* [f]: And this Resemblance, continues he, might

[a] In a Letter of *Jerom Xavier*, dated from thence 1598. [b] In *Purchas*, *Xambalu*. [c] It should be *Kaſgar*, or *Kâſhgar*. [d] He was joined in Commission with another Ambassador. [e] *Chasubles*, or *Copes*. [f] We have already shewn, that there is more Reason to believe, that the Devil transferred those, and other Ceremonies, Doctrines, and Practices, from the *Bonzas* to the Papists. See before, *p.* 221. a.

might induce Foreigners, especially *Mohammedans*, to think they professed Christianity.

GOEZ being chosen, as before-mentioned, for the Expedition, was sent-back by the Visitor to *Lahor*, then the Capital of the *Mogol*'s Empire, in order to accompany the Merchants, who every fifth Year, according to the old *Mohammedan*'s Report, set-out for *China*, with the Title of Ambassadors from the King of *Persia*. In 1602 he came to *Agra*, where *Akbar* applauding his Design, gave him not only his Letters to several petty Kings his Friends, or Tributaries; but also four hundred Crowns for his Journey [a]. Here he put-on the Habit of an *Armenian* Merchant, wearing his Hair and Beard long; also, according to the Custom of that People, took the Name of *Abdallah* [b], adding *Isay*, to denote his being a Christian; and by this Means obtained a free Passage, which he could not have done had he passed for a *Portugueze*.

HE carried with him several *Indian* Commodities, as well for Disguise, as to exchange for Necessaries on the Road, bought with Money furnished by the Vice-Roy for that Purpose. He arrived at *Lahor* the thirteenth of *December*. *Xavier* gave him for Companions, two *Greeks*, *Leo Grimani*, a Priest, and *Demetrius*, a Merchant, who were well-acquainted with the Roads; and in Place of four *Mohammedan* Servants appointed him, he took one *Isaac*, an *Armenian*, to whom we owe the following Journal of his Travels: For *Goëz* dying at *So-chew*, in the Entrance of *China*, *Isaac* went forward to *Pe-king*, where *Ricci* drew-up an Account of their Travels, partly from some Minutes left by *Goëz*, and partly from what *Isaac* told him, on the Credit of his Memory [c].

THIS curious Relation is inserted in *Ricci*'s Commentaries [d], which *Nicholas Trigautius*, or *Trigault*, a *Dutchman*, translated out of the *Italian* MS. into *Latin*, and published at *Rome* in 1618 [e]. *Purchas* has given it in *English*, in his *Pilgrims*; and *Kircher* an Abridgment of it, in his *China Illustrata*; whence *Ogilby* has made his Translation. The following Abstract, though referring to *Purchas*, is taken chiefly from the Original.

SECT. I.

The Travels *of* Goëz, *from* Lahor, *the Capital of* India, *to* Kâshgar.

Goëz *leaves* Lahor. Kafrestan *City*. Ghideli. Kabul, *a famous City*. *Policy of* Goëz. Charakar. Parvam. Aingharan, Kalcha. Talhan. Kalchans *rebel*: *Plunder the Karawân*: Goëz *escapes*. Tenga Badashân. Charchunar, Serpanil. Sarchil *Province*. Tanghetar Yakonith. Hyarkan, *or* Yarkian. *Precious Marble, or Jasper, how procured*. *Audience of the King*. *Journey to* Kotan: *Danger from Zealots*: *Resolves to proceed*: *Is dissuaded in vain*.

Goëz 1603.

GOEZ furnished with several Writings, and a Table of moveable Feasts, till the Year 1610, left *Lahor* in *Lent* 1603, with a Karawân of five hundred Merchants, who set-out every Year with a great Number of Horses and Waggons, for the Kingdom of *Kaskar*. In one Month's Time they came to the City of *Athek*, in the Province of *Lahor*; and fifteen Days after passed a River a Bow-shot broad, where they staid five Days, on a Report of a numerous Gang of Robbers being on the Road. In two Months more they came to the City *Passaur*, where they rested twenty Days. At another small Town beyond this, they were informed by a Pilgrim, that thirty Days off was a City named *Kafreståu* [f], into which no *Mohammedan* dared to enter, under Pain of Death; yet that *Pagans* were admitted into the City, but not their Temples. He added, that the Inhabitants of that Region go to Church, dressed in Black: That the Soil was fertile, and yielded Plenty of Grapes: He gave a Cup of the Wine to *Goëz*, who found it very good, and thence conjectured they were Christians. Here they staid other twenty Days: And because the Way was infested with Thieves, they procured a Convoy of four hundred Soldiers from the Lord of the Place.

Goëz *leaves* Lahor.

Kafreståu *City*.

TRAVELLING twenty-five Days farther along the Foot of a Mountain, they came to a Place called *Ghideli*, where the Merchants pay Duty. On the Road they kept on their Guard against the Robbers, who from the Top of the Hill assail them with Stones, unless some go-up to repel them. For all their Care, they were assaulted by them, and many wounded, who had much-ado to save their Lives and Goods. *Goëz* escaped by flying into the Woods.

Ghideli.

IN twenty Days more they came to *Kabul*, a famous City and Mart still in the *Mogol*'s Dominions. Here they staid eight Days; for some of the Merchants had no Mind to go farther, and durst not venture forward, being so few.

Kabul, *a famous City*.

[a] *Purchas* adds, from *Jarric*, besides a thousand Rupies, which he had already spent. Perhaps, that was the Money advanced him by the Vice-Roy, as mentioned lower-down. [b] *Purchas* says, from *Jarric*, that he took the Name of *Branda Abdallah*. [c] See *Purchas*, vol. 3. p. 311; and *Trigaut. de Christiana Expedit.* cap. 11, and 13. [d] Book 5. ch. 11, 12, and 13. [e] Under the Title of *de Christiana Expeditione apud Sinas*. It was translated into *French*, and published at *Paris* the same Year. [f] *Kafreståu* signifies, *the Country of Infidels*. In the Original, *Caphersam*.

Road to China. Here the Karawân met a Princeſs, who was a Siſter of the King of *Kaſkar*, called *Maſſamet Khân* [a], and Mother to the King of *Kotan*: She was called *Haji Hanem* [b], as having been on Pilgrimage to *Mekka*; from whence returning, and falling ſhort of Neceſſaries, ſhe applied to the Merchants to borrow Money. *Goëz*, conſidering that his *Mogol* Patents were now wearing-out, thought this a proper Opportunity to procure the Friendſhip of another King; and, therefore, lent her ſix hundred Crowns on certain Goods, b refuſing to take any Intereſt; which, however, ſhe made-up to him, repaying him bountifully in Pieces of Marble, which is the beſt Merchandize that can be carried to *China*. *Grimani* the Prieſt, wearied with the Tediouſneſs of the Journey, would go no further; and *Demetrius* ſtaid in this City to trade [c].

Policy of Goëz.

Charakar, Parvam. THE Karawân being much increaſed, *Goëz* held-on with *Iſaac* the *Armenian*. In the next City they came to, called *Charakar* [d], is great c Store of Iron: Here *Akbar*'s Seal, which hitherto had freed him from Payment of Cuſtoms, was diſregarded. Ten Days after they came to *Parvam*, a ſmall Town, in the utmoſt Confines of the *Great Mogol*'s Dominions. After reſting five Days, they travelled over high Mountains, and in twenty Stages came into a Region named *Aingharan*. In fifteen more they got to another, called *Kalcha* [e], whoſe Inhabitants dwell in Villages, and have fair Hair, like the *Dutch*. Ten d Days farther they came to a Place called *Jalalabâd* [f], where the *Bramins* exact Cuſtoms granted them by the King *Bruarate*.

Aingharan, Kalcha.

Talhan, Kalchans rebel, IN fifteen Days more they came to *Talhan* [g], where a Rebellion of the *Kalchans* detained them a Month. Hence they paſſed to *Kheman*, a ſmall walled Town, under *Abdulahan*, King of *Samarhan*, *Burgania*, *Bukharata* [h], and other neighbouring Kingdoms. The *Kalchans* being in the Neighbourhood, the Commander of the Place e ſent to the Merchants not to purſue their Journey by Night, leſt the Rebels lighting of them, ſhould by that Means be furniſhed with Horſes; but to come into the Town, and join him to repel them. They were ſcarce gotten up to the Walls, when News being brought, that the *Kalchans* approached, the Governor, and his People, ran away.

HEREUPON the Merchants made in haſte a Fortification, with their Baggage, and carried into the Incloſure Plenty of Stones, to make-uſe of in caſe Arrows failed. The Rebels perceiving that, ſent a Meſſenger, deſiring them to fear nothing, promiſing to accompany and defend them. The Merchants not daring to truſt them, fled to the next Wood, leaving their Goods at the Mercy of the Thieves; who after they had taken what they pleaſed, called them back, and permitted them, with their empty Packs, to enter the empty Walls. *Benedict* loſt nothing but a Horſe, for which alſo he afterward received Cotton-Cloths. They continued at *Kheman* in great Apprehenſions, till at length an eminent Commander, called *Olobet Ebadaſkan*, ſent his Brother out of *Bukharate*; who, by Threats, compelled the Rebels to let the Merchants depart. However, their Rear was plagued with Pilferers, four of whom ſetting upon *Goëz*, he threw amongſt them his *Perſian* Turban, and while they made a Foot-Ball of it, ſet Spurs to his Horſe, and overtook his Company.

Goëz 1603. *Plunder'd Karawân.* *Goëz of*

AFTER eight Days Travel, in a very bad Road, they came to *Tenga Badaſhân* [i], which ſignifieth *a troubleſome Way*; for there is Space but for one to paſs, and that on the high Bank of a great River [k]. The Inhabitants, with a Company of Soldiers, ſet-upon the Merchants, and took from *Goëz* three Horſes, which he after redeemed. Here they ſtaid ten Days, and then, in one Day, came to *Charchunar* [l], where they were five Days detained by Rains in the open Field, and, to mend the Matter, aſſaulted by Thieves. Ten Days after they arrived at *Serpanil*, a Place quite forſaken. Then they climbed a high Hill, called *Sakrithma*, which only the ſtrongeſt Horſes were able to paſs, the reſt going-about: Two belonging to *Goëz* halted, and had much-ado to overtake the Karawân.

Tenga Badaſhân *Charchunar, Serpanil*

IN twenty Days they came to the Province of *Sarchil*, where they found many Villages, not far from each other. After two Days Stay for refreſhing, they in two Days more came to the Foot of a Mountain, called *Chechalith* [m], which they aſcended, thick covered with Snow; many were frozen with the Cold, and *Goëz* was in great Danger, for the Weather laſted ſix Days: At length they came to *Tanghetar*, belonging to

[a] Doubtleſs, a Miſtake for *Mahamet Khân*, and the rather as he is afterwards miſcalled *Mahametain*. [b] *Haji* ſignifies *Pilgrim*, and is a very honourable Title among the *Mohammedans*. [c] *Purchas*, p. 311. *Trigaut*. l. 5. c. 11. [d] In the Original, *Ciaracar*. [e] In the Original, *Calcia*. [f] In the Original, *Gialalabab*; a Corruption, doubtleſs, of *Jalalabâd*, which ſignifies the *Glory of the City*. [g] Or, *Talkhan*, a City on the Road, between *Balk* and *Badakſhân*. [h] *Abdallah Khân*, of *Samarkand*, *Burgania*, and *Bukhâria*. *Purchas* writes *Burgavia*, and *Bacharate*. What Country is meant by *Burgania*, or *Burgavia*, we cannot conjecture. [i] Or, *Badakſhân*. In the Original, *Badaſcian*. *Purchas* has it, to *Badaſcian*, called *Tengi*. [k] This muſt be the *Jihun*, or *Amû*, on which *Badakſhân* is ſituate. [l] In the Original, *Ciarciunar*. [m] In the Original, *Ciecialith*.

the

the Kingdom of *Kâſkar*. There *Iſaac* fell from a the Bank of a great River into the Water, and for eight Hours lay half dead. In fifteen Days more they reached the Town *Yakonith*; but the Road was ſo bad, that *Goëz* loſt ſix Horſes by the Way. Five Days after, haſting before the Karawân, he got to *Hiarkan*; from whence he ſent Neceſſaries to the reſt, who ſoon after arrived there in *November*, 1603 [a].

HIARKAN [b], the Capital of the Kingdom of *Kâſkar*, hath great Reſort of Merchants, and b Variety of Commodities. Here the Karawân of *Kabul* ends, and another aſſembles to proceed to *Katay*: The Captain [c], or Chief, buys the Poſt at a great Price of the King, who veſts him with abſolute Power over the Merchants. It was a Year before a ſufficient Number could be gotten together to undertake ſo long and dangerous a Journey: Neither do Karawâns ſet-out from hence every Year, but only at ſuch Times as they know they ſhall be admitted into *Katay*. c

THE Commodity before-mentioned, beſt for carrying thither, is a certain ſhining Marble, which for Want of a fitter Word, *Europeans* call *Jaſper*. The King of *Katay* buys it at a great Price; and what he leaves, the Merchants ſell to others, at exceeding great Rates. Of it they make Veſſels, Ornaments for Garments, and Girdles, with other Toys, whereon they engrave Leaves, Flowers, and other Figures. The *Chineſes* call it *Tuſhe* [d]. There are two d Kinds, one more precious, like thick Flints, which are found by diving in the River *Kotan*, not far from the City Royal [e]. The other meaner Sort is digged-out of Quarries, and ſawed into Slabs above two Ells in Breadth. The Hill where they are dug, called *Konſanghi Kaſho*, or, *the ſtony Mountain*, is twenty Stages from the ſame City. This Marble is ſo hard, that they muſt ſoften it with Fire to get it out of the Quarry. The King farms it every Year to ſome e Merchant, who carries Proviſions for the Workmen for that Space of Time.

GOEZ viſited the King, named *Mahametain* [f], and preſenting him with a Watch, a Glaſs, and other *European* Commodities, procured his Paſs to the Kingdom of *Chalis* [g]; for he did not think it proper yet to ſpeak of going to *Katay*. When he had been there ſix Months, *Demetrius* arrived from *Kabul*; and but for *Goëz* interpoſing with Gifts, had been handſomely drubbed, as well as impriſoned, for refuſing, according to the Cuſtom of the Merchants, to make a Preſent to their mock Emperor, whom they chuſe with the King's Permiſſion. Goëz. 1603.

AFTER this, Thieves breaking into the Houſe, bound *Iſaac*, and clapped a Sword to his Throat, to terrify him from making a Noiſe: But *Demetrius* hearing the Buſtle, cried-out, and ſcared them away. Mean-while *Goëz* went to receive his Money, lent to the Mother of the King of *Quotan* [h], whoſe Reſidence was ſix Days [i] Journey diſtant. As he was a whole Month away, the *Mohammedans* raiſed a Report, that he was dead, ſlain by their Prieſts, called *Kachiſhes*, for refuſing to invoke *Mohammed* [k]: And becauſe he left no Will, they ſought to ſeize on his Goods; but, to their Diſappointment, and his Companions Joy, *Benedict* returned at laſt with Plenty of the precious Marble. *Journey to Kotan.*

ONE Day, as he was eating with ſome *Mohammedans*, who had invited him, there ruſhed-in a Perſon armed; who ſetting a Sword to his Breaſt, commanded him to invoke *Mohammed*: But he refuſed, ſaying, that in his Law there was no ſuch Name invoked; and the Company taking his Part, thruſt that mad Fellow out of the Houſe. The like Zeal, it ſeems, often endangered him. Another Time he was ſent for by the King of *Kâſkar*, who in Preſence of his Prieſts, and the *Mullas*, or learned Men, aſked what Law he profeſſed, whether that of *Moſes*, *David*, or *Mohammed*, and which Way he turned himſelf in praying. He anſwered, that he profeſſed the Law of *Jeſus*, whom they call *Iſay*; and turned any Way when he prayed, believing that God was every-where. This occaſioned a great Diſpute among them; for they turn to the Weſt [l]: Yet they concluded, that in this his Practice might be good. *Danger from Zealots.*

MEAN-TIME one *Haji Aſi* [m], of that Country, being appointed Captain of the future Karawân, he invited *Goëz* to a Feaſt, accompanied with Muſic. At the End of the Entertainment, he deſired his Company to *Katay*. This was juſt what the Jeſuit aimed at, who knowing the Diſpoſition of the *Mohammedans*, wanted the Invitation to come from them. *Aſi* was ſo earneſt *Reſolves to proceed.*

[a] *Purchas*, p. 312. *Trigaut*. ch. 11. [b] *Yarkian*, or *Jurkend*, as others. See before, *p.* 528. [c] Called the *Karawân Baſhâ*. [d] In the Original, *Tuſce*; a Miſtake, no Doubt, for *Yu-ſhe*. See before, *p.* 309. [e] By the Jeſuits Map, the River of *Khoton* runs about ninety Miles Eaſt of *Yarkian*. [f] In *Purchas*, *Mahametbin*; before called *Maſſamet Khân*, which ſhews the Names are much corrupted. [g] In the Original, *Gialis*: Yet *Ramuſio* writes *Chialis*, i. e. *Khialis*. [h] *Kotan*, *Hoton*, or *Hotom*. [i] *Purchas* has ten Days: But ſix are more agreeable with the Map. [k] This muſt be falſe, for the *Mohammedans* never invoke *Mohammed*. Perhaps it ſhould be for refuſing to ſay the *Mohammedan* Confeſſion of Faith: In which Caſe he muſt either have turned *Mohammedan*, or ſuffered Death. [l] Becauſe *Mekka*, to which the *Mohammedans* always turn, lies Weſt, or South-Weſt of *Kâſhgar*. [m] In the Original, *Agiaſi*.

in

Road to China. in the Matter, that he got the King to second his Requeſt to *Goëz*; who complied, on Condition that his Majeſty would give him his Letters Patent. Thoſe of the firſt Karawân, from *Kabul*, who were loth to loſe his Company, did all they could to diſſuade him from the Enterprize. They adviſed him not to truſt to the People of *Kâſkar*, ſaying, they were treacherous, and would deſtroy him.

Is diſſuaded in vain. THIS Advice was the more to be regarded, as ſeveral of the Natives themſelves affirmed, that b those three *Armenians* would be ſlain by their Companions, as ſoon as they were out of the City. This ſo terrified *Demetrius*, that he dropped them a ſecond Time, and would have diſſuaded *Goëz* from proceeding any farther; but *Benedict* was reſolved to fulfil the Expectations of thoſe who ſent him, at all Hazards.

SECT. II.

Continuation of the Author's Travels *from* Kâſhgar *to* So-chew, *in* Katay, *or* China.

Karawân ſets forward: Fatiguing Road. Karakatay. Akſu *City*. Kucha *Town*. Chalis *City*. Goëz *victorious: Leaves the Karawân. News from* Pe-king. Turfan, Kamul. *Wall of* China. *Remarks on the Road. Dangerous Travelling. The Frontiers fortified.* Kan-chew, *and* So-chew. *Artifice of Merchants to enter* China, *by counterfeit Embaſſies: Sends to* Pe-king: *His Letters received.* Goëz *in Diſtreſs: His Death: His Effects ſeized. The Merchants ſued: Are ſhamefully caſt: Yet little recovered.* Iſaac *goes to* Pe-king.

Karawân ſets forward, GOEZ hereupon preparing for his Journey, bought ten Horſes for himſelf, his Companion *Iſaac*, and their Baggage. Mean-time the e *Karawân Baſhâ*, who was gone to his Houſe five Days Journey diſtant, to get his Equipage ready, ſent to *Goëz* to haſten forward, and by his Example quicken the other Merchants.

Fatiguing Road. ABOUT the Midſt of *November*, 1604, they came to a Place called *Yolchi* [a], where they pay Cuſtoms, and their Paſſports are examined. From thence, in twenty-five Days, they got to *Akſu*, paſſing through the following Places, *Hanchaliſh* [b], *Alcheghet*, *Hagabateth*, *Egriar*, f *Meſetelek*, *Horma*, *Thalek*, *Thoantak*, *Minjeda*, *Kapetalkol-zilan*, *Sark-ghebedal*, *Kanbaſhi*, *Akonſerſek*, and *Chakor*. The Road was very fatiguing, being through the Sands, and very ſtony [c]. a Goë 160

IN the Way they croſſed the Deſart, called *Karakathay*, that is, *the Black Land of the Kathayans* [d]; becauſe, as they ſay, the *Katayans* dwelled there a long Time. Alſo one of the Jeſuit's Horſes falling into a rapid River, ſwam to the other Side; but came back again, it ſeems, of himſelf, on invoking the Name of *Jeſus*. Karaka

AKSU is a Town of the Kingdom of *Kâſ-* Akſu C *kar*, whoſe Governor, the King's Nephew, being but twelve Years old, Affairs were managed by his Preceptor. He would needs ſee *Goëz*, who preſented him with Sugar, and ſuch childiſh Things. The young Prince, in return, received him kindly, and made him dance at a ſolemn Ball. *Benedict* next viſited the Queen-Mother, who admitted his Patent with great Reverence: To her he gave a cryſtal Glaſs, a Piece of *Indian* Calico, and the like.

c HERE they ſtaid fifteen Days, for other Mer- Kucha chants, and then departing proceeded through *Oi-* Town. *tograkh*, *Gazo*, *Kaſhani*, *Dellay*, *Saragabedall*, to *Ugan*, and then to *Kucha*, another Town, where they ſtaid a whole Month to refreſh their Beaſts, almoſt ſpent with the bad Ways, and Want of Barley. Here, to extort a Preſent, the Prieſts would have conſtrained *Goëz* to faſt, during their *Lent*.

FROM hence, in twenty-five Days, they came Chalis to *Chalis* [e], a ſmall, but well-fortified City. This d Country was governed by a Natural Son of the King of *Kâſkar*, who hearing that *Benedict* profeſſed a different Religion, began to terrify him, ſaying, it was a very audacious Thing for a Man, who was of another Faith, to enter thoſe Territories; and that for ſo doing, he might lawfully deprive him both of his Goods and Life. But when he read the King's Letters Patent, he was pacified, and with a Preſent became alſo a Friend. One Night ſending for *Goëz*, *Iſaac* fell Goëz into Tears, thinking he was going to be put to Death. *Benedict* deſpiſing the Danger, went courageouſly to the Palace: But when he came there, found all the Buſineſs was, that he might diſpute with the Prieſts and learned Men; whom, it ſeems, he preſently ſtruck dumb by Dint of Argument: Nay, the Vice-Roy himſelf approving all he ſaid, declared, that the Chriſtians were the true Believers; adding, that his Anceſtors f had profeſſed the ſame Law [f]. After this he feaſted, and kept him to lie that Night in the Palace.

[a] In the Original, *Jolci*. [b] In the ſame, *Hancialix* [c] *Purchas*, p. 313. *Trigaut*. ch. 12. [d] Rather, *Black Katay*. [e] In the Original, *Cialis*. [f] In caſe the Vice-Roy did ſay theſe Words, which is hardly poſſible, he muſt have miſtaken the Chriſtians for the Worſhippers of *Fo*; as we have already obſerved hath been often the Caſe: For the Religion of *Tibet* prevailed in theſe Parts before the Time of *Jenghiz Khân*.

In

Goëz. 1605.

IN this City they ſtaid three Months, for the Karawân Baſhâ would not depart without a great Company (it being ſo much more Gain to him) nor ſuffer any Man to go before. However *Goëz*, tired with the Delay and Expence attending it, by a Preſent obtained Leave of the Vice-Roy, to make the beſt of his Way. He was juſt ready to depart from *Chalis*, when the Merchants of the former Karawân returned from *Katay*. Theſe feigning an Embaſſage (as uſual) had pierced as far as the Capital; and having lodged for three Months in the ſame Palace of Strangers, with the Jeſuits, brought ſure Tidings of *Ricci*, and the reſt of the Society, to *Goëz*; who wondered thus to find that *Katay* was *China*, and *Kambalu* was *Pe-king*. Among other Evidences, they produced a Piece of Writing in *Portugueze*, which they had taken-out of the Duſt ſwept-out of the Chamber, in order to ſhew in their own Country, at their Return.

GOEZ having obtained the Vice-Roy's Letters for his Security, departed with *Iſaac*, and a few others, and in twenty Days came to *Puchan*, a Town of the ſame Kingdom; whoſe Governor generouſly furniſhed them with Neceſſaries out of his own Houſe. From hence they travelled to *Turfan*, a ſtrong and well-fortified City, where they ſtaid a whole Month. From *Turfan* they proceeded to *Aramuth*, and ſo on to *Kamul*, another well-fortified Place; where, likewiſe, they halted for a Month, becauſe they were well-uſed throughout the Kingdom of *Chalis*, which ends at this Town. From *Kamul*, in nine Days, they came to *Khya-yu-quan* [a], at the Northern-Walls of *China*; where they waited twenty-five Days for the Anſwer of the Vice-Roy of that Province [b].

AFTER this they were admitted within the Walls, and in one Day came to *So-chew* [c], a City, where they heard much of *Pe-king*, and other Places, whoſe Names were known; ſo that *Goëz* was now fully convinced, that *Katay* and *China* differed only in Name.

ALL the Way from *Chalis*, to the Borders of *China*, being infeſted with Incurſions of the *Tartars*, the Merchants travel in great Fear. In the Day they examine, from the Hills, whether there be any Parties of them in the Plains; and if they judge the Coaſt clear, perform their Journey by Night with Silence. One Night *Benedict* falling from his Horſe, the reſt went-on, not miſſing him till they came to their Lodging; and then *Iſaac* going-back to ſeek him, found him by the Sound of the Name *Jeſus*, almoſt deſpairing to ſee his Company any more.

IN the Way they found many *Mohammedans* ſlain, who had ventured to travel alone: Although the *Tartars* ſeldom kill the Natives, ſaying, they are their Servants and Shepherds; becauſe they take from them Flocks of Sheep, and Herds of Bullocks. They eat no Wheat, Barley, nor Pulſe, ſaying, it is Food for Beaſts, not Men. They feed only on Fleſh, eating that of Horſes, Mules, and Camels; yet are ſaid to live an hundred Years. The *Mohammedan* Nations, on this Side, not being warlike, might eaſily be ſubdued, if the *Chineſe* cared to enlarge their Dominions [d].

The Frontiers fortified.

THE End of the famous Walls, before-mentioned, is in the Weſt of *China*, which extends Northwards; from which End, for the Space of two hundred Miles, is the Part where the *Tartars* moſt commonly made their Excurſions formerly, as they do at preſent, but with leſs Danger: For the *Chineſe*, to reſtrain them, have built two very ſtrong Cities in *Shen-ſi*, and gariſoned them with choice Soldiers. Theſe have a peculiar Vice-Roy, and other Magiſtrates, who depend immediately on the Court, and reſide in one of them, named *Kan-chew* [e].

Kan-chew and So-chew.

SO-CHEW, the other, hath a ſpecial Governor, and is divided into two Parts; one inhabited by the *Chineſe*, called *Kitayans* by the *Mohammedans*, who occupy the other Part, and come from *Kâſkar*, and other Weſtern Countries, on Account of Trade. Many of them having Wives and Children, ſettle there: Yet they have no Magiſtrates of their own; but are governed by the *Chineſes*, who every Night ſhut them up within the Walls of their own City. There is a Law, by which no Man, who has lived nine Years in the Place, can return to his own Country.

Artifice of Merchants.

THE Merchants who reſort hither, come moſtly from the Weſt, under feigned Embaſſies; and have, in Conſequence of a Contract made with *China* by ſeven or eight Kingdoms, obtained a Privilege of ſending every ſixth Year, ſeventy-two Perſons in Quality of Ambaſſadors, with Tribute to the Emperor; conſiſting of the ſhining Marble before-mentioned, Diamonds of the Rock, Azure, and other Things. By this Means they travel to Court, and return at the public Charge. The Tribute they carry, is very little Expence to them: For no Man pays dearer for this Marble, than the Emperor himſelf, who eſteems it a Diſhonour to take any Thing of Strangers for nothing: Beſides, they are ſo well ſupplied, at his Majeſty's Coſt, that it is computed they get every Day, above their neceſſary Charges, a Ducat a Man. Hence many ſtrive to be admitted into this Embaſſy, purchaſing the

To enter China.

Privi-

Road to China. Privilege of the Karawân Baſhâ, by large Preſents. For this Purpoſe they counterfeit their Kings Letters, acknowledging Vaſſalage to the Emperor of *China*. The like Embaſſies are admitted from divers other Kingdoms; as *Kauchin-China*, *Siam*, *Leukhew*, *Korea*, and ſome Parts of *Tartary*. The *Chineſe* are at incredible Expences on theſe Occaſions; nor are they ignorant of the Fraud: But finding their Account in it, flatter their Sovereign with the Fancy, that all Nations pay him Tribute; whereas, in Fact, he rather pays Tribute to them.

By counterfeit Embaſſies,

Sends to Peking, GOËZ arrived at *So-chew* the End of the Year 1605, grown wealthy by his long Journey. He had thirteen Horſes, five hired Servants, and two Boys whom he bought, beſides the Marble, more Worth than all the reſt; the Whole valued at two thouſand five hundred Ducats. In this City he met with other *Mohammedans* returned from the Capital, who confirmed the former Reports. Hereupon he wrote forthwith, to acquaint *Ricci* of his Arrival: But the Superſcription of the Letter being written in *European* Characters, and the *Chineſes*, who carried them, not knowing either the *Chineſe* Names of the Jeſuits, or the Quarter where they lodged at *Pe-king*, could not deliver them. The next Year, at *Eaſter*, he ſent other Letters by a *Mohammedan*, who had fled from that City (for none may either go in, or out, without the Magiſtrates Leave) acquainting them with his Voyage and Situation, deſiring them to take ſome Courſe to free him from his Priſon, that he might return by Sea to *India* along with the *Portugueze*.

His Letters received. THE Jeſuits, who had long before been informed from *Goa* of his intended Journey, yearly expected him, and made much Enquiry of thoſe counterfeit Ambaſſadors; but could hear no Tidings of him. They were therefore rejoiced at his Letters, which they received in *November* following, and preſently diſpatched a Perſon, to bring him, if poſſible, to Court; not an *European*, leſt one Stranger ſhould hinder another; but a Native, by a *Chineſe* Mother, named *John Ferdinand*, a virtuous young Man, who had not yet performed his Noviciate. To him they joined a new Convert, well-acquainted with the Country. His Orders were, in caſe he could not bring *Goëz* thence by Leave of the Magiſtrates, or any other Means, to ſtay there with him, and write to the Company; who were then to try what they could do by their Friends at *Pe-king*.

Goëz in Diſtreſs, THIS Journey, of near four Months, was undertaken in a very ſevere Winter, they ſetting-out the eleventh of *December*. Mean-while *Goëz*, who ſuffered more Injuries from the *Mohammedans* in *So-chew*, than on the Road, was forced to ſell his Marble for twelve hundred Ducats, which was under half Price; wherewith he paid his Debts, and maintained his Family a whole Year. In the Interim the Karawân arriving, he ſoon run-out the Remainder of his Caſh, in the frequent Entertainments he was obliged to make for the Captain of it. This laid him under a Neceſſity of borrowing Money; and becauſe he was choſen into the Number of the ſeventy-two Ambaſſadors, he bought ſome Pieces of Marble, hiding an hundred Pounds of it in the Ground, to conceal it from the *Mohammedans*: For without that Commodity, he would have been debarred from going to *Pe-king* [a].

LET us now turn to *Ferdinand*, who had his Afflictions alſo: For his Servant run-away from him at *Si-ngan fû*, the Metropolis of *Shen-ſi* [b], carrying-away half what had been given him to bear his Charges. From thence, however, with much Fatigue, he got in two Months to *So-chew*, where he arrived the ſeventh of *March*, and found *Goëz* on his Death-Bed. The ſick Man, however, rejoiced at receiving the Letters from thoſe of his Society; but died eleven Days after, without having made auricular Confeſſion for ſo many Years; as to which, he relied on God's Mercy.

HIS Death was not without Suſpicion of Poiſon from the *Mohammedans* [c]; who, as ſoon as he departed, ſeized all that he left behind. Among the Things that were loſt, nothing is more to be regretted than his Journal, which he had kept in Detail of his Travels. This Book they were the more earneſt to get into their Hands, in order to prevent Payment of Debts there entered. They would have buried him alſo like a *Mohammedan*, if *Iſaac* and *Ferdinand* had not oppoſed them. *Goëz* was a Man of great Parts, and after his Admiſſion, had done great Service to the Society, but was not prieſted. He ordered *Ferdinand* to caution the Jeſuits not to truſt the *Mohammedans*, nor purſue this Road to *China*, as being unprofitable and dangerous.

As the Merchants, by a Cuſtom among themſelves, divide the Goods of all thoſe who die on the Road, they bound *Iſaac*, threatening to kill him if he would not invoke *Mohammed* [d]. Hereupon *Ferdinand* preſented a Requeſt to the Vice-Roy of *Kan-chew*; who wrote an Order under it to the Governor of *So-chew*, to examine the Affair impartially. He firſt was favourable; but corrupted by Bribes, threatened to whip the Complainant, and held him in Priſon three Days. However, not diſcouraged by this Treatment,

[a] *Purchas*, p. 315. *Trigaut*. lib. 5. cap. 13. [b] In the Original, by Miſtake, *Shan-ſi*. [c] This is an invidious Reflexion, common with Popiſh Zealots. [d] It ſhould be, turn *Mohammedan*.

Travels to Tibet.

he ſold his Garments for Want of Money, and continued the Suit five Months. All this While, as *Ferdinand* could not ſpeak *Perſian*, nor *Iſaac* either *Portugueze*, or *Latin*; they could not converſe together. When before the Tribunal, one ſaid the Lord's Prayer, the other repeated the Name of *Benedict Goëz*, with a few *Portugueze* Words: But nobody underſtanding either of them, the Judge thought they ſpoke in the Language of the Province of *Kanton* [a], and underſtood each other.

At length, in two Months, *Ferdinand* learned to ſpeak the *Perſian*. The *Mohammedans*, among other Things, pleaded that *Ferdinand* was a *Chineſe* by his Countenance, and *Iſaac* a *Saracen* [b]. In Anſwer to this Allegation, *Ferdinand* one Day aſſured the Court, that he was a mortal Enemy to the Law of *Mohammed*, which did he profeſs, he would, without doubt, abſtain from Hog's Fleſh: At the ſame Time pulling a Piece of Pork out of his Sleeve, he and *Iſaac* fell to eating it very heartily. Hereupon thoſe preſent ſet-up a loud Laugh: While the *Mohammedans* aſhamed, ſpat at the *Armenian*, ſaying, he was deluded by the *Chineſe* Cozener: For all the Way on the Road, to prevent Offence, *Benedict* and *Iſaac* had abſtained from Pork.

Introduction.

Thus the Effects of the Deceaſed were decreed to *Ferdinand*: But, after all, nothing was found, except the Pieces of Marble, which had been hidden under-Ground: Theſe they ſold to pay their Debts, and buy Neceſſaries for their Journey to *Pe-king*; whither, at length, both of them arrived. They brought a Croſs finely painted on gilt Paper, with the Paſſports of the Kings of *Kâſkar*, *Quotan*, and *Chalis*; which are kept for a Memorial.

Yet little recovered.

ISAAC related all theſe Paſſages to *Ricci*, upon Credit of his Memory, and a few Minutes of *Benedict*'s [c]. Having ſtaid a Month at *Peking*, he was ſent, by the uſual Road, to *Amakao* [d]. From thence, in his Voyage to *India*, he was taken by the *Dutch*: But being redeemed by the *Portugueze* of *Malakka*, he held-on his Courſe; and hearing of his Wife's Death, returned not to the *Mogol*'s Country, but ſtaid at *Chaul*, and was alive in 1615, when *Trigautius* wrote [e].

Iſaac *goes to* Pe-king.

CHAP. VII.

TRAVELS *through* Tibet, *to and from* China.

By ſeveral Miſſioners.

INTRODUCTION.

Road to China *through* Tibet *attempted, by* Andrada *the Jeſuit: His Relation cenſured.* Cheſaud *ſets-out: Is forced to return.* Grueber's *Travels, literary Account of them.*

Although *Goëz* was ſent expreſly to diſcover the Road to *China*, through *Little Bukhâria*; yet it does not appear the Jeſuits proſecuted that Deſign, probably for the Advice he left them to the contrary. However, about the Year 1660, *Amatus Cheſaud*, a *Frenchman*, Superior of the Reſidency of *Iſfâhân*, attempted to paſs thither through the Countries of the *Uzbeks* and *Turkeſtân*, but was deterred by the Difficulty and Danger of the Road. From that Time, none of the *Romiſh* Miſſioners have ventured to travel on that Side, although Karawâns are continually paſſing and repaſſing, with which the *Armenians* make no Scruple to aſſociate themſelves, and perform the Journey with Safety.

The above-mentioned Undertaking dying with *Goëz*, the Society turned their Thoughts

Through Tibet attempted,

[a] Although none were there who underſtood either *Latin*, or *Portugueze*; ſure there were enough among the *Mohammedans* who could ſpeak the *Perſian*. It ſeems, by this Account, that *Ferdinand* could not ſpeak the *Chineſe*. [b] The *Mohammedans* are every-where called *Saracens*, by this Author; which Term we uſe here only to avoid Repetition of the ſame Word. [c] There is ſome Room to believe, not only that the Diſtances of Places are often made greater than they are; but alſo, that the Places themſelves are not always ſet-down in their proper Order, ſome ſeeming to be placed after, which ſhould be before, others: And the rather, becauſe it muſt have been morally impoſſible for *Iſaac* to have retained the Diſtance and Poſition of ſuch a Number of Towns as are mentioned, exactly in his Memory, and it does not appear of what Nature, or Extent, the Minutes of *Goëz* were. [d] *Makau.* [e] *Purchas*, p. 316. *Trigaut.* lib. 5. cap. 13.

Introduction. next on opening a Way to *China* through *Tibet*: A Region, whoſe Inhabitants they were informed were Chriſtians, or at leaſt of a Religion nearly reſembling their own; and, conſequently, had ſo much the ſtronger Inducement to proſecute that Deſign, as they hoped to meet-with eaſy Converſions, a Thing they deſpaired of in *Mohammedan* Countries. Travellers mention two Ways of paſſing into *Tibet*; one the Northern-Road, by the North-Part of the *Mogol*'s Empire; the other Southern, through *Bengal*. In 1624, *Antony Andrada*, a *Portugueze* Jeſuit, attempted the Northern-Road, and penetrated as far as *Katay*, or *China*. In 1661, *Grueber* and *Dorville*, Jeſuits, travelled from *China* to *India*, through *Tibet*, taking the Southern-Road; with regard to which, *Tavernier* about the ſame Time procured ſome Informations. In 1414, *Deſideri*, another of the Society, paſſed into *Tibet* as far as *Laſſa*, by the Northern-Road: And, laſtly, in 1732, *Horace de la Penna*, with other *Capuchins*, went to the ſame Place, by the Southern-Rout.

By Andrada the Jeſuit, THESE are all the Travels to this vaſt Region that have appeared in Print. Thoſe of *Andrada* and *Cheſaud* are very ſhort, and contain nothing extraordinary. The firſt, it ſeems, made the Journey, on hearing that the People of *Tibet* were profeſſed Chriſtians. The Subſtance of his Relation is this: That he left *Lahor* in 1624, and having paſſed the *Ganges*, entered into *Skrinegar* [a] and *Chafaranga*, very great and populous Cities; in the laſt of which are many Monuments, he ſays, left by the Chriſtians: That from thence croſſing an exceeding high Mountain, on the Top of it he diſcovered a vaſt Lake, which gives Riſe to the *Indus*, *Ganges*, and the other great Rivers of *India*: That paſſing forwards through high Mountains, he arrived, after many Days Journey, at the City of *Redor*, in the cold Northern Region of the ſame Name: Laſtly, that from hence travelling through the Kingdoms of *Maranga* and *Tankhut*, ſubject to the *Tartars*, he in two Months arrived at *Kathay*, or *China*.

His Relation unſpared. *BENTINK*, in a Note on *Abulghâzi*'s *Genealogical Hiſtory of the Tartars*, ſays, he is ſure, that the Author of *Andrada*'s Letter, relating to the preſent State of *Tibet*, and Religion of the *Lamas* [b], never was in *Tibet*, in regard all he writes of that Country, is ſo contrary to what at preſent appears to be the Caſe; and that all he reports concerning the Worſhip of the *Lamas*, is taken from the Account which *Rubruquis* has given of certain Religious among the *Tartars*. It muſt be confeſſed, the Journal of his Travels is very ſuperficial; and beſides affording very little, if any, Light into the Geography of the Country, mentions Places, ſuch as the Kingdoms of *Redor* [c] and *Marango*, which do not appear to lie in the Northern-Road through *Tibet*: Nor is there any Lake there, which is the common Fountain of the Rivers above-mentioned; at leaſt the *Indus*, and all the other Rivers of *India*, except the *Ganges*, are known to have their Sources in *India* itſelf [d].

Introduction. THE Travels of *Cheſaud* ſeem to be more genuine than thoſe of *Andrada*, but are ſtill leſs to the Purpoſe: For he went no farther than the Borders of *Great Bukhâria*, and then turned back. The Account was ſent by the Author, in a Letter from *Kaſhan* near *Iſpâhân*, written in *Perſian* to *Kircher*, who has inſerted an Abſtract of it in his *China Illuſtrata* [e], to the following Effect: That a Year before he wrote the Letter, he travelled from *Sfahân* (or *Iſpâhân*) to *Bâlkh*; which, he ſays, is the regal City of *Uzbek* [f]; in order to ſee if it was practicable to paſs through that Country and *Turkeſtân*, to *Katay*, and thence to *China*: But that when he arrived in the Train of the *Uzbek* Ambaſſador, as far as the Bounds of *Kezalbaſh* [g], he found the Way to be both difficult and dangerous: That for this Reaſon he continued for ſome Months at *Hayrat* [h], formerly (he ſays) called *Skandria*, and there had a full View of the Place which the Ancients called *Bakhtra*, where there is a great Univerſity (built by the Son of *Tamerlang* [i], but going to Ruin) and many other Structures raiſed by the *Uzbeks*, when in Poſſeſſion [k]: That from *Hayrat* he came-back to *Maſhahad* [l], called by ſome *the Holy*; where there is a *Masjid* [m], adorned with Gold. Here he ſtaid two Months diſputing with the Learned, who are numerous, about their Law: That leaving this Place, he

[a] Perhaps, a Miſtake for *Serinegar*, or *Kaſhmîr*; but then that City lies on this Side of the *Ganges*. [b] Printed at *Paris* in 1629, with Permiſſion of the Society, and dedicated to the General of that Order. [c] Perhaps, *Redok*; which, as well as *Maranga*, is mentioned by *Grueber*. [d] Hiſtory of the *Turks*, *Moguls*, &c. p. 491. [e] *Ogilby* has given a Tranſlation in his *China*, vol. 1. p. 363. It has no Date. [f] It is only one of the Capitals of the three *Uzbek* Dominions in *Great Bukhâria*. [g] That is, of the *Perſian* Dominions called *Kezelbaſh*, or *Red-heads*, from their Turbans. See before, *p.* 639. Note d. [h] *Herat*, or *Heri*, Capital of the Province of *Khoraſân* in *Perſia*. [i] Or, *Timûr leng*, that is, *lame Timûr*; for *Tamerlan* was lame of one Leg. His Son, ſpoken of here, was, doubtleſs, *Shâh Rokh*, who ſucceeded him, and reigned at *Herat*. [k] The Author ſeems to miſtake *Timûr*, and his Deſcendants, for *Uzbeks*; which latter poſſeſſed *Khoraſân* but a very ſhort Space, under *Shaybek Khân*. [l] Or, *Maſhhad*, the ſame with *Tûs* in *Khoraſân*. See before, *p.* 443. Note i. In the Original written *Maxabad*. [m] Or, Temple, in *Kircher Meſquit*. The *Perſian* Word is *Meſkû*, whence Moſk.

came

Travels to Tibet.

came to *Nishapûr*, and then to *Sabazwar* [a], belonging to *Khoraſân*: Whence paſſing through the Cities of *Setam*, *Damgan*, and *Jamnam* [b], he proceeded to *Kaſhan*, in the Province of *Arakand* [c], the Way for the moſt Part ſandy; and thence to *Sfahân*, thirty *Farſang* diſtant.

Grueber's Travels.

THESE are all the itinerary Remarks which theſe two Authors afford: But *Grueber*, though not ſo particular as could be wiſhed, is much more copious. What relates to his Travels, is contained in five Letters, all written in *Latin* by himſelf; except the firſt, which is in *Italian*, from one anonymous Virtuoſo to another, ſetting-forth the Subſtance of a Converſation which he had [d] with our Jeſuit on the Subject of his Travels, and the Cuſtoms of the *Chineſes*; on which laſt the Diſcourſe chiefly turned. The ſecond is from *Grueber* to *John Gamans*, a Jeſuit at *Aſchaffenburg* in *Germany*; containing a brief Account of his Journey from *China*. The third, dated *December* 11, 1664, from *Dantzick*, is in Anſwer to ſeveral Queſtions put to him by ſome learned Nobleman, concerning *China*, and the *Tartars* who conquered it. The fourth is on much the ſame Subject, dated from *Breſlaw* in *Sileſia*, *March* 14, 1665. The laſt, containing the Subſtance of ſeveral Letters written by *Grueber* to *Kircher* [e], furniſhes the moſt particular Account of his Journey from *China* to *India*, gives the Latitudes of the chief Places obſerved by the Author, and is embelliſhed with Cuts drawn by him, repreſenting the Habits of the People, the *Great Lama*, *Putala*, *Buth* the ſlaying Youth, and other Remarkables in the Countries he paſſed through.

THESE Letters are publiſhed by *Thevenot*, in his *French* Collection of Voyages [f]: But he has omitted all the Cuts, which *Kircher* gives in his *China Illuſtrata*, and after him *Ogilby*. In the following Section we have incorporated the Remarks, contained in the ſeveral Letters, together; or making the Subſtance of that to *Kircher* the Text, ſupplied it with Notes from the reſt.

SECT. I.

Travels *from* China *to* Europe, *in* 1661. *By* John Grueber, *Jeſuit.*

Sets-out. Si-ning. *Great Wall: Account of it.* *Delightful Travelling in the great Deſart.* Koko Nor *Lake.* Kalmak Tartars: *Their Dreſs and Dwellings.* Laſſa, *or* Barantola. Gorroſhepûr *City.* *Way of travelling.* Nupal *Country.* *Mountains of* Naugrokot. *Women-Porters.* Bûtan, *or* Tibet.

Grueber. 1661.

THE Miſſioner ſet-out for *China*, as we conjecture, in the Year 1656. According to the firſt Letter, he went from *Venice* to *Smyrna* by Sea: From thence to *Ormuz* by Land, in five Months: From *Ormuz* by Sea, in ſeven Months, to *Makau*. There landing, he paſſed-through *China*, partly by Water, partly by Land, to *Pe-king*, in three Months [g]. He ſtaid in *China* three Years; in one of which, *viz.* 1660, he ſays, the fifty-ſix Jeſuits, who were then in that Empire, baptized more than fifty thouſand Men [h].

Sets-out.

IN his Return, he took a Road, never, perhaps, attempted by any *European* before. *Grueber* left *Pe-king* in the Month of *June* [i], 1661, in Company with *Albert Dorville*, of the ſame Society: In thirty Days he came to *Si-ngan fû* [k], and in thirty more to *Si-ning*, or *Si-ning fû* [l], croſſing the *Whang-ho*, or *Yellow River*, twice in the Way.

SI-NING is a great and populous City, built at the vaſt Wall [m] of *China*, through the Gate of which the Merchants from *India* enter *Katay*, or *China*. Here they ſtay till they have Licence from the Emperor to proceed forward. The Wall at this Place is ſo broad, that ſix Horſemen may run abreaſt on it, without embarraſſing each other. Here the Citizens of *Si-ning* take the Air (which is very healthful, coming from the Deſarts) and recreate themſelves with the Proſpect, as well as other Diverſions. There are Stairs to go a-Top of the Wall, and many travel on it, from the Gate at *Si-ning*, to the next at *Sochew*, which is eighteen Days Journey.

Si-ning. *Great Wall.* *Account of it.*

THIS they do by the Governor's Licence, out of Curioſity; having a delightful Proſpect all the

Delightful travelling in

[a] Alſo, *Niſhabur*, and *Sebzwar*. [b] Doubtleſs, *Baſtam*, *Damagan*, and *Semnan*, three Cities in the Road from *Niſhapûr* to *Kaſhan*. [c] By which muſt be underſtood the *Perſian Irâk*. [d] In Company with Signor *Carlo Dati*. [e] He tells us, in his third Letter, that on quitting *Rome* he left many geographical Remarks with *Kircher*, and that he was about publiſhing them in 1664. They were publiſhed in his *China Illuſtrata*, at *Amſterdam*, in 1667, in Folio. [f] Part 4, containing twenty-ſix Pages and a half. [g] *Grueber*, Letter 1. [h] The ſame, Letter 2. [i] In the ſecond Letter, he is ſaid to have ſet-out the thirteenth of *April*, ſent by the new Emperor (*Kang-hi*) as Mathematician of the Empire, Leave being procured by *Adam Schall*. [k] Capital of *Shen-ſi*. [l] A Miſtake for *Si-ning chew*, or *Wey*. In the ſecond Letter it is called *Ciniara*, a City ſeated at the Great Wall. [m] Not ſo, bnt ſeveral Miles diſtant. *Grueber* drew a Draft of the Wall, which is given by *Kircher*.

Travels to Tibet.

Way from the Wall, as from an high Tower, of a the innumerabe Habitations on one Side, and the various Kinds of wild Beasts, which range the Desart, on the other Side. Besides wild Bulls, here are Tigers, Lions, Elephants, Rhinoceroses, and Monoceroses, which are a Kind of horned Asses [a]. Thus the Merchants view the Beasts free from Danger; especially from that Part of the Wall, which running Southward [b] approaches the more inhabited Provinces of *Quang-si*, *Yunnan*, and *Tibet*: For at certain Times of the Year they betake themselves to the *Yellow River*, and Parts near the Wall, which abound with Thickets, in order to get Pasture, and seek their Prey.

The great Desart.

THIS Desart is partly mountainous, and partly level, all-over sandy and barren; excepting that in some Places you meet with little Rivulets, whose Banks yield good Pasture. It begins in the middle Part of *India*, and extends from South to North; but nobody ever yet hath discovered its Bounds, which many stretch to the frozen Ocean. *Marco Polo* calls this Desart *Lop*, and speaks of its being haunted with Spirits. But *Grueber* says nothing of them. The *Tartars* formerly called it *Beljan*, now *Samo*; the *Chineses*, *Kalmuk*; others *Karakathay* [c]. The *Tartars* accustomed to Desarts dwell here in Tents, removing, with their Cattle, where-ever they can find a River, or Place fit for Pasture [d].

Koko Nor Lake.

THE Road from *Si-ning*, as far as *Lassa*, is somewhat differently described, in different Letters. In the first we are told, that our Missioner passing-out of *China*, entered the Sands of *Desart Tartary*, which he crossed in three Days: Afterwards he came to the Banks of the *Koko Nor*, which signifies the *Great Sea*; being a great Lake, or Sea, like the *Caspian*, where the *Yellow River* has its Source [e].

LEAVING this Sea behind him, he entered into the Country of *Toktokay*, which is almost desart, and so barren, that it need fear no Invasion. One meets with nothing but some Tents of *Tartars* [f]. It is watered by the *Toktokay*, a very fine River, whence it takes the Name. It is as large as the *Danube*, but so shallow, that it may be forded every-where. *Grueber* 1661.

THENCE having crossed the Country of *Tangut*, he came to *Retink*, a very populous Province, belonging to the Kingdom of *Barantola*; where at length he arrived, whose capital City is called *Lassa* [g].

Kalmak Tartars.

ACCORDING to the fifth Letter, or *Kircher's* Abstract, we are told, that presently after they had passed the Great Wall, they found a River stored with Fish, on which they supped in an open Tent. Then crossing the Saffron River [h], they immediately entered that vast and barren Desart of *Kalmak*, inhabited by the *Kalmak Tartars* [i], who rove up and down it to rob the Karawâns, and at certain Seasons settle with their portable Cities on the Banks of the Rivers. The Jesuits often met with their Habitations in the Way, and drew their Figures, as represented in the Plate [k], *viz.* a *Kalmak* Man, cloathed with a Leathern Garment, and a yellow Cap: A *Kalmak* Woman, in a Habit made of a certain Skin, of a green or red Colour; each with a Charm about their Necks, to preserve them from Dangers: A *Lama*, that is, one of their *Tartar* Priests, or Bishops. They wear a white Coat, or Cloak, cast backwards, with a red Girdle; and a yellow Coat, from the Girdle of which hangeth down a Purse: Their Cap, or Hat, is painted red. In the Offskip are expressed their Habitations, being Tents made with small Sticks twisted, or plaited together, and covered with a coarse Woollen-Stuff [l], bound together with Cords. The Turning-Wheel is an Instrument like a Scepter, which the People turn-round while the *Lama* prays.

Their Dress and Dwellings.

Lassa, or Barantola.

FROM *Si-ning* they in three Months entered the Kingdom of *Lassa*, which the *Tartars* call *Barantola* [m]. The King is stiled *Teva* [n], descended from an ancient Race of the *Tangut Tartars*, and resides at *Butala*, a Castle built on a high Mountain [o], after the *European* Fashion, where he has a numerous Court [p]. The great Priest of this Country is called *Lama Konju* [q],

[a] In another Place of this Letter, it is said, no other Animals are found in this Desart, but wild Bulls of a mighty Bigness. [b] The Author mistakes here, for the Wall does not proceed South of *Si-ning*, nor touch that City, but ends twenty Miles to the West; nor can any travel from *Si-ning* to *So-chew* on the Wall; which besides being, on many Accounts, unfit for the Purpose, breaks-off in several Places for twenty or thirty Miles together. [c] These seem to be the Remarks of *Kircher*, mixed with those of *Grueber*, who could never have committed so many Blunders in so few Lines. The *Chineses* call it *Sha-mo*, the *Tartars Kobi*; both Words signifying a *sandy Desart*. *Kalmuk* is a Nickname, that comes from the *Mohammedan Tartars*. [d] Letter the fifth. [e] This is a Mistake: For the *Whang-ho*, or *Yellow River*, rises from other Lakes to the South-West. See before, *p.* 451. [f] In his second Letter, he says, he met with neither Man nor Bird, but many wild Beasts; and that they suffered extreamly in the Journey. [g] Letter the first. [h] Or, *Whang-ho*. [i] These are the *Eluths*, or *Tartars* of *Koko Nor*. [k] See Plate 54, *p.* 403. [l] Rather, Felt. [m] Letter the fifth. Misprinted *Baranteka*, in the second Letter. [n] Or, *Deva*, as in the fifth Letter; and *Tipa*, as others write. [o] See before, *p.* 456. [p] See before, *p.* 456. [q] For so *Sama Konjum* (as it is there faultily printed) is explained in the second Letter.

and

and adored as a God [a]. He reſides at *Barantola*, and is the Pope of the *Chineſes* and *Tartars*, called by them *God the Father*; whoſe Religion, in all eſſential Points, tallies with the *Romiſh*; although, ſays the Author, no Chriſtian ever was in the Country before [b].

HERE they ſtaid a Month, and might have converted many of the Natives, but for that deviliſh *God the Father* (as the Author calls him) who puts to Death ſuch as refuſe to adore him. However, they were kindly treated by the People and King, who was the Brother of that *God the Father* [c].

IN the Court of *Deva*, King of *Tanguth* [d], they ſaw a Woman born in *Northern Tartary*, dreſſed in an unuſual Habit: She wore Hair like knotted Cords, her Head and Girdle adorned with Cockle-Shells [e]. They ſaw, likewiſe, ſome Women no leſs ſtrangely dreſſed, who came from the neighbouring Kingdom of *Koin*. The Ladies braid or curl their Hair in the Manner of Hair-Laces, or ſmall Bands, and twiſt it behind them: On their Foreheads they wear a red Fillet, beſet with Pearls; and on the Top of their Heads a Silver Crown, bedecked with Turchoiſes and Coral.

GRUEBER drew the Pictures of the Grand *Lama* (taken from one hung at the Palace-Gate) and of *Han*, late King of *Tangut* [f]. This laſt, who had fourteen Sons, was for his Goodneſs and Juſtice reverenced as God. He was of a dark Complexion, his Beard of a Cheſnut Colour mixed with Grey, and his Eyes protuberant [g].

FROM *Laſſa*, or *Barantola*, they came in four Days to the Foot of the Mountain *Langur*; which being exceeding high, Travellers can hardly breathe at Top, the Air is ſo very thin; neither is it to be croſſed in Summer without great Danger from the Exhalations of certain poiſonous Herbs. Beſides, as no Waggons or Beaſts can paſs it for the Rocks and Precipices, they muſt proceed on-foot, almoſt a Month, till they come to *Kuthi*, one of the two chief Cities of the Kingdom of *Nekbal*. This mountainous Tract [h] is plentifully furniſh'd with Springs, both hot and cold, which iſſue from all Parts of the Mountain, affording Store of Fiſh and Paſture.

FROM *Kuthi*, in five Days, they came to the City *Neſti* [i], ſtill in *Nekbal*; where Proviſions are ſo plenty, that thirty or forty Hens are ſold for one Scutum.

FROM *Neſti* they came in five Days Journey to *Kadmendu* [k], the Metropolis of *Nekbal*, where reigns a potent King. Grueber. 1661.

FROM *Kadmendu*, in half a Day's Time, they came to the City *Nekbal*, called alſo *Baddan* by the Natives, the regal City of the whole Kingdom [l].

THE firſt Letter relates, that *Nekbal* is a Month's Journey in Extent, and has two capital Cities, *Katmandir* and *Patan* [m], ſeparated only by a River. The King called *Partaſmal* reſides in the firſt, and his Brother *Nevagmal* (a young handſome Prince) in the latter. He had the Command of all the Troops in the Country; and while *Grueber* was there, had a great Army in the Field, to oppoſe a petty King named *Varkam*, who made frequent Incurſions into his Dominions. *King* Partaſmal.

THE Jeſuit preſented this Prince with a Teleſcope; wherewith having diſcovered a Place where *Varkam* had fortified himſelf, he deſired the Prince to look that Way, which he did; and ſeeing the Enemy ſo near, cried, Let us march againſt them; not conſidering that their ſeeming Approach was the Effect of the Glaſs. It is not eaſy to expreſs how pleaſed he was with this Preſent [n]. He likewiſe gave the King other curious mathematical Inſtruments; with which he was ſo taken, that he determined not to let them go, but that they promiſed him faithfully to return. In that Caſe he promiſed both to erect a Houſe for their Uſe, endowed with ample Revenues, and grant them full Power to introduce the Chriſtian Law into his Kingdom [o]. *The Jeſuits Preſent.*

IN this Country, when a Man drinks to a Woman, the Company pour in the Liquor *Cha*, or the Wine, three Times for the Parties; and while they are drinking, affix three Pieces of Butter to the Brim of the Cup; which thoſe who pledge them take-off, and ſtick on their Foreheads. *Odd Cuſtoms.*

THEY have a moſt cruel Cuſtom in theſe Kingdoms; for when they judge their ſick People to be paſt Hopes of Recovery, they carry them into the Fields, and caſting them into deep Ditches full of dead Corpſes, there leave them to periſh; and their Bodies, when dead, to be devoured by Birds and Beaſts of Prey, eſteeming it an Honour to have living Creatures for their Tombs.

THE Women, out of a religious Whim, never waſh, but daub themſelves with a naſty

[a] See before, *p.* 459. d. [b] Letter the firſt. [c] Letter the ſecond. [d] So *Barantola* is called here. [e] This was a Woman of *Khamil*, or *Hami*. See Plate 55, *p.* 456. [f] See Plate 61, *p.* 460. [g] *Grueber* has given other Cuts relating to *Tibet*; which, with their Deſcriptions, have been already inſerted. [h] See Plates 56, 57, 58, and 59. [i] *Kircher* ſuppoſes this to be the *Parapaniſus* of *Ptolemy*, and *Belor* of *Polo*; in which laſt Conjecture, at leaſt, he is very much miſtaken. [k] This, and *Kuthi*, are ſaid a little lower to be the two chief Cities of *Nekbal*. [l] In the firſt Letter called *Katnandir*. [m] Letter the fifth. [n] This muſt be *Baddan*, or *Nekbal*, in the fifth Letter: But there is a great Diſagreement between the two Letters with regard to its Diſtance from *Katmandir*. [o] Letter the firſt. [p] How came they to neglect ſo favourable an Offer?

Kind

Travels to Tibet. Kind of Oil; which not only causes them to stink intolerably, but renders them extremely ugly and deformed.

Kingdom of Maranga. FROM *Nekbal*, in a Journey of five Days, you meet with the City *Hedonda* [a], a Colony of the Kingdom of *Maranga*, inclosed in *Thebet*. Its Metropolis is *Radok* [b]. From the Names of *Dominic*, *Francis*, and *Anthony*, still in Use with the Natives [c], it appeared, that Christianity had been planted there in Times past [d].

IN the first Letter we are told, that in *Maranga* he saw no Towns, but only Houses, or rather Huts made of Straw, and among them a Custom-house. The King pays yearly to the Great *Mogol* a Tribute of two hundred and fifty thousand Rixdollars, and seven Elephants [e].

Mogol's Empire. FROM *Hedonda* (crossing the Kingdom of *Maranga*) in eight Days, they came to *Mutgari*, the first City of the *Mogol's* [f] Empire.

FROM *Mutgari* is a Journey of ten Days to *Battana* [g], which is a City of *Bengala* on the *Ganges*.

FROM *Battana*, in eight Days, they came to *Benares*, a populous City on the *Ganges*, famous for an Academy of the *Brachmans*, where Persons are instructed in their Religion and Sciences.

Came to Agra. FROM *Benares*, in eleven Days, they came to *Kataimpor*, and from thence, in seven more, to *Agra* [h]: So that from *Pe-king* thither was a Journey of two hundred and fourteen Days; but reckoning the Time which the Karawâns rest, it will come to about fourteen Months. Here *Dorville*, the Companion of *Grueber* in his Travels, died [i].

THE Author's Travels from *Maranga* is related, with some Variation, in the first Letter. It is there said, that from thence he entered *India*, and came to *Minapor*, the Metropolis of the Country, where he crossed the *Ganges*, twice as broad as the *Danube*. Thence he travelled to the City *Patan*; and from *Patan*, in twenty-five Days, to *Arga*, the chief royal Seat of the *Mogols* Empire, eleven Months after he had left *China*.

Returns to Europe, THIS first Letter furnishes us also with an Account of his Travels from *Agra* to *Europe*, and several other Particulars not to be met with in *Kircher's* Memoirs. From *Agra* he got, in six Days, to *Deli*; and from *Deli*, in fourteen, to *Lahor*, on the *Ravi*, which is as broad as the *Danube*, and falls into the *Indus*, near *Multan* [k]. At this last Place he embarked on the *Indus*, and in forty Days fell down to *Tata*, the last City of *Indostan*, and Residence of a Vice-Roy, called *Laskartan*. Here he found many *English* and *Dutch* Merchants. From thence sailing to *Ormuz*, he landed; and passing through *Persia*, *Armenia*, and *Asia Minor*, came to *Smyrna*; where putting again to Sea, he arrived first at *Messina*, and then at *Rome*, fourteen Months after he had left *Agra*.

HE had not been long at *Rome* before he received Orders to return to *China*. Accordingly he went into *Germany*, and from thence to *Poland*, with a Design to cut-out another new Road through *Russia*; having, by the Emperor's Means, obtained Passports from the Dukes of *Courland* and *Moscovy*: But when he arrived on the Borders of *Russia*, News came, that the King of *Poland*, in Conjunction with the *Tartars*, had invaded the Grand Duke's Dominions. Fearing therefore that it would be difficult to get to *Moskow*, called by the *Tartars*, *Stoliza*, he thought it best to return to *Venice*, which he did just at the Time when the Emperor was sending Count *Lesly* on an Embassy to the Port. In the Train of this Lord he travelled to *Constantinople*, designing to take his Way through *Natolia*, *Persia*, and the *Indies*. But on his Arrival was seized with a violent Flux, and Pains in the Stomach; so that being unable to proceed, he returned by Sea to *Leghorn*, and thence to *Florence*. Here his Disorder abating, he repaired to *Venice*, in order to pass through *Friuli* to *Vienna*, and so to *Constantinople*, once more to attempt getting to *China* by that Road. (But how he succeeded, we do not find.)

THE Author, in 1665, when he set-out on his Return to *China*, was about forty-five Years of Age, of an affable Temper, and extremely civil, joining to other good Qualities the *German* Sincerity, which rendered his Conversation perfectly agreeable [l]. The Variations found in the Letters from whence we have collected our Materials, seem to be owing to the Defects of the Author's Memory, and Mistakes of those who took the Relation from his Mouth. With Regard to the *Chinese* and *Tartars*, he has explained some Things more fully than other Authors have done, as well as related others in a different Manner.

WE ſhall add, by Way of Supplement, the Information which *Tavernier* received from the Merchants in *Bengal* concerning this Southern Road through *Tibet*.

THE Kingdom of *Bûtân*, whence comes the Muſk, Rhubarb, and ſome Furs, is a Kingdom of great Extent: But *Tavernier* could never come to a perfect Knowledge thereof. He obſerves, that the Karawân is three Months travelling from *Patna*, in *Bengal*, to the Kingdom of *Bûtan* [a]. It ſets out about the End of *December*, and, eight Days after, arrives at *Gorroſhepûr*, the laſt City in the *Great Mogol*'s Dominions.

FROM *Gorroſhepûr* to the Foot of the high Mountains is eight or nine Days Journeys more. As the Country is nothing but wide Foreſts, full of wild Elephants, the Merchants ſuffer much: For inſtead of taking their Reſt, they are forced to watch, keep Fires, and ſhoot-off their Muſkets all Night long: Otherwiſe, the Elephant, who makes no Noiſe in treading, would be upon the Karawân before they were aware; not that he comes to hurt the Men, but to get what Victuals he can find.

YOU may travel from *Patna* to thoſe Mountains in *Palleki's*. But they uſually ride upon Oxen, Camels, or Horſes, bred in the Country. Theſe laſt are generally ſo little, that when a Man is on the Back of them, his Feet touch the Ground; but they are very ſtrong, and will travel twenty Leagues together without baiting. Some of them coſt two hundred Crowns: For, indeed, the Roads over the Mountains are ſo narrow and rugged, that you can make Uſe of no other Sort of Carriage.

FIVE or ſix Leagues beyond *Gorroſhepûr* you enter into the Territories of the *Raja* of *Nupal* [b], which extend to the Frontiers of *Bûtân*. This *Raja* pays every Year to the Great *Mogol* an Elephant for his Tribute. He reſides in the City of *Napul*, from whence he derives his Title: But there is little of either Trade or Money in his Country, which is all Woods and Foreſts.

THE Karawân being arrived at the Foot of the Mountains of *Naugrokot* [c], abundance of the Inhabitants, chiefly Women and Maids, repair thither, in order to carry the Merchants and their Goods acroſs the Mountains, which is eight Days Journey more. There are three Women to carry one Man, relieving one another by Turns. They have upon each Shoulder a woollen Roll, to which is faſtened a large Cuſhion, that hangs down their Backs, upon which the Merchant ſits. Their Luggage and Proviſions are laid on the Back of Goats, which carry an hundred and fifty Pound Weight a-piece. They who chuſe to ride, are, in many Places, forced to have their Horſes hoiſted-up with Cords. They never feed them but Morning and Evening. Their Morning Fare conſiſts of a Pound of Meal, half a Pound of brown Sugar, and half a Pound of Butter, mixt together with Water. In the Evening they muſt be contented with a few flat Peaſe bruiſed, and ſteeped half an Hour in Water. The Women Porters get for their ten Days Travel two Roupies a-piece; the ſame alſo for every loaded Goat, and every Horſe which they lead. Deſideri. 1714. *Women Porters.*

AFTER you have paſſed the Mountains, you may travel to *Bûtân* upon Oxen, Camels, Horſes, or in *Palleki's* [d]. Thus far from *Tavernier* concerning the Road to *Bûtân*: What he relates with reſpect to the Inhabitants, and Trade of the Country, has been already inſerted [e]. Butan, or Tibet.

SECT. II.

TRAVELS *into* Tibet *in* 1714.

By Hypolito Deſideri, *an* Italian *Jeſuit.*

Now firſt tranſlated from the French.

Author leaves Goa. *High Mountains, difficult to croſs. Fertile Spots. Comes to* Kaſhmîr. *News of* Tibet. *Enters* Great Tibet. *Horrible Mountains: Dreadful Travelling. Arrives at* Leh, *or* Ladak. *Air, Soil, Inhabitants: Believe in a Trinity: Saints and Images: Other Reſemblances. Viſits the* Grand Lama: *Searched for Jewels. A third* Tibet: *Comes to* Laſſa: *Admitted to Audience: Favourably received.*

THE Account of this Journey into *Tibet* was written in *Italian* by the Author to *Ildebrand Graſſi*, another Miſſioner of the ſame Society and Nation, then reſiding in the Kingdom of *Mayſſur*, in the Peninſula of *India*, on this Side *Ganges*. The Letter is dated from *Laſſa*, the tenth of *April*, 1716. N. S. A *French* Tranſlation of it is inſerted, by *Du Halde*, *Introduction.*

from accurate, and brings that of the other Places under the ſame Suſpicion. *Ogilby* has twenty Minutes inſtead of ten; as it is in *Thevenot*. [a] *Butan* is *Tibet*. For a Deſcription of the Muſk, Rhubarb, &c. from this Author, ſee *p.* 457. [b] Perhaps, the ſame called in *Grueber*'s Journal, *Nekbal*; and in *Deſideri*'s, *Nepal*. [c] They are nineteen Stages, or Days Journey, from *Patna*. [d] *Tavernier*'s Travels, Part 2. p. 183. [e] See before, *p.* 456, & *ſeqq.*

Travels to Tibet.

in the fifteenth Tome of the *Lettres Edifiantes & Curieuſes*, &c. containing twenty-ſix Pages [a], in Twelves, large Print. The Relation, as thoſe of the Miſſioners commonly are, is very ſuperficial. It gives you neither a regular Journal of the Road, nor Deſcription of the Country and Inhabitants, but only certain looſe, imperfect Remarks; which, however, are of no ſmall Uſe, conſidering how little we know of *Tibet*. On this Occaſion the Reader will, doubtleſs, be ſurprized to ſee that the Jeſuits, who have been ſo long in *China* and *India*, between which that vaſt Region lies, ſhould not be able to give a better Account of it than what is to be found in the Reports of this Author, and his Succeſſor, *Horace de la Penna*.

Author leaves Goa.

DESIDERI having been appointed for the Miſſion of *Tibet*, left *Goa* on the twentieth of *November*, 1713, and came to *Surât* on the fourth of *January*, 1714. Having ſpent the Time he ſtaid there in learning the *Perſian*, the twenty-ſixth of *March* he took the Road for *Delhi* [b], where he arrived the eleventh of *May*: There he found *Manuel Freyre* deſtined to the ſame Miſſion, for which they both ſet-out the twenty-third of *September*, and got to *Lahor* the tenth of *October*. From thence departing on the nineteenth, they, in a few Days, came to the Foot of *Caucaſus*, which is a long Chain of very high and ſteep Mountains. After paſſing one, you find a ſecond higher than the firſt; that is followed by a third; and the more you aſcend, the more you have to aſcend, till, at laſt, you come to the higheſt of all, called *Pir-Panjal*. The *Gentiles* have a profound Reſpect for this Mountain; where they bring Offerings, and worſhip a venerable old Man, who, they ſay, is appointed to guard the Place. This the Author takes for granted to be the Remains of the Fable of *Prometheus*, whom the Poets feigned to have been chained to *Caucaſus* [c].

High Mountains

Difficult to croſs.

THE Top of the higheſt of theſe Mountains is always covered with Snow and Ice. They were twelve Days paſſing them on-foot, croſſing with incredible Trouble the Torrents made by the melted Snow; which ruſh over the Stones and Rocks with ſuch Violence, that *Deſideri* was often forced to lay-hold of an Ox's Tail, to prevent being carried away with the Current. He likewiſe ſuffered extremely from the Cold, for want of providing proper Cloaths for the Journey.

Fertile Spots.

THIS Mountain Country, though otherwiſe ſo frightful, yet, in ſeveral Parts, appears very agreeable, from the Multitude and Variety of Trees, Fertility of the Soil, and many Habitations that occur: For here one meets with ſome ſmall Territories, whoſe Princes are dependent on the Great *Mogol*; nor are the Roads ſo bad, but that Travellers may paſs them either on Horſeback, or in a *Jampan*, which is a Kind of *Palankin* [d].

THE tenth of *March* they arrived at *Kaſhmîr*, where they were obliged to ſtay ſix Months, becauſe the prodigious Quantities of Snow which fell in the Winter had ſhut up the Paſſages. Here *Deſideri* was reduced almoſt to the laſt Extremity, by a Diſtemper cauſed, as he judged, by the Fatigues he had undergone. However, he continued to learn the *Perſian*, and make Enquiries concerning *Tibet*: But after all his Pains, he could then find out but two Countries of that Name; one called *Little Tibet*, or *Baltiſtan* [e], a few Days Journey from *Kaſhmîr*, extending from the North towards the Weſt; whoſe Inhabitants and Princes are tributary to the Great *Mogol*. But there is no Buſineſs there for the Miſſioners, long Experience having convinced them, that they can reap but little Fruit in Countries, where, ſays the Author, the impious Sect of *Mohammedans* prevails.

THE ſecond *Tibet*, named *Great Tibet*, or *Bûtan*, extends from the North towards the Eaſt, and lies a little farther from *Kaſhmîr* than the other. The Road, which lies through narrow Paſſages, is frequented by Karawâns, which go thither every Year for Woollen. The firſt ſix or ſeven Days Journey is tolerable; but afterwards the Roads grow very difficult, occaſioned by the Winds, the Snow, and the extreme Cold: Yet one is obliged to lie at Night on the bare Ground; ſometimes, even on the Snow or Ice.

GREAT TIBET begins at the Top of a frightful Mountain named *Kantel*, all covered with Snow; one Side of it belongs to *Kâſhmîr*, the other to *Tibet*. They left *Kaſhmîr* the ſeventeenth of *May*, 1715, and were forty Days in travelling to *Leh*, called alſo *Ladak*, where the King of *Great Tibet* reſides; which Journey they performed on-foot. The thirtieth, being *Aſcenſion-Day*, they paſſed the Mountain, that is, entered *Tibet*. The Road lay through the Mountains, which are a true Image of Horror. They are heaped one upon another, and ſo cloſe together, that they are ſcarce ſeparated by the Torrents,

[a] It begins, *p.* 183. [b] *Dehli*, or *Delli*, in the *Mogol*'s Empire. [c] It is, doubtleſs, on this weak Ground, that *Deſideri* has given the uncertain Name of *Caucaſus* to this Chain of Mountains, omitting the modern Name, which would be certain, and of infinite more Uſe. Such Abſurdities, which in Authors are very common, only diſcover their Ignorance, while they would ſhew their Learning, and perplex inſtead of clearing up Geography. *Bernier*, in his Memoirs, Part 4, p. 81, 101, & *ſeqq.* ſpeaks of this old Man and *Pir-Panjal*. [d] *Lettres Edif.* tom. 15, p. 183, & *ſeqq.* [e] Perhaps for *Bolâdeſtân*, that is, *the Mountain Country*. See before, *p.* 452.

Torrents, which dash against the Rocks with a Noise enough to daunt the most hardy Travellers.

THE Top and Bottom of the Mountains being impassable, one is obliged to proceed along the Sides of them; and the Way is so narrow, that there is scarce Room to set one's Foot; hence great Caution must be used: For the least false Step tumbles you down the Precipices, where you run the Risk of losing your Life, or at least of breaking your Limbs; as happened to some b of the Karawân: For there is not a Bush, or Blade of Grass to catch at, which might save your Fall. In passing from one Mountain to the other, you find no other Bridges over the Torrents, than some narrow, quaking Plank, or Cords stretched across, and interlaced with green Boughs. Nay, often you are obliged to put-off your Shoes, that you may tread with less Danger.

THE very Thoughts of those Passes made the Author tremble: Not to mention the other Inconveniences before-mentioned, relating to the Weather, and Manner of resting at Night. Add to this, the Necessity they were under of feeding on the Flour of *Sattû*, a Kind of Barley, which they commonly boiled; though the Natives eat it crude, when they could find a little Wood to dress it. To increase their Misery, the Reflexion of the Sun from the Snow almost blinded them: So that *Desideri* was obliged to cover his Eyes, leaving only a small Opening d sufficient to see his Way. Lastly, every two Days they met with Custom-House Officers; who not content with the usual Duties, demanded what they thought fit [a].

IN these mountainous Countries one finds no large Towns, nor any Money, but that of the *Great Mogol*, each Piece being worth five *Roman Julio's*; Trade being generally carried-on by Exchange of Commodities.

THEY arrived, the twenty-fifth of *June*, at e *Leh*, or *Ladak*; which is a Fortress where the *Ghiampo*, or King, resides; who is absolute, and named *Nima Nanjal*. He has under him a tributary King. The first Settlements one meets with are *Mohammedan*; the rest are inhabited by *Pagans*, who are less superstitious than the Natives of other idolatrous Countries.

THE Climate in *Tibet* is very rough, Winter reigns almost all the Year round; the Tops of Mountains are continually covered with Snow. f The Soil produces nothing but Corn and Barley. One sees neither Trees, Fruits, nor Plants. Their Houses are small and narrow, made of Stones heaped one upon another, without any Art. The Inhabitants go cloathed with Woollen-Stuffs. They are naturally of a mild and tractable Disposition, but ignorant, and unpolished; having neither Arts nor Sciences among them (although they do not want Genius) nor any Correspondence with foreign Nations. Desideri. 1715.

As to their Religion, they call God *Konchok*, and seem to have a Notion of the Trinity: For sometimes they name him *Konchok-chik*, or *the One God*: At other Times, *Konchok-sum*, or *the Trine God*. They use a Kind of Beads, on which they repeat *Om*, *ha*, *hum*. *Om*, they say, implies *Intelligence*, or *the Arm*, that is, Power; *Ha*, *the Word*; and *Hum*, *the Heart*, or *Love*; and that these three Words signify *God*. They adore also one called *Urghien*, born about seven hundred Years ago. When asked if he be God, or Man, some answer, that he is both: That he had neither Father, nor Mother, but was produced by a Flower. However, their Statues re- c present a Woman with a Flower in her Hand; who, they say, is *Urghien*'s Mother. *Believe in a Trinity.*

THEY worship several other Persons, whom they consider as Saints. In their Churches there is an Altar covered with a Cloth, and Ornaments; in the Middle of which is a Kind of Tabernacle, where, according to them, *Urghien* resides; though at the same Time they affirm he is in Heaven. For the rest, they reject the Transmigration of Souls, and do not admit Polygamy: Nor is any Sort of Meats prohibited among them; three Articles in which they differ widely from the idolatrous *Indians*. *Saints and Images.*

THEIR Religious are called *Lamas* [b], and our Missioners were considered as *Lamas* of the Christian Law by the King, and several of his Court; who observing them to recite their Office, had the Curiosity to look at the Books which they read in, and eagerly enquired what the Pictures represented which they found there. After they had examined them, they said *Nuru*, that is, *very well* [c]: They added, that their Book was like that of the Missioners; but *Desideri*, it seems, could not believe it. He allows many of them can read their mysterious Books, but affirms none understand them [d]. They often wished he was skilled in their Language, or they in his, that they might hear him explain his Religion. This, which could be nothing but Curiosity, the Author would impose as a Proof, f that they were ready to embrace the *Romish* Faith [e]. *Other Resemblances.*

TWO Days after their Arrival at *Ladak*, the Missioners went to visit the *Lompo*, who is the first Person next the King, and called his right *Visit the Grand Lama,*

[a] *Lettres Edif.* p. 187, *& seqq.* [b] An Account of them, from this Author, is given before, *p.* 454. [c] They approved of Things which they used themselves in Worship. [d] How could he know this, who was ignorant of their Language, as he confesses in the same Breath? [e] *Lettr. Edif.* p. 194, *& seqq.*

Travels to Tibet. Arm. The second of *June* they had their first Audience of his Majesty, who received them sitting on his Throne. The fourth and eighth they were sent for again, and treated with more Familiarity. The sixth they visited the *Great Lama*, who was accompanied with several other *Lamas*, one of whom was a near Relation of the King's, another the *Lompo*'s Son. They were received very politely, and presented with several Refreshments, according to the Custom of the Country.

Searched for Jewels. THESE Honours and Testimonies of Friendship, however, did not secure them against Trouble. Some of the *Mohammedan* Merchants, who came from *Kashmîr* to trade for Wool, either through Jealousy, or Hatred of the Christian Name, told the King and his Minister, that the Missioners were rich Merchants, who brought with them Pearls, Diamonds, Rubies, and other precious Commodities. This was enough to bring Vexations upon them. They were presently visited by a Messenger from the Court, who having searched their Lodging, carried-away with him a large Basket, and a Leathern Purse, wherein they kept their Linen, Books, several Writings, some Instruments of Mortification, Beads, and Medals. The most credulous Papist can scarce be supposed stupid enough to believe, that this King was more pleased to see such Trumpery, than Pearls and Diamonds, which he expected: Yet the Jesuit, true to the Cause of Lying and Imposture, has the Front to affirm that Prince declared so much.

A third Tibet. *DESIDERI* had already begun to learn the Language, in Hopes of fixing his Abode in this Country; when he came to learn, that there was a third *Tibet*. After several Deliberations, it was resolved, contrary to his Inclination, to go and make the Discovery. This is a Journey of about six or seven Months, through desart, and uninhabited Places. This third *Tibet* also is more exposed to the Incursions of the *Tartars*, who border on it, than the other two.

Come to Lassa. THEY departed from *Ladak* the seventeenth of *August*, 1715; and arrived at *Lassa* the eighteenth of *March*, 1716. They suffered greatly in the Way, travelling through the Midst of Snow, Ice, and excessive Cold, which reigns in those Mountains. Soon after their Arrival, they were cited to appear before certain Tribunals, about a troublesome Affair [a]. As they passed-by the Palace, the King, who was in a Balcony with one of his Ministers, asked who they were. That Lord, who was a Person of great Probity, and knew their Case, took that Occasion to apprize his Majesty of the Injustice which was done them. Hereupon the King sent for *Desideri* immediately, and gave Orders, that they should give-over vexing them.

SOME Days after paying a Visit to the same Minister, he asked our Jesuit, why he had not been yet introduced to the King? His Answer was, that he had nothing fit to make a Present of to so great a Monarch. This Excuse not serving, he was obliged to repair to the Palace; where in the Hall he found above an hundred Persons of Distinction, who demanded Audience. Presently two Officers came, and having taken a List of their Names, carried it to the King; who immediately ordered *Desideri* to enter along with a great *Lama*. The *Lama*'s Present was considerable; the Jesuit's but trifling: Yet the Prince caused his to be brought from the Door, where the other was left (according to Custom) and to shew how well satisfied he was with it, kept it near him; which is a singular Mark of Distinction at this Court. Then ordering the Missioner to sit opposite to him, and very near his Person, talked to him for near two Hours, without speaking a Word to any other present. But *Desideri* had no Opportunity all the While to put in a Syllable, in Behalf of either his Religion, or Mission thither. In short, the King, after speaking in his Commendation, dismissed him.

THIS Prince is a *Tartar*, who some Years before conquered *Tibet*, which is not far from *China*: For they reckon but four Months Journey from hence to *Pe-king*; whither an Ambassador, who lately arrived from that Court, was returned [b].

SECT. III.

An Account *of the* Commencement, *and* present State *of the* Capuchin Mission *in* Tibet, *and two other neighbouring Kingdoms, in the Year* 1741.

By Friar Horace della Penna, *Prefect of the Mission.*

Missioners set-out: Reception by the King, and Grand Lama: *Allowed to preach. The King's Passport: His Letter to* Horace. Grand Lama's *Letter: The Prime-Minister's. Supply of Missioners. The King's Edict, recommending Popery as the true Law. The King's Stedfastness. The* Lama's *Licence. Some Conversions made. King of* Batgao, *his Licence to preach. King of* Battia *infatuated: Letter to the Pope, who sends Missioners, and applies to the Public. Objections: The first: The second: The third: The fourth. Similar Hierarchies. Female Polygamy. The fifth.*

[a] Why is the Cause concealed?

[b] *Lettr. Edif.* p. 202, *& segg.*

THIS

Introduction. THIS Relation, which was publiſhed at *Rome* in 1742 [a], was not written in the Form it appears, by Friar *Horace*, but dreſſed-up by the Procurator-General, or the Congregation *de propaganda*, from the Account he gave them by Word of Mouth, or Writing, of the State of *Tibet*, and Succeſs of his Miſſion. As on one Hand *Horace* ſeems to have impoſed on them, in many Things; ſo, on the other, there is no Doubt but they, in their Turn, have impoſed on thoſe for whom the Memoir was deſigned, namely, Perſons of Figure and Wealth, who were beſt able to give Aſſiſtance to this new Miſſion. They judged, that the ſureſt Way to obtain their Ends, was to repreſent *Tibet* in great Meaſure already converted, and that nothing was wanting to compleat the Work ſo ſucceſsfully begun, but a ſufficient Number of Miſſioners. It is thus only that the glaring Improbabilities, which appear in this Tract, can be accounted for, which we have taken Notice of elſewhere: And as we have likewiſe inſerted already from thence the little which it affords, concerning the Country and Inhabitants of *Tibet* [b], we ſhall confine our Abſtract chiefly to Matters concerning the Miſſion, and other Occurrences.

CLEMENT XI. conſidering, that the Inhabitants of *Tibet* (little known to the Moderns) where St. *Thomas* preached the Goſpel [c], were at preſent all *Pagans*, reſolved, in the laſt Year of his Popedom, to ſend thither twelve *Capuchins* of the Province *della Marca*, in the Eſtates of the Church, under *Francis Horace della Penna*, as Prefect; with Orders to enquire into the State of that Kingdom, and ſee how a Miſſion might be introduced for preaching the Faith, and converting the Natives. After a tedious and fatiguing Journey, the Miſſioners at length arrived at the Capital, taking the Road from the *Great Mogol*'s Empire through the Kingdoms of *Battia* and *Batgao*: But for Want of a regular Correſpondence, ſeveral Years paſt, without hearing any Thing from them. Mean-time nine of the twelve died, and the Prefect returning to *Rome*, gave an Account, that the other three were rendered unfit for Service, either through Age, or the Hardſhips they had ſuffered. He ſaid he was ſent by the King of *Tibet*, to ſolicit for more Miſſioners, and to ſettle a Method of correſponding by Letters, as well as receiving yearly the Supplies neceſſary for the Support of the Miſſion.

Horace de la Penna. 1741.

HORACE, and his Companions, having been preſented to the King, and a *Great Lama*, they were received with a Benevolence natural to thoſe People: And his Majeſty having heard the Reaſon of their coming into his Dominions, ordered the Prefect to deliver him, in Writing, an Account of the Law which he propoſed to preach. The *Lama* did the ſame, and *Horace* having obeyed their Commands, waited on the King ſome Days after, to know his Opinion of the Doctrines contained in the Memoir. "*Lama*, ſays he, Know that the Law profeſſed by "me, and my Subjects, has always appeared "good to me, as having been bred in it: But, "I confeſs, yours ſeems better." The *Capuchin*, on ſo good Encouragement, made a bold Puſh, and deſired his Majeſty not only to embrace a Religion which he approved of, but to oblige his whole Kingdom to do the ſame. The King (who, doubtleſs, did not expect ſo haſty a Summons) anſwered, that it was not Time for that yet; bidding him, and his Companions, in the mean While, to learn the Language, and teach their Law.

Reception by the King,

HORACE, after this, went to the *Lama*, to know what he thought of the Matter. But the Pontiff, it ſeems, more reſerved than the King, gave him his Objections in Writing [d], and deſired his Solution. The Friar went to Work without Delay, and having drawn-up an Anſwer, carried it to the *Lama*; who only ſaid, he would examine it, and then talk to him about the ſame. However, as he obſerved their Humility and Diſintereſtedneſs (which, by the Way, Friars know well how to counterfeit on Occaſion) he ſhewed an extraordinary Love and Kindneſs to them. He likewiſe recommended to them the learning of the Language; which that they might do the more effectually, the King put them into the Hands of a *Lama* Monk, much eſteemed at Court. He likewiſe gave them Permiſſion, confirmed by Edict, to build a Church and Houſe, forbidding any Perſon to moleſt them, and ordering his Miniſters to protect them, and require no Tribute of them. Theſe Favours from the Heads both of the State and Church, procured them the Reſpect of all the great Men in the Capital [e].

And Grand Lama,

Allowed to preach.

[a] Under the Title of *Relazione del Principio é Stato preſente della Miſſione del vaſto Regno del Tibet, ed altri due Regni Confinanti, raccommandata alla Vigilanza, é zelo de Padri Cappucini, della Provincia della Marca nello Stato della Chieſa. In Roma, nella Stamperia di Antonio de Roſſ.* 1742. *Con licenza de Superiori.* It is in ſmall Quarto, and contains twelve Pages. The Tranſlation is inſerted in the fourteenth Tome of the *Nouvelle Bibliotheque, ou Hiſtoire Literaire*; with judicious Remarks by the Journaliſt. [b] See before, *p.* 458, *& ſeqq.* [c] This Account of the Origin of the Miſſion is taken from the Memoir itſelf. [d] To have given the Reader a right Idea of this remarkable Affair, the Friar's Syſtem of Doctrines, and the *Lama*'s Objections, ought to have been ſet-forth in the Memoir. [e] *Nouv. Bibl.* tom. 14. p. 48, *& ſeqq.*

Miſſion to Tibet.

THIS Region is ſo vaſt, that the Inhabitants amount to no fewer than thirty-three Millions. They are very tractable, and of an amiable Diſpoſition. Although they are all *Gentiles*, yet they have, and confeſs, both in the Names and Form, many Things which the *Romaniſts* retain, and profeſs in their Religion [a].

The King's Paſſport,

HORACE being ready to return to *Europe*, to execute the King's Commands before-mentioned, received from him the following Paſſport. "From *Laſſa*, the Place of Excellence and Reſidence of the King, Be it known to all our Subjects, Miniſters great and ſmall, who dwell on the Road to the Kingdom of *Niverri*, Weſtward, That the *European Lama* having come to *Laſſa*, Capital of the rich Kingdom of *Tibet*, to aid and do Good to all People; and being to return to the ſaid Kingdom of *Niverri*, No Tax-gatherer is to demand any Duty of him.—We order, that nobody do him any Injury; but that all aſſiſt him in his Paſſage.—From our Palace of *Khaden Khagn San*, this Year *Chilvimo Khagn*, that is, *of the Region of the Water*, the twenty-third of the Moon," which anſwers to the ſeventh of *Auguſt*, 1732.

His Letter to Horace,

HE had Orders, when he had got to *Nepal* [b], Capital of the Kingdom of *Batgao*, to write to the King, and firſt Miniſter of State, to let them know how he did. This he performed, and received Anſwers both from them and the *Grand Lama*. That of the King runs as follows. "We have a great Pleaſure that you, *European Lama*, by the Grace of God, are in good Health, and that your Body is like to the fineſt Gold, and as the Increaſing of the Moon till it comes to be Full.----We have received your Letter with the Cryſtals, which are extreamly agreeable to us.---Return quickly with other Fathers;---and continue writing to me without Interruption, as runs the *Ganges* [c]. Written from *Laſſa*, the good Day the twenty-third of the ſeventh Month." This anſwers to the third of *Auguſt*, 1733.

Grand Lama's Letter,

THE *Grand Lama's* Letter is in theſe Terms. "It gave me no ſmall Pleaſure and Conſolation to find, by your Letter, that you are very well [d].---And ſince you have always the Bowels of a Father for your dear Friend, I muſt believe, that your Life will always be very happy.----All your Diſcourſes are printed in my Heart.----This Letter is wrapped in a Piece of yellow Brocade, called *Torcheſalam* [e]. Given the good Day firſt of the ſixth Month, the Year of the *Water Ox*," that is, the twenty-third of *July*, 1733. *Horace de la Penna.* 1741

THE Letter of the Prime-Miniſter begins in a Kind of religious Rant. "Triumph over all Infidels, and be you holy! I am rejoiced to hear that you are very well, and that the Branches of your Heart are extended to gather the Fruits of your excellent Law."---- One may conceive from theſe Letters, adds the Memoir, the great Eſteem which the King, the *Grand Lama*, and the Prime-Miniſter, had of our holy Evangelic Law [f]. *The Prime Miniſter's*

UPON this Report made to his Sanctity, and the holy Congregation, they appointed for the Miſſion nine other *Capuchins*, aſſigning to each eighty *Roman* Crowns for his Voyage, and as much for his annual Maintenance, giving them a Year's Salary before-hand. They ſet-out in 1738, with a Preſent for the King, and another for the *Great Lama*; beſides two Briefs, one for each. In the Year 1742, a Letter came from Friar *Horace*, ſetting-forth, that they had arrived at *Laſſa* the Year before: That the Preſents of the Pope, called by them the *Grand Lama*, had been received with great Satisfaction; and that the King, as well as the Great Pontiff, were preparing Preſents for his Holineſs, and to anſwer his Briefs; which were to be ſent the Year following by one of the *Capuchins*, whoſe Age had rendered him uſeleſs to the Miſſion [g]. *Supply of Miſſioners.*

THERE came with the ſaid Letter, the original Privilege for Liberty of Conſcience, granted by the King, and publiſhed throughout his Dominions. It is conceived in theſe Terms. *The King's Edict.*

WE Nivagn, *King of* Tibet, *give Warning to all Men under the Sun, and in particular to the Miniſters of the Reſidence of the ſupream* Lama, *to the Miniſters of* Lhaſa, *to the Chiefs of a thouſand, of an hundred, and of ten Men: To the Chiefs of the* Tartars, *and all both great and ſmall: To the Miniſters named* Hemor, Gnalep, *and* Chiriajis, *and to all the Governors of Fortreſſes and Provinces, and to all the Governors of ſeveral Caſtles, and to the ſubordinate Governors, and to the Nobles of all* Tibet, *to the privileged Perſons, and all others powerful, or not powerful, that none of*

[a] An Account of theſe Articles has been already given, *p.* 459. [b] Or, *Napal*: Perhaps the *Nupal* of *Tavernier*. See before, *p.* 458. a. [c] It is not likely, that the King ſhould mention the *Ganges* (which is not in his Dominions of *Laſſa*, but thoſe of *Ladak*, or the ſecond *Tibet*) when the *Tſan-pu*, which runs near *Laſſa*, is in more Eſteem. [d] It is not probable, that the King ſhould write to this Friar: It is much leſs ſo, that the *Great Lama* ſhould ſtoop to ſend him a Letter, eſpecially conceived in ſuch Terms, as amount to acknowledging him as his Superior. [e] Is it likely the *Great Lama* would mention ſuch an impertinent Circumſtance? [f] Thoſe who conſider theſe Letters, can only conceive that they were forged, to make the Popiſh Dupes believe their Religion was in high Eſteem with ſuch as were chief in Power. [g] *Nouv. Bibl.* tom. 14. p. 57, *& ſeqq.*

you have the Presumption to hinder the Execution of the present Privilege in Favour of all these European *Fathers of the Religion, called that of the* Capuchins, *or* true Lamas Gokhar, *provided that none* others *interfere who come for Sake of their* private Interest; *these being arrived not to trade, but only with a View to do Good to all Men, to recommend the Works of true Saints, to conduct all Men in the true Road to Paradise, to teach Subjects to be very submissive, and to obey, with a sincere Heart, their* proper *Kings* [a], *their Vice-Roys, and their Ministers; and to extend the Law of the true God, that is to say, the Evangelical Law.*

THE Sovereign Pontiff, or Grand *and* Supream Lama *of all these Fathers, who as a tender Father extends his Compassion and Love to all Men, to draw them out of the Road to Hell, and render them Partakers of an eternal and immense Glory, as well as Felicity, in the Abode of Paradise; without regarding the incredible Expence, sends into all Kingdoms, as far as in his Power, Preachers of the true Law: And it is for the same End, and not for* other Motives [b], *that he has sent some again into our Kingdom. It is for this Reason, that we give for ever our Seal to all those who are called* European *Fathers, or, properly,* Lamas Gokhar [c]; *and to all those who shall come after them, Liberty to preach, and extend the Law of the* true *God, freely, openly, and publickly; not only in the City of* Lhasa, *but also throughout the Kingdom of* Tibet, *in all Places, and to all Persons, as well religious as secular.*

TO you all, universally, as before recited, more powerful, or less powerful, and in particular to the Chinese, *to the* Tartars Hor [d], *and to all others, whether religious, or secular, we command, that no Person attempt to hinder those whose Hearts are enlightened with the Light of the true God, to embrace the* true Law, *and who voluntarily desire to embrace the* true *Law, or have embraced it already. All you, as above, do not dare to hinder them from learning it; and when they have embraced it, let none obstruct them, or forbid them to observe freely, openly, and publickly,* this true *Law. Be it known likewise to you, that all who shall embrace and keep* this true Law, *shall be* reputed by us more faithful Subjects than those who retain the first [e]; *and that with respect to the Preachers of* the true Law, *or* apostolic Missioners, *we shall guard and defend them, taking them under our special Protection: Neither do any Thing, be it ever so trivial, that may give them the least Cause of Uneasiness; but live in Peace with them. All you, who are concerned as aforesaid, print these Letters. Given at* Kadeno Khagser [*before*, Khaden Khagn San] *the Residence of the Triumpher on all Sides, in the Year of the* Iron Bird, *the thirtieth of the seventh Month:* That is, the ninth of *September*, 1741. Horace de la Penna. 1741.

DURING the eight Years that *Horace* was absent from *Tibet*, the King's Affection for the *Romish* Religion (which the Memoir always takes-care to compliment with the Name of Holy) increased, it seems, instead of diminishing: In Proof of this, Part of a Letter is inserted, which we are told was written from the King, by his Secretary of State, to *Horace*, whilst in *Italy*; intimating, that *he gave Belief to his own Religion, only because he was bred in it* [f]; *whereas he believed in that of the* Capuchins, *and held it in great Devotion.* This he bid him *represent to his* Grand Lama. But he assigns no Reason why he believed in it; nor is the Date of the Letter, or of its Arrival, mentioned [g]. *The King's Steadfastness.*

WE are told next, that the Exposition of Doctrines, given by Friar *Horace* to the *Grand Lama*, had made the same Impression on that Pontiff, as on the King; as appears from his Privilege, which in Substance, as follows, is the same with the Royal.

WE universally command all Men under the Sun, particularly all the Ministers of our Residence, the Ministers of Lhasa, *--- that all these* European *Fathers of the Religion called that of the* Capuchins, *or* Lamas Gokhar, *in the Kingdom of* Tibet, *not being mixed with* the other, *who come for Sake of* Interest, *or only to trade; --- we command, we say, that where-ever they go, or stay, every one of you may assist them, and do them good Offices. --- And that throughout the whole Extent of the Kingdom they may carry-on, in Peace, the Work* *The Lama's Licence.*

[a] His Majesty should have said, their Catholic Kings. [b] To be sure he knew the Pope's Heart better than he did himself; nor ever heard that these *European Lamas* had been expelled *China* eighteen Years before, for contrary Suspicions. [c] How comes it this uncouth Term, though often inserted, is not explained? [d] These are a Sort of *Tartars*, never heard of in *Europe* before. [e] Meaning the established Religion of *Tibet*. Was ever such impudent Forgery? Would any Sovereign thus incense his Subjects, by stigmatizing them openly as Rebels? Does the Religion of *Tibet* assert the Independency of the Church on the State more than the *Romish*? But the Devil knows how to hide his cloven Foot till he has gained his Point. [f] It is strange this should not be as strong a Motive in *Tibet*, as it is in *Europe*; or that the People there should so easily get-over the Prejudices of Education, which in these Parts of the World are found so difficult to conquer. Does not this shew how egregiously mistaken and conceited we are, in fancying ourselves endowed with more Reason and good Sense than any of the *Asiatics*? [g] *Nouv. Bibl.* p. 64, *& seqq.* [h] Here the *Lama* is supposed to give the *Capuchin* Licence to overturn the established Religion, and dethrone himself, in Favour of *the Religion of the Capuchins*, which new Term seems to be coined to distinguish the Religion taught by them from that of the Jesuits. Such is the Rancor that reigns among these detestable Orders of Friars.

which

Miſſion to Tibet. *which they have been ſent to execute* [h]. *Written, and given, in our great Palace of* Putala, *the Year of the* Bird of Iron, *and twenty-eighth of the Autumn of the Star, called* Thrumaho; that is, the ſeventh of *October*, 1741.

Some Converſions made. OUR Friar likewiſe ſpeaks of *ſome Converſions*, which he had *made*, and of *certain Perſons* whom he had *baptized*. He obſerves, that the *Capuchins* he carried with him, having had Time to make a great Progreſs in the Language, which he taught them during the Voyage, he hoped b they would ſoon be able to preach the Goſpel, which the People of *Tibet* were very well diſpoſed to embrace: So that by the Protection of the King, the *Great Lama*, the Prime-Miniſter, and the whole Court, he did not doubt quickly to ſee the capital City intirely converted; eſpecially conſidering how well the Doctrine had been received by great Numbers both of the Clergy and Laity.

King of Batgao charmed, BUT he adds, that conſidering the great Ex- c tent of the Kingdom, and many Millions of Inhabitants, it would require a great Number of Miſſioners, diſperſed through the Provinces, to carry-on and compleat the Work ſo ſucceſsfully begun. On the other Hand, the Memoir declares, that the Apoſtolic Chamber was ſo poor, and much in Debt, that, far from ſupporting new Miſſions, it was not in a Condition to maintain thoſe already eſtabliſhed, the Number of Miſſioners requiſite for the Purpoſe was ſo d great. This Inability in the Apoſtolic Chamber happened to be the more unlucky, in regard the Kings of other Dominions bordering on *Tibet*, required Miſſioners: For the *Capuchin de Recanati*, Superior of the Miſſion, ſent to the Kingdom of *Batgao* in 1735, being with two of his Companions at *Nepal* the Capital; the King, it ſeems, was ſo enamoured with their Doctrine, that he aſſigned them a large Palace, confiſcated from one of the Grandees, for their Habitation; e and granted them Liberty of Conſcience, by the following public Edict, ſent by the ſaid Superior to the Procurator-General of his Order.

His Licence to preach. *WE* Zaervanejitta Malla, *King of* Batgao, *reſiding in* Nepal, *grant by Virtue of theſe Preſents, to all the* European *Fathers, Liberty to preach, teach, and gain-over to their Religion, the People under our Dominion; and in like Manner permit our Subjects to embrace the Law of the* European *Fathers, without Fear of being moleſted* f *either by us, or thoſe who bear Authority in our Realm.---However, theſe Converſions ought to be perfectly voluntary, and not procured by Force.* Thus it is. Kaſinat, *the Doctor, was the Writer:* Griſnanfarangh, *Governor-General, confirms it:* Biſoraja, *the Great Prieſt* [a], *confirms and approves it. Given at* Nepal, *in the Year* 861, *in the Month of the* Margſies. *Good Day. Health.*

" I Friar *Vito de Recanati, Capuchin* Miſſio-
" ner, teſtify, that this is a true Copy of
" the Original [b]."

THE ſame *Capuchin*, with his Companions, paſſing afterwards into the Kingdom of *Battia*, bordering on the *Mogol*'s Empire; the King being informed, that they preached a Law which it was neceſſary to embrace and follow, in order to be ſaved; ſent one of his Miniſters for them, to the Place where they then were, reſolving to hear himſelf what they had to ſay on that Subject. Accordingly they explained their Law, and pointed-out the Errors of that obſerved in the Country. All this they made him eaſily apprehend, by Means of a written Inſtruction, which pleaſed to ſuch a Degree, it ſeems, that he commanded them to remain with him, *becauſe*, forſooth, *their Religion being all Charity* [c], *he would needs have them preach it in his Kingdom* [d]. *Recanati* anſwered, that being deſtined by the Pope to the Miſſion of *Batgao* at *Nepal*, he could not comply with his Requeſt. The King replied, that *he would write himſelf to the Pope, to obtain his Permiſſion for them; not doubting but he would both grant it, and ſend him other Miſſioners.*

THE *Capuchin* hereupon ſubmitted, and received the Letter written by the King to his Sanctity, in theſe Terms. *I am in good Health, and wiſh the ſame to you. Some Time ago I was informed, that the Miſſionary Fathers have been ſent to do Good to Mankind. Out of a Deſire to have it explained to me, I ſent for them into my Preſence; and being ſatisfied that their Miniſtry is intirely Charity, I ordered them to ſtay in my Kingdom: But, as they tell me they* cannot obey me, without the Sovereign Pontiff's Permiſſion, *I intreat this Lord, the Sovereign Pontiff, to command ſome* Fathers *to remain in my Realm, which I ſhall conſider as the higheſt Favour. Given at* Battia *in the Year* 184, *and Month of the* Buſadabi. *Signed the King.* Thus it is. *I Friar* de Recanati, Capuchin *Miſſioner, atteſt that this is the true Senſe of the Original.*

THE ſame Miſſioner, we are told, ſent this

[a] Theſe *Pagan* High Prieſts, or Popes, contrary to what is found in *Europe*, are more tractable and honeſt than the inferior Prieſts. [b] Nobody doubts but the Friar would have ſworn to the Truth of a greater Falſehood, to ſerve his Religion, or Intereſt: For Friars are the ſame now as in the Time of the *Tartars*, and before. [c] O wicked Deceivers! Spawn of Satan! Well ye know, that it is the moſt uncharitable, cruel, and deſtructive Religion, both to the Souls and Bodies of Men, this Day on Earth. [d] As if there was little or no Charity among his People: Though the Miſſioners, both Proteſtant and Papiſt, repreſent the *Indian* Charity and Humanity every-where, as infinitely ſurpaſſing what is to be found among the greater Part of the Chriſtian Sects.

Letter,

Letter, with the King of *Batgao*'s Privilege, to a the Procurator-General; who received it the Beginning of this Year [a], before the Letters of *Horace*, from *Tibet*, reached his Hands. The Pope having received these Packets from the Procurator, sent them to the Congregation *de la Propaganda*. These being in Debt, and in no Condition to bear this new Expence, represented the Case to his Holiness; who notwithstanding the Poverty of the Apostolic Chamber, gave Orders for sending-over some Regulars, at his own b Expence, though not so many as were requisite. He wrote also to the King of *Battia* a *very fine Brief*, it seems, to acquaint him, that he *condescended* to his Request, and returned him Thanks, at the same Time exhorting him to be the first who should set his Vassals the Example of embracing the *Romish* Religion. He wrote another likewise to the King of *Batgao*, to thank him for the Privilege before recited, and make him the same Exhortation [b].

THIS is the State of the Mission in *Tibet*, *Batgao*, and *Battia*. But as it was not possible to support it, without greater Expences than the Pope and Congregation aforesaid, were able to supply; therefore the Procurator-General of the *Capuchins* published the preceding Account, not only to let all good Catholics see what a hopeful Prospect there was of propagating their Religion in those foreign Countries, but also to excite Grandees, and pious Souls, to contribute their d Cash to promote so glorious a Design.

THUS ends the Relation whereon the Journalist has made several pertinent Remarks, which we shall briefly touch on. First, he asks, since these three Kings required Missioners of their own Accord, why should it be at the Expence of those they apply to? Were they less inclined to maintain the Priests of a Religion they liked, than those of a Religion they were out of Conceit with? Secondly, that as the Capital of *Tibet* had been almost intirely converted in 1741, he cannot conceive how Friar *Horace* should speak of only *some Conversions* since that Time, and *a few Persons baptized*. He wonders also, since *Lhasa* was almost converted, that he says nothing of the Christianity of *Putala*, which is so near it; especially as he had the *Great Lama*'s Licence to make Proselytes [c]. ---- Thirdly, that the Facility with which the *Grand Lama* appears to favour the new Religion, is beyond all Imagination; especially, as they pretend to have acquainted him, that there was in *Europe* a Sovereign Pontiff, or *Dalay Lama*, who exercised the same Authority over the Christians, as he of *Tibet* did over that Kingdom, and all *Tartary*. This, says the Journalist, exposed a Clashing of Interests, Titles, and Jurisdictions, which ought to have incensed the *Lama* of *Putala* against him of *Rome*. Instead of that, after receiving Answers to his Objections (neither of which are laid before the Reader) he becomes as tractable as the King himself. What makes this Surrender of Power and Interest the more incredible, is the *Grand Lama*'s laying Claim to the Divine Attributes, no less than Christ himself [d]. Is it possible, that a Person who enjoys the Honours of a God, is accustomed to the same Adorations, and considers himself vastly superior to all Mortals, should so easily give-up all his Rights, and acknowledge, for his Superior, a Man he knows nothing of, residing in a distant Corner of the Earth [e]? Horace de la Penna. 1741.

c FOURTHLY, As the Missioners pretend they found the People of *Tibet* so ready to embrace the Evangelic Law, doubtless, the Reader would be glad to know, what were the Doctrines they preached: But they neither tell us whether those delivered in Scripture, or Pope *Pius* IVth's Creed, or, simply, the Institutes of their Order, are what they call *the Religion of the Capuchins*. They do not mention a Word of Jesus Christ, whereby one might judge it was him they preached. There are only two Things then mentioned in the Relation which could induce the *Tibetians* so easily to conform. The first is the outward Agreement, in the Form of ecclesiastical Government [f]. But this, instead of forwarding their Conversion, ought to be one of the greatest Obstacles: For where there is such a great Similitude, it must be the most difficult Thing imaginable to convince the People, that there can be any Reason for a Change [g]; besides, twenty e to one the *Pagan Lamas* would find they should be Losers by becoming *Christian Lamas*. In short, there needs no more to set the *Lamas* of *Tibet* against *the Religion of the Capuchins*, than obliging them to learn the *Latin* for their Offices. This single Innovation would make the greater Part of them revolt. *The fourth.* *Similar Hierarchies.*

THE other Thing which might facilitate the Conversion of the *Tibetians*, is, that the married Men can, by their Law, have but one Wife. f This is a very favourable Article, Plurality of Wives being, according to the Missioners, the great Obstacle to the Conversion of other Na- *Female Polygamy.*

[a] That is, 1742, when the Relation or Memoir was printed. [b] *Nouv. Bibl.* p. 70, *& seqq.* [c] It looks as if the *Grand Lama* was more ready to own himself an Impostor, than the Inferior were willing to lose the Benefit of the Imposture. [d] The Journalist says, than the Pope of *Rome*. But the Popes do not assume the Name of God in an absolute Sense, as the *Grand Lama* does. [e] *Nouv. Bibl.* p. 81, *& seqq.* [f] See before, *p.* 459. a. [g] See before, *p.* 212. Note f.

tions:

Travels in Tartary.

tions: But there is a Circumſtance mentioned by *Du Halde*, though not taken Notice of by Friar *Horace*, or thoſe who drew-up the Memoir, which knocks all in the Head again; namely, that although the Huſbands in that Country have but one Wife, yet the Women have ſeveral Huſbands [a]. If this be the Caſe, Woe be to the Miſſioners who ſhall attempt to deprive them of ſo important a Privilege. If the Men accuſtomed to a Plurality of Wives, riſe-up in Arms every-where againſt the Chriſtian Religion, which would reduce them to one, what Oppoſition muſt it meet-with from the Women, long uſed to half a Dozen Huſbands at a Time? Doubtleſs they would fly upon the Miſſioners, Tooth and Nail, in Defence of their Rights.

The fifth. FIFTHLY, The Privilege granted by the King and *Grand Lama*, for Liberty of Conſcience and Preaching, is not, perhaps, a Thing ſo rare, or of ſuch great Conſequence, as may be imagined, or the Memoir would repreſent it: For *Kempfer* affirms, that in moſt of the States of *Aſia*, as well as *Japan*, Liberty of Conſcience is readily granted [b], ſo that it be not inconſiſtent with the temporal Government, or prejudicial to the public Peace. But what is ſingular in the Privileges granted by the two Powers, ruling in *Tibet*, is, that they exclude the Miſſioners *who mix themſelves with* others, *who come for private* Intereſt, *and Motives of Commerce.* It would require no great Skill in conjuring, ſays the Journaliſt, to gueſs at thoſe *others*, who are to be excluded by the Edict [c]: But who told the King and *Lama*, adds the ſame Author, that there are Miſſioners of ſuch a mercenary Order [d]? Why, who ſhould, but their good Friends the *Capuchins?*

CHAP. VIII.

TRAVELS *into* Weſtern Tartary, *by Order of the Emperor of* China, *or in his Retinue, between the Years* 1688, *and* 1698.

By John Francis Gerbillon, *Jeſuit.*

INTRODUCTION.

Account of the Author, and his Work: Abſtract of it. Verbieſt's *Journey. The Emperor's Deſign, Train, and Equipage. Nature of the Country. View of the Emperor to awe the* Tartars, *and preſerve Health. Intenſe Cold, whence proceeding.* Tartar *Princes Homage. Kindneſs to the Miſſioners. Great Roads made.*

Account of the Author. ALTHOUGH in travelling between *Ruſſia* and *China*, there is a Neceſſity of paſſing-through *Tartary*; in Conſequence of which that Country has been croſſed in ſeveral different Parts, by thoſe who from Time to Time have performed the Journey; yet none of them have deſcribed their Travels with that Copiouſneſs and Accuracy, which is to be found in the Relation of *Gerbillon*, a *French* Jeſuit, who made eight ſeveral Journeys from *Pe-king* into different Parts of *Weſtern Tartary*, by Order of the late Emperor *Kang-hi*, or in his Retinue; which gave him far better Opportunities of making Remarks, than ſuch can be ſuppoſed to have, who travel with the Karawâns, or any other Way. Beſides, as being a good Mathematician, he was more capable of giving an exact Deſcription of Places, than the Generality of Travellers are. Accordingly we not only find every Place that occurs in the ſeveral Roads he took, ſet-down in his Journal; but their Bearing and Diſtance obſerved with much Care, and frequently the Latitude; three Things rarely to be met-with in the Relations of others. To theſe he has added the Variations of the Weather from Day to Day; and in the Surface of the Soil, whether hilly or plain, ſandy or ſtony, fertile or barren; with an Account of the Inhabitants of this deſart Region, and of the Occurrences that paſſed during his Travels.

THESE Journals of *Gerbillon*'s, which had been long expected by the Curious, were at length publiſhed by *Du Halde*, in his Deſcription of *China* and *Tartary* [e]; from whence we have

[a] See before, *p.* 457. d. [b] But not, we preſume, in ſo extenſive a Degree, giving Leave to any who will, to embrace the new Doctrine, and forbidding any to hinder them, *&c.* [c] He means, doubtleſs, the Jeſuits. [d] *Nouv. Bibl.* p. 90, *& ſeqq.* [e] Volume the fourth of the *French*, and Volume the ſecond of the *Engliſh* Folio Edition.

given

given an Abſtract. In doing this, we have not inſerted Occurrences at Length, nor confined ourſelves to the Order obſerved by the Author, but have brought Things of a Kind together: Such as thoſe relating to the Weather, Soils, Game, *&c.* that were diſperſed through the Journals, and made one Article out of the Whole, by giving the Subſtance in the conciſeſt Way. In like Manner, we have not always delivered the Bearing and Diſtance of Places in the Detail ſet-forth in the Original; but often, to ſhorten the Account, joined ſeveral Articles of the Kind together: For the Journey being, for the moſt Part, through deſart Countries, where there are no Towns, or ſcarce any Places of conſiderable Note, except now and then a Lake or River, the Reſult of a whole Day's Travel, and ſometimes of two or three, may ſerve as well as the particular Diviſions of thoſe Stages: But chiefly becauſe this Country having been pretty accurately ſurveyed by the Jeſuits, the Situations of Places muſt be laid-down in their Maps more truly than they poſſibly can be, by the Bearing or Diſtance taken in a curſory Manner.

FIVE Years before *Gerbillon* ſet-out on his *Tartarian* Travels, *viz.* in 1683, *Verbieſt* [a] performed a *Journey into Weſtern Tartary*, with the Emperor *Kang-hi*; the Relation whereof, publiſhed along with his Journey into *Eaſtern Tartary* [b], gives no Particulars of the Road, but only ſome general Remarks on the Country, and its Inhabitants; with an Account of the Order obſerved by the Emperor in his March, and his Reaſons for undertaking ſuch fatiguing Expeditions. The Subſtance of which Piece may properly ſerve as an Introduction to the Travels of *Gerbillon*.

KANG-HI, according to *Verbieſt*, undertook theſe Journeys into *Tartary* for ſeveral Reaſons. The firſt was to keep his Army in Exerciſe. Wherefore, after he had ſettled all Parts of his vaſt Empire in Peace, he recalled his beſt Troops out of every Province to *Pe-king*, and came to a Reſolution, in his Council, to make three ſuch Expeditions every Year, to teach them, by hunting Stags, Boars, Bears, and Tigers, how to vanquiſh the Enemies of the Empire, or at leaſt to prevent their Courage from degenerating through the *Chineſe* Luxury, and too long a Repoſe.

IN Reality, theſe Sorts of Hunting have more the Air of a military Expedition, than a Party of Pleaſure: For the Men, whom the Emperor had in his Train, were all armed with Bows and Simeters, were divided into Companies, and marched in Order of Battle under their Standards, to the Sound of Drums and Trumpets. During their Hunting, they ſurrounded Mountains and Foreſts, as if they were beſieging Cities, according to the Manner of the *Eaſtern Tartars*. *Introduction.*

THIS Army, which conſiſted of ſixty thouſand Men, and an hundred thouſand Horſes, had its Van, its Rear, and main Body, with its right and left Wings, commanded by ſo many Chiefs and Regulos. The Emperor rode on Horſeback at the Head of his Army, through theſe deſart Places and ſteep Mountains, far from the high Road, expoſed all Day to the Heat of the Sun, the Rain, and Injuries of the Air. Several who ſerved in the late Wars aſſured *Verbieſt*, that they did not then ſuffer ſo much, as they did in this Chace.

FOR more than ſeventy Days that they were on the March, there was a Neceſſity of tranſporting all the Ammunition on Waggons, Camels, Horſes, and Mules, through very difficult Roads: For in all *Weſtern Tartary* (ſo called by the Author in reſpect of *Eaſtern Tartary*) there is nothing to be found but Mountains, Rocks, and Valleys, without either Cities, Towns, or Villages [c]; nay, not ſo much as an Houſe, the Inhabitants dwelling in Tents ſcattered over the Plains. There they feed their Cattle, but breed no Swine, Pullets, Geeſe, nor any other Animals, excepting ſuch as can live upon the ſpontaneous Herbs. *Nature of the Country.*

THE ſecond Reaſon for undertaking this Journey, was to keep the *Weſtern Tartars* in Awe, and prevent their forming Deſigns againſt the State. This made him enter their Country with ſuch great Preparations of War: Among the reſt, he cauſed ſeveral Pieces of Cannon to be brought with him, in order to fire them, from Time to Time, in the Valleys; that by the Noiſe and Fire proceeding from the Mouths of the Dragons, with which they are adorned, he might ſtrike Terror where-ever he went. *View of the Emperor*

BESIDES this Train, he would be accompanied with all the Marks of Grandeur which ſurrounded him at *Pe-king*; and with that Multitude of Drums, and other muſical Inſtruments, which play in Concert while he is at Meals, and at the Sound whereof he goes-out of his Palace. He brought all this Equipage along with him, in order to amaze theſe barbarous People with ſuch exterior Pomp, and inſpire them with the Reſpect and Fear due to the Imperial Majeſty: For the Empire of *China* never had more formidable Enemies than the *Weſtern Tartars*, whoſe almoſt infinite Multitude, as it were, beſiege it on the North and Weſt Sides. *To awe the Tartars.*

[a] He was accompanied by *Philip Grimaldi*, of the ſame Order. [b] See before, *p.* 362. [c] Excepting towards the Great Wall of *China*.

Introduction. THE famous Wall, which ſeparates their Territories from *China*, was built to prevent their Incurſions. This is often carried-over very high Mountains; ſo that in one Place *Verbieſt* found it to be elevated a thouſand and thirty-ſeven geometrical Paces above the Horizon. It likewiſe winds in ſeveral Places, according to the Situation of the Mountains, inſomuch that inſtead of one Wall, there may be ſaid to be three, which ſurround a great Part of *China* [a].

And preſerve Health. THE third Reaſon which induced the Emperor to take this Journey, was his Health: Having found, by long Experience, that when he continues a conſiderable Time at *Pe-king*, without going abroad, he is attacked with ſeveral Diſorders, which he avoids by theſe long Journeys. All the Time he is on the Road, he never ſees any Women; and, what is more ſurprizing, there are none to be ſeen in all this great Army, excepting thoſe who attend the Queen-Mother [b], who went with him. Beſides, it was a Rarity, that ſhe accompanied his Majeſty this Year, it being a Thing that was never practiſed but once before [c], when he carried the three Queens with him, to viſit the Sepulchres of his Anceſtors.

Intenſe Cold, THE Emperor and Queen-Mother intended alſo, by this Progreſs, to avoid the exceſſive Heats at *Pe-king*, duing the Dog-Days: For in this Part of *Tartary*, there blows ſo cold a Wind in *July* and *Auguſt*, eſpecially during the Night, that one is obliged to wear warm Cloaths and Furs. The Reaſon that may be given for ſuch extraordinary Cold, is the Elevation of the Land, and great Number of Mountains in this Region; one of which they aſcended for ſix Days together, in their March. The Emperor being deſirous to know how much higher it was than the Plains of *Pe-king*, about three hundred Miles diſtant, on their Return, after meaſuring upwards of an hundred Mountains on the Road, the Jeſuits found it three thouſand geometrical Paces higher than the Sea neareſt that City. The Salt-petre, with which theſe Countries abound, may alſo contribute to the Cold, which is ſo intenſe, that in digging the Ground three or four Feet deep, they find Clods of Earth quite frozen, and even intire Pieces of Ice.

Whence proceeding.

Tartar Princes Homage. SEVERAL Regulos of *Weſtern Tartary* came three hundred, nay, five hundred Miles, with their Children, to ſalute the Emperor. Some of theſe Princes expreſſed a particular Kindneſs for the Jeſuits; who on ſuch weak Grounds conceived ſome Hopes, that their Religion might find an eaſy Acceſs among them: But *Verbieſt* thinks, the ſureſt Way would be to begin with the *Tartars*, who lie far-off, and are not in Subjection to the Empire, to which they may paſs by Degrees.

Kindneſs to the Miſſioners. THROUGHOUT the Journey the Emperor continued to give the Miſſioners, in Sight of his Army, ſingular Marks of his Eſteem; which he conferred on none beſides. He would ſtop to ſee them meaſure Heights, would call to them at a Diſtance to know how they did [d], ſpeak kindly of them to his Lords, often ſend them Meat from his own Table, and ſometimes cauſe them to dine in his own Tent. The Emperor's eldeſt Son, who got a Hurt in his right Shoulder, by a Fall from his Horſe, ſhewed them no leſs Kindneſs; which Favours of the Royal Family, the humble Miſſioners conſidered as the Effects of a particular Providence, which watches over them and Chriſtianity, meaning Popery: But, ſurely, the late Expulſion of both out of *China*, will convince them how little they are the Objects of the Deity's Care.

Great Road made. FOR more than ſix hundred Miles, which they travelled in going [e] and coming (for they did not return by the ſame Way) the Emperor cauſed a great Road to be made acroſs the Mountains and Valleys, for the Conveniency of the Queen-Mother, who travelled in a Chaiſe: He alſo cauſed an infinite Number of Bridges to be built over the Brooks, as well as the Rocks and Tops of Mountains to be cut with incredible Labour and Expence [f].

SECT. I.

The Author's *firſt* Journey *from* Pe-king, *towards the City of* Selingha, *in the Borders of the* Ruſſian *Dominions, as Interpreter to the* Chineſe *Ambaſſadors ſent thither to treat of Peace, in* 1688.

THE *Ruſſians* having, by Degrees, advanced to the very Frontiers of *China*, built the Fort of *Albaſin*, called by the *Tartars* and *Chineſe*, *Yakſa* [a], at the Confluence of a Rivulet of that Name, with the great River which the *Tartars* call *Saghalian ûla*, and the *Chineſe*, *Ya-long-kyang* [b]. The Emperor of *China* took and raſed the Fort: But the *Ruſſians* re-building it the Year following, they were again beſieged; and being apprehenſive of the Conſequences of the War, deſired the Emperor to end it amicably, and to appoint a Place for holding a Treaty.

THE Prince kindly accepted their Offer, and promiſed to ſend ſome of his Subjects to the *Selingha*, to treat with them. In the Beginning of 1688, he intruſted this Negotiation with two Grandees of his Court: The firſt was Prince *So-ſan*, Captain of the Life-Guard, and Miniſter of State: The ſecond *Tong-lau-yâ*, Commander of an Imperial Standard, and maternal Uncle to the Emperor, whence called alſo *Kiw-kyew* [c]. They were attended by ſeveral *Mandarins* of different Orders, and *Thomas Pereyra*, a *Portugueze* Jeſuit, and the Author, were appointed Interpreters for the *Latin* and *European* Languages. On this Occaſion they were conſidered as *Mandarins* of the ſecond and third Rank: They had Preſents made them likewiſe by the Emperor along with the principal *Mandarins* of the Embaſſy, and were appointed to accompany *Tong-lau-ya* to eat at his Table, and ſit by him at the Conferences. Among their Preſents, they had each a long Veſt of the beſt Brocade, with Dragons, but not embroidered; which none but the Emperor, and the Princes of the Blood, may wear, unleſs preſented to them by his Majeſty. He gave them alſo ſhort Veſts of Sables, lined with fine Satin, and Gold Buttons; being ſome of his own Cloaths. Yet they did not ſee the Emperor, as the reſt did: When they went to take their Leave of him on *May* the ninth, he only ſent to wiſh them a good Journey.

THE thirtieth they ſet-out early from the Houſe of *So-ſan*, and near the City-Gate found *Kiw-kyew* attended in a pompous Manner. There were a thouſand Horſe, and ſixty or ſeventy *Mandarins*, with eight ſmall Pieces of Cannon, conveyed on ſo many Horſes, and their Carriages on others. Theſe were drawn-up in Order, on each Side of the Road. The two Ambaſſadors alſo drew-up their Horſes, the Road being left clear for the Emperor's eldeſt Son, who came preſently after. He marched on a ſmall Horſe, with yellow Furniture, attended by ſeven or eight conſiderable Officers, and had a large String of Beads about his Neck, like the *Romiſh*; each tenth was of Amber. In Place of the Croſs, were four Strings of Pearl, or Cryſtal. Gerbillon. 1688.

HE ſtopped, near a League from *Pe-king*, under a homely Tent, ſeated on a Silk Cuſhion laid on a Woollen Carpet: The *Mandarins* of the Embaſſy, and Chiefs of Standards, ranged themſelves in the ſame Manner on each Side. The Prince treated them with *Tartarian* Tea, and then riſing-up, they all made nine Proſtrations with their Faces towards the Palace, to expreſs their Thanks to the Emperor, for the Honour, in ſending his own Son to accompany them ſo far. The Prince ſpoke to the Ambaſſadors, ſmiling; then both approached him, and kneeling, he took them by the Hand; after which he mounted his Horſe, and returned [d]. *Emperor's eldeſt Son.*

THE Ambaſſadors proceeded directly North to the City *Cha-ho*, fifty *Li* from *Pe-king*, croſſing two very beautiful Bridges of rough Marble, exactly alike, one on this Side, the other beyond that Place; each ſixty geometrical Paces long, and ſix or ſeven broad. Thence forty, or forty-two *Li*, they came, at Two in the Afternoon, to the Camp pitched at the Mountain-Foot, near a Fort built in a Straight, to ſecure the Paſs, whoſe Walls reached on both Sides to the Hills, which ſeemed inacceſſibly ſteep. There, as in all other Places, the *Mandarins* of the neighbouring Cities dreſſed in their Formalities, came to pay their Reſpects to the Ambaſſadors, and kneeled-down in the high Road to preſent their viſiting Billets. *City Cha-ho.*

THE Day was extreamly hot, but the Country very pleaſant, and well-cultivated, till they drew near thoſe Mountains, from their Barrenneſs (not having a Tree on them) called *the poor Mountains*. They lie North by Weſt of *Pe-king*, and join with others which ſurround that City; except to the South and South-Weſt, the Road lying between both Chains. *Chains of Mountains.*

[a] See before, *p.* 358. [b] *Saghalian ûla*, ſignifies the *Black River*; and *Ya-long-kyang*, the *Black Dragon River*. [c] That is, Uncle by the Mother's Side. [d] *Du Halde's China*, p. 273.

Through

Travels in Tartary.

THE Place of their Encampment was called a *Nan-kew*, that is, *the Southern Mouth*, or Entrance of the Wall [a]. The Walls of this Fortreſs, thirty-five Feet high, are built with Freeſtone, to four Feet; afterwards with large Flints and Rock-Stones up to the Battlements, which are of Brick: They are ſix or ſeven Foot thick at the narrow Paſs; but neither ſo high, nor thick, where they ſtretch on the Rocks. All along the Walls are ſquare Towers of Stone or Brick, at proper Diſtances; and below the Fortreſs is a pretty large Town, called *Nan-kew-ching*.

Inner Great Wall.

Difficult Paſſes.

THE thirty-firſt, having paſſed-through this Place, they travelled forty-five *Li* North, between ſteep Mountains. The moſt difficult Parts of the Road are paved with large Stones, winding and turning among the Rocks, over which, on each Side, runs a great Wall with Stairs to go up, and fortified with Towers. It is in many Places built with Freeſtone, thick and high. You meet Gates, from Time to Time, each pretty like a triumphal Arch, built of Marble, about thirty Foot thick, with Figures in *Demi Relievo* up to the Rounding.

Strongly fortified.

AT every Gate is a Town or Village like the former, which might paſs for a ſmall City, and is a Fortreſs, in theſe Defiles, to keep-out the *Weſtern Tartars*; being ſurrounded by good Walls and Turrets, and entered through two or three Gates (whoſe Folding-Doors are covered with Iron Plates) between which are Places of Arms. Beſides Walnuts, Apricots, Plumbs, and other Fruit-Trees, which abound in theſe Streights, there are Gardens full of all Sorts of Grain and Pulſe, ſown in every Bottom between the Stones and Rocks, where there is ever ſo little Earth, watered by the Springs. The Mountains are cut in the Form of an Amphitheatre, and ſown where there is any good Soil.

Barren ſandy Plain.

HAVING paſſed four or five of theſe Villages, and as many Intrenchments, they deſcended into a barren ſandy Plain, ſeparating the Mountains, which had Forts at the Foot, and over them ran a large Intrenchment to the great Wall; needleſs Works, ſince a few Men might defend the Paſſes againſt Thouſands. After marching thirty *Li* Weſt, they encamped by a Rivulet [b].

Whay-lay.

THE firſt of *June* they proceeded fifty-five *Li* in the ſame Valley, forty Weſt, and fifteen North. They paſſed-by ſeveral Forts, as the Day before; and through two ſmall Cities, with Brick-Walls and Towers: The firſt *Whay-lay*, twenty *Li* from their Camp, where is a Rivulet with a fine Stone-Bridge; the other *Tû-mû* thirty *Li* farther, reſting four or five *Li* to the North of it. They always roſe by Two in the Morning, and ſet-forward before Five.

Gerbillon, 1688.

THE ſecond they marched ſeventy *Li* along the Hills, to the North of the Valley, which terminates ten *Li* beyond *Pau-ngan*. This City is more large and populous than the former: It is incloſed with a double Brick-Wall. They paſſed through it, and two or three other Towns. They encamped on the *Yang-ho*, a Rivulet.

Pau-ngan chew.

THE third, proceeding fifty *Li* North along the *Yang-ho*, they came to *Swen-wha fû*, lying at the End of a Plain, not far from that River. It hath a double Suburb, incloſed by Brick-Walls, ſtrengthened with Towers pretty near each other. They croſſed one Street as large as moſt in *Pe-king*, running the whole Length of the City, and full of wooden triumphal Arches [c], fifteen or twenty Paces aſunder. The Walls are more than thirty Foot high; and at each End of the City are three Gates (with Places of Arms between) whoſe Folding-Doors are covered with thin Plates of Iron, ſtrengthened by Nails, with Heads as big as Eggs. The North Suburb hath one very long and wide Street, with Rows of Trees on both Sides, which have a very agreeable Effect.

Swen-wha fû.

LEAVING the City, they wheeled-about, in order to croſs ſome Hills. From whence to the North, and North-Eaſt, they diſcovered the high Mountains they had before loſt Sight of, with the Towers of the Great Wall that runs over them. They met alſo Forts and Towers on the Road, with four or five Soldiers each. They encamped again by the *Yang-ho*, which runs about an hundred, or an hundred and fifty Paces from the Mountains on the South-Weſt, and two thouſand from thoſe to the North.

The Yang-ho.

THE fourth, marched forty-five *Li*, to *Hya-pû*, a ſmall City, at the End of the Valley that leads from *Swen-wha fû*, ſixty *Li* diſtant, within half a League of the Gate called *Chang-kya-kew*, that carries you out of *China* into *Tartary*. This is a ſmall City at the Foot of the Mountains, which bound the Empire of *China* on that Side; and is ſurrounded with thick Brick-Walls, thirty-five or forty Foot high, having two Gates, between

City Hya-pû.

[a] This is to be underſtood of the Inner Wall, dividing Part of *Pe-che-li* from *Shan-ſi*. [b] *Du Halde's China*, p. 274. [c] See before, *p.* 23.

between which there is a Place of Arms. It is a very populous, and being one of the Entrances of *China*, has a great Trade. Not only the *Weſtern Tartars* traffic hither, but Part of the Karawâns, from the *Uzbek Tartars* and *Perſia*, come to this Place [a].

FROM hence they went North by Eaſt, to paſs the Gate *Chang-kya-kew*, which is ſituate between two ſteep and rocky Mountains. This Part of the Wall is but a Trifle, in Compariſon of that which ſtops the Entrance into the firſt b Mountains they paſſed: For it is a plain Wall, neither high, nor thick, and is tumbled-down in ſeveral Places, with its Towers, of which Part are only of Earth. The Forts and Towers are continued the Length of the great Road in the Valley, as before. The Wall which ſhuts-up the Paſs is very high and thick; and the Folding-Doors of the Gate, which ſtands in the Middle, are covered with Iron Plates, armed with large Studs. They found a numerous Guard at the c Gate, and encamped twelve or fifteen *Li* beyond, in *Tartary*, in a ſmall Valley, which winds between two Ridges of rocky Mountains, along a Brook. Their Camp reached within five or ſix hundred Paces of the Gate.

THE fifth, marching twenty-five *Li* N.E. the great Road divides into two, N.E. and N.W. They took this laſt, which lies through a Valley, at the End whereof they encamped on one of the Mountains, which here dwindle into little d Hills, in a Place called *Halut-ſin*, where are ſeveral good Springs. They found, on the Road, a few Huts of *Chineſe* (ſettled here to cultivate what good Land they could find) beſides ſome Tents of *Weſtern Tartars* (or *Mongols*) and their Sepulchres, diſtinguiſhed by ſmall Banners of painted Cloth. The Hills, or Downs, afford good Paſture for Cattle; but not a Tree.

THE ſixth, climbing a high Mountain, at the Top the Road divides in three. They took that e to the N.W. The Country was fine, but uninhabited, and without a Tree. They encamped by a Brook, in the Valley *Na-lin-kew*, fifty *Li* from *Halut-ſin*. Here the Ambaſſadors received a Preſent of 400 Oxen, and 6000 Sheep, from the Emperor, whoſe Cattle feed in this Plain. The 7th, they advanced 70 *Li*, winding among little Hills, the Country as the Day before; and met ſome *Mongols*, either in Tents, or driving ſmall Carts with two Wheels, drawn by Cows and Horſes. They encamped on a Rivulet [b]. Gerbillon.

THE 8th, they travelled about 100 *Li* W. in 1688. a large Plain, watered by Brooks, with good Paſtures; yet but one Tree. The Road good. *Ruined City.* They encamped by a Brook, within a Mile of a Hamlet, where the *Chineſes* are baniſhed, near the Ruins of a City, or large Town. The 9th, they went 90 *Li*, almoſt always W. The Way was partly over Hills, and partly through Plains; one 5 or 6 Leagues over, called *Na-lin-kew*. In *Beautiful Temple.* the Midſt is a Temple, built by the Emperor of *China*, for the chief *Lamas* to reſt in, when travelling to *Pe-king*. It is ſmall, but one of the moſt beautiful the Author had ſeen, being intirely wainſcotted, gilded, painted, and varniſhed. On one Side is a ſorry Building, where 4 or 5 *Lamas* dwell. About it were *Mongol* Tents, and *Chineſe* Huts. They encamped 20 *Li* to the W.

THE 10th, at 30 *Li's* End, they left the *San-neſſian* Plain, and marched 20 more over Hills and Val- *Brook.* leys, through a deſart and uninhabited Country, to *Sanneſhan*, a Brook. Next Day they advanced through Valleys, the Country being rough and hilly, without Houſe or Tree. They ſaw ſome yellow Goats, not unlike the Gazella, or Antilope; which go in Herds of 1 or 2000, but ſo wild, that they fly at the Sight of a Man. They encamped at *Loto-haya*, on a Rivulet called *Imatu*. The 12th, after 30 *Li*, they kept winding among Hills, and ſteep Rocks full of Shrubs. They croſſed the Rivulet ten or twelve Times, and encamped again on its Banks 40 *Li* farther; the direct Diſtance not above 40 [c].

THE 13th, they followed the Brook 25 *Li*, *Imatu River.* paſſed by a ruinous Fortreſs of Earth, and then entered Mountains, abounding, like the Valleys, with dwarf, and other Trees. After 25 or 30 *Li* more, they entered an agreeable Plain, where a large Rivulet, ſuppoſed to be the *Imatu*, winds, e running W. Here they found Trees, and a ſorry Temple, ſome *Mongol* Tents, and Mud-Houſes of *Chineſe* Slaves, ſent to till the Ground. They marched in all 60 *Li* W. which may be reduced to 50, and encamped in a Plain called *Horhokol*, (or *Korkokol.*)

THE 14th, their Road lay all through a large Plain, 3 or 4 Leagues wide. To the N. and N.W. are Mountains with intire Woods. The Plain, through which the aforeſaid Rivulet paſſes, is cultivated in many Places, where there are Hamlets of

Travels in Tartary.

of 7 or 8 Mud-Houſes. At the End of 40 *Li* they came to a Tower, ſaid to be built 400 Years ago, pretty intire, except the Roof. It is a regular Octogon, with 8 Stories, each 11 Foot high, beſides the firſt, which exceeds 15 without the Coping; in all 100 Foot. It is built of Brick as white as Stone, embelliſhed with Ornaments of the ſame Materials, plaiſtered over. Its Architecture, though quite different from the *European*, and a little rude, has its Beauty. The firſt Story is round, and ſhaped like a Cup, adorned with Foliages. You go-up to this by a Ladder, and there begins the Stair-Caſe leading to the reſt; in each of which are two Statues in Demi-Relief, near as big as the Life, but ill-done. Here, probably, ſtood a City; for there is ſeen a large Compaſs incloſed by Mud-Walls, half demoliſhed, built by the *Weſtern Tartars*, when poſſeſſed of *China*. Ten *Li* farther they pitched their Camp [a].

Octogonal Tower.

Company of Lamas

As they approached this Place, the *Mandarins* of *Qua-wha-chin*, or *Huhu-hotun* [b], came to meet the Ambaſſadors; and ſoon after 12 or 15 *Lamas* on Horſeback, moſt dreſſed in yellow Silk, with large red Scarfs, which covered their whole Body. At their Head was a young handſome *Lama*, very full-faced, and of ſo white and delicate a Complexion, that *Gerbillon* took him for a Woman. He wore a Hat with very large Brims, all gilt, and running-up to a Point: Another had on likewiſe a gilt Hat, but ſmaller, and quite flat at-Top. Theſe two did not light-off their Horſes, as the reſt did, when they approached the Ambaſſadors; who having diſmounted, the *Lamas* came-up to them: Then their Captain alighting, fell-on his Knees, and enquired after the Emperor's Health: This done, they all went to the Tents prepared for them; where being preſented with *Tartarian* Tea, after a ſhort Converſation their Chief roſe-up, and took his Leave of the Ambaſſadors, who waited on him without the Tent, and ſtaid till he had mounted his Horſe; which he did three Paces from them, with the Aſſiſtance of 2 or 3 *Lamas*, who held him up by Way of Reſpect [c].

Meet the Ambaſſadors.

Quey-wha-chin, or Khukhu-hotun.

THE 15th, they went and encamped near *Quey-wha-chin*. This City, though ſmall, and inconſiderable at preſent, was a Place of great Trade, and very populous, whilſt the *Weſtern Tartars* were Maſters of *China*. The Walls are of Brick, and pretty entire; but the Rampart within is come to nothing. Several of the Temples here are better built, finer, and more decorated, than moſt of thoſe the Author had ſeen in *China*. Almoſt all the Houſes are no more than Cabins of Earth; but the Suburbs are ſomewhat better built, and peopled. The *Weſtern Tartars*, and *Chineſe*, live promiſcuouſly in this Quarter; and the Emperor of *China* governs, by his Lieutenants. Its chief Trade is in the Province of *Shan-ſi*, which is but 2 good Stages, or 18 Leagues diſtant.

Gerbillon 1688

Viſit to Khutukt

THE Ambaſſadors going directly to the chief Temple, were conducted into it by ſome *Lamas*, through a pretty large ſquare Court, well-paved. There they found one of thoſe *Lamas*, who, as they pretend, never dies; but when his Soul is ſeparated from his Body, it immediately enters that of an Infant; whence the *Chineſe* call them *Ho-fo*, that is, *the living Fo* [d], who are worſhipped as God on Earth.

His Sta and Dr

THIS counterfeit Immortal, who was about 25 Years old, flat-faced, and very long viſaged, ſat in an Alcove at the farther End of the Temple, having under him two large Cuſhions, one Brocade, and the other yellow Satin. He was covered with a large Mantle, or Gown, of the fineſt *Chineſe* yellow Damaſk, from Head to Foot; ſo that nothing could be ſeen but his Head, which was quite bare: His Hair was curled, and his Mantle edged with a party-coloured Silk Galoon, four or five fingers broad, after the Manner of a Prieſt's Cope, which the Mantle nearly reſembled. All the Civility he ſhewed the Ambaſſadors was, to riſe from his Seat when they appeared, and continue ſtanding while he received their Compliments, or rather Adorations.

Adm Dan

WHEN they were five or ſix Paces from the *Lama*, they caſt their Bonnets on the Ground, and proſtrated themſelves thrice, knocking the Earth with their Foreheads. After this, kneeling by Turns at his Feet, he put his Hands on their Heads, and made them touch his Chaplet, or Beads. The Ambaſſadors then paid a ſecond Adoration, and the counterfeit God [e] being firſt ſeated, they took their Places in Alcoves, one on each Hand, ſome of the moſt conſiderable *Mandarins* ſitting next to them. A few of the Retinue alſo paying their Adorations, received the Impoſition of Hands, and the Touch of the Beads.

MEAN-TIME they brought *Tartarian* Tea in large Silver Pots. The pretended Immortal had a particular one carried by a *Lama*, who poured it out for him into a fine China-Cup, which he

[a] Here the Author found the Sun's Meridian Altitude very near 72 Degrees, 20 Minutes. [b] Written alſo *Kuku-hotun*, or rather *Khukhu-hotun*. This is the *Tartar* Name: *Quey-wha-chin*, the *Chineſe*. [c] *Du Halde's China*, p. 278. [d] This was one of the *Hutuktû's*, or *Khutuktû's*, who are the Deputies of the *Grand Lama* of *Tibet*, ſent to reſide among the *Tartars*. [e] The Jeſuit ſhould be put in Mind of his Wafer-God, which is much more like a Counterfeit.

reached

reached himſelf from a Silver-Stand placed near him. As in making this Motion his Mantle opened, *Gerbillon* obſerved, that his Arms were naked up to the Shoulders, and that he had no other Cloaths underneath, but red and yellow Scarfs wrapped about his Body: He was alſo ſerved firſt, the Ambaſſadors ſaluting him, by bowing the Head both before and after Tea, according to the Cuſtom of the *Tartars*: But he did not make the leaſt Motion in Return to their Civility.

A LITTLE after a Collation was ſerved-up, a Table was firſt ſet before the living Idol; then one for each of the Ambaſſadors, and the *Mandarins* who attended them: They did the Jeſuits alſo the ſame Honour. The Treat conſiſted of Diſhes of ill-dried Fruits, and thin, long Cakes made of Meal and Oil, which had a very ſtrong Smell. After this Collation, which the Miſſioners did not touch, though highly acceptable to the *Tartars*, Tea was ſerved a ſecond Time. A little after, the ſame Tables were brought-in with Meat: There was on each Side a large Diſh of Beef and Mutton, half-dreſſed, a China-Diſh full of Rice, very white and good, beſides another of Broth, with ſome Salt diſſolved in Water and Vinegar. The ſame Sort of Victuals was ſet before the Ambaſſadors Attendants, who ſat behind.

GERBILLON was ſurprized to ſee how the illuſtrious *Mandarins* devoured this Meat, which was half raw, cold, and ſo tough, that he could not get a Morſel down. But none played their Part ſo well as two *Kalka Tartars*, who fell-on with a ſurprizing Appetite: For each holding a Piece of Fleſh in one Hand, and his Knife in the other, never ceaſed cutting large Gobbets, eſpecially of Fat; which after dipping them in the Salt and Water, they ſwallowed-down. The Tables being removed, Tea was ſerved-in again; after which they converſed for ſome Time. The living Idol kept his Gravity very well: During the whole Time he ſpoke no more than five or ſix Words (and thoſe very ſoftly) in Anſwer to ſome Queſtions of the Ambaſſadors: He was continually rolling his Eyes, looking earneſtly now at one, then at another, and ſometimes vouchſafed to ſmile. The Converſation was kept-up by another *Lama*, who ſeemed to be the Superior: For all the reſt, who waited at Table as well as his Servants, obeyed his Orders.

AFTER this the Ambaſſadors went round the Temple to view the Paintings, which are very coarſe, after the *Chineſe* Manner. This Building is about 45 Foot ſquare: The Middle is an Oblong of 20 Foot by 13, with a very high Cieling, and very lightſome. Around the Oblong are ſmall Squares, with very low and coarſe Cielings. There are 5 Rows of Pillars, which are interrupted by the oblong Square: The Cielings, Walls, and Pillars, are painted in a plain Manner, without Gilding. You ſee no Images, as in other Temples, but Pictures of their Deities painted on the Walls. At the inmoſt Part of the Church is a Throne, or Altar, on which the mock Divinity ſits, under a Canopy of yellow Silk, where he receives the Adoration of the People. On each Hand are ſeveral Lamps, although they ſaw but one lighted. Gerbillon. 1688.

GOING-OUT of the Temple, they aſcended to a pitiful Gallery, that encompaſſes the oblong Square, and has Chambers round it. In one of theſe was a Child of 7 or 8 Years old, with a Lamp burning beſide him, dreſſed and ſeated like the reigning Idol, and ſeems deſigned for his Succeſſor: For theſe Cheats have always a Subſtitute ready, in caſe of Mortality; therefore ſome of the *Mongols* in the Retinue paid the ſame Adoration to this young Impoſtor (who neither ſpoke, nor moved) as they had done to the elder: But the Author did not know whether the Ambaſſadors did ſo [a], becauſe they were in the Chamber before him [b]. *A young Impoſtor.*

OVER the Porch of the Temple was a very neat Room, with a Throne, after the *Tartarian* Manner; and by it a beautiful Table, very finely varniſhed, and inlaid with Mother of Pearl: On this Table was a Cup on a Silver-Stand, and a Spitting-Box of the ſame Metal. This is the Chamber of the pretended God-incarnate; and in another little naſty one, they found a *Lama* ſinging his Prayers, wrote upon Leaves of coarſe black Paper. The Ambaſſadors having taken Leave of the counterfeit Deity, who neither ſtirred from his Seat, nor paid them the leaſt Civility, went to another Temple to viſit the *Lama*, or living *Fo*, who had met them the Day before: But *Pereyra* and the Author returned to the Camp, where he found the Sun's Meridian Altitude the ſame as the Day before. *The Lamas Apartment.*

THE 16th, they laid-in Proviſions for the reſt of their Journey. *Pereyra* was viſited by five *Gentile* Pilgrims of *Hindúſtán*, who were clad much like *Romiſh* Hermits, in a looſe threadbare Cloak of a Dun-Colour, and a Cowl which came-up a little above their Head. Next Day Millet was diſtributed to all the Travellers, as a Preſent from the Emperor; and 400 *Weſt Tartar* Horſemen were preſſed to go with them to the Frontiers of the Kingdom of *Halha*, or *Kalka*, where they were to encamp in Troops. *Gerbillon* found the Sun's Meridian Altitude, taken with all poſſible Exactneſs, 72 Degrees, and near 30. Minutes. *Proviſions for the Journey.*

[a] Could not he have enquired?

[b] *Du Halde's China*, p. 279.

ONE

Travels in Tartary.

ONE of the Ambaſſadors let the Miſſioners know, that he made very little Account of thoſe Impoſtors, and had paid his Adorations merely out of Complaiſance to the other, who deſired it; becauſe, he ſaid his Father had adored the ſame *Lama* in another Body: He farther told them, that the *Lama* who met them the Day of their Arrival, had ingenuouſly confeſſed, that he could not conceive how it was poſſible for him to have exiſted in any other Body, than what he then had: That he had no Proof of it, farther than that the other *Lamas* aſſured him of it, on the Authority of the *Grand Lama*, or High Prieſt, whom they worſhip as a true Deity [a]: That beſides, he remembered nothing of what they ſaid befel him, during thoſe other Lives they told him of.

Confeſſion of a Lama.

Ambaſſadors Superſtition.

A CHRISTIAN of this Town informed the Jeſuits, that every *Lama* keeps a Woman, or two: Moſt of them, at leaſt the better Sort, are *Chineſe*, and the greateſt Traders in all the Country. They came into the very Camp to ſell Horſes, Camels, and Sheep. *Gerbillon* ſaw 3 of them make a Preſent of 4 Camels and 3 Horſes to the chief Ambaſſador [b]; by whom they were very much careſſed, the principal *Lama* being placed near him, on the ſame Carpet; an Honour he would not have ſhewed even to the greateſt *Mandarins*.

2. *Their* Journey *from* Quey-wha-chin, *through the* great Deſart.

Plain of Quendulen.

DURING the three Days that they ſtaid at *Quey-wha-chin*, their Camels being ſurprizingly recruited, the 18th they ſet-forward, and travelled 60 *Li* N.W. among rugged Mountains, ſome of them covered with Verdure; and encamped in a Plain, called *Quendûlen*, by a ſmall Brook which runs acroſs it, and affords good Paſture. They found, in a Bottom, by the Way, ſome Trees, and Plenty of Buſhes.

THE 19th they ſtaid to look for ſtrayed Camels and Horſes. One of the Ambaſſadors loſt 35 in one Night, but they were found again; which was better Luck than others had. This Day it was reſolved to divide into 3 Companies, and each to take a different Rout, as far as the Reſidence of the Emperor *Halha Hân* (or, as the *Chineſe* and *Eaſtern Tartars* call him, *Kalka Hân* [c]) for better Supply of Water and Paſture.

THE 20th, one of the two chief Ambaſſadors, with whom the Jeſuits went, took the Road due North: The other three ſtruck-off more to the Eaſt. They travelled-over Plains covered with Graſs, firſt 30 *Li* due N. 13 N.N.W. 11 N. and 6 N.N.E. then encamped in a very large Plain, near a Rivulet, whoſe Water was extreamly cool from the Nitre, which appears above-Ground, half white, and exceeding ſavory. This makes the Paſture excellent. They ſaw neither Tree, nor Buſh; but 2 or 3 Tents, with ſome Hares and wild Geeſe, called by the *Chineſe*, *Whang-ya*, or *yellow Ducks*; becauſe Part of their Feathers are yellow [d].

THE 21ſt, their Road lay 50 *Li* N. and 30 N.N.W. through an intire Deſart, without Tree, Houſe, or Culture. The Soil moſtly dry and ſandy. They ſaw Partridges, as well as Hares, and yellow wild Geeſe. They encamped by a Brook, where a petty King, or Regulo, tributary to the Emperor, came with his Son to compliment *Kiw-kyew*. He had only 10 or 12 Perſons in his Retinue, all pitiful Fellows, except one dreſſed in Silk. He alighted at a good Diſtance from the Ambaſſadors, out of Reſpect; and having made a ſhort Viſit, mounted again in the ſame Place, *Kiw-kyew* waiting on him juſt without the Tent; to whom next Day he brought a Preſent of Beef, Mutton, and Milk, all carried in Skins dried in the Sun: It was loathſome Victuals, yet delicious to the *Mongols*.

A Mongol Regulo.

KIW-KYEW informed the Author, that this Prince, and moſt of the reſt, dignified by the Emperor with the Title of Regulo [e], might have about 2 or 3000 Subjects, ſcattered-over theſe Deſarts; 4 or 5 Families in one Place, and 7 or 8 in another: That his Riches conſiſted of 300 Horſes, with Oxen, Cows, and Sheep in Proportion; but chiefly in the 5000 *Taïls* given him annually by the Emperor: And that they were ſubject to the preſent *Tartar* Family, while Maſters of *Lyau-tong*, before they conquered *China*.

Mongol Princes, their Condition.

THE

[a] This muſt be the *Grand Lama*, of *Laſſa* in *Tibet*. [b] This was *So-ſan-lau-ya*, a Favourite of the Emperor. [c] Or, *Khalkha Khân*. [d] *Du Halde's China*, p. 280. [e] *Vang*, or *Whang*, in the *Chineſe*.

June 18. *Quendûlen* Plain, N.N.W.	60 *Li*	20. Due N. to a Brook	60 *Li*
		21. To a Brook	80
		23. To a Rivulet, N.W.	50

THE 23d, they travelled about 50 *Li*, almoſt a all the Way N.W. in a beaten Road, through an uneven Country, full of Sand, Nitre, and Saltpetre; to which *Gerbillon* imputes the Intenſeneſs of the Cold, and the Lands throughout this Part of *Tartary* being uncultivated, as there are no Mountains nor Foreſts to the North, whence thoſe piercing Winds could proceed. They encamped in a Valley, with Hills on both Sides, affording excellent Paſture, and watered by a wholeſome Rivulet. They met, on the b Road, ſome *Mongol* Merchants going to *Queywha-chin* (or *Khukhu-hotun*) to ſell Camels and Horſes.

THE 24th, they went but 20 *Li* N. by E. through Plains, and a few Hills ſet with Buſhes and Shrubs, to the ſame Rivulet, where they found Hares, Partridges, wild Geeſe, and Ducks. Next Day they marched 50 *Li* N.W. over Hillocks, moſt of them covered with Broom, the reſt full of Stones, broken Flints, and Rocks c ſticking-out of the Ground. They encamped in a ſmall Plain, by a little Brook of good Water; and ſaw on the Hills ſome Deer, and yellow Goats [a].

THE 26th, 80 *Li* N.N.W. through large ſandy Plains, with not a Buſh, and ſcarce Graſs any-where ſufficient for Cattle. They encamped by a Brook. In the Night the Waggoners heard the Howling of Wolves. Here the Country of the *Kalkas* begins, and they found 5 or 6 of d their Tents.

THE 27th they croſſed little Hills, after marching 25 *Li*; the reſt of the Way through looſe Lands. Hares and Partridges plenty. They dug Pits at their Camp, to get Water. Next Day the Soil was hard Sand. They encamped at the Foot of a Hill, and dug again for Water: Met Troops of *Kalkas*, and ſome Shrubs, but not a Tree. On a riſing Ground they found a ſhining Gritſtone, which ſeemed mixed with Gold. The e 29th, their Road lay between the Hills, through looſe Sands, into a large graſſy Plain of firm Sand. Gerbillon. 1688.

THE 30th, through Plains of the ſame Kind, the Country growing more deſart and barren: Only one Tree appeared, but ſeveral Herds of Deer, and Flocks of Partridges; beſides a wild Mule, exactly like the *European*, but yellowiſh. This Country abounds with them. They dug for Water to ſupply their numerous Cattle. *Kiw-kyew* alone had 400 Horſes, and 120 Camels.

JULY 1. They marched through Plains of burning Sands; ſometimes firm, ſometimes looſe, without Trees, Water, or Paſture. The 2d, they ſaw ſome Trees, and ſpangled Gritſtones; alſo Shrubs with Leaves and Branches, like the Belvedere, amongſt which were the Tracts of wild Mules. Deer and Partridges not ſo numerous as on the preceding Days. *Gerbillon* never ſaw ſuch Flights of Partridges as on the 3d. The 4th, they marched through Plains, and between little Hills. The 5th, they met-with a little Graſs among the Sands, which was the beſt Forage they had had for 5 or 6 Days. The 7th, where they encamped, was a Camp of *Kalka Tartars*. The Soil barren and uneven, as before. Several *Lamas*, and others, came to viſit *Kiw-kyew*. *Plains of burning Sands.*

THE 9th, as the Guides aſſured them, that they muſt travel 7 or 8 Days farther before they ſhould find any Water, or Forage, *Kiw-kyew* reſolved to go meet *So-ſan Lau-ya*, and ſent to deſire that Lord to wait for him. Accordingly, next Day they returned by the ſame Road they had kept for 2 Days paſt. The Author ſaw, upon the Road, a tamed wild Ox of *Tartary*, led in a Halter. He was neither ſo high, nor large, as the common Ox; his Legs being very ſhort, and his Hair long, like the Camel's, but much thicker: He had been exchanged for two Horſes, was quite black, and had a Saddle on his Back: He walked very ſlowly, and heavily. *Change their Rout.* *A wild Ox.*

THE 11th, they kept the ſame Road; and the 12th,

July

2 Journey in Tartary.

12th, travelled 100 *Li* E. and N.E. to meet-with a Water [a]. The 13th, they encamped near the Camp of the *Kalka* Emperor's Brother, who had fled from the *Eluths*, for 8 Days without ſtopping, and taken Refuge here. He was pretty well ſtocked with Cattle and Sheep, and had about 30 ſorry Tents for himſelf, and Attendants: One of whom he ſent to tell *Kiw-kyew*, that being the Son of an Emperor, he could not give Place to him. Yet that Lord went to ſee him, and took Part of an Entertainment; which ſeemed a very b ſlovenly one: For next to the *Kafrs* of the *Cape of Good Hope*, the Author never ſaw a dirtier People. Next Morning he ſent his Compliments to *Kiw-kyew*, by a Prince his Couſin, cloathed in an old dirty Jacket, bordered with an ordinary Skin. His Cap was lined with Ermin, and well-worn. He had a ruddy Face, and a ſneaking Look, and was attended by 4 or 5 frightful, ſlovenly Fellows.

Kalka Emperor's Brother.

His pitiful Train.

GERBILLON was informed, by a *Kalka* in c the Service of the Ambaſſadors Relation, that during the extream Cold in Winter they never ſtir-out of their Tents; in the Middle of which there is always a great Fire [b]. They do not ſeem to be very ſtout; for the *Mohammedan* Karawâns, that travel through their Country, pillage and carry-off with Impunity both them and their Cattle, whom they ſell at *Pe-king*; as was the *Kalka*, who gave this Account.

Kalkas, *not ſtout.*

THE 15th, they encamped at the Foot of a d Rock, where they found Wells ready ſunk, by their Van. As *Kiw-kyew* received Advice, that *So-ſan* and *Ma Lau-ya* continued their March, without Fear of the *Eluths*, the Empire being in Peace with them, he began to repent of having changed his Rout. This Day, and the next, they met-with Troops of flying *Kalkas*, in ſuch a Fright, that they knew not what was become either of their Emperor, or the *Lama* his Brother [c].

They fly the Eluths.

THE 18th, they met-with 2 *Kalka* Camps, and ſome deep Pits of Water. The Road was ſtrewed with Horſes, and other Beaſts, which probably died of Thirſt. The Country never appeared ſo deſolate and barren, as this Day; and the burning Sands heated the Air to ſuch a Degree, by their Reflexion, that it was inſupportable, though the Wind blew very freſh, ſhifting with the Courſe of the Sun. Gerbi 168

THE 19th, the Soil continued ſandy, and uneven. They met with pretty good Forage, but no Water. More Fugitive *Tartars*. They encamped by a Pit, where ſat a poor ſick Woman, deſtitute of Aſſiſtance; and about it many dead Cattle. Here they were informed, that a *Mandarin*, ſent to get Intelligence of the *Kalka* Emperor, and *Lama*, was taken by the *Eluths*; whoſe King, at firſt, treated him roughly, forbidding him to ſpeak to him, unleſs on his Knees: But he bravely refuſed, inſiſting that he was not his Vaſſal, but the Emperor of *China*'s Officer. Being aſked why they came with an Army into the Country, and if it was to aſſiſt the *Kalkas*? He anſwered in the Negative, and that they were going to negotiate a Peace with the *Ruſſians*. Hereupon the King diſmiſſed him, with a Preſent of 200 Sheep, 10 Horſes, and a Camel. On this Report, *Kiw-kyew* was very eaſy, finding he might ſafely continue his Journey. Manda taken P ſoner,

THE 20th, they got to the Place where *So-ſan* *Lau-ya*, *Ma Lau-ya* (the two other Ambaſſadors) and *Pa Lau-ya*, Preſident of the Tribunal of *Ling-fa-ywen*, were encamped, called *Narat*, waiting for *Kiw-kyew*; who was elegantly entertained by the firſt of the three other Ambaſſadors. Next Day *Ma Lau-ya* viſited the Jeſuits, and they waited on *So-ſan*; who diſputed for 2 Hours about Religion with *Pereira*. They the re

THE 22d, two *Mandarins* arrived with Diſpatches from the Emperor; who, hearing of the War between the *Eluths* and *Kalkas*, ordered his Ambaſſadors to return to the Frontiers of *Tartary*, ſubject to him, unleſs they had paſſed the *Kalka* Territories, where the Armies were. He e likewiſe commanded them to acquaint the *Ruſſian* Plenipotentiaries [d] at *Selinga*, with the Cauſe of their Return; and invite them either to come to the Frontiers of his Empire, or find ſome other Method of holding the Conferences. Accordingly Orde tary.

[a] *Du Halde*'s *China*, p. 282, & *ſeq.* [b] What farther is ſaid of their Way of Living, agrees with the Account already given of them. [c] *Du Halde*, as before, *p.* 284. [d] Theſe were *Okolniz*, Lieutenant of *Brunſkoye Theodore Alexieviez Golowin*, and his Colleagues.

To

ingly the 4 Ambaſſadors, glad of the Occaſion, a reſolved to return: But before they ſet-out, wrote to the *Ruſſian* Plenipo's, purſuant to the Emperor's Orders: The Letter [a], which tranſlated into *Latin* by the Jeſuits, was ſigned *Songo-tu*, Captain of the Life-Guards, and Counſellor of State; *Tong-que-kang*, *Kong* [b] of the higheſt Order, Chief of an Imperial Standard, and Uncle to his Imperial Majeſty; *Arnhi*, Preſident of the Tribunal for foreign Affairs; and *Ma Lau-ya*, principal Enſign of an Imperial Standard. The 23d, three *Mandarins*, with a Train of 30 Perſons, ſet-out for *Selingha*, with Orders to return in a Month to a Place appointed.

THE 24th, they began to return, by the Road *Se-ſan Lau-ya* had followed, as the ſhorteſt and beſt of the 4 they had taken: For he computed but 110 Leagues from *Húhû-hotun*, met-with more Forage, and never wanted Water. The 26th and 27th, they ſaw Abundance of Slate, and very fine Pieces of white Marble; which ſhews there muſt be Quarries here. Vaſt Numbers of Horſes, and other Animals, lay dead along the Road. The Country as before, ſometimes level, ſometimes rough, or full of Ups-and-downs. Their Equipage was in bad Condition, and their Horſes extreamly harraſſed. The 29th, through looſe Sands, to ſome Hillocks over-grown with large Buſhes and Shrubs, like the Belvidere [c].

THE 30th, the Author was affected with a Nauſea. The 3d of *Auguſt*, the Ambaſſadors were viſited by a *Kalka Tayki*, or Prince of the Blood, dreſſed in a ſilken Jacket, trimmed with Silver in ſome Places, which did not greatly become him; nor was he much handſomer than the reſt of his Attendants, who were 12 or 13. However, he was honourably received, and nobly entertained. The 5th, the Country was more elevated than the former. They hunted Hares. Every Day, ſince their Return Southward, they ſaw many Coveys of Partridges.

THE 6th, a *Mandarin* brought Word, that the Emperor intended to ſet-out the 11th Inſtant to hunt in *Tartary*, by Way of *Kû-pe-kew*, a great Gate of the Wall to the Eaſt. The 7th, the *Grand Lama* of *Kalka*, the King's Brother, who was encamped but 30 *Li* diſtant, with 1000 Men, ſent to compliment the Ambaſſadors. The 8th, they encamped on the Frontiers of *Kalka*, and Limits of the Empire; where *Gerbillon* found the Latitude 43 Degrees, 12 Minutes, but could not be ſure within 5 Minutes. Next Day he found it 42 Degrees, 51 Minutes. Gerbillon. 1688.

HERE *U Lau-ya*, 2d Preſident of the Tribunal for foreign Affairs, treated the Ambaſſadors, and almoſt all their Retinue, after the *Tartarian* Manner. This Feaſt conſiſted of 2 Diſhes of Meat, ill-haſhed, and half raw; with a large Diſh that held almoſt a whole Sheep cut in Pieces, for each Ambaſſador, ſerved-up in Copper: The reſt had a Diſh between 2, ſerved in ſmall Platters, like Hog-Troughs in *Europe*. There was likewiſe Rice, ſour Milk, and weak Broth, with ſmall Slices of Mutton in it, and *Tartarian* Tea in Plenty. The Diſhes were placed on Mats, which were ſpread on the Sand under a Tent, and ſerved at the ſame Time for Table, Cloth, and Napkins. There was a Sort of Wine, but ſuch, that none, but ſome *Mongols*, durſt venture to taſte it [d]. *Feaſt in the Deſart.*

THE ſame Day a *Mandarin* of the Palace paſſed by, who was ſent by the Emperor to know the King of *Eluth*'s Pretenſions for commencing a War. Mean-time his Majeſty gave Orders to all the *Mongol* Regulos, from *Lyau-tong* to the End of the great Wall, to take Arms, and form Camps on the Frontiers: He alſo detached Part of his Houſhold Troops, under the Command of Regulos, to poſt themſelves beyond the principal Paſſes of the Mountains, along which the great Wall runs, that they might be ready to defeat the Attempts of the *Eluths*, if they ſhould advance towards *China*. *Cautions againſt the Eluths.*

THE 11th, the four *Ta-jin* (or great Officers) ſent *U Lau-ya* to pay their Reſpects to the *Grand Lama* of *Kalka*, whom all the *Mongol Lamas* reverence *A Khutuktu arrives.*

[a] This Letter recites the Occaſion of the War, and Injuries done by *Alexis*, Governor of *Yakſa*, who ſeized the Country of *Hegunniuma*, and other Diſtricts; invading alſo that of *Kûmari*. [b] *Kong* is the chief Dignity of the Empire next to that of the Regulo (or *Vang*) and anſwers to our Dukes and Peers. [c] *Du Halde*'s *China*, p. 285, & *ſeq.* [d] The ſame, *p.* 287.

2 Journey in Tartary.

verence as their Superior, acknowledging him for their chief *Lama*, next to him of *Tibet*, who is their Sovereign Pontiff. There arrived alſo one of the two pretended Immortals from *Huhú-hotun*; whom the great Officers did not fail to viſit, and wait-on next Morning, when he ſet-out for the Place where the *Grand Lama* reſided, although he had not ſtirred-out of his Tent, nor ſo much as ſent to know how they did.

Hunting of Hares,

AFTER his Departure, they went a-hunting Hares; 157 were killed, or taken, in leſs than three Hours, within 3 Rings made by 3 or 400 Men, who were on-foot, with Bows and Arrows. None but the Ambaſſadors, and ſome of the principal Officers, rode-about within the Ring, ſhooting at them: While the poor Creatures ran here and there to find an Out-let; and then attempted to croſs, through a Shower of Arrows, between Peoples Legs, who trod-on, or kicked them back: Some ran with Arrows ſticking in their Bodies, others on three Legs, the fourth being broken. Without the Ring ſtood Footmen, ſome with great Cudgels, others with Dogs, and ſome few with Guns, to prevent any from eſcaping.

And other Game.

THEY remained in their Camp till the 14th, and then ſet-forward to the S. E. towards the Emperor's Hunting-Place. The Country ſtill looſe Sands, yet met-with Forage and Water. The Author's Nauſea ſtill continued, and a Fever came-on, which he cured with Tea and Treacle. The 16th, they ſaw a few Deer, and the Tracts of Flocks of yellow Goats in the Sands. They daily hunted Hares, as they went forward, and met with Partridges; but thoſe found in the ſandy Deſarts are far inferior in Taſte to the *European*, and not worth catching. The 18th, they learned, that the King of *Eluth* [a] advanced Eaſtward towards the Province of *Solon* (in *Eaſtern Tartary*) marching by a River not above 12 Leagues from the Ambaſſadors. The 19th, the Sands were full of high Weeds, which ſheltered Hares [b].

Poſts ſettled.

NEXT Day they encamped by the beſt Spring they had met-with in their whole Journey, in a Valley encompaſſed with Hillocks, over-grown with high Graſs. Here *So-ſan Lau-ya* received a Command to ſettle Poſts in all the Roads of *Weſtern Tartary*, for Conveniency of diſpatching Orders to the Regulos and *Mandarins* encamped along the Frontiers. The 22d, there came a vaſt Number of Partridges to drink at the Spring; ſome of the common Sort, others whoſe Fleſh was blacker, and not ſo well-taſted, called by the *Chineſes*, *Sha-ki*, or, *Sand-Hens*. *Gerbillus* 1688

THE 25th, Orders came for all the *Mandarins*, Horſemen, and others, in the 4 Ambaſſadors Train, to return to *Pe-king*; as they did the next Day: But the *Ta-jin*, and the Jeſuit-Interpreters, were to wait till they received an Anſwer from the *Ruſſians*. The 27th, the Ambaſſadors ſet-forward towards the Emperor's Hunting-Place, finding ſeveral Camps of *Mongols* in the Way, and good Forage. This Day they were feaſted by a *Tayki*, after the *Tartarian* ſlovenly Manner.

A Wolf taken.

THE 28th, the *Ta-jin* ſet-out to hunt yellow Goats in the Ring, or Circle, as before-mentioned. Next Day they returned, and, beſides ſeveral of thoſe Creatures, brought a Wolf they had killed with the reſt: He had a very ſharp Snout, almoſt like a Greyhound's, and his Hair was a little whiter and ſhorter than thoſe of *France*. Although there are neither Woods, nor Buſhes in this Country, yet theſe Beaſts uſually follow the yellow Goats, whereon they prey.

Yellow Goat deſcribed.

THE yellow Goat is a Sort peculiar to this Part of *Tartary*: For it is neither Antelope, Deer, nor Roebuck: The Males have Horns not above a Foot long, and about an Inch thick by the Root, with Knobs at regular Diſtances: They reſemble our Sheep about the Head, and Deer as to their Size and Hair; but their Legs are longer and ſlenderer: So that they are extreamly fleet; and as they run a long while without being tired, no Dog or Greyhound is able to overtake them. Their Fleſh is tender, and taſtes well enough; but the *Tartars* and *Chineſe* know not how to ſeaſon it. Theſe Animals go in great Herds, delighting in the deſart Plains, where there is neither Tree nor Buſh; for one finds none of them in the Woods. They are extreamly fearful, and when they perceive anybody, never reſt till they are out of Sight; not leaping, but always running in a ſtrait Line, not a-breaſt, but in File one after another.

The E... with retreat...

THE 31ſt, a Courier paſſed-by their Camp,

[a] This was the famous *Kaldan*, in the Hiſtory of the *Mongols*, before-mentioned, *p.* 382, *& ſeqq.* [b] *Du Halde's China*, p. 288.

Septem.

with News, that the King of *Eluth* was haſtily returned into his own Dominions, on Information that the *Mohammedan Tartars*, his Neighbours [a], had ravaged his Country, as he had done the Kingdom of *Kalka*.

THE 3d of *September*, *So-ſan Lau-ya* made an Entertainment for the other *Ta-jin*, with a few *Mandarins* and Officers who remained in their Camp: He invited the Jeſuits to eat with him alone, and even at his own Table; while *Kiw-kyew*, *Ma Lau-ya*, and *U Lau-ya*, were ſerved at another near it. The Author never ſaw Meat ſo neatly dreſſed and ſerved-up ſince they began their Journey. As ſoon as it was over, they went to courſing Hares.

THE 4th, an Officer of the Palace, ſent with the Emperor's Compliments to the *Grand Lama* of *Kalka*, rode Poſt by them. He brought-back a *Lama*, who had been diſpatched to ſalute his Majeſty on the Part of his Maſter. This *Lama* was handſome, and well-featured, with a Complexion naturally as white as the *Europeans*, but a little Sun-burnt: He had alſo a more eaſy Carriage; and ſeemed much wittier than any other *Kalka* the Author had met-with. He was cloathed after their Manner, in an old Jacket of red Silk, all ſullied with Greaſe: For theſe Gentlemen uſe no other Napkin to wipe their Fingers and Mouth, but their Cloaths: Accordingly, this *Lama*, after ſupping fat Broth, readily wiped his Mouth with his Sleeve.

THE 7th, their Servants diſcovered a Sort of Salt-Mine, mixed with Sand, about a Foot under-Ground; of which there are many in this Country. The *Mongols*, to purify it, put both together into a Baſon, and pouring-in Water to diſſolve the Salt, they decant it off the Sand into another Veſſel; then boil it, or let it dry in the Sun: Or elſe they procure it more eaſily in Ponds of Rain-Water, which gather in the hollow Grounds, and drying-up by the Sun, leave a Cruſt of very pure and fine Salt, ſometimes a Foot or two thick, which they cut-away by Lumps.

THIS, and the following Days, ſome *Chineſes*, who had ſtrayed in the Deſart, were brought-in by the *Mongols*. One of them had been ſtripped, and enſlaved by a *Kalka*; who happening himſelf to be ſtripped of all, even to his Wife and Children, by another *Kalka*, the *Mongols* obliged this latter to give-up the *Chineſe*, and the Money taken from him: But his Cloaths had been diſpoſed of before [b].

THE 9th, in the Evening three of the principal Officers, who had been ſent to the *Ruſſian* Plenipotentiaries at *Selinga*, arrived in the Camp, with their Anſwer in *Ruſſian*, and a *Latin* Tranſlation. The Jeſuits tranſlated it into *Chineſe*; and the *Ta-jin*, with their Help, into the *Tartarian* Language, that it might be diſpatched away to the Emperor. The Perſon who wrote this Letter ſhewed himſelf a Man of Ability, and well-verſed in public Buſineſs. He ſent them Word, he would continue all the Winter on the Frontiers; and deſired immediate Notice from them, when and where they deſigned to hold the Conferences.

Gerbillon. 1688.

His Character.

THE Meſſengers ſaid the Ambaſſador had the Air of a great Lord; that he had treated them handſomely, and with Diſtinction: However, they complained of ſome Truths that he had told them, and agreed with the *Ta-jin* in ridiculing the Plenipotentiaries, and their Retinue; treating the *Ruſſians* as a mean, ill-mannered, and unpolite People: Who, no Doubt, on their Side, ſays the Author, diverted themſelves at the Expence of the *Chineſe* and *Tartars*. Next Day the ſame Officers, though extreamly fatigued, ſet-out Poſt to carry the *Ruſſians* Anſwer to the Emperor, and give him an Account of what had paſſed at the Interview [c].

3. *The* Ambaſſadors *turn-back to attend the* Emperor.

Orders to return. So-ſan *goes before. The Country improves. A* Thoriamba's *Treat: Meet with Hills. Emperor's Paſtures.* Ulana *Fruit. Agreeable Country, well watered.: Pleaſant Valleys: Timber-Floats. Emperor's large Camp deſcribed: Small, or Hunting-Camp: The Imperial Tents: Way of living, and travelling.* Sirga-tayya.

Orders to return.

THE 11th, they decamped, and went-on hunting Hares; and the 12th, incredible Flights of Sand-Partridges flew into their Camp. The 15th, a Courier brought an Order, requiring their ſpeedy Attendance on the Emperor, where he was hunting; and that his Favourite *So-ſan Lau-ya* (who, it ſeems, had deſired to ſee the Stag-call, his Majeſty's darling Diverſion) ſhould come firſt. *Kiw-kyew*, *Ma Lau-ya*, and the Jeſuits, had Leave to come at their Leiſure: But *U Lau-ya*, with other Officers of his Tribunal, were ordered to ſtay where they were, to obſerve the *Mongols* poſted on the Frontiers, and take-care that the Orders of the Court were ſpeedily diſperſed throughout the Country.

[a] That is, the *Uzbeks*. [b] *Du Halde's China*, p. 289, & *ſeq.* [c] The ſame, *p.* 291.

a Journey in Tartary.

ACCORDINGLY the 16th, they all ſet-out at Day-break, and having accompanied *So-ſan Lau-ya* a little Way, he took-up 25 or 30 Poſt-Horſes for himſelf and Equipages, and left them behind. This Day they ſtarted a few Quails among the Game. The Country as uſual, ſandy and firm, but barren, and full of Salt, which whitened the Surface. The 17th, they pitched near a ſmall Meadow full of Forage, with ſeveral Ponds of Water about it; the moſt commodious and agreeable Place they had encamped in for 3 Months before. More Quails were caught, which taſted delicately enough [a].

So-ſan goes before.

The Country improves.

THE 18th, the Country grew a little more agreeable than before, interſperſed with Hillocks and large Pools of Water, generally brackiſh, and full of Salt-petre: The Soil began alſo to mend; for the Sand had a greater Mixture of Earth, and produced very high Graſs in ſeveral Places: They likewiſe ſaw ſeveral little Camps of the *Mongols*, and ſmall Spots of tilled Land, from which they had gathered their Millet. The Number of Hares leſſened: But that of Partridges and Quails increaſed in the long Graſs. Laſtly, they obſerved two Trees, which were a great Novelty.

A Thoriamba's Treat.

IN the Evening a *Thoriamba*, or *Mongol* Grandee of the Palace, who had been encamped on the Frontiers for 2 Months, came to viſit *Kiw-kyew*, and invited him to dine the next Day in his Camp, 12 or 15 *Li* off. The Treat conſiſted of Mutton, and an ill-dreſſed Gooſe: What the Author reliſhed moſt, was a Sort of pickled Pulſe, prepared with Muſtard (they told him it was the Leaf and Root of the Muſtard itſelf) and Broth made of Mutton-Gravey, which was ſerved-up after Dinner like Tea.

Met with Hills.

THE Country ſtill mended on the 19th, as the Day before. After 25 or 30 *Li*, they croſſed-over Hills; which running from North-Eaſt to South-Weſt, probably join thoſe on which the great Wall is built: They are partly of Sand, mixed with a little Earth, and covered with Graſs. They halted in a Plain, which had ſeveral Ponds, and good Forage, near a Camp of *Mongols*, furniſhed with Wells of good Water. The 20th, they proceeded among low Hills; the Country ſtill improved, being granted to the Princes and *Tartar* Grandees; whoſe Slaves, or Vaſſals, keep their Horſes and Flocks there. The Author ſaw a vaſt Breed of Horſes, as well as Herds of Cattle, belonging to the *Mongol* King's eldeſt Brother, on whom the Emperor had beſtowed thoſe Lands, which are very good, but not much cultivated. *Cerbillon* 168

THE 21ſt, they marched partly among Hills, and partly in a ſpacious Plain, interſperſed with *Mongol* Camps. In the Middle runs a Brook, ſaid to be a Branch of the great River *Lan-ho*: Beyond which, towards the S.E. the Soil is very good; and to the N.W. there are two Towers, built upon an Eminence. They encamped at the End of the Plain, by the Foot of the Hills, near the Camp of the Emperor's *Mongols*, who look-after his Flocks and Breed of Horſes, which graze here. In the Evening *Kiw-kyew*, and *Malau-ya*, ſent *Pereira* a Baſket of ſmall Fruit, named *Ulana*, by the Inhabitants; which he fancied was good for his Nauſea; as both he and *Gerbillon* found it, though half rotten. It is like a ſour Cherry, only a little more clammy, being excellent to help Digeſtion. When full ripe, the Taſte is very agreeable: They grow on ſmall Plants in the Valleys, and among the high Graſs at the Foot of the Hills, in this Part of *Tartary*. *Emperor's Pasture.* *Ulana.*

THE 22d, their Way lay from S.E. to N.E. in a much-beaten Road, winding between Hills, which were very agreeable to the Sight, as well as the Valleys, and little Plains which they formed. One beholds, on every Side, Shrubs, Trees, and Buſhes; which make a Variety of little Groves. The Valleys were filled with ſmall Roſe-Buſhes, wild Pear, and other Trees. There was Abundance of Apricot-Trees on the Declivity of the Mountains; while Filberd and Alder-Trees graced the winding-Banks of 3 or 4 Brooks, affording Fiſh. The Sides of one of them were ſtocked with Cattle, Goats, Oxen, and Sheep. There alſo they ſaw *Mongol* Tents in greater Number than before. This Country belonged to two Princes of the Blood. *Agreeable Country.*

THE Country, on the 23d, was much like the former: But they met-with no Camp, nor Habitation of the *Mongols*. They forded two ſmall Rivers of fine Water, by the laſt of which they encamped, and met with ſeveral little Brooks. Theſe, they ſay, all riſe in *Mount Pecha*, which lies to the N.E. and having run S.W. a pretty While,

While, return Eaſtward, and fall into the Oriental Sea. They always kept the great Road, which the Emperor, and his Train, had made, when they paſſed-through this Country to hunt the Stags, after they had done with the yellow Goats. From their Camp they had a remote Proſpect of Mountains S.E. alſo S. and S.W. all full of Trees, and a pretty large, uneven Plain, diverſified with Shrubs and Buſhes [a].

THE 24th, they advanced along a fine Rivulet, between ſteep Mountains, moſt covered with large Foreſt-Trees, as Pines, Filberd, and Alders; and full of Stags, which they hunted. The two next Days, their Road was in the ſame Valley: They every-where found Forage, wild Roſe-Trees, and Ulana Shrubs, which are not above a Foot and half high, and conſiſt of a ſingle Branch crouded with Fruit. The *Ta-jin* hunted Pheaſants along the River. At 30 *Li* End they croſſed a Mountain into another pleaſant Valley, 2 Leagues wide; having Mountains on each Side, diverſified with Rocks, and little Groves of Pines, Alders, Oaks, and other Trees. The Brooks, that deſcend from the Hills, form a little River. They marched 20 *Li* in this Valley, and the 27th, 80 *Li* Eaſtward; then croſſed it, and paſſed the River, on whoſe Banks they ſaw a great Quantity of bulky Timber, moſtly Fir. This they let float-down the River, when moſt ſwelled, into the Sea of *Japan*; then conveying it into another River, bring it within a Day's Journey of *Pe-king*; which makes Wood for Building very reaſonable there. As the Emperor gives the Merchants free Liberty to fell it, it coſts them nothing but the Labour, and rolling it into the River, which is very near theſe Mountains.

HAVING croſſed this Plain, they went about 25 *Li* N.N.E. in a great Road crouded with Paſſengers, leading directly to the Imperial Camp, which they croſſed, taking-up 3 Quarters of a League, in a Valley called *Puto*. The Body of the Camp conſiſted of Cavalry: In the Front was a Row of Tents, which extended the Breadth of the Valley; with a large Opening in the Middle, ſerving inſtead of a Gate, and guarded by Soldiers: The Brigades were encamped near one another, all in a Line, each making a great Square compoſed of Tents; thoſe of the Officers and Servants being placed in the Middle, with their Standards. Each Square had one or two Openings, for going out and in. The Cattle grazed round the Camp, where likewiſe ſtood the Tents of the Suttlers. At the End of this long Row were erected the Tents of the Court Lords, and the Houſhold of the Emperor, who had his Quarters at the End of the Camp to the N.N.E. But he had removed that Morning, to another Valley more commodious for Stag-Hunting, 25 *Li* farther, whither the Ambaſſadors followed him. Gerbillon. 1688.

THIS ſmall Camp conſiſted of about 1000 or 1200 Tents; at the Head of which, and innermoſt of all, was placed his Majeſty's, ſurrounded with 3 Incloſures: The firſt, compoſed of the Tents of the Guards, which made a Kind of Wall: The ſecond, of ſmall Cords, faſtened to Stakes, diſpoſed Lozenge-wiſe, not much unlike Fiſhing-Nets: The third and innermoſt, of Hangings of coarſe yellow Cloth, being a Square of 50 Paces to a Side, and 6 or 7 Foot high: It had only one Folding-Door, but the two other Incloſures had each a Gate to the E. the S. and W. all with Guards. Between the firſt and ſecond Incloſures were placed the Kitchens, with the Tents of his Majeſty's inferior Officers: Between the 2d and 3d, the Tents of the Officers of the Guards, and Gentlemen of the Bed-chamber [b]. *Small, or Hunting-Camp.*

IN the Middle of the third Incloſure ſtood the Emperor's Tent, like a great Wooden-Cage, of the ſame Form as the reſt, but ſomewhat larger and handſomer. It was covered with coarſe *Chineſe* Stuffs, only the upper-Part had a Wrapper of pretty white Linen, and on the Top appeared a Crown in Gold Embroidery: There were ſeveral other Tents for his Majeſty's Children. On the North-Side were placed thoſe of the Grandees, and Crown-Officers. Two Princes of the Blood had diſtinct Quarters, near the Emperor's: One of them, his eldeſt Brother, who is called the *Grand Regulo*, was of a large Size, well-ſhaped, affable, and popular. They were both dreſſed and mounted as plain as the reſt of the *Mandarins*. *The Imperial Tents.*

WHEN they arrived at the Camp, the Emperor was not returned from the Stag-call; with *ing*, which he is ſo delighted, that he ſpends whole Days in it, ſetting-out two Hours before Light, and not returning till two Hours after Sun-ſet, and ſometimes later. His Proviſions are brought into the Foreſt, where a Bed is made for him, to take *Way of liv-*

Journey in Tartary.

take a little Reſt about Noon. Several Stags were killed this Day. He had not above 100 Perſons in his Train: For he ſeldom goes attended with more than the Gentlemen of his Bedchamber, and ſome Officers of the Guards. They found a great Number of Grandees on Horſeback at the Head of the Camp, waiting for his Majeſty. As ſoon as they heard the Noiſe of the Horſes belonging to his Train (for it was very dark, and there were no Flambeaux) they alighted, and holding every one his Horſe by the Bridle, fell on their Knees by the Road-Side. One of his Sons, about Ten or Eleven, with a little Bow, and Quiver full of Arrows, rode next behind him: The Emperor himſelf carried his Bow and Quiver at his Girdle. When he approached the Camp, they came with Lanthorns to meet him; and being entered, he called for ſomewhat to eat.

And travelling.

Sirga-tayya.

THE 28th and 29th, the Emperor ſpent the Day in the Woods, as uſual; while the Camp removed, by his Order, 50 *Li* farther, to *Sirga-tayya*, marching through Valleys like the former. Halfway they found a fine Spring, full of ſmall Fiſh; and ſoon after met the Emperor's eldeſt Son, not far from his Camp, with only 25 or 30 Attendants, going to call the Stag.

4. *The* Jeſuits *Return from the* Camp *to* Pe-king.

They leave the Camp. Farm-Houſes, and cultivated Country: Beautiful Valley: Poro-hotun *Plain: The River* Tû-ho: *The* Lan-ho: Gan-kya-ton *Village. Great Elevation and Cold: The Cauſes. Populous Country. The Great Wall.* Ku-pe-ku, *and its Fortifications.* She-kya *Fortreſs.* Mi-yung hyen. *Arrive at* Pe-king. *The Weather.* Kalkas *poor and naſty: Way of living: The Women frightful.* Eluth *Invaſion.*

They leave the Camp.

AS ſoon as they were arrived at *Sirga-tayya*, the Jeſuits went to enquire after the Emperor's Health, and to know his Commands. He ſent Word, that having no farther Occaſion for them near his Perſon, he gave them Leave to return to *Pe-king*. Accordingly the 30th, they left the Camp; and having proceeded 80 *Li*, turned aſide to viſit a Farm of *Kiw-kyew*, 30 *Li* farther, at the End of a cultivated Plain. The Road lay over, and between Hills, ſome covered with Ulanas, with which they regaled themſelves. The beſt Sort is the paleſt Red, and taſtes like four Cherries: Some are ſourer, and others extreamly ſweet [a].

Gerbillon 16

THE Farm-Houſe was large, built of Earth and Wood, and thatched with Straw. There belonged to it a large Incloſure of Mud-Walls, ſurrounded with a high Paliſade of Fir, to ſecure the Cattle in the Night from Tigers, who are very numerous in the Mountains. At the Foot of theſe, all-along the Road, they met with Colonies of *Chineſe* Slaves, belonging to the Regulos, Princes, and other Grandees of the Court, to whom the Emperor had given theſe Lands; which are generally well-cultivated, and very fruitful in Millet, and ſmall Beans for their Horſes: But as this Country is extreamly cold in Winter, and the Ground frozen for eight or nine Months together, it will bear neither Wheat, nor Rice. The ſole Buſineſs of theſe Slaves, who have built Houſes of Earth and Wood, at the Foot of theſe Mountains, with each a ſmall Garden, is to cultivate the Ground, and rear the Horſes, Cows, Sheep, Hogs, Geeſe, Ducks, and Fowl, for their Maſters Uſe, eſpecially when they come to hunt with the Emperor.

Farms and Cultivation.

THE River made by the Streams, ſpoken of before, glides along the great Valley, through which the high Road to *Pe-king* lies. This Valley is generally about 3 *Li* in Breadth, but extreamly ſtraightened, in ſome Places, by very ſteep Rocks, whoſe Tops are covered with tall Pines, which yield an agreeable Proſpect. *Gerbillon* never ſaw a more beautiful Landſkip: The River was almoſt covered with maſſy Pieces of Fir, which float down the Current, or are conducted in large Rafts to *Pe-king*: The Stream is very rapid almoſt every-where, and yet winds in ſuch a Manner, that they forded it 6 Times in leſs than half a League: All theſe Parts abound with Pheaſants.

Beautiful Valley.

THE 2d, they travelled 20 *Li*, to regain the high Road they had left the Day before. Having paſſed and re-paſſed the River, they entered on a very agreeable Plain, called *Poro-hotun*, interſperſed with Farms, Hamlets, and Villages; whereof one, towards the End of the Plain, was very large, containing 4 or 5 Temples; and the reſt had at leaſt one apiece, built of Brick, covered with Tiles, and embelliſhed after the *Chineſe* Manner. The Houſes are all built of Wood, Reeds,

October

Journey in Tartary. Reeds, and Earth, and covered with Thatch. In the Plain and Valleys, as far as the Great Wall, they ſow Abundance of *Turkey* Millet, and other ſmall Grain, Flax, and Hemp. Theſe People make a Sort of ſmall Cakes with the Meal of *Indian* Corn, and a Drink, called *Chau-myen*, by ſteeping it in Water: They uſe this Liquor chiefly in Summer, becauſe it is cooling: The Grandees of the Court themſelves drink of it, when they are upon a Journey, mixing a little Sugar; which makes it more cooling, and corrects its Rawneſs.

River Hô. HENCE they regained the high Road, and travelled 80 *Li* farther (though in a direct Line, not above 50 S.W.) winding very much among the Mountains. They firſt entered between frightful Precipices, though crowned with lofty Firs, and other Trees. The River *Tû-ho*, though very rapid, ſo winds among them, that they croſſed it 18 Times in leſs than 40 *Li*, and then came to a pretty large Village; lodging in a wretched Inn, where there was neither Meat, Wine, nor Bread. Abundance of wild Vines grew along theſe narrow Valleys, from which they gathered ſeveral Cluſters of ripe black Grapes, but ſomewhat ſour.

Lan-ho. THE 3d, they travelled 90 *Li*; which, abating 20 for the Circuits about the Mountains, may be reduced to 70. They met-with Plenty of Pheaſants, and forded two Rivers; the *Lan-ho*, at the End of 30 *Li*; and 30 *Li* farther, the *Tau-ho*: Both which run Eaſtward to join the *I-tſû-ho*; which having paſſed, they croſſed a very high Mountain. Thirty *Li* farther, they came to *Gan-kya-ton*, a large Village; beyond which they croſſed another Mountain, and got to a ſmall Hamlet, with an ill-provided Inn, like the former. The Roads over theſe Mountains are commodious enough, being made by the Emperor's Orders, who takes this Way every Year when he goes a-hunting; inſomuch that the Ladies Calaſhes carry them with Eaſe, when they accompany his Majeſty. They met-with Grapes on the wild Vines, and Plenty of wild Pears, in Shape and Taſte like the *French* Foreſt Pears [a].

THE 4th, having proceeded 70 *Li*, they came to a Mountain, whoſe Aſcent was ſmall, but the Deſcent conſiderable. They obſerved alſo, that the Country ſtill grew lower, till they came to *Kû-pe-kew*, a Gate of the Great Wall, where the Horizon is at leaſt 7 or 800 geometrical Paces lower than at *Gan-kya-ton*, but 8 Leagues diſtant. The Author was aſſured, that the Mountain *Pe-cha*, 7 or 8 Days Journey to the North of *Sirga-tayya*, where they had left the Emperor, was elevated 9 *Li* [b] above the Horizon of *China*, although not much higher than the neighbouring Lands: And he had himſelf obſerved, by the Rapidity of the Rivers which flow from the ſame Mountain, that there was a continual Deſcent from North to South.

Gerbillon. 1689.

GERBILLON attributes the great Coldneſs which reigns in this Country, though it lies in the ſame Climate with *France*, not only to this great Elevation of the Land, and vaſt Quantity of Salt and Saltpetre mixed with the Sand; but alſo to two other Cauſes: Firſt, the prodigious Number of Mountains, covered with Wood, and full of Springs: Secondly, the immenſe Space of deſart and uncultivated Land, which reaches from the North-Sea to the Borders of *China*. However that be, the Author obſerves, that it froze Night and Morning for a Month before, often hard, producing Ice an Inch thick; as it did this Day. On the contrary, at *Kû-pe-kew* he was told, that they had no hoar Froſt hitherto, and that it ſeldom fell before the firſt of *October*; which ſenſible Difference, in Places ſo near each other, he ſays, muſt needs be owing to the different Elevation of the Horizons.

Hard Cold, the Cauſes.

THEIR Road lay through Streights of Mountains, and narrow Valleys, where they met-with Hamlets and Houſes, for the moſt Part *Chineſe* Places of Entertainment: For during the Time that the Emperor hunts in theſe Mountains, Crouds of People are continually paſſing between *Pe-king*, and his Camp. Their Stage, though 70 *Li*, may be reduced to 50.

Populous Country.

THE Great Wall (as *Gerbillon* took Notice in ſeveral Places, near *Kû-pe-kew* [c], where there are conſiderable Breaches) conſiſts of 2 Fronts, each not above a Foot and half thick, the Space between being filled with Earth, raiſed to the Parapet: The Wall, as well as the ſquare Towers, has many Battlements, and is built with large ſquare Stones, 6 or 7 Foot above Ground: The reſt is of Brick; the Mortar ſeems to be very good. It is generally no more than 18, 20, or 25 geometrical Foot high; but the Towers are ſeldom fewer than 40, and their Baſis may be

The Great Wall.

[a] *Du Halde's China*, p. 295. [b] Ten make a *French* League. [c] This is the ſame Place, called in ſome *Ruſſian* Journals, *Kapki*; and by the *Tartars*, *Moltojo Toka*, or *Tuka*; which laſt Word anſwers to the *Chineſe* *Kow*, that is, *a Gate*.

Octo-

Journey in Tartary.

be 12 or 15 ſquare; but that leſſens inſenſibly to a the very Top. They have made Steps of Brick, or Stone, on the Platform, between the Parapets, for more eaſily getting up and down. There being 60 or 80 *Li* of narrow Streights between the Mountains from North to South, there are not near ſo many advanced Forts, Intrenchments, and Fortreſſes here, as on that Side where they entered *Tartary* at ſetting-out.

Kû-pe-kew, and

A SMALL fordable River runs at the Foot of the Great Wall in this Place. There are likewiſe two little low Gates; one has Communication with a ſmall Fort on the Eaſt-Side cloſe to the Great Wall; the other Gate communicates with the Suburb of *Kû-pe-kew*, which forms a Kind of Fortreſs: It is encompaſſed with Walls and Towers, like the other, and has two or three Places of Arms, with as many Gates, to paſs in and out: But they ſaw neither Guards, nor Soldiers, at any of them: Nor are they in a Condition to be ſhut; and, in Truth, they are quite needleſs. There yet remain ſeveral Incloſures of Walls in ſome Places, and *Gerbillon* obſerved, that on the Weſtern-Side there was a double Range on two different Chains of Mountains, that met very near the Valley through which they returned into *China*. Though *Kû-pe-kew* is no conſiderable Place, yet they met with large purple Grapes, very fine Peaches, Pears, and other good Fruit. They ſow good Corn in the Lands about it.

Its Fortifications.

She-kya Fortreſs.

THE 5th, their Way lay firſt between Mountains, and then through Valleys; in which they came firſt to a Fortreſs, called *She-hya*, whoſe Walls and Towers begin to decay: The Foundation is Freeſtone, for two Foot; the remaining 20 Foot of Brick. Next *Mi-yung hyen*, a ſmall City; where having reſted, they ſet-forward at Night-Fall, that they might reach *Peking* betimes next Day, and travelled 50 *Li*, ſometimes W. ſometimes S.S.W. and ſometimes S.W. As the Country opened very much, they ſcarcely ſaw any Mountains towards the Eaſt; and thoſe to the Weſt were at a conſiderable Diſtance. The Country was full of Villages and Hamlets, but the Houſes were of Earth and Wood, and thatched with Straw.

Mi-yung hyen.

Arrive at Pe-king.

THE 6th, they travelled 90 *Li*, Part S. and Part S.S. W. and S.W. their S.S. W. Courſe being 85 *Li*. The Country ſtill grew finer and fuller of Hamlets, as they drew near *Pe-king*, where the Miſſioners arrived, very feeble, and tired. They went near 12 or 15 *Li*, all in the *Tartarian* City, before they got to the Jeſuits Houſe.

THE 15th, the Emperor returned to *Pe-king*[a]. In this Journey the Weather was generally very hot and ſweltry, all *June*, *July*, and *Auguſt*: For the whole Time it was frequently rainy, and the Wind very variable. They had often Storms, ſometimes attended with Thunder and Lightening; as *June* 11, 15 and 20; *July* 1; *Auguſt* 20; *September* 13 and 23. *July* 26, ſome Hailſtones fell, as large as Pigeons Eggs. In *September*, the Air grew conſiderably cooler: So that from the 3d of that Month, to the 3d of *October*, they had ſcarce a Day without a Froſt, Night and Morning; with ſometimes Ice an Inch thick, and the Dirt of the Roads hard.

Gerbillon 1688. The Weather.

To ſpeak a Word or two of the *Kalkas*, and the War. Nothing can be imagined worſe than their Tents, which are lower, ſmaller, and poorer, than thoſe of the *Mongols* bordering on *China*: They are likewiſe, as to their Perſons, naſtier, and more deformed; but ſpeak the ſame Language: Their Children go ſtark-naked, and the Parents have nothing but ſorry Linen Garments lined with Wool: Many have no other Cloaths than Sheep-Skins, and thoſe neither dreſſed, nor curried, but only dried in the Sun.

Kalkas and War.

THE Author could ſcarce comprehend, how they could feed ſuch a Number of Camels, Horſes, Cows, and Sheep, as they had, in a Country which ſeemed deſtitute of Forage; and how they themſelves could live amidſt thoſe burning Sands, upon which their Children, and ſome of their Wives, went bare-foot: The Children had their Skin very much Sun-burnt; nevertheleſs the Men ſeemed vigorous and active. Many, of both Sexes, came into the Camp to exchange their Cattle for Linen-Cloth, Tobacco, and Tea. Some made *Kiw-kyew* a Preſent of 2 or 3 Sheep; for which he ordered them Tobacco, and the like. Some of the principal Women alſo came to preſent him with Tea, but in very naſty Diſhes.

Way of living.

THESE latter are modeſtly dreſſed, wearing a Gown, which reaches from their Neck to their Feet: Their Head-Dreſs is ridiculous, being a Bonnet very like the Mens: But to ſee their ugly Faces, with the Ringlets of curled Hair falling down over their Ears, one would take them for real Furies.

The Women.

NEWS was brought, *July* 9, to the Ambaſſadors Camp, that the King of *Eluth* had entered the Country of *Kalka*, and that the Terror of his Arms had put to Flight the *Grand Lama* himſelf, Brother to the Emperor of *Kalka*, who fled to the Frontiers of *China*, as hath been already men-

Journey in Tartary.

mentioned, and they frequently met the flying *Tartars* on the Road. The 23d, the *Mandarin*, who had been ſtopped by the *Eluths*, reported, that their King [a] had ſcarcely 4 or 5000 Horſe with him; that he had pillaged the Country where the King of *Kalka* kept his Court; that he burnt the Temple of the *Grand Lama* [b], with all the Tents, and other Things he could not carry-off; and had made Detachments to ravage the Country on all Sides [c]; but was returned to his own Dominions, on the Occaſion already mentioned [d].

SECT. II.

Gerbillon's *ſecond* Journey *to* Nipchew, *or* Nerchinſkoy, *with the* Chineſe Ambaſſadors, *in* 1689.

1. *The* Road *as far as the* Karu, *or Limits of the* Empire.

Time and Place appointed. Ruſſian *Envoy.* *Jeſuits Audience.* *Ambaſſadors ſet-out.* Kû-pe-kew. *The* Lan-ho. *The River* Iſkiar. *Large Pool.* *Wild-Fowl.* Tahan Nor. *Antiquities.* Taal Nor. *Fiſh, prodigious Quantities.* Kurkuri *River.* *Moving Sands.* Chirkir *Brook, very winding.* Unighet *on the* Chikir. Tezi *and* Sûhutu-pulak. Hûleſtay. *The* Karû, *or Limits.* *Viſit of a* Tayki: *His miſerable Subjects.*

THE 27th of *April*, 1689, the two Jeſuits, *Pereyra* and *Gerbillon*, going to the Emperor's Pleaſure-Houſe, called *Chang-chun-ywen*, to enquire after his Health, were adviſed by *Chau-lau-ya*, to offer their Service to wait-on the Ambaſſadors this Year into *Tartary*; which was accepted of by his Majeſty.

MAY 23, there arrived an Envoy from the *Ruſſian* Plenipotentiaries at *Selingha*, accompanied by about 70 Perſons, with a *Latin* Letter for the Emperor's Miniſters, importing, that his Majeſty was deſired to name a Place of Treaty on the Frontiers, and appoint a Time for his Deputies to meet thoſe of *Ruſſia*. In Anſwer to which, the *Chineſe* Miniſters wrote Word, that his Majeſty appointed *Nip-chew* [e], a City to the N.W. of *Yakſa*, for holding the Conferences, and that the Deputies ſhould ſet-out the 13th of *June* for that Place. Gerbillon. 1689.

THE 5th of *June*, the *Ruſſian* Envoy, with Part of his Train, paid the Jeſuits a Viſit, by the Emperor's Permiſſion, conducted by a *Mandarin*. He was a handſome Perſon, and during his ſhort Stay, gained the Reputation of a Man of Senſe [f]. He behaved always with Civility, and his Anſwers diſcovered much Wit and Judgment. They judged him to be either an *Engliſhman*, or a *Dutchman*; for he had nothing of the *Ruſſian* Pronunciation, underſtood the *Roman* Characters, and read *French* with Eaſe. The Emperor would not ſuffer *Pereyra*, or *Gerbillon*, to repay his Viſit; but gave Leave to *Suarez* and *Bouvet*: Who, when they came-back, ſent him a Preſent of Wine and Grapes; which he returned, by giving each of the two Servants a Sable Skin. Ruſſian Envoy.

THE 10th, the Jeſuits *Thomas*, *Bouvet*, *Pereyra*, and *Gerbillon*, had a private Audience of the Emperor; who talked very graciouſly to them, and made them dine in a Hall near his own Chamber. The 11th, his Majeſty ſent the two laſt each a Saddle, embroidered with the Dragons of the Empire; and next Day they took their Leave of him [g]. Jeſuits Audience.

THE 13th, the Ambaſſadors ſet-out from *Peking*, with 2000 Horſe; and the 14th, after paſſing-through *Mi-yung hyen*, encamped in a Plain, called *Tyau-yu-tay*, that is, *the Fiſhery*. The Ground begins to be full of Stones and Flints, the nearer you approach the Mountains. This Day they diſcovered the Wall; and next Day, after marching along a ſmall River, that paſſes-through the Wall, got to *Kû-pe-kew*, a Town with a poor Citadel, called in *Tartarian*, *Moltojo tuka* [h]. Here entering *Tartary* through the great Gate, they travelled through high and ſteep Mountains 80 *Li*, allowing for the Turnings to *Lang-ſhan*, 4 or 5 *Li* beyond *Ngan-ya-kya-tun*, a great Village. They croſſed the *Lan-ho*, which runs in the Valleys S.E. ſeveral Times, and encamped on its Banks for 4 Days together, Ambaſſadors ſet-out. Kû-pe-kew. The Lan-ho.

2 *Journey in Tartary.*

in the ſame Sort of Country. All the Mountains were covered with Trees, as Oaks, Pines, and the like; the Valleys full of Forage, and watered by Rivulets, beſides the *Lan-ho* and the *Kurkis*; which laſt riſing in *Mount Pe-cha*, after running a conſiderable Way S.W. and S. falls into the *Lan-ho*. They forded it ſeveral Times on the 20th, and encamped beſide it. They did the ſame at its Source next Day, after marching along it the whole Stage. It is full of Fiſh. Here the Country began to open more, but then b was more barren, and diſagreeable. They killed 2 Roebucks, the Mountains being full of Game, and the Valleys of Quails and Pheaſants. The *The River Iſkiar.* 22d, the Country was quite open, and pretty level, ſtored with Forage; but not many Inhabitants. The Hills, on each Hand, naked, with only here and there a Tree. They encamped in *Túrghen Iſkiar*, a Plain on the River *Iſkiar*; which riſing in *Mount Pe-cha*, falls S.W. into the *Lan-ho*, and this into the Eaſtern Sea. c Next Day, the Ambaſſadors were viſited by the Son of a powerful *Mongol* Regulo, accompanied by 3 *Taykis*, or Princes, the Sons of other Regulos. He kept his Court 20 or 30 Leagues off where he had a fixed Habitation of Houſes, very uncommon among the *Mongols*. The 24th, they encamped at *Uſtû-kure*, by a ſmall River, with a rapid Stream, running from N. to S.W. whoſe Banks yield Plenty of good Forage.

Large Pool. THE 25th, the Road lay through little Hills d of moving Sands (thrown-up by the Winds) which you are continually mounting or deſcending: This is very troubleſome, eſpecially for Carriages. The Pool where they encamped, was about 3 or 4 Leagues in Compaſs, and, though ſhallow, is never dry: Its Water is very clear, and wholeſome; its Bottom Slime, and affords very fat and well-taſted Fiſh: Although *Wild Fowl.* neither Reeds, nor Graſs grow in it, they ſaw Abundance of wild-Fowl there. *So-ſan Lau-ya* e having launched a Bark there, which was carried in Pieces on a Camel, killed 4 or 5 Swans, and ſome wild-Geeſe, all without Feathers in their Wings, it being their Moulting-time. They had ſcarce ſet-up their Tents, when the dry Graſs, which covers the Country, took Fire, and by Means of a boiſterous W. Wind, ſpread far and near in an Inſtant; obliging Part of their People to decamp, and all to reſolve never more to pitch among dry Stubble [a]. Gerbillon 1689.

THE 26th and 27th, they paſſed many Hills of moving Sands, digging for Wells. The 1ſt Tahan N. Day they found great Pieces of Ice. The 2d, they encamped near *Tahan Nor*, a Pool 3 Leagues in Compaſs. To the W. appears a little rocky Hill; and before this, 3 ſhattered Walls of a Temple. South of theſe are the Ruins of a little Houſe, and to the North a Grotto, in which you ſee the Remains of a Chapel, with ſeveral Images ſtill ſtanding on the Walls. Here they *Antiq.* found two old broken Coffers, full of Writings, on very long and narrow Slips of Paper, in the *Mongol*, and 2 other Languages: Some of which *Gerbillon* took away. They ſeemed to be Prayers taken from the ſacred Books of the *Lamas*. In the Front of the Grotto ſtands a Pillar of white Marble, 10 or 12 Foot high, and 4 broad, with Dragons carved over the Pedeſtal, which is c about a Foot thick, and on it are cut a great many *Chineſe* Characters, importing, that the Pagod was built by a *Hya-tſe* of the *Ko-lau*'s Tribunal [b], in Honour of *Fo*, during the Empire of the *Mongols* in *China*, and this Part of *Tartary*.

HALF a League from theſe Ruins, which lie Taal in a vaſt Plain, 15 or 20 Leagues in Compaſs, and quite ſurrounded by little Hills, except on the Weſt; they ſaw a great Salt-Lake, called *Taal Nor* [c], 15 or 16 Leagues in Circumference, in which, they ſay, 4 ſmall Rivers loſe themſelves. It was very ſhallow on the South-Side, where they were; but it is ſaid to be very deep towards the Middle; the Bottom is ſandy. There appeared neither Ruſhes, Reeds, nor Graſs on it; but Abundance of Swans, wild-Geeſe, Ducks, and other Water-Fowl. It is ſo full of Fiſh, F that at three Draughts of a large Net, they caught above 20,000, all of one Sort, and of different Sizes, but none over a Foot in Length: It required 60 Men to draw it on Shore. In 3 Draughts with this Net, and another much leſſer, they could not take fewer than 30,000. This Fiſh has Scales like a Carp, but is much leaner. There were enough to ſerve the Ambaſſadors Train, conſiſting of 6 or 7000 Perſons. Multitudes ran, ſome with Sacks or Waggons, others with Camels or Horſes, to make Proviſion of them.

[a] *Du Halde*'s *China*, p. 302. [b] The *Hya-tſe* are thoſe immediately under the *Ko-lau*. [c] *Nor*, in the *Mongol* Language, ſignifies *a Lake*.

Journey in Tartary.

them. What is ſurprizing, the Nets were caſt in no more than two Foot and half of Water; but the farther they went in, the bigger they met-with, and in greater Quantity. They ſaw two that had on their Gills a Kind of Wart, like a Clot of Spawn.

THE 28th, their Road lay through a ſandy Plain, and very level. Twice they croſſed a little River, ſaid to run S.W. into the *Taal Nor*. They encamped in a Place called *Obûlong*, by another ſmall fordable River, called *Kûrkûri*, b which riſes in the Mountains N.E. of the Plain, and winds along the ſame to the S. and S.W. through fine Meadows, abounding with Forage. Here they received Proviſions, ſent by the Emperor, of 200 Oxen, and 2000 Sheep. As many came by another Road, with 3000 Horſes, and 1000 Camels, laden with Rice, which were to join them at *Nipchew*, or on the Road, as Occaſion required.

THE 29th, they travelled over 3 Plains, di- c vided by Hillocks of moving Sands. The laſt Plain is watered with a fine Brook, called *Chirkir*, that runs N. and N.E. They encamped on the Banks, in a Place called *Chirkir Sekien*, that is, *the Source of the* Chirkir.

JULY 1, at the End of 45, or 50 *Li*, N.N.E. they entered the narrow Paſſes of Mountains, higher than the former, with only a few Trees and Buſhes at the Foot of them. They often croſſed the *Chirkir*, which, though it winds d much, is very ſwift: Whence it appears, that the Land falls conſiderably in advancing Northward. The Plains watered by the *Chirkir*, are never without Store of good Forage. They encamped in a Valley, called *Hapſheli-pûlom*, on that River which is always pretty low, and in this Place no better than a Brook. Though their Stage was 66 *Li*, yet, on Account of the Windings among the Hills from E.N.E. to N.W. they ſhould be reduced to 55.

THE 2d, their Road was through a large Plain, 5 or 6 Leagues wide from E. to W. full of yellow Goats, which they chaſed, and killed ſome. The *Chirkir* winds along it, but with ſo ſmall a Stream, that in the Place where they encamped, it was almoſt quite dried-up. The 3d, after marching 40 *Li*, they entered Hillocks of a looſe Sand, for 3 or 4 *Li*, then through Plains: In one of which, called *Shari-pûritun*, which ſignifies, *there is Wood to burn*, they encamped, on the Banks of the *Chirkir*, which is deeper here. All the Way they chaced yellow Goats and Hares, which abound on the Heights and Bottoms of the looſe Sands, and in the high Graſs in the Plain: There are alſo Sand-Partridges, and ſome true Partridges [a].

Gerbillon. 1689.

THE 4th, they had a flat Country of looſe Unighet on the Chikir. Sands, and bare of Trees, to *Unighet*, that is, *the Place where there is Water and Forage*, on the Side of the *Chirkir*, whoſe Stream was very ſmall. Next Day, they encamped near *Tezi-pulak*, a Spring of very good Water: And the 6th, in a Plain called *Sûhutu-pulak*, by another ſuch Spring. They hunted Hares, and yellow Goats, by the Way, and met-with but little Forage. The 7th, they had about 20 *Li* of Hills in their Road, and then entered a flat open c Country, as before. They encamped by a Brook, ſhaded with Trees; along which they marched for a While, in a Place called by the *Mongols*, *Hûlaſtaye*, where there was good Water and Forage.

Tezi, and Sûhutu-pulak.

Hûleſtay.

THE 8th, through a more uneven Deſart than before, to *Tonnedadu Nobaſſûkin*, on the Banks of the *Ughęſchin* [b], a little River, that does not run far. It is without the *Karû*, or Limits of the Empire; yet not in the Dominions of *Kalka*, Karû, or Limits. but is, as it were, a neutral Place between both.

AT *Chona*, a Rivulet beyond the Marſhes, where next Day they encamped, a Prince of the Blood-Royal of *Kalka* came to meet the Ambaſſadors. As ſoon as he drew near, they alighted on both Sides, and the *Tayki* advancing, fell on his Knees, to enquire after the Emperor's Health: Then riſing-up, he ſaluted them, by touching both their Hands with his own: After which he took Horſe again, and returned to his Camp not e far diſtant. This Prince, who ſeemed to be in Years, was flat-faced, but very fair complexioned: He had very few Attendants, beſides 3 or 4 Viſit of a Tayki. Perſons, who were either his Sons, or near Relations, and had ſilk Veſts on as well as himſelf: The reſt were miſerably clad, and made a pitiful Figure. In the Evening he ſent 6 Oxen, and 150 Sheep, to the Ambaſſadors; who paid double

ble the Worth in Silks, Linen, Tea, and Tobacco.

His miserable Subjects.

THIS *Tayki* was forced to quit his Northern Territories, for Fear of the *Russians*, with whom the *Kalka Tartars* have no good Understanding; and no less dreaded the *Tartars* of *Eluth*, who the Year before had ravaged their Country. He has about 1000 Subjects, or rather Slaves; who are extreamly poor, leading the most miserable Life that can be imagined. In Autumn they sometimes go to hunt yellow Goats in the open Countries, or other Beasts in the Woods. All the rest of the Year is spent in their wretched Tents, where they dream away their Time without Reading, Gaming, or any other Kind of Employment, except drinking their *Aqua vitæ*, when they have it, and sleeping. Here they changed their tired Horses and Camels, with the *Kalkas*, for fresh ones, giving them Silk, Tea, and Tobacco to-boot [a].

Chorchi Kebur.

THE 11th, they travelled through a Country full of Forage, to *Chorchi Kebur*, a Place by a small Pool. Here the Author found the Sun's Meridian Altitude, by 2 Quadrants; 65 Degrees, 15 Minutes, by the larger of a Foot Radius, and 65 Degrees, 30 Minutes, by the lesser. Next Day, at *Holostay Pulak*, where there is a good Spring, they met-with the best Forage they had yet. This Day, and the 13th, they advanced among Hillocks, hunting all the Way. They marched in Form of a Half-Moon, till they came to their Camp: Then closing the Horns of it, to make a Circle, killed 2 young Wolves, and 60 yellow Goats, under a Year old; for the large ones escaped through Showers of Arrows: Their Flesh was distributed among the Soldiers. Among the rest was killed a young wild Mule, which the *Mongols* call *Chiktey*, a Female of a Sort that propagate: It had large Ears, a long Head, a slender Body, and long Legs: Its Hair of an Ash-Colour; its Hoofs and Feet uncloven, like other Mules.

Holostay Pulak.

Gerbillæ 1689

Propagating Mules.

THE 14th, being encamped at *Erdeni-Tolo-whey*, a *Kalka Tayki*, who lived pretty far Eastward, came to visit the Ambassadors, and offered them a Present of Cattle: But they did not accept of them. He had a better Aspect than those they had seen before; was clad in red Taffety, and his Attendants had all green Jackets, some of Silk, some of Linen. This Day, and the 2 following, the Country was pretty rugged and open, full of Forage, but without Trees, Bushes, or considerable Hills. They met also with some Pools of Water. They encamped the 16th, on the farther Bank of the *Kerlon* [b], where was excellent Grass above a Foot high.

Erdeni-Tolo-whey.

River Kerlon.

THIS is a moderate River, rising in the Mountain *Kentey*, 170 or 180 Leagues distant W. by N. Its Course is from W. to E. winding sometimes to the N. or S. It was but 15 geometrical Paces wide, and 3 deep, in the Place where they crossed it; which is 25 or 30 Leagues from the Lake, called by the *Tartars*, *Kûlon*; and by the *Russians*, *Dalay*, into which it falls. Its Bottom is Mud: It is full of Fish, large and good, which they caught with the Nets. Among them were Abundance of Carp, and a Kind of white Fish, which is very fat and delicious. The Sun's Meridian Altitude was 63 Degrees, 15 Minutes, by the larger Quadrant, and 63 Degrees, 30 Minutes, by the smaller.

Hûtu-baydu.

THE 17th and 18th, the Country was much like the former. The last Day they saw 3 little Lakes, or Pools, not far asunder: *Hûtû-baydu*, the Place where they encamped, was beside the third, which was stocked with River-Fowl, and near a cool Spring. Here 2 or 3 *Taykis* came to salute the Ambassadors, and offer Presents; which were not accepted. They had retired beyond the *Kerlon*, for Fear of the *Russians* [c].

THE 19th, at the End of 60 *Li*, they came to

to a Pond with Ducks on it. They likewiſe ſaw a certain Animals, called by the *Mongols*, *Tarbiki*: Theſe make Holes in the Earth, where they live all Winter, on their Summer Proviſion of Graſs, which is their only Food. Their Hair is much of the ſame Colour as the Wolf's, but finer and ſofter. They reſemble the Otter in Size and Shape: Their Fleſh is ſaid to be very delicious. There was Plenty of Quails, which were catched by Hawks. They encamped by the Side of a large Spring of excellent Water, which forming a little Brook, falls into a Lake near it, called *Obodu Nor*. There came two more *Kalka Taykis* from beyond the *Kerlon*, to compliment the Ambaſſadors.

THE 20th, they met-with ſeveral Pools. The Country like the former. This Day they began to be peſtered with Gnats, which harboured in the long Graſs. Juſt before they came to *Olon Nor*, a pretty large Pool, they paſſed a Spring, which forming a little Brook, waters a ſpacious Plain. The 21ſt, they had more uneven Travelling, and more Gnats; but a better Soil. They met-with ſeveral little Pools, and one larger, with Ducks on it, 20 *Li* before they came to *Hûleochi Pûlak*, a ſmall Brook of good Water. It runs between Hills covered with Forage; but without Tree, or Buſh.

THE 22d, they croſſed a pretty little Brook, about the Middle of their Stage. The Soil ſeemed to improve, and be fit for Corn, or ſmall Grain. At firſt it was uneven. The laſt 20 *Li* were through a vaſt Plain, bounded on the N. by Hills. They turned-off a little to the W. and encamped on an Eminence, one *Li* from *Porchi*, a little River of good Water, only 15 or 20 Paces wide, but much ſwelled with the late Rains. This Stream riſes in the Mountains to the S.S.E. and running very ſwiftly W. N. W. falls into the River *Saghalian*, which paſſes by *Nip-chew*. Its Banks are ſet with large Willow-Trees. Here they were cruelly plagued with Gnats, of which the Country was full.

THE 23d, the River being much ſwollen in the Night, and overflowed, they had much Difficulty to croſs it. The Beaſts loaded with ſuch Things as would not bear wetting, were conveyed-over in 2 Barks, which the Ambaſſadors carried in Pieces. The Horſes waded, the Sheep ſwam. Two Men who could not ſwim, fell-in, and were drowned.

THE 24th, they marched through the ſame ſmooth Plain, very fertile in Forage, being watered by ſeveral Springs and Brooks, beſides ſome Pools. They ſaw nothing but Quails, and the Holes of *Tarbikis*, made in Places ſomewhat elevated, where the Graſs is moſt thick and high. The *Mongols* make Caps and Borders for their Veſts of the Skin. The Author remarked here, as well as elſewhere, that the Rats of this Country bring-together a pretty large Heap of Graſs at the Mouth of their Holes, to feed-on in Winter; an infinite Number of which he ſaw ſcattered over the Plain. Gerbillon. 1689. *Quails.* *Field-Rats.*

ON the Road, an Officer of the Van-Guard, with the *Tartars* called *Kapſhân*, brought to the Ambaſſadors a Troop of 14 *Kalka* Rovers, who had been pillaging the *Ruſſian* Territories, where they had ſlain a *Tartar* of *Solon*, ſubject to *Ruſſia*, and carried-off ſome Women and Children, beſides 12 Horſes; but the former they afterwards left behind. They were ſent-back with the Ambaſſadors Paſs. They encamped beſide a Rivulet, called *Sundê*, which riſes in the Mountains to the E. and E. S. E. and having run for ſome Days Journey to the W. and W. N. W. falls into the *Saghalian*: Its Stream, though winding, is very rapid. *Kalka Rovers.*

THE 25th, advancing a little Way, they croſſed another Rivulet, called *Turghê-pira*; its Courſe like the former: But as it was ſomewhat larger, and the Banks lined with ſtiff Mud, the Paſſage was more difficult. Not far beyond it, the Plain grows narrower, and they entered among the Mountains, which at firſt are covered with nothing but Graſs; but about 30 *Li* farther, are full of Woods. Towards the Top, the Author obſerved a few Pines; but almoſt all the other Trees were of a Kind, which he had not met-with in *Europe*. It is called *Wha-ſhu*, by the *Chineſe*, and does not grow to any great Height: It reſembles the Aſpin, and has, like it, a white Bark, of which they make Sheaths for Knives, and ſuch-like Things. *River Turghê.* *The Wha-ſhu Tree.*

TWENTY *Li* onward, they came to a little Wood, ſo thick ſet with Trees, that the loaded Beaſts had much Difficulty to get through; its Breadth being a Mile and half: But at going-out they were more embarraſſed with Quagmires, where the Cattle ſtuck till unloaded. Thence they continued their Way through Hills, ſome almoſt covered with Woods, which grow thinner the farther you advance Northward. The Paſſes and Declivities abound with Springs and

2 *Journey in* Tartary.

and Brooks, which produce Quagmires. They met with an excellent Forage, the Graſs in ſeveral Places being above a Foot and half high. In all Likelihood Corn would thrive very well here. They encamped on a Brook, called *Hulanghew*, which runs at the Foot of a Hillock to the N. The 80 *Li* they travelled this Day, may be reduced to 70, on Account of the Windings among the Hills [a].

Hulanghew Brook.

THE 26th, after 10 *Li*, they with much Difficulty paſſed a narrow, ſhallow River, but incommoded with Quagmires. They followed the Stream, running with much Rapidity to the N. and N.N.E. and falling 30 *Li* diſtant into the *Wen-tû*, which they alſo forded a little above their Confluence. This River is more than 100 Paces wide, and not five Foot in Depth; but the Ford ſo narrow, and the Current ſo ſtrong, that 4 Men, 30 Horſes, and 7 Camels were loſt. The Road between theſe 2 Rivers is full of Mud and Quagmires, winding and turning among high, ſteep, and unpaſſable Mountains: For theſe Reaſons, the 47 *Li* they marched, may be reduced to 40.

River Wen-tû.

Delicious Fiſh.

THEY encamped 10 *Li* beyond the Ford, on the Northern Banks of the *Wen-tû*; which is ſaid to abound with Fiſh, particularly a large Sort, of a moſt delicious Taſte. This often invites the *Ruſſians* hither, who alſo bring their Cattle to graze in the adjacent Meadows. Here they found a long Pole erected on an Eminence, by the Perſons ſent to compliment the *Ruſſian* Plenipos, with a Paper, dated the 24th, importing, that the Country abounded with Stags, Foxes, Sables, and Ermins; but the bad Roads would not permit Hunting.

News from Nip-chew.

THE 27th, the Ambaſſadors were informed, by one of the Deputies ſent to *Nip-chew* to notify their Approach, that being arrived on the 25th near that City, the Governor next Day came-out of his Houſe to receive them, in a very polite Manner: And when he enquired after the Emperor's Health, bowed his Head to the Ground: He ſaid the Czar's Plenipotentiaries were not yet arrived; but that he had ſent an Expreſs to acquaint them with the Coming of the Ambaſſadors. The ſame Day *Ma Lau-ya*, with all the Soldiers from *Aygû* [b], and the Barks laden with Proviſions, arrived in Sight of *Nip-chew*: The Road to which being full of Sloughs, 5 or 600 Men were detached to lay Faſcines of Boughs and Graſs, to keep the loaden Beaſts from ſinking.

Gerbillo 1680

THE 28th, they travelled among Mountains, through large and very thick Woods of *Wha-ſhû* Trees, without either Brambles, Thorns, or Shrubs: So that the Journey would be very eaſy and pleaſant, but for the Mud and Dirt. The Country is full of Springs, and Fruit-Trees. They gathered Strawberries, like thoſe of *Europe*, both in Shape and Taſte. Some, who had killed ſeveral Stags in the Mountains, reported, that they often found the Tracks of Bears; and that there are wandering *Tartars* in the Woods, little better than Savages. They encamped on the Heights beyond the *Telengon*, a large Brook. Next Day a Deputy, from the Governor of *Nip-chew*, came to compliment the Ambaſſadors, attended by 10 other *Ruſſians*, all a mean Sort of People, clowniſh, and ſomewhat wild in their Behaviour. He made his Compliment ſtanding, and then put-on his Hat, after the Faſhion of his Country. After this being deſired to ſit, they were treated with Tea, and diſmiſſed.

Wha-ſhû Woods. *Fruit-Trees.* *Strawberries.* *Telengon Brook.*

THE 30th, travelled 42 *Li*, reckoning the Windings, all the Way through Mountains, and Woods of *Wha-ſhû* and Fir-Trees: The firſt reſembling Aſh, if it be not Aſh itſelf [c]. They abound alſo with Strawberries, and Springs, which make Quagmires. They met-with little Hamlets on the Road, conſiſting of ſorry Huts, made with Trunks of Fir-Trees, laid one upon another, without any Carpenters Work. In one there was a Chapel, known by the Croſs at-Top. The Inhabitants had retired to *Nip-chew*, on the News of the Ambaſſadors Approach. About theſe Dwellings were tilled Lands, producing very fine Rye, and other ſmall Grain, watered by a Brook, ſeveral of which they paſſed. They encamped beyond the 2d Hamlet, upon little Hills, at the Foot of which runs a ſmall, but fiſhy Brook, called *Ayergon*, which gives its Name to the Hamlets [d].

Mist Hamlets.

THE 31ſt, they marched 44 *Li*; but reckoning the Windings no more than 36 *Li*, E.N.E. they croſſed three large Brooks in the Way. The Country was full of Mountains, but opener than the former: For they did not paſs-through any Woods, except one little Grove of Fir, where Heaps lay ready cut, a Mile and half ſhort of *Nip-chew*, on the Side of the River *Saghalian*, which

[a] *Du Halde*'s *China*, p. 306. [b] This ſeems to be *Tſitſikar*, deſcribed before, *p.* 356. [c] *P.* 687, it is ſaid to be the Aſpin. [d] *Du Halde*, as before, *p.* 307.

which is there above a *Li* wide, though of a good Depth every-where. *Ma Lau-ya*, one of the Emperor's Deputies at the Conferences for Peace, the *Tſyan-kyun*, or General of the Troops at *Aygû*, and in all the Country to the North of *Ula*, two *Kû-ſay-chin*, or Chiefs of the eight Imperial Standards, beſides ſeveral other conſiderable *Mandarins*, came forwards above a League to meet the Ambaſſadors, and enquire after the Emperor's Health, on both Knees.

A LITTLE farther-on, they met another Company of *Mandarins*, who had been baniſhed to *Ula*, *Aygû* [a], *Ninguta*, and other Places of *Eaſtern Tartary*. They were reduced to the Condition of private Soldiers, and employed in the moſt laborious Offices; ſuch as felling Wood for the Emperor's Service, and drawing the Barks. The Beards of moſt of them were grey, and the Dreſs of all melancholy and negligent.

BEING arrived over-againſt *Nip-chew*, they found the Soldiers Tents diſpoſed in Order, upon the Southern Bank, and the Barks with their Flags and Streamers, lying in a Row along it. Near them were 100 others, of a middle Rate, built like Galleys, which went both with Sails and Oars; but were uſually hauled-along with Ropes. Fifteen hundred Soldiers arrived in theſe Barks; who, with the Crew, made at leaſt 3000; to which adding the 1400 Soldiers who came by Land, the *Mandarins*, the Ambaſſadors Guards, their numerous Domeſticks, and Servants, the Whole might amount to 9 or 10,000 Men. There were 3 or 4000 Camels, and at leaſt 15,000 Horſes. *So-ſan Lau-ya* alone had above 300 of the firſt, and 1500 of the latter, beſides 100 Domeſticks to attend him. *Kiw-kyew* had no fewer than 300 Horſes, and 130 Camels, with 80 Servants; and the other *Mandarins* in Proportion.

THE Governor of *Nip-chew* was ſurprized at the Arrival of the Soldiers in the Barks, becauſe he had no Notice given him. He alſo told the firſt Officers, ſent to compliment the *Ruſſian* Plenipotentiaries, that he had Reaſon to complain of their Behaviour: That they had acted as if they came not to treat of Peace, but to make War, and ravage the Country: That they had poſted themſelves about the Fortreſs, and their Intention being aſked, anſwered, They would give no Account, but go where they thought fit. He farther complained, that the Men, who brought the Horſes belonging to the Barks, had ſpoiled the Harveſt along the Road; and ſeizing the Subjects of the Czar's, would have forced a teem to diſcover the *Tartars* of *Solon*, who had ſubmitted to the *Ruſſians*. As ſuch Proceedings were contrary to the Emperor's Inſtructions, and might have kept the Plenipotentiaries back, the Ambaſſadors ſent Notice to the Commander of the Troops, to remove farther from the Fortreſs, and not give the *Ruſſians* any Cauſe of Complaint. Gerbillon. 1689.

THE Place for encamping being marked-out by the *Meyrain Chain*, or Camp Marſhal, on the Bank of the *Saghalian*, the Tents were ranged in great Circles, according to their reſpective Standards: The Commanding-Officer's Tent was within the Circle, thoſe of the inferior Officers and Civil *Mandarins*, without; and each Chief of the Embaſſy in the Center of the Circle belonging to his Standard, which was diſtinguiſhed by 4 Field-Pieces planted at the Entrance, 2 Brocade Banners with the gilt Dragons of the Empire, and 6 Pikes before their Tent. *The Ambaſſadors Camp.*

THE ſame Day, the Governor of *Nip-chew* ſent to compliment the Ambaſſadors on their Arrival; and, *Auguſt* 1, made them a Preſent of 10 Oxen, and 15 very fat Sheep.

TO the Eaſt of the Fortreſs of *Nip-chew* [b], which gives Name to the Place, but beyond Cannon-Shot, are Mountains of a moderate Height; to the Weſt very pleaſant little Hills, diverſified with Woods and arable Lands; to the North, a large open Country bounds the Site; and to the South lies the great Bay [c], near three Quarters of a Mile wide. *Site of* Nip-chew.

BY an Obſervation made very carefully, the 4th of *Auguſt*, with both Quadrants, *Gerbillon* found the Sun's Meridian Altitude 55 Degrees, and about 15 Minutes: Whence the Latitude of *Nip-chew* is 51 Degrees, 56 Minutes; which he judges to be exact. The 8th, he found the Meridian Altitude 54 Degrees, and about 15 Minutes; whence the Latitude 51 Degrees, 49 Minutes.

2 Journey in Tartary.

The Ambaſſadors meet.

AUGUST 1, the Ambaſſadors wrote to the *Ruſſian* Plenipotentiaries to haſten forward; and next Day a Meſſenger came from them, to compliment the *Ta-jin*. He behaved extreamly well for one ſo young, and gave Hopes, that thoſe who ſent him would ſoon arrive. On the 7th, the Secretary of the chief Plenipo brought Word, that though his Maſter was not far-off, he ſhould be detained 9 Days waiting for his Retinue. On the 10th, the Ambaſſadors received an Anſwer from the chief Plenipo, who apologized for his Delay, and promiſed to be at *Nipchew* by the 21ſt. The *Ta-jin* not liking to wait ſo long, ſent three *Mandarins* to compliment the *Ruſſian* Lord, and haſten his March. The 18th, he arrived, and ſent to compliment the Ambaſſadors. The two next Days were ſpent in ſettling Preliminaries.

Order of the

AT laſt it was agreed, that the firſt Conference ſhould be held on the 22d: That the *Chineſe* Ambaſſador ſhould paſs the River with 40 *Mandarins*, and 760 Soldiers, 500 of whom ſhould be drawn-up on the Bank before their Barks, at equal Diſtance from the Place of Conference and the Fortreſs: That the other 260 Men ſhould attend the Ambaſſadors to the Place of Conference, and poſt themſelves at a certain Diſtance behind: That the *Ruſſian* Plenipotentiary ſhould have an equal Number of Guards and Attendants, poſted in the ſame Manner: That the 260 Soldiers, on both Sides, ſhould carry no Arms, but Swords: That the Ambaſſadors ſhould meet under their Tents, which ſhould be placed one beſide the other, as if the two were but one; and that they ſhould ſit in their Tents one over-againſt another.

Conferences regulated.

THE 22d, the Ambaſſadors, and their Train, went and encamped in the Place for holding the Conferences, marked-out by their Camp-Marſhal the Day before. They had agreed, that 500 Soldiers ſhould remain aboard the Barks: But being entire Strangers to the Law of Nations, which renders their Perſons ſacred, and ſecure from Danger, or Inſults, they not caring to truſt the *Ruſſians* too far, poſted them on the Bank of the River. This had like to have ſpoiled all: But by the Interpoſition of the Jeſuits the Matter was accommodated, and the Soldiers ſuffered to remain where they had taken their Quarters: Yet ſtill the Miſſioners had much-ado to get the *Ta-jin* [a] to croſs the River, ſuch Jealouſies had been infuſed into them by the General of the Troops from *Eaſtern Tartary*, who had often been deceived by the *Ruſſians*, when he had any Affair to tranſact with them.

The Chineſe diffident.

THEY were attended by the Officers of their Train, all in their Robes of State: But when they were told with what Pomp the *Ruſſian* Plenipos were advancing, they reſolved to ſet-forward without any Parade, or other Mark of Dignity, than a great ſilk Umbrella, which was carried before each of them [b].

Gerbil. 168

THE 260 *Ruſſian* Soldiers, who were to be near the Place of Conference, came in Battalia with Drums, Fifes, and Bagpipes: Next the Plenipotentiary on Horſeback, followed by his Gentleman, and other Officers, with five Trumpets, and a Kettle-Drum. He had, for his Colleague, the Governor of *Nip-chew*, who preſided alſo over all the Country of the Czar's on this Side; and another Officer of the Chancery, who had the Title of Chancellor of the Embaſſy.

Ruſſian Pomp.

THE chief Ambaſſador was *Theodore Alexieviez Golowin*, Grand-Maſter of the Pantry to the Czars, Lieutenant of *Branxi*, and Son of the Governor-General of *Siberia*, from *Tobolſkoy* to the Eaſtern Sea. He was magnificently dreſſed, in a Gold Brocade Veſt and Coat lined with Sable, the fineſt and blackeſt the Author ever ſaw, worth 1000 Crowns at *Pe-king*. He was a ſhort, corpulent Man, but of a good Preſence, and eaſy Carriage. His Tent was neatly fitted-up, and ſet-off with *Turkey* Carpets. Before him was a Table with two *Perſian* Carpets, one of Silk and Gold: On this Table were his Papers, his Ink-ſtand, and a very neat Watch.

Their Ambaſſ.

THE *Chineſe* Ambaſſadors met under a plain Linen Tent, and ſeated themſelves on a Bench, that had no Ornament but a Cuſhion; which the *Tartars*, who ſit on the Ground, always carry with them. Of the *Ruſſians* none ſat, but the three already mentioned; the two firſt in Chairs of State, and the laſt on a Bench; all the reſt ſtood behind their Principals. On the other Side, excepting the ſeven *Ta-jin*, who had the Title of Ambaſſadors, and a Vote in Council, none ſat but four Camp-Marſhals, *Pereyra*, and the Author. Theſe two Jeſuits were ſeated at the Side of the Ambaſſadors, in the Space between them and the *Ruſſian* Plenipotentiaries, who ſat facing them: The Marſhals had Seats behind, and all the reſt ſtood.

Order

Aſſo

AS ſoon as every-body had taken his Place, a *Poliſh* Gentleman, of the *Ruſſian* Embaſſy, opened their Commiſſion, by Word of Mouth, in *Latin*. After which, the *Chineſe* Ambaſſadors were deſired to produce theirs, and begin the Conferences: But they excuſed themſelves, being willing that the *Ruſſians* ſhould firſt explain themſelves. At length the *Ruſſian* Plenipotentiary aſked, if they had full Power to treat of Peace, and the Limits; offering to ſhew his own, written in Form of Letters Patent: But the *Chineſe* Ambaſſador declined to ſee them, and

[a] This Word ſignifies, *great Men*.

[b] *Du Halde's China*, p. 309, & *ſeq.*

took his Word. It was then agreed not to mention any other Matter, till they had fettled the Limits between the two Empires, which was the main Point.

THE *Ruſſian* Plenipotentiary propoſed the *Saghalian Ula* [a], called by them *Onon Amûr*, for the Boundary: But the Ambaſſadors would by no Means conſent, becauſe ſeveral populous Cities and Territories, beſides the Mountains where Sables are hunted, were on the North-Side of this River. They alſo, to be even with the *Ruſſians*, propoſed, that they ſhould retire beyond *Selengha*, and leave this City, *Nip-chew*, and *Yakſa*, with all their Dependencies, to the *Chineſe* Empire, pretending thoſe Places had formerly belonged to, or paid Tribute to it. Thus the Conferences broke-up for the firſt Day.

THE 23d, the *Ruſſian* Plenipotentiary ſent to enquire after the Health of the Ambaſſadors, and invite them to a 2d Conference. They immediately repaired thither, and a long Time was ſpent in intreating one the other to ſpeak firſt, and make new Propoſals. At length the *Ta-jin* demanded, that the *Ruſſians* ſhould not paſs beyond *Nip-chew*, adding, that they would leave them that Place for Conveniency of their Trade to *China*. The *Ruſſians* anſwered with a Laugh, that they were much obliged to the Ambaſſadors for leaving them in Poſſeſſion of what could not be diſputed. The *Chineſes* vexed at this Raillery, ſent to pack-up their Tents, as if they intended to have no farther Conference with People, by whom they thought themſelves ill-uſed: Yet as they deſired Peace, the Jeſuits had Leave to viſit the *Ruſſians* next Day, as from themſelves, and declare what were the Bounds they intended to inſiſt on; which included *Yakſa*, and the Country about it.

THE Plenipotentiary anſwered, that ſince it was ſo, he deſired the Ambaſſadors to let him know their laſt Reſolution. Accordingly, the 26th, ſending a Deputy to them, the *Ta-jin* ſhewed him a large Map, and pointed-out for Bounds on one Side, a Rivulet, called *Kerbechi* [b], which riſing Northward, near a great Chain of Mountains that extend to the Eaſtern Sea, falls into the *Saghalian*, 30 or 40 Leagues below *Nip-chew*: What lay Weſt of this Rivulet, and beyond the ſaid Mountains, they yielded to *Ruſſia*. On the other Side, that is, to the South of the *Saghalian*, they aſſigned for Boundary the River *Ergone* [c], which riſing in a great Lake [d] to the S.E. of *Nip-chew*, falls likewiſe into the *Saghalian Ula*. They alſo inſiſted, that the *Ruſſians* ſhould not ſettle on the Lands between the *Saghalian*, and a Chain of Mountains a little to the South of that River, nor advance farther into the Land of the *Kalkas*, moſt of whom had lately ſubmitted to the Emperor of *China*: But this laſt Article the *Ruſſians* objecting to, they waved [e]. Gerbillon. 1689.

MATTERS ſeemed to be thus ſettled. But the 27th, when the Jeſuits went to carry the Ambaſſadors final Reſult to the *Ruſſians*, and demand theirs; the chief Plenipo took his Map, and tracing the Bounds a little beyond *Yakſa*, ſaid he would not give-up one Inch. The Jeſuits ſurprized at this unfair Dealing, after they had in Effect conſented to yield that Place, reproached them with having abuſed their Sincerity, and retired. *The* Ruſſians *fly off*

THE *Chineſe* Ambaſſadors hereupon ordered their Troops to paſs the River, and block-up *Nip-chew*. The *Ruſſians* perceiving their Camp in Motion, ſent their Interpreter to endeavour to renew the Negotiations, conſenting to ſurrender *Yakſa*, and that the *Ergona* ſhould be the Bounds of both Empires; in ſhort, to every Thing elſe propoſed by the Ambaſſadors of *China*. Upon this the *Ta-jin*, though loth to truſt them, yet fearing, if the Hopes of Peace ſhould be ruined by ſome Act of Hoſtility (the Troops having croſſed the River) that they ſhould be blamed by the Emperor; they at length permitted *Gerbillon* to go himſelf to the Plenipos, attended only by a few Domeſticks; and he was ſo happy as to bring Matters to an entire Concluſion: At which the Ambaſſadors, who expected him with Fear and Impatience, were filled with Joy. *From their Agreement,*

THE 30th was ſpent in drawing-up the Form of the Treaty, and rendering it into *Latin*, which the Jeſuits carried to the *Ruſſians*; who, *Sept.* 1, ſent Deputies, to deſire an Explanation of one Article, wherein ſomething was inſerted not mentioned before: For it muſt be obſerved, that the Mountains, at the Source of the *Kerbechi*, form two Ridges of high Rocks, one of which extends almoſt due Eaſt, running nearly parallel to the River *Onon*, or *Saghalian*: The other Ridge, called *Noſſe*, runs N.E. entering the Sea, by the *Ruſſian* Map, at near 80 Degrees. Now between theſe two Chains of Mountains lies a vaſt Country, watered by Rivers; on the chief of which, called *Udi*, the *Ruſſians* have ſeveral Colonies. In thoſe Parts the choiceſt Sables, black Foxes, and other Furs are found. Along the Shore alſo, between the Extremities, they catch thoſe huge Fiſh, whoſe Teeth are whiter and harder than Ivory, and in great Eſteem with the *Tartars*, who make Rings of them, to ſave their right Thumbs in drawing the Bow. The Am- *So do the* Chineſe,

[a] Or, River *Saghalian*, the *Tartar* Name. [b] Said in the Original to be near the River *Shorna*, called *Urwon*, in the *Tartarian* Language. [c] *Argona*, or *Argun*. [d] The *Kulon*, or *Dalay*. [e] *Du Halde's China*, p. 312.

Journey in Tartary.

baſſadors being aſked, which of thoſe two Chains was intended by them for the Boundary, anſwered, that called *Noſſe:* On which the Deputies retired, ſaying, that they did not believe their Plenipotentiaries would ever conſent to it [a].

In their Turn.

THE Ambaſſadors not hearing next Day from the *Ruſſians*, found that by aiming at more than they had Orders to demand, they ran the Riſk of breaking-off the Negotiation. In ſhort, in the Evening a *Ruſſian* Horſeman brought a Declaration from the Plenipos, drawn-up in a very good Form, and elegant *Latin*; offering to leave undecided what related to the Country in Diſpute, till they were furniſhed with proper Orders for the Purpoſe, and proteſting, that they would not be anſwerable for the Evils that might enſue, in caſe the Ambaſſadors perſiſted in their Demand. This had all the Effect the *Ruſſians* could have deſired; and, the 3d, the Jeſuits carried the Article relating to the Minutes ſo qualified, that the *Ruſſians* remained ſatisfied.

All Matters ſettled.

AT length after ſettling many little Diſputes about Words, and other Formalities, the Articles of Treaty were concluded, and *Latin* Duplicates drawn-up. In the *Ta-jin*'s Copy, the Emperor of *China* was named before the Great Dukes; and their Ambaſſadors, before the *Ruſſians:* So the Plenipos ſet their Great Dukes and themſelves firſt in their Copy. This Treaty conſiſted of nine Articles [b].

Articles of the Treaty,

BY the firſt, the Bounds of the two Empires were ſettled, as before-mentioned. By the 2d, the Fortreſs built by the *Ruſſians*, in the Place called *Yakſa* [c], was to be demoliſhed, the *Ruſſians* ſettled there withdrawn, and neither Nation to paſs beyond the Bounds to hunt, or plunder, under Pain of Death. 3. All paſt Tranſactions to be buried in Oblivion. 4. Neither Power to receive any Fugitive, or Deſerter, who was to be ſent-back. 5. Such Subjects of one Empire, as were then in the other, to remain as they were. 6. The Subjects of each Empire to have Liberty to go-trade in the other, provided they have Paſſports. 7. The Articles of the Treaty to be reduced to Writing, and punctually obſerved. 8. The chief Ambaſſadors, on each Side, are obliged to give each other two ſealed Copies of the aforeſaid Treaty. 9. The Treaty is to be engraven in the *Tartarian*, *Chineſe*, *Ruſſian*, and *Latin*, upon Stone, to be placed at the Bounds ſettled between the two Empires.

Form of ſigning,

AS ſoon as the Duplicates were finiſhed, the Parties met in great State, in a Tent prepared for the Purpoſe. The *Ruſſian* Plenipotentiaries alighted firſt, and advancing a few Steps to meet the *Chineſe* Ambaſſadors, invited them to enter the Tent firſt, ſaying, it belonged to them. They took their Seats on Benches covered with *Turkey* Carpets, at a Table over-againſt each other. The Jeſuits were ſeated at the upper-End, all the reſt of the Retinue ſtanding-up. Compliments over, *Gerbillon* read aloud the Copy of the Treaty, and then gave it to the *Ruſſian* Interpreter; who alſo read it, while he attended to the Copy. This done, each Party ſigned and ſealed the two Copies that were to be delivered to the other, *viz.* the *Ta-jin*, one in *Tartarian*, and a ſecond in *Latin*; the *Ruſſians*, one in their own Language, and another in *Latin*. However, only the two *Latin* Copies were ſealed, with the Seals of both Nations.

Gerbillon 1689

AFTER this, the Ambaſſadors riſing all together, and holding each the Copies of the Treaties of Peace, ſwore, in the Names of their Maſters, to obſerve them faithfully; taking Almighty God the Sovereign of all Things, to witneſs the Sincerity of their Intentions. On this Occaſion, *Gerbillon* pretends, that the Ambaſſadors had expreſs Orders from the Emperor to ſwear the Peace by the God of the Chriſtians, believing that nothing could influence the *Ruſſians* more to an inviolable Obſervance of the Peace, than their knowing it was ſworn in the Name of the true God; and that they had for the Purpoſe compoſed the Form of an Oath, of which he gives the Tranſlation [d].

And ſo ſwearing.

IN this Oath, there is no Mention of the God of the Chriſtians, only *the Almighty God, the Sovereign of all Things*, by whom they ſwear, and who muſt needs be the true God, is twice referred to: But it ſeems their Deſign was to have read this Form of Oath on their Knees, before an Image of the God of the Chriſtians [e], and to adore him, by proſtrating themſelves on the Ground, according to their Cuſtom; and then to burn the ſaid Formula ſigned with their Hand, and ſealed with the Seal of the Emperor's Troops: But the *Ruſſians*, to whom *Gerbillon* propoſed the Thing from the Ambaſſadors, fearing ſome Superſtition might creep-in, or being unwilling to tie themſelves down to foreign Cuſtoms, ſaid, that each Party ſhould ſwear after his own Manner [f].

THE Peace being thus ſworn, and Exchanges

[a] *Du Halde*'s *China*, p. 313. [b] The ſame, *p.* 314. [c] The Fortreſs was called *Albazin*, by the *Ruſſians*. [d] *Du Halde*, as before, *p.* 315. [e] From hence it ſhould ſeem, that by the God of the Chriſtians, the Jeſuits mean Chriſt, or his Image, *alias* Idol. [f] In which, doubtleſs, they were right: For all Nations have moſt Regard for their own Forms of ſwearing, and often deſpiſe thoſe of others. A Proteſtant has little Security from a Papiſt ſwearing on a Common-Prayer Book, or an *Engliſh* Bible. Beſides, as the *Ruſſians* admit only of Pictures in religious Worſhip, they could not reliſh the Jeſuits foiſting in the Uſe of Images, on any Occaſion.

made

Journey in Tartary. made of the Inſtruments, the Principals on both Sides embraced each other; the Trumpets, Drums, Kettle-Drums, Hautboys, and Fifes, ſounding agreeably all the While. Afterward the Chief of the *Ruſſian* Plenipotentiaries treated the Ambaſſadors with a Collation of Lemon-Peel, and a Kind of Jelly, or Marmalade of Quinces, with very fine, white Sugar, and two or three Sorts of Wine. During the Entertainment, which laſted till an Hour after Night, he intreated them to remain a few Days in their Camp, that they b might converſe together, and taſte the Fruits of the Amity which they had contracted. The *Tajin* having conſented to ſtay one Day longer, took Horſe. They were accompanied to the End of the Town by the Plenipos, who ordered Flambeaux to attend them to the River Side, where their Barks waited to carry them over. It was Midnight before they got to their Camp, which was two Leagues above *Nip-chew*.

THE 8th, the Chief of the *Ruſſian* Plenipo- c tentiaries ſent his Compliments to the Ambaſſadors, with a Preſent of a ſtriking-Clock, three Watches, two Veſſels of Silver gilt, a Teleſcope of about four Feet, a Looking-Glaſs ſomewhat more than a Foot in Height, and ſome Furs. The Value of the Whole could not exceed 5 or 600 Crowns: Beſides, he had ordered almoſt all the beſt Things for the Head of the Embaſſy; at which *Kiw-kyew*, the Emperor's Uncle, ſeemed extreamly offended: But the Jeſuits compoſed the Matter the d beſt they could, by pretending, that the Preſent was deſigned in common for both Ambaſſadors; who accepted it, after making ſome Difficulties, reſolving to keep nothing of it to themſelves, but offer it to the Emperor. Count *Golowin* gave the Miſſioners alſo an Invitation, acknowledging the good Offices they had done his Nation; and promiſing to preſs the Czar's to retaliate them to thoſe of their Society at *Moſkow*.

WHILE they were there, Meſſengers came e from the *Chineſe* Ambaſſadors, with Preſents to him of a Saddle embroidered with Gold, whereon were the Dragons of the Empire, and two little Gold Cups, very neatly made and engraven; alſo a large Parcel of the fineſt *China* Silks, Satins, Damaſk, and Gold Brocade: So that this Preſent made a much better Show, and was more valuable, than that which they had received. There were beſides 100 Pieces of Linen for the Servants, 100 for the *Mongol* Interpreters, 10 Pieces of Silk for the *Latin* Interpreter, and his Secretary: Beſides this, ſeveral Pieces of Silk were ſent to the Governor of *Nip-chew*, and ſome to the Chancellor of the Embaſſy.

WHEN the Jeſuits were about to take Leave of the Plenipotentiaries, their Chief gave them ſome Skins of Sables and *Shûlons*, with ſome Ermins, but of little Value. On which Occaſion *Gerbillon* takes-care to let us know, that the *European* Curioſities, which he preſented that Lord, were as much in Value as his Preſent. From thence they went to ſee the Governor of *Nip-chew*, who likewiſe gave each of them two fine Sables; and the Chancellor of the Embaſſy obliged them to accept of one [a]. Gerbillon. 1689.

4. *The* Author's Return *from* Nip-chew, *to* Pe-king.

They leave Nip-chew: *Repaſs the* Kerlon: Kalka *Emperor's Viſit, Perſon, and Train.* Kalkas *miſerable State: Without Laws, or Order. Death of the Empreſs. The Cattle reduced. Paſs the* Karu, *or Limits. A* Lama *Meſſenger: His cold Reception. Brook of* Chikir. *Leave the old Road. Agreeable Valleys, and Plains.* Mount Pe-cha, *difficult Deſcent. Hot-Water Springs.* Kiw-kyew's *Affliction. The Emperor's Camp: They leave it, and return to* Pe-king. *Emperor learns Mathematics.*

THE 9th of *September*, they left *Nip-chew*, and as they returned by the ſame Road that they came, the Author ſpeaks only of ſuch Matters as he had not mentioned before. Being arrived at the End of their firſt Stage, two *Ruſſian* Officers came to compliment the Ambaſſadors from the Plenipotentiaries: They excuſed their bringing ſo ſmall a Train, and not bearing them Company any farther, for that they durſt not venture near the revolted *Kalkas*. Although the River *Wen-tû* (which falls into the *Saghalian* 3 or 4 *Li* from the Place where they croſſed it) was much ſhallower on the 11th, than when they paſſed it before; yet 3 or 4 Perſons, who fell-off their Horſes, were drowned. But on the 14th they paſſed the *Porchi* with Eaſe. *They leave* Nip-chew,

THE 21ſt, the River *Kerlon* being ſwelled with the Rains, the talleſt Horſes could ſcarce paſs it without ſwimming: So that Part of their Retinue croſſed-over on Camels. Four *Taykis*, or *Kalka* Princes, Relations of *Che-ching Hân*, came to meet the Ambaſſadors, from their *Hân*, or Emperor, who the Year before had become Tributary, or Vaſſal, to the Emperor of *China*, f and in his Name gave 490 Sheep, and 19 Oxen, for the Soldiers: They alſo offered the Ambaſſadors Horſes; but they would not accept of any, returning the Value of the other Animals in Pieces of Silk, Linen, Tea, and the like. They were rejoiced to find, that the Peace was concluded; hoping, through the Emperor's Media- *Repaſs the* Kerlon.

[a] *Du Halde's China*, p. 316.

tion,

2 Journey in Tartary.

tion, to obtain good Terms of the *Ruſſians* for a themſelves.

THE 22d, they hunted the yellow Goats all the Way they went, killing ſeveral, beſides two Wolves, that followed them.

Kalka Emperor's Viſit,

THE 25th, ſome Hours after they had been encamped, the above-mentioned *Kalka* Emperor came in Perſon, accompanied with ſeveral *Taykis*, or Princes of his Houſe, and attended by about 30 Perſons, to viſit the Ambaſſadors; who having had Notice of his Arrival, were aſſembled b in the Tent of *Kiw-kyew* to receive him. All his People, and even the *Taykis*, alighted, on entering the *Quaran* [a], or Circle of Tents, formed by the Soldiers of each Standard; but he advanced to the Middle of the Circle before he diſmounted. The *Ta-jin*, who had ſent to receive him at the Entrance of the *Quaran*, went to meet him to the Place where he alighted. They ſeated him alone, at the upper-End of the Tent, and ranged themſelves on one Side, the *Taykis* c ſitting on the other over-againſt them. The Jeſuits alſo ſat beſide the Ambaſſadors, with a good Number of *Mandarins* belonging to their Retinue.

Perſon, and Train.

THIS Emperor was a young Man, of about 20 Years of Age, tolerably handſome in the Face for a *Kalka Tartar*; who are generally hideous Figures. Both he and the *Taykis* were dreſſed in Veſts of Gold and Silk Brocade of *China*, edged with black Furs. He wore Boots of Satin, and a Bonnet furred with a Kind of white Fox-Skin, d inclining to Aſh-Colour. He ſpoke very little during the Viſit, and eat ſcarce any Thing of the Collation that was ſerved-up: But his Attendants fell-to luſtily, and took-care to leave nothing after them, filling their great Pouch, which they always carry at their Girdle, with the Remainder.

Kalkas miſerable State,

THE *Kalkas*, when the *Eluth* King invaded them, were divided among 3 Emperors, 2 of whom being driven-out of their Dominions e by that Prince, with no more than 7 or 8000 Horſe, became Tributary to *China*. As ſoon as the 3d (who was Father of this *Che-ching Hân*, and kept his pitiful Court upon the *Kerlon*, 70 or 80 Leagues Weſtward of the Place where the Ambaſſadors paſſed it) heard of the Defeat of the other two *Hâns* of his Houſe, he fled to the Eaſt, and took Refuge one or two Days Journey from the Camp, where they reſted on the 25th. At the ſame Time he ſent to the Emperor of f *China*, offering to become his Vaſſal. On his Death, which happened ſhortly after, his Son ſent to *Pe-king*, requiring to be inveſted with the Dignity of Emperor; which Ceremony was performed in *February* before, by *U Lau-ya*. In ſhort, this Emperor is reduced to ſuch Indigence, that he could give but 50 Sheep for the Soldiers, which did not ſuffice for one Meal; and offered each of the Ambaſſadors a Camel, a Horſe, and an Ox; which they would not accept of.

Gerbillon 1688

THE Ambaſſadors exhorted him, and his People, to ſettle ſome Order among them: For they have neither Rewards, nor Puniſhments, but every one lives according to his own Will, without ſubmitting to any Law; the Stronger oppreſs the Weaker, all robbing with Impunity whenever they can, and keep their Word with nobody. It is not poſſible, ſaid they to him, but you muſt deſtroy one another, or elſe be deſtroyed by your Neighbours, who are not willing to ſuffer ſuch Diſorders. In ſhort, moſt of the *Taykis* of this pretended Emperor's Houſe, who are all his Vaſſals, have withdrawn themſelves from his Obedience; ſome have ſubmitted to the *Ruſſians*, others become independent, and almoſt all are as poor as himſelf. When the Viſit was over, *Kiw-kyew*'s Tent was ſo infected with the Stink of theſe *Kalkas* [b], who had ſat there a While, that the Ambaſſadors were forced to leave it, and go take the Air [c].

Without Laws, or Order.

THE 26th, *Che-ching Hân* alſo came to bear the Ambaſſadors Company on Horſe-back, a little Way on the Road; and ſoon after he was returned, *So-ſan Lau-ya*, and *U Lau-ya*, took Poſt by Order, to wait on the Emperor, who left *Pe-king* the 21ſt Inſtant, to hunt the Stag in the Mountains, where they found him the Year before. His Majeſty ſet-out later than uſual, on Account of the Death of the Empreſs, who died of a Miſcarriage. The Mourning continued 27 Days, as uſual. This Princeſs was Daughter of *Kiw-kyew*'s Brother, and Couſin-German of the Emperor, who loved her tenderly. She had been declared Empreſs but on the Morning ſhe died, though ſhe enjoyed almoſt all the Honours of that Dignity, and was the firſt of the 3 Queens. Some People ſaid, the Emperor was unwilling to nominate her Empreſs, though often urged to it by his Grandmother, when alive; and lately by all the ſupream Tribunals, on Occaſion of the Drought; becauſe he looked-on that Title as fatal to the Perſon inveſted with it; the two former Empreſſes, whom he was likewiſe very fond of, having died in Childbed one after the other.

Death of Empr.

THEIR Cattle, for Want of good Forage while at *Nip-chew*, were grown exceeding lean and weak; eſpecially the Camels, who cannot live in a Place where there is no Saltpetre, which makes them ſtrong, and fat. Since they had croſſed the River *Porchi*, they had ſcarce met-with any good Paſture, much leſs Water; moſt

of

Journey in Tartary.

of the Pools they found in going being dried-up, for Want of Rain, and the Graſs all withered: So that a Multitude of tired Beaſts were left on the Road; beſides, ſeveral were ſtolen by the *Kalkas*, who every Night lay on the Lurch to ſeize ſuch as ſtrayed. For this Reaſon the Ambaſſadors diſtributed all the Horſes, ſent by the Emperor, among the Horſemen and Officers, to make-uſe of on Occaſion: Likewiſe all that was left of Silk, Linen, Tea, and the like, in order to be exchanged with the Inhabitants for Camels and Horſes; which Camels, Horſes, Silks, and Linen, however, every one was to return at *Peking*, in either Goods, or Money, according to Cuſtom.

THE 27th, they re-entered the Territories belonging to the Empire of *China*, and paſſed what they call the *Karû*, or *Limits*; where they found the Men, Horſes, and Camels, they had left there, in very good Condition. Here a *Tayki* of *Kalka* came to ſalute *Kiw-kyew*, in Company with 2 or 3 *Mongol Taykis*, who had Orders from the Emperor to convoy Proviſions for the Ambaſſadors Equipage. One of them was a *Ghe-vu*, that is, *married to the Daughter of a Regulo at Pe-king*. He was very handſome, and well-dreſſed: Another was Son of *Karſhianivara*, one of the moſt powerful Regulos ſubject to the Emperor, and neareſt to *Peking*; for his Lands extend as far as *Kû-pe-kew*.

Lama ſigning.

THE 28th, in the Evening, came a Meſſenger from one of the principal *Lamas*, to pay his Maſter's Reſpects to *Kiw-kyew*: But he did not meet with the Careſſes he expected, nor would that Lord receive a Powder, which *Gerbillon* took to be the Aſhes of ſomething that had been uſed by the *Grand Lama*; or, perhaps, ſome of his Excrements pulverized, which the *Mongols* carry, hanging at their Necks in little Bags, as precious Relics [a]. He likewiſe diſmiſſed this *Lama*, without ſhewing him any Mark of Courteſy, or offering him ſo much as a Glaſs of Water. But underſtanding afterwards, that being very old, he deſired to have a little Rice to eat, inſtead of Fleſh; *Kiw-kyew* cauſed a large Quantity to be given him. This *Lama* ſaid, that though his Maſter had been Maſter to *Chemitzuntamba Hútûktû*, Brother of *Tuſhetû Hân*, Chief of the three Emperors of *Kalka*; yet his Diſciple was become more able than himſelf, as having had the Addreſs to get himſelf honoured and adored by great Numbers of People. But he did not take Notice, ſays the Author, that this pretended Skill was nothing but a large Stock of Pride, which at length cauſed the Ruin of his Family, and the Empire of *Kalka*. Gerbillon. 1689.

THE 1ſt of *October*, they encamped in the Plain of *Uneghet*, on the *Chikir*, in the old Place. Next Day, they encamped again on the ſame Rivulet, in a great Plain called *Sharipûritun*. The 4th, they pitched in the Mountains, which they croſſed *July* 1, before. From the 10th of *September*, when it froze, and was extream cold, the Weather was pretty temperate; but, *October* 5, the Cold was ſo violent before Sun-riſe, that not only the Brooks and Ground were frozen, but their very Breath froze as it paſſed-out of their Mouths, and ſtuck to their Beards like Icicles. The reſt of the Day was very cold, but fair. They encamped beyond the Source of the *Chikir*, in a Plain, by a good Spring and little Pool. Between the Hills they ſaw ſome ſcattered Pines [b]. The 6th, about 10 *Li* before they encamped, they quitted the Road they came, paſſing and repaſſing a little River, on which they pitched the 28th of *June* laſt. *Brook of* Chikir.

HERE they left their old Road on the Weſt, taking the Way of *Mount Pe-cha*, and travelling 10 *Li* almoſt due S. declining a little to the E. The 7th, they entered among bare and barren Mountains, though ſome were covered with Trees, generally Pines. The Valleys and narrow Paſſages abounded with good Paſture, which was ſtill green (for it had not ſnowed in theſe Quarters) though in other Places they found it all yellow, and dried-up with the Froſt. They encamped in a Valley, watered with a Brook, 20 *Li* beyond the Mountains *Leave the old Road.*

THE 8th, they continually followed the Courſe of a good Paſture-Valley (through which runs a large Brook of fine Water) between Mountains generally ſteep, and covered partly with Trees, and partly with Rocks. The Valley widening in ſeveral Places, makes agreeable Plains, whoſe Soil ſeems to be good. One *Li* or two before the End of their Stage, they turned ſuddenly S.W. and encamped beyond a little River, or Brook, where they caught a conſiderable Number of ſmall Fiſh, reſembling thoſe called *Vandoiſes*. It was very low, and winding, but ſwift, and ran North-Eaſt. *Agreeable Valleys.* *And Plains.*

October

2 Journey in Tartary.

THE 9th, their Road lay as before, winding a through the Mountains, along two Valleys much like the former, but more pleaſant, and better cultivated by the *Mongols*: Each was watered by a Brook diverſified with Trees, and full of Partridges, Quails, and Pheaſants. They encamped near a 3d Brook, where there was very good Forage.

Mount Pecha,

THE 10th, having marched 40 *Li*, they came to the Foot of *Mount Pecha*, which the *Mongols* call *Hamar Tabahân*. It is a Collection of ſeveral Mountains, whereof ſome are very high, and covered with Pines; the reſt lower, and partly bare. This Place is famous among the *Tartars*, who look upon it as one of the higheſt in the World, becauſe ſeveral Rivers deſcend from it, directing their Courſe E. W. N. and S. It is ſaid never to be without Ice. They ſaw ſome an Inch thick in three little Ponds, in a Valley, and in the Brooks that ran down the N. Side of the Mountain. Moſt of the Trees were dead, and dried-up; which ſome attributed to the great Drought that prevailed this Year throughout the Country; others to the great Cold of late Years.

Difficult Deſcent.

THEY found the Deſcent very rough on the S. Side. The Emperor cauſed a great Road to be made for the Calaſhes of the Queens, who ſometimes followed him thither. They encamped 7 or 8 *Li* from the Foot of it, in a Paſs of the Hills, near a large Brook, deſcending from *Mount Pe-cha*. The whole Place was full of Pheaſants and Roebucks. Conſidering the Winding of the Road, their Stage might be about 50 *Li*.

Hot-Water Springs.

THE 11th, their Road lay along the ſame Valley and Brook, between Mountains, which are neither much covered with Trees, nor very high, but pretty ſteep. Here they found Abundance of Pheaſants, and ſome Hares. In the Way they paſſed near a great Number of hot Springs (forming a large Brook) very famous among the *Tartars*, who there come to bathe and drink of them, when they are troubled with any Diſorder. The Water was exceeding pure, but ſo ſcalding, that the Author could not bear his Hand in it a Moment. Their Baths were nothing but Pits dug in the Ground, and covered with Branches of Trees.

HAVING travelled 60 *Li* in this Valley, they turned-off Weſtward into another Streight of the Mountains, which croſſed the former. Here News was brought to *Kiw-kyew*, of the Death of the Empreſs his Niece, who died the 24th of *Auguſt* of a Miſcarriage. As ſoon as he heard it, he fell a-weeping and ſighing aloud, according to the *Chineſe* and *Tartar* Cuſtom: After which he continued his Journey. Being arrived at the next Poſt-Houſe, which was not far from the Entrance of the Valley, he took Poſt, that he might appear the ſame Day before the Emperor, who was but 60 *Li* diſtant. The reſt encamped there, by the Side of a fine large Brook [a].

THE 12th, they found the Emperor's eldeſt Son encamped, in order to call the Stag, in a little Plain, at the Foot of a Mountain, named by the *Mongols*, *Tayn*. As they approached his Majeſty's Camp, Oxen, Sheep, and Veniſon, he had killed in Hunting, Wine, Butter, and Horſes, were by his Order diſtributed to all the Officers and Soldiers who wanted any. In the Evening thoſe Officers, with *Kiw-kyew* at their Head, and the Jeſuits among them, went to meet the Emperor, waiting in the Dark his Return from Hunting: After which they went and made the uſual Proſtrations before his Tent. He ſent ſeveral Diſhes from his Table, to the Officers and *Mandarins* of the Embaſſy.

PEREYRA and the Author went afterwards by themſelves, to enquire after his Majeſty's Health, and receive his Orders. As it was very late, they could not ſee him; but he cauſed them to be told publickly, that he was well, that he knew they had ſuffered much, and that through their Care the Negotiation of Peace had taken Effect; adding, that they ſhould go and reſt themſelves at *Pe-king*, along with *Kiw-kyew*, who was to ſet-out next Day, leaving the Command of the Troops to a Lieutenant-General.

ACCORDINGLY the 13th, departing with that Lord, they lay in a Village, which belongs to one of the Regulos of *Pe-king*. In all the Country, from *Mount Pe-cha* to the Place where they pitched the 15th, there was ſcarce any Harveſt, on Account of the Drought, which was ſo great, that almoſt all the Brooks were dried-up, and for above a Year there had not fallen Rain enough to moiſten the Ground two Inches deep.

Gerbillon. 1689.

Journey in Tartary.

THE 16th, they entered *China* through the Great Wall, at *Kû-pe-kew*, and lay at a Fort 40 *Li* from *She-hya*. In ſhort, the 18th, they arrived at *Pe-king*, whither the Emperor returned on the 22d [a].

Matters other Mathematics.

THE reſt of this 2d Journal, like the End of the former, relates to Matters, which paſſed afterwards at *Pe-king*, till the Author's next Journey; and, in particular, is taken-up with an Account of his, and other Jeſuits, teaching that Prodigy of a Prince, the Emperor *Kang-hi*, Mathematics. We ſhall therefore, in the next Article, only ſelect a few Things which relate to the Affairs of *Tartary*.

5. *Farther* Occurrences *relating to the War and Defeat of the* Eluths *by the* Emperor's *Forces.*

Ruſſian *Karawân deſtroyed.* Eluth's *new Invaſion. Arbitrary Proceeding, under Sanction of Orders. The Grandees Petition. The Princes ſet-out. The* Eluths *defeated.* Kiw-kyew *ſlain. Emperor's eldeſt Brother proſecuted for Miſconduct: His Defence: Sentence of the Court, and of the Emperor. The Officers puniſhed. Army ſent againſt the* Eluths. *The Emperor's Bounty. Tumult of Slaves: The Offenders puniſhed. The Jeſuits mortified.*

Ruſſian Karawân deſtroyed.

THE 21ſt of *January*, 1690, there arrived a Karawân of *Eluths* and *Mohammedan Tartars*, to traffic. There were among them two *Ruſſians*, and a *Lithuanian*, who came twice to ſee the Jeſuits. This laſt told them, that an Envoy of the Plenipotentiaries of *Ruſſia*, in his Way to this Court through the Country of *Kalka*, had been murdered, with all his Retinue, by the *Kalka Tartars*; who having ſeparated the Company under Pretence of Traffic, cut all their Throats [b].

Eluth's new Invaſion.

THE 25th of *May*, a Troop of *Ruſſians* arrived with an Account, that *Yakſa* had been demoliſhed, according to the Treaty, and Orders given for removing their Settlement to the Weſt of the *Ergona*, as ſoon as Winter was over.

JULY 24. News came, that the King of *Eluth* had advanced with an Army of 20, or 30,000 Men, towards the Territories of the *Mongols* ſubject to this Empire: Whereupon the Emperor reſolved forthwith to reinforce the Troops in thoſe Parts, which are compoſed for the moſt Part of *Mongols*, commanded by their Regulos and *Taykis*. They had already received his Orders to arm, and obſerve the Motions of the *Eluths*; who under Pretence of invading the *Kalkas*, might take Occaſion to fall upon the *Mongols*, if they were not in Condition to oppoſe them. His Majeſty having at the ſame Time publickly declared his Intention to go himſelf in Perſon on that Side, within a Month, to take his uſual Diverſion of Hunting, the Grandees of the Court, and the *Mandarins* of War, both *Tartar* and *Chineſe*, according to Cuſtom, begged earneſtly to be ſent on this Expedition [c].

Arbitrary Proceeding, under Sanction of Orders.

THE 30th, the Emperor being informed, that the Soldiers, who were to march againſt the *Eluths*, could buy no Horſes, but at exceſſive Rates, gave them Power to take all they could find without the *Tartar* City, paying 20 *Taël* for fat Horſes, and 12 for lean ones. This Permiſſion occaſioned great Diſorders, eſpecially in the *Chineſe* City. The Officers preſſed not only Horſes, but even the Mules and Camels. They conſtrained even the moſt conſiderable *Mandarins* they met in the Streets to alight. They entered the Houſe of the principal *Chineſe Ko-lau*, and carried-off all his Beaſts of Carriage: They alſo took Occaſion, under Protection of this Permiſſion, to ſeize Abundance of Arms, Harneſs, and other Things uſeful to Soldiers. The dangerous Conſequences of ſuch a Licence being laid-before the Emperor, who never intended that his Orders ſhould be executed in that Manner, he forthwith commanded every Thing to be reſtored, except the Horſes, which were paid-for according to the Rates fixed by himſelf: He forbid any farther Seizures, and puniſhed thoſe who had committed any Violence. By which Means the Tumult was immediately appeaſed.

Sanction of Orders.

The Grandees Petition.

AUGUST the 2d, the Emperor cauſed 4 or 5000 *Taëls* [d] to be diſtributed among the Soldiers who were immediately to ſet-out for the Army; but he gave nothing to the Officers. Two Days after, the Princes of the Blood, the Officers of the Crown, and the Heads of all the ſupream Tribunals, preſented his Majeſty a Petition, intreating him not to go to the Army, or even to leave *Pe-king*, at this Juncture; becauſe his Departure might occaſion Uneaſineſs and Fear among the People, eſpecially thoſe of the Southern Provinces, who would imagine all was loſt, if they knew his Majeſty had left the Capital.

2. Journey in Tartary.

The Emperor hereupon conſented to defer his Departure for ſome Days. He nominated his eldeſt Brother Generaliſſimo, and granted his eldeſt Son, who was then 19 Years of Age, the Favour he had deſired, of being preſent in this Expedition.

The Princes ſet-out.

THE 9th, thoſe Princes were feaſted by his Majeſty; it being a Cuſtom of the *Tartars* to treat their Kindred on ſuch Occaſions. Next Day, theſe two Princes ſet-out for the general Rendezvous. His Majeſty did them the Honour to bear them Company, with the Prince his appointed Heir, and two more of his Children. The whole Court aſſembled to wait-on the Emperor; but as there were neither Trumpets, nor Kettle-Drums, nor any other Mark of Magnificence, there was ſomething of Sadneſs mixed with the Solemnity. As ſoon as the Emperor had paſſed the Suburbs, he found both Sides of the high Road lined with the Troops, which he there reviewed [a].

The Eluths defeated.

THE 12th, Advice was brought, that the King of *Eluth* had retreated: And *September* 4, an Account came from the Generaliſſimo to his Majeſty, that on Advice of the Enemy's Approach, he decamped, *Sept.* 1, at Day-break, and marched to meet them: Towards Noon coming in Sight, he immediately drew-up his Troops, and advanced: So that about Two o'Clock the two Armies faced each other. The *Eluths* were drawn-up near a Brook at the Foot of a Mountain, behind a Kind of Intrenchment made with their Camels; and in this Poſture expected the *Chineſe*. The Fight began with a great Fire from the Cannon and Muſkets; after which the Armies cloſely engaging, the *Eluths* gave Way with conſiderable Loſs; but by Favour of the Marſhes, they retired in good Order to their Camp.

Kiw-kyew ſlain.

IN this Battle *Kiw-kyew*, the Emperor's maternal Uncle, and one of the Ambaſſadors who went to *Nip-chew*, was killed. *October* 8, his Aſhes [b] were brought to *Pe-king*, in grand Proceſſion. They were incloſed in a little Coffin, covered with the richeſt Gold Brocade, and placed in a cloſe Hearſe inveloped with black Satin, borne by eight Men [c].

THE Emperor ſent his eldeſt and 4th Son to do Honour to the Deceaſed, with Libations. All the Princes of the Blood, great Lords, and Officers, came alſo to pay their Duties to this Nobleman, who was generally beloved and eſteemed, and had the Reputation of an honeſt and charitable Man. He was buried on the 10th, with no leſs Solemnity [d].

Emperor's eldeſt Brother

JANUARY 2, 1690, the Emperor ſet-out to hunt in the Mountains, near the Burying-Place of his Grandmother, where he was to be the 19th, to finiſh the Ceremony of the triennial Mourning, which then expired. Before his Departure, he determined the Proſecution begun againſt his two Brothers, and the general Officers who were at the Battle againſt the *Eluths*: For it is a Cuſtom with the *Tartars* to proſecute the Generals of the Army who are not ſucceſsful in War. Although the King of *Eluth* was put to Flight, yet they were not ſatisfied, becauſe he was not taken or ſlain, and his Troops entirely defeated, as the Emperor's Army was at leaſt four or five Times more numerous [d].

Gerbillon. 1689.

Proſecuted for Miſconduct.

INDEED his Majeſty, to ſhew how little ſatisfied he was with the general Officers, let them encamp in the Mountains of *Tartary* for three Months, with only 4 or 500 Horſemen, having recalled the reſt of the Army; and when his eldeſt Brother returned to *Pe-king*, he would not ſuffer him to enter the City, till he had been examined touching his Conduct. The Prince anſwered in his Defence, that the Enemy being advantageouſly poſted, with a Marſh before them, he did not think it prudent to hazard the Imperial Army too far: Yet confeſſed, that if any Fault was committed, he only was accountable, as General in chief; and if they deemed him culpable, he ſubmitted his Puniſhment to his Majeſty's Pleaſure.

His Defence.

IF the general Officers had undertaken to excuſe their Generaliſſimo, as they might have done, perhaps the Affair had gone no farther: But as every one was for juſtifying himſelf, 3 or 4 of the Grandees of the Empire, who ſerved as Council to him, preſented a Petition, wherein they laid all the Fault on him; accuſing him of Idleneſs, and minding nothing but Hunting and Muſic, and appealed to the Emperor's eldeſt Son as a Witneſs; who was accordingly examined: But he anſwered, that it was not fit for him to accuſe his Uncle. The General alledged, that thoſe who were of his Council, and complained of him, ought to have adviſed him to purſue his Advantage, if they thought it proper; and that, in ſhort, they had ſhewed no more Bravery than himſelf, ſince none of them had received the leaſt Hurt.

Sentence.

THE Tribunal of *Tſing-jin fû*, which tries the Cauſes of the Regulos, the Princes of the Blood, and Officers of the Crown, having examined this Affair, adjudged the Generaliſſimo to be deprived of his Title of Regulo, and the four Grandees, who aſſiſted him as Counſellors, together with the general Officers, to loſe their Places.

[a] *Du Halde's China*, vol. 2. p. 327. [b] It is the *Tartar* Cuſtom to burn the Bodies, and preſerve the Aſhes and Bones. [c] *Du Halde*, as before, *p.* 328. [d] The ſame, *p.* 329. [e] See before, *p.* 329.

THE

Journey in Tartary.

THE Emperor, who deliberated a long Time a on this Affair, at length gave Sentence, That his two Brothers, and the other great Officers, who had the titular Dignities of *Kong*, reſembling thoſe of *French* Dukes and Peers, ſhould loſe 3 Years Revenue; that the 2 Regulos alſo ſhould loſe 3 Companies of their Guards; the other Grandees and general Officers, who had only ſingle Poſts, were reduced from being *Mandarins* of the firſt Order, to be *Mandarins* of the third, but kept their Places. But the Counſellors of b State loſt their Employment; and the Officers who deſerted the great Piece of Cannon, which might have been nailed by the Enemy, had they ſeen their Advantage, were condemned each to receive 100 Laſhes with the Whip, and then were releaſed out of Priſon, where they had been confined.

THE Maſter of the Ordnance, who had been for a long Time one of the principal Gentlemen of the Emperor's Bedchamber, and was then c Governor to ſome of his Children, was reſtored to this laſt Employment, after Sentence inflicted. The *Tartars*, who are all their Emperor's Slaves, eſteem it no Diſhonour to be corrected in this Manner by his Order [a]. Sometimes the chief *Mandarins* are cuffed, kicked, or laſhed, in his Preſence, without being diſgraced, or deprived of their Employments [b].

MARCH the 2d, a Body of 8 or 10,000 Ca- d valry, with Grooms and Valets, who among the *Tartars* ſerve for Soldiers on Occaſion, amounting to 40 or 50,000 Men, ſet-out for *Khukhuhotun* [c]. As they have the Benefit of their Servants Pay, and all military Rewards, they teach them to draw the Bow from their Youth, in order to procure them the Place of a Trooper, or Foot-Soldier [d]. Theſe Troops were ordered thither to obſerve the Motions of the *Eluths*, who made Incurſions on that Side, plundering both the *Kalka* and *Mongol* Subjects of the Empire [e]. e

THE 15th, his Majeſty ordered Part of the Debts of his Houſhold Officers, who uſed to attend him in his Progreſs, to be paid-off, out of his own Treaſury; and gave 800 Livres [f] to each of his *Hyas* (or Guards) and 400 to the inferior Officers, who have no Title: But the Whole amounted to no more than 400,000 Livres [g]; becauſe the Grandees who examined into theſe Debts, meeting with ſome who gave-in falſe Accounts, put none into the Liſt but thoſe they judged un- f able to pay them, whereby ſeveral real Inſolvents were ſtruck-out. Gerbillon. 1689.

THE 29th, the Cavalry, who had no Share in that Diſtribution, becauſe being Slaves they could not contract Debts, aſſembled to the Number of 3 or 4000, about the Palace, to demand ſome Largeſs likewiſe of his Majeſty. As nobody would undertake to deliver their Petition, they continued a long Time in the great Court on their Knees, and bare-headed: But hearing afterwards, that the Emperor was gone to walk in his Garden behind the Palace, they ſurrounded it, and demanded aloud ſome Reward, ſince they were as good Soldiers as the reſt. While the Emperor pretended not to hear them, ſome of the moſt daring paſſed the firſt Gate of the Garden, in Spite of the Guards. *Tumult of Slaves.*

NOTICE being given his Majeſty of their Inſolence, he cauſed eight of the Ring-leaders to be ſeized, and having ordered the reſt to be driven-out with Whips and Cudgels, the Multitude immediately diſperſed. He ſent the eight Soldiers to the Tribunal of Criminals, with Orders to proſecute them without Delay. Accordingly the 30th, in the Morning, the Slave who had carried the Petition was condemned to loſe his Head; and his Maſter, who was his Majeſty's *Hya*, was baniſhed to *Aygu* [h]. His ſeven Companions received the ſame Sentence: But the Emperor was content that they ſhould carry the *Cangue* [i] three Months at the City Gate, and receive an hundred Laſhes [k]. *The Offender's puniſhed.*

WE ſhall conclude this Section with a remarkable Anſwer of the Emperor to the Jeſuits, who were teaching him Mathematics. On their deſiring him to puniſh a *Mandarin*, who had raiſed a Perſecution, as they called it, againſt the *Chineſe* Converts in the Province of *Shantong*, he told them, "That he favoured their "Brethren in the Country *for their Sakes, and* "*for the Services they did him:* But that he did "not pretend to *protect* and *ſupport* the *Chineſe* "Chriſtians, who *valued themſelves on their* (the "Miſſioners) *Credit*, and imagined they had *a* "*Right to do what they pleaſed* [l]." This is an exact Character of the Bigotry and Preſumption inſeparable from Popery; and ſhews what Impoſtors thoſe other Miſſioners were, who pretended that this diſcerning and virtuous Monarch was inclined to embrace their irrational and impious Religion. *The Jeſuits mortified.*

Emperor ſets-out,

MAY 9, the Emperor attended by moſt Part of his Court, ſet-out before Day from *Pe-king*, with a great Body of Troops, to hold an Aſſembly of the States of *Tartary*. *Gerbillon*, accompanied with *Bouvet* the Jeſuit, had Orders to go-along with his Houſhold, and eat with the 8 principal Officers of his Guard, ſitting at the Head of thoſe of the 2d Rank. They dined at the Village *Wan-king*, and lay at the Borough *Nyew-long-ſhan*, where they arrived about Noon. This Day the Emperor ſent the Author Meat and Drink from his own Table: He gave Orders likewiſe, that this Miſſioner ſhould have free Acceſs to his Apartment. A While after, he ſent to aſk about ſome mathematical Books, and to tell him, that it was his Intention, during his Progreſs, to reviſe his practical Geometry; which he did that ſame Evening, and ſo continued to do almoſt conſtantly afterward. Next Day his Majeſty ordered a *Hya*, who was Captain of the *Ruſſians* in his Service (a *Turk* by Deſcent, tho' born at *Pe-king*) to attend *Gerbillon* where-ever he went, and try to learn ſome Words of the *Latin* Tongue, as he ſpoke a little *Ruſſian* [a], but eſpecially to read it.

Studies by the Way,

Keeps himſelf and

THE 11th, the Emperor diverted himſelf at *She-kya*, in the Court before his Chamber, by ſhooting at Sparrows and Pigeons with a Croſs-Bow and Trunk, killing 3 ſucceſſively with the former Inſtrument: After which he retired to repoſe himſelf, as he uſed to do every Day at Noon, during the hot Weather.

Gerbillon 1691

THE 12th, half a *Li* before they got to *Kû-pe-kew*, they found all the *Chineſe* Gariſon of that Fortreſs, conſiſting of 7 or 800 Foot, and 50 Horſe, drawn-up in Order of Battle on the Side of the great Road. The Emperor, after ſtopping a While to view them, rode to an Eminence, and alighted to ſee them exerciſe.

THEY were firſt drawn-up in 8 ſingle Lines, between which was a Space of 5 or 6 Paces. There appeared 50 or 60 Carriages of ſmall Cannon, but without Guns, puſhed-forward by Men. At both Wings of the Infantry were poſted a few Horſe: They made ſeveral Motions, and fired ſeveral Times. The Signal was, a Muſket or 2 let-off from a neighbouring Eminence, which was anſwered by the Battalion, and this by a Noiſe of Horns, Copper-Baſins, and ſuch-like Inſtruments. Their Exerciſe and Motions are nothing like thoſe of the *European* Soldiers; nor could 800 ſuch Infantry ſtand the Charge of 100 *French* Horſe. Yet the Grandees aſked *Gerbillon*, if the Militia of his Nation were to be compared to them. The Emperor himſelf ſent to the Commander a Suit of Cloaths, ſuch as himſelf commonly wears, and a Horſe, in Acknowledgment of his good Diſcipline.

Soldiers in Exerciſe.

THE 14th, at a Houſe on the Road where they dined, his Majeſty ordered a *Kalka* and a *Mongol* to wreſtle, in his Preſence, with one of his *Ha-ha-ſhûs*, reckoned the beſt Wreſtler at the Court, though very ſhort, and not above 25. The *Kalka* threw him twice in a very little Time, which every-body admired at, as well as his Agility and Strength. But the *Mongol*, tho' much more robuſt, could not fling him: So that after grappling a great While, the Emperor cauſed them to leave-off. To wreſtle more commodiouſly, the *Tartars* change their outer-Coat for one of coarſe Linen, girding themſelves as tight as they can; after which each ſeizes his Antagoniſt by the Top of the Shoulder, or upper-Part of the Breaſt, and ſtrives to turn him over by a Leg-lock: The Conqueror runs towards the Emperor, and does him Homage for his Victory.

Wreſtling-Matches.

AFTER this, there was ſhooting with Bows and

Shooting

and Guns, at a Mark, which was a Board the a Bigneſs of one's Hand, at 60 or 70 Paces Diſtance. At this Exerciſe his Majeſty made 30 Shot with a ſingle Bullet, and ſeveral Times hit the Mark, particularly 3 Times running, often charging his Piece himſelf. His 3d Son made 2 Shot, and lodged the Ball once in the Mark: Five or ſix of the Grandees ſhot 2 or 3 Times each, but not one of them hit it. His Majeſty ſhot next, out of two Sorts of Croſs-Bows (one carried Arrows, the other Bullets of burnt Clay) and b always with vaſt Dexterity. At laſt he ſent for 5 of his moſt expert Archers: The beſt of them was the above-mentioned *Kalka*, who ſcarce ever miſſed the Mark. The Emperor likewiſe hit it ſeveral Times, ſhooting equally well with both Hands.

THE 15th, they croſſed 5 or 6 craggy Mountains, the Emperor hunting all the Way. Seven Stags and Mountain-Goats were killed in 2 Rings. When they encamped, his Majeſty ordered a ſmall c Tent to be ſet-up for the Author in the inner Incloſure, where there were none beſides his own, and thoſe of his Sons. Next Day, the Emperor killed 3 Roebucks in 2 Rings; the firſt on the Top, the 2d on the Side of a Mountain, where the Beaſts had lain-down. His Hunters alighted only at the firſt Ring. Theſe People are all *New Manchews*, ſo called, becauſe born in *Eaſtern Tartary*, being employed by his Majeſty for his Guards and Huntſmen. They all at once ſet-up d a Sort of humming Noiſe, to amaze the Roebuck; who, hearing the Sound equally on all Sides, knows not which Way to eſcape. The Emperor rode in full Chace with his Bridle looſe, over Heights and Hollows, drawing his Bow with extraordinary Strength and Dexterity. They marched-back, making a Kind of moving Circles to catch Hares: None but his 2 Sons were ſuffered to ſhoot within the Incloſure. On a Proſpect of Rain, the Emperor, to divert him- e ſelf, took-up a great Pole, and began to beat the Duſt off the Tents; whereupon all the People followed his Example [a].

THE 17th, they encamped in a Valley, called *Kú-pe-kew*, by the little River *Kakiri*. A Ring being made a little beyond the Camp, they incloſed a Roebuck, a Fox, and ſome Hares: The firſt eſcaped, but his Majeſty ſlew the Fox with the firſt Arrow: Afterwards he rode-up to the Brow of a very high and ſteep Mountain covered with Briars. The Author was no leſs ſurprized to ſee his Meſſengers run up and down almoſt as faſt as on a Plain. This Day the Emperor ſtopped on a little Eminence, to take a certain refreſhing Liquor, called *Chau-myen*, compoſed of Meal made of a Sort of *Turkey* Corn, or Millet, mixed with Sugar and Water, all well-beaten together. *Gerbillon* obſerved, that when he drank his *Chau-myen*, every-body fell-on his Knees, and knocked his Forehead againſt the Ground. *Gerbillon.* 1691. *Chau-myen Liquor.*

THE 18th, they encamped in a Place, named *Qua-ti-ing*, on the ſame River *Kakiri*. This Day they incloſed in one Ring, nine or ten large Stags; but they all eſcaped: Only ſome Hares were killed, and a few Pheaſants taken with the Spar-Hawk; as was done the preceding Days.

THE 19th, they marched 40 *Li*, in a Plain called *Kabaye*, by a little River named *Shan-tû*, c where are ſeen the Ruins of the City of *Shan-tû*, the Summer-Seat of the *Ywen* Emperors [b]. In one Circle a great Boar retired into a cloſe Shelter: Yet the Emperor, with the 2d Arrow, wounded him mortally. In another they killed three Stags; but two or three others eſcaped through the Mountains. *Ruins of Shan-tû.*

NEAR the Camp there were hot and medicinal Waters, about which the Emperor aſked *Gerbillon* ſeveral Queſtions. They are clear at their d Source, but not ſo hot as thoſe at the Foot of *Mount Pe-cha* [c], a little Way to the N.E. of them: For in theſe one may bear to hold his Hand for ſome Time. As there is very near them another Spring of very cold Water, they have directed the Courſe of the two Streams in ſuch a Manner, that they might mingle on one Side, while on the other there runs an intire Stream of hot Water. In this Place are three little wooden Houſes, built by the Emperor's Orders, with a e wooden Baſin in each, for the Conveniency of Bathing, which Pleaſure his Majeſty took [d]. *Hot Springs.*

THE 20th, they continued in their Camp, and exerciſed, by Wreſtling and Shooting; in which laſt the Emperor's 3d Son, about 16 Years of Age, diſtinguiſhed himſelf, by hitting the Mark ſeveral Times. The 21ſt, they pitched in a Place called *Ha-la-tſin*. Next Day, his Majeſty ſending for 2000 *Mongol* Hunters, formed two great Rings, *A Tiger killed.*

3 *Journey in Tartary.*

Rings, which continued five or six Hours, surrounding both Mountains and Valleys. About 40 Roebucks and Stags were killed this Day. In the firſt Circle they incloſed a Tiger, whom the Emperor diſlodged, twice with his Muſket, and the third Shot made him fly to the Top of the Mountain, where the Trees were thickeſt: But he would not ſuffer his Men to approach too near the Beaſt, who in his Paſſage ſtruck-down a *Mongol* and his Horſe, by a Blow with his Paw, as he ruſhed by him; but did him no Hurt, becauſe he fled without ſtopping, diſmayed by the People ſhouting after him. The Emperor himſelf is in no Danger, being always ſurrounded by 50 Hunters on-Foot (called Prickers) armed with half-Pikes, which they handle dextrouſly.

The Fire-Hen.

BESIDES Pheaſants, Partridges, and Quails, which were taken with Hawks, they caught two other Birds of a particular Kind, ſuch as the Author had ſeen no-where elſe: The *Chineſe* call it *Ho-ki*, that is, *the Fire-Hen*; probably becauſe it has round its Eyes an oval Ring of ſmall Feathers, of the Colour of glowing Fire: All the reſt of its Head and Body, which reſemble thoſe of a Turky-Hen, is of an Aſh-Colour: It is ſomewhat larger than a Pheaſant, but can neither fly high, nor far; ſo that a Horſeman may eaſily run it down.

Hamar Tabahan.

THE 23d, they encamped in a Valley, called *Hamar Tabahan-nianga*, that is, *the Streight of the Mountain Hamar*, by the little River *Hakir*. In the Way, beſides a great Number of Stags and Roebucks, they killed a Leopard, found in a Thicket of Briars, from whence the Prickers going always on-Foot before the Emperor, were forced to drive him out with their half-Pikes. After his Majeſty had ſhot an Arrow into his Body, they ſet the Dogs upon him, who did his Buſineſs with much Difficulty: For, though wounded and fallen, he ſtoutly defended himſelf with his Teeth and Claws.

A Leopard ſlain.

Harongha Streights.

THE 24th, they encamped again by the *Hakir*, in a Streight of the Mountains called *Harongha*. They did nothing but mount or deſcend all the Way, and paſſed-over two high and ſteep Mountains. Although the *Mongol* Hunters were returned home, there were killed Abundance of Stags and Roebucks, of which the Country is full. His Majeſty tired eight or ten Horſes every Day in this Recreation.

THE 25th, they encamped beyond the Mountains, in a large Plain, ſurrounded with little Hills, called *Puchwi-pû-hû-tû*, that is, *the Plain that has the Mountains behind it*. At the End of 15 *Li*, they croſſed a high Mountain quite covered with Firs; and, the 26th, they encamped on the Side of a River, ſomewhat larger than the reſt, called *Kon Nor*, in an open Country, full of Sands to the N.E. and E. of the River; but to the W. it is all a Meadow, and ſurrounded with little Hills. It was ſo cold the whole Day, proceeding from a boiſterous North Wind, that ſuch as had Furs put them on. In the Afternoon ſome Hail fell, and then Rain. The preceding Mornings were very ſharp in the Mountains.

Gerbillon 169

Kon Nor River.

WHEN the Tents were pitched, the Emperor ſent *So-ſan Lau-ya* to the *Kalka* Princes, to give them Notice of his Approach to the Place of the Aſſembly, and inform them, in a very mild and obliging Manner; that his Majeſty being unwilling to give them the Trouble of repairing to *Pe-king*, was come himſelf to meet them, notwithſtanding the Inconvenience of travelling in the Summer.

Emperor ſends to Approach notified.

THE 27th, having travelled through a very rugged and ſandy Country, conſiſting moſtly of Hillocks, covered with Briars, they encamped in the Midſt of a great Plain, called *Tolo Nor*, that is, *the ſeven Reſervoirs of Water*. The Emperor himſelf choſe the Situation of the Camp, and ordered *Gerbillon* to mark exactly the 8 principal Points of the Compaſs; which Regulation was always obſerved in their future Encampments [a].

Arrives at Tolo Nor.

THE Emperor's Pavilion was placed in the Center: His Quarters contained four Courts, or Incloſures: The firſt (which was of yellow Cloth, called the *Wall of Cloth*) being very ſpacious, was ſurrounded with the Tents of the Guards, joined ſo cloſe, that they looked like a Gallery of Tents. The ſecond was like the firſt, but much leſs. The third was encompaſſed with a Net of yellow Cords (called the *Wall of Nets*) ſo twiſted, that there was no paſſing-through them. Each of theſe Incloſures had three Gates, the largeſt, through which the Emperor only, and his Retinue paſſed, faced the South; the ſecond was to the Eaſt; and the third to the Weſt. At the Gates of the three outer Courts were poſted the Guards, commanded by two or three Officers. The laſt, or innermoſt Court, was an oblong Square, 24 or 25 Fathom deep, and 18 broad: The Fence was of yellow Linen, ſtretched on Stakes

Quarters of the Emperor.

27.	To *Tolo Nor* Plain	-	50

Stakes and Cords, on both Sides reſembling a Wall: This had only one Gate, with folding-Doors of japanned Wood, where two *Hyas* kept Guard Night and Day, each holding one of the Folds by a Leather-Strap: None without an expreſs Order were permitted to enter, except thoſe who waited on the Emperor's Perſon. Over the Gate was a Pavilion of yellow Linen, with black Embroidery, which looked very agreeably.

WITHIN the firſt Incloſure ſtood the Tents of the Grandees, and Officers of the Houſhold; but ſo as to leave the Diſtance of 80 Paces between them and the ſecond Incloſure, out of Reſpect. Between the ſecond Incloſure of yellow Linen, and that of Nets, were quartered the Officers of the Emperor's Houſhold, taking-up the whole Circumference, except on the S. Side. In the Middle of the inner Incloſure ſtood the Imperial Tent, which was round, and nearly reſembling a Dove-Houſe: His Majeſty has commonly two of them, each about three Fathom wide, placed one before the other, with a Paſſage for Communication: He lodges in the hindermoſt, and ſpends the Day in the other.

THOSE erected on this Occaſion, were much larger and higher than ordinary; the biggeſt, which ſerved for the Hall, being about five Fathom in Diameter; the other four. They were hung with blue Silk to the Height of five Feet, and covered on the Outſide with a good thick Felt, over which came a ſtrong, but pretty fine Linen Wrapper, and over that again another of Linen; the Top and Border ſet-off with black Embroidery. This Cloth was ſtretched very tight, and only touched the Tent at-Top, ſpreading-out gradually to the Border, which was ſupported by wooden Poles, neatly turned, and japanned with Red: It was likewiſe faſtened by great Worſted Straps, like Girths, to Iron Pins driven into the Ground. This Covering defends the Tent from the Rain and Sun.

AT the further End of the ſecond Tent was the Emperor's Bed; the Teſter and Curtains of Gold Brocade, figured with Dragons; the Quilt and Counterpane only of Satin. There was alſo a Coverlet of Fox-Skins, to lay-over the Quilt in cold Weather. At the farther End of the greater Tent was a ſmall Eſtrade, 5 Feet ſquare, and a Foot and half high, covered with a woollen Carpet; on which, to hide the Door leading to the ſmaller, ſtood a Skreen, with a Dragon not well painted on it, although this is an ancient Piece, and much eſteemed. The Ground within theſe two Tents was alſo covered with a very handſome white Felt, and a very fine *Tong-king* Mat in the Middle.

BETWEEN the two there was a Suit of yellow Linen Hangings, which divided the whole inner Incloſure into two Parts. In the Fore-part, beſides the great Tent, there was a large ſquare Pavilion of fine yellow Linen, about ten Feet long, and ſeven broad: All the Curtains were likewiſe of yellow Linen, lined with White, embroidered on the Outſide with Black, which looked graceful enough; and above the Curtains was a Teſter of yellow Taffety, prettily folded into Clouds. In the Front of this Fore-part of the Incloſure, at the two Angles, ſtood the two Tents of the Emperor's Sons, very like his own, only much ſmaller. Behind his Majeſty's Tent, in the two Angles of the hinder-Part of the Incloſure, were two round Tents; one ſerved for his Wardrobe, the other for his Pantry, or Office, where Wine, Tea, &c. were kept. Gerbillon. 1691.

BESIDES theſe, were ſeveral Tents for the Officers who attend immediately on the Emperor's Perſon: There was likewiſe a ſmall one ſet-up at the Fore-part, near the Emperor's, where the Author was to be in the Day-time. Round the third Incloſure, at the Diſtance of eight Paces, were erected the Tents of all the Grandees, according to their Rank; only on the South Side there was nothing but a Platform, for the Trumpets, Drums, and Muſic, the Elephants, and all the Enſigns of Imperial Dignity. Beyond the Tents of the Courtiers, were thoſe of the *Hyas*, and Officers of the Houſhold, at the Diſtance of 300 Paces. *Tents of Grandees.*

THE Camp for the Troops of *Pe-king*, of the eight Standards, was marked-out on eight Plots of Ground, with empty Spaces between, 100 Paces wide, as Avenues to the great Road. There were in all 18 Quarters, diſpoſed like the Emperor's, only they were not ſo large, and each had but one Incloſure, containing the Tents of the Officers, and their Domeſtics. Three hundred Paces from the S. Gate of the Net-Wall, was the Van-Guard of the Army, divided into two Camps, placed on both Sides of the Gate 100 Paces aſunder: Beyond, on each Side, towards the N. there was a Camp of Dragoons and Gunners; after which followed five Camps of Horſe, ſeparated by Lanes 100 Paces wide. *Camp for the Troops.*

TO the N. on each Side, was a Camp of Muſketeers and Gunners; and between both, juſt behind the Emperor's Quarters, was the Infantry quartered. In each of the Camps of Muſketeers were eight Pieces of Cannon, two larger Field-Pieces very well wrought on the Outſide, and gilt, with two ſmall Mortars; in all 64 ſmall Field-Pieces, eight of a middle Size, very beautiful, and eight Mortars. *Gunners, and Muſketeers.*

NEXT Day, in the Evening, the Emperor viſited all the Quarters: The Soldiers, headed by their Officers, were drawn-up before the Gates of their reſpective Camps, with only their Swords by their Sides: All the Standards were diſplayed, and their Bows, Quivers, and Muſkets placed before them.

THE

3 *Journey in* Tartary.

A general Review.

THE Regulos and Princes were each at the Head of his Camp on-Foot, with the Enſign of his Dignity before his Tent. The Regulos of the firſt Order had each two great Standards, beſides two long Pikes, with a Tuft of Cows Hair, ſuch as the *Tartars* wear on their Bonnets; a great Streamer of the ſame Colour, and 10 Lances, with each a little Banner. All theſe military Enſigns were of Satin, and the Dragons of the Empire, Flowers and Feſtoons painted in Gold; the Whole very graceful. The Regulos of the ſecond Order have no Standards, but only the two Pikes with the Streamers, and eight Lances: The reſt have fewer Enſigns of Dignity, according to their Degree.

A counterfeit Attack.

THE Emperor next paſſed-on to the Infantry, 7 or 800 in Number, whom he ſaw exerciſe; and as theſe Soldiers always begin the Attack, he had a Mind to ſee how they went about it. The Signal being given, they ruſhed-forward ſhouting, with their Swords drawn, and covered with their Shields, in ſuch good Order, that they made the Emperor's *Hyas* give Ground. When they could advance no farther, they ſtooped, and covered their Bodies with their Shields.

Single Combats.

AFTERWARDS his Majeſty ordered ſeveral to fight, two and two, ſome with Sword and Buckler, others with Swords only, and ſome with Halberds [a]. Laſtly, to try if they could advance without a Wound, under Cover of their Shields, he cauſed Arrows to be brought, headed with Bone rounded at the Point, againſt which the Soldier advanced twice up to the other who ſhot, but was hit both Times in the Foot [b].

2. Ceremony *of the* Emperor's *receiving the Homage of the* Kalka Princes.

Preparations made for holding the Aſſembly: Order of the Troops, and of the Aſſembly. The Great Lama. Tûſhetû Hân. *The Emperor's Dreſs. The Emperor's Strength. Tumbling on Horſeback: Wreſtling-Matches.* Kalka *Princeſſes Viſit. The* Kalkas *Camp.*

Preparations made for

THE 29th, being the Day which the Emperor had appointed to receive the Homage of the *Kalkas*; early in the Morning all the *Mandarins* and Officers, civil and military, in their Habits of Ceremony, repaired to their Places. The Soldiers were likewiſe drawn-up under-Arms, on-Foot, with all their Standards diſplayed, without the three inner-Incloſures of the Emperor's Quarters. Ten Paces from the outermoſt Gate, they had ſet-up a great yellow Pavilion, 4 Fathom long, and 3 broad, with a ſmaller behind it, both of the ſame Faſhion with that before the Emperor's Tent. Under the great Pavilion was an Eſtrade about 2 Feet high, covered with 2 Felt Carpets, one of white Wool, the other Red, with yellow Dragons on it. In the Middle of the Eſtrade, which was but 5 Feet ſquare, was a Cuſhion for his Majeſty of yellow Satin, flowered in different Colours, and embroidered with Dragons in Gold. The Ground was covered with Felt, and fine Mats of *Tongking* laid-over that.

ON the Sides of this Pavilion, at 10 Paces diſtant to the S. ſtood two others of plain purple Linen; and fronting it another ſmall one, with a Table under it, covered with Veſſels and Cups of Gold, and round the Foot were others of China, full of Wine. Likewiſe on both Sides of his Majeſty's Pavilion, ſtood a great Number of Tables, furniſhed with Proviſions.

THE Soldiers were ranged in a Line on both Sides of the Space, between the Incloſure of the Emperor's Tent, and the Quarters of the Van-Guard, armed with Bows and Quivers, the Standards diſplayed, and the Officers at their Head, dreſſed in Robes of State. Between the Ranks of the Soldiers, the Trumpets, Drums, and all the Enſigns of the Imperial Dignity (as Umbrellas, Lances of different Sorts, *&c.*) were carried by Men in long Gowns of red Taffety, adorned with Circles full of white Spots. At the Head of theſe appeared 4 white Elephants ſumptuouſly harneſſed, 2 on each Side, loaded with great Veſſels of gilt Copper: Theſe they call *Bearers of the Jewels of the Crown*, altho' there were none in the Veſſels. There were likewiſe ſeveral of the Emperor's led-Horſes, ranged on both Sides, magnificently equipped.

THINGS being thus diſpoſed, the Grandees of the Court, and Officers, who came in the Retinue, took their Stations: The Regulos and Princes of the Imperial Blood of the *Manchews*, and thoſe of the *Mongols*, ranged themſelves to the Left of the Emperor's Place: The Right-hand was left for the *Kalka* Emperors and Princes. After this the Great *Lama*, *Hûtûktû*, and his Brother *Tûſhetû Hân*, the moſt conſiderable of the three Emperors, were conducted to an Audience. This *Lama* was a corpulent Man, but the only fat *Kalka* the Author ever ſaw; of a middle Sta-

[a] Theſe are edged only on one Side.

[b] *Du Halde's China*, p. 337, *& ſeq.*

ture,

ture, and, though upwards of 50, had a very ruddy Complexion.

HE was dreſſed in a long Gown of yellow Satin, with a Border of coſtly Fur, about 4 Fingers deep, and a Collar of the ſame: Over his Shoulder he wore a great Linen Scarf, of a dark Red: His Head and Beard were ſhaved; his Bonnet was a Kind of Mitre, of yellow Satin, with 4 red Corners turned-up, and faced with the fineſt and blackeſt Sable *Gerbillon* ever ſaw. He had on red Satin Boots, peaked at the Toes, a narrow Galoon running-along the Seams. He was followed by 2 Servants, and conducted by the Preſident of the Tribunal of the *Mongols*.

AFTER him walked his Brother *Tûſhetû Hân*, who was lean, and of a middle Stature, long-viſaged, and grey-bearded, with a peaked Chin; which diſtinguiſhes thoſe of his Nation from other *Tartars*, although ſome *Eluths* have that Feature. He was flat-faced, and, as they ſaid, not over-wiſe. The *Lama* governs all; nor dares the other control him. He was dreſſed in a wide Robe of Gold and Silk Brocade, but very dirty: He wore a Fur Bonnet, but far inferior to the *Lama*'s: He had no Attendant, being only introduced by a *Mongol* Officer of the Emperor's Guards. His Majeſty received theſe two Princes ſtanding under a great Pavilion before his Tent, and would not ſuffer them to fall-on their Knees, but took them both by the Hand, and raiſed them up [a].

THE Emperor was in his Robes of State, being a long Veſt of Brocade on a yellow Satin Ground, over-laid with Dragons embroidered with Silk and Gold: Over it was a Veſt of purple Satin, whereon were 4 great Circles, each near a Foot and half Diameter, containing 2 Dragons embroidered in Gold. One of theſe Circles was directly on his Stomach, a 2d on the Middle of his Back, and the 2 others on the Sleeves: His under-Garment, and the Sleeve-Cuffs of the upper-one, were lined with Ermin; and the Collar of the latter was of Sable: His Bonnet was adorned, on the fore-Part, with a very fine large Pearl: He had about his Neck a Sort of Chaplet of large Agat Beads, mixed with Coral: His Boots were of plain black Satin. His Majeſty's two Sons were dreſſed in the ſame Manner: So were the Regulos, but leſs richly.

THIS firſt Audience laſted about half an Hour, during which was brought-in, after a very ceremonious Manner, a little Box, containing a Seal and a Roll, with a Sort of Letters Patent, in Favour of *Tûſhetû Hân*; who in this Manner was confirmed in the Title of *Hân* [b]. They were thence conducted towards the great Pavilion without the 3d Incloſure, where the *Kalka* Princes were to pay their Homage to the Emperor; who ſoon after rode thither, followed by his two Sons on-Foot, attended only by his Domeſtics, and ſome of his *Hyas*. The Regulos of *Pe-king*, with ſome of the *Mongols*, and other Princes of the Blood, were ranged in 2 Lines on his Left-hand: On the Right, were the 3 *Tartar* Monarchs, with the Grand *Lama* at their Head, who always had the Precedence. They all ſat on Cuſhions laid-on the Ground, and behind the *Kalka* Emperors 7 or 800 *Taykis*, or Princes of the Blood, in 15 or 20 Ranks; and the Counts and Grandees according to their Dignities. Gerbillon. 1691.

WHEN the Emperor came, they ſtood-up, and continued in this Poſture till all the *Kalka* Princes (at whoſe Head was the Son of *Shaſaktu Hân*, and *Chechin Hân*) had done their Homage. They were conducted by the Officers of the Tribunal of the *Mongols*, within 30 Paces of his Majeſty's Eſtrade, a little to the Right; where after being ranged in Order, they made the Salute, conſiſting of 3 Genuflexions, and 9 Proſtrations [c]. All the *Lamas* were diſpenſed with from performing this Ceremony, becauſe it is not their Cuſtom to obſerve it towards any ſecular Perſon: And the Emperor having perceived ſome of them among the *Taykis* (who paid their Homage like the reſt, becauſe they were of the Blood Royal) ordered them to be conducted out, and placed at the Head of 5 or 600 *Lamas* of their Nation. The Grand *Lama*, and his Brother *Tûſhetû Hân*, were likewiſe exempted from this Duty, but ſtood all the Time of the Ceremony. *Ceremony of Homage.*

THE Ceremony being over, the *Kalka* Princes were conducted to Tables ſpread with Proviſions: The like were prepared for the reſt of the Aſſembly. The Emperor's 2 Sons, the Regulos of the firſt Order, the Grand *Lama*, and the 3 *Kalka Hâns*, had each a Table to himſelf: The reſt had only a Table between 2, 3, or 4; yet there were no fewer than 200 Tables, all ſerved in Plate. The Victuals were piled-up 3 or 4 Stories: The lowermoſt conſiſted of Paſtry, Sweet-meats, and dried Fruits: The uppermoſt Story contained great Diſhes of Beef, Mutton, Veniſon, boiled and roaſted, but all cold. Some Diſhes held almoſt a whole Quarter of Beef; others a whole Sheep, except the Head, Shoulders, and Legs. All the Victuals were covered with white Napkins. *Entertainment given*

HAVING firſt thanked the Emperor for the Honour, they ſat-down on their Cuſhions; for Want of which moſt of the *Kalka* Princes ſat on the bare Ground. After this his Majeſty ſent for the Son of *Shaſaktû Hân*, *Chechin Hân*, and about a Dozen of the chief *Taykis*; whom he ordered, *To the Aſſembly.*

[a] *Du Halde's China*, p. 338. [b] Or, *Khân*. [c] In the ſame Manner as deſcribed before, vol. 3. p. 427, 476, &c.

3 *Journey in Tartary.*

ordered, one after the other, to come near his Eſtrade, aſking them their Name, Age, and ſuch-like Queſtions. They all anſwered kneeling on a Mat; after which he ſent them back.

Ceremony obſerved when

NEXT two chief Stewards fetched Tables from a Buffet, with the Aſſiſtance of two inferior Officers, followed by the Gentlemen Sewers. Two Tables were placed before the Emperor, ſerved-in with Gold Plate, and ſeveral other covered Diſhes; which having very ſlowly and reſpectfully uncovered, the Cup-Bearers fetched from b the Buffet great Veſſels of Gold and Silver full of *Tartarian* Tea, and, carrying them within 10 Paces of his Majeſty, fell-on their Knees.

The Emperor drinks,

The Cup being filled and covered, the chief Cup-Bearer ſtood-up, aud raiſing it above his Head with both Hands, walked with much Gravity up to the Emperor; then kneeling, he preſented it, and took-off the Cover. His Majeſty having drank a very little, returned the Cup; which was carried-back with the ſame Ceremony. c While the Emperor is drinking, they all kneel, and touch the Ground with their Heads. Next they poured-out Tea for his Sons, and the other Princes; carrying it, at the ſame Inſtant, to the Regulos of *Pe-king*, and to the 3 *Kalka* Emperors. Before and after Drinking, each of them fell-on one Knee, proſtrating himſelf on the Ground. As the *Lamas* drink out of no Cups but their own, they were careful to take that of the Grand *Lama*, which was as white as fine d Porcelain, with a little Foot like that of a Glaſs [a].

And of ſerving Wine.

WHEN they had done drinking Tea, which continued long, they uncovered the Tables, and ſerved Wine with the ſame Ceremonies. Firſt, they brought a Veſſel of Gold, and poured-out of it, into a little Gold Cup, Wine for the Emperor: Then out of a Ciſtern of Gold, full of Wine, with a large Gold Spoon, they filled the little Cups. His Majeſty gave Wine, with his e own Hand, to the Grand *Lama*; then to the 3 *Kalka* Emperors, and afterwards to 20 of the principal *Taykis*; who received the Cup on their Knees, and holding it in one Hand, ſtruck their Heads againſt the Ground: They did the ſame after they had drank, and then retired. The Cup-Bearers, in their Habits of Ceremony, and conducted by the Officers of the Tribunal of the *Mongols*, ſerved all the other *Taykis*, *Lamas*, &c.

Rope-Dancing, Puppet-Shews.

IT being now near Noon [b], they ſent for f Rope-Dancers; who performed ſeveral Feats of Activity on the Top of a Bambû, held-up by Men about 5 or 6 Feet from the Ground. The Author ſaw nothing extraordinary, excepting from one; who on a tall Pole bent his Body backwards, raiſing it up again 1000 Ways; after which he ſtood upon one Hand, with his Feet upwards. Next Puppets were brought-in, and played much like thoſe of *Europe*. The poor *Kalkas*, who had never ſeen the like before, were ſo ſurprized, that moſt of them forgot their Victuals. None but the Grand *Lama* preſerved his Gravity: For he not only continued eating, but looked-down great Part of the Time, as if ſuch Amuſements were unworthy his Notice. At length the Emperor ſeeing nobody eat any-longer, ordered the Tables to be cleared, and returned to his Tent. At the ſame Time all the Company diſperſed, and the *Kalkas* were conducted back to their Camp by the Officers of the Tribunal of the *Mongols*.

Gerbillon 1691

THE 30th, the Grand *Lama*, and the 3 *Kalka* Emperors, attended by the principal *Taykis*, were preſent for by his Majeſty, to receive the Gratuities which he deſigned for them: He gave 1000 *Taël* [c] in Money to the Grand *Lama*; and to each of the *Hâns* 15 Pieces of Satin, great Silver Veſſels to put their Tea in, ſeveral Suits of Cloaths in the *Manchew* Faſhion, 2 of a Sort, and particularly Habits of Ceremony, ſuch as are worn by the Regulos and Princes of the Blood: He gave them Linen alſo, for their Domeſtics, a very great Quantity of Tea, and embroidered Saddles. His Majeſty, beſides, created five of the *Kalka* Princes, neareſt related to the Emperors, Regulos of the ſecond Order; others of the third; and ſome received the Dignity of *Kong*, which anſwers to that of *Duke*. About 30, who were thus dignified, had Gratuities, according to their Ranks: They had all Habits of Ceremony in the *Manchew* Faſhion, which they immediately put-on, and never afterwards appeared without them before the Emperor.

Presents to the Princes.

THE Grand *Lama* himſelf, with all his Haughtineſs, retained nothing of his Habit, but that red Scarf which he always wore, and his Boots. He appeared in a magnificent Veſt of yellow Satin, embroidered with gold Dragons: He wore a Hat of very fine Bambû Matting, as all the *Lamas* do in Summer, to keep-off the Sun: But in Winter they uſe Bonnets, furred with Sable. When they had thanked the Emperor for the Favours conferred on them, by 9 Times knocking their Heads, as uſual; they were conducted, in their new Habits, into the inner Incloſure; f where his Majeſty, ſeated on an Eſtrade, received them, ranged on each Side, under the grand Pavilion, placed before his Tent. Here having ordered them to be deſired to ſeat themſelves, they thanked him, in the ſame Manner, for this new Favour. Preſently a magnificent

[b] At which Time *Gerbillon* going out to take the Elevation of the Pole, found it 69 Degrees, 50 Minutes.

[c] Or, *Lyang*, 6 Shillings and 8 Pence.

Journey in Tartary. Concerts of Musick.

Collation was ſerved, in very fine Porcelain; during which they were entertained with Concerts of Vocal and Inſtrumental Muſic, performed by Eunuchs; and likewiſe with the Rope-Dancing. The Whole laſted 3 Hours; during which Time the Emperor talked familiarly with the *Kalka* Princes, particularly the Grand *Lama*, who was near his Perſon.

Soldiers Armour, Arms, &c.

THE 31ſt, early in the Morning, all the Soldiers, who were in the Camp, headed by their Officers, repaired to the Place appointed, for drawing-up in Order of Battle, armed with their Caſques and Cuiraſſes; as was the Emperor himſelf, and his eldeſt Son. The Cuiraſs conſiſts of two Pieces; one is a Sort of under-Petticoat, which is girt about the Body, and reaches below the Knee when they are ſtanding, but covers all their Limbs when on Horſeback [a]: The other Piece is like the Coats of Armour of the Ancients, but the Sleeves are longer, reaching to the Wriſt. The Outſide of both theſe Pieces is of Satin, for the moſt Part Purple, embroidered with Gold, Silver, and Silk of various Colours: Next to this Satin, lined with ſome Pieces of Taffety, are hammered Plates of Iron or Steel [b], finely burniſhed, which are placed like Scales on the Body of a Fiſh. Each Plate, about an Inch and half long, and little more than an Inch in Breadth, is faſtened to the Satin by two ſmall Nails, whoſe Heads being round, and well-poliſhed, appear without. Some few line the Plates with another Piece of Taffety. One may eaſily turn and move in theſe Cuiraſſes, which are proof againſt all Weapons, except Fire-Arms; but then they are exceeding heavy.

THE Caſque, which is properly no more than a Head-Piece, or the upper-Part of an Helmet, faſtened under the Chin with ſilken Strings, juſt covers the Top and Sides of the Head, leaving the Face, Throat, and Neck expoſed. They are made of Iron or Steel, well-hammered and poliſhed; thoſe of the Officers being curiouſly damaſked (in which Art the *Chineſe* are very ſkilful) as well as adorned with ſome Slips of Sables, reſembling a Plume of Feathers; but the Caſques of the common Soldiers are ſet-off with a Tuft of Cows Hair, dyed red. Above this Tuft appears a little ſquare Pyramid of Iron, damaſked, or gilt. The Caſques of the *Mandarins* are adorned with 6 Slips of Sable Skins lined with gold Brocade, each about an Inch broad, faſtened under a Pyramid of Gold or Silver, or Iron gilt.

Armour.

MOST of the great Lords had a round Convex Plate of poliſhed Steel, more than half a Foot in Diameter, on the Stomach, and another on the Middle of the Back. The Cuiraſs of the Emperor himſelf had nothing extraordinary on the Outſide, being only a grey Brocade, divided into very ſmall Squares by black and white Stripes, with a Lining and narrow Border of yellow Silk. All the great Lords, Officers, and private Troopers, had a ſmall Piece of Silk faſtened behind their Caſque and Cuiraſs, on which was written the Name of the Wearer, and Company he belonged to: If a *Mandarin*, his Quality and Office were mentioned, that every one might be known in the Croud.

Gerbillon. 1691.

Emperor's Arms.

THE Emperor had his Sabre by his Side, with his Bows and Arrows: His Quiver and Bow-Caſe (which covered but one half of it) were both of black Velvet, adorned at the End with precious Stones, ſet in Gold. His Majeſty was attended by the *Hyas*, and Officers of his Houſehold, all armed in the ſame Manner. In this Equipage he went directly to the Place where the Troops were drawn-up in Battalia. Theſe conſiſted of about 4000 Horſe armed with Arrows, 2000 Dragoons, one Battalion of 7 or 800 Foot, and 4 or 500 Gunners, beſides the Officers and Domeſtics of the Emperor's Retinue, who formed a Body of 7 or 800 Horſe, and the Squadrons under the Command of the Regulos of *Pe-king*; the Whole amounting to about 9 or 10,000 Horſe, and 1200 Foot. The Infantry were all cloathed alike, and armed, ſome with Muſkets, or Halberds; ſome with long Sabres and Bucklers [c].

Troops, how drawn-up.

THE Troops were drawn-up in 2 Lines, 20 Paces aſunder, with the Standards diſplayed; each Line, which was nothing but one very cloſe Rank, extended above a League: The Battalion of Infantry, and the Artillery, were in the Middle; and the Cavalry on the Wings. The Artillery conſiſted of 70 Pieces of Braſs Cannon: The 8 largeſt were gilt, embelliſhed with Ornaments in Relievo, and drawn on Waggons painted red. The others were on Carriages, with little Wheels. The Infantry had 5 or 6 Mortars, ſome Guns like Falconets, and Iron Harquebuſſes. The Emperor reviewed theſe Troops, by paſſing-along the Ranks; but the Officers, who, great and ſmall, ſtood over-againſt their reſpective Standards, made no Salute as his Majeſty rode by them; nor did the Kettle-Drums beat, or Trumpets ſound.

And reviewed.

AFTER this he went with his *Hyas* (or Guards) to a little Eminence, about 3 Quarters of a Mile diſtant, where they had ſet-up a great Pavilion, and ſome Tents. The *Pe-king* Regulos, and their Troops who followed, ſoon after paſſed in Order before the Emperor, and poſted themſelves in Squadrons to the Right of his Majeſty: They blew 4 Trumpets, called by

[a] Becauſe they ride very ſhort. [b] See before, *p.* 550. [c] *Du Halde's China*, p. 340.

3 *Journey in Tartary.*

the *Tartars*, *Lapa*; being great round Tubes of Copper, and eight or nine Feet long, terminating like *European* Trumpets. This Inſtrument is uſed to give the Signal of Battle; the Sound, though very deep and hollow, being heard a great Way off: One Man holds it up in the Air with a Sort of Fork, while another blows it.

Manner of forming

As ſoon as thoſe Trumpets began to ſound, the Troops advanced ſlowly, till the Inſtruments left off; then they halted, and did not reſume their March till the Trumpets ſounded again: This was done thrice; but at the third Time thoſe Inſtruments being ſounded louder than before, all the Troops haſted towards the Eminence. The Cavalry, who were in both the Wings, extended themſelves in Form of a Creſcent, as it were to ſurround the Enemy's Army, which was ſuppoſed to be in the Place where the Emperor ſtood. The Infantry ran directly forwards, the firſt of them Sabre in Hand, covered with their Bucklers. In the Middle of the Battalion of Foot the Artillery moved-on, and in the two Wings of this Battalion came the Dragoons, who had alighted: For though they march on Horſeback, they fight on-Foot.

A regular Attack.

THEY advanced thus in good Order, till they came near his Majeſty; where they were commanded to halt. After they had given 3 or 4 Vollies, both from the Cannon and Muſkets, the Cavalry ſtopped; and when they had reſumed their Ranks, which had been broken a little by ſuch a haſty March, they remained for ſome Time before the Pavilion. Mean-while the Emperor, who had alighted, ſhewed, in a familiar Manner, his Cuiraſs, and other Arms, to the *Kalka* Princes; who were extreamly ſurprized at this Sort of Attire, which they had never ſeen before. After this his Majeſty took an exceeding ſtrong Bow, which none of the *Kalka* Princes could bend effectually; and armed as he was, ſhot ten or a Dozen Arrows, in Turn, with his eldeſt Son, and 5 or 6 of the beſt Archers, hitting the Mark, which was only within Reach of the ſtrongeſt Bows, 3 or 4 Times. Then quitting his Arms, he changed his Dreſs, in a Tent prepared for that Purpoſe; as did his Son, and all the other Officers of his Houſhold; while the Regulos returned to the Camp, at the Head of their Squadrons.

The Emperor's Strength.

Tumbling on Horſeback.

THE Emperor being ſeated on an Eſtrade under his Pavilion, with the Grand *Lama*, the 3 *Kalka* Emperors, and their *Taykis* near him, *Tartarian* Tea was ſerved-up: After this the *Kalkas* ſhot with the Bow, in which Exerciſe the *Taykis* ſhewed great Dexterity. Next began the Horſe-Races, which they call *Paohyaie*. The Horſes were mounted by Rope-Dancers, who riding without touching the Reins, bent backwards on the Beaſt, and threw their whole Body and Limbs, ſometimes to the Right, ſometimes to the Left; then tumbled on the Saddle, ſtanding with their Heels upwards, the Horſe running all the While. Laſtly, ſitting backwards on his Neck, they performed ſeveral other remarkable Feats, but not without Danger; for two of them fell, one of whom was hurt. Gerbi 169

Wreſtling Matches.

AFTER this the *Kalkas* went to wreſtle againſt the *Manchews*, *Mongols*, and *Chineſes*, entering the Liſts in their Shirts, Drawers, and Boots. The *Kalkas* tucked their wretched Drawers as high as their Hips, to prevent being embarraſſed; and the beſt Wreſtlers were on their Side. Two or three of them, though lifted-off their Legs, recovered them, and threw their Adverſaries, with great Applauſe. Theſe Diverſions were concluded by ſeveral Diſcharges of Cannon at a Mark, the Gunners performing pretty well: They likewiſe fired ſome Bombs.

Kalka ceſſa

THE Emperor being returned to the Camp, ſome of the Wives and Daughters of thoſe Fugitive-Emperors, and *Taykis*, paid a Viſit to his Majeſty, who received them under the great Pavilion; where he entertained them with a Collation, accompanied with Concerts of Muſic, and Puppet-Shews. Theſe Princeſſes were attended by a Sort of Nuns, that is, Girls who never marry, and were under the Direction of the Grand *Lama*. The moſt conſiderable of them was the Siſter of *Tûſhetû Hân*, and the *Lama* himſelf: But the *Tartars* ſpoke very unfavourably of the Life they lead with the *Lama*.

The

Camp

THE firſt of *June*, the Emperor, accompanied only by his two Sons, his *Hyas*, the Grandees of the Court, and Officers of his Houſhold, went to the Camp of the *Kalkas*, about two Leagues from his own. He entered no Tent but that of the Grand *Lama*, who preſented him with ſome *European* Trifles, which it is likely he had from the *Ruſſians*. Next Day his Majeſty renewed the Wreſtling-Matches, and propoſed Rewards for the Conquerors. Of more than 100 Perſons who wreſtled, only 12 won the Prizes; which conſiſted of a Piece of Satin, and a ſmall Sum of Money. Afternoon the Emperor gave the Grand *Lama* a private Audience, which laſted near 3 Hours; wherein he accommodated the Differences ſubſiſting between ſeveral of the *Taykis*, who had begun a Kind of War, and carried-off each other's Slaves and Cattle *.

The Emperor departs.

THE 3d of *June*, being the Day appointed for the Emperor's Departure, he gave another private Audience to the Grand *Lama*; wherein he recommended to him the Maintenance of Peace and Harmony among the Princes of his Family: At the Concluſion, his Majeſty gave him 2 of the beſt Tents, with all the Furniture and Ornaments; likewiſe a Horſe with Trappings, ſuch as he uſed himſelf; after which he mounted his Horſe, and decamped. The 3 Emperors, and all the *Kalka Taykis*, ſtood in a Line at the Entrance of the Camp, and when his Majeſty paſſed-by they fell on their Knees, taking their Leave of him. He ſpoke to them with a great deal of Affability: A great Multitude of poor *Kalkas*, reduced to the laſt Degree of Miſery, preſenting themſelves on their Knees in the Road to implore his Relief, he gave Orders, that their Condition ſhould be enquired into, and Alms diſtributed to each, according to his Neceſſities.

Troops ſent to

THE Emperor, before he ſet-forward, cauſed a Body of Troops to march towards the Place [a] where the Grand *Lama* kept his Court, before he was driven-out by the King of *Eluth*; who, they were informed, was encamped there, and that his Troops ſuffered much for Want of Proviſions. At the ſame Time he ſent Deputies to that Prince, to know what he intended to do in a Country which did not belong to him, and if he really deſigned to keep his Promiſe never to commit any Act of Hoſtility againſt his Subjects, particularly the *Kalkas*, who had ſubmitted to his Government: He likewiſe gave Orders, that in caſe the King ſhewed a Diſpoſition to keep his Word, and return peaceably into his own Country, they ſhould treat him with Civility: If not, that they ſhould attack him, if it could be done to Advantage.

MOREOVER, Orders were ſent to the Army, which left *Pe-king* in the Beginning of the Spring, to obſerve the Motions of the *Eluths*, and remain encamped on the Frontiers towards *Kûkû Hotun*, till this ſmall Body was returned, and the real Intentions of that Prince were known. His Majeſty likewiſe conferred certain Lands, in the Neighbourhood of *Kûkû Hotun*, upon *Shaſſaktû Hân*, a Youth of 10 or 11 Years of Age, whoſe Behaviour was very graceful, not diſcovering the leaſt Sign of Puerility, though he was preſent at all the Ceremonies. As he had not yet been acknowledged as *Hân*, the Emperor created him a Regulo of the firſt Order. This Day the Imperial Troops marched 15 or 20 *Li*, amongſt Hillocks of looſe Sand, full of Briars, which gave Shelter to an infinite Number of Hares, and encamped in a great Plain, by a little River named *Erton*. Gerbillon. 1691.

Hunting of yellow Goats.

THE 4th, they formed a Circle 5 or 6 *Li* in Compaſs (afterwards reduced to 800 Paces) in the Hills, which abounded with yellow Goats. Several of them made their Eſcape between the Horſes Legs, and when one happens to get-out, all the reſt of that Flock follow the ſame Way: then thoſe who are without the Circle purſue and ſhoot them with Arrows. They likewiſe let looſe the Emperor's Greyhounds, which killed a great Number of them. Two *Hyas*, who let certain Flocks eſcape through Negligence, were puniſhed with 100 Laſhes of the Whip; a third, who had quitted his Poſt, and even ſhot within the Circle, was caſhiered. The Emperor's eldeſt Son riding full Speed to ſhoot ſome Goats, his Horſe ſlipped a Foot in a Hole, and was killed by the Fall, but the Prince received no farther Hurt, than a Scratch on his Head. The Circle being cloſed, 50 or 60 Goats, being all that remained, were killed.

Swiftneſs and Patience.

IT was ſurprizing to ſee with what Swiftneſs thoſe poor Creatures ran, though wounded, ſeveral dragging a broken Limb, ſome trailing their Entrails along, others with 2 or 3 Arrows ſticking in their Bodies, till their Strength failing them, they fell dead on the Ground. They never made the leaſt Complaint when wounded with the Arrows: But when taken by the Dogs, who never ceaſe biting till they have choaked them, they make a Cry much like a Sheep at Slaughter. After this Hunting, they advanced in a great Plain above 20 *Li* farther, to the Entrance of the Mountains, in a Place called, in the *Mongol* Language, *the Source of the Waters*, where they encamped, having travelled in all but 11 or 12 *Li*, on Account of the great Compaſs which the Chace obliged them to take.

Tiger Hunting, Manner.

THE 5th, as they entered the Mountains, hunting Roebucks and Stags, a Tiger alarmed with

[a] On the *Iben*, a little River that falls into the *Orkon*. See the Map of *Weſtern Tartary*.

Return to Pe-king.		4. To Mountains - -	12 *Li*

3 *Journey in Tartary.*

with the Noiſe, howled aloud, thereby diſcover- a ing his Lodgment among Briars on the Side of a ſteep Hill. As this Kind of Chace is very dangerous, they uſe much Precaution in their Method of rouſing the Tiger. He ſeldom deſcends into the Plains, but marches from one Side of the Mountain to the other, and if there is a Wood adjacent, retires into it. Prickers with Half-Pikes, having broad Iron Heads, are poſted on the Way which they ſuſpect he will take: Others are placed with ſome Horſe-Guards on b the Tops of the Mountains, to obſerve where he ſhelters himſelf. Theſe Men ſhout aloud when the Beaſt advances on their Side, in order to make him fly to the Emperor's Station, which is commonly on the oppoſite Deſcent, having the Valley between. His Majeſty, attended by ſome of the *Hyas* and Domeſticks, is always ſurrounded with about 30 or 40 of theſe Prickers, who form a Kind of Fence, by reſting one Knee on the Ground, and directing towards the Tiger the c Points of their Half-Pikes, which they hold with one Hand at the Middle, and the other near the Head [a].

One diſlodged and

HAVING rouſed him, he again took Shelter in a Thicket, on the Top of a neighbouring Mountain, where he was preſently purſued. The Emperor approaching within Muſket-ſhot, a great many Arrows were diſcharged, and ſeveral Dogs let looſe, which diſlodged him a ſecond Time: But he went no farther than the Side of d the oppoſite Mountain, where he lay-down among the Briars. They again ſhot random Arrows, while the Prickers rolled-down Stones upon him. The Tiger riſing ſuddenly, ſet-up a hideous Roar, and made directly at the Horſemen; who had no Recourſe, but to fly, with all Speed, towards the Top of the Mountain. The Beaſt had juſt overtaken one of them, when the Dogs being looſed, obliged him to turn-about; which gave the Horſemen Time to eſcape. e

Killed by the Emperor.

MEAN-WHILE the Tiger returning leiſurely towards his Lodgment, with the Dogs barking round him, the Emperor ſhot 3 or 4 Times, and wounded him ſlightly, being at a great Diſtance: Yet he did not mend his Pace, but went and lay-down among the Briars: Upon this they renewed their Attacks, by rolling-down Stones, and ſhooting-off Muſkets at random. At length he ſprang forth, and ran ſwiftly towards the Place where the Emperor was: But coming to f the Foot of the Hill, turned-off, and fled to the firſt Thicket where he had hidden himſelf. The Emperor croſſed the Valley, and followed his Steps ſo cloſely, that he fired at him twice, and killed him. All the Grandees of the Court went to ſee the Tiger, which was very large. As it grew late, his Majeſty cauſed the Circle to be diſſolved, and ordered every-body to make the beſt of his Way to the Camp, which was in *Turbedê*, among the Mountains. Gabille 169

THE 6th, their Road lay through a very nar- *Emperor's* row Valley, with ſteep Mountains on both Sides, *Dexterity.* where it was impoſſible to hunt. Juſt at the Camp, the Emperor alighting near a Rock, ſhaped like a Tower, made the Grandees and Archers try to reach the Top with their Arrows; which only two of them did: His Majeſty likewiſe ſhot 5 or 6 Arrows, till one of them paſſed-over it. After which he meaſured the Height with his Semicircle of half a Foot Radius, and having cauſed the Jeſuits to calculate the ſame apart, they both found it to be 430 *Shé*, or *Chineſe* Feet: They agreed no leſs in their Calculations of a Diſtance alſo which the Emperor had meaſured geometrically. He afterwards took a Stone, which he poiſed with an Arrow only, and having calculated the Weight of it, cauſed it to be weighed in a Scale. As this likewiſe was found conformable to the Calculations, the Lords redoubled their Applauſes.

THE 7th, they travelled for the moſt Part in *Tartar* a wide Valley, abounding with Hamlets, Farms, *tion of* and cultivated Lands: Here the Emperor hunted, and killed ſeveral Hares. Then turning again into the Mountains, which were pretty high, covered with Briars and Coppices; he hunted the Stags and Roebucks. It was ſurprizing to ſee with what Dexterity his People turned the Game towards him. The *Tartars* conſider Hunting as an Emblem of War, and are perſuaded, that he who knows not how to do his Duty in the Chace, will likewiſe fail in the Battle. It is on this Principle, that the Emperor has often *Uſe of* caſhiered the chief Officers of his Army, for not *ing.* knowing how to conduct and govern the Hunters: As happened at the Ambaſſadors Return from *Nip-chew* to an Officer of Merit, who went in Quality of Lieutenant-General of the Troops, and was one of the Generals of the Van-Guard, a Poſt anſwering to that of Marſhal of *France*. In the Evening his Majeſty entertained the Lords of the Court, and Officers of his Houſhold, with f a Comedy, in his own Pavilion, performed by a Company of Eunuchs.

THE 8th, two Tigers were killed; the firſt *Two* by

by the Emperor, at the first Shot; the other, a which was a Tigress, by a Pricker running his Half-Pike through her Eye a great Way into her Head. The Chace being over, the Emperor, and his 2 Sons, went on the River *Chikir* in little Canoes, to avoid the Heat; but did not proceed above 15 *Li* by Water, which was very rapid and winding. They encamped by the River, in a Valley named *Tawang-ki*.

THE 9th, they travelled in the same Road, the Emperor going Part by Water, and Part by b Land. In the Evening his Majesty gave the Lords of his Court another Comedy, at which the Author was present. Out of the Actors, who were dressed like ancient *Chinese*, 3 or 4 were good, and the rest but indifferent. These Plays are intermixed with Music and Narrations, and consist both of the Serious and the Gay; but the former prevails. They are neither so lively, nor fit to excite the Passions, as the *European*. They observe no Unity of Action, Time, or c Place. Some of them exhibit the Transactions of ten Years, and the Parts into which their Comedies are divided, are acted likewise on different Days: They are much like the Histories of some illustrious Persons, interspersed with Fable, and divided into Chapters: But they never utter a loose Expression, or say any Thing that may offend a modest Ear.

THE 10th, the Emperor travelled only 20 *Li* on Horseback; the other 70 he went by Water d in little Barks. At the End of the first 20, he dined in public on the Side of the River. He hunted even in his Bark, shooting at Birds; and killed some Hares, which were turned-along the Banks of the Stream. Arriving near the Fortress of *Kû-pe-kew*, they found all the Infantry which guarded that Post drawn-up, with the Officers at their Head, armed only with Sabres by their Sides. At this Place Soldiers were posted, to hinder any-body from appearing abroad: Yet e in a narrow Street a Man rushed hastily out of his House, with a Petition in his Hand, to present the Emperor; and becaufe one of the Officers would have obliged him to retire, he had the Boldness to throw him down, by causing his Horse to fall. His Majesty, who saw it, ordered him to be punished on the Spot for his Insolence, with the Whip: He likewise had the Officer confined, but did not hinder the Man from going on his Business [a].

THE 11th, the Emperor went by Water to *She-hya*. This Day, and the former, there was a heavy Rain, accompanied with Thunder. His Majesty dined in public. The 12th, they marched 80 *Li*, attending the Emperor along the River, which winds exceedingly, to *Mi-yun hyen*, which is but 50 from *She-hya*, by the high Road. The 13th, they travelled 80 *Li* more, his Majesty going by Water in larger Barks, brought from the City *Tong-chew*. While he was at Dinner, observing some little Children of the Peasants looking at him at a Distance, he caused them to be brought near, and loaded them with Bread, Meat, and Pastry. The Children running home, returned presently, each with a Basket, which the Emperor ordered to be filled with Victuals from his own Table. They came to lodge in a little Town six Leagues from *Pe-king*.

Came to Pe-king.

THE 14th, they got on Horseback at One in the Morning, in order to get to *Pe-king* before it grew hot, and arrived there half an Hour after Five. The *Wang-tay-tse*, or Heir Apparent, came to meet his Majesty a League out of Town, dressed in his Robes of State much like the Emperor's, but had few Attendants with him. His Majesty, on entering the Palace, went directly to the Empress Dowager's Apartment, to salute her.

Emperor an Enemy

THE 19th, the Emperor began to apply himself close to his Studies, under the Directions of the Jesuit *Thomas*, and the Author. One Day the Discourse falling upon Mathematics, his Majesty expressed a great Contempt for those who believed that there are good and bad Days, and fortunate Hours. He told them he was convinced, "That those Superstitions were not only "false and absurd, but prejudicial to the State, "especially if Governors gave Credit to them: "That this Belief had formerly cost many inno-"cent Persons their Lives, some of whom he "named; and, among the rest, certain Christi-"ans, Mathematicians, who were prosecuted at "the same Time with *Adam Schaal*, condemned "and executed, under a Notion that they had "not chosen a proper Hour for the Interment "of one of the Emperor's Sons, and so brought *To Superstition.* "Misfortune on the Imperial Family. Should "the People, and even the Grandees, said he, "run into such Superstitions, the Error would "be attended with no ill Consequences; but for "the Sovereign of an Empire to be deluded by f "them, it would occasion dreadful Evils." He made a Jest of the *Chinese* saying, *that all the Constella-*

4 Journey in Tartary.

Conſtellations preſide over the Empire of China, *ſo as to concern themſelves with no other Countries:* On which Occaſion his Majeſty added, that he had ſometimes deſired certain *Chineſe*, who talked to him after this Manner, *to leave at leaſt a few Stars to take-care of the neighbouring Kingdoms.*

Ruſſian Envoy arrives.

THE 22d of *Auguſt*, the Emperor informed them, that a *Ruſſian* Envoy was arrived on the Frontiers of *Tartary*, ſubject to his Majeſty, with a Retinue of 40 Perſons; and that about 90 Merchants came along with him to trade, according to Cuſtom. He added, that he had ſent to receive this Ambaſſador, and ordered, that he and his Retinue ſhould be ſupplied with all Neceſſaries through the Journey, at his Expence: That for the Merchants, his People ſhould aſſiſt them as much as lay in their Power; but that he did not intend to put himſelf to the Expence of bearing the Charges of Perſons who come to trade in his Dominions.

Hot-Baths near Pe-king.

SEPTEMBER the 14th, at Three in the Morning, the Emperor ſet-out for the Hot-Baths, ſix Leagues from *Pe-king*, almoſt due North; and lodged in a Houſe built on Purpoſe, which has only 3 little Pavilions, that make a very plain Appearance. In each of them there are Baths, beſides two large ſquare Baſons in the Court, pretty neatly built, with between 4 and 5 Foot of Water, which are of a moderate Heat. Theſe Baths, they ſay, are much frequented [a].

SECT. IV.

The Author's *fourth Journey along with the* Emperor, *in* 1692.

They leave Pe-king. *Soil of* Tartary. *The Emperor a Cook. Wild Boars killed.* Ulatay, *Hunting Country. A Bear killed of a large Size. A Feſtival. Emperor's Sons arrive. The* Shulon *Animal.* Ulaſtay, *Hunting Place: Much Game killed. The Emperor's Eſcape. Great Slaughter of Stags.* Kalka *Princes come to ſalute his Majeſty. Bear and Tiger killed.* Kalka *Princes feaſted. March homeward. A Tiger ſlain. A Bear killed. Hot-Baths. Two large Tigers. Return to* Pe-king.

They leave Pe-king.

THE 8th of *September*, 1692, they left *Pe-king*, and came the 11th to *Kû-pe-kew*, 290 *Li* diſtant; Next Day, to *Ngan-kya-tun*, 70 *Li*; the 13th, to the Village *Hong-ki-ing*, 80; the 14th, to a Plain 70 *Li*. The Emperor fiſhed and hunted all the Way, aſſiſted by his *Manchews*, who jumped into the Rivers to aſſiſt in dragging the Nets, notwithſtanding the Rigour of the Seaſon. His Majeſty had ſmall Succeſs this Journey in taking Stags with the Call, but great Numbers were ſlain in Rings. The 15th, he ſhot a Stag with ſuch Force, that he buried the Arrows in its Belly, the Head of which was of Bone, as blunt as the End of one's Finger. They encamped 70 *Li* farther, near a Village, the laſt to be met-with towards the North: For a vaſt Tract of Ground, reaching to the other Side of the Mountains, and extending from Eaſt to Weſt, is reſerved for the Emperor's Hunting, and the Tilling of it ſtrictly prohibited.

Soil of Tartary.

FROM the Gate of the Great Wall at *Kû-pe-kew*, the Country is full of Mountains and Foreſts, intermixed with fertile Valleys and Plains, for the moſt Part cultivated: The Grain was exceeding good, eſpecially the Millet. The Emperor was ſo over-joyed at ſuch a plentiful Proſpect of Corn, that he ſent ſome of it, by Expreſs, to be ſhewn to the Empreſs Dowager, and the Queens.

THE 16th, his Majeſty killed a Stag in the Mountains, that weighed above 500 Pounds. Afterwards, in a pretty large Valley, he with Arrows ſhot ſome Quails and Pheaſants, flying. About Two in the Afternoon, having gone 30 *Li*, he ordered Supper to be made ready, it being the Cuſtom of the *Tartars* to ſup very early: He himſelf dreſſed the Liver of the Stag he had killed: This, and the Haunch, being eſteemed here as the moſt delicate Pieces. He was accompanied by 3 of his Sons, and 2 of his Sons-in-law, taking a Pleaſure to teach them the Method of preparing the Stag's Liver after the Manner of the ancient *Tartars*. Having made the Pieces ready for roaſting, he divided them among them, and ſome of the Officers moſt about his Perſon, who all fell to roaſting their Meat after his Example.

THE 20th, they made Rings, and killed a great Number of Stags and Roebucks, with five wild Boars, three of which laſt fell by the Hands of the Emperor. After this Sport was over, his Majeſty dined in the open Field, as uſual. This Day a *Mongol* Regulo, who governed the neighbouring Country, called *Onioth*, waited on the Emperor. The 21ſt, his Majeſty being in the Neighbourhood, ſent for 500 *Korchin Mongols*, who are reckoned excellent Hunters, and very expert in forming Circles. As they bear their own Expences, and uſe their own Horſes, the Emperor, to fatigue them the leſs, divided them into two Companies, which were employed alternately. This Day they made double Rings, 50 or 60 Paces aſunder. The inner was compoſed of thoſe *Mongol* Hunters; the outer, of his Majeſty's Hunters; who had Orders to ſhoot the Game that eſcaped out of the firſt Ring,

[a] *Du Halde's China*, p. 344.

Journey in Tartary.

within which the Prickers beat the thickeſt Places of the Wood, but the *Mongols* did not ſhoot at all. The Ring was made on the Declivity of a Mountain, covered with Woods, where they killed 82 large Stags and Roebucks, very few eſcaping [a].

Ulatay, Hunting Country.

THE 23d, fifty were killed. This Day the Emperor's Horſe ſlipping his Foot, fell; but his Majeſty received no Hurt. The 25th, his Majeſty ſet-out an Hour before Day for *Ulatay*, a Place famous for Hunting; the neighbouring Country being full of Hills, interſperſed with Valleys and Plains, and covered with Groves and Thickets, affording a delightful Proſpect, and abounding with Game. In the Morning he killed two large Stags decoyed by the Call: Afterwards, in two Rings, where a very great Number were ſlain, he killed nine. In the Evening he went to a ſmall, but thick Grove of Trees, near the Camp, where a Bear had lodged himſelf as in a Fort. The Horſemen by ſhouting, beating the Trees, and cracking their Whips, rouſed the Beaſt, who paſſed backwards and forwards ſeveral Times through the Wood, before he would quit it.

A Bear killed.

AT length, after he had roared a long While, he ran-down the Mountain, and croſſed an open rugged Country, followed by the Hunters on Horſeback; who ranging themſelves on each Side, at the Diſtance of 15 or 20 Paces, conducted him gently till they came to a narrow Paſſage between two little Hills. As this Animal is heavy, and can neither run faſt nor long, he ſtopped on the Declivity of a Hill: So that the Emperor, who ſtood on the Side of the oppoſite Hill, having a fair Shot at him, wounded him ſorely in the Flank. When he found himſelf hurt, he gave a deadly Roar, and turned his Head in a great Fury towards the Arrow that ſtuck in his Belly, and endeavouring to pull it out, broke it to Pieces; after which running a few Paces farther, he ſtopped ſhort.

A large

THEN the Emperor alighting, took a Half-Pike, and approaching the Bear with four of his beſt Hunters, killed him outright; on which Occaſion nothing was heard but Shouts and Applauſes. This Creature was very large, being near ſix Foot long from the Head to the Root of the Tail: His Body was proportionably thick, and the Hair long, black, and ſhining, like a Jackdaw's Feathers: His Ears and Eyes were very ſmall, and Neck as thick as his Belly. Bears in *France* are not ſo big, nor have ſuch fine Hair.

Feaſt.

As this was the 15th of the 8th *Chineſe* Moon, which is a Day of Rejoicing, when Friends are wont to make Preſents to each other of Eatables [b], eſpecially Cakes and Water-Melons; his Majeſty cauſed ſuch Things to be diſtributed among the Grandees of his Court and his principal Officers: After which he gave Wine and Brandy to the Officers of his Houſhold, his Guards, Hunters, Eunuchs of his Train, and Houſhold Troops.

Gerbillon. 1692.

Emperor's Sons arrive.

THE 27th, in the Evening, 3 of the Emperor's Sons, who had ſpent the Summer in *Tartary* to recover their Health, arrived in the Camp, accompanied with his 4 other Sons, and all the Grandees of the Court, who went to meet them. His Majeſty received them at the Gate of the inmoſt Incloſure, made by the Tents, and was very joyful to ſee them in perfect Health.

The Shulon Animal.

THE 28th, the Emperor killed ten Stags with his own Hand, beſides a Beaſt as big as the largeſt Wolf, called *Shulon*; whoſe Skin is generally eſteemed for the Fur, the Hair being long, ſoft, and ſtrong. The Skins ſell at *Pe-king* for 15 or 20 Crowns apiece. The *Ruſſians* call this Animal *Liu*, which the Author takes to be a Sort of Lynx [c].

Ulaſtay Hunting-Place.

THE 29th, the Emperor ſet-out by Day-break, for a Place in the Mountains called *Ulaſtay*, noted for a prodigious Number of great Stags. The Hunting began with the Stag-call, and his Majeſty killed two very large ones. Towards Noon a Ring was made, in which above 90 were ſlain, with 8 or 10 Roebucks: So that 102 of both Sorts were brought to the Camp. The Emperor killed himſelf 36, in a ſhort Time. It was a Paſtime worthy of a Prince, ſays *Gerbillon*, to behold theſe Stags deſcending in Herds on all Sides into a narrow Vale, between two very ſteep, woody Mountains: And as there was no Paſſage out, ſome endeavouring to re-aſcend the Mountains, and others forcing their Way through the Hunters, whom they ſometimes threw-off their Horſes: However, as the Ring was double, and very cloſe, his Majeſty had given Leave to his Officers and Hunters, to ſhoot all that came near them; ſo that ſcarce one eſcaped.

Much Game killed.

A PAGE of the Bedchamber being thrown by his Horſe, at the Inſtant he was ſhooting, the Arrow unfortunately grazed on the Emperor's Ear. The Page taking Occaſion to run after the Horſe, abſented himſelf the reſt of the Day: But at Night, cauſing his Hands to be tied behind him like a Criminal, he went and kneeled at the Door of the Emperor's Tent, to ſhew that he threw himſelf at his Majeſty's Mercy, and acknowledged himſelf worthy of Death. The Emperor ordered him to be told, that tho' he deſerved to die, yet he would grant him his

4 Journey in Tartary. Pardon, becauſe he looked upon this Fault as the Blunder of a young Man, on Condition, that he ſhould be more careful for the future.

Great Slaughter of Stags. THE 30th, they broke-up their Camp, and began to bend their Courſe towards the South-Weſt; whereas hitherto they had marched North-Weſt. Their Road lay chiefly Weſt, inclining to the South. The Baggage went no more than 30 *Li*; but the reſt travelled 60 with the Emperor. This Day he cauſed a much larger Ring than ordinary to be made, and found ſtill more b Game; which were ſeen to come in Herds out of the Wood, on the Declivity of the Mountain: So that there were killed 154 Stags, and 8 Roebucks; whereof the Emperor ſlew 22 with his own Hand. In his Way to the Camp, along a large Valley watered with a Rivulet, he ſhot Pheaſants and Quails; which ſometimes were taken-up by the Hunters, when they were weary with flying, and endeavoured to hide themſelves in the Graſs.

Kalka Princes come to SOON after, the Grand *Lama* of *Kalka*, with his Brother *Tûſhetû Hân*, the chief Prince of the *Kalkas*, came to ſalute the Emperor; who, three Days before, had diſpatched one of the principal Lords to invite them hither. Being near the Camp, his Majeſty ordered ſeveral Lords to meet them; and when they were entered, he ſent 6 of his Sons to receive and compliment them without the Imperial Quarter. Soon after theſe two Princes were admitted to an Audience, both d dreſſed in the Robes which the Emperor had given them the Year before, but their Caps were of their own Country Faſhion. His Majeſty received them in his great Tent, which ſerves for his Chamber, and made them eat in his Preſence; but the principal Officers of their Train were ſerved without. The ſame Method was obſerved, *October* 1, at a Feaſt made for the *Lama*, his Brother, Siſter, and ſome of the Wives of the principal *Kalka Taykis*. The Banquet con- e ſiſted of Tables loaded with large Pieces of roaſted and boiled Meat, but all cold.

Salute his Majeſty.

NEXT Day, the third of the *Kalka* Princes a came to ſalute his Majeſty, attended with ſome conſiderable *Lamas*, and 3 or 4 principal Officers. So ſoon as the Emperor perceived him, he ſtopped, and aſked him ſeveral Queſtions in a kind, affable Manner.

A Bear and Tiger killed. THE 3d, a Bear and Tiger were killed; the firſt with Arrows, by the Emperor; the latter, f by his Prickers. Upon the Bear's Belly there were 2 Stripes of a tawny Colour, above an Inch in Breadth, which made an Angle between his fore-Legs, and reached as far as the Middle of his Body: His Fleſh was very delicious. The Tiger was the largeſt *Gerbillon* had ever ſeen, and very old, according to the Opinion of Connoiſſeurs. Gerbillon. 1692. Next Day, the Emperor killed three Stags, by Means of the Call, and about 52 were ſlain in three Rings, one made by his Majeſty, the other two by the Princes his Sons b.

THE 5th, the Emperor travelled at leaſt 9 or Kalka Princes feaſted. 10 Leagues to the North-Weſt, but the Baggage no more than 5 or 6, and encamped beyond the high Mountains, in a much opener Country, but very uneven, and full of naked Hills. Next Day, his Majeſty feaſted the Princes, the *Kalka Lamas*, and the whole Court. In the Evening he honoured the Great *Lama* with a Viſit in his Tent, and made both him and his Brother Preſents; but would take nothing from them, except 4 or 5 Horſes, out of a great Number, which they offered him.

THE 7th, they began to travel towards *Pe-king*, but very ſlowly, hunting all the Way. Marching Homeward. c In the Evening, as they returned to the Camp, the Emperor's ninth Son, who had been ill of an Impoſthume behind his Ear, arrived; having been ſent-for by his Majeſty, as ſoon as he knew he was cured, to take the Diverſion of Hunting. The Jeſuits, *Pereyra* and *Lucci*, came in this young Prince's Train, with a Surgeon newly arrived from *Ma-kau*, who had performed the Cure.

A Tiger ſlain. THE 8th, ſix Tigers were diſcovered in a very d thick Wood: But as it was impoſſible to drive them out, and more ſo to chace and attack them, without expoſing the Hunters to very great Danger, his Majeſty choſe rather to abandon the Sport, than hazard the Life of a ſingle Subject; therefore, breaking the Ring, he marched toward the Camp, where he had the Diverſion of ſhooting at a Butt, and Wreſtling. Next Day, they rouſed a Tiger, which gave them a very long Chace: But at laſt a Page, by his Majeſty's e Order, diſlodged him with the firſt Shot, and killed him with a ſecond. Immediately he returned the Emperor Thanks for the Honour he had done him in nine Proſtrations.

A Bear killed. THE 12th, the Princes having made a Ring, incloſed a large Bear, whom all their Endeavours could not drive from his Shelter: A Dog going too near, was torn in Pieces. At laſt, the Emperor's ninth Son, by Order of his Majeſty, wounded the Beaſt with a Muſket-Shot, which f made him remove, and then killed him with an Arrow. Afterwards 49 Stags were ſlain, and next Day 118. This done, they encamped in a Valley near the Hot-Baths, which they paſſed-by laſt Year. Hot-Baths. The Emperor bathed in the Evening. He aſked the Jeſuits ſeveral Queſtions concerning the Nature

a Young *Shaſaktû Hân*, mentioned *p.* 705. b; whoſe Father was betrayed into the Hands of *Kaldan Khân* of the *Eluths*, and put to Death. See before, *p.* 381. e. b *Du Halde's China*, p. 347.

of

Journey in Tartary.

of Baths, and mentioned above 30 in different Parts of his Dominions; particularly one about 20 Leagues to the Westward, where, within the Circumference of 10 *Li*, are about 200 Springs of different Tastes and Qualities. a

THE 14th, two Tigers being discovered lying asleep, the Emperor, with his Harquebuss, wounded one of them in the Paw; upon which both fled different Ways. The Prickers having dispatched the wounded Beast, his Majesty went in Pursuit of the other, and at the third Shot b lodged a Ball above his left-Shoulder; upon which he ran a few Paces, and fell-down dead. They were both Males of the largest Size, and were wounded in many Places with the Teeth and Claws of other Tigers. The Emperor ordered them to be flead, and at the Surgeon of *Ma-kau*'s Request, gave him the Claws. He pretended, that an Ointment made of them cured the King's Evil; and that they were of great Use to discover when Children, who cried c much and refused the Breast, were afflicted with a dangerous Distemper called *the Wind*; for in that Case a Kind of Bark would grow upon the Claw, if applied to their Belly. The same Day, the 500 *Mongol* Hunters were sent-back to their own Country, with the Presents of Money, Cloth, and Tea.

Return to Pe-king.

THE 15th, 16th, and 17th, they marched through Valleys, watered with a River, about 60 *Li* each Day. The 18th, they encamped at d *Li*, and the 19th, at *Kû-pe-kew*. The Militia, as the Emperor approached the Wall, were drawn-up, and kneeled as he passed. The 20th, proceeding 50 *Li*, they encamped near the Village *Nan-chin-whang*. His Majesty went most of the Way by Water, shooting some Ducks and Hares. The 21st, they advanced 100 *Li*, of which the Emperor went 40 by Water. At the City *Shwi-in hyen*, where they encamped, many *Pe-king Mandarins* of the first Rank came to salute his e Majesty. The 22d, having travelled 20 *Li*, the Emperor was met by the Prince his Heir, and arrived at *Pe-king* 40 *Li* farther, before Noon [a].

Gerbillon. 1696.

SECT. V.

The Author's *fifth Journey into* Tartary, *in the Retinue of the* Emperor, *marching against the* Eluths *in* 1696.

1. *The Road from* Pe-king *to the Plain of* Keltû.

Emperor sets-out. Nan-kew *Fortress. Mountain.* Chang-ngan-ling. Tyau-i-pû. Che-ching hyen. Yang-chew hyen. Tû-shi-chin. *The Great Wall.* Chilon-palhaton. Shan-tû *River. Officers punished, for Neglect of Duty.* Porohotun. Kon Nor. *The Emperor's Vigilance: Visited by the* Hân. Queyzû-pulak. Lama *Imposture. Pass the Sands on-Foot. Plain of* Holbo. Anghirtû. Hajimuk. Keltu *Plain and Pool.*

APRIL 1, 1696, being the 30th of the second *Chinese* Moon, the Jesuits *Thomas*, *Pereyra*, and *Gerbillon*, attended the Emperor, who went to make War upon the King of *Eluth* [b]. He carried with him six of his Children, leaving the Heir-Apparent at *Pe-king*, to govern the Empire. He found without the Suburbs, all the Troops which were to follow him, drawn-up in Ranks, together with the Artillery, large and small (for the Army was divided into several Bodies) the rest took another Road. They were always to keep 5 or 6 Days Journey asunder, that they might encamp more commodiously in the Mountains, till they got into the Plains of *Tartary*, where they were to join again. When they were gotten about 4 Leagues from the Capital, the Prince Regent, who had accompanied the Emperor, returned; and his Majesty continuing his Rout, encamped on the North-Side of *Sha-ho*, a walled Town. *Emperor sets-out.*

THE 2d, they encamped at the Foot of the Mountains, near the Fortress of *Nan-kew*, thro' which is the Passage that lies amply described in the first Journal [c]. The third, they passed the Streights of the Mountains, 3 Leagues in Length, much more easily than they did before, the Roads having been well-repaired. They encamped near *Yu-lin*, a walled Town: The 4th, near *Whay-lay*: The 5th, five *Li* beyond a Town called *Tu-mû*, along a Brook, in a Place called *Shi-ho*. Nan-kew Fortress.

[a] *Du Halde's China*, p. 348, *& seq.* [b] It is proper to observe, that there is no Country which goes by the Name of *Eluth*, as our Author's unguarded Way of speaking seems to insinuate. [c] See before, *p.* 668 a.

April

5. *Journey in Tartary.*

THE 6th, having marched the firſt 40 *Li*, a through a large Valley, they climbed a pretty high Mountain, called *Chang-ngan-ling*. The Aſcent was a League at leaſt, but the Deſcent not ſo much by a great deal, the Land beyond it being higher than on this Side. The Road was ſo effectually repaired, that both Camels and Waggons loaden paſſed them without Difficulty. On the Top of the Mountain was a little ruined Fortreſs, a League beyond which they encamped, in a Plain called *Ko-hin*, along a Brook, which b runs among the Mountains [a].

Mountain Chang-ngan-ling.

Tyau-û-pû. THE 7th, they marched through a very large Valley and well-repaired Road, encamping along a Brook, which runs Weſtward in the Mountains, near a little Town with Mud-Walls, called *Tyau-i-pû*; where they reſted next Day, becauſe the Snow, which fell in the Night, was half a Foot deep.

Che-ching hyen. THE 9th, their Road lay thro' a pretty large Valley, which makes a narrow Streight about c half Way, where one is obliged to croſs a Kind of little Hill between the two Mountains. They encamped along a Brook, running Eaſt, near the City *Che-ching hyen*, which is incloſed with good Brick Walls, having Towers at certain Diſtances.

Yong-chew hyen. THE 10th, they travelled always amongſt the Mountains, in a pretty large Valley, with a very narrow Streight, like the former. Above half-Way they paſſed-by the City *Yong-chew hyen*, with good Walls defended by Towers; and en- d camped along a Brook, near a little half-ruined Fortreſs. This Day a *Hya*, who was one of the Officers of the Emperor's Stables, deſpairing of Ability to continue the Journey, killed himſelf: His Majeſty being informed thereof, to deter others, ordered all his Baggage, Horſes, Camels, and Slaves, to be diſtributed among the Grooms of his Retinue, his Effects to be confiſcated, and his Body thrown in the Field without being buried.

Tû-ſhi-chin. THE 11th, they marched through a Valley to *Tû-ſhi-chin* [b], another walled Town. Here the Miſſioners found the Height of the Pole-Star 41 Degrees, 36 Minutes: So that adding 5 Minutes for the 10 *Li* [c] from thence to the Great Wall, which they paſſed next Morning, the Latitude of the Gate will be 41 Degrees, 41 Minutes.

THIS Gate is built in the Middle of a Streight of the Mountains, not 200 Paces wide. The Wall is pretty entire here, but is almoſt quite ruined on the Declivity of the Mountains on each Side. The reſt of the Stage was in *Tartary*, where the Country begins to be much more open, the little Hills on the Eaſt and Weſt widening as they advanced, having to the North a wide extended Plain, where the Emperor's Cattle graze. They encamped near *Joy-hû*, a little Chilon-palhaton. Hill, in a Place named *Chilon-palhaton*. The marſhy Grounds were ſtill frozen ſo hard, that the loaded Waggons ſcarce made any Impreſſion on the Surface.

Gerbillon 1696. *The Great Wall.*

THE 13th, the Country was ſtill more open. Shan-tû R. They encamped in a Place called *Nohay-hojo* [d], *over.* near a little River named *Shan-tû*, which runs winding in the Plain from Weſt to Eaſt. There was not one Tree to be ſeen from the Great Wall hither.

THE Emperor paſſing by Chance near the *Officers* Wells, which had been dug for Water to drink, *miſſed, ſe* and not finding there the two Officers of his Houſhold entruſted to guard them, he cauſed them to be looked for; and after he had aſked them how they came to take ſo little Care of a Thing of ſuch great Importance? he had them chaſtiſed, and ſent them to be judged by his Council; who ſentenced them to be baniſhed to *Ula*. His Majeſty ratified the Sentence, and diſtributed all their Horſes. At the ſame Time he ſeverely reprimanded the principal Lords of the Empire for the little Regard they had ſhewn to his Command, given on the 12th, that the Baggage ſhould ſet-out at Day-break, no Fires ſuffered to be made before that Time, and that they ſhould confine themſelves to one Meal a-Day; adding, that ſince he and his Sons, as young as they were, obſerved that Rule, they might well abſtain from eating oftener.

e HEREUPON a While after, the four principal *Neglect* Lords of the Court, whoſe Buſineſs it is to ſee *Duty.* Orders kept in the Emperor's Retinue, repaired to his Tent-Gate, and falling-on their Knees in the Poſture of Offenders, acknowledged their Fault, deſiring that he would puniſh them as they deſerved. His Majeſty ſent to tell them, that they ſhould labour to repair their Fault; which

which if they did, he would pardon them; but a that if they did not, he would cauſe them to be proſecuted at his Return to *Pe-king*. This Reprimand had the deſired Effect.

THE Country, through which they travelled on the 14th, was very flat, and open on all Sides; ſo that they could ſcarce diſcern the Mountains which lay at a great Diſtance to the Eaſt and Weſt: But the Paſtures were not ſo common as the two former Days, and the Ground ſeemed almoſt every-where impregnated with Nitre. b This Land likewiſe is ſet apart for grazing the Emperor's Cattle: But they ſaw on the Road no more than two miſerable Tents of *Mongols*. A little before they arrived at *Poro Hotun*, near the little River *Shan-tû*, two *Kalkas* were taken ſtealing Horſes, and condemned to die: But the Emperor ordered their Noſes and Ears to be cut-off, and their Arms and Legs to be broken, for an Example to others [a].

THE 15th, they reſted; and next Day encamped in a Place called *Kon Nor* [b], where there were ſeveral Pools of Water, but not a Tree. Although the two Days before were extreamly hot, and much Rain fell, accompanied with Thunder (the Wind being in the S.E, which is the rainy Point here) yet this 16th, it ſnowed ſeverely all the Afternoon: What was worſe, the Ground being covered, they could find no Dung to make Fires. The Emperor alighted, and inſtead of retiring into a little Tent, ſet-up d for him according to Cuſtom, ſtood all the While with his Sons, expoſed to the Weather, as well as others, till his Tents were prepared in the Place marked-out for them: After this he took-care to preſerve the Horſes of his Retinue from the piercing Wind, ordering his *Hyas* to conduct them to the Valleys to the N.W. of the Camp, and not to unſaddle them till Morning. They had dug 40 Wells to be ſupplied with good Water, and five *Li* to the North found an excellent e Spring.

THE 17th, the Wind changing to the Weſt, the Rain ceaſed, and at Noon the Sun ſhone; which cheared the Emperor, who had been exceedingly dejected at the bad Weather. This Day, *Tûſhetû Hân*, with his Brother the *Lama*, *Chepzuin Tamba Hûtuktû*, came to ſalute his Majeſty; who received them with many Careſſes.

THE 18th, the Country was full of little Hills and Hillocks, ſome of which they croſſed, and found the Snow ſtill on many. They encamped on the Edge of a ſandy Deſart, four Days Journey over, in a Place called *Queyzû-pulak*, near a ſmall Brook, which runs into a Kind of Pool or Meer, named *Pojoktey*, not many *Li* from thence, and five or ſix in Circumference. Gerbillon. 1696. Queyzû-pulak.

HERE the Emperor ſent-back all the *Lamas* he had brought from *Pe-king*. Theſe promiſed to make the Rain ceaſe, and bring fair Weather: But the contrary fell-out. For on the 15th, after they had ſaid their Prayers, they cauſed 8 or 10 Cannon to be fired, pretending the Noiſe would diſperſe the Clouds: Yet the next Day, they had the worſt Weather the Author had ſeen in all his Journeys into *Tartary*. Being aſked how it came to rain ſo heavily at a Time when it uſed to be perfectly fair? they made Anſwer, that the Spirits which preſide over the Springs, Rivers, and c Waters of the Country, were come to meet the Emperor [c]. Lama Impoſture.

THEY ſtaid here the 19th, for the Waggons; and though it was the Emperor's Birth-Day, yet he ordered no Ceremony to be performed. Next Day, his Majeſty hunted Hares in the neighbouring Sands, which he ordered all the Servants of his Retinue to paſs-over on-Foot; at the ſame Time taking-off the Prohibition of more than one Meal a Day. Paſs the Sands on-Foot.

THE 21ſt, they advanced 40 *Li*, almoſt always among little Sand-Hills, full of Briars, and a Kind of Willows, which grow like Buſhes. The Road was pretty tolerable. They encamped at *Holbo*, in a little Plain between two Ponds: The Water of that to the Eaſt, they ſaid, was good to drink; but the other ſalt and bitter: There were beſides ſeveral little Meers, whoſe Water looked like Lye, it was ſo full of Nitre. Plain of Holbo.

THE 22d, they marched continually among the Sand-Hills, where the Roads, though carefully mended, were very troubleſome, the Waggon-Wheels and Horſes Feet ſinking deep into the looſe Sands; among which they encamped, in a Place called *Anghirtû* [d]. Near it there were ſeveral little Meers; and ten *Li* to the Eaſt, a Fountain of very good Water. Anghirtû.

THE 23d, they encamped to the North of a great Plain, in a Place called *Hajimuk*, from a Hajimuk.

great Pool there, which had Plenty of Water, a but full of Nitre. It ſnowed all Day, and till Morning, with a high Wind from the S.W. It was alſo as cold as in the Depth of Winter at *Pe-king*: So that ſeveral Horſes died, and all ſuffered extreamly for Want of Forage. Here they reſted the 24th [a].

THE 25th, they found the looſe Sands more upon a Level, and ſometimes met with hard Sands, where Travelling was eaſy: They alſo ſaw a few ſcattered Tents of the *Mongols*. The great Plain, where they encamped, is called *Kel-tû* [b], from a Pool there, which extends Weſtwards out of Sight, and has Sand-Hills to the N. It was exceeding cold in the Morning, and the Ground ſo hard frozen, that they marched on Horſeback over the Mud. As it ſnowed moſt of next Day, they reſted, on Account of the hard Weather, which was accompanied with a very high and cold Wind.

Keltu *Plain and Pool.*

Kon Nor.

THE 27th, they marched for the firſt 30 *Li*, ſtill among looſe Sands, in a very uneven Country; ſo that ſeveral loaded Beaſts fell-down and were left. For the Remainder of the Way to *Kon Nor*, the Sands were not ſo looſe, and to the N. and N.W. the Country was quite open. The 28th, their Road was like the former. They encamped near *Kurcha Hân Nor* [c], a great Pool, or Lake, where the Emperor fiſhed, and caught only one Sort of little Fiſh, but very well-taſted. The Regulo to whom this Country belonged, came to ſalute the Emperor, with ſeveral Princes of his Houſe, and preſented him with a good many Horſes, Oxen, and Sheep.

Kur-cha-han Nor.

THE 29th, the Country was more even. They encamped in a Place called *Hûlûſtay*, near ſome Pools of very bad Water, being full of nitrous, and other Salts. Next Day, and *May* 1, they reſted; when the Emperor, concerned to ſee the Horſes and Beaſts of Burden in ſuch bad Caſe, ſaid publickly, that he and his Council had done ill, to ſet-out at ſo improper a Seaſon. Two of the Princes put themſelves at the Head of two Standards, which they were to command; and taking Leave of their Father, marched forward.

Gerbillon 1696. Huluſtay.

MAY 2, the Country was more uneven and ſandy, but abounding with Graſs. They aſcended a pretty high Hill, and the Land ſeemed to riſe conſiderably. They encamped S. of a ſandy Hill, in a Place named *Sira Suritû* [d], where was Plenty of Water and Forage. In the Neighbourhood were 3 Meers or Pools. Here they began again to eat but one Meal a-Day, by the Emperor's Orders. In the Evening the Jeſuits obſerved, that the Sun touched the Horizon 112 Degrees, 40 Minutes, from the S. Point, or 22 Degrees, 40 Minutes, from the Eaſt; whence the Variation did not amount to one Degree. They alſo found the Height of the Pole 43 Degrees, 57 Minutes, agreeing nearly with the Computation of the Diſtance they had travelled.

Sira Sh

THE 4th, the Country was very open and level. The Soil conſiſted of Sand mixed with Earth, and there was Plenty of Graſs, but dry and withered. The Place where they encamped, named *Habir Hân*, was near a great Pool. They digged ſeveral Wells of pretty good Water. The 5th, they met with little Hills to the E. and W. which had neither Trees, nor Rocks; and often with very good Paſturage and odoriferous Herbs, which juſt began to appear. In a Place called *Horho*, where they pitched, are ſeveral Meers; but their Water was very bad, like that of the Wells they digged, which obliged them to ſend to a Spring a League off.

Habir

Ho

THE 6th, the Country was very open, but rugged and barren, being moſtly a firm Sand. The Land ſtill elevated as they advanced. Not far from their Camp was a very good Spring: Alſo a Meer, of very ſalt and bitter Water. The 7th, they encamped in a Place called *Targhit* [e], by

Ma

by a great Meer of Rain-Water, in a Bottom surrounded with Hillocks [a].

THIS Day, the Emperor's Envoys returned, who had been ſent to the King of *Eluth* to demand why he had entered the Territories of the *Kalkas*, contrary to his Promiſe, and what was his Deſign? They had been detained 3 Months in a Valley, ſtrictly guarded, without ſeeing that Prince, or knowing any Thing that paſſed, and then diſmiſſed on-Foot, and without Proviſions. The King commanded a Letter to be delivered to them, in Anſwer to the Emperor's, and ordered them to be told, that he might have put them to Death, by Way of Repriſal, for 500 of his Men, who, contrary to the Law of Arms, were murdered the Year before, in the Retinue of his Ambaſſador; but that he made-uſe of Clemency, and would give them their Lives: Yet cauſed their Horſes and Camels to be ſeized. b

ONE of the Envoys told the Author, that the *Eluths* had a great Mind to kill them, but were prevented by the King: That when the Proviſions they brought with them were conſumed, they were preſented with Dogs, Camels, Colts, *&c.* but all mere Carrion: That 300 Horſemen guarded them from *Thula*, till they arrived a great Way on this Side the *Kerlon*; but that they made them perform great Stages on-Foot, without pitying ſome of them, whoſe Feet were exceſſively ſwollen. The King's Letter was conceived in modeſt Terms: But he inſiſted on being in the right; and that it was unjuſt in the Emperor to protect a Man, who had committed ſuch enormous Crimes. c d

THE 9th, the Country was very level and open. The Soil, for the moſt Part, a hard Gravel, mixed with ſome Earth. The Weather, which from the firſt of the Month was temperate, grew very cold and windy. At *Penzé*, the Place where they encamped, there were Springs of good Water, and Plenty of Forage. But at *Kodo*, where they pitched next Day, there was very little. However, there were 3 Springs and a Meer. At Noon, they found the Height of the Pole, with the Emperor's great aſtrical Ring, made by *Butterfield*, 45 Degrees, and a few Minutes. They remained at *Kodo* two Days, being incommoded with a piercing cold Wind, and ſome Snow. e

THE 12th, about Ten at Night, two Officers came Poſt, and reported, that they had been very near the Van-Guard of the *Eluths*, who marched along the *Kerlon* with the Stream, and ſeemed to advance towards the *Chineſe* Army. This News diſpelled the Emperor's Melancholy, and filled the Troops with Joy, hoping their Fatigues would be ſoon over. His Majeſty ſummoned his Council about Midnight, and diſpatched Expreſſes to the Generals of his other two Armies, which marched on the Weſt, with Orders for one of them to preſs the Enemy in the Rear, while the other ſhut-up all the Paſſages by which they might eſcape. f Gerbillon, 1696.

THE 13th, they paſſed the Limits of *Tartary* belonging to the Emperor, and encamped in a little Plain called *Súdetû*, quite ſurrounded with Sand-Hills; where was a Spring of very good Water. It was as cold in the Morning as at *Pe-king* in *December*. The 14th, they found in ſeveral Places looſe Sands, with ſome ſmall Trees and Buſhes. They encamped near a great Meer, called *Hûlûſſutay Chahan Nor*, the Water of which was quite white, and full of Nitre. The Forage was better here than in any Place they had met-with on the Road. At the End of ten *Li*, they paſſed-by ten Blocks of white Marble ſet in the Ground; on one of which were cut ſeveral *Chineſe* Characters, importing, that *Yang-lo*, the third Emperor of the Family of *Tayming*, had paſſed this Way when he went to make War with the *Mongols* of the Family of *Ywen*, who had been expelled *China* by *Hong-vû*. *Paſs the Limits.* *Monument of Victory.*

THE 16th, they departed, and encamped in a Place called *Kara-manguni-haber Hân*, among Hills, near a running Spring, to the North of a large Plain, where they met-with ſeveral Meers, which ſeemed to be full of Nitre. Near the Camp was a Kind of Tree, or rather a Maſt, erected on an Eminence a little Way off, which had Pegs for Steps to climb by: At the Foot of it was a Guard of Soldiers, and on the Top were two Centry-Boxes, where, in the Night, are placed Centinels, to give a Look-out over the Country. *Kara-manguni-haber Hân.*

SOON after there arrived an Officer, belonging to one of the moſt powerful *Mongol* Regulos, who had ſent him with a Letter, by the Emperor's Order, to the King of *Eluth*, under Pretence of joining him againſt the *Manchews*. That Prince, in his Anſwer (which the *Mongol* delivered to his Majeſty) preſſed the Regulo to come and join him with all Expedition, aſſuring him, that he was to be reinforced by 60,000 *Ruſſians*, *The Emperor's Policy.*

Journey in Tartary. *Ruſſians*, and that if they defeated the *Manchews*, they would march together directly for *Pe-king*: In ſhort, that if they conquered the Empire, he would divide it with him. This Envoy added, that the King of *Eluth* was pretty tall, very lean in the Face, and ſeemed to be about 50 Years of Age. The Emperor ordered 100 *Taëls* to be given the Envoy, and appeared very well pleaſed with the News he brought [a].

March of his Forces. THE 17th, they reſted, while their Van-Guard advanced before, which conſiſted of 3000 *Chineſe* Infantry, the 2000 Muſketeers of the 8 Standards, 800 choſen Men out of the Life-Guard, 800 *Mongol* Horſe, and a Train of Artillery. The Troops of the firſt Standard, with the Guards and Officers of the Houſhold, beſides a great Number of Volunteers, were to form the main Body, which his Majeſty was to lead in Perſon, having under him three of his Sons and a Regulo, with the principal Grandees of the Empire. The Rear was compoſed of the Troops of the five other Standards, with the Regulos, and two of the Emperor's Children, who are their Chiefs, at their Head.

Ongon-elezû. THE 18th, their Road lay through the moſt level and open Country they had yet ſeen. They found Forage often, but no Water, till they came to *Ongon-elezû*, where was a nitrous Meer, which obliged them to ſink Wells. Although the Weather was ſo cold the 13th, yet this Day the Heat had been very troubleſome, but for the high Wind, which ſhifted from the SE. to NE.

The Van advances. THE 19th, the Emperor ſent his eldeſt Son, accompanied with *So-ſan Lau-ya*, one of the principal Lords and Miniſters of the Empire, to command the Van, conſiſting of 6 or 7000 Soldiers; enjoining them to keep wholly on the Defenſive, even though the Enemy ſhould offer Battle, till the reſt of the Army ſhould come-up. The 20th, they made a very long Stage to arrive at Water, yet found only a little in a Moraſs, called *Sibartay*, or *Sibantû*, where they encamped: Nor was what they dug-for wholeſome, tho' cool, the Ground being frozen a Foot and half deep. A violent NE. and N. Wind blew all this, and next Day; which they reſted.

News of the Eluths. THE 21ſt, two *Eluth* Priſoners being brought to the Camp, ſaid, the Enemy's Army did not amount to 10,000 Men: That the King did not imagine the *Manchews* would come ſo far in Queſt of him; but that if they did come, he was reſolved to fight. An inferior *Mongol* Officer, who had been ſent to obſerve the Enemy's Motions, was met a little beyond the River *Kerlon* by a Party of 30 or 40 *Eluth* Soldiers, who purſued him ſmartly for a long Time; and muſt have taken him, had not a high Wind, which aroſe, diverted them. The Emperor rewarded him with a *Mandarinat* of the fifth Order for himſelf, and one of his Sons after him. Another Expreſs brought News, that the ſecond Army, which was to proceed directly to the *Thûla*, to cut-off the Enemy's Retreat, was ſo much fatigued, that it could not arrive till about the ſecond of *June*.

A Council held. THE 22d, a great Council of War being held, ſome of the Grandees were for advancing with haſte, and attacking the Enemy, before their Proviſions failed, or they had Time to retreat: Others adviſed to march leiſurely to the River *Kerlon*, reſting every ſecond Day, to give the other Armies Time to join them: A third Party were for waiting for their coming-up at the firſt convenient Place. The Emperor, after conſulting the Officers of the Van and Rear, reſolved to follow the laſt Opinion.

Chahan-pûlak. THE 24th, they marched through an open Country, full of little Hills and Dales, in a very good Road, the Soil being Sand mixed with Earth, which afforded Plenty of Forage. They encamped in a Place called *Chahan-pûlak*, where were three Springs, near which they digged Wells. Here they reſted four Days. The two Officers of the Guards, who had been to reconnoitre the Enemy, brought Advice, that from a Mountain, about 180 *Li* from thence, they diſcovered three Horſemen, who ſeemed to be the Enemy's Scouts; and that far beyond them they had perceived a great Duſt, which they ſuppoſed to be raiſed by the Enemy's Van-Guard [b].

The Eluths Forces. THE 26th, two *Eluths* brought-in by a conſiderable *Lama*, who came from the Army that marched from *Khûkhû-hotun*, towards the *Thûla*, informed them, that their King was encamped between that River and the *Kerlon*, in an open Country: That he had with him upwards of 10,000 Men, which joined to the armed Slaves, might amount to 20,000: That a Vaſſal Prince of his Family had likewiſe joined him with 7000 Soldiers and Servants, well-armed: That they had Proviſions enough of Cattle, and were reſolved to fight, if attacked: They added, that their King knew nothing certain relating to the March of the Imperial Armies. Theſe Men, who

who were on Horſeback, armed with Fuſees, and a clad with Stags-Skins, anſwered to all Queſtions with great Sincerity and Reſolution.

Imperial Armies.

THE *Lama* reported, that the Army of *Khûk-hû-hotun*, commanded by the General *Tyan-gû-pê*, that is, Count *Tyan-gû*, one of the principal Grandees of the Empire, advanced with great Speed, and would arrive near the *Kerlon* by the 8th of the 5th Moon [a], but that they did not exceed 10,000 Men, for Want of Carriages and Proviſions: That *San-ſu-kê*, who commanded the 3d b Army, which was almoſt wholly of *Chineſes*, could not take with him more than 2000 Men, they were ſo fatigued; and that they were ten Days March from the other Army, which that General had joined only with a few of his Officers.

They ail Water.

THE 27th and 28th, the Weather was ſo cold, they were forced to put-on their Winter-Cloaths. Next Day, ſeveral of the fatteſt Horſes in their Equipage died here of the Murrain; c which proceeded either from the bad Quality of the Water, or from their not drinking a ſufficient Quantity. The Diſeaſe diſcovered itſelf by a Lump, or Swelling in the Throat.

Twirin.

THE 31ſt, purſuant to a Reſolution to march towards the Head of the *Kerlon*, they altered their Rout to the NW. and encamped in a Place called *Twirin*, where was a running Spring, but full of Nitre.

d

3. Kaldan's *Overthrow, and the* Emperor's *Return.*

The Emperor's Bounty. Two Envoys ſent to Kaldan. Idû-chilu-irû-pûlak. *Encamp at* Rûkûchel. *Envoys in Danger. The* Eluths *retreat.* Yentû-pûritû. *One Envoy returns. The* Eluths *in Sight. Gerbillon. 1696.

Two Envoys ſent

NEXT Day, the Emperor ſent two Envoys with a Letter to the *Eluth* King, and Preſents, conſiſting of 200 *Taëls* in Silver, 10 Pieces of *China* Brocade and Silks, ſeveral Suits of Brocade, and Fruits, under the Guard of 200 choſen Troopers, and five truſty Officers; who were to return as ſoon as they ſaw the Enemy, or got to the Place where they expected to find them, and leave the Envoys to proceed. His Majeſty likewiſe ſent-back with them the four *Eluth* Priſoners, giving to each a Suit of Brocade, and a Piece of Silk, to the great Surprize of the poor Fellows, who expected Death rather than Favour. However, one of them, an old Man, was not pleaſed with theſe Preſents, fearing they might cauſe their Prince to ſuſpect their Loyalty, and imagine that they had betrayed his Deſigns. The Emperor, in his Letter, gave the King of *Eluth* to underſtand, that he came to put an End to the War between his People and the *Kalkas*: That if he would end it amicably, and come to meet him, or ſend his Deputies to any Place he thought fit, his Majeſty was ready to hear him, or ſend Deputies thither likewiſe: That otherwiſe he ſhould be obliged to come to a Battle [b].

To Kaldan.

Idû-chilû-irû-pûlak.

THE 4th, the Road lay one-half among rocky Hills; the reſt conſiſted of Sand mixed with Earth, which in ſome Parts yielded good Forage. They encamped in a Place called *Idu-chilu-iru-pulak*, 20 *Li* from *Talan-pûlak*. Here they found a Spring, and dug Wells. The 5th, having marched 50 or 60 *Li*, in an uneven Country, they entered a great Plain, 40 or 50 *Li* in Length, and 10 broad, bounded on the E. and W. by pretty high Hills. There was tolerable Forage, but neither Trees, nor Buſhes. The dry Graſs on one Part of the Plain, and Declivity of the Hills Weſtward, had taken Fire, and ſtill burned. They encamped in a Place called *Rûkûchel*, where was good Water.

Rûkûchel.

Envoys in Danger.

TWO Horſemen, returned full Speed from the Envoys, brought Word, that the Day before, when they came near the *Kerlon*, they perceived no Signs of the Enemy; but that next Morning, at Day-break, a Body of 800 or 1000 *Eluths* came-

5 *Journey in Tartary,*

came-up, and attacked the Troop, who had a ſcarce Time to take Arms. Several were wounded on both Sides; but ſome Officers advancing, acquainted them with their Errand. Two of them, who attended the Envoys to the Commander of the *Eluths*, were immediately ſurrounded, and ſtripped naked by the Soldiers. They would have treated the Envoys in the ſame Manner, had not their Leader interpoſed, and received them, with the four Priſoners.

The Eluths *retreat.*

AFTER they had informed themſelves concerning the Arrival of the Emperor, and Strength of his Army, they let the two Officers go, but without returning either their Cloaths, or the Horſes they had taken, amounting to 400. The ſame Evening the 200 Men returned to the Camp, giving an Account, that the Enemy retired about Ten in the Morning, and repaſſed the *Kerlon*.

Yentû-pûritû.

THE 6th, the firſt Half of their Journey was through Hills, deſtitute of Trees or Buſhes, tho' covered with tolerable Forage. In ſome Places, they met-with nothing but new Graſs, the old having been burnt-up by the *Eluths*; but found no Meers. They encamped in a Place called *Yentû-pûritû*, nigh a little Spring. In the Evening one of the Deputies, ſent to the King of *Eluth*, returned, and informed the Emperor, that after having been kept under a Guard for one Day, they had a Conference with a *Lama*; who told them they could not ſee the King of *Eluth*, and therefore might return with their Letter and Preſents: That they could not believe the Emperor was come ſo near them, but that if it was Fact, one of them might haſte away, and adviſe his Majeſty not to croſs the *Kerlon*: In which Caſe, they ſhould have Time to conſult with their King, whoſe Reſolution would be ſent by the other Envoy. A Squadron of *Eluths*, who eſcorted the Envoy till within 15 *Li* of the Camp, having from an Eminence diſcovered the Emperor's Army, immediately left the Convoy, and returned at full Speed [a].

One Envoy returns.

The Eluths *in Sight.*

NEXT Day, the Emperor, from the Top of a little Hill, diſcovered with Teleſcopes two Troops of the Enemy, 30 or 40 *Li* diſtant. They travelled the laſt 40 *Li* in a great Plain, reaching from the Foot of the Mountains to the *Kerlon*; and encamped in a Place called *Erdeni-tolobak Kerlon-pûlong*. The *Kerlon* riſes on the N. of the Mountain *Kentey*, 60 or 70 Leagues to the N.N.W. and falls-into the Lake *Kulon* [b],

The Kerlon.

about 90 E.N.E. from hence. It is no more than 10 Fathom broad, and 3 Feet deep, having a ſandy Bottom, and abounds with Carp, Pike, and other Kinds of Fiſh. There is Plenty of excellent Forage along its Banks, eſpecially the Northern. The *Kalkas*, ſubject to *Chechin Hân*, were entire Maſters of this Country before the War between them and the *Eluths*, who compelled them to retreat Eaſtwards.

Gobillon 1696.

The Chineſe march

THIS Day, and the former, the Army marched in Order of Battle. The firſt Line was formed by a great Squadron of Houſhold Troops of the Van; the Artillery and Dragoons compoſed the ſecond Line; and the third conſiſted of the *Chineſe* Infantry. Two or three thouſand *Mongol* Horſe, and ſeveral Squadrons of Houſhold Troops, armed with Muſkets and Arrows, made-up the Wings. The ſecond and third Lines took-up near a League in Extent, but the firſt was cloſer. The Emperor marched in the ſecond, attended by his Life-Guards, and the Officers of his Houſhold. As a great Multitude of Servants followed each Squadron, leading their Maſters Horſes, and carrying their Cuiraſſes, beſides thoſe who waited on the Baggage, the Whole made the Appearance of a very numerous Army, though it did not conſiſt of more than 20,000 effective Men. Beſides the Cuiraſſes of Iron, deſcribed elſewhere, moſt of them had others of Raw-Silk, ſtuffed between ſeveral Folds of Taffety, to a conſiderable Thickneſs, which are an excellent Defence againſt Muſket-Shot. They made a very magnificent Appearance. The various Colours of Silk mingling with the Gold of the Cuiraſſes and Standards, which were very numerous, dazzled the Eyes with their Splendor: But Trumpets and Drums they had none, the *Tartars* never uſing any.

In Order of Battle.

Troops ſent

THE 8th, 9th, 10th, and 11th, they marched in the ſame Order along the *Kerlon*. Mean-time the Emperor was informed by 2 or 3 Deſerters, that a few Days before the *Eluth* King was encamped on the *Kerlon*, 30 or 40 *Li* diſtant: But that on hearing his Majeſty was coming at the Head of his Armies, he retired haſtily, with 3000 Men, towards the Woods and Mountains on that River, and could not then be diſtant above 2 or 300 *Li*. This was confirmed by an old Woman left on the Road, who added, that the *Eluth* Chiefs being at Variance with their King, ſome of them deſigned to revolt to the Emperor: Which that Prince diſcovering, he loaded them

them with Irons. On these Reports a Body first a of 3000, and afterwards of 5 or 6000 Horse, were sent with the light Artillery to pursue the Enemy, marching against the Stream of the *Kerlon*.

Pursue the Eluths.

THE 11th, the Emperor encamped beyond that River, near two Mountains, *Tono* to the North, and *Swilhitû* to the West. Next Day, his Majesty returned with the rest of his Army, encamping 4 or 5 *Li* from *Kayre-hojo*. The 13th, having travelled 10 *Li* East, among Hills b and Valleys, and repassing the *Kerlon*, encamped in *Tarhont Chaydan* [a].

Chinese Army fatigued.

THIS Day, a Courier arrived from *Tyan-gû-pê*, with Advice, that he had reached the River *Thûla* on the 4th Instant, with the 14,000 Men in good Spirits, considering their Fatigue; and being informed by his Majesty's Courier, that *Kaldan* was on the *Kerlon*, he had advanced towards this River, and seized all the Passages, by which the Enemy might retire to the *Thûla*. c This News was highly agreeable to the Emperor. And next Day some *Mongols* reported, that *Tyan-gû-pê* being joined by *Sun-tsu-ke*, had fought the Enemy; but giving no Account either of the Battle, or the Victory, they were not credited.

Kaldan attacked,

HOWEVER, the 15th, Advice came, that on the 12th, *Tyan-gû-pê* had gained a compleat Victory over the Enemy. That General had been ordered by the Emperor to march through the Middle of the vast sandy Desart, entirely barren, d destitute of Water, and uninhabited, which till then was thought impassable. The Army, indeed, suffered almost incredible Hardships; the Cavalry, not excepting even the principal Officers, being obliged to dismount and lead their Horses, which they hardly imagined would go through the Journey. They likewise fell short of Provisions, and lived 11 Days upon Horse and Camels Flesh, and many perished with mere Hunger. *Kaldan* came to attack the General in e this Condition, and scarcely left him Time to draw-up his Army in Order of Battle. Both the *Eluth* and *Manchew* Cavalry were obliged to dismount, the Ground being rough and inconvenient for the Horse.

and entirely routed,

AFTER several Discharges from the Artillery and Musketeers, the *Chinese* Infantry, covered with their Bucklers, pierced Sword in Hand to the very Center of the Enemy: They were followed by the *Manchews*, and a dreadful Slaughter ensued: At last the *Eluths*, being pressed on all Sides, after a brave Resistance, gave Ground, and fled in great Disorder. The Imperial Forces pursued them 30 *Li* beyond the Field of Battle, called *Terely*, killed 2000, and made 100 Prisoners. *Kaldan*, with his Son, one Daughter, a *Lama* his Prime-Minister, and 100 Followers escaped: But his Wife [b] was killed, and the Remains of his shattered Army entirely dispersed. The Action lasted 3 Hours, wherein the *Chinese* Infantry chiefly signalized themselves. All the Enemies Wives, Children, Baggage, and Cattle, fell-into the Hands of the Conquerors.

Gerbillon. 1696.

By Tantachment under the Command of *Ma Lau-yé*, gû-pê.

THIS Account was first brought to the De- (which was sent in Pursuit of the Enemy) by 3 of the principal Ministers and Officers of *Kaldan*, who had repaired thither to implore the Emperor's Mercy. That General immediately dispatched a Courier to acquaint his Majesty, who was overjoyed with the News; and, the 16th, those Officers, who were personable for *Eluths*, were brought to the Emperor. One of them was an Ambassador of the *Dalay Lama* [c] to the King of *Eluth*: The other two were that Prince's chief Officers; and one of them had been formerly Ambassador Extraordinary at *Pe-king*. The Emperor treated them kindly, and presented them with *Manchew* Cloaths.

That General's Letter.

THIS Day, they encamped 30 *Li* West of *Tayzim*; and, the next, a Letter was brought from the General by one of the principal Officers of the Army, giving an Account of the Battle and Victory, as before related. At his Approach the Emperor walked-out of his Tent, before which the Grandees and Officers of his Retinue were assembled. The Officer having come-up to his Majesty, and embraced his Knees, the Emperor asked him if all the General Officers were in Health: Then taking the Generalissimo's Letters, he read them aloud himself. The Officer added, that the Enemy came in Crouds every Day to surrender themselves; and that several Detachments of Horse were sent in Pursuit of the King.

A Thanksgiving Sacrifice

WHEN the Emperor had done asking the Messenger Questions, the Grandees unanimously declared,

clared, that it was their Duty to return their a grateful Acknowledgments to Heaven for ſo ſignal a Victory. His Majeſty having readily concurred, they placed a Table in the Middle of the open Area before his Tents, and upon it a perfuming-Pan filled with Incenſe, and 2 Tapers. Then ſtanding before it with his Face to the Tent (his 5 Sons being juſt behind him, the Regulos and other Grandees, *&c.* behind them, all on their Knees) he took a little Cup full of *By the Emperor.* Brandy, and having elevated it towards Heaven, b with both his Hands, poured it on the Ground, and proſtrated himſelf at the Entrance of his Tent; and the Gate of the Incloſure being open, all the Princes, Grandees, and *Mandarins*, in their reſpective Ranks, ſaluted his Majeſty by 3 Genuflexions and 9 Knockings with the Head, to congratulate him on his great Victory; which was the more ſeaſonable, as the *Chineſe* Army was reduced to Extremities, and in great Want of Proviſions, till relieved by the c Spoil: For they took 6000 Oxen, 60 or 70,000 Sheep, 5000 Camels, as many Horſes, and 5000 Arms of all Sorts [a].

He marches back, THE 18th, they proceeded, and encamped at *Shan-hanor* [b]; the 19th, at *Sibartay*, returning the ſame Way they came. The 23d, leaving *Sûdetû* at the End of 20 *Li*, they entered the Territories of the *Mongols*, who ſubmitted at the Beginning of the Monarchy of the *Manchews*, and encamped at *Neto*. Next Day, they d pitched at *Targhir* [c]. The 24th, the Emperor diſtributed 25,000 Livres among the *Mongol* and *Kalka* Princes and Princeſſes, who came to thank his Majeſty in his Camp, for having revenged them on the King of the *Eluths*. The Emperor received them kindly, and entertained the Princeſſes, and ſome of the chief Princes, within the Incloſure of his Tents, the reſt being placed round it: He alſo ordered Money and Pieces of Silk to be given to each of them. A Princeſs, who e was Mother to the Regulo, in whoſe Country they then were, having aſked his Majeſty for a little gold Image of *Fo*, 20 of which had been found amongſt the Spoil of the King of *Eluth*'s Camp, the Emperor ordered them all to be preſented to her.

Viſited by the Khân. THE 26th, being at *Suretû*, *Tûſhetû Hân*, with his Brother the *Lama*, *Champſin-tamban Hûtûktû*, in whoſe Behalf the Emperor had undertaken this War, came to congratulate his Ma- f jeſty, and made him a Preſent of ſeveral Horſes: In Return for which, he gave ſome Pieces of Silk, Brocade, *&c.* and treated them ſumptuouſly in his Tents. Gerbillon. 1696.

JULY the 3d, as they entered the Great Wall, they found many large Veſſels full of Liquors, cooled with Ice; of which all, without Exception, were free to drink. They were placed there, and renewed at the End of every 20 *Li*, as far as *Pe-king*, by Order of the Emperor, on Account of the Heats, which are more intenſe on this Side the Wall than beyond it. A great Number of People from that Capital came now to meet them with Refreſhments; and the Heir appointed arrived in the Evening, attended by the Princes and Grandees of the Empire, in their Robes of State. *Paſs the Great Wall.*

THE 6th, at *King-ho*, 20 *Li* from *Pe-king*, the Empreſs-Dowager, four of the principal Queens, the young Princes, all the *Mandarins* of the Tribunals, and Officers of War, came to meet the Emperor. Towards Night the Queens returned, after a long Converſation with his Majeſty. *Is met by the Court,*

NEXT Day, the Emperor approaching the City, found without the Gate all the Officers of his Houſhold, and other *Mandarins*, in their Robes, with the Trumpets, Drums, Bagpipes, Flutes, and other Inſtruments, who marched before him to the Palace. The Streets were well-ſwept, d lined with Soldiers, and crowded with People. His Majeſty went directly to the Palace of his Anceſtors; near which all the Princes of the Tribunals, and principal *Mandarins*, being aſſembled, he received their Compliments of Congratulation in the uſual Form: After which he viſited the Empreſs-Dowager, before he entered his own Apartment. *Returns to Pe-king.*

THE General, after his Return to *Pe-king*, told the Author, that if *Kaldan*, inſtead of attacking him, had retired, his Army muſt have inevitably periſhed, being quite emaciated with Hunger; and ſo fatigued, that they were not able to join the Emperor, tho' but 40 or 50 Leagues diſtant. As on one Hand, added he, theſe Circumſtances induced the King of *Eluth* to hazard a Battle, thinking an Army ſo exhauſted might eaſily be defeated: On the other, Deſpair giving new Strength to our Forces, they carried all before them, and compleated the Ruin of that Monarch, and his People [d]. *Kaldan's Conduct.*

SECT. VI.

Gerbillon's *ſixth Journey into* Tartary, *with the* Emperor, *in* 1696.

1. *The Road to* Toto, *on the* Whang-ho.

Emperor ſets-out. Swen-wha fû. Hya-pû. Chang-kya-kew. *The Emperor's Studs, Herds, and Flocks. Camps of* Mongols. Whey Nor. Paran-kol. Mo-hay-tû. Shahan-ſubarhan. Khûkhû-hotun. *The Temples viſited.* Mongol *Troops feaſted. River* Turghen. *Emperor's Bounty.* Tarhan-kajan. *Ruins of a City.* Hûtan-hojo. Whang-ho *frozen.* Toto *City.*

THE Emperor ſet-out, *October* 14, 1696, accompanied by his eldeſt Brother, and his eldeſt, 3d and 8th Sons. The 15th, they came to *Nan-kew*; and, the 16th, after travelling all Day in the Streight of *Nan-kew*, between the Mountains, encamped beyond *Sha-taw*, a decayed Fortreſs at the Northern Entrance of thoſe Streights. The 17th, they lay at *Whay-lay hyen*; and, next Day, at *Sha-ching*, a walled Town. The 19th, they advanced 30 *Li*, by the Side of the *Yang-ho*, a little River, and paſſed-through *Pau-ngan*, a ſmall, but populous City. They encamped in a Place called *Chang-wha-ywen*, beyond *Ki-ming*, a little Town, ſo named from the adjacent Mountain, which is cultivated half-way up. At the Top there is a Pagod, which the Emperor, with a few of his Train viſited, though a ſteep Aſcent of 14 *Li*.

THE 20th, they paſſed a Streight of the Mountains, where the *Yang-ho* runs very muddy and rapid. They lodged at *Swen-wha fû*, a great City, in a ſpacious Plain, with a Gariſon of 10,000 Soldiers to watch the Motion of the *Tartars*, *China* being here very eaſy of Acceſs. The Way was lined on both Sides with great Numbers of People on their Knees, knocking their Heads againſt the Ground as the Emperor paſſed; and the Soldiers were drawn-up under-Arms a Mile and an half from the City. His Majeſty remitted the Inhabitants their Taxes this Year, and gave the principal *Mandarins* a Letters written with his own Hand; which is eſteemed a very great Honour. Gerbillon. 1696.

THE 21ſt, they got to *Hya-pû*, a large well-fortified Town, 5 *Li* from the Great Wall, of conſiderable Trade for the Horſes, Cattle, and Skins of *Tartary*. About 12 or 1500 *Chineſe* Foot, who guard the Gate of the Wall, lined the Way under their Arms. A Troop of ſubmitting *Eluths* appeared on their Knees before his Majeſty, who talked to their Chiefs, and ordered ſilk Suits, lined with Furs, to be given to each of them: The Officers had likewiſe Cloaths of gold and ſilk Brocade. Here they ſtaid all next Day, to provide Neceſſaries. Hya-pû.

THE 23d, they travelled through the Mountains, and paſſed the Wall in a Streight called *Chang-kya-kew*, deſcribed in the firſt Journal [a]. The Emperor hunted by the Way, and let-fly his Falcons at ſome Pheaſants. They pitched in *Shan-hun Tolo-hay*, by a Brook; and, the 24th, marched over *Hinkan-ſabahan*, a high Mountain covered with Snow. The Cold increaſed as they aſcended, the Brooks being frozen; and the Country forward was almoſt on a Level with the Top of the Hill. They encamped in a wide Plain, named *Kara-palapû*, abounding with excellent Paſture, watered by a Rivulet, where above 40,000 of the Emperor's Cows and Oxen grazed. Chang-kya-kew.

THE 25th, they croſſed the Rivulet; and 30 *Li* farther N.W. paſſed a rugged Hill ſet all-over with Stones, into another Plain extending beyond the Sight. Here the Emperor has a great Number of *Haras*, or Studs of Horſes. At the End of 15 *Li*, they came to 58 of them in a Row, each with 300 Mares and Foals, with a Stallion; and 8 more with Geldings under 3 Years of Age, whence he ſupplies his own Stables, the Tribunals for the Soldiery, and the Poſts. He has likewiſe 80,000 Sheep, which Number is always exactly kept-up. The Emperor, after viewing his Studs, went to the Camp of the *Mongols*, who had the Care of them: The Women ſtood in a Row, holding Hand-Boards with Butter, Cheeſe, and Milk, as Preſents for his Majeſty; who alighted, and ſtaid with them ſome Time. They encamped in a Place called *Chont-kulam*, near a little River. *The Emperor's Studs,*

6 Journey in Tartary.

Herds, and Flocks.

THE 26th, before they ſet-out, his Majeſty preſented the Regulos and *Mongol* Princes, who attended him in his Journey, with Horſes from his Studs; ſome with 120, others 50, and others 30; and gave a Saddle-Horſe to each of the principal Grandees of his Train. On leaving the Camp, they found the Emperor's Herds, and behind them the Flocks, ranged in a Line, extending beyond this Day's Journey, which ended at a Place called *Orvi-pûlak*. The 27th, the Emperor killed 58 Hares himſelf, with Arrows. b The 28th, he reſted, and ſhot at a Mark.

Camps of Mongols.

THE 29th, their Road lay through an uneven Country, but rich in Paſtures, and excellent Water. They ſaw ſeveral Camps of *Mongols*, which the Emperor, as he hunted, paſſed near; the poor People ſtanding before their Tents with their Wives and Children, preſenting Milk, Butter, *&c.* Others Sheep and Horſe-Fleſh, prepared after their Manner; for all which his Majeſty ordered them ſuitable Rewards. They encamped c in a Valley, called *Chnoha*, or *Shnoho*.

Whay Nor.

THE 30th, the Emperor hunted, as he advanced, among the Mountains; which were very rugged, and afforded little Sport. They encamped near two great Meers, called *Whay Nor*, that is, *the two Lakes*. Next Day, having paſſed the Mountains, they came into a large Plain, abounding with Forage and Game. In the Middle of it ſtands a Temple, where the Emperor alighting, received the humble Preſents and Pe- d titions of the *Mongols* with much Goodneſs. They encamped near a little River on the Weſt-

Paran-kol. Side of this Plain, thence called *Paron-kol*, or, *the River of the Weſt*.

Mo-hay-tû. *NOVEMBER* 1, they encamped in a ſmall, fertile, well-watered Valley, called *Hûlûſtû*; and, next Day, in ſuch another, named *Mo-hay-tû*, that is, *the Country of Waggons*, a ſmall Kind being much uſed there. The 3d, their Road was rugged, through Mountains. The Emperor e killed a Roebuck, a Fox, and ſome Hares. *Kara-ûſſû*, a Valley where they encamped, was watered with a Brook. The 4th, the Emperor rode, with a few of his Train, 50 *Li* from the Camp in *Chahar-pûlak*, to viſit a celebrated Temple; and returned in the Evening. The 5th, a they croſſed a little Rivulet above 10 Times, in the firſt 20 *Li*. Gerbillo 169

IN the Valley was good Forage, and much Wormwood; which the Pheaſants delighted in. *Wormwood.* The Mountains, on the North-Side, are covered with Woods, and not very high. The 6th, after the firſt 20 *Li*, they entered a large Plain, bounded N. with high Mountains, and S. with ſmall Hills. They croſſed a River ſeveral Times, and encamped by it, where it was ſcarce fordable, near a Pyramid called *Shahan-ſubarhan*, or, Shahan-ſubarhan. *the white Pyramid*, like thoſe in their fineſt Temples. Here the Emperor ſent for 500 *Mongol* Hunters, who ſurrounded the Plain; ſo that a Multitude of Hares and Pheaſants were taken.

THE 7th, they croſſed the River thrice; and Khukhu-hotun. paſſing by ſeveral Mud-Huts of the *Mongols*, who were ranged along the Road to ſalute the Emperor, burning ſweet Wood, and offering Preſents of Butter, Cream, Sheep, *&c.* about 20 *Li* before they came to *Quey-hur-him* [a], or *Huhu-hotun* [b], whoſe Walls are of Earth, they found all the *Mongol* Soldiers ranged along the Road kneeling, and nearer the City the Officers of the *Lwan-i-vey* Tribunal, with the People on their Knees. The like was done at leaving the City. Before the Temple, where the Emperor was to lodge, were ranged 200 *Lamas*, with their Muſic and Standards, dreſſed in red or yellow Cloaks from their Necks to their Feet, and a half Mitre of yellow Cloth with a woollen Fringe.

HIS Majeſty having dined, went to viſit the *The Temples viſited.* other principal Temples, which have each a great Number of *Lamas*, whoſe Chief is called *Hûtûktû* [c]. On the 8th, after Dinner, the Emperor went to ſee ſome other Temples, and the Fort, which was decaying; then encamped without the Town, where he gave Audience to the Ambaſſador of the *Talay Lama* [d]; who brought Preſents of Cloth like Shaloon, and divers odoriferous Paſtes: But the Emperor checked him ſeverely, becauſe his Maſter had not ſent to him the Daughter of *Kaldan*, threatening War if he ſtill refuſed to comply [e].

ON the 9th, his Majeſty made a ſplendid Feaſt *Mongol Troops feaſted.* for the *Mongol* Soldiers, who were in the laſt Battle, and thoſe of *Eaſt Tartary* on the Side of *Ninguta*;

November

Gerbillon. 1696.

Ninguta; who having been on the Frontiers all the Summer to watch the Motions of the *Eluths*, were come, with their General, to wait-on the Emperor. The *Hûtûktûs* were placed with the Regulos and *Mongol* Princes; the Ambaſſador, and other *Lamas*, with the Grandees. There was Muſic alſo, and Wreſtling; the *Mongols* againſt the *Manchews* and *Chineſe*. A great Number of *Mongol* and *Kalka* Regulos and *Taykis*, with their Wives and Children, came to pay their Duty to the Emperor; who regaled them in his Tent, and gave them Cloaths, Silk, and Money. He alſo bought ſeveral *Eluth* Priſoners, who were taken in the laſt Battle, and reſtored the Men to their Wives, and the Children to their Parents, giving them Cloaths of Fur, and ordering the like to be done to others.

THE 18th, they continued their Journey over a ſmooth and well-cultivated Plain, paſſing ſeveral Villages, and two ſmall Rivers; one of them called *Turghen*, by laying Bridges, being deep: It runs N.E. into the *Whang-ho*. They encamped near *Ontjin-kajan* [a], where they waited next Day for the Coming of 2500 Horſe, who had a Share in the late Victory. The Emperor, who had not ſeen them ſince the Action, ſent a Commiſſary with ſeveral Oxen and Sheep to meet them, and went out of his Camp to receive them; who, as ſoon as they ſaw him, ſhouted for Joy.

As his Majeſty reviewed them, he expreſſed his Satisiaction for the important Service they had done him, commended their Ardour in not being diſcouraged by the Want of Proviſions, or Horſes; remitted the Money which they were indebted to the Imperial Treaſury, and made the Grandees of his Court wait on them at Dinner in his Preſence. He enquired alſo into their Fatigues, and whether they were well-uſed by their Officers. They all praiſed *Tyan-gû-pê*, their General; and declared, that they willingly obeyed all his Commands.

THE 20th, travelling on the ſame Plain, where they met-with Hamlets and tilled Land, near the Village *Tarban-kajan*, they came to ſome Eminences, where ſtood a City in the Time of *Jenghiz Khân*'s Succeſſors; and, it is ſaid, there are ſeveral others in this Country [b], which is very fit for Culture, though without a Tree. They paſſed by another Pyramid, or Tower of a Temple, where the Vice-Roy, Treaſurer, and Judges of the Province of *Shan-ſi* came to ſalute the Emperor. The 21ſt, marching ſtill on the Plain, they encamped at *Li-ſû*, a large Village, with a Temple. The 22d, after 50 *Li*, it grew ſandy and hilly. Ten *Li* farther, they came to the Remains of a City, whoſe Walls were of Earth, and entire; but it had very few Houſes. Here was a Magazine of Rice, containing more than 70,000 *Tan* [c], with which the Emperor furniſhed his Retinue for 20 Days. Then advancing about 30 *Li*, they croſſed a Chain of Hills, which incloſe a large well-cultivated Plain. They pitched at *Hûtan-hojo* [d], by the *Whang-ho*, which runs S.S.W. and is ſcarce 120 Fathom wide, but rapid. His Majeſty ſhot over it. The 27th, he paſſed that River in Barks, with 150 Followers, and hunted on the other Side, where he killed 50 or 60 Hares, and took ſome Pheaſants with his Falcons. He was received on the Banks by the Regulo, Chief of the *Tartars* of *Ortûs*, and the *Taykis*, with Preſents of Meat and dried Fruits, which they had brought 30 or 40 Leagues.

Hûtan-hojo.

Whang-ho frozen.

THE 29th, they left *Hûtan-hojo*, returning-up the *Whang-ho*, ſeeking a Place to paſs-over on the Ice. This they did near where the *Turghen*, which was frozen, falls-into that River, hard by the City *Toto* [e]. This City is ſquare, like the *Chineſe*; its Walls only of Earth, but ſo well-tempered, that they have continued above 400 Years uninjured. Ten *Li* farther, they encamped by the *Whang-ho*, where it was frozen-over. The Plain here abounds with good Forage, the Graſs in many Places ſo high, that the Horſes could not be ſeen.

Toto City.

6 *Journey in* Tartary.

THE 30th of *November*, the uneven Ice being melted, they paſſed the *Whang-ho*, with all their Baggage, and entered the Country of *Ortûs*, which is encompaſſed by this River and the Great Wall, and is about 400 *Li* from N. to S. and 1400 from E. to W. It is inhabited by 6 Standards of *Mongols*, ſubject to the Emperor [a], containing about 75,000 Perſons. They dwell in Tents, always moving, except a few who cultivate a ſmall Part of the Country, which is moſtly uneven, interſperſed with Sand-Hills, or covered with high Graſs: So that there is Plenty of Hares, Pheaſants, and Partridges; of which Abundance were killed. They pitched at *Tong-tſu-hay*, or, as the *Mongols* call it, *Tong-ſkay*.

Country of Ortûs.

Shahan-pûlak.

DECEMBER the 1ſt and 2d, the Emperor reſted, and received Preſents of Horſes, *&c.* from the *Mongols* of *Ortûs*, and gave ſuitable Rewards in Silk, Cloth, Tea, and Money; it being the Cuſtom to return them the full Value. The 3d, the Emperor proceeded, hunting every Day, and taking a great Compaſs, while the Train made but ſmall Journies. They encamped by a Spring, called *Shahan-pûlak*. The 4th, at *Hûſtay*; where, on the 5th, his Majeſty treated the Hunters of *Ortûs*, being about 500, and rewarded them with Preſents.

The Eluths *Diſtreſs.*

THE ſame Day, one of the King of *Eluth*'s chief Officers, whoſe Wife and Children had been made Priſoners in the War, came and ſurrendered himſelf to the Emperor. He had brought-off with him about 70 Perſons: But the General *Tyan-gû-pë* ſent him without his Retinue to his Majeſty; who received him graciouſly, and gave him a Cup of Wine with his own Hand. He declared, that *Kaldan*'s Party did not exceed 5000, reckoning Women and Children: That ſcarce 1000 were fit to bear Arms, and all ſtarving for Want of Proviſions. The Emperor, for ſeveral Days running, killed above 100 Hares himſelf. The 6th, he ſhot 135, his Sons above 50, and their Followers more than 1000. They encamped at *Qua-tolohay*, and continued there till the 10th. This Day a Fox was killed [b].

Kaldan's *double Dealing.*

THE 13th, an Expreſs came from General *Tyan-gû-pë*, with Advice, that *Kaldan* had ſent an Ambaſſador to treat of Peace. His Majeſty ordered, that he ſhould come-forward without his Attendants. At the ſame Time a Courier brought Letters, which were intercepted, going from *Kaldan* to the Great *Lama*, and the Princes of *Koko Nor*; intreating their Aſſiſtance and Prayers, and inſinuating a ſpeedy Turn in his Affairs. Gerbillon 1696

THE 16th, the Emperor gave a Feaſt to the *Mongols* of *Ortûs*, and diſtributed among them 10,000 Livres: Each Soldier had about 6 Crowns, an Officer 15, and their Regulos a Suit of Cloaths. The Entertainment cloſed with Wreſtling and Shooting; both the Emperor, and his Sons, giving Proofs of their Skill at the Bow and Muſket. The ſame Day a Meſſenger brought *Kaldan*'s Letter, which contained nothing more than that the Occaſion of the War was not to be charged on him; adding, that the Emperor had formerly promiſed to deal favourably with him; and, therefore, he intreated him to be as good as his Word. Ortûs Mongols *feaſted.*

THE 17th, the Emperor ſet-out on his Return towards *Pe-king*, the ſame Way he came, by *Hûſtay*, *Tongſkay*, &c. The Weather was now very cold. The 22d, the Froſt was ſo intenſe, that they could not remain long in the Air. The 24th, the Emperor diſpatched one of the Lords of his Bedchamber with ſome Refreſhments, and one of his Horſes, for *Tyan-gû-pê*; and, next Day, ſent the 3 Princes his Sons, his eldeſt Brother, the Grandees of his Court, and the Officers of his Guard, to meet that General a League from the Camp: The Emperor himſelf went as far as the outer-Gate of his Tent, and ſtood there to receive him. *Tyan-gû-pê* falling on his Knees at ſome Diſtance, his Majeſty enquired after his Health, then made him draw near, and, as the General embraced his Knees, raiſed him up, and led him into his Tent. They had a long Conference together, and his Majeſty, while at Dinner, ſent him ſeveral Diſhes from his Table. Then a Council was held; after which the Emperor kept the General for ſome Time longer in private. When he came-out, every one in the Court crouded to pay him their Reſpects, ſo univerſally was he eſteemed. *Emperor marches back.* Tan-gû-pê's Reception.

THE ſame Day, *Kaldan*'s Ambaſſador had Audience, and aſſured the Emperor, that his Maſter deſigned to ſubmit himſelf, if he might expect Pardon for what he had done: But as his Sincerity was ſuſpected, ſome adviſed to detain the Ambaſſador, and write to *Kaldan*, that he ſhould be Kaldan's *Ambaſſador.*

Journey in Tartary.

be kindly received, if he would ſubmit without Delay. But the Emperor diſmiſſed that Miniſter with Honour, giving him a Letter to aſſure his Maſter, that if he came within 80 Days, he ſhould be treated with Reſpect; but if he did not, he ſhould be purſued with Rigour.

THE 26th, they repaſſed the *Whang-ho*, and encamped a little above *Kûtan-hojo*. Next Day, they pitched at *Hayluſtay*, by ſeveral Meers, having in the Way paſſed by the Ruins of 2 or 3 Cities; of which nothing was left but the Walls of Earth. The 28th, at the End of a Valley, through which a Rivulet runs S.W. they ſaw the Remains of a famous City in the Time of the *Yuen* Dynaſty, called *Ulan Palaſſon*; in *Chineſe*, *Hong-ching*. The 29th, they encamped at *Kilikê*, or *Simtnir-pecha*. A North-Wind blew ſo ſharp, that they were obliged to rub their Faces often, to keep-off the Froſt. The Emperor was thinner cloathed than any, yet bore the Weather to Admiration.

Ruins of Cities.

Ulan Palaſſon, or Hong-ching.

THE 30th, after paſſing-over ſome Hills, they entered the Gate called *Sha-hû-kew*, or *Shûrghetûka*, by the *Tartars*, of which the Bricks and Stones were fallen-down: The Wall alſo, which there is of Earth, was much ruined, occaſioned by the Overflowing of the *Ta-ho*, when ſwelled, by Waters from the Mountains; but it was then frozen-over. Two *Li* within the Wall is *Sha-hû-pû*, or *Sha-ho-ching*, a great Town, fortified after the *Chineſe* Manner, with high Brick-Walls, on a Stone-Baſe. It has 400 Houſes, with Shops for Trade, the *Mongols* coming here to traffic. The Gariſon of about 1000 *Chineſe* Soldiers, Horſe and Foot, were drawn-up by their Commander on both Sides the Road. It was ſo cold, that they choſe to walk rather than ride.

Paſs the Great Wall.

THE 31ſt, they lodged in a large City, called *Yew-wey*, with a *Tartar* Gariſon of 5000 Men, draughted out of the 8 Standards at *Pe-king*. Theſe aſſiſted to defeat the *Eluths*, under *Tyan-gû-pê*. The Emperor had lately built Houſes for them, each with 3 Rooms and a Court, at the Expence of 6,000,000 Livres; ſome in the City, and the reſt extending near three Miles towards the Great Wall. They all ſtood before their Houſes along the Road, with their Officers, and fell on their Knees when they perceived the Emperor, who took his Lodging at the General's Palace.

Yew-wey City.

Gerbillon. 1697.

JANUARY 2, 1697, they left this City, and travelling in a good open Country, lay at *Tſo-wey*, another as large as *Yew-wey*, but leſs populous. The 3d, at *Kan-ſhan*, a little City; having paſſed-by ſeveral Forts of Earth with Soldiers, and Places to make Fires in caſe of Alarms. The 4th, they marched 25 *Li* among the Mountains, and 5 in a Plain. About Midway they paſſed-by a famous Temple, which had ſeveral Grottos and Images cut in the Rocks. The Emperor meaſured the Height of the biggeſt with the Semicircle, and found it 57 *Chineſe* Feet.

Tſo-wey.

THEY lay at *Tay-tong fû*, one of the five principal Cities of *Shan-ſi*. It is near a League about, has good Walls fortified with Bulwarks, and 3 Gates, with a Place of Arms to each. It is very populous, the Streets ſtrait, with many triumphal Arches, and the Houſes well-built. The *Yu-ho* runs on the Eaſt-Side, covered with a handſome Stone-Bridge. Within 15 *Li* of this Place, the Emperor found the Road lined on both Sides with the Gariſon, and other Soldiers, all Horſe, and under Arms, their Officers in their Front. After theſe came the Governor, and other *Mandarins*, to ſalute the Emperor.

Tay-tong fû.

THE 5th, croſſing the Bridge from the Eaſt-Gate, they made large Journeys, the Emperor longing to be at *Pe-king*. They marched this Day, as they did all the following, through ſeveral Villages and walled Towns, obſerving at every 10 *Li*, Towers with Fire-Places; and having conſtantly to the North, at about 5 Leagues Diſtance, that great Chain of Mountains which encompaſſes *China*. They lay at the Village *Van-quan-tun*, incloſed with Earth-Walls [a].

Van-quan-tun.

THE 6th, having paſſed and repaſſed the *Yu-ho*, at the End of 12 *Li* they came to the City *Yang-ho-wey*, drawing nearer the Chain of Mountains, at whoſe Foot they perceived the Great Wall, and its Towers. They lay at *Tyen-ching*, a City walled like the reſt. It is pretty large, but the Houſes were falling to ruin, the Inhabitants having left them by reaſon of the Scarcity of Corn, and Labour exacted by the *Mandarins*, on Pretence of a War,

6 Journey in Tartary.

THE 7th, they had the aforesaid Chain of Mountains in View for 50 *Li*, and another Chain on the South all the Day. At the End of 30, through a narrow Road, they came to the City *Whay-ngan hyen*: Then passing several Hamlets and Forts, entered the Province of *Pe-che-li*, and lay at a poor Town, called *Pe-kyong-chang*. The 8th, their first 40 *Li* was in a stony Country, crossing several Times, the *Yang-ho* then frozen-over; the rest of the Way through the Plain of *Swen-wha fû*, between two Chains of Mountains 40 or 50 *Li* asunder. They lay at that City, passing near a Lake made by the *Yang-ho*, after running under-Ground.

Whay-ngan hyen.

Wha-ywen.

THE 9th, they came to a Place on that River near *Wha-ywen*, where they lay on their Journey outward. Here they left the high Road, which runs East to *Pau-ngan hyen* [a], and took that of *Pau-ngan chew*, turning to the S.S.W. Passing the *Yang-ho*, they ascended a high Mountain, which being very steep, the Beasts of Burden kept the great Road, though 20 *Li* about. Afterwards they entered a large Plain, watered by Canals from the *Yang-ho*, and cultivated by 51 of the Emperor's Farmers, who raise Rice, and are very rich. They lay at *Kyew-pau-ngan*, where the Houses and Shops are as good as those at *Pe-king*.

Emperor saluted,

THE 10th, repassing the River, they entered on the great Road at *Sha-ching*; whence proceeding through *Tû-mû*, they came to lodge at *Whay-lay*. Next Day, the Emperor's Heir, and 5 of his Brothers, and the Grandees left at *Pe-king*, met his Majesty at *Kin-yong-quan*, about the Middle of the Streight of *Nan-kew*, where they rested. The Heads of Tribunals, and other *Mandarins* of the first and second Order, attended his Majesty at the Entrance of the Streight; but the inferior Orders were not privileged to come so far. They lay at *Chang-ping chew*.

Arrives at Pe-king.

THE 12th, they arrived at *Pe-king*, and met other *Mandarins*, ranged to receive the Emperor. Those of the Tribunal *Lwan-i-wey* lined the Streets and Roads, from the Gate of the Palace to a good Distance out of the City, with all the Imperial Ensigns. This Pomp was extraordinary, and designed in order to strike a Reverence into the *Eluths*, who were to make their Submission [a].

[a] Perhaps rather *Whay-lay hyen*.

SECT. VII.

Gerbillon.
1697.

Gerbillon's *seventh* Journey *in the* Emperor's *Retinue*, 1697.

1. *The Road to* Ning-hya, *in* Shen-si.

Emperor sets-out. Swen-wha fû. Tay-tong fû. *The* Hu-ho. Wha-jin hyen. *The River* San-kan. THE 26th of *February*, 1697, or 6th of the 2d *Chinese* Moon, the Emperor *Kang-hi*, in the 36th Year of his Reign, set-out from *Pe-king*. The Heir appointed, and several of the other Princes attended him 2 Leagues out of the City, and his eldest Son was ordered to follow him. His Majesty sent for the 2 principal Officers, and in Presence of his Sons, and chief Lords of the Court, commanded them to keep his Children strictly to their Duty, to reprimand them freely, and even chastise them if there was Occasion: At the same Time declaring, that they must be accountable, at the Peril of their Lives, for any Irregularities committed by them in his Absence. The Emperor took this Method, because he understood, that during his last Journey, some of his Sons had been immoderate in their Pleasures.

Emperor sets-out.

AFTER travelling 340 *Li*, they arrived, *March* 3, at *Swen-wha fû*. Next Day, they encamped near *Kong-tso-wey*, a City of a considerable Circumference, built in a barren Country, with Walls and square Towers of Brick, which are entire: But all within is in Ruins, and the few Inhabitants are exceeding poor. They frequently passed-

March

Journey in Tartary. passed-over Ice, the Valleys being covered with Water. The 5th, they lodged at *Whay-ngan hyen*; and, the 6th, at *Tyen-ching*, a City three Miles in Circumference, but, excepting a few Shops, gone to Decay. A great deal of Soap is made here of Nitre, which issues-out of the Earth. The 7th, they marched-through a Plain, watered with a River, to *Yang-ho*, a larger and better-built City than *Tyen-ching*, where Soap is likewise made. The next Day, they had a Ridge of Mountains to the North, and lay at *Kyu-lo*, a walled Town.

Tay-tong fu. THE 9th, they got to *Tay-tong fû*; within 3 Miles of which the principal *Mandarins* of the Province met the Emperor, in their Robes of State, kneeling by the Road-Side, as usual; the Garison was drawn-up under-Arms, and Multitudes of People lined the Way. Before they entered the City, they crossed the *Yu-ho*, over a stately Stone Bridge with 18 Arches: The Ballustrades are adorned with Figures of Lions and Tigers, about one and a half Foot high in Demi-Relief, but coarsely done; and at each of the 4 Corners is an Ox of Iron. This River is no more than a Brook in *Tartary*, and takes its Name after it has entered *China* at *Ching-kew*: Eighty *Li* from this Bridge it falls-into the *Yang-ho*, like several other little Rivers which they crossed. The City-Walls are well-built, and entire, with Towers placed near one another.

The Yu-ho.

Whay-jin hyen. THE 11th, leaving *Tay-tong fû*, the Soldiers, and most of the heavy Baggage, by the Emperor's Orders, took the Road to *Ning-hya*, without the Great Wall, while he travelled within *China*. They passed the *Shi-li-ho*, about 10 *Li* from that City, and met-with some wretched Hamlets and Villages; the Houses mostly of Earth. They lay in *Whay-jin hyen*, a small City, poor, but populous. The 12th, they travelled 30 *Li* W. 30 S.W. and 20 S.S.W. thro' a flat well-cultivated Country. Most of the Villages had several square Towers of Brick, whither the Inhabitants retire, with their Effects, in Time of War. They encamped near *Ching-king-chwang*, a Town with Brick-Walls.

THE 13th, they went 30 *Li* W.S.W. and 30 S.W. still through a level and populous Country, declining from the Northern to the Southern Chain of Mountains, then covered with Snow. They encamped near the Village *Yu-lin-tsu* [a]. Gerbillon. 1697.

THE 14th, they lay at *Ma-i hyen*, a little walled City. They crossed the *San-kan-ho*, over a Bridge 20 or 25 *Li* from its Source, which is about 200 Paces from the Mountains on their Right-hand. This River receives the *Shi-li-ho*, and all the other little Rivers which they met-with since they left the *Yang-ho*. This last, after running E. by N. joins it near *Pau-ngan chew*; then passing a Streight of the Mountains, takes the Name of *When-ho*, and runs to *Kû-ko-kyau*. They encamped at *So-chew*, a City like those already passed, where a Regulo resided in the Time of the *Tay-ming* Dynasty. The Soil here being sandy, and not fit for Wheat, nothing is sowed but Millet, and other small Grain. The Author was informed here, that *Yew-wey* [b] was 240 *Li* from *So-chew*, and the Great Wall [c] only 80 *Li* to the W. Likewise, that to the W. and S.W. of *Ka-ko-kew*, it was in many Places but between 5 and 6 Feet high, built only of Earth, and almost ruinous.

The River San-kan. So-chew City.

THE 15th, near *So-chew*, they passed the *Ni-kû-ho*, very broad, but so shallow, that it looked like Land overflowed: It soon falls into the *San-kan-ho*. This Day, they saw several Villages, marching 25 *Li* S.S.W. and 25 S.W. to a Place named *Ta-shwi-kew*, near the Great Wall. The 16th, for the first 20 *Li* their Road was very uneven, but newly repaired, reaching South to *Shi-ching*, a little walled Town. The last 30 brought them S.S.W. through a level Country to *I-king*, a Village. A little after setting-out, they passed the Great Wall, which is there of Earth, 12 or 15 Feet in Height, with Towers, some of Brick. It gives Admittance, by Gates, to several Streights of the Mountains; among which there is one, called *Yang-fang-kew*, 30 *Li* from *Ta-shwi-kew*, made famous by a brave *Tsong-ping*, named *Chew*, who defended it several Months with a small Body of Men, against all the Force of *Li-tse-ching* [d], and had entirely stopped his Passage, if he had not been treacherously killed: However, his Wife supplied his Place, and headed the Troops till she was slain in Battle. The Inhabitants

7 *Journey in Tartary.* built a Temple in Honour of this *Tſong-ping*; and the Emperor, as a Piece of Reſpect, ſent 2 Officers of his Houſhold to viſit it.

San ſha Borough. THE 17th, they found the Villages thicker, and the Land better than formerly. The Inhabitants dig their Houſes in the Earth. They encamped near *San-ſha*, a Town walled with Brick. The 18th, it ſnowed from Morning till Noon. Their Courſe, to *Li-kin-kew*, was one half the Way S.W. the other W. They ſeveral Times croſſed a little muddy River, which falls into the b *Whang-ho*. The 19th, their Road went winding among cultivated Mountains, and for the laſt 40 *Li* was ſo extreamly rugged and ſteep, that the Carriages could ſcarce proceed. At the Village *Nyen-yen-tſun*, where they encamped, they took-up their Lodgings in the Houſes under-Ground. Theſe Caves are very neat and convenient, being 30 or 40 Feet in Length, 12 or 15 broad, and at leaſt 20 in Height: The Doors and Windows of the Rooms are arched, the Walls c and Roof white-waſhed, and at the farther End is an Eſtrade to ſleep upon: They are warm in Winter, and cool in Summer. The Inhabitants make-uſe of neat Stoves, and burn a Sort of Pit-Coal; which has an ill Smell, but makes a good Fire.

Houſes under Ground.

THE 20th, they travelled among the Mountains 8 *Li*, through a Valley, and 18 more South along the Banks of the *Whang-ho*, which divides the Province of *Shen-ſi* from that of *Shan-ſi*, and d came to *Paw-te chew*, a City on the Top of a ſteep Mountain on the Eaſt-Side of the River: It is regularly built, and contains about 600 Houſes, beſides the Suburbs. From this Place comes a Kind of Carp, very fat, and more delicious than any other Kind of Fiſh; which is attributed to a Kind of Moſs whereon they feed, growing on the Rocks in the *Whang-ho*. The *Mandarins* of the Province ſend them every Winter to *Pe-king*, as Preſents for the Emperor e and Grandees.

Paw-te chew City.

Croſs the Whang-ho. THE 21ſt, the Vice-Roy of *Shan-ſi* having prepared 20 Boats, the Emperor, and Part of his Train, croſſed the River, which is here 200 Fathom broad, and very rapid. The *Mandarins* of *Shen-ſi* received his Majeſty at landing. They encamped 3 *Li* from *Fû-ko hyen*, a little ruinous City, on the Top of a ſteep Mountain. The 2 next Days were ſpent in ferrying-over the reſt of the Retinue. On the laſt of which the Vice-Roy, with the principal *Mandarins* of *Shen-ſi*, arrived, and waited on the Emperor. The 24th, their Road lay along a winding Valley, with a little muddy River running through it, which they croſſed 12 or 15 Times. The Mountains on each Side were rocky below, but all cultivated towards the Top. They encamped at *Kû-ſhau*, Ku-ſhau a little City, or Fortreſs, on a Mountain. *Town.*

Gerbillon. 1697.

THE 25th, they went 20 *Li* in a narrow Valley, continually croſſing the little River, and 45 over very rugged Hills. They paſſed *Chin-kyang-pû*, a walled Town, and encamped by a Brook in a very narrow Valley, named *Tſi-li-ho*. The 26th, after travelling S.W. and W.S.W. thro' narrow and uneven Roads, they lay at *Shin-mû* Shin-mû *hyen*, a conſiderable City, containing 2 or 3000 hyen. Families; being but 31 *Li* from a Gate of the c Great Wall. It drives a good Trade with the *Mongols* of *Ortûs*, for their Horſes, Oxen, Sheep, and Skins. They paſſed near the *Ku-ye-ho*, a ſhallow, but very rapid River, which riſes in the Country of *Ortûs* [a], and falls into the *Whang-ho* 120 *Li* from hence.

SOON after the Emperor got to *Shin-mû*, there Kaldan's arrived *Saki Pek* [b], Son of the petty Prince of Son *Hami* [c]. He was a luſty young Man, dreſſed like the *Mohammedans*, in a Veſt of ſtriped Satin. He brought with him as a Preſent, *Speden Haljû* [d], eldeſt Son of *Kaldan*. At his Approach all the *Eluths* in his Majeſty's Retinue went forth to meet their Prince, and kneeling along the Road, wept as he came-up. He was a Youth of 14 Years, well-made, and dreſſed in a Cloth Riding-Coat, with a Bonnet of Fox-Skin. His Air was melancholy, but his Countenance compoſed: He ſpoke reſolutely to the *Eluths*, yet without appearing haughty, or ſaying any Thing that might offend the Emperor. He deported himſelf no leſs diſcreetly in his Majeſty's Preſence; who detained him ſome Time, and as he kneeled, aſked him ſeveral Queſtions. Next Day, he Made Pri- was conducted to *Pe-king*. ſoner.

THE 27th, it taking till Noon to repair the Bridge of the *Kyu-ye-ho*, which was broken-down, they proceeded no farther than 10 *Li*. Being

[a] Which lies on the North of *Shen-ſi*. [b] *Pek*, or *Bek*, and *Beg*, or *Beigh*, ſignifies *Prince*, or *Lord*.
[c] Or, *Khamil* and *Khamul*. [d] Called *Septenbaldius*, before, *p.* 386. c. *Speden Halju*, ſignifies in the Language of *Tibet*, *Long Life, and very happy*.

March

Journey in Tartary.

Being encamped, the Emperor made an Entertainment for the Prince of *Hami*, and his Train, and diverted them with Wreſtling-Matches, ſhooting with a Bow, and with Wind-Guns; which laſt Invention was new to them. He likewiſe ordered Money and Silks to be diſtributed among them.

Pyen-ling-pû.

THE 28th, they had difficult Travelling, amongſt Mountains of looſe Sand, and encamped South of *Pyen-ling-pû*, a miſerable Town. The 29th, they marched thro' a narrow ſandy Valley, to *Kau-kya-pu*, a walled Town of 200 Houſes, in a Valley, where runs the *Tay-ho*. Near this Place is a large ſquare Temple, above 20 Feet high, and 30 wide, neatly cut out of the Rock, with two Pillars ſupporting the Roof, which is faſhioned like that of a Coach. The Roof and four Sides are full of little Images ſculped in Relievo, and painted with Variety of curious Colours: There are likewiſe ſome large ones of Earth, gilded over.

Curious Temple.

Sides the Tay-ho.

THE 30th, they travelled amidſt looſe ſandy Mountains, which, however, produced Abundance of Buſhes, and ſome ſcattered Trees. They croſſed the *Tay-ho*, which riſing in the Country of *Ortûs*, falls into the *Whang-ho*; and encamped by a ſmall River, a little Eaſtward of *Kyen-ngan-pû*, a walled Town of about 100 Houſes. The 31ſt, they marched ſtill amongſt ſandy Mountains, in Sight of the Great Wall, and pitched by a Brook, called *Wang-quan-kyen*, five or ſix *Li* beyond *Shwang-ſhan-pu*, a walled Town, miſerable and ruinous.

The Great Wall.

APRIL 1, their Road lay in an uneven ſandy Country. Being often near the Great Wall, they found it built only of tempered Clay, and ruined in many Places. It is about 15 Feet high, and 6 or 7 thick at-Top; but by the Wind driving the Sand towards it, it is become a Slope eaſy to ride-over. The Towers are of Brick, about 18 Feet ſquare, 30 high within, and above 36 without the Wall: The Entrance to them is by a little Door even with the Ground: They are about 3 Furlongs diſtant, and have 3 or 4 Soldiers in each, with Firing for Signals.

Made Peace.

AT the End of 36 *Li*, they paſſed through *Chang-lo-pû*, a ruinous walled Town, by a Brook, with not above 50 Houſes ſtanding, which are inhabited by a *Shew-pey*, and 80 Soldiers. They lodged at *Yu-lin-wey*, a populous City, above 9 *Li* in Compaſs. A *Tau* reſides here, and the Gariſon conſiſts of 3400 Soldiers, commanded by a *Tſong-ping*. The Walls are above 60 Feet high, with Brick-Towers, kept in good Repair. On the Weſt runs the *Vu-tin-ho*, which falls into the *Whang-ho*. As this City is ſurrounded with Sands, Proviſions are very dear, excepting Herbs, Legumes, Melons, and Jujubs; which agree with the hot Soil. It drives a good Trade with the *Mongols* of *Ortûs* [a].

Gerbillon. 1697.

Yu lin-wey.

THE 2d, they entered the Country of *Ortûs*, by croſſing the *Vu-tin*, a little River, rapid, but fordable; with Meadow-Land on both Sides for 10 or 12 Fathom, which has a beautiful Effect in the Midſt of the Sands. They travelled among Heaps of Sand thrown-up by the Wind, and encamped by a Brook in *Tala-pûlak*. The 3d, they proceeded firſt W. then S.W. and S.S.W. ſtill in an uneven ſandy Country; the Emperor hunting all the Way. They encamped by the *Hay-ho-tû*, a wide and rapid River, but ſhallow.

Country of Ortûs.

THE 4th, croſſing the *Hay-ho-tû*, they found a Country not ſo uneven and ſandy as before, and encamped beyond the *Kurkir*, a little River, rapid and muddy, which riſes S.W. and runs N.E. and, next Day, in *Chahan-pûlak*, by a winding Brook of very good Water. The 6th, two Thirds of the Way through an uneven ſandy Region, abounding in a Kind of Juniper-Tree, but much inferior to the *European*: Then they came to a large Plain full of very high Graſs, and fit for Culture. They encamped by a Brook, in a Place called *Cheltala*.

River Kurkir.

THE 7th, the Land was uneven, but free from Sand. They paſſed a Wood above 10 *Li* from E. to W. alſo many Tents of poor half-naked *Mongols*; and encamped by a muddy Brook, in a Place called *Tong-halan Nor*, where are ſeveral Pools of nitrous Water. The 8th, they re-entered *China*, by making a Breach in the Great Wall, and encamped near *Ngan-pyen-pû*, a little walled Town, moſtly ruined. They reſted here the 9th, being the Emperor's Birth-Day; but he forbad any Ceremony.

Tong-halan Nor.

THE 10th, they marched along the Great Wall, which, with moſt of the Towers, is of Earth,

Journey in Tartary.

Earth, and the Breaches neglected; but the Garison-Towers are of Brick. They passed it within fifteen *Li* of *Ting-pyen*, for Convenience of the Road, and re-entered *China* before they came to that Town; which is fortified, has 1000 Houses, and 500 Soldiers in Garison, with a *Fû-tsyang*. The Soil is sandy, but fertile. The 11th, they travelled in an open Country, and good Roads, passing by *Yen-tang-pû*, a small Town, with Walls and Towers of Earth. Beyond this, they met with a Piece of Ground covered with Salt-petre, b the Effect of two large salt and nitrous Springs. They encamped near *Whang-chi*, a large Town, but thinly inhabited. Latitude 37°, 51′.

The Great Wall

THE 12th, they travelled N.N.W. close by the Great Wall, in many Places fallen-down; passing *Kau-pin*, a little Fort joining to it. The Country was open and sandy, but every where cultivated. They encamped near *Ngan-ting*, a little Town of 50 Houses, and but one Gate, where the Water is nitrous and brackish [a]. Latude 38°, 40′. The 13th, they advanced within the Great Wall, in a sandy Country, but yielding long Grass, Briars, and Abundance of Liquorice. The Emperor hunted, and killed no fewer than 307 Hares with Arrows. They encamped at *Hing-u-ing*, a little walled Town.

Within China,

THE 14th, proceeded 70 *Li* W.N.W. in an uneven, but well-cultivated Country, still near the Great Wall. The *Mandarins* of *Ning-hya* arrived this Day. His Majesty ordered the Officers of War to shoot with the Bow; and such as were not strong enough were deprived of their Offices. The 15th, they marched within Sight of the Great Wall, through an uneven sandy Country, unfit for Culture, but the Roads easy. At *Hong-chen-ing*, a little Town walled with Earth, the General Officers of the Soldiers, who had been sent before, waited on his Majesty. They lodged at *Heng-ching*, a little fortified Town of 200 Houses, near the *Whang-ho*.

Cross the Whang-ho,

THE 16th, they crossed that River. The Emperor had two large Barks built on Purpose, and painted. There were two great Pontoons for the Carriages and Beasts of Burden, and near 100 Barks more, of a middling Size, each holding 7 or 8 Horses, with Men and Baggage. They encamped on the Side of the River. The 17th, they travelled N.W. by W. and W.N.W. thro' a large fertil Plain, very populous, interspersed with Canals, and abounding with Rice and Trees. At the End of 10 *Li*, they met about 800 *Tartars* of the Red Banner, and 5000 *Chinese*, 2 Thirds Cavalry; all belonging to the Garison of *Ning-hya*, and drawn-up under-Arms, on both Sides of the Road. Each Company of the *Chinese* had a Standard of green Satin, embroidered with Gold; and every 10 Soldiers another little Standard. Approaching *Ning-hya*, they found the 3000 Soldiers who had been sent before likewise drawn-up under-Arms; and after them a Multitude of People extending to the Gates of the City, each with a *Hyang*, or Perfume-Stick in his Hand [b].

Gerbillon. 1697.

Approach Ning-hya,

NING-HYA is one of the largest and most populous Cities along the Great Wall [c]. It is above 19 *Li* in Compass, has a considerable Trade, and the Houses are very close, few having Courts, and none Gardens: They are built of Timber, or Earth; but the Foundations, and a Foot or two above Ground, are of Brick. The People have, from the Mountains, 60 *Li* N.W. Timber for Building very cheap, and supply all the Country for 4 or 500 *Li* round. This City is built in Form of an oblong Square, has 6 Gates, and 2 Suburbs, 1 of them containing 5 or 600 Houses: The Walls are of Earth covered with Brick; but in several Places ruinous, and without Towers, except at the Gates. The Author found the Latitude 38 Degrees, 35 Minutes. Ten *Li* to the East are two great Lakes (one of them 60 *Li* in Compass) abounding with Fish and Fowl; which afforded the Emperor some Diversion.

That City described.

THE 20th, his Majesty reviewed the *Chinese* Garison, and made them an Entertainment. Next Day, the Jesuits observed the Sun eclipsed 11 ½ Digits, beginning four Minutes after Seven, and ending ten Minutes after Ten. The 22d, the Death of the *Talay Lama* was published, which happened 16 Years before [d]. The 26th, the Emperor sent the Jesuits two Sorts of Raisins and Currants, brought from *Si-ning*, or *Tu-fan* [e], and the *Uzbeks* Country: Some fine Serges, the Product of these Countries, were likewise presented

Solar Eclipse.

Manufactures.

[a] The Latitude of this Place, or of *Whang-chi*, must be erroneous; there being a Difference of 49 Minutes, or geographical Miles: Whereas the Distance is but 60 *Li*, or 18 Miles at 10 *Li* to a *French* League. [b] *Du Halde's China*, p. 365. [c] It was formerly called *Hya-chew*, and Capital of the Empire of *Hya*. See before, *p.* 433. d. [d] What relates to this Affair has been already set forth, *p.* 467, *&c seq.* [e] We presume it should be *from either* Si-ning, *or* Tu-fân. *Tu-fân* being the Name of a Country, or rather People.

May

Gerbillon. 1697.

Journey in Tartary.

sented to his Majesty, who had the Curiosity to visit the Manufactories here, of Foot-Carpets and Paper. The Carpets are like those of *Turkey*, but coarser; and the Paper is made of Hemp, beaten and mixed with Lime-Water. The *Mandarins* of the Country presented the Emperor with some Mules, the Breed here being reckoned the best in *China*.

Kaldan's Ambassador returns.

THE 27th, the two *Mandarins*, sent to assure *Kaldan* of kind Usage, if he would submit, arrived at *Ning-hya*. They judged, from his Discourse, that he had nothing in View but to gain Time, in order to provide for his Safety. This Suspicion was confirmed by the Ambassador, *Keley-quin*, himself; who finding his Master's Intention was only to amuse the Emperor, excused himself from going on a 2d Embassy, on Account of his Age, and soon after fled with his Family: But unluckily meeting with the *Lama*, *Hân Hukşan Hûtûktû*, at the Head of 2 or 300 Horsemen, he was attacked, most of his People killed and taken Prisoners, his Baggage plundered, and himself dangerously wounded: So that with great Difficulty he escaped, with his Wife, his Son, two Grandsons, and a few more, to the Camp of *Tyang-gû-pê*, which was always on the Frontiers. *Keley-quin* not being able to travel fast, on Account of his Wounds, sent his Son along with the two *Mandarins*. The Emperor received him graciously, gave him the *Manchew* Habit, and made him one of his *Hyas*. These Tidings determined his Majesty to dispatch a Body of 2000 Horse in Pursuit of *Kaldan*.

Fighting with Kaldan.

MAY 1, Advice being brought, that the *Lama Hân* above-mentioned intended to return with 200 Men towards the *Whang-ho*, the Emperor immediately ordered 150 chosen Horsemen to seek him out, and fight him. *Keley-quin* being arrived, informed his Majesty, that *Tanghilan*, Nephew of *Kaldan*, was ready to submit, if he could be assured of Favour.

The Country.

THE 4th, the Author took a View of the Country; which, with the blooming Verdure of the Spring, began to yield an agreeable Prospect. This great Plain may be called one-continued Village, for the Peasants Houses are scarcely 100 Paces distant from one another: They are only of Earth, but no Rain soaks through them. The Land being generally fat, they only turn-up the Glebe with a Spade. It is divided into large square Fields, surrounded with little Canals, to receive the Water from the greater, which are supplied from the *Whang-ho*, by opening the Sluices: Then every one makes a Gap in the Side next his Inclosure, and stops it again when his Field is sufficiently watered.

Saltpetre.

UPON digging one or two Feet deep, Plenty of salt Water is found; which being exposed in square Spots of Land, during the great Heats, produces excellent Saltpetre, which is sometimes seen springing out of the Ground. Three or four *Li* to the North of the City is a great Temple, which being inclosed with good Walls, serves for a Fortress. In the Middle is a large square Pyramid 9 Stories high, built with Brick, plaistered-over with Earth, and white-washed, resembling Free-stone. About 100 *Bonzas* live very handsomely in this Temple, on the Income of the neighbouring Lands [a].

Fine Temple.

2. *Their Return from* Ning-hya *to* Pe-king, *through* Tartary.

Leave Ning-hya. Alajan *Mountains*. *Pass the Great Wall: Coast the* Whang-ho. Sha-tew-shu. *The white Pyramid*. Kaldan *pursued*. *Emperor goes by Water*. *The* Chighe-muren. Leave Ning-hya.

THE 5th, they left *Ning-hya*, and travelled N.N.E. in an even well-cultivated Country. They passed-by *Yau-fu-pû*, a little Town with earthen Walls. The nearer they approached the Mountains, they found the Houses fewer, and the Country less agreeable. The 6th, they passed-through *Pin-lo-chin*, a Town with good Brick Walls, but no Towers, and encamped in *Liw-fu-mu-hé*, near a Canal of the *Whang-ho*, within 2 or 3 *Li* of the Great Wall. The Emperor left the high Road, to hunt near the Mountains of *Ho-lang-shan*, called by the *Tartars*, *Alajan-alin*, which run 3 or 400 *Li* from E. to W. and are not above 9 or 10 *Li* across in many Places: The Great Wall breaks-off at each End, and it is said there are 360 Passages through them, most of which are walled-up, and guarded by *Chinese* Soldiers. Beyond them is the Residence of *Patûrû-chonum*, an *Eluth* Prince of *Kaldan*'s

Alajan Mountains.

7 Journey in Tartary.

Kaldan's Family; with whom falling-out 7 or 8 Years before, he ſubmitted to the Emperor, who made him a Regulo of the third Order. This Country properly belongs to the *Kalkas*, who abandoned it upon their Wars with the *Eluths*.

Paſs the Great Wall.

THE 7th, they paſſed the Great Wall, which was there almoſt entirely ruinous, and marched through a very even, but uncultivated Country; encamping by an Arm of the *Whang-ho*, in a Place called *Shau-ma-ing*, 7 or 8 *Li* from the Mountains, which are very ſteep and bare. The b 8th, continuing here, the Emperor received Advice, that the Princeſs of *Koko Nor* had reſolved to accompany his Ambaſſadors, and pay her Reſpects to his Majeſty. Upon this Account they made but ſhort Stages. The 9th, they proceeded in the ſame Plain, which yielded Plenty of Buſhes and Graſs, and abounded with Hares and Pheaſants. They encamped along the *Whang-ho*, in a Place named *Shi-tſwi-tſe*, where they reſted the 10th.

Coaſt the Whang-ho.

FROM this Day, to the 27th, they marched c along that River, and encamped on its Side: The 11th, in *Whang-tû-wen*, where was good Forage. The 12th, the Mountains diſappeared towards the W. but roſe high, and bore 15 *Li* E. They marched the laſt 10 *Li* on the 13th, through deep looſe Sands, blown in Heaps by the Wind; and encamped in a large Meadow abounding with good Forage. The 14th, they paſſed a Thicket of Shrubs and Buſhes. The Emperor went Part d of the Way by Water, and hunted the reſt, killing 4 large Stags. They encamped in *Swang-pû*.

Sha-tew-ſhu.

The 15th, they encamped at *Sha-tew-ſhu*, in a little Plain near a Wood. His Majeſty killed five great Stags, and took three young ones.

THIS Day, the Emperor being informed by two *Mongol Taykis*, that the Princes of *Koko Nor*, to whom they were ſent, could not, at that Time, ſet-out to meet his Majeſty, becauſe ſome were ſick, and their Equipages not ready; a Meſſen- e ger was diſpatched, to tell them to defer their Journey till the great Heats were over, and that then they might come to *Pe-king*. The 16th, they travelled N.E. and E.N.E. through a ſandy Country, and encamped in a Place called *Peta*, that is, *the white Pyramid*; from one of Brick plaiſtered over, about 400 Paces from the River. Here likewiſe are ſome broken Walls, the Remains of a great Temple. Oppoſite to their Camp lay 130 Barks, laden with Rice from *Ning-hya*, for the Soldiers ſent in Purſuit of *Kaldan*. The Emperor killed ſeven large Stags, and two wild Boars, in the Iſlands made by the *Whang-ho*, which are full of Thickets.

Gerbillon 1697. The white Pyramid.

THE 17th, they reſted. Next Day, his Majeſty hunted as he went, in the little Iſles of the River, and caught Fiſh. They reſted the four Days following; and the little Army ſent to purſue *Kaldan* paſſed in Review before the Emperor. The 23d, they continued their March along the River, followed by the Barks. The 24th, they encamped by the River, nigh ſome little Woods ſtocked with Stags. Reſting the 25th, the Horſes, Camels, and Baggage, that were to go by Land to *Kutan-hojo*, with 200 of the Houſhold Troops, were ferried-over the *Whang-ho*, the Emperor reſolving to go by Water. Accordingly next Day, his Majeſty, with Part of his Train, embarked; while the main Body proceeding by Land, in a flat ſandy Country, encamped on the River, by *Sâkir*, a Place of good Forage, near ſome *Mongol* Tents.

Kaldan ſued. Emperor by Water.

THE 27th, they travelled in an uneven Country, withdrawing from the *Whang-ho*. After 20 *Li*, they croſſed the *Chighe-muren*, a little River, along which they marched, and encamped on its Banks, in a Place abounding with Hares, Pheaſants, and good Paſture. The 28th, and 29th, they advanced in a level, but ſandy, barren Country, and encamped on the *Chighe-muren*[a] (which was dry in ſeveral Places.) The firſt Day, in a Place called *Urhatû*. The 30th, about Midway, they paſſed the *Chighe-muren*, leaving it to the N.E. and encamped in *Mona-hojo*, a large Meadow, whoſe good Forage invites many of the *Mongols* to pitch here. The 31ſt, as it rained, they went but a little Way, and encamped by the *Whang-ho*. In the Evening they had a Storm, with Hail and Thunder.

The C muren.

The Great Wall.

Journey in Tartary.

Mongol Tents.

Cultivated Lands.

Death of Kaldan.

Toto.

JUNE 1, they proceeded E.S.E. and S.E. along the *Whang-ho*, the Plain growing narrower, and encamped on the River, where they found many *Mongol* Tents. The 2d, they pitched by a little River, or rather Canal, ſupplied by the *Whang-ho*, when the Waters are high. The 3d, they reſted by a clear Brook, with Willows on its Banks. The 4th, their Courſe was firſt E. then N.E. and E.N.E. winding about a Marſh. They paſſed a great many *Mongol* Tents, with ſome cultivated Lands, and encamped near a Meer; but could find no freſh Water within two or three *Li*. The 5th, they marched E. and E.S.E. through the moſt fertile and beſt-cultivated Diſtrict they had till then met-with in the Country of *Ortûs*. They kept at a Diſtance from the *Whang-ho*, and encamped by a Brook, in a Place called *Chikeſtay*,

THE 6th, their Road lay through Meadows extending towards the *Whang-ho*, and twice paſſing a Brook, which croſſes the Plain from N. to S. they encamped at *Tonſkay*, by Plenty of Water, and good Forage. This Day, News was brought, that *Kaldan* being reduced to the laſt Extremity, and abandoned by his Subjects, had poiſoned himſelf, *May* the 3d; and that *Tanghilan*, his Nephew, was coming with the Corpſe, Family, and People of that Prince, to ſubmit to the Emperor. The 7th, they arrived in *Kutan-hojo*, on the Side of the *Whang-ho*. Next Day, they paſſed the River, and reſted till the 13th; when they advanced North to the Mouth of the *Turghen*, which falls into the *Whang-ho*, over-againſt the ancient City *Toto*, where they reſted the 14th. The 15th, they proceeded in a level Country, to a Place called by the *Chineſe*, *Shwi-tſven*, and, by the *Mongols*, *Orghiku-pûlak*, near a little Hamlet of *Mongols*. Here they found a large Incloſure of earthen Walls, which had been a City in the Time of the *Yuen* Dynaſty [a].

THE 16th, at the End of 7 *Li*, they entered the Mountains, bounding *China* on this Side, which were covered with good Forage, and watered by ſeveral Brooks. They croſſed a large one running E. into the *Turghen*, and encamped in a Plain fit for Culture, by the *Ulan-mûren*, another Rivulet, whoſe Courſe is Weſt. Near it were ſome broken earthen Walls, being the only Remains of a City, called in *Chineſe*, *Hong-ching*; and, in the *Mongol* Tongue, *Ulan-palaſſon* [b]. The 17th, having travelled 40 *Li* in the ſame Plain, they croſſed ſome Hills into another, yielding good Forage, with Plenty of Shrubs and Buſhes: Through it runs the *Ulan-mûren*, with Willows on its Banks. Here they encamped.

THE 18th, their Road lay among Mountains, bearing Trees, and fine Valleys, watered with the ſame River (which they often croſſed) and ſeveral little Brooks, producing good Forage. In ſome Places they were cultivated, and interſperſed with Houſes, yielding a moſt delightful Proſpect. They encamped in *Kûkû-oſſû* [c], called by the *Chineſes*, *Tſing-ſhwi*, a beautiful Plain, by a Brook of excellent Water. The 19th, having marched E.N.E. and N.E. among Plains, Mountains, and Valleys, they encamped by *Nong-hon*, in a great fertile Plain, where the *Mongols* feed the Cattle belonging to the *Manchew* Princes; all the Lands extending from *Sha-ho-kew* Eaſtward, along the Great Wall, being their Property. A *Kalka* Regulo, with his whole Family, came to ſalute the Emperor; who entertained him, and preſented him with Silks and Money. It rained and thundered all the Afternoon [d].

THE 20th, they marched in the ſame Plain, approaching the Mountains to the S. on which Part of the Great Wall runs. They paſſed an Incloſure of ruined Walls, which joins the Great Wall, and encamped in *Aru-ſibertay*, a very pleaſant Place, watered with a Brook of the ſame Name. Here is Plenty of good Paſture, and ſome tilled Land, but no Trees; the *Mongols*, many of whom encamp here with their Herds, never planting any. The 21ſt, they reſted. The 22d, they proceeded along the *Aru-ſibertay*, while the Emperor hunted in the Mountains; and encamped in *Kerchilu*, near *Horho-pira*, a River running E. then S. through a Valley leading to a Gate of the Great Wall, called by the *Chineſes*, *Ching-kew*; and, by the *Mongols*, *Ikiri-tûka*; about 15 *Li* S. The Wall here is built of Earth and Stone, and the Hills, over which it runs, are low.

7 *Journey in* Tartary.

low. This Gate is ſhut-up, but a walled Town is near it, and a Guard of 300 Men.

The Emperor's Studs,

THE 23d, in their Way through the Mountains, they met with 40 of the Emperor's Studs, containing 17,000 Mares and Foals. The like Number is paſtured on the Sides of the River *Shan-tû*. They encamped in a Place named *Sirdetey*, where ſome Springs give Riſe to a little Brook. Here they found a great many *Mongol* Tents. The 24th, they travelled among the Mountains intermixed with fine Valleys, rich in Paſture, watered by Rivulets, and much reſorted by the *Mongols*; encamping in the Entrance of a Plain, by a Brook.

Herds, and Flocks,

THE 25th, proceeding through the Plain, they met with 80 Herds, containing 8000 Cows and Oxen; and 130 Flocks, amounting to 39,000 Sheep, all ranged on each Side of the Way: Among the latter, 20,000 had died of a Mortality ſince the Spring. They encamped in a good Paſture-Valley, by a Brook of excellent Water. The 26th, they travelled over little Hills, covered with Paſture. They paſſed ſome ruinous Houſes of Wood and Clay, and met-with more Herds and Flocks; from whence the Victims for Sacrifice being taken, they are under the Care of the *Li-pû*, or *Tribunal of Rites*. They encamped nigh ſome Pools, in a Place named, from a large Spring, *Queytû-pûlak*.

All very lean.

THE 27th, their Road was over rocky Hills; but the Valleys were well-watered, and abounded with Paſture, where they met-with the ſame Studs, Herds, and Flocks, which they ſaw in *November* before. As the Cattle feed only upon Graſs the whole Year round, they are very lean in Winter: And in the Beginning of Spring, when the Herbage rots on the Ground, they have nothing but the Roots, which they ſcrape-up with their Hoofs. If at this Time any contagious Diſtemper gets among them, a dreadful Mortality enſues: But they recover again with the new Graſs, which in theſe cold Countries does not ſpring-up before the Middle of *May*. In *July* and *Auguſt* they are ſo peſtered with Gnats, that they do not thrive.

THIS Day, there was a high N.W. Wind, and ſo cold, that moſt of the Retinue put-on a Fur Veſt. They encamped by the Side of a Brook in *Porhaſtay*, a little Plain. The Emperor gave Orders for the *Mongol* Regulos and Princes, who had attended him, to return home, making them Preſents of Cows and Sheep; and declared, that he would give his third Daughter in Marriage to the Grandſon of *Tûſhetû Hân*. In regard likewiſe, that many of the *Eluths*, who had ſubmitted, amounting to 1500, had died at *Pe-king*, where the Climate and Way of Living did not agree with them, he gave Orders for ſettling them in this Part of the Country, without the Great Wall, that they might live after their own Manner; cauſing Horſes, Cows, and Sheep, to be diſtributed among them, according to their Ranks.

Gerbillon 1697. Porhaſtay Plain.

THE 28th, they met ſeveral more of the Emperor's Flocks. Having marched 30 *Li*, over Hills and Dales, they deſcended *Hinkan-tabahan* [a], for 20 *Li* together; but the Declivity is very gentle. This Mountain is much more elevated above the Level of the Earth, on the Side of *China*, than of *Tartary*. They encamped by a Rivulet, in a narrow Valley, lying between *Hin Hân* and *Chang-kya-kew*: It is generally ſtony, but ſome Spots are cultivated, and produce good Corn. The 29th, marching along the ſame Valley, they came to *Chang-kya-kew*, a Gate of the Great Wall; before which they found the Gariſon, amounting to 500 Men, drawn-up under-Arms. Five *Li* further, they paſſed-through *Hya-pû*, a Place of great Trade before the late Wars ruined the *Mongols*: However, it ſtill contains 10,000 Families. As the Latitude of this Place is 40 Degrees, 52 Minutes, that of the Gate muſt be nearly 40 Degrees, 53 Minutes. They lay at *Swen-wha-fû*. The 30th, they went 80 *Li* to *Pau-ngan*.

Hin-kan-tabahan. Chang-kya-kew. Pau-

JULY 1, when they came to the End of their Stage, they found the Heir of the Crown, and his Brothers, accompanied by Regulos, &c. who had waited there ſome Days for the Emperor. The 2d, they proceeded 120 *Li*, to *Chang-ping-chew*, ſix Leagues from *Pe-king*; where the Empreſs Dowager, and the Queens, met his Majeſty; who, on the 4th, entered the City in great Triumph [b].

Tong-chew City.

MAY 24, 1698, in the 37th Year of *Kang-hi*, the Author set-out from *Pe-king*, with *Antony Thomas*, in the Train of three *Ta-jin*, or Grandees, *viz.* the President of the Treasury; the President of the Tribunal of the *Mongols*; and a Privy Counsellor, or *Meyran-chang-hin*; who were attended by *Mandarins*, and some of the Emperor's Guards. They were sent by the Emperor to hold an Assembly of the *Kalka Tartars*, and regulate the Affairs of that Country. They lay at *Tong-chew*, a large populous City, and of great Trade, being situate at the Confluence of the royal Canal, and the River [a], by which all Commerce from the South of the Empire is conveyed to *Pe-king*. Here is also a little Canal only for the small Barks, which carry the Tribute of Rice to that Capital. They were entertained here with great Magnificence, at the House of a rich Merchant, who came for that End from *Pe-king*, in Compliment to the President of the Treasury.

San-ho hyen.

THE 25th, they travelled E. by N. 70 *Li*. At first setting-out, they passed two Branches of the River on sorry Bridges, and lay at the little City *San-ho*.

[a] Called the *Pey-ho*.

— To *San-ho* City — 30

8 Journey in Tartary.

Ki-chew.

San-ho. The 26th, they went E. then N.E. 70 a *Li*. At ſetting-out, they croſſed the River *Tſo-kya-ho*, and lay at *Ki-chew*, a middling City, about 5 *Li* from Mountains on the North. The 27th, at the End of 35 *Li*, they paſſed-through *Ma-ſhin-tyen*, a large Village, and lay at *Shi-men*, a ſmall City.

The Imperial Sepulchres.

A LITTLE before they got thither, they ſaw through a Gap in the Mountain about a League to the N. the Burying-Place of the preſent Imperial Family. The 28th, the Grandees marched b 10 *Li* about, being obliged to pay their Reſpect to the Imperial Tombs. They afterwards travelled through a well-cultivated Plain, but the Corn was periſhing by the Drought. They lay

Tſun-wha-chew.

at *Tſun-wha-chew*, a City of the ſecond Rank, 13 *Li* about, and famous at *Pe-king* for its excellent Tobacco.

THE 29th, the laſt 10 *Li* was among Mountains. They paſſed ſeveral Villages, and lay at *San-tun-ying*, a ſmall military City, now decay- c ing, and the Gariſon reduced to 400. It has ſome rich Merchants, who trade with the *Mongols* of *Karchin*. The Sky being overcaſt, they might be deceived in taking the Latitude. The 30th, their Road lay winding among the Hills, covered with beautiful Woods of Fir. They met with ſeveral poor Hamlets in the Way. At

Croſs the Lan-ho.

the End of 30 *Li*, they croſſed the *Lan-ho* over a ſorry Bridge, which runs to the Eaſt, is broad, and not fordable. Near the Bridge were d much Timber on Floats, a Street with ſome Inns, and Houſes of Watermen, who had Charge of the Timber. From hence they went over a Hill, and then another, which had a narrow Way cut through a Rock: Then winding about a Mountain, paſſed-by *Lan-yang*, a ruined Fort, and lay at *Hi-fong-kew*, a Fortreſs near the Great Wall.

Paſs the Great Wall.

THE 31ſt, they paſſed the Great Wall, by a Gate already mentioned [a]. As their Road continued winding among the Mountains, which were e very ſteep, and covered with Oaks; the 60 *Li* they travelled this Day may be reduced to 50. They ſaw many wild Lilies. Some of the Valleys were cultivated by the Emperor's Farmers. They encamped in a fine one, by the River *Pau-ho*. Here they began to meaſure the Road by a Line, three of which made a *Li*. *June* 1, they went 53 *Li*, but could not reckon above 45 N.E. on Account of winding about the Hills, which were covered with beautiful Trees, eſpecially wild Apricots. They croſſed the *Pau-ho* ſeveral Times, and encamped a little beyond the Streight *Ta-kya-kew*; by the *Tartars* called *Taki-hapchil-ancha*.

Gerbillon. 1698.

U-ſhe-kya.

ON the 2d, they found the Valleys larger, and better cultivated, and the Hills leſs woody. After 24 *Li*, they came to *U-ſhe-kya*, a *Mongol* Town, and the firſt Poſt from *Hi-fong-kew*, ſtanding in a fine Valley, watered with Brooks, and the River *Chibekey*. The Lands, from the Great Wall to this Place, are the Emperor's; but here *Karchin* begins, which belongs to the *Mongols*. The Re- Karchin Country.

gulo of this Country ſent his third Son hither to meet the *Chineſe* Chiefs, with Hunters; but the Rain and Wind prevented their Diverſion. They often croſſed the *Hongor*, which runs into the *Lan-ho*, and brings Floats of Timber to *Pe-king*, affording the Regulo of *Karchin* a good Revenue. They encamped at a Place called *Sirgha-piray Honghor-angha*, from the uniting of thoſe two Rivers in the Valley of *Sorabo*, near ſome thatched Huts.

Queiſſu-hata, River Ly

THE 3d, they travelled half-way in the ſame Valley; then croſſing ſome Hills, entered another of great Extent, and encamped in it near the Rock *Queiſſu-hata*, by the River *Lyau-ho*, which runs N.E. into the Province of *Lyau-tong*, where it is vaſtly increaſed by other Rivers. The Place, which conſiſted only of a few *Mongol* Tents, was by the *Chineſe* called *U-ſhe-kya*, being the ſecond Poſt from *Hi-fong-kew*. The 4th, they advan- Chahan-ſubarhan ced in an open Country, but little cultivated (a Chain of Mountains lying 4 or 5 Leagues Weſt, ſome alſo to the Eaſt) and at the End of 7 *Li* paſſed a ruined City. They croſſed 2 Rivulets, and encamped at the *Ike-chun*, in Sight of a Tower, which the *Mongols* call *Chahan-ſubarhan*; where once ſtood a City.

River dolen.

THE 5th, the Country was deſtitute of Trees. To avoid ſome ſteep Hills, they entered the rich Valley of *Pahyen-to-hoy*, and encamped by the *Kodolen* [b], the largeſt River they had yet come to. It runs from W. to N.E. along the Valley, which is well-inhabited: But the Houſes are only Earth and Straw, except one of Brick and Tile, wherein

Journey in Tartary.

wherein lived *Erinchi*, a principal *Tayki*; to whose Family *Karchin* belonged, before it was given the Father of the preſent Regulo, who was a *Chineſe*. They pitched about 10 *Li* N.E. from his Houſe, and near the Chain of Mountains to the Weſt. The Author found, by a Compaſs with Sights, that the Rock *Queiſſu-hata* bore S. 60 Degrees W. ſo that their Courſe for two Days paſt muſt have been N. 10 Degrees E. and he gueſſed the Latitude to be 41 Degrees, 50 Minutes.

Wild Apricots.

THE 6th, they paſſed-over ſeveral Hills covered with Briars, and wild Apricot Trees full of Fruit. The Soil a reddiſh Earth, with Sand very fit for Vines, if the Climate be not too cold: Then deſcending into a Valley with ſome Hamlets and tilled Land, they encamped by a Brook, at a Place called *Putule*. The 7th, they croſſed the Mountain *Pulengher-tabahan*, and entered the Country of *Onhyot*, by a great Plain, with ſome Spots cultivated by the *Mongols*, who pitch their Tents along two Rivers. *Siba*, the Southermoſt, is ſhallow, and runs Eaſt into the *Lyau*. At Six in the Morning a ſmall Earthquake was perceived.

Onhyot Country.

ONHYOT is divided between two Lords; the firſt a *Kyun-vang*, or Regulo of the 2d Order, and Chief of one of the 49 *Mongol* Standards, of 20 *Niurus*, or Companies of 150 Men, that is Heads of Families. His Territory, which is largeſt, and the beſt Land, but mountainous and woody, joins Southwards on *Uluſtay*, where the Emperor hunts in Autumn. He encamps along the *Sirgha* and *Siba*, but his Mother and Brother have Brick-Houſes, and ſome few *Mongols* mud ones. The other is a *Pey-le*, or Prince of the 3d Order, whoſe Standard has but 10 Companies. They have no fixed Abode. His Lands lie to the Eaſt, and are ſandy, but have good Forage. The Rivers in this Country run from W. to E. into the *Lyau-ho*, which bounds it on the S.E. The *Sira-mûren* ſeparates it on the N. from the Territory of *Parin*; and the Mountain *Hamar-tabahan*, by the *Chineſe* called *Pecha*, on the North-East.

Sirgha and Siba.

Over Sirgha.

ON the 8th, they encamped by the *Sirgha*, a larger River, with ſome ſcattered Tents of the *Mongols* on its Banks, where was good Paſture. They caught ſome large Fiſh with a Net. The 9th, they travelled 30 *Li* N.E. by N. on the ſame Plain, and by a Spring called *Mau-pûlak*; then 15 *Li* in the Mountains, to which from the Place where they entered the Country of *Onhyot*, they computed 95 *Li* in a direct Line N. 18 Degrees E. Deſcending into a Plain, they went 20 *Li* N.E. by Eaſt, and encamped by the *Perké*, a ſmall River, which runs into the *Lan-ho*, but is ſometimes dry: Near it were a few *Mongol* Tents and Spots of Ground tilled. The Soil was dry and ſandy. Here they reſted two Days [a]. The 12th, half their Journey was through the Plain; then croſſing a Hill, they entered another large one, but without Trees or Buſhes. They encamped in a Place called *Hotoſin-hutuk*, near a Dozen Tents of *Mongols*, and ſome Wells of bad Water.

Gerbillon. 1698.

Perké River.

THE 13th, having marched 20 *Li*, they ſaw ſome *Mongol* Hords in a Place called *Imatu-hutuk*. Their Road lay between the Mountains, and for ſome *Li* over Sands, being a Skirt of the Deſart *Sha-mo*, ſituate to the Eaſt. After this they came to ſome good Land ploughed by the *Mongols*. At the End of 35 *Li* [b], they travelled over ſhrubby Mountains, abounding with wild Apricot Trees, and came to a heavy Sand for 4 or 5 *Li*, bounded by a fine Meadow, watered by the River *Sira* [c]; which riſing in *Mount Pe-cha*, croſſes *Onhyot*, enters *Oban* the Eaſtern Boundary, paſſes-by the Reſidence of *Chang-tû-vang*, Prince of this latter Country, and joining another River falls into the *Lyau-ho*. They croſſed the *Sira*, and encamped on its Bank, by a Place called *Kurké-kiamon*, or *fifty Houſes*, having left *Onhiot*, and entered into the Country of *Parin*.

The Sira-mûren.

Country of Parin.

THE 14th, their Road lay among little Hills, and Plains of good Paſture, paſſing ſome Tents of *Mongols*; the Soil ſandy, except ſome Marſhes. They encamped in a charming Meadow on the Bank of the *Hata*, or *Hara-mûren* [d], which croſſes it from N.W. to S. About 3 *Li* N. was the Houſe of the Regulo of *Parin*, who is a *Kyun-vang*: A little farther that of his Mother, eldeſt Siſter of the Emperor *Shun-chi*; alſo the Houſe of *Kang-hi*'s eldeſt Daughter, married to the Regulo's Brother. The Houſes were grand, and built by Workmen from *Pe-king*, at his Majeſty's Charge. The *Chineſe* Chiefs went to pay their Reſpects to the Princeſſes; who entertained them

The Regulo's Reſidence.

[a] *Du Halde's China*, p. 369. [b] Here they found the Latitude 43 Degrees, 13 Minutes. [c] Or, *Sira-mûren*. [d] It riſes in the Country of *Uchu-muchin*, and falls into the *Sira-mûren*.

8 Journey in Tartary. them handſomely, and told them they felt another Earthquake at Eight in the Morning, but not ſo great as the former, which obliged them to quit their Houſes: But as the Viſitants travelled on Horſeback, they felt neither of them.

Kayre-hata Mountain. THE 15th, they travelled along the *Haramûren*, and encamped on its Banks, by a Mountain called *Hara*, or *Kayre-hata*. They ſaw on the Way ſeveral Tents, and Plots of ploughed Land. To the W. were Quick-Sands, to the N. a Ridge of Mountains, and to the E. other Mountains, called *Nimatu*. The 16th, the Country was open, the Mountains bare, and the Land unfit for Tillage. Their Road was not without Turnings. They encamped by a cool Stream, riſing at a Fountain called *Kuturihu-pûlak*. Here a *Mongol* Counteſs came from *Uchu-muchin*, N.W. of *Parin*, to meet the Chiefs, and enquire of the Emperor's Health. She gave each of them two Horſes; and they made a Return in Silk.

Kuturihu-pûlak.

Uchu-muchin Country. THE 17th, they marched at firſt among the bare Mountains, called *Ingan*, which join to *Mount Pe-cha*, and ſeparate *Parin* from *Uchu-muchin*. Going towards the Head of the Stream, they entered a ſandy and marſhy Plain. At the End of 20 *Li* they came to ſome Meers, about which were *Mongol* Tents, and Abundance of Cows. The Soil was nitrous. They encamped by a Brook called *Kultu*, or *Kuldu*; where was good Paſture, but no Wood. The *Ingan* Mountains are the higheſt Land between the N. and S. Oceans, for the Streams deſcending from them fall-into the Sea on the ſame Side they riſe.

Ingan Mountains.

THE 18th, they travelled through a Plain watered by the ſame Brook, the firſt 20 *Li* N.W. by N. then it turns to the N.E. following the ſaid Brook; and afterwards to the N.W. courſed by another Rivulet, called *Paluhur*, along which they travelled, and at length encamped in a Place called *Paluhur-pira*, having at W. and N.W. the Quick-Sands, which terminate the Plain. The Regulo of this Country, whoſe Reſidence was not far-off, came with his Son to enquire after the Emperor's Health, and gave an Entertainment to the Grandees. The 19th, they proceeded but 19 *Li* up this Rivulet, and encamped on its Banks at *Gongkeer*, near the Regulo of *Uchu-muchin*, who is a *Tſing-vang*, or Prince of the firſt Order, aged about 27, and has 24 *Niurus* in his Standard. He fetched the Grandees to his Tent, treated them with Beef, Mutton, Milk, &c. and conducted them back.

Paluhur Rivulet.

Gerbillon. 1698.

THE 20th, they reſted, to provide Mutton, and change ſome Horſes and Camels. The 21ſt, the Country, for about 15 *Li*, was good, and interſperſed with *Mongol* Tents; but afterwards ſandy, and void of Forage. They firſt paſſed the *Paluhur*, then at 20 *Li* ſaw the Lake *Kudon Nor*; the Country open, and no Hills: But far to S.E. 14 *Li* farther, they came to the Lake *Keremtu Nor*, and encamped at a Place called *Pachay-kubur*, by ſome Pools, ſeemingly of Rain-Water, which had no bad Taſte; but, when boiled, was muddy, and had a thick Scum, by reaſon of the nitrous Soil. There was Plenty of Forage, but no Wood. After 70 *Li*, they found the Latitude 44 Degrees. It was ſo cold, that moſt put-on double Furs.

Kudon Lake.

THE 22d, having paſſed-over Sand-Hills, with Graſs full of Gnats, they came to a marſhy, nitrous Soil, then to hard Sand, with poor heathy Graſs: So that they ſaw not one Tent, or Perſon all Day. After 30 *Li*, they croſſed the *Teng-pira*, and encamped 30 farther, beyond the *Horohon-kol*, another River, whoſe Water was brackiſh like the Soil, at a Place called *Horohon-pira Poro-hojo*, where they found the Variation of the Needle one Degree, 20 Minutes Weſt. The 23d, after they had croſſed the *In-chahan*, their Road was boggy, and fatiguing to the Cattle, who ſuffered alſo by the Gnats. They encamped on the *Hara-ûſſû*, a deep River, full of Weeds, which they forded.

Rivers Teng, Horohon, And In-chahan.

THE 24th, the Country was flat, till they croſſed the *Udû*, which branches from the laſt-named River, and joins it again. Afterwards they travelled by ſome bare Hills, which they left on the Eaſt, ſeeing neither Tents, Graſs, nor Buſh: Then paſſing by two dry Meers, they proceeded, notwithſtanding the intenſe Heat, and vexatious Gnats, to a clear Spring, and encamped; the Place being called *Habir Hân* [a].

THE 25th, the Soil was like the former; but the Gnats not ſo numerous. They encamped by a Spring and Pool, called *Parolchitu Nor*, where their Firing was the Dung of Beaſts. The 26th, travelling in the ſame Kind of Country, and paſſing a Meer almoſt dry, they pitched firſt by the

Parolchitu Pool.

June

Journey in Tartary.

the Lake *Angirtu-ſira-puritu Nor*, in a marſhy Ground, whence the Gnats vexed them much. Next Day, the Road was firſt boggy, then dry Ground, with Graſs; but neither Tree, nor Buſh. They encamped by the Lake *Iptartay Nor*.

Kalkas Country.

THE 28th, after advancing 20 *Li*, they came to a hard Sand, with Briars, of a large Extent, called *Queyghen-eleſu*, which is the Boundary between *Uchu-muchin*, and the Country of the *Kalkas* under *Che-ching Hân*. Notwithſtanding the Drought, the Soil ſeemed to be good. They reſted by *Wheytu Taſihau Nor*, a little Lake of ſtinking Water. The Place being covered with the Dung of Cattle, ſhewed that the *Kalkas* dwelt here in Winter. Ducks, Geeſe, and other wild Fowl were plenty. Three or four hundred *Li* Eaſt of *Uchu-muchin*, is the Country of *Aru-karchin*; and that of *Hauchit* [a] lies 400 *Li* Weſt of it. As ſoon as they got among the *Kalkas*, they encamped near a Pool, where was very high Graſs.

Chaptu Nor.

THE 29th, they travelled through a Deſart void of Water, Trees, Hills, or Inhabitants; and encamped by *Chaptu Nor*, a large Meer, of nitrous and brackiſh Water; but near it a tolerable good Well. In the Afternoon there was a great Storm of Thunder, Wind, and Rain; which ceaſing, the Gnats perſecuted them more than ever. The 30th, they advanced through a Country where the Horizon bounded the Sight as at Sea, and pitched S.W. of a great Lake, called *Pwir Nor* [b], furrounded by *Mongol* Tents. The *Ta-jin* took Abundance of Fiſh in the Lake, the biggeſt of which were ſome poor and dry Carp: The white Fiſh were plenteous, but too bony to be palatable.

Imperial Orders.

IN the Way, they met-with a Troop of *Hyas*, and Officers of the Regulos of the Country, beſides three or four *Taykis*, Sons or Brothers of the *Kalka* Princes, who came to compliment the *Ta-jin* on the Part of their Maſters. The *Chi*, or Imperial Orders, were carried with much Ceremony in Caſes wrapped in yellow Satin, on the Backs of two Men, preceded by two Imperial Standards of yellow Brocade, with Dragons painted in Gold, and a magnificent Umbrello of the ſame Stuff, painted as the former. At the Sight of theſe Standards the *Taykis* alighted, and walking about 100 Paces, fell-on their Knees, and remained in that Poſture till theſe Enſigns were paſſed a good Way beyond them.

Gerbillus. 1698.

JULY 1, they marched continually along the Lake, and encamped by it, in a Place called *Pwir-i-ûlan-erghi*. The Soil was a hard Sand, the Graſs very ſhort and thin, but very juicy and wholeſome. The Country was much better inhabited than any other they had met-with. They caught Multitudes of Fiſh, but the biggeſt did not exceed two Foot and a half; for they advanced no farther than into four Foot of Water. The Country ſeemed always level, but roſe inſenſibly towards the North.

Lake Pwir.

River Urſon.

THE 2d, they advanced 49 *Li* due North, allowing for Windings, and encamped near the River *Urſon*, which iſſues-out of the Lake *Pwir*, and runs into that of *Kûlon*; the Country a ſandy Level. After they had gone 12 or 15 *Li*, they diſcovered a Mountain to the N.N.E. which is very remarkable, becauſe it ſtands alone; and did not loſe Sight of it all the Way. It appeared from their Camps five or ſix Leagues to the N.W. by W. They avoided the Gnats, by lighting Fires at the Doors of their Tents, and conveying-in the Smoke. They found the Lake *Pwir* not to exceed 80 *Li* in Length, from S.S.W. to N.N.E. and it is about 30 in Breadth throughout.

Place of Aſſembly.

THE 3d, following the Courſe of the *Urſon*, they encamped on its Banks to the South of a Pool made by a Spring, called *Ulan-pûlak*; whence the Place has the Name of *Urſon-pira Ulan-pûlak*. The Country was not ſo level as the former; and as there are no Trees, nor Buſhes, they uſe for Fuel the Dung of Cattle. This being the Place appointed for aſſembling the neighbouring States of the *Kalkas*, the *Hân*, and other Chiefs, came in Ceremony to meet the Imperial Orders. As ſoon as they perceived it carried in the above Manner, they alighted; and fell-on their Knees as it paſſed-by them: Then riſing, they went to enquire after his Majeſty's Health, kneeling likewiſe before the *Ta-jin*; who alighted, and ſtood all the While. After this they mutually ſaluted, and remounting their Horſes, proceeded to the Camp.

Ceremony of opening

HERE the Imperial *Chi* being placed in a large handſome Tent, with an *Hyang*, or odoriferous Wood burning before it, all the *Kalka* Princes proſtrated themſelves, and knocked their Foreheads

a heads thrice againſt the Ground, with their Faces towards the *Chi*, to ſignify their Reſpect. After this, two *Mandarins* of the *Mongol* Tribunal opened and held it at both Ends, while a third read it aloud. It was written in the *Mongol* Language, and imported, "That it was an eſtabliſhed Cuſtom to convene Aſſemblies every 3 "Years: That the War with the *Eluths*, which "had interrupted their meeting, being happily "finiſhed, his Majeſty had ſent 3 Grandees of "his Court to hold an Aſſembly in his Name: "That as the *Kalkas* were now all united under "the Emperor's Dominion, and divided into "Standards and *Niûrûs*, like the reſt of the "*Mongols*, they ought to look upon themſelves "in the ſame Light; and, conſequently, it was "no longer neceſſary to poſt Guards upon one "another's Frontiers."

Journey in Tartary.

And holding it.

THE *Chi* being read, and repoſited in the ſame Place, *Che-ching Hân*, and the reſt, made their Proſtrations and Knockings. After which the Preſident of the *Hû-pû* went, and taking it in his Hand, gave it himſelf to *Che-ching Hân:* That Prince received it on his Knees, and then delivered it to his People; who made three Proſtrations, to thank the Emperor for his Favour. This done, the *Ta-jin* placing themſelves on the Eaſt-Side of *Che-ching Hân*, and the other *Kalka* Princes on the Weſt, mutually ſaluted, then took their Seats, and drank *Tartarian* Tea together; after which they talked of Buſineſs. The ſix following Days were ſpent about Matters of no great Conſequence. The *Kalka* Princes ſent them Horſe-Loads of Proviſion, dreſſed after their own Faſhion, with Wine made of Mares Milk, both ſweet and ſour. Among the Victuals was Mutton of an excellent Taſte. The Author eat alſo of a Kind of Otter, called *Tarbiji*, as delicious as Roebuck [a].

Kalkas, Condition of.

THE *Kalkas* are in much better Circumſtances than the *Mongols* bordering on *China*, having a better Stock of Cattle, and Land fitter to rear them. Before the War with the *Eluths*, they were vaſtly rich, and had innumerable Herds; nay, ſtill ſome of their Princes have 8 or 10,000 Horſes in their *Haras*. Theſe People formerly extended from the Source of the *Kerlon*, to the Borders of *Solon* Province [b], and but few of them dwelt in this Country; where at preſent they are all retired, to avoid falling into the Hands of the *Eluths*, except thoſe who are gone over to the *Ruſſians*. The *Kalkas* are divided into 10 Standards, each under a Prince or Chief, as follows.

Their ten Standards.

		Niurus
1. *Che-ching Hân*	-	27
2. *Namjal Tſin-vang*	-	21 ½
3. *Pong Sûk-kyun-vang*	-	12 ½
4. *Putachappe Pey-lê*	-	11 ½
5. *Chingpelle Pey-lê*	-	7 ½
6. *Tanjeghin Pey-lê*	-	6
7. *Aldar Pey-lê*	- -	6
8. *Chenden-kong*	- -	28
9. *Sereng-taſhi Tayki*	-	11 ½
10. *Konnecbuk Tayki*	-	1

Gebilton. 1698.

EACH *Niurus* is divided into 150 Families, every Family conſiſting of a Man and his Wife, with their Children, and Slaves if they have any. Every Year they examine if the Families increaſe or diminiſh; and thoſe which are increaſed in any *Niurus*, ſerve to ſupply the Families that are wanting in the other *Niurus* of the ſame Standard; for they never paſs from one Standard to another. In like Manner, each Chief always keeps within the Limits, or Extent of Country preſcribed him, beyond which he cannot go. They have no fixed Abodes, but live under Tents, generally encamping near the Rivers *Kerlon*, *Urſon* and *Kalka*, and about the Lake *Pwir* [c].

2. Road *to the ſecond Place of* Aſſembly, *and their* Return.

THE 11th of *July*, departing from the Place of Aſſembly, they forded the *Urſon*; firſt near their Camp, where it was broad and ſhallow; then 15 or 20 *Li* farther. Beyond this River, the Country had an almoſt imperceptible Deſcent; the Soil ſandy. They ſtopped on an Eminence 15 or 20 *Li* from the Lake *(Kulon,* or *Dalay)* having thence diſcovered, with Teleſcopes, that Part which was not hidden by the

Lake Kulon or Dalay.

[c] *Du Halde*, as before, *p.* 372.

Mountains.

Journey in Tartary.

Mountains: Yet the Author was assured, that the hidden Part was by far the greater, and that it took seven Days to make the Tour of it, at the Rate of 60 or 70 *Li per* Day: But the Mountains which surround it from N.E. to N.W. hid it from their View.

Mountains and Rivers.

THOUGH none of the Mountains about the Lake are high, there are three remarkable ones; *Kalyutay*, the most Southern; *Olezin*, the middlemost; and *Kurban-chira*, to the North, on the River *Argun*. They said, that the *Urson* entered the Lake towards the E. the *Kerlon* to the N.W. and that the *Argon*, or *Ergone* (as the *Kalkas* name it) issues-out of it towards the N.E [a], about 40 *Li* from the Place where they encamped. They now descended to the Lake, where the Land was uneven, very sandy, and without Herbage, except a Sort of tufty Herb, which the Camels are very fond of; the Gnats also appeared in Clouds. This Side of the Lake is so shallow, that you may wade 3 or 4 *Li* before you find 3 Foot of Water. Their Camp was about 2 *Li* from it, precisely at the Western Extremity; for its Length, which they say is more than 200 *Li*, is from S.W. to N.E. This Place is called *Dalay-choye-chong-dalay*, which is the Name they give the Lake itself, to express its Largeness; for *Dalay* [b] signifies a *Sea*.

About the Lake.

THE 12th, they proceeded thro' a very open and level Country, for 50 *Li*; after which they passed a Hill that extends from the Mountain *Tulon-hara*, almost to the *Kerlon*. They encamped at the Foot of an Hill, on the Southern Bank of the *Kerlonni-altroy-emû*. This River, whose Water is very good, runs through a beautiful Meadow, full of excellent Pasture, about a League and half in Breadth. On the N. and S. were rugged Hills. The 13th, two Thirds of their Way lay among the Hills of hard Sand, where they saw Abundance of little Agate Stones, but of the common Sort; often changing their Course, to avoid the Marshes near the *Kerlon*.

River Kerlonni.

THE 14th, they advanced in the same Plain, through the Middle of which runs the *Kerlon*. They crossed it where it was no more than two Foot deep, and 60 wide. *Che-ching Hân* was encamped, with his Family, on both Sides of the River. He had prodigious Numbers of Horses, Camels, and Goats; but not so many Cows, Oxen, and Sheep. Eight or ten of his Tents appeared neater than the rest, but much inferior to those of the *Manchew* Lords. He had erected another Pavilion at some Distance from his Camp, for entertaining the *Ta-jin*, whom he came on Horseback to meet, and conducted thither. The Banquet consisted of 8 or 10 Sheep, dressed in different Manners, and served-up in a Sort of wooden Trays. When they had tasted these Meats, and drank a little of their Tea and Wine, prepared with Milk, they returned to the Camp, in a Place called *Lahitutala*, by the Side of the *Kerlon*, whose Stream was very muddy, winding gently through the Meadows. To avoid a great Sweep that it takes to the South, they passed it, and proceeded 40 *Li* beyond.

Che-ching Hân.

Gerbillon. 1698.

His Camp and Feast.

THE 15th, after the first 20 *Li*, they marched 25, among barren Hills: Then through a large Plain, having the *Kerlon* always to the South, 4 or 5 *Li* distant. The Country was very barren, yielding very little Grass, and no Water, or Trees. They encamped on the Banks of the River *Kerlonni-chik-chirra*; from whence they beheld to the E.S.E. those Mountains which they had crossed, resembling the Bunches on the Backs of Dromedaries. The 16th, the Country was open on all Sides, but the Soil barren, except for 10 or 15 *Li* of Meadow through which the *Kerlon* runs. This River, on their North, made a great Sweep; but not so great as the Day before. They encamped at a Place called *Ton-kûl-chi-ava*.

They march along the River Kerlon.

THE 17th, they proceeded still South of the *Kerlon*, through a very open Country, only some little Hills towards the S. and S.W. The Soil was barren, but grew better towards the End of the Stage. They encamped on the River, at a Place called *Kerlonni-siray-chibautay*. The 18th, marching still along the Meadow, which continued to be charming, they crossed the *Kerlon* just before they pitched their Tent in a Place called *Chilan-karchaka* [c].

Para-hotun Ruins.

THE 19th, they advanced in a Country still more level than before, and always within 10 or 12 *Li* of the *Kerlon*, which they passed at a Place called *Ture Nor*, and encamped on its Banks.

July

3 Journey in Tartary.

Banks. The 20th, they travelled along the Meadow in Sight of the *Kerlon*, and paſſed-by the Ruins of a City, built on its North Bank in the Time of the *Ywen* Dynaſty. It was 20 *Li* ſquare, and called *Para-botun*, that is, *the City of the Tiger*; becauſe the Cry of that Animal was there heard. They encamped in a Place called *Kerlonni-kanchuku-alin*, by the *Kerlon*, after croſſing a little Brook of very clear Water, which falls into that River.

Pûſing-angha.

THE 21ſt, after winding about the Meadow, to avoid the Marſhes, they croſſed the *Kerlon*, and kept it in Sight till the laſt 15 or 20 *Li*, when that River takes a large Sweep Southward; paſſing between a Mountain to the North, and little Hills to the South. They encamped on its Bank, in a Place called *Pûſing-angha*. *Seringtaſhi Tayki*, one of the Chiefs of Standards before-mentioned, was encamped by a River with a conſiderable Number of Tents. The 22d, they again croſſed the *Kerlon*, which they had in View all the Way, and encamped on an Eminence, called *Pwirluk-alin*. The 23d, they had for moſt of the Way Hills towards the South, and the *Kerlon* to the North. Their Camp was in the Meadow 4 or 5 *Li* from the River, near a Pool of very clear Water, in a Place called *Paynûk-alinni-hara-ûſſû*.

Pwirluk-alin.

Purhaſu-hay-hojo.

THE 24th, their firſt 33 *Li* were W.S.W. and the Remainder due W. Then paſſing the River, they encamped on its Northern Bank in a Meadow full of Forage, and Place called *Pûrhaſûhay-hojo*. They chaſed ſeveral wild Mules and yellow Goats in vain, but killed a young Wolf, which purſued the Sheep belonging to the *Mandarins*. They perceived five large Stags on the Mountains, though they were quite bare, and deſtitute of Trees. The 25th, after 20 *Li*, they again croſſed the *Kerlon*, and marched under the Hills, called *Egutey-kalka*; then repaſſing the River, they pitched in a Place called *Erdeni-tolohay-varghi-erghi*. The 26th, they proceeded along the Plain of the *Kerlon*, to a Ridge of low and quite bare Hills, and encamped by the River, in a Place called *Hûjetû-tſilan*. The Soil was a barren Sand, but full of Rat-Holes, which cauſed the Horſes and Camels to ſtumble.

Erdeni-tolohay.

Kayre-hojo.

THE 27th, they travelled through a Plain of barren Sand, with the River and Hills at a good Diſtance to the North. They encamped near a Point of Hills, called *Kayre-hojo*, by the *Kerlon*, where the Variation was 3 Degrees, 40 Minutes Weſt, and the Heat exceſſive. The 28th, after marching a-while in the Plain, they entered among Hills, where the *Kerlon* bends much to the South. They pitched near a Meer, and a Spring, which formed two or three little Pools, whoſe Water partook of the nitrous Soil. This was one of the hotteſt Days the Author ever felt, a ſcorching Wind blowing from the S. and S.W. It alſo continued very hot all the Night, which is not uſual in this Country, and though Rain had fallen, accompanied with very violent Claps of Thunder. They encamped in a Place called *Honghûr-pûritû*, 40 *Li* from the *Kerlon*.

Gerbillon. 1698.

Extreme Heat.

THE 29th, after 25 *Li*, they entered among the Hills, called *Tono-alin*, quite covered with Rocks. They travelled farther in a barren Plain, full of Rat-Holes, and encamped by the *Semkat*, a Brook of very good and cool Water, in a Place called *Eburhu-holo-ſheri*. The 30th, having croſſed a Plain of barren Sand, they paſſed the *Kerlon* at a Place called *Ulon-erghi*, and encamped by the River. About 30 *Li* Northward appeared high Mountains, covered with Rocks, which bounded the Territories of *Che-ching Hân*. Here the *Eluths* uſually encamped, in order to make Incurſions on the *Kalkas*.

Tolo-alin.

Ulon-erghi.

THE 31ſt, they advanced in the ſame Plain, always in Sight of the *Kerlon*, and encamped on its Banks, in a Place called *Ekemur-pûrhaſûtay*, having continually on one Hand the Mountains of *Payen-ulon*: But were nearer a great Chain of Mountains, extending to the Source of the *Kerlon*; which, they were told, was 3 or 400 *Li* to the N. where it is formed by the Concourſe of ſeveral Springs. The *Kalkas* informed them, that the *Saghalian-ûla* (which they call *Onon*, as far as where the *Argun* falls into it) riſes on the North-Side of the ſame Mountains, about 400 *Li* diſtant. They caught Abundance of Pikes, Carps, and other ſmaller Fiſh in the River.

Ekemur-pûrhaſûtay.

AUGUST 1, after travelling among bare Mountains, where they found a Spring in a Bottom, they deſcended into a large Plain, ſurrounded with Hills, and encamped by a Meer, called *Kaltûtû Nor*, of good Water, but not cool. The *Kerlon* was about 40 or 50 *Li* to the Eaſt;

Journey in Tartary. East; and the Variation 3 Degrees, 20 Minutes a West. The 2d, at the End of 25 *Li*, they entered a pretty wide Valley (extending about 25 *Li*, between two Chains of barren Mountains) and encamped near a Rivulet of fine Water, which soon loses itself in the Ground: The Sides of it yielded Plenty of good Forage. The 3d, they advanced thro' Valleys, in Sight of Mountains covered with handsome Firs, and encamped on the *Tûla*.

River Tûla described. THIS River rises in the Mountain *Kentey*, b about 120 *Li* from the *Kerlon*, and runs at first S.E. till having passed the Point of a Mountain, (which was near their Camp, and lies due West from the Confluence of the little River *Tirelki* with the *Tûla*) it turns directly West. It is considerably larger than the *Kerlon*, and its Stream exceeding clear, running-over Flints and Pebbles. This River is very rapid, and in its Course forms several little Isles, full of most delightful Groves. Agreeable Plain. They also found a Coolness in the Air, that was c very refreshing in this hot Season. Its Banks are covered with various Sorts of beautiful and bushy Trees; without which, on both Sides, there is a Meadow, abounding with excellent Forage. Near this Place, which the Author tells us was the most agreeable he had seen in all his Travels into *Tartary*, two Years before, was fought the Battle between the *Chinese* and the *Eluths*, so fatal to the latter [a].

Field of Battle. THE 4th, they proceeded the longer Way d about, to avoid the Marshes, and encamped again by the *Tûla*, which runs Westward through very narrow Streights of Mountains. They went with the *Ta-jin*, to view the Field of Battle abovementioned; whereof the 2d President of the Tribunal of the *Mongols*, who was in the Fight, gave them the following Account [b].

THE King of *Eluth* flying-up the *Kerlon*, was arrived near the Mountains, whither he designed to retire, and where it would have been impossi- e ble to force him; when being overtaken by the Van of the Imperial Army, he attacked, routed, and pursued them to their main Body, which was encamped above three Leagues distant.

Venture the Battle. THIS Advantage encouraged him to advance with his Army, which consisted of but 7000 regular Troops, and venture an Engagement. Having left his Baggage with the Women and Children in the Woods, and little Isles of the River; he went and posted himself on a Hill, Gerbillon. 1698. from whence he marched directly to attack the *Chinese*, who were drawn-up in a Line on a higher Hill facing them, at Musket-Shot Distance, and made a very great Front: But after a long and obstinate Fight, they were forced to retire. The Imperial Artillery all the While plaid upon them, and did great Execution, especially among those who were posted on the Eminence. However, they did not quit their Stand till they saw a great Body of *Manchews*, who had descended into the Plain, marching-up to attack their Flank; when fearing to be surrounded, they abandoned the Hill, and retreated in good Order into the Woods and Thickets along the River.

And the Eluths. FOR this Reason, and because Night came-on, the Victors did not pursue them: But the *Eluths* were so terrified at the Numbers and Resolution of their Enemies, that they fled all Night, carrying off what they could of their Families and Baggage. Their King, whose Wife was killed with a Cannon-Ball, was the first who fled with his Family, and a very few Followers. They found in his Camp a few Women and Children, with some wounded Persons: But the Fugitives not knowing what was become of their King, nor whither to go, came and surrendered themselves by Troops: So that if the Emperor's Soldiers had been provided with good Horses to pursue them, very few of them could have escaped. The Place where the Emperor's Army was drawn-up, is called *Chau-mû*.

Fine Temple destroyed. FROM the Field of Battle, they descended into the Plain, which is watered by several Rivulets that fall-into the *Tûla*; and towards the Middle of it, saw the Ruins of a very magnificent Temple, which was built by *Chempezun-tamba Hûtûktû*, the Great *Lama* of the *Kalkas*, and destroyed by the *Eluths*. The 5th, they took a large Compass again, to avoid the Marshes, e crossed several Brooks which fall-into the *Tûla*, and for near 30 *Li* together passed along a high Mountain, called *Han-alin*, quite covered with Han-alin. Pines and Fir, making a Retreat for Bears, *River* Tûla. Stags, and wild Boars. They encamped in a Valley at the Foot of this Mountain, on the *Tûla*; where they caught Fish, particularly Sturgeons [c].

THE 6th, they left the *Tûla* to the South, and marched almost continually on Mountains, co-

8 Journey in Tartary.

vered with Pines; or in agreeable Vallies beneath a them, which were full of the Tracts of wild Boars, and the Trenches they dig in ſearching for Roots. They met alſo with Strawberries, exactly like thoſe in *France*; and encamped by a Brook. The 7th, they croſſed a Mountain covered with Pines, which were very tall, and without Branches: Several of them had fallen. They pitched by a Brook of very good Water, but without Paſture; where they reſted next Day.

Wild Boars.

Firs and Pines.

THE 9th, the Mountains were moſtly covered with Graſs, only here and there a few Pines and Firs. In a little Wood, they found Plenty of Strawberries. They took the Meridian Altitude by the Side of a Brook, 57 Degrees, 12 Minutes; and encamped afterwards by another Brook, having to the South and Weſt, Mountains covered with beautiful Groves.

Wood-Strawberries,

THE 10th, their Road was almoſt continually among Mountains. At the End of 15 *Li*, they croſſed one covered with Woods full of Strawberries; and then deſcended into the Valley, where they found a very clear and wholeſome Stream, whoſe Banks were lined with ſhady Trees; of which, for a While, they took the Benefit. Afterwards they proceeded among bare Mountains, and having croſſed one cloathed only with Graſs, encamped in another Valley, by a

Black Hares.

Spring of bad Water. The 11th, they travelled through Vallies, ſurrounded with barren Hills; the Land being like that near the *Kerlon*, ſandy, and full of Rat-Holes. They encamped at ſome Pools, which are ſupplied from a Spring, by a Stream of cool and good Water. In the Evening, a great Company of *Kalkas* came to ſalute the *Ta-jin*, with a Preſent of ſome wild Boars, and a Hare, whoſe Fur was blackiſh, and its Legs and Body longer than uſual.

Yellow Goats.

THE 12th, their Stage was half N.W. the reſt N.N.W. through large Vallies, ſurrounded with bare Hills. They ſaw ſeveral Flocks of yellow Goats in the Road, and killed a few Stags, with a good Number of Deer, or Roebucks. They pitched by a Spring of bad Water. The 13th, they travelled 30 *Li* out of 41 in a direct Line to the N.N.W. In quitting the Mountains, they entered a great Plain to the N.E. where the *Tûla* is joined by the *Orgon*. They paſſed the firſt, and encamped between

Second Kalka Aſſembly

the two, on a Mountain by the Side of a Plain, which was the Place choſen for the Aſſembly of the *Kalkas* of this Country. All the *Kalka* Princes of theſe Parts, who had ſubmitted to the Emperor, came this Day to meet the *Chi* (or Imperial Order.) The Ceremony was performed in the ſame Manner as had been done before, near the River *Kerlon*.

Gerbillon. 1698.

THEY continued here till the 27th, and while the *Ta-jin* accommodated the Differences among the *Kalkas*, or gave Sentence on Trials brought before them, the Jeſuits made ſeveral geographical Enquiries of the *Kalkas*, and ſome *Ruſſian* Merchants, who had travelled all the Country between *Tobolſkoy* and *Selengha*. Among the reſt, there was a young *Kalka*, who having been in the Service of the *Ruſſians*, had made ſeveral Journeys to *Tobolſkoy*, and viſited all the Places to the Weſt of *Jeniſſea*, as far as *Mount Altay*. This Perſon gave them a clear Deſcription of the Country, and drew a little Map of it off-hand; which tallied with the Accounts given by ſeveral other *Kalkas* and *Ruſſians*. From him they learned the following Particulars.

Enquiries concerning

1. THAT the Plantation of the *Ruſſians* on the Eaſtern Side of the *Selengha* (340 *Li* diſtant from the Confluence of the *Orgon* and *Tûla*, where they then were) is a little Town of the ſame Name, containing above 400 Families of *Ruſſians*, and thoſe of the Country who have ſubmitted to them, not as Slaves, but Friends: That theſe dreſs, and live after the *Ruſſian* Manner, and ſome have liſted in the Czar's Service: That the Town is a Square, each Side being two *Li*, and incloſed with a ſtrong Paliſado terraſſed: That the *Selengha* riſes in the Mountain *Tannu*, and falls into the Lake *Paykal*: That the *Orgon* falls into the *Selengha*, which is much larger, 140 *Li* from the Town [a].

The Ruſſ Territori

2. THAT the moſt famous Mountains are the *Altay*, *Trangha*, *Ko koye*, and *Kentey*; which laſt was about five Days Journey from the Camp, and is the Source of the *Kerlon* and *Tûla*; the latter riſing on its North, and the former on its South Side: That the River *Onon* has its Source alſo on the North-Eaſt Side of *Mount Kentey*, about a Day's Journey from the Source of the *Kerlon*: That the *Chineſe* call the *Onon*, *Hi-long-kyang*; and the *Tartars*, *Saghalian-ûla*: That *Mount Altay* is moſt famous, and ſeparates the *Kalkas* from the *Eluths*: That it was diſtant from the Camp about ſix Weeks Journey, at the Rate

Journey in Tartary. Rate of 50 *Li* a Day, and gives Rise to several great Rivers; as the *Oby*, *Jenisſea*, and the *Irtis*; beſides the *Tum*, the *Hopdo*, and the *Selengha*, which are no inconſiderable ones: That *Mount Hangay* lies to the Eaſt of *Altay*, about 20 Days Journey, or 1000 *Li*, and formerly divided the Dominions of *Tûſhetû Hân* from thoſe of *Shaſaktû Hân*: That between the two Mountains there is a third, called *Kokoye*, but not ſo conſiderable, about 1200 *Li* from *Altay*, and near as many from *Hangay*.

Lakes. The Paykal, 3. THAT there are alſo ſome very remarkable Lakes in this Country, the principal of which is *Paykal*, called by them *Talay* [a], that is, *the Sea*. It extends from South-Weſt to North-Eaſt, and is a good Month's Journey from one End to the other, as a *Ruſſian*, who travelled it in Winter on the Ice, aſſured them: But that in ſome Places he could ſee both Sides of it, and that in the wideſt Parts it might be croſſed in two or three Days. It is full of excellent Fiſh, which aſcend the Rivers that fall-into it: That there is another Lake called *Ekeral Nor*, into which the *Hopdo* diſcharges itſelf, after it has run-along the Mountain *Kokoye*: That the *Kirkir Nor* lies to the Eaſt of *Mount Hangay*, and at a good Diſtance from the Rivers *Konghey* and *Shapkam*, which riſe in that Mountain, and after joining their Waters fall-into the Lake: That the *Kirkir* is not above 150, or 160 *Li* in Circuit; but the *Ekeral* is at leaſt 300. The *Ruſſians* told them alſo, that out of *Mount Kentey* ſpring three ſmall Rivers, which they forded in their Way to the Camp: That they paſſed the *Shûra* after three Days March, that is, 140 or 150 *Li* from the Town of *Selengha*; and that about half a Day's Journey from thence they croſſed the *Haras*, thoſe Rivers being every-where fordable. Laſtly, that *Irkutſkoy* is ſeated on the River *Angara*, 100 *Li* from its Fall into the Lake *Paykal*.

Ekeral, and Kirkir.

State of the Kalkas. THE *Kalkas*, who dwell about the Rivers *Tûla*, *Orgon*, and *Selengha*, were formerly Subjects of *Tûſiktû Hân*; but as they did not follow him in his Flight, contenting themſelves with retiring to the Mountains and Woods, they lived in a State of Independency. Hereupon the Emperor invited them to come and dwell near *China*, offering them Lands to inhabit. Their Anſwer was, that they would readily ſubmit to his Majeſty, but could not quit their Settlements without expoſing themſelves to a miſerable Death, becauſe they had neither Horſes ſufficient for travelling, nor Cattle to ſubſiſt on; whereas in their preſent Habitations, they could live by Hunting and Fiſhing, the Woods being full of Bears, wild Boars, Stags, and Deer; whoſe Skins alſo ſerved to cloath them, and cover their Tents. As what they alledged was true, the Emperor permitted them to abide where they were, only ordering that they ſhould divide themſelves into Standards and *Niûrûs*, or Companies. They accordingly formed three Standards, under their three Princes, or *Taykis*, each of whom was made Chief of a Standard. His Majeſty created *Kentu Tayki*, the moſt conſiderable of them, a *Pey-le*, or Regulo of the third Order. The ſecond *Tayki* was made a Count; the third, whoſe Name is *Ariu*, remained a *Tayki*, with only the Title of *Shaſſak*, which ſignifies, in their Language, *the Chief of a Standard*.

Gerbillon. 1698.

In theſe Parts.

AUGUST the 26th, they departed, taking the ſame Road they came, as far as *Ulan-erghi*, on the *Kerlon* [b]; where they arrived the 7th of *September*. The 8th, the Way was partly full of Hillocks. The 9th, the Country was flat. Next Day, it was full of Stones and Hillocks. The 11th, Part ſmooth, and Part ſtony. The 12th, it was ſandy, and full of Briars. They encamped in a Place called *Narat*, mentioned in the Author's firſt Journey [c].

Return homewards.

THE 13th, they travelled the firſt 20 *Li* over Rocks, Stones, and Hillocks; the reſt of the Way a Flat. Next Day, they had a ſmooth Road. The 15th, was interſperſed with a few Hillocks, which ſeemed to contain fine white Marble, and Quarries of Slate. The 16th, the Way was moſtly on a Flat. The two next Days, uneven and ſandy, except for the laſt 15 *Li*, which was full of Buſhes that grew in the looſe Sands. The 19th, the Road, for the firſt 20 *Li*, was full of looſe Sands; the reſt was a firm Sand. The 20th, they reſted, though they found but little Forage.

Marble Quarries.

September

8 *Journey in Tartary.*

THE 21ſt and 23d, the Road was partly looſe, and partly firm Sand. The laſt Day, they found but very little Forage. One of the richeſt *Mongol* Princes in the Country had his Camp not far from theirs. They ſay he has above 10,000 Horſes, and other Cattle in Proportion. He is a Regulo of the ſecond Order, and Chief of a Standard. The 24th, the Soil was ſandy; but, next Day, full of Stones and Rocks, ſticking out of the Ground. Here were the ancient Limits which ſeparated the *Mongols*, ſubject to *China*, from the *Kalkas*.

Rich Mongol Prince.

Ruined City.

THE 26th, the Road was pretty good, with ſome ſmall Hillocks of hard Sand. The 27th, it was all a fine hard Sand, and they found excellent Forage round their Camp. The 28th, the Country was the ſame as before. They encamped among ſeveral little *Mongol* Camps, where was a Spring, ſome Wells, and good Forage. The 29th, the Soil was ſometimes hilly, ſometimes flat. This Day, they ſaw the Walls of a ruined City; and, the next, had a fine, ſmooth Road.

Mongol Camps.

OCTOBER 1, the Way was good for the firſt 40 *Li*; the reſt lay between Hills covered with Shrubs and Buſhes. They ſaw many Camps of *Mongols*. The 2d, they marched the firſt 25 *Li* between very high and ſteep Mountains, full of Rocks, in a narrow Gut, along which runs the Rivulet they encamped-by the Evening before. They croſſed it above 20 Times, and having paſſed this Streight, entered into a beautiful Plain, in which ſtands the City of *Hûhû-hotun*, or *Kûkû-hotun*.

Kuku-hotun.

THE Road, from this City to *Pe-king*, has been already deſcribed. Beſides, as the whole Way is one continued Deſart, without Rivers, Habitations, cultivated Lands, or Trees, it cannot afford many Objects worth remarking: In ſhort, they arrived at *Pe-king* on the 13th of the ſame Month [a].

a The Jesuits, who made the Map of *Tartary*, found the Latitude of this Place almost five Minutes less. See before, *p.* 390. f. Whence it may be presumed, there is an Error of a few Minutes in all the other Latitudes, as hath been already observed: However, they must be of Use to the Geographer, as they serve to fix the Situations of a great Number of Places, which were not determined by the later Missioners.
